CREATURE is the somewhat loose rendering of *nephesh* (נֶפֶשׁ), *breathing* being, in Gn and Lv (once in Gn—1[20]—of *sherez* (שֶׁרֶץ), *swarming* being, or, as it is there put, *moving* creature), and, in Ezk, of *ḥai* (חַי), *living* being (rendered, in each case, *living creature*). In NT, quite accurately, it represents *κτίσμα*, and shares with *creation* the representation of *κτίσις*. Neither *κτίσμα* nor *κτίσις* is ever employed by the LXX as a tr. of *nephesh*, *sherez*, or *ḥai*, the favourite equivalents for these words respectively being ψυχή, ἑρπετόν, and ζῶον. In Gn the verb *bārā'* (בָּרָא, 'create') is tr. solely by ποιεῖν: κτίζειν represents it first in Dt 4[32], and afterwards more usually than ποιεῖν; while both stand for it, sometimes side by side, in Deutero-Isaiah (*e.g.* 45[7]). Since ποιεῖν is simply *to make*, while κτίζειν is (classically) *to found* (a city, a colony), and so *to make from the beginning, originally, for the first time* (not necessarily out of nothing), κτίζειν is especially fitted to express God's creative activity not only in the physical (Ec 12[1], Ro 1[25]), but also in the spiritual sphere (Col 3[10]. For an OT premonition of the spiritual sense, see Ps 51[12], where *create*, κτίζειν, and *renew*, ἐνκαινίζειν, recall together the καινὴ κτίσις, *new creature*, of 2 Co 5[17]). The use of the subst. κτίσις exactly corresponds. In contradistinction to κτίσμα, which points to the creative act completed and embodied, it denotes sometimes the creative act in process (Ro 1[20]), at other times the thing created, regard being paid to the process of its production. It is used (1) *physically* (*a*) of the *whole creation* (so invariably in OT and Apocr.; in NT, Ro 8[22]), often with special reference to mankind as *the* creation (Mk 16[15], Col 1[23]); (*b*) of the *individual creation*, the *creature* (like the purely physical κτίσμα of the Apocr. and NT), Ro 8[39]; (2) *spiritually*, of the *new creature* (2 Co 5[17], Gal 6[15]), and the *new creation* (Ro 8[20-23]) in Christ Jesus, the original and originator of the new race, and the renovator of nature as a whole. Cf. the rabbinical expressions *bĕrîyah ḥădāshāh*, 'new creation,' of a man converted to Judaism; and *ḥiddûsh ha'ôlām*, 'the new age' (lit. *newness of the age*) to be ushered in by the Messiah; also Isaiah's 'new heavens and new earth' (65[17]), the παλιγγενεσία, *regeneration* (Mt 19[28]), and the ἀποκατάστασις πάντων, *restitution of all things* (Ac 3[21]). The classical sense of κτίζειν, *to found*, occurs only in 1 Es 4[53], but is traceable in the meaning of κτίσις in 1 P 2[13], πάσῃ ἀνθρωπίνῃ κτίσει, 'every *institution*, i.e. *ordinance*, of man.'

J. MASSIE.

CREDIT.—1 Mac 10[46] 'When Jonathan and the people heard these words, they gave no credit unto them' (οὐκ ἐπίστευσαν αὐτοῖς, RV 'credence'). Cf. Introd. to Rhemish NT, 'The discerning of Canonical from not Canonical, and of their infallible truth, and sense, commeth unto us, only by the credite we give unto the Catholike Churche.'

J. HASTINGS.

CREDITOR.—See DEBT.

CREED.—A creed is an authorized statement or definition of religious beliefs. The name is usually limited in its application to the three formulas known as the Apostles', the Nicene (or Constantinopolitan), and the Athanasian. The history of these documents has been the subject of minute and elaborate investigation. The most convenient collection of the materials for study is to be found in Hahn's *Biblioth. d. Symb. u. Glaubensreg. d. alt. Kirche*[3], 1897. The earliest traces of the Apostles' Creed are investigated in vol. i. pt. 2, of Gebhardt, Harnack, and Zahn's *Patr. Apost. Op.*, and Harnack, *Anhang* to Hahn (ed. 2); and the recent controversy as to its original meaning, and the source of certain clauses, is accessible in Harnack, *Apost. Glaubensbek.*, and Swete, *Apostles' Creed.* As Swainson has observed, it is necessary to remark that until the tenth century the name 'apostles'' or 'apostolic' was applied to the Nicene as well as to the Western symbol to which it is now appropriated; both were regarded as embodying the apostolic teaching, and the epithet 'apostolic' does not always entitle us to say that the Latin symbol is the one meant. But the purpose of this article is not to enter on the origin and history of the creeds, but to indicate their biblical suggestions or anticipations.

Pagan religion was a rite rather than a doctrine; if the ceremonial were duly performed, the worshipper was at liberty to interpret it, or leave it unexplained, as he pleased. The myths which in a certain sense rationalize ritual do not amount to a doctrine; there is nothing in them binding the reason or faith of the worshipper; and pagan religion has no theology or creed. Neither has it a historical basis, which might be exhibited and guarded by a solemn recital of sacred facts. In both respects it is distinguished from the religion of revelation. This rests upon facts, which have to be perpetually made visible, and upon an interpretation of those facts, without which they lose their value and power as a basis for religion. This is true both of OT and NT stages in revelation, but it is in the latter only that we can be said to see the first approaches to the formation of a creed. The Ten Words, with their demand for monolatry, if not their proclamation of monotheism, might be regarded as the 'symbol' of the ancient religion: the *Shema*—Hear, O Israel, J″ our God is one J″—in Dt 6^{4} is the nearest approach to the enunciation of a doctrine. In NT there are various more distinct indications, sometimes of the existence, sometimes of the contents, of what would now be called a creed. The emphasis which Jesus lays upon faith in Himself makes Him, naturally, the principal subject in these. The Christian creed is a confession of faith in Him; there is nothing in it which is not a more or less immediate inference from what He is, or teaches, or does. The early confession of Nathanael (Jn 1^{49}), 'Rabbi, thou art the Son of God; thou art the King of Israel,' is the germ of a creed. There is probably more, though not everything, in Peter's confession at Cæsarea Philippi (Mt 16^{16}), 'Thou art the Christ, the Son of the living God.' The exclamation of Thomas in Jn 20^{28} goes further still. We may infer from such passages as 1 Co 12^{3} ('Jesus is Lord') and Ro 10^{9} ('If thou shalt confess with thy mouth that Jesus is Lord, and believe in thy heart that God raised him from the dead'), that a confession of the exaltation of the crucified Jesus was the earliest form of Christian creed. Cf. Ac 2^{36}. Some such confession seems to have been connected from the beginning with the administration of baptism. This appears from the ancient interpolation in Ac 8^{37} in which the eunuch is made, before his baptism, to say, 'I believe that Jesus Christ is the Son of God'; but still more from Mt 28^{19}. The formula, 'into the name of the Father and of the Son and of the Holy Spirit,' which is here prescribed for baptism, is undoubtedly the outline on which both the Western (Apostolic) and the Eastern (Nicene) symbols were moulded; and candidates for baptism were at a very early date required to profess their faith, sometimes in the very words of those symbols, sometimes in forms virtually equivalent to them. (See BAPTISM.) It has indeed been pointed out that where baptism is mentioned historically in NT, it is 'into the name of the Lord Jesus' (Ac 8^{16} 19^{5} etc.), not into the triune name of Mt 28^{19}; but the surprise of St. Paul in Ac 19^{3} that any one could have been baptized without hearing of the Holy Spirit, is fair evidence that the Holy Spirit *was* mentioned whenever Christian baptism was dispensed (observe the force of *οὖν* in Ac 19^{3}). Expansions of this trinitarian formula constituted what Irenæus calls 'the canon of the truth which one receives at baptism' (Iren. *Hær.* I. x. 1, and the note in Harvey's ed. vol. i. p. 87 f.). Such expansions, however, are hardly to be found in NT. The brief summaries of Christian fundamentals are usually of a different character. Thus St. Paul mentions, as the elements of his gospel in 1 Co 15$^{3f.}$ Christ's death for sins, His burial, and His resurrection. In 1 Ti 3^{16} there is what is usually considered a liturgical fragment, defining at least for devotional purposes the contents of 'the mystery of godliness,' the open secret of the true religion. There the first emphasis is laid on the Incarnation—He who was manifested in the flesh; and the last on the Ascension—He who was received up in glory. As in the individual confessions mentioned above, Christ is the subject throughout. It is difficult to say whether the summaries of his gospel in which St. Paul delights, sometimes objective as in Ro 1$^{3f.}$, sometimes subjective as in 2 Th 2$^{13f.}$, Tit 3$^{4-7}$, influenced the formulation of Christian truth for catechetical purposes, or were themselves due to the need for it; but it is obvious that outlines of gospel teaching, such as the apostles delivered everywhere, must soon have been required and supplied. Such an outline may be referred to in 2 Ti 1^{13}—*ὑποτύπωσιν ἔχε ὑγιαινόντων λόγων*—though it may well be the case that something is denoted much more copious than anything we call a creed: a catechist's manual, for instance, such as might contain the bulk of one of our gospels. It is usual to assume that by *παραθήκη* or *παρακαταθήκη* (1 Ti 6^{20}, 2 Ti 1^{13}) is meant 'the faith once delivered to the saints,' in the sense of a creed or deposit of doctrine; and though good scholars dispute this, and suppose the ref. to be to Timothy's vocation as a minister of the gospel, the assumption is probably correct. For in the first passage the *παραθήκη* is opposed to 'profane babblings and oppositions of knowledge falsely so called, which some professing have erred concerning *the faith*'; and in the second, it is evidently parallel to the 'form' or 'outline of sound words.' There are several passages in which St. Paul uses the word *κήρυγμα* to denote the contents of his gospel (Ro 16^{25}, Tit 1^{3} *κήρυγμα ὃ ἐπιστεύθην ἐγώ*) in a way which suggests that idea of the gospel which would naturally find embodiment in a creed. The *τύπος διδαχῆς* of Ro 6^{17} is evidently wider than anything we mean by creed. There is one passage in NT (He 6$^{1f.}$) in which the elementary doctrines of the Christian religion are enumerated, partly from a subjective point of view (repentance and faith), partly more objectively (resurrection and judgment). In one place the reality of the Incarnation is expressly asserted as the foundation of the Christian religion, and as a test of all 'spirits,' in a tone which had immense influence on early Christian dogma (1 Jn 4$^{2f.}$). The creeds of Christendom go back to these small beginnings. The tendency to produce them is plainly as old as the work of Christian preaching and teaching; and their legitimate use, as all these NT passages suggest, is to exhibit and guard the truth as it has been revealed in and by Jesus. If it be true that *the* dogma of Christianity is the Trinity, and that this is the central content of the creeds, it must be remembered that the trinitarian conception of God depends upon the revelation of the Father, and the gift of the Spirit, both of which are dependent on the knowledge of the Son. In other words, it is truth 'as truth is in Jesus.' But on this view of the content of the creeds, we should have to refer for the Scripture basis of them to such passages (besides those quoted above) as 1 Co 12$^{4-6}$, 2 Co 13^{14}, Eph 2^{18}, Jude $^{20-21}$, Jn 14–16. Apart from the authenticity of Mt 28^{19}, these are sufficient to show how instinctive is the combination of Father, Son, and Spirit in the thought of NT writers, and how completely the problem is set in Christian experience to which the Church doctrine of the Trinity, as embodied in the Nicene-Constantinopolitan creed, is an answer. The historical, as opposed to theological, statements in the creeds claim to rest on direct Scripture authority.

LITERATURE.—Swainson, *Apostolic and Nicene Creeds*; Heurtley, *Harmonia Symbolica*; Caspari, *Ungedruckte*, etc., *Quellen z. Ges. d. Taufsymbols u. d. Glaubensregel*; Lumby, *Hist. of Creeds*; Zahn, *Apost. Symb.* (1892); and the works of Hahn, Harnack, and Swete referred to above.

J. DENNEY.

CREEPING THINGS.—Much confusion is sometimes occasioned by the fact that two distinct Heb. terms are (frequently) represented by this expression in the EV.

(1) The term which is most correctly so represented is *rémes* (רֶמֶשׂ), from *rāmas*, to *glide* or *creep*:

under this term 'creeping things' are mentioned Gn 1$^{24.\ 25}$ (as created, together with 'cattle,' and 'beasts of the earth' [*i.e.* speaking generally, herbivora and carnivora], on the sixth day); 1^{26} (as given into the dominion of man, together with the 'fish of the sea,' the 'fowl of the air,' the 'cattle and all beasts [Pesh.] of the earth'); 6$^{7.\ 20}$ 7$^{14.\ 23}$ 8$^{17.\ 19}$ (as spared, usually together with 'cattle' and 'fowl,' on occasion of the Flood); in other allusions to the animal kingdom, often by the side of 'beasts,' 'cattle,' 'fowl,' or 'fishes,' 1 K 4^{33} (5^{13}) 'He spake also of cattle, and of fowl, and of *creeping things*, and of fishes,' Hos 2$^{18\,(20)}$; Hab 1^{14} (the Chaldæan makes men to be 'as the fishes of the sea, as the *creeping things*, over whom is no ruler'), Ezk 8^{10} (figures of them worshipped by Israelites), 38^{20}, Ps 148^{10}. In Gn 9^{3} [RV *moving thing*], where the term stands by itself, it is used more generally of all gliding or creeping things (cf. the verb in Gn 1^{28} 7^{21} 8^{19} [RV *moveth, moved*]; Ps 104^{20}): and in Ps 104^{25} of gliding *aquatic* creatures (cf. the verb in Gn 1^{21}, Lv 11^{46}, Ps 69$^{34\,(35)}$ [RV *moveth*]); so also perhaps (note the context, esp. v.^{15}) in Hab 1^{14}. The corresponding verb is often found closely joined to it, Gn 1^{26} 7^{14} 8^{17}, Ezk 38^{20}; or used synonymously, Gn 1^{30} 7^{8} 9^{2} (RV *teemeth*), Lv 20^{25} (RV *id.*), Dt 4^{18} (by the side of cattle, fowl, and fish), cf. Lv 11^{44} (RV *moveth*). These are all the occurrences of either the subst. or the verb. From a survey of the passages in which *rémes* occurs, especially those (as Gn 1^{26}, 1 K 4^{3}) in which it stands beside beasts, fowls, and fishes, in popular classifications of the animal kingdom, it is evident that it is the most general term denoting *reptiles*, which, especially in the East, would be the most conspicuous and characteristic of living species, when beasts, fowls, and fishes had been excluded. Dillm. and Keil (on Gn 1^{24}) both define it as denoting creatures moving on the ground 'either without feet, or with imperceptible feet.' It is often defined more precisely by the addition of 'that creepeth upon the earth,' or (Gn 1^{25} 6^{20}, Hos 2^{18}) 'upon the ground.' The term not being a scientific one, it included also, perhaps, creeping insects, and *possibly* even very small quadrupeds: but the *limitation* of *rémes* to the 'smaller quadrupeds of the earth' (to the *exclusion* of reptiles), which has been devised (Dawson, *Modern Science in Bible Lands*, 1888, p. 28) for the purpose of 'harmonizing' Gn 1 with the teachings of palæontology, is arbitrary, and cannot be sustained.

(2) The other term, also sometimes unfortunately rendered 'creeping things,' is *shéreẓ* (שֶׁרֶץ): this is applied to creatures, whether terrestrial or aquatic, which appear in swarms, and is accordingly best represented by *swarming things.* It occurs (sometimes with the cognate verb) Gn 1^{20} 'let the water *swarm* with *swarming things,*' cf. v.^{21} 'every living soul [see SOUL] that creepeth, wherewith the waters *swarmed*'; 7^{21} (beside fowl and cattle and beast) 'every *swarming thing* that *swarmed* upon the earth'; Lv 5^{2} 'the carcases of unclean *swarming things*'; 11^{10} 'of all the *swarming things* of the waters'; v.^{20} (=Dt 14^{19}), vv.$^{21.\ 23}$ 'winged *swarming things*' (*i.e.* flying insects: locusts are instanced); v.^{29} '*swarming things*, that *swarm* upon the earth' (the weasel, the mouse, and various kinds of lizards are instanced), cf. v.^{31} 'among all *swarming things*'; vv.$^{41.\ 42.\ 43}$ 'every *swarming thing* that *swarmeth* upon the earth'—including (v.^{42}) insects with more than four feet; v.^{44} 'any *swarming thing* that creepeth upon the earth'; v.^{46} 'every living soul that glideth (cf. above, No. 1) in the waters, and every living soul that *swarmeth* upon the earth'; 22^{5} 'whoso toucheth any *swarming thing* by which he may become unclean.' The cognate verb *shāraẓ* occurs also Ex 8^{3} (7^{28}) 'the river shall *swarm* with frogs' (cf. Ps 105^{30}); Ezk 47^{9} 'every living soul that *swarmeth*' (viz. in a river); and fig., of animals generally, Gn 8^{17} (RV *breed abundantly*), and of men, 9^{7} (RV *id.*) Ex 1^{7} (of the Israelites multiplying in Egypt: RV *increased abundantly*). *Shéreẓ* thus denotes creatures that appear in swarms, whether such as teem in the water, or those which swarm on the ground or in the air, *i.e.* creeping and flying insects, small reptiles, such as lizards, and small quadrupeds, as the weasel and the mouse. *Shéreẓ* and *rémes* are not co-extensive; for, though particular animals, as small reptiles, would no doubt be included under either designation, *rémes* would not be applied to flying insects, or (at least properly) to aquatic creatures, nor is it *certain* that it was applied to small quadrupeds, or even to creeping insects; while *shéreẓ* would not probably be used of large reptiles, or of any, in fact, which did not usually appear in swarms.

S. R. DRIVER.

CREMATION.—It is sometimes stated that burning was the ordinary mode of disposing of the dead among all ancient nations, except the Egyptians, who embalmed them; the Chinese, who buried them in the earth; and the Jews, who buried them in the sepulchres. This statement requires a good deal of qualification. Lucian tells us that the Greeks burned their dead while the Persians buried them (*De Luctu*, xxi.); and it is certain that among the Greeks bodies were often buried without being burned (Thuc. i. 134. 6; Plat. *Phædo*, 115 E; Plut. *Lyc.* xxvii.). Among the Romans both methods were in use; and Cicero believed that burial was the more ancient (*De Legibus*, ii. 22. 56). So that Persians, Greeks, and Romans must be added as, at any rate, partial exceptions. Whether religious, or sanitary, or practical reasons were uppermost in deciding between the different methods is uncertain. Where fuel was scarce, cremation would be difficult or impossible.

That the Jews' preference for sepulchres was determined by a belief in the resurrection of the body is very doubtful. The doctrine itself seems to have been of late development; and modern Jews, who accept the doctrine, do not object to cremation. Nevertheless, their forefathers rarely practised it, and perhaps then only as an alternative to what would be more distasteful. The bodies of Saul and his sons were burned by the men of Jabesh-gilead (1 S 31^{12}), perhaps to secure them from further insult by the Philistines, and to make it more easy to conceal the bones. Am 6^{10} gives a horrible picture of a whole household having died, and a man's uncle and a servant being the only survivors left to burn the last body. But we are probably to understand a plague, or something exceptional. That bodies were burned in the valley of Hinnom in times of pestilence is an assertion which lacks support. However large the number of the dead, burial was the manner of disposing of them (Ezk 39$^{11\text{-}16}$). The 'very great burning' made for Asa at his burial (2 Ch 16^{14}) is not a case of cremation, but of burning spices and furniture in his honour (comp. Jer 34^{5}). 'When R. Gamaliel the elder died, Onkelos the proselyte burned in his honour the worth of seventy *minæ* of Tyrian money' (T.B. *Aboda Zara* 11*a*). Comp. 2 Ch 21^{19}. Nor is 1 K 13^{2} an allusion to cremation. Bones of men previously buried are to be burned on the altar to pollute it and render it abominable.

In the NT there is no instance of cremation, whether Jewish, Christian, or heathen; and there is abundant evidence that the early Christians followed the Jewish practice of burial, with or without embalming (Minuc. Felix, *Octav.* xxxix.; Tert. *Apol.* xlii.; Aug. *De Civ. Dei*, i. 12, 13). It was to outrage this well-known Christian sentiment that persecutors sometimes burned the bodies of the martyrs and scattered their ashes in mockery of the resurrection (Eus. *H.E.* v. 1. 62, 63 ; comp. Lact. *Inst.* vi. 12). The example of the Jews, the fact that Christ was buried, the association of burning with heathen practices, and perhaps rather material views respecting the resurrection, have contributed to make cremation unpopular among Christians. But there is nothing essentially antichristian in it : and charity requires us to adopt any reverent manner of disposing of the dead which science may prove to be least injurious to the living. A. PLUMMER.

CRESCENS.—A companion of St. Paul in his final imprisonment, sent by him to Galatia (2 Ti 4[10]), *i.e.* either to Asiatic Galatia,—a view supported by St. Paul's usage elsewhere, and by the context, in which all the other places mentioned lie east of Rome (so *Const. Apost.* vii. 46 ; Tillemont, *Mémoires sur St. Paul*, Note 81 ; Smith, *DB*[2] *s.v.*) ; or possibly to Gaul (so ℵ C, reading Γαλλίαν ; Euseb. *HE* iii. 4 ; Epiph. *Hær.* 51. 11 ; Theodore and Theodoret ad 2 Ti 4[10] ; Lightfoot, *Gal.* pp. 3 and 30). A late Western tradition treats him as the founder of the Churches of Vienne and of Mayence (Gams. *Series Episc.*). His memory is honoured in the Roman martyrology on June 27, in the Greek Menologion on May 30, and there he is treated as one of the seventy disciples, and a bishop of Chalcedon. [*Acta Sanctorum*, June 27 ; *Menologion*, May 30.] The name is Latin, and is found among the freedmen of Nero (Tac. *Hist.* i. 76), the centurions (*Ann.* xv. 11), and the priests of Phœbus (*Inscr. Græcæ*, Sic. et Ital. 1020). W. LOCK.

CRESCENTS.—RV tr. of שַׂהֲרֹנִים Jg 8[21. 26] (AV 'ornaments'), Is 3[18] (AV 'round tires like the moon'). As clearly indicated by its etym. (from Aram. *sahrâ*, 'moon,' with *ôn* as diminutive termination, — for which see Barth, *Nominalbildg.* § 212),—the *sahărôn* was a crescent or moon-shaped ornament of gold (Jg 8[26]), introduced presumably by Syrian traders from Babylonia. In OT we find these crescents worn by Midianite chiefs (Jg 8[26]), by the ladies of Jerus. (Is 3[18]), and hung by the former on the necks of their camels (Jg 8[21]). They were in all probability worn on the breast by a chain round the neck, like the crescents (*hilâlât*) of a modern Arab. belle (see Del. and Dillm. on Is 3[18] ; Keil, *Bibl. Archæol.* Eng. tr. ii. 149 ; Nowack, *Heb. Arch.* i. 129; cf. Jg 8[26b], where the crescents seem to be distinguished from the chains by which they were suspended). Others (*e.g.* Moore, *Comm. in loc.*) consider the latter to have been 'necklaces or collars, the elements of which were little golden crescents.' Originally the crescents were amulets or charms (W. R. Smith in *Journ. of Philology*, xiv. 122–123 ;[*] Wellh. *Skizzen*, iii. 144), although by Isaiah's time they may have become more purely ornamental. A. R. S. KENNEDY.

CRETE.—Crete, the modern Candia, is an island in the Mediterranean, 60 miles to the S. of Greece. Its greatest length from E. to W. is 156 miles, while its width varies from 30 to 7 miles. The orig. inhabitants were prob. a kindred race with those of Asia Minor. C. plays a prominent part in the legendary, as well as in the early historical period. Lying as a convenient stepping-stone between the continents of the Old World, the island was probably colonised by the Dorians in the 3rd generation after their conquest of the Peloponnesus. Homer numbers them together with the Achæans and Pelasgians among the inhabitants. Some striking points of resemblance are noticed by Aristotle (*Politics*, ii. 10) between the institutions of Sparta and those of C., prominent among them being the military training, and the system of common meals. The mythical king Minos, round whom so many legends cluster, is alluded to as a historical person by Thucyd. (i. 4. 8) and Aristotle. He was the first to gain command of the sea; he insured the payment of tribute by the suppression of piracy, and finally failed in an attempt to conquer Sicily. C. was mountainous, fertile, and thickly populated. Its cities were said to be 100 in number (Hom. *Il.* ii. 649; Virg. *Aen.* iii. 106), and elsewhere 90 (Hom. *Od.* xix. 174), the most important being Gnossus, Gortyna (1 Mac 15[23]), Cydonia, and Lyctus. The warlike spirit of the inhabitants, due to their position and training, was fostered by their internal disputes and their fondness for service as mercenaries. Tacitus (*Hist.* v. 2) says that the Jews were fugitives from C., and connects their name, Ἰουδαῖοι, with the mountain in the island called Ida. This probably arose from a confusion between the Jews and Philistines, the latter of whom are called Caphtorim, from Caphtor (Dt 2[23], Am 9[7]), the country from which they migrated to Pal., and may possibly be identified with the Cherethites mentioned 1 S 30[14], Ezk 25[16]. In Jer 47[4] the passage 'the Philistines, the remnant of the isle of Caphtor,' has marginal alternative in RV 'of the sea-coast' for 'isle' ; and in the LXX (Zeph 2[5]) πάροικοι Κρητῶν is found and is tr. 'inhabitants of the sea-coast, the nation of the Cherethites' (RV), and Κρήτη (Zeph 2[6]) = 'the sea-coast.' Caphtor may have been a part of Crete, possibly Cydonia on the N. coast, which contained a river, Jardanus (cf. Jordan), Hom. *Od.* iii. 292. In any case C. was prob. a primitive settlement of the Caphtorim, and the Cretan character resembles in some respects what we know that of the Philistines to have been. The capture of Jerus. by Ptolemy Soter, and the forced emigration of the Jews, B.C. 320, drove many doubtless to C. as well as to Egypt. C. is mentioned in 1 Mac 10[67]. Demetrius Soter, an enemy of the Jews, had retired to a life of self-indulgence in Antioch, and was defeated and killed by the usurper Balas. The latter was in turn attacked by Demetrius Nikator, the son of Soter, who invaded Cilicia from C., and, though joined by Apollonius, the Rom. governor of Cœle-Syria, was defeated by Jonathan Maccabæus near Azotus, B.C. 148.

In B.C. 141 Simon Maccabæus, on the recognition of his authority, renewed the old friendship with the Romans, and obtained from the consul Lucius the promise of protection for the Jews from the inhabitants of Gortyna in C. (1 Mac 15[23]). There is no doubt that, after this date, the number of Jews in the island increased greatly. Internal quarrels among the Cretans led to the invitation to Philip IV. of Macedon to act as mediator, but the effects of his intervention were not lasting. C. was taken by the Romans under Metellus, B.C. 67, and joined to Cyrene and made a Roman province. Under Augustus, Creta-Cyrene became a senatorial province governed by a proprætor and a legatus.

Cretans are mentioned (Ac 2[11]) among the strangers present at Jerus. at the Feast of Pentecost.

St. Paul touched at C. in the course of his disastrous voyage to Rome. Starting from Myra in Lycia, in the charge of a centurion, on board a corn ship of Alexandria, since the winds prevented a straight course, he sailed under the lee of C., *i.e.* S. instead of N. of the island. Skirting the promontory of Salmone (Ac 27[7]) on the E. side, and coasting along the S., the vessel reached an anchorage called Fair Havens, a little to the E. of Cape Matala. Five miles to the E. some ruins have been discovered which may be those of Lasea. This harbour was not considered safe for wintering in, though St. Paul recommended keeping to it. It was getting late in the year. The Fast, *i.e.* the great Day of Atonement, on the 10th day of the 7th month Tisri, about the time of the autumnal equinox, had passed, and the ancients did not usually sail after the setting of the Pleiades, Oct. 20 (Hesiod, *Works and Days*, 619) or the beginning of Nov. The centurion, however, preferred the advice of the master and the owner of the vessel, who wished to reach the shelter of Phœnix on the S.W. of the island. This has usually been identified with Lutro, said to have been called by the ancients Phœnike, the only secure harbour on the S. coast which faced E. (RV). There is no harbour existing at that spot now, but one is marked in some Admiralty charts of the middle of the last cent., and called Lutro. In order to identify Phœnix (Ac 27^{12}) with this roadstead, the forced interpretation of the words *κατὰ λίβα καὶ κατὰ χῶρον*, 'down the S.W. wind and down the N.W. wind,' found in the RVm is adopted. It is better, however, to take the words as in AV in their usual sense, 'lying toward S.W. and N.W.,' esp. as there is a harbour opposite Lutro called Phineka in that position.

---

[*] Smith suggests that the *sahŭrônîm* may have been of horseshoe form, 'so that this is the same kind of amulet which is still often found on stable doors.'

On a gentle S. wind springing up, the attempt was made to reach Phœnix, and the vessel coasted along the S. shore of C. There suddenly, however, blew down from the island (*κατ' αὐτῆς*) a wind, Euraquilo E.N.E., in the teeth of which it was found impossible to sail, so the ship was allowed to scud before the gale to the lee of Cauda (or Clauda, AV), 20 miles S. of Cape Matala, the southernmost promontory of the island. Fourteen days later the vessel was wrecked on the coast of Melita.

It is not known who planted Christianity in C. If St. Paul did so, it must have been before his first imprisonment, possibly in the course of a visit while he was staying at Corinth or Ephesus. Perhaps the Church in the island had been founded by Christian converts. St. Paul seems to imply from his words to Titus (Tit 1^{5}), 'For this cause left I thee in C.,' that he had been to the island. The fact that Titus was left to supply all omissions and appoint elders in every city, shows that the Church had been established long enough to admit the presence of irregularities, and had been imperfectly organised.

The untrustworthy character of the **Cretans** (Κρῆτες, Ac 2^{11} AV Cretes, Tit 1^{12} AV Cretians) was proverbial. St. Paul quotes from one of their own poets, Epimenides (Tit 1^{12}), who lived about B.C. 600, and is called by Plato 'a divine man,' that 'they were always liars, evil beasts, idle gluttons.' Witness to their avarice is also borne by Livy (xliv. 45) and Plutarch Æmilius (§ 23), 'the Cretans are as eager for riches as bees for honey'; to their ferocity and fraud by Polybius and Strabo; and to their mendacity by Callimachus, Hymn in *Jov.* 8, who begins a line *Κρῆτες ἀεὶ ψεῦσται* with the same words as Epimenides.

LITERATURE.—Bunbury, *Hist. of Ancient Geog.*; Weldon's tr. of Aristotle's *Politics*; Rawlinson, *Herodotus*; and the Comm. on Acts, esp. Page, Blass, and Rendall.

C. H. PRICHARD.

CRIB (אֵבוּס).—The earliest meaning of the Eng. word (of which the origin is unknown) is 'a barred receptacle for fodder used in cowsheds and fold-yards; also in fields, for beasts lying out during the winter.' And that is precisely the meaning of the Heb. word *'êbhûs* (fr. אָבַס to feed), which is used Is 1^{3} of a crib for the ass, Pr 14^{4} for the ox, Job 39^{9} for the 'unicorn,' *i.e.* wild ox.

J. HASTINGS.

CRICKET.—See LOCUST.

CRIER.—In this form the word is not found in the Bible, but the verb from which it is derived (קָרָא, *βοάω*) is sometimes used in the sense of *crying aloud*, or *proclaiming*. Of Wisdom it is said that she 'crieth in the chief place of concourse,' Pr 1^{21}; and in answer to the question of the Jews, 'Who art thou?' the Baptist calls himself 'the voice of one crying in the wilderness,' Jn 1^{23}. In ancient times, when men were illiterate, and could not read written mandates, public criers proclaimed the orders of the king or men of authority. In the Middle Ages *heralds*, preceded by trumpeters who announced their mission, made public proclamations. This custom is still carried out in the E. In every town and village a public crier, distinguished for his loud voice, is appointed to give notice on the part of governors or other authorities of some fresh order. Or, going through the streets, or standing on some height, he announces the loss of some article,—sometimes the straying of a young child,—giving a description of the lost object, offering sometimes a reward, and always concluding with a reminder of the divine promise of a 'reward in heaven.' Of this class of public criers is the *muezzin* among Moslems, who at the five appointed times of prayer mounts the minaret, and, after proclaiming the unity and greatness of God, calls men to 'prayer and eternal happiness.' In the quiet watches of the night this cry, heard from many a minaret, is often very impressive.

J. WORTABET.

CRIME.—About 1611 and earlier, 'crime' was used, like Lat. *crimen*, in the sense of charge or accusation; as Grafton (1568), *Chron.* ii. 92, 'The common people raysed a great cryme upon the Archbishop,' and Milton, *Par. Lost*, ix. 1181—

> 'But I rue
> That error now, which is become my crime
> And thou th' accuser.'

In three out of the four occurrences of c. in AV, this is the meaning. In Job 31^{11} (זִמָּה) the Heb., and presumably the Eng., is crime in the mod. sense. But in Ezk 7^{23} 'the land is full of bloody crimes,' the Heb. (מִשְׁפַּט דָּמִים) is 'accusation of bloodshed,' or as RVm, 'judgment of blood.' In Ac 25^{16} 'the c. (RV 'matter') laid against him,' the Gr. *ἔγκλημα* means an accusation, and is so used distinctly in the only other occurrence in NT, Ac 23^{29} (AV and RV 'charge'). Lastly, in Ac 25^{27} 'to signify the crimes laid against him,' the Gr. *αἰτία* certainly means 'accusation' (RV 'charge') as always in class. Greek. Cf. Ac 25^{18} Geneva, 'Against whom when the accusers stood up, they brought no crime of such things as I supposed.'

J. HASTINGS.

CRIMES AND PUNISHMENTS.—*A.* CRIMES. —The term occurs in the Scriptures as a tr. of the foll. words:—מִשְׁפָּט, Ezk 7^{23}; זִמָּה, Job 31^{11}; אָשָׁם, Gn 26^{10}; *αἰτία*, Ac 25^{27}, changed in RV to 'charges,' and 'fault' in AV Jn 18^{38} $19^{4.6}$ to 'crime'; *ἔγκλημα*, Ac 25^{16}, changed in RV to 'matter.' Crime is an act that subjects the doer to legal punishment; a grave offence against the legal order; wickedness; iniquity. In the Bible such an act is regarded as an offence against (1) God or (2) man. The distinction cannot always be maintained, for an injury to the creature is obnoxious to the Creator. For convenience of reference the list appears in alphabetical order.

Adultery in general terms was forbidden in the seventh commandment (Ex 20^{14}). It usually denotes sexual intercourse of a married woman with any other man than her husband, or of a married man with any other than his wife. More specifically in the Isr. as well as Rom. law, the term was confined to illicit intercourse of a married or betrothed woman with any other man than her husband. Other unchaste relations were disapproved, but they were described by different words. It was deemed an outrageous crime, striking at the laws of inheritance and inflicting a spurious offspring on the husband, and was to be punished with death, Lv 20^{10} 19$^{20-22}$, Ezk 16$^{38.\ 40}$, by the act of stoning, Jn 8^{5}. It has been seriously doubted whether the extreme penalty was executed, Lightfoot failing to find the record of a single instance, except of a priest's daughter who was burnt according to the order, but she was unmarried. A bondmaid was only scourged (Lv 19^{20}). Mutilation of nose and ears is mentioned (Ezk 23^{25}). See **Mutilation**. Divorce became a substitute for severer penalties. The word is used to describe the unfaithfulness of the covenant people who dissolved their relation with God (Jer 2^{2} 3^{14} 13^{27} 31^{32}, Hos 8^{9}), and those who rejected Christ are described as an 'adulterous generation' (Mt 12^{39} 16^{4}, Mk 8^{38}).

Affray.—He who inflicted an injury was required to pay for loss of time and the medical expenses, and an especial consideration for a pregnant woman indirectly injured (Ex 21$^{18.\ 19.\ 20-22}$). A certain form of vicious attempt was to be summarily and pitilessly punished (Dt 25$^{11.\ 12}$).

Assassination.—See **Murder.**

Assault, resulting in damage, incurred the penalty of retaliation. The *gêr* as well as the home-born was protected (Lv 24$^{19-22}$).

Bestiality, treated as a rank and mortal offence (Ex 22^{19}, Lv 18^{23} 20$^{15.\ 16}$). The Talm. gives as a reason for slaughter of the beast, that all memory of the low transaction might be obliterated. The crime was charged on the Canaanites, and was said to exist in Egypt.

Blasphemy.—An irreverent use of the name of God, accompanied with cursing (Lv 24$^{10-14}$); a presumptuous deed, or, RV, an act done 'with a high hand' (Nu 15^{30}); contempt towards God. See separate article.

Breach of Covenant.—In this term are included: (1) A failure to observe the Day of Atonement (Lv 23^{29}); work on that day (Lv 23^{28}). (2) The Sacrifice of Children to Molech (Lv 20^{3}). (3) Neglect to Circumcise the holy seed (Gn 17^{14}, Ex 4^{24}). (4) An unauthorized manufacture of the holy Oil (Ex 30^{33}), and (5) Anointing a Stranger therewith (Ex 30^{33}). (6) Neglect of the Passover (Nu 9^{13}).

Breach of Ritual.—(1) Eating Blood, whether of fowl or beast (Lv 7^{27} 17^{14}); because God has sanctified the life to Himself. (2) Eating Fat of the beast of sacrifice (Lv 7^{25}); regarded as insanitary. (3) Eating Leavened Bread during the passover (Ex 12$^{15.\ 19}$). (4) Offering a sacrifice after the appointed time (Lv 19^{8}). See 7$^{15-18}$. (5) Failure to bring an Offering when an animal is slaughtered for food (Lv 17^{4}). The notion that such was dedicated to a deity existed even in Egypt. (6) Offering a sacrifice while the worshipper is in an Unclean condition (Lv 7$^{20.\ 21}$ 22$^{3.\ 4.\ 9}$). (7) Manufacturing holy Ointment for private use (Ex 30$^{32.\ 33}$). Perfume was regarded by the Semites as a holy thing (Pliny, xii. 54; see W. R. Smith, *RS* p. 433). (8) Using the same for Perfume (Ex 30^{38}). (9) Neglect of Purification in general (Nu 19$^{13.\ 20}$). The offender 'defileth the tabernacle of the Lord.' Cf. 1 Co 3^{17}. (10) Slaughtering an animal for food away from the door of the Tabernacle (Lv 17$^{4.\ 9}$). The order was designed to enforce religious proprieties in eating, and to prevent formal worship elsewhere. Even the *gêr* must comply. (11) Touching holy things (RV the sanctuary) illegally (Nu 4$^{15.\ 18-20}$). See 2 S 6^{7}, 2 Ch 26^{21}.

Breach or Betrayal of Trust, including false dealing 'in a matter of deposit, or of bargain, or of robbery, or oppression,' and involving the concealment of stolen goods, was regarded as a crime to which not only a penalty was attached, but a sacrificial service was required for expiation (Lv 6$^{2-7}$). In this may be included breach of contract, which was also severely condemned in the religion of the ancient Persians (Zend. *Farg.* iv.). The removal of landmarks as set by God is an offence that exposes to the divine curse, Dt 19^{14} 27^{17} (Jos. *Ant.* IV. viii. 18.). It was wrong to move them when set by the fathers (Pr 22^{28} 23^{10}).

Bribery in general was forbidden, Ex 23^{8}, Dt 16^{19}, and condemned, 2 Ch 19^{7}, Job 15^{34}, Ps 26^{10}, Pr 6^{35} 17^{23}, Is 1^{23} 33^{15}, Ezk 22^{12}. It was a vice to which rulers seem to have been addicted (1 S 8^{3} 12^{3}, Am 5^{12}).

Burglary.—See **Robbery.**

Debt, while it might be a misfortune, could be incurred so as to expose to penalty where the insolvency was the result of fraud or neglect (Mt 5^{26} 18$^{28-34}$). Perhaps punishment was inflicted to deter others, rather than as a vindictive act against the offender. In Egypt he was subjected to the bastinado (Wilkinson, *Ancient Egyptians*, 1854, ii. 211). See separate article.

Divination.—See MAGIC and sep. art.

Drunkenness, a vice which, in view of its consequences, may be regarded as a crime (Is 28$^{1.\ 3.\ 7}$ 56^{12}, Ezk 23^{42} RV). Religious abstinence from strong drink was viewed in the same light as refraining from unclean meats (W. R. Smith, *RS* 465). Teetotalism was required of a Nazirite, Jg 13^{4}, and commended, Jer 35^{19}. Inebriety is forbidden in the Koran. See STRONG DRINK and DRUNKENNESS.

Fornication, a sexual vice that was common before the time of Moses, being grossly prevalent in Egypt, as shown in Gn 39^{7} and the evidence of the monuments; also in Babylonia (Rawlinson, *Ancient Monarchies*, iii. 30). Prostitution, a heinous crime (Jos. *Ant.* IV. viii. 9), was not tolerated by the Sin. code, being an abomination in the sight of God (Lv 19^{29}, Dt 23$^{17.\ 18}$). Its price could not be accepted in the sanctuary, Mic 1^{7}, and death by stoning was the penalty for an unmarried woman who had concealed her crime, Dt 22$^{20.\ 21}$. It would seem from the term 'strange woman,' in Pr 2^{16}, that harlots were procured from foreigners. By the Koran a courtesan was not allowed to testify, and, according to the Zendavesta, she might be killed without warrant, like a snake. Her vile methods and their terrible effects are severely portrayed in Pr 2$^{16-19}$ 5$^{3-6}$ 7$^{5-27}$, and as arousing the displeasure of God, Jer 5^{7}, Am 2^{7} 7^{17}. Such excesses were very common among the heathen in the time of the apostles (1 Co 5$^{1.\ 9.\ 10}$ 6^{9}, Gal 5^{19}, Eph 5^{3}). Terms for this vice are frequently used in a symbolical sense, the chosen nation being represented as a harlot or adulteress (Is 1^{21}, Jer 2^{20}, Ezk 16, Hos 1^{2} 3^{1}). Idolatry itself is so designated (Jer 3$^{8.\ 9}$, Ezk 16$^{26.\ 29}$ 23^{37}). Fornication is a type of unholy alliances in the Bk. of Rev, especially in chs. 17, 18, and 19.

Homicide, which consists in taking human life without hatred or thirst of blood, or by mistake or accident, included cases like that of the owner of an ox which gored a man when it was not known to be vicious (Ex 21^{28}); the slaying of a thief overtaken in the night (Ex 22$^{2.\ 3}$); taking life without premeditation, or by casting a stone or missile at random (Nu 35$^{22-23}$), or by the slipping of an axe-head from its helve (Dt 19^{5}). See Dt 22^{8} and art. GOEL.

Idolatry.—See separate article.

Incest.—Carnal intercourse is treated as criminal when between a man and his mother, step-mother, half-sister, grand-daughter, step-sister, aunt, wife of an uncle, daughter-in-law, sister-in-law, step-daughter, step-grand-daughter (Lv 18$^{6-18}$); or his mother-in-law (Dt 27$^{20.\ 23}$). Mention of an own sister is omitted as too gross to consider.

Infanticide.—See **Murder.**

Kidnapping was a mortal offence (Dt 24^{7}).

Lying, an attempt to deceive by speaking an untruth, was forbidden in the Mosaic law (Lv 19^{11}), and included in the category of sins against God. It was a common evil among Oriental people, but considered very disgraceful (Wilkinson, *Anc. Egyptians*, 1854, ii. 207). The prophets especially fulminated against the effort to lead the people astray by false teaching (Is 9^{15} $28^{15.\,17}$, Jer 14^{14} $27^{10.\,14.\,15.\,16}$, Ezk 21^{29}, Mic 1^{14}, Zec 13^{3}, and many other passages). Falsehood is severely rebuked in Ps 62^{4} 119^{69}, Pr $14^{5.\,25}$ $19^{5.\,9}$. In NT it is regarded as a sin odious to God (Ac $5^{3.\,4}$); contrary to the essence of the gospel (1 Jn 1^{6} $2^{21.\,27}$); and disqualifying the perpetrator for the new order (Rev $21^{8.\,27}$ 22^{15}). It is associated with perjury (1 Ti 1^{10}). See OATH, WITNESS, and LYING.

Malice, that was made apparent in tale-bearing, lying in wait for blood, secret hatred, and bearing a grudge, is condemned (Lv $19^{16\text{-}18}$).

Murder, according to the divine word, is a crime against which all nature revolts (Gn $4^{10.\,23.\,24}$). The sanctity of human life is founded on the fact that man was made in the image of God (Gn 9^{6}). Murder may be instigated by hatred (Nu $35^{20.\,21}$); or by thirst for blood, prompted by premeditated design (Dt 19^{11}); or accomplished by deceitful stratagem (Ex 21^{14}). **Assassination** is an aggravated form in which life is destroyed by surprise or unexpected assault and treacherous violence (2 S $4^{5.\,6}$), and the following instances occur: Eglon, Jg $3^{20\text{-}22}$; Ishbosheth, 2 S $4^{5.\,6}$; Nadab, 1 K $15^{27.\,28}$; Sennacherib, 2 K 19^{37}, 2 Ch 32^{21}; Gedaliah, Jer 41^{2}. In the times of Felix and Festus there appeared a fanatical faction of Jewish patriots known as Sicarii, armed with daggers, *siccæ*, who, flitting about unobserved among the crowds during festival seasons, removed opponents by assassination, and then feigned deep sorrow to avert suspicion. See Ac 21^{38} (Jos. *Ant.* XX. viii. 5, *Wars*, II. xiii. 3, II. xvii. 6, IV. vii. 2, ix. 5, VII. viii. 1, x. 1, xi. 1; Schürer, *HJP* I. ii. 178, 185). There is no mention of **parricide** and **infanticide** in the Mosaic code, as if these crimes were not known to exist or be possible. In Egypt the parent was doomed to embrace the corpse of the child for three days (Wilkinson, *Anc. Egyp.* ii. 209); and while the Koran condemned prenatal murder as well, E. H. Palmer states in a note to Koran vi. 137, that female children were buried alive in Arabia. The following cases of **suicide** appear: Saul and his armour-bearer, 1 S $31^{4.\,5}$; Ahithophel, 2 S 17^{23}; Zimri, 1 K 16^{18}; Judas Iscariot, Mt 27^{5}; also Ptolemy Macron, 2 Mac 10^{13}, and Razis, 2 Mac $14^{41\text{-}46}$. It could be treated as a crime by the Jews (Jos. *Wars*, III. viii. 5), but there is no mention of penalty in the Scriptures. Murder in all its forms is forbidden in Ex 20^{13}, Dt 5^{17}. No sanctuary was to be allowed to the criminal (Ex 21^{12}, Lv $24^{17.\,21}$, Nu $35^{16.\,18}$, Dt $19^{1\text{-}13}$, 1 K $2^{28\text{-}34}$). In poetic thought the voice of blood shed cried for vengeance until the murderer was punished (Gn 4^{10}). A woe is pronounced on the city that is regarded as guilty (Ezk $24^{6\text{-}8}$); and when unsuccessful, after the most diligent efforts, in detecting the criminal (Jos. *Ant.* IV. viii. 16), it must by an elaborate and impressive ceremony exonerate itself (Dt $21^{1\text{-}9}$). So sacred was the regard for human life, that the owner of an ox known to be vicious and causing death was held guilty of a capital crime, and the ox was stoned (Ex 21^{29}). In Egypt, he who witnessed a murder without giving information of it was considered *particeps criminis*.

Irreverence and Unkindness to Parents.—The command to honour father and mother (Ex 20^{12}), also inculcated in the Koran (xvii. 24. 25), rests on a sacred relation corresponding to that of the divine creation. God's majesty is violated when parents are dishonoured (Ex 22^{14}). Hence the following are prohibited: (1) Cursing father or mother (Ex 21^{17}, Lv 20^{9}). Examples of this offence in practice are condemned in Mt $15^{4\text{-}6}$, Mk $7^{9\text{-}12}$. (2) Striking (Ex 21^{15}). This was a capital crime (Dt $21^{18\text{-}21}$). It is possible that insolence to parents was condonable by reformation, and there are evidences that the laws were not invariably executed with extreme rigour. Jos. (*Ant.* XVI. xi. 2) recounts an ineffectual attempt of Herod at Berytus to get rid of his sons on this charge.

Prophesying Falsely.—See PROPHECY.

Prostitution.—See *Fornication*.

Rape, a foul crime that demanded capital punishment (Dt 22^{25}). See *Seduction*.

Robbery, when the act is accompanied with violence, as burglary, placed the offender beyond protection (Ex 22^{2}). The Egyp. law was similar. Various degrees of the crime were recognized, it being a capital offence to take the 'devoted thing' (Jos 7^{25}), or to steal a man (Ex 21^{16}, Dt 24^{7}). See *Kidnapping*.

Sabbath-Breaking.—See SABBATH.

Seduction consisted in the enticement of an unbetrothed virgin, for which restitution was to be made by subsequent marriage, unless the father interposed an obstacle, but then the usual dowry was exacted (Ex 22^{16}). In Dt 22^{28} it is stated that a fine of 50 shekels was required, and there is no hint of possible compromise. Selden (*Heb. Laws*) states that the Sanhedrin added other mulcts, because this was so insignificant: one for the shame and dishonour; one for the loss of virginity and the vitiating of the body, and still another if force had been used; and some account was taken of the quality and station of the person injured (see W. R. Smith, *RS* 276). An offending bondmaid was scourged, and her enticer, besides paying the fine, must make a trespass-offering (Lv $19^{20\text{-}22}$).

Slander was prohibited, though no punishment is named (Ex 23^{1}) except when a wife's chastity was falsely impeached (Dt $32^{13\text{-}19}$). See separate article.

Sodomy was delicately but positively condemned in Gn 13^{13} $19^{5.\,7}$, and regarded as an abomination (Lv 18^{22} 20^{13}). On this crime the Koran and Zendavesta likewise are very severe. The Israelites were not always innocent. It was an evil practised in religious ceremonies, as appears from the terms קָדֵשׁ and קְדֵשָׁה (Gn 38^{21} and Hos 4^{14}), which show that both males and females were set apart for such flagitious uses; but if allowed in heathen temples, it was never to be permitted in the worship of J″, Dt 23^{17}, 1 K 14^{24} 15^{12} 22^{46}, 2 K 23^{7}, Job 36^{14}, Hos 4^{14} (W. R. Smith, *RS* 133).

Speaking Evil of Rulers.—In the theocracy rulers are regarded as standing in the place of God, and so all reproachful words are prohibited. In Ex $22^{8.\,28}$, Jg 5^{8}, 1 S 2^{25}, Ps $82^{1.\,2.\,6}$ the term אֱלֹהִים is used so as to imply that judges or legal officers are divine representatives.

Swearing Falsely was never excusable even on behalf of the poor (Ex 20^{16} $23^{1\text{-}3}$); but when it was directed against the innocent, it was so aggravated a crime as to permit of no reprieve or pity (Dt $19^{16\text{-}21}$). See LYING and OATH.

Theft involved the culprit, when convicted, in fines of varying grades, and it has been thought, from Pr $6^{30.\,31}$ compared with Ex 22^{1}, that the evil was more prevalent in the later history of the people. Harmer (*Observations*, ii. 194) shows that it was shameful to steal in a caravanserai (Sir 41^{19}). In later times it was not considered a crime to steal from a Samaritan or another thief.

Uncleanness as the result of incontinence, lack of restraint, or self-abuse, was forbidden directly (Lv 18^{19} 20^{18}); marked with the divine displeasure (Gn 38^{10}); and indirectly disapproved (Lv $15^{1\text{-}18}$). The Zendavesta pronounces a similar condemnation, and allows of no atonement for the last-named. See separate article.

Usury might not be taken from Isr. brethren, although the foreigner (*nokhri*) was expressly excluded from this and similar privileges (Ex 22^{25}, Dt $23^{20.21}$). The practice was forbidden by Egyp. laws, and is reproved in the Koran (xxx. 38). In various passages those who abstain from the evil are commended (Dt 15^{7-11} 24^{13}, Ps 15^{5} $37^{21.26}$ 112^{5}, Pr 19^{17}, Ezk 18^{17}). Extortionate and oppressive dealing is condemned (Job 22^{6} $24^{3.7}$). See sep. article.

B. PUNISHMENTS.—Punishment is defined as 'pain or any other penalty on a person for a crime or offence by an authority to which the offender is subject; any pain or detriment suffered in consequence of wrong-doing' (*Standard Dict.*). This article will describe some forms of suffering inflicted on victims who might not be guilty of legal offences. Various words in OT are tr. by 'punishment,' but the Heb. word that most frequently represents the idea is פָּקַד, in the sense of 'visit.' In NT the word is employed generally as a tr. of *κόλασις* and *τιμωρία*; also of *δική* (2 Th 1^{9}), *ἐπιτιμία* (2 Co 2^{6}), *ἐκδίκησις* (1 P 2^{14}). Its purpose is not so much to execute vengeance as to deter from further violations, so that the offender 'will hear and fear and do no more presumptuously' (Dt 17^{13} 19^{20}). It was the belief of the Israelites that crimes were encouraged by indulgence (Jos. *Ant.* VI. vii. 4). The ancient Parsees taught that crime was punished in the next as well as in this world (Darmesteter, *Sac. Bks. E.* p. xcvi). The term is properly restricted to penalty for violation of law; but suffering has often been imposed on the innocent and weak, as if these had transgressed order, when it meant no more than the arbitrary will of one in superior authority. Punishment may extend to the forfeiture of life, and is then known in common law as Capital. In the Bible one thus liable is described as having committed a sin of death (Dt 22^{26}); a sin worthy of death (Dt 21^{22}). Such as he are said to be 'sons of death' (1 S 20^{31} 26^{16}, 2 S 12^{5}), or 'men of death' (19^{28}). 'He shall be put to death for his own sin' (Dt 24^{16}, 2 K 14^{6}). See also Jn $8^{21.24}$: 'Ye shall die in your sin.' Various modes of inflicting the penalty are mentioned, some of them as legally authorized among the chosen people, and others as administered by other nations or without regular warrant. The larger class of penalties was of secondary grade, and various means were devised to punish the offender and deter others from repeating the crime.

The following are either alluded to or mentioned in the Bible and the historical or literary works of the people of Israel:—

Anathema (*ἀνάθεμα*).—See sep. art. CURSE.

Banishment.—There was no provision in the Mosaic code for exile, unless it is to be understood that in some instances he who was cut off from the congregation was expelled from his country as well as from his people. Temporary exclusion was ordered in the case of Miriam (Nu 12^{15}). In the Pers. period it appears as a possible penalty, Ezr 7^{26} (Rawlinson, *Anc. Mon.* iii. 194). The Rom. authority resorted to this measure in the case of John, the author of the Apoc. (1^{9}), and it was much dreaded by the Jews (Jos. *Ant.* XVI. i. 1). A wholesale deportation, as a military measure, was made by Sargon, king of Assyria (2 K 18^{11}). The flight of Absalom to Geshur to escape his father's displeasure after Amnon's assassination (2 S 13^{38} $14^{13.14}$), and of Jeroboam to Egypt to avoid king Solomon (1 K 11^{40}), are cases of voluntary exile, but not formal punishment.

Beating (*τυμπανισμός*, He 11^{35}).—The bastinado was in common use among the Egyptians for thefts, petty frauds, and breach of trust. With it the male adulterer was punished. In minor offences a stick was used. A debtor was often beaten (Wilkinson, *Anc. Egyp.* ii. 210 ff.). In Assyria a mace was used to crush the skull (Layard, *Nin. and Bab.* 458). Though designed as a chastisement for slaves by the Greeks, a criminal might be beaten to death (2 Mac $6^{19.28.30}$). See **Braying**.

Beheading.—A capital punishment not sanctioned in Mosaic law, but frequently practised among the Assyr., Pers., Gr., Rom., and others. A cut in Rawlinson's *Ancient Monarchies* shows the victim standing upright, while the executioner seizes him by a lock of the hair in despatching him. In this way the chief baker who incurred Pharaoh's displeasure may have suffered (Gn 40^{19}), the subsequent suspension of the body being an added reproach (see **Hanging**). It is doubtful whether the seven sons of Gideon were thus slain, Jg 9^{5} (see **Slaying with Spear or Sword**. Ahab's seventy sons lost their heads by command of Jehu (2 K 10^{6-8}). The head of John the Baptist was severed by order of Herod (Mt $14^{8.10}$, Mk 6^{27}). Thus also suffered James the Apostle (Ac 12^{2}). Many of the early martyrs were beheaded (Rev 20^{4}). The head of Ishbosheth was removed after death (2 S 4^{8}). Whether Sheba was slain before he was beheaded is not stated (2 S 20^{21-22}).

Blinding.—The only legal authority for putting out the eyes under the Mosaic dispensation would be found indirectly in the law of retaliation 'an eye for an eye' (Ex 21^{24}, Lv 24^{20}, Dt 19^{18-20}), and therefore the punishment would be seldom inflicted. There is an indistinct reference to something of this sort in boring out the eyes of the spies (Nu 16^{14}). As practised by foreign nations, the Assyrians and Babylonians sometimes using hot irons for the purpose, it was rather designed to incapacitate the victim from rebellion, revolt, or the power of doing further harm. Thus Samson suffered (Jg 16^{21}). Zedekiah lost his eyes partly as a vindictive visitation, but more to effectually unfit him for rulership (2 K 25^{7} and Jer 52^{11}). In Persia it was inflicted for rascality, thieving, and rebellion. Criminals were not permitted to look on the face of the king (Est 7^{8}). Nahash the Ammonite threatened that he would thrust out the right eyes of the inhabitants of Jabesh-gilead as a reproach on Israel, 1 S 11^{2} (Rawlinson, *Anc. Mon.*; Harmer, *Observations*).

Branding and Burning.—It has been surmised that in some cases where burning was inflicted as the punishment for unchastity, it meant branding on the forehead as a mark of shame. If, however, the extreme penalty is intended, it is represented as of pre-Mosaic authority, and was proposed for Tamar (Gn 38^{24}). The Sinaitic law directs that a priest's daughter shall be burned for fornication (Lv 21^{9}); and that this shall be the form of punishment for incest with a wife's mother (Lv 20^{14}). Fire from the Lord supernaturally slew Nadab and Abihu (Lv 10^{1-3}). Burning alive or scorching was practised by the Phil. (Jg 14^{15}), and associated with a sort of confiscation (12^{1}); also by the Bab. and Chald. (Jer 29^{22}). Esarhaddon burned a king alive (G. Smith, *Assyr. Discov.*), and burning was attempted on Shadrach and his companions (Dn 3). There is an allusion to the practice in Is 43^{2}; see also 2 Mac 7^{5}. Tradition states that Nimrod cast Abraham into the fiery furnace for refusing to worship Chald. gods (Layard, *Bab. and Nin.*; Koran xxi. 68, xxxvii. 95). Cf. Gn 11^{31} with Neh 9^{7}, where אוּר, *'ur*, may be interpreted as light (of a flame). The pouring of molten lead down the throat (Jahn, *Bib. Arch.*) has no other authority than that of Rabbin. statement. Slaves were sometimes branded on the hand (Is 44^{5}), but such disfigurement was forbidden by Jewish law (Lv 19^{28}; cf. Gal 6^{17}). Branding accompanied deportation by the Persians (Rawlinson, *Anc. Mon.* iii. 194).

Braying or Pounding in a Mortar.—This act is mentioned in Pr 27^{22} as unavailing in the cure of a fool. RV specifies that the victim may be bruised as with a pestle among corn (see Nestle, Cheyne, etc. in *Expos. Times*, 1897, viii. 287, 335,etc.). Tennant is authority for the statement that it still remains as a Cingalese penalty. The Turks have been charged with such cruelty, and a king of Canday is said to have compelled a wife to pound her infant child to death. There is probable allusion to this form of punishment in He 11$^{35.36}$, where the faithful are said to have been tortured or beaten (*ἐτυμπανίσθησαν*), and to have had trial of scourgings. It is said that Eleazar was beaten on an instrument like a drum (2 Mac 6^{30}), and Jos. (*De. Macc.* 5, 9) mentions a wheel (*τροχός*) as an instrument of torture. Hazael put men under sledges with iron spikes (2 K 8^{12} 10$^{32.33}$, with Am 1$^{3.4}$), to which also the Ammonites were probably subjected (2 S 12^{31}, 1 Ch 20^{3}). The Talm. is quoted by Lightfoot as saying that Nebuzaradan used iron rakes on some of his captives (Jer 39^{9} 52$^{28-30}$).

Confiscation.—An act for which no provision is made in the Mosaic economy, but authorized in a modified form by Pers. rule, so that a residence might be destroyed; but no mention is made of the forfeiture of property for the benefit of the State (Ezr 6^{11}, Dn 2^{5} 3^{29}). The act described in Ezr 7^{26} seems to convey the idea of modern confiscation.

Crucifixion.—See sep. art. CROSS.

Cutting Asunder.—In carrying out the threat as recorded in Dn 2^{5} and 3^{29}, the body might be cut in more than two pieces. The verb used in Mt 24^{51}, Lk 12^{46}, is *διχοτομεῖν*, which in its etymology signifies severing in two parts.

Cutting off from the People (מֵעַמָּיו, כָּרַת מֵעַמֶּיהָ, כ׳,* LXX *ἐξολοθρεύω*).—A term used in Gn 17^{14} as penalty for neglect of circumcision, and in the law to be employed as a punishment for certain breaches (1) in morals, (2) in the Abrahamic covenant, and (3) in the Levitical ritual. For immorality such as filial irreverence, incest, and unclean connexions, the offender, in at least seven cases, was unquestionably exposed to death (Lv 18^{29} 20$^{9-21}$). In like manner he who does aught presumptuously (RV 'with a high hand'), that is, wilful sin in general, was liable (Nu 15$^{30-31}$). In the breach of the covenant it may be doubted whether the extreme penalty of death was invariably inflicted, as in Ex 30^{33}, Lv 23$^{29.30}$, and Nu 9^{13}. There are instances where the punishment for offences that were kindred to such as are expressly designated as a breach of ritual, meant death. Such are the cases of (1) Nadab and Abihu (Lv 10$^{1.2}$); (2) Korah, Dathan, and Abiram (Nu 16^{33}). These 'perished from the congregation' (see Nu 12^{12}, in which it is stated that Miriam, for leprosy, was 'as one dead' in her temporary exclusion). The punishment in general seems so severe that it has been suggested that it was possibly voidable either by an elaborate atonement on the offender's part (Nu 15$^{27-31}$), or by a divine commutation, the penalty being recorded but not executed. In some instances it meant, perhaps, only deprivation of certain civil and social privileges. There are two such cases: (1) when the people ate of the blood in one of Saul's campaigns (1 S 14^{32}); (2) when king Uzziah offered incense (2 Ch 26$^{19.20}$). On the other hand, in Ex 31$^{14f.}$ the meaning of the penalty as attached to Sabbath-breaking is interpreted as death.†

Divine Visitation.—In the theocratic economy there were certain sins for which the nation at large suffered. The punishment was considered as inflicted by the divine hand, the visitation itself being manifestly due to no human instrumentality, though man was sometimes the executioner of God's will. Divine condemnation was executed against idolatry, Sabbath-breaking, oppression of the poor, covetousness, and other sins which betokened a rebellious or unholy spirit, or for which an individual could not obtain redress. Human agencies might be employed in the administration of the penalty, but God Himself was regarded as the avenger of the wrong. He it was who led the people, for their wickedness, into captivity (Ezr 9^{7}, Jer 15^{2}, Am 9^{4}), threatened them with the curse (Dt 28$^{15-20}$, Jer 24^{9}), with consumption and fever (Lv 26^{16}), and inflammation and fiery heat (Dt 28^{22}), caused the drought (Dt 11^{17} 28$^{23.24}$, Is 5^{6}, Jer 14$^{1-7}$ 50^{36}, Hag 1$^{10.11}$), and famine (Lv 26^{26}, Jer 24^{10} 34^{17}, Rev 6^{8}), kindled a consuming fire (Dt 4^{24}, Is 66^{16}, He 12^{29}), showed His indignation by hail and tempest (Is 30^{30}, Hag 2^{17}), inflicted pestilence and plague (Ezk 6^{11} 7^{15}), exposed to the taunt of proverb and reproach (Dt 28^{37}, 2 Ch 7^{20}, Jer 24^{10}), smote with scourge (Is 10^{26} 28$^{15.18}$), and with the sword in the hands of enemies, as shown in so many passages that the reader may consult a concordance for a complete view of these and all other providential punishments named. His displeasure at Korah was shown by the earthquake (Nu 16^{30}). Idolatry was punished by captivity. Delay of justice provoked war. Perjury invited wild beasts. Neglect of tithes was attended with drought and famine (Schürer, *HJP* II. ii. 91).

Drowning was not distinctively a Jewish punishment. It was the penalty in Babylonia for the wife who repudiated her husband (*Encyc. Brit.* art. 'Babylonia'). Jerome, however, says that offenders were thus sometimes put to death among the Jews as well as among the Romans. There is an allusion to this mode of dying in Mt 18^{6}, Mk 9^{42}. Jos. (*Ant.* XIV. xv. 10) states that some Galileans revolted and drowned the partisans of Herod.

Exposure to Wild Beasts.—Daniel and his enemies were cast into a den of lions (Dn 6), and the practice of thus dealing with offenders is said to be still in vogue in Fez and Morocco. In the use of a strong figure in Mic 4^{13} human beings are represented as being gored or trodden by beasts. The lion from whom St. Paul was said to be delivered (2 Ti 4^{17}) undoubtedly means Nero. No conclusive exegesis has been given of 1 Co 15^{32}. Many are of the opinion that human foes are described, but there is some plausible argument in favour of the literal view. The inroads of wild animals, as by an act of God, are to be regarded as a punishment of Israel for unfaithfulness (Lv 26^{22}, Dt 32^{24}, 2 K 17^{26}). The disobedient prophet, named Jadon according to Jos. (*Ant.* VIII. ix. 1), met death from God by a lion (1 K 13^{26}). Contrariwise, the righteous are protected (Job 5^{23}, Hos 2^{18}).

Fines were permitted at the option of the injured party as a special privilege to freedmen (slaves being punished), and in earliest times the money was presented to the priest or at the sanctuary. It was not in accordance with Sem. doctrine to compel the aggrieved to accept material compensation (W. R. Smith, *RS* 329, 378). In the case of a mortal result, the mulct which might be in lieu of corporal penalty was called 'ransom (RV 'redemption') of life' (Ex 21^{30}), but was never allowed for wilful murder (Nu 35$^{31.32}$). The specific amount was generally left to be determined by the judicial tribunal (Ex 21$^{22.30}$), but the sum for fatal injury by an ox to a servant was fixed at 30 shekels (Ex 21^{32}), for humbling an unbetrothed virgin at 50 shekels (Dt 22^{29}), and the highest amount named is for slander against a wife's chastity, 100 shekels (Dt 22^{19}). See **Restitution**.

---

* The plural עַמִּים apparently means 'kinsfolk,' 'relatives,' so that 'cut off from *his* (their) people' is a better rendering than 'from *the* people.'

† It may be questioned whether, when 'cut off from his people' stands alone, anything more is intended than to express strongly the divine disapproval under threat of excommunication. Cf. '*I* will cut off,' Lv 17^{10} 20$^{3.5.6}$ [all H], and see Nowack, *Heb. Arch.* i. 333 f. and Dillm. on Gn 17^{14}.

Flaying is mentioned (fig.) Mic $3^{2.\,3}$. It was a practice in Assyria, though the victim may have previously died (Rawlinson, *Anc. Mon.* i. 478; Layard, *Nin. and Bab.*; *Mon. of Nin.*). The Persians would flay and then crucify (Rawlinson, iii. 246; also recognized in the Zendavesta). Herodotus (iv. 64, v. 25) states that Persians and Scythians used the skins so obtained.

Hanging consisted usually in the suspension of the lifeless form as a mark of reproach. By this David showed his disapproval of the slaughter of Ishbosheth (2 S 4^{12}). The person whose body was so exposed was 'accursed of God' (Dt 21^{23}, Gal 3^{13}), and for this reason it might not remain in view over night (Jos 8^{29} 10^{26}). This word is used for the act of impaling (ἀνασκολοπίζειν, Ezr 6^{11}), a common custom in Assyria. A sharp-pointed stake in a perpendicular position penetrated the body just below the breast-bone (Rawlinson, *Anc. Mon.* i. 477). It was frequent in Persia. Darius impaled 3000 Babylonians (Layard, *Nin. and Bab.* 295 n.; Herodotus, iii. 159). The Philistines gibbeted (on crosses, Jos. *Ant.* VI. xiv. 8) the dead bodies of Saul and Jonathan (1 S 31^{10}, 2 S $21^{12.\,13}$). Other Greek words used to represent this act are ἐξηλιάζειν and παραδειγματίζειν, for which the Vulg. uses *crucifigere* (see CROSS); and so St. Paul, according to the accepted exegesis of the time, applied Dt 21^{23} to the ignominy of Jesus. Execution on the gallows was not prescribed for any crime in the Mosaic code. There is a difference of opinion whether the chief baker (Gn 41^{13}) lost his life by being hanged by the neck, or whether his body, after being despatched, was exposed to shame (Wilkinson, *Anc. Egyptians*, ii. 213). In later history offenders were hanged by the hands (La 5^{12}, Targ. 12), and in 1 Mac 1^{61} it is stated that dead children were hanged to the necks of their mothers. Ahithophel (2 S 17^{23}) and Judas (Mt 27^{5}, Ac 1^{18}) voluntarily, in chagrin and remorse, took their lives by hanging. There is an apparent allusion to this form of punishment in 1 K 20^{31}). The Gibeonites may have adopted this method of avengement on the sons of Saul (2 S 21^{9}), because it was in vogue among the aboriginal nations of the land. Stanley (*Hist. Jew. Ch.* ii. 37) says the victims were first crucified, then suspended. Under the Persian rule there was resort to the gallows (עֵץ, but called 'tree' in Gn 40^{19}, Dt 21^{22}) for punishing the conspirators against Ahasuerus (Est 2^{23}), Haman ($7^{9.\,10}$) and his ten sons (9^{14}); possibly the same as impalement.

Imprisonment.—Offenders were confined by the Israelites as well as other nations. The prison was often used merely for keeping a person in ward until the pleasure of the judicial power should be known. So Joseph by Potiphar (Gn $39^{20.\,21}$); the son of Shelomith, for blasphemy (Lv 24^{12}); the man who gathered sticks on the Sabbath (Nu 15^{34}); the apostles after healing the lame man (Ac 4^{3}); St. Peter, by order of Herod, till a convenient time for his execution (Ac 12^{4}). Incarceration was often accompanied with other punishments (cf. Samson grinding for the Philistines, Jg 16^{21}), or it was regarded as an alternative (Ezr 7^{26}). Jeremiah was smitten as well as imprisoned (Jer 37^{15}). The murderer and debtor might be delivered both to prison and the tormentors (Mt 18^{30}). Zedekiah used the prison for the protection of Jeremiah from his enemies (Jer 37^{21}). He was then transferred to the princes, who cast him into the dungeon or pit (Jer 38^{6}). For the Eng. word 'dungeon' or 'prison' in Gn 40^{15} 39^{20}, 1 K 22^{27}, 2 K 25^{29}, 2 Ch 16^{10}, Ps 142^{7}, Ec 4^{14}, Is 24^{22} 42^{7}, Jer $37^{4.\,15}$ 52^{11}, there are eight different roots in the Heb. which would imply that detention of those under accusation or in disfavour was regular and quite common, the confinement itself being for the purpose of punishment. Confinement in jail was inflicted as a preliminary punishment by Ahab on Micaiah, accompanied with spare bread and water diet (1 K 22^{27}); by Asa on Hanani (2 Ch 16^{10}). The motive of Herod in imprisoning John the Baptist is uncertain (Mt 4^{12}). Barabbas was committed for insurrection, and it would appear as if this were intended to be final (Lk 23^{19}). In the prison-house, which might contain cells (Jer 37^{16}), there was sometimes a pit with or without water (Jer 38^{6}, Zec 9^{11}), and the court of the prison is mentioned in Jer 37, 38, 39, and elsewhere. In some prisons there were stocks (Jer 20^{2} 29^{26}, Ac 16^{24}). To the Rom. prison there were three parts: *communiora*, *ulteriora*, where Paul and Silas were kept, and the *Tullianum* or dungeon, the place of execution (Conybeare and Howson, *St. Paul*, i. 304 n.). There is an allusion to prisoners at labour in Job 3^{18}, and they might be held in chains (Ps 105^{18} 107^{10}, Jer 40^{4}).

Indignities.—There was resort to various means of heaping contumely on an offender; such as ignominious or obscure burial for a blasphemer (Jos. *Ant.* IV. viii. 6; 1 K 14^{13}, 2 K 9^{10} $21^{18.\,26}$, 2 Ch 24^{25}, Jer 22^{19}). Some victims were slain and left in the street or cast behind the walls (Ps $79^{2.\,3}$, To 2^{3}). Heads of the slain were removed and carried in triumph (1 S 17^{57} 31^{9}). Dead bodies were burned (Jos $7^{15.\,25}$, Lv 20^{14}, Am 2^{1}. See **Burning**) or hanged (2 S 4^{12}, Gn $40^{17\text{-}19}$ [see **Hanging**], Nu $25^{4.\,5}$, Dt $21^{22.\,23}$). Stones were thrown on the corpse, as on that of Achan (Jos $7^{25.\,26}$), the king of Ai (Jos 8^{29}), and on the tomb of Absalom (2 S 18^{17}). Mohammedans still maintain the custom when passing by its supposed site (Thomson, *Land and Book*, i. 61); but Harmer plausibly suggests that the 'heap of stones' was erected in honour. Some forms of execution were regarded as more disgraceful than others, as crucifixion (Jn 19^{31}), but it was not the design of the Mosaic law to cover a sufferer with perpetual infamy. In Egypt a calumniator of the dead was subject to severe punishment (Wilkinson, *Anc. Egyp.*).

Mutilation was practised, but not under direct sanction of the covenant law. The thumbs and great toes of Adonibezek were severed (Jg $1^{6.\,7}$). The slayers of Ishbosheth (2 S 4^{12}) lost their hands, but possibly after death. Nebuchadrezzar threatened to cut in pieces his offending counsellors (Dn 2^{5}). At the command of Antiochus Epiphanes (acc. to 2 Mac $7^{1\text{-}40}$), seven brothers suffered horrible outrages, among others that of tearing out the tongue, a very common cruelty among the Assyrians. In Egypt robbers were sometimes deprived of the right hand for the first offence, the left foot for the second, and the left hand for the third; though the theft of food not quickly perishable was not so severely punished (Lane, *Mod. Egyp.*). To this act our Saviour's statement in Mt 24^{51}, Lk 12^{46}, seems to allude. An Egyptian victor was known to display severed hands as proof of the number of his trophies (see 1 S 18^{27}). The town of Rhinocolura was said to be peopled by robbers who had lost their noses. The nose and ears of an adulterer were cut off (Diod. Sic. i. 78), and from Ezk 23^{25} it appears that the usage was in vogue among the Babylonians. (On the horrible cruelties of Assurbanipal, as recorded on his cylinder, see *RP* iii. 39–50.) Rings were put in the lips or noses of captives (2 Ch 33^{11} 'among the thorns,' RV 'in chains,' Is 37^{29}, Ezk $19^{4.\,9}$; Rawlinson, *Anc. Mon.* iii. 7; and see Am 4^{2}).

Plucking off the Hair was a punishment inflicted on Jews who had indulged in mixed marriages (Neh 13^{25}). It may have been intended simply for disfigurement. The prophet in Is 50^{6} alludes to the judicial practice as common in his time. The effort was so vicious as described in 2 Mac 7^{7}, that the skin was torn off with the hair; but in scalping, as practised by the N. American Indians, a knife was used. As an insult to David's servants, half of the beard was shaven off (2 S 10^{4}). The head was subjected to other indignities (Job 30^{10}, Mt 27^{30}, Mk 12^{4}).

Precipitation.—It is stated in 2 Ch 25^{12} that 10,000 Edomites were cast from a rock by the children of Judah. So two Jewish women are said to have suffered (2 Mac 6^{10}). Of the same sort are the acts mentioned in 2 K 8^{12}, Hos 10^{14} 13^{16}. On column iv. 100, 101 of Assurbanipal (G. Smith), it is stated that certain persons were thrown on the stone lions and bulls in a quarry, the fall designed to be fatal. Calmet is of opinion, with Jerome as authority, that this was the fate of Oreb and Zeeb (Jg 7^{25}). An attempt after this manner was made on the life of Jesus (Lk 4^{29}).

Restitution.—There was enacted an elaborate system for compensating an injured party under the sanction of Mosaism. As far as possible the restoration was identical with, or analogous to, the loss of time or power (Ex 21^{18-36}, Lv 24^{18-21}, Dt 19^{21}). He who stole and then slew or sold a live ox had to restore fivefold; if it was a live sheep fourfold. The penalty was designed in part to be prohibitory, because sheep were more exposed in the desert, while oxen were necessary and not so easily taken. In later history it appears as if sevenfold might be exacted (Pr 6^{31}. See also the LXX tr. of 2 S 12^{6}, where seven is substituted for four). If the identical animal was restored, another of equal value was all that the law required besides. Burglary doomed the culprit to unrequited death or to slavery. For breach of trust or for trespass, twenty per cent. additional to the original sum was demanded (Lv 6^{1-5}, Nu 5^{5-10}). He who was detected in the theft of a pledge, or was found guilty in the matter of trespass while the property was in his hand, must pay double. Pecuniary compensation must be furnished for damages by an animal, when not on its own ground (Ex 22^{5}); and when a fatality occurred in the case of a servant, thirty shekels must be paid to the loser (Ex 21^{32}; see Dt 22^{19}). One case only is mentioned of permitted commutation for bull-goring (Ex 21^{28-32}). In case a married woman was killed, the fine was paid to her father's (instead of her own) family (Lewis, *Heb. Ant.*). Akin to restoration is redemption, referred to in Lv $25^{27.28}$, Ezk $18^{7.12}$. Remuneration was expected for loss by fire, through negligence, of a standing grain field; or for the loss or damage of a pledge (Ex $22^{6.12.13}$). Under Rom. law a jailer losing his prisoner was liable to the punishment which was to be inflicted for the crime on which the arrest had been made (Ac 12^{19} 16^{27}). In NT morals it was taught that the guilt of theft could not be compounded by restitution. 'Let him that stole steal no more' (Eph 4^{28}); but Zacchæus, on the occasion of his pardon, proposed to restore fourfold (Lk 19^{8}).

Retaliation was authorized in the code of Ex $21^{24.25}$. It was in use among other nations, esp. the Egyptians (cf. the *lex talionis* of the Romans). It was not unequivocally approved by ancient authors, because it was apt to degenerate into mere revenge and would often be unfair in its operation. The possibility of its baneful consequences is shown by Thomson (*Land and Book*, i. 447, 449). Diodorus Siculus instances a one-eyed man as suffering more than the victim with two eyes. Favorinus shows the injustice of this principle in operation as contained in one of the Twelve Tables, in that the same member may be worth more to one man than to another, as the right hand of a scribe or painter compared with that of a singer. Hence it had to be administered with certain modifications. Thus Heb. law adopted the principle, but lodged the application with the judge (Ex $21^{22ff.}$, Lv 24^{19-22}); and an aggressor, by the payment of a ransom, could compound with the aggrieved and be relieved from the full penalty of the law. A false accuser was required to suffer the same penalty that he proposed against the accused (Dt 19^{19}). Heb. law was milder in spirit than that of heathen jurisprudence. Moses would not allow parents or children to suffer for the offences of each other (Dt 24^{16}). This equitable exemption was not regarded by the Chaldæans (Dn 6^{24}), or even by the kings of Israel (1 K 21^{21}, 2 K 9^{26}).

Sawing Asunder.—In He 11^{37} the term is used to describe an ancient form of punishment, which was possibly a crushing under instruments of iron (Am 1^{3}); and it is said, on the authority of Justin Martyr (*Dial. with Trypho*), to have been practised on Isaiah. There is an allusion to something of this sort in Pr 20^{26} (RV) 'He bringeth the threshing wheel over them' (cf. Is $28^{27.28}$). Saws are mentioned in 2 S 12^{31}, 1 Ch 20^{3}; and while it is painful to admit that David may have been guilty of such severity, the literal interpretation is the most plausible and accords with the usages of the times. (See, however, Driver, *Heb. Text of Sam.* 226 ff.). In Shaw's *Travels* a case is described where the victim was placed between two boards and dissevered longitudinally (Smith, *DB*), and another case is mentioned by Harmer (*Observations*) as occurring on Stewart's journey to Mequinez.

Scourging with Thorns (see also **Stripes**).—In the marginal reading of Jg 8^{7}, Gideon is represented as threatening to thresh the men of Succoth with thorns and briers, and in the margin to 8^{16} it is stated that they were thus punished, as Stanley (*Hist. Jew. Ch.*) suggests, with the acacia. The scorpions (עַקְרַבִּים) mentioned in 1 K 12^{11} may have been knotted sticks, or ropes into which wire was plaited, or iron points or nails or cutting pieces of lead were inserted. Calmet guesses that David so treated the Moabites (2 S 8^{2}). Some attempt to solve the much-mooted difficulties of 2 S 12^{31} by a reference to this mode of punishment.

Slavery.—In Heb. law it was possible for a person to fall into servitude for a limited time. A thief, when unable to make restitution, was sold with wife and children (Ex 22^{3}). The misfortune of debt led to the same result (2 K 4^{1}, Neh 5^{5}). The statute of limitations mercifully provided against oppressive usage and permanent enslavement (Lv 25^{39-43}, Dt 15^{12}, Jer 34^{14}). The Rabbins say a woman could not be sold for theft. Joseph proposed, as an Egyptian procedure, to make a slave of the detected pilferer of his cup (Gn 44^{17}). See separate article.

Slaying by Spear or Sword.—This was an expeditious method, sometimes adopted in an emergency. The spear, javelin, or dart (He 12^{20}) was to be used on trespassers at the foot of Sinai (Ex 19^{13}). Phinehas went so armed in eager and immediate punishment of the man found with a Midianitish woman (Nu $25^{7.8}$). The sword was taken by the Levites against the worshippers of the golden calf (Ex 32^{27}), and in Dt 13^{13-15} authority is given for its use in the wholesale slaughter of a city for idolatry. Some cutting instrument was employed by Abimelech in the murder of his brethren (Jg 9^{5}). Samuel hewed Agag to pieces with the sword (1 S 15^{33}), and with the same Doeg massacred the priests in Nob (1 S $22^{18.19}$). According to the *lex talionis*, the young Amalekite who claimed that he drew the sword to kill Saul was put to death with the same kind of implement (2 S 1^{15}), with which or the spear Ishbosheth was assassinated (2 S $4^{6.7}$). The sword was used in the summary executions ordered by Solomon (1 K $2^{25.29.31.34}$). By it Elijah slew the prophets of Baal (1 K 19^{1}), and it was common in regal and martial proceedings, becoming still more prominent in post-Bab. times. The sword or axe was employed to carry out the order of Jehu on Ahab's sons (2 K 10^{7}) (see **Beheading**). Thus Jehoram murdered his brethren (2 Ch 21^{4}), and Jehoiakim despatched Urijah (Jer 26^{23}). The sword as an instrument of punishment is specifically mentioned in Job 19^{29}. See also **Divine Visitation**.

The Stocks (מַהְפֶּכֶת, *ξυλὸν πεντεσύριγγον*). This machine, though probably of Egyp. origin, is not described in the Mosaic legislation, but in it Hanani, the seer, was put by Asa (2 Ch 16^{10}), and Jeremiah was punished (Jer 20^{2}). In Jer 27^{2} RV uses 'bars' for AV 'yokes,' and in Jer 29^{26} changes 'prison' to 'stocks,' and 'stocks' to 'shackles,' that is, the pillory. It usually contained five holes for the neck, arms, and legs, which sometimes were inserted crosswise. One form (סַד) was designed for the legs only. The word 'stocks' is employed in Job 13^{27} 33^{11} and Pr 7^{22}, and this form of torture was probably in mind when Ps 105^{18} was written. It was an infliction among the Romans as indicated by Ac 16^{24}.

Stoning was the ordinary formal and legal mode of inflicting punishment in the earlier history of the children of Israel, and was in vogue before the departure from Egypt (Ex 8^{26}). Even beasts might be the victims, evidently as a spectacular example (Ex 19^{13} $21^{28.29.32}$). Stoning was the penalty for taking 'the accursed thing' (Jos 7^{25}); for adultery and unchastity, the death sentence being pronounced in Lv 20^{10}, and the means of carrying it out stated in Dt $22^{21.24}$, Jn $8^{5.7}$; for blasphemy (Lv 24^{10-24}), and on this specious charge Naboth (1 K 21^{10}) and Stephen (Ac 7^{58}) suffered, and an effort was made to show Jesus guilty by a feint to stone Him (Jn 10^{31}); for divination (Lv $20^{6.27}$), idolatry (Dt 13^{10}), dishonour to parents (Dt 21^{21}), prophesying falsely (Dt $13^{5.10}$), and Sabbath-breaking (Ex 31^{14} 35^{2}, Nu $15^{35.36}$). Doubtless other capital crimes would thus be punished, and the city of Jerusalem was so threatened as if it were an individual culprit (Ezk 16^{40}). In an orderly proceeding the witness was to cast the first stone (Dt 17^{7}, Jn 8^{7}), and as the Rabbins say, on the chest; and if others were necessary to produce death, the bystanders hurled them. Lawless movements are mentioned or suggested, like that to which Moses thought himself exposed (Ex 17^{4}), the accomplished acts on Adoram (1 K 12^{18}) and Zechariah (2 Ch 24^{21}), in the danger dreaded by the priests on account of their estimate of the Baptist (Lk 20^{6}), and the assault on St. Paul in Iconium (Ac 14^{5}). Poisoners among the Persians were laid on one stone and crushed by another (Rawlinson, *Anc. Mon.* iii. 247; see Mt 21^{44}, Lk 20^{18}).

Strangling was a later form of capital punishment among the Jews (W. R. Smith, *RS* 398), but there is no scriptural authority for it. The convict was immersed in clay or mud, and a cloth was twisted around the neck and drawn in opposite directions by two lictors, so as to take the breath. During the operation molten lead might be poured down the throat (Sanhedr. 10. 3). The proposed humiliation of the Syrians before Israel (1 K 20^{31}) may hint at the practice. See **Hanging**.

Stripes.—The Mosaic economy ordained that an offender might be punished with stripes (Lv 19^{20}, Dt 22^{18}), not exceeding forty (Dt 25^{3}); and this limit was carefully observed, as on St. Paul (2 Co 11^{24}), for a single stroke in excess subjected the executioner to punishment. The scourge was composed of three thongs, of which 39 was the largest multiple within the limit. It was the most common mode of secondary punishment, and the idea of disgrace did not seem to attach to it (but see Jos. *Ant.* IV. viii. 21). No station of life was exempt (see from Pr 17^{26}, indicating that the noble may be smitten, and 10^{13} that a rod is proper for the vacant-minded). The bastinado may have been used on Jeremiah (20^{2} 37^{15}). Scourging was inflicted on a bondmaid overtaken in illegal intercourse (Lv 19^{20}), on a husband who falsely accused his wife, on a person who used abusive language (Jos. *Ant.* XIII. x. 6), on ecclesiastical offenders in the synagogue (Mt 10^{17}, Ac 26^{11}), and it might be used on the debtor (Mt 5^{25} 18^{34}). As to the method: the culprit lay on the ground while under castigation, in the presence of the judge, who during the infliction proclaimed the words in Dt $28^{58.59}$, and concluded with those in Ps 78^{38}. In later times an adult male was stripped to the waist and in a bending posture lashed to a pillar; a female received the stripes while sitting with head and shoulders bent forward; and a boy was punished with his hands tied behind him. The Mosaic regulations were in pleasing contrast with those of the Zendavesta, which authorizes as many as 10,000 stripes for the murder of a water dog (Darmesteter, *Intro.*). The Porcian law forbade the scourging of Rom. citizens (Cic. in *Verr.* v. 53, Ac 16^{37} 22^{25}). Nevertheless, it was regarded as a wholesome punishment, and is zealously advocated in Pr 13^{24} $23^{13.14}$; see also Sir 30^{1-13}. It is a symbol of divine correction (Ps 89^{32}), and is regarded as a purifier (Pr 20^{30}). The Moslems have a proverb that the stick is from heaven, a blessing from God.

Suffocation was a recognized Pers. mode of dealing with offenders. A case is described (2 Mac 13^{4-8}): Menelaus was fastened to a revolving wheel in a standpipe 50 cubits high, filled with ashes, in which he was repeatedly immersed, until death ensued. Another description attributes a similar method to the Macedonians, the victim being placed on a beam, under which the ashes were constantly stirred until he was overcome with heat and dust (see Rawlinson, *Anc. Mon.* iii. 246).

LITERATURE.—In addition to the authorities cited in the art., the reader may consult Hamburger, *RE*, art. 'Lohn u. Strafe' (pp. 691–703) and 'Vergeltung' (pp. 1252–57); artt. on the various crimes and punishments enumerated above, in Riehm, *HWB*, Herzog, *RE*, and Schenkel, *Bibellex.*; Saalschutz, *das Mosaische Recht*; the *Bib. Archäol.* of Keil, Benzinger, and Nowack; Post, *Familienrecht*, 358 f.; Hartmann, *Enge. Verbind. d. A.T. mit d. N.* 197 ff.; Schürer, *HJP* II. ii. 90 ff.; W. R Smith, *OTJC*² 340 f., 368 f.; J. W. J. POUCHER.

CRIMSON.—Two words are tr. 'crimson' in both AV and RV, תּוֹלָע *tôlā'* (Is 1^{18}), LXX *κόκκινος*, and כַּרְמִיל *karmîl* (2 Ch $2^{7.14}$ 3^{14}). *Karmîl* is a later word used in place of the earlier שָׁנִי *shânî*. *Shânî* is rendered once (Jer 4^{30} AV) *crimson*. In the same passage in RV, and in all other passages where it occurs in both VSS, it is rendered *scarlet*. In Is 1^{18} שָׁנִים is rendered *scarlet*, LXX *φοινικοῦν*, and תּוֹלָע *crimson*, LXX *κόκκινον*. It is probable that the distinction of these two colours was not accurately made at that time, as indeed it has not been preserved in the VSS. See COLOURS; and for the *insect* producing both these colours see SCARLET.

G. E. POST.

CRIPPLE.—See MEDICINE.

CRISPING PINS (חֲרִיטִים, Is 3^{22}, RV 'satchels,' and 2 K 5^{23}, AV and RV 'bags'; see BAG 3*b*).—To 'crisp' is in mod. language to 'crimp,' that is, curl in short wavy folds. The word is often used in Shaks., Milton, and others, of the curl a breeze makes on the water, as *Par. Lost*, iv. 237, 'the crisped brooks'; cf. Byron, *Childe Harold*, iv. 211, 'I would not their vile breath should crisp the stream.' But the earliest ref. is to the hair; and a 'crisping pin' is an instrument for crimping the hair. Cf. Pocklington (1637), 'Fetch me my Crisping pinnes to curle my lockes.'

J. HASTINGS.

CRISPUS (Κρίσπος).—The chief ruler of the Jewish synagogue at Corinth (Ac 18^{8}). Convinced by the reasonings of St. Paul that Jesus was the Messiah, he believed with all his house. The apostle mentions him (1 Co 1^{14}) as one of the few persons whom he himself had baptized. Tradition represents him as having afterwards become bishop of Ægina (*Const. Apost.* vii. 46). R. M. BOYD.

CROCODILE (RVm Job 41^{1}).—The crocodile is doubtless meant by leviathan in the above passage and Job 3^{8}. In Ps 74^{14} leviathan refers to Pharaoh, under the simile of a crocodile. Cf. Ezk 29^{3}, where Pharaoh is called 'the great dragon (*tannîm*, for the usual *tannîn*) that lieth in the midst of his rivers,' and 32^{2}, where he is compared to a 'whale (also *tannîm* AVm, RV text 'dragon') in the seas,' the reference being to the crocodile of the river (Arab. *baḥr*=sea, the usual Arab. way of speaking of their great river the Nile). See LEVIATHAN, DRAGON. The crocodile is a saurian, sometimes attaining a length of 20 feet. His back and sides are covered with an armour, impenetrable to spears, swords, slingstones, and arrows (Job $41^{7.\,15\text{-}17.\,26.\,28.\,29}$); not to be injured by clubs (RV for AV 'darts' v.^{29}), or even spherical bullets. The scales of which this armour is composed are beautifully marked. His jaws are set with numerous sharp-pointed teeth (v.^{14}). His neck is extremely powerful (v.^{22}). His tail is also very muscular, and a blow from it will crush a man. His legs are short. The toes of the fore feet are five, and of the hind feet only four. The inner two toes of the fore feet and the inner one of the hind feet are destitute of claws. The rest have strong claws (v.^{30}). The crocodile is well characterized as 'a king over all the children of pride' (v.^{34}). In one other passage (Jer 14^{6}) RVm gives 'crocodile' for *tannîm*, AV 'dragons.'

The **Land Crocodile** (Lv 11^{30} RV) is not a crocodile, but probably the MONITOR (see CHAMELEON). G. E. POST.

CROOKBACKT (Amer. RV 'crook-backed'), Lv 21^{20}. See MEDICINE.

CROSS is the tr. of the Gr. σταυρός, the name applied in NT to the instrument upon which Jesus Christ suffered death. Owing to the variety of the methods in which crucifixion might be inflicted, and the indefiniteness of the terms employed, it is impossible to determine with certainty the exact nature of the cross used in His case. σταυρός means properly a stake, and is the tr. not merely of the Lat. *crux* (cross), but of *palus* (stake) as well. As used in NT, however, it refers evidently not to the simple stake used for impaling, of which widespread punishment crucifixion was a refinement, but to the more elaborate cross used by the Romans in the time of Christ. Besides the *crux simplex*, or simple stake, we may exclude from consideration the so-called cross of St. Andrew, shaped like an X, the origin of which is much later, and concerning the actual use of which there is much doubt. There remain of the four varieties of cross usually enumerated only two, between which the choice must lie—the *crux commissa* or St. Anthony's cross, shaped like a T, and consisting of a single upright post, across the top of which is fastened a horizontal cross-bar; and the *crux immissa* or Lat. cross, in which the top of the upright shaft projects above the cross-bar, as in the form with which we are most familiar. In favour of the latter is not only the testimony of the oldest tradition, which in such a matter is entitled to great weight, but also the statements of the evangelists concerning the title nailed to the cross (Mt 27^{37}, Mk 15^{26}, Lk 23^{38}, Jn $19^{19\text{-}22}$).

The upright post to which alone the name properly belongs, was usually a piece of some strong, cheap wood, pine or oak, of such length that when firmly planted in the ground the top was from 7½ to 9 ft. high. Most modern illustrations err in making the upright much too high. It was erected on some spot outside the city, convenient for the execution, and remained there as a permanent fixture, only the cross-bar or *patibulum* being carried to the spot, usually by the person who was to suffer death. This consisted sometimes of a single piece of wood, more often of two parallel bars joined at one end, between which the head of the victim passed, and to the ends of which his hands were fastened. The cross which Jesus carried was doubtless simply the cross-bar in one of these two forms. Keim argues in favour of the simpler, partly because Jesus is represented as clothed, which would hardly have been the case had He carried the double *patibulum*; partly because of the carrying of it by Simon, which he regards rather as a rude joke of the soldiers than as rendered necessary by the weight of the cross-bar, which could in no case have been very heavy (*Jesu von Nazara*, iii. 398, Eng. tr. vi. 125). Besides the *patibulum*, the cross was furnished with a support for the body called the *sedile*. This was a small piece of wood projecting at right angles from the upright, upon which the victim sat as upon a saddle. It was designed to bear part of the weight of the body, which would otherwise have been too great to be supported by the hands alone. Whether there was also a support for the feet, the so-called ὑποπόδιον, is still in dispute.

The origin of crucifixion must be sought in the E., probably among the Phœn., from whom it passed to the Greeks and Romans. The long list of peoples given by Winer (*RWB* i. 680), and often copied, includes many cases which prove no more than impaling (so the Persians, Egyptians, Indians). For the practice among the Phœnicians, Carthaginians, and Numidians we have good authority. We hear of Alexander on one occasion crucifying as many as 2000 Tyrians. Among the Romans this was a very common punishment. At first they confined it to slaves and seditious persons, but gradually extended its use, especially in the provinces, here following Punic examples. In Sicily, Verres crucified even Roman citizens. The same was done by Galba in Spain. But these were rare exceptions, and excited universal indignation. In Judæa the punishment was frequently used. Thus Varus crucified 2000 rioters after the death of Herod the Great (Jos. *Ant.* XVII. x. 10). Under Claudius and Nero, various governors, Tiberius Alexander, Quadratus, Felix, Florus, crucified robbers and rioters of political and religious character, including two sons of Judas Galilæus (*Ant.* XX. v. 2; *BJ* II. xii. 6, II. xiii. 2), and even respectable citizens and Roman knights (*BJ* II. xiv. 9). Titus crucified so many after the destruction of Jerus. that there was neither wood for the crosses nor place to set them up (*BJ* V. xi. 1). Especially under Tiberius, who held that simple death was escape, was this method of punishment frequent.

The Jews did not practise the crucifixion of living persons. The case of Jannæus, referred to by Jos. (*BJ* I. iv. 6), was an exception which called forth universal reprobation. But the hanging up of dead bodies meets us frequently in OT. See Jos 10^{26} (the five kings), 2 S 4^{12} (the murderers of Ish-bosheth), 1 S 31^{10} (the Philistines and Saul, cf. 2 S 21^{12}), Ezr 6^{11} (the decree of Darius), and is distinctly authorized in the law (Dt 21^{22}, cf. Nu 25^{4}, where J″ commands this punishment in the case of the men who have led the people away to Baal-peor). In such cases the dead body became accursed, and must be buried before nightfall, that the land might not suffer pollution (Dt 21^{23}). Those who suffered crucifixion came under this curse, and hence the passage in Dt is applied to Jesus not only in the Talm., but also by NT writers. This explains the frequent reference to the cross in NT as the tree (ξύλον), that being the LXX tr. of the

Heb. עֵץ. (Cf. Ac 5^{30} 10^{30} 13^{29}, 1 P 2^{24}, and esp. Gal 3^{13} 'Christ redeemed us from the curse of the law, having become a curse for us; for it is written, Cursed is every one that hangeth on a tree.')

The method of crucifixion is clearly described in NT. After condemnation, the victim was scourged with the *flagellum*, a punishment so terrible that men often died under it. In Jesus' case the scourging seems to have taken place before rather than after, possibly to excite pity (Jn 19^{1}). The cross-bar was then bound on the victim's back, or his head inserted in the *patibulum*, and he was led through the city accompanied by the centurion and four soldiers detailed to conduct the execution. The title, a piece of wood covered with white gypsum on which the nature of his offence was set forth in letters of black, was usually carried before the condemned person, so that all might know the reason for which he was to die. This custom of carrying the cross gave rise to 'the proverb *αἴρειν* or *λαμβάνειν* or *βαστάζειν τὸν σταυρὸν αὐτοῦ* which was wont to be used of those who on behalf of God's cause do not hesitate cheerfully and manfully to bear persecutions, troubles, distresses, thus recalling the fate of Christ, and the spirit in which He encountered it' (Thayer, *Lex.* p. 586). In this sense it is used by Jesus Himself in the well-known saying, 'If any man would come after me, let him deny himself, and take up his cross and follow me' (Mt 16^{24}, Mk 8^{34}, Lk 9^{23}; cf. Mt 10^{38}, Lk 14^{27}). Arrived at the place of execution, the prisoner was stripped, his garments falling to the soldiers as their booty. He was then bound to the *patibulum*, and both were raised on ladders until the cross-bar rested on the notch prepared to receive it. This was the more common custom. In a few cases the cross piece was fastened to the upright lying on the ground, and the whole then raised together. After the *patibulum* was firmly fastened, the hands were nailed to its extremities, and possibly the feet to the upright, although this was less frequent. Afterwards the title was fastened to the head of the cross, and the victim was left to the slow agonies of a death which might endure many hours, and even days.

All authorities agree that of all deaths crucifixion was the most abhorred. This was due not only to its pain, which was of the most intense character (see the account of Richter, quoted in Smith, *DB*), but also to its shame, which in the case of the Roman was due to its servile association, in that of the Jew to its rendering the sufferer accursed. Cicero in his oration against Verres (v. 66) declares that it is impossible to find a fit word to describe such an outrage as the crucifixion of a Roman citizen. '*Facinus est vinciri civem Romanum: scelus verberari: prope parricidium necari; quid dicam in crucem tolli? Verbo satis digno tam nefaria res appellari nullo modo potest.*'

The shame of this death is often referred to in NT. So He 12^{2} 'Jesus, who endured the cross, despising shame'; He 13^{13} 'Let us therefore go forth unto him without the camp, bearing his reproach'; cf. He 11^{26}. With more particular reference to its relation to the ceremonial law, Gal 3^{13} 'Christ redeemed us from the curse of the law, having become a curse for us; for it is written, Cursed is every one that hangeth on a tree'; 1 Co 12^{3} 'No man speaking in the Spirit of God saith Jesus is anathema.' Because of this character, the death of Jesus upon the cross, viewed in the light of His Messianic claims, became not merely foolishness to Greeks, but a stumbling-block to Jews (1 Co 1$^{18.23}$, cf. Gal 5^{11}). It was an outrage to Jewish propriety that He who had become accursed in the sight of the law by His death on the cross should claim to be the Messiah in whom the law was fulfilled. This element of ceremonial defilement has been particularly emphasized by C. C. Everett in *The Gospel of Paul* (Boston, 1893), as a clue to the understanding of St. Paul's view of the significance of Christ's death. This significance he finds not at all in its penal character, but in its character as ceremonial defilement. Christ by His death on the cross became accursed (anathema). Those Christians who accepted this accursed sufferer as the Messiah of God, shared His curse, and were in like manner cut off by the law. But this cutting off by the law brought with it also freedom from the law, since those who were thus outcast were no longer within its realm. Thus Christ's death under the law, followed by His resurrection, was God's way of showing that the Jewish law was done away, and a new method of salvation, even that through faith in Christ, ushered in.

The use of the word 'cross' in a theological sense, as a brief designation of Christ's saving work, is characteristic of St. Paul. The gospel of salvation is 'the word of the cross' (1 Co 1^{18}). Those who suffer persecution because of their faith in the saving efficacy of Christ's death, do so 'for the cross of Christ' (Gal 6^{12}). They who refuse this gospel are 'enemies of the cross of Christ' (Ph 3^{18}). The cross is not only the instrument of the reconciliation between God and man (Col 1^{20}, Eph 2^{16}), through the death of Him who there suffered (Col 1^{20} 'the blood of the cross'), but also between Jew and Gentile (Col 2^{14} the bond nailed to the cross), since by it the 'bond written in ordinances,' which up to that time had barred the way of the Gentiles to God, is put out of the way. It was through the cross, *i.e.* acceptance of the crucified Christ as Saviour, that the world was crucified to Paul, and Paul to the world (Gal 6^{14}). Thus crucifixion becomes not merely the means of salvation, but the type of that absolute renunciation of the world which characterizes the true Christian life (Gal 5^{24}).

LITERATURE.—The articles on *Cross* and *Crucifixion* in Smith, *DB* and in Herzog, *RE*. Monographs by Lipsius, *De Cruce*, Antwerp, 1595; Nicquetus, *Titulus s. Crucis*, Ant., 1670; Curtius, *De Clavis Dominicis*, Ant., 1670; Bartolinus, *De Cruce*, Amsterdam, 1670; and more recently by Zöckler, *Das Kreuz Christi*, 1875, and Fulda, *Das Kreuz und die Kreuzigung*, 1878. Much information is contained in the Lives of Christ of Keim and Hase. On the theological significance of the cross, cf. besides the *Biblical Theologies*, Everett, *The Gospel of Paul*, Boston, 1893.

W. ADAMS BROWN.

CROW occurs once in Apocr. (Bar 6^{54}), where the helplessness of idols is illustrated by the remark that 'they are* as crows (*κορῶναι*) between heaven and earth.' In Jer 3^{2} the LXX has *ὡσεὶ κορώνη ἐρημουμένη* for MT כַּעֲרָבִי בַּמִּדְבָּר ('as an Arabian in the wilderness,' RV), which implies the punctuation עֹרֵב ('raven') instead of עֲרָבִי ('Arabian'). The common LXX equivalent of עֹרֵב is *κόραξ*. See RAVEN.

J. A. SELBIE.

CROWN.—In OT (both AV and RV) *Crown* is used to translate several Heb. words, the particular meanings of which must be distinguished. **1.** The golden fillets or mouldings placed around the ark of the covenant (Ex 25^{11} 37^{2}), the table of shewbread (Ex 25^{24} 37^{11}) and its border (Ex 25^{25} 37^{12}), and the altar of incense (Ex 30$^{3.4}$ 37$^{26.27}$) in the Mosaic tabernacle are called Crowns (RVm 'rim or moulding'). The Heb. word (זֵר) means a cincture like a wreath, and describes rather the foliated appearance of the band than its position on the object to which it was attached. (LXX tr. it by a phrase meaning 'twisted golden wavelets' [*κυμάτια χρυσᾶ στρεπτά*] or 'twisted golden crown' [*στρεπτὴν στεφάνην χρυσῆν*]; Pal. Targ. by זֵיר a wreath; Vulg. by *corona*, whence Eng. translation. The later Rabbins also describe it as כֶּתֶר a crown). The brevity of the description in Ex has occasioned differences of opinion among archæologists as to both its purpose and its position. Some imagine it a rim to prevent objects from falling off. But the border which passed round the table of shewbread, as well as the table itself, had a crown; nor would the ark need a rim for the purpose suggested. The crown therefore was ornamental. As to its position, Bähr (*Symbolik*, i. 377, 378) regards the crown of the ark as an ornamental design placed round its middle, but his arguments are not conclusive; and since the crown is said to be 'upon' (עָלָיו) the ark, we should doubtless imagine it as placed round the top of the sacred chest as it was round the top of the table of shewbread (see Neumann, *Die Stiftshütte*, p. 127). Bähr, however, also denies that 'the border of a handbreadth round about' the table (Ex 25^{25}) had a crown of its own (*Symb.* i. 409, citing also the Rabbins Jarchi and Aben-Ezra; so Keil, *Archæol.* § 19, but not in his *Comm.*; Nowack, *Heb. Arch.* ii. 60), but the language of Exodus seems clearly to state that it had (Jahn, *Archäol.* p. 421; Abarbanal cited by Bähr; Neumann, p. 96; Bissell, *Bibl. Antiq.* p. 292). The crown of the altar of incense likewise is placed by some round its top (Carpzov, *Appar. Crit.* p. 273; Neumann, p. 120), by others round its middle (Bähr, i. 378, 419). But, whatever their positions, these crowns were evidently golden wreaths intended for decoration. Assyr. monuments afford examples of similar ornamentations (Neumann, p. 27; Layard, *Nineveh*, ii. 236, 354).

---

* The Syr. VS reads 'are *not*.'

2. Another word tr. Crown (נֵזֶר) means *consecration*, and is applied to the symbolic ornament worn by the high priest upon his forehead over the mitre (Ex 29^{6} 39^{30}, Lv 8^{9} 21^{12}); and to that worn upon the head by the Heb. monarch (2 S 1^{10}, 2 K 11^{12}, 2 Ch 23^{11}, Ps 89^{39} 132^{18}, so also Zec 9^{16}). It is also used figuratively for dignity or honour (Pr 27^{24}, Nah 3^{17} 'crowned ones'). The high priest's crown (LXX τὸ πέταλον, Vulg. *lamina*) was a narrow plate (צִיץ) of pure gold, on which was engraved 'Holy to J″.' Tradition represents it as about two fingers broad. It was fastened 'upon the mitre above' by a piece of blue lace (Ex 28^{37} 39^{31}). The Rabbin. commentators suppose three ribbons of lace—two from the ends and one from the top of the front of the crown—all tied together at the back of the head. Jos. (*Ant.* III. vii. 6) describes the high priest's crown as of three rows, one above another, upon which were carved cups of gold like the calyx of the plant Hyoscyamus, while the plate with the inscription covered the forehead; but he probably refers to an ornamentation introduced at a late period. Acc. to 1 Mac 10^{20} a crown was given to the high priest Jonathan by Alex. Epiphanes. Braunius (*De Vestitu Sacerd. Heb.* ch. xxii.) admits that Ex gives no support to Josephus' description. The crown was the symbol of the high priest's special consecration, as the people's representative, to make atonement for sin (Ex 28^{38}). The same term is also applied to the symbolic headtire of the Heb. king, but no description of it is given (LXX τὸ βασίλειον, λέζερ, ἔζερ, τὸ ἁγίασμα). It was prob. a light, narrow fillet of silk, perhaps studded with jewels, like the early diadems of E. kings (see DIADEM). It was light enough to be worn in battle (2 S 1^{10}). The term indicates that the king, as well as the priest, was divinely consecrated to his office. Hence it is attributed to the ideal Davidic King (Ps 89^{39} 132^{18}), and His people are called the stones of their Saviour's *Crown* (Zec 9^{16}).

3. The commonest use of *Crown* in OT (generally as tr. of עֲטָרָה, LXX στέφανος, but in Est of כֶּתֶר, Gr. κίδαρις or κίταρις, LXX διάδημα) corresponds with the use of the word in mod. times. It is applied to crowns worn by kings (2 S 12^{30}, 1 Ch 20^{2}, the crown of the king of Rabbah, which weighed a talent of gold; Est 1^{11} 2^{17} 6^{8} 8^{15}, the tiaras of the king and queen of Persia, probably high, jewelled turbans; see also Is 62^{3}, Jer 13^{18}, Ezk 21^{26}); to wreaths worn at banquets (Ca 3^{11}, Is $28^{1.\,3.\,5}$, Ezk 23^{42}); and fig. as an emblem of honour or victory (Job 19^{9} 31^{36}, Ps 8^{5} 21^{3} 65^{11} 103^{4}, Pr 4^{9} 12^{4} 14^{18} [כֶּתֶר] ^{24} 16^{31} 17^{6}, La 5^{16}, Ezk 16^{12}). In Is 23^{8} Tyre is called 'the crowning city' because ruling over kingdoms and dispensing crowns. Some have supposed that the kings of Israel had two crowns—the light diadem mentioned above, and a heavier one for state occasions. It has also been inferred from 2 S 12^{30} that the crown taken by David from the king of Rabbah became the state crown, and Jos. (*Ant.* VII. vii. 5) enlarges the biblical account by stating that 'this crown David ever after wore on his own head.' But there is no positive evidence for this, and only the term נֵזֶר is used in the Bible for the crown of the Heb. kings. In Zec $6^{11.\,14}$ a crown (עֲטָרָה) is represented as placed on Joshua, the high priest, to indicate the union of the royal and priestly offices; but the usual word for the kingly crown of Israel is in this instance apparently avoided because it described also, as has been stated, that of the high priest. The crowns used at banquets were doubtless wreaths of flowers (see Is 28^{1}, also Wis 2^{8}, 3 Mac 4^{8} 7^{16}). Heroes were also received with them (Jth 3^{8}), and dwellings decorated (1 Mac 4^{57}).

4. In 1 Mac 10^{29} 11^{35} 13^{39} allusion is made to crowns due from the Jews to the Syrian kings, by which are meant, not coins so named, but money tribute, which represented allegiance as formerly the presentation of a crown had done (1 Mac 13^{37}, 2 Mac 14^{4}; Jos. *Ant.* XII. iii. 3, στεφανίτης φόρος; see Levy, *Gesch. der Jüd. Münzen*; Madden, *Jewish Coinage*).

The Heb. has other words synonymous with those mentioned (as פְּאֵר head-dress; צָנִיף turban; צְפִירָה diadem; לִוְיָה garland), but their consideration does not fall here. The later Jews spoke of three crowns, of the law, the priesthood, and the king, and added 'the crown of a good name' as best of all (Carpzov, *Appar. Crit.* p. 60; Braunius, *De Vestitu*, p. 634). The word is also used in AV for the top of the head (Gn 49^{26}, Dt 33^{20}, 2 S 14^{25}, Is 3^{17}, Jer 2^{16} 48^{45}; tr. *pate* Ps 7^{16}, *head* [RV 'crown of the head'] Dt 33^{16}, *scalp* Ps 68^{22}).

In NT the AV gives 'Crown' for two words (στέφανος and διάδημα) which RV properly distinguishes. Στέφανος was not applied by the Greeks to a king's crown. 'It is the crown of victory in the games, of civic worth, of military valour, of nuptial joy, of festal gladness . . . the *wreath* in fact, or the *garland* . . . but never, any more than *corona* in Latin, the emblem and sign of royalty' (Trench, *Syn. of NT*, xxiii.; see, too, Lightfoot on Ph 4^{1}). Roman law likewise regulated the bestowment of special *coronæ* as rewards of military valour and civic service; and while it was customary to use crowns on ceremonial and festive occasions, they never symbolized royalty. The word for the latter was *diadema* (see DIADEM). This distinction is observed in NT, though not always in the LXX (see 2 S 12^{30}, 1 Ch 20^{2}, Ps $21(20)^{4}$, Ezk 21^{26}, Zec $6^{11.\,14}$). In NT a crown is an emblem of victory or reward. It describes the Christian's final recompense (1 Co 9^{25}, Rev 3^{11} $4^{4.\,10}$), specifically called a crown of righteousness (2 Ti 4^{8}), of life (Ja 1^{12}, Rev 2^{10}), of glory (1 P 5^{4}). St. Paul applies it to his converts as being his reward (Ph 4^{1}, 1 Th 2^{19}). Hence in the Apoc. a crown is represented on the conquering Christ (Rev 6^{2} 14^{14}), on the symbolic locusts (Rev 9^{7}), and on the 'woman' of ch. 12, as a sign of victory. In 12^{3} 13^{1} 19^{12}, on the other hand, the 'dragon' and the 'beast' and the kingly Christ have diadems, the 'many diadems' signifying Christ's universal empire (see v.^{16}). Thus *Crown* in NT is the emblem of attainment, the reward of service. Even the 'crown of thorns' was probably a mock symbol of victory, suggested to the soldiers by the *coronæ* of military or civic service; though Trench remarks that 'woven of such materials as it was, διάδημα could not be applied to it.'

While the use of crowns among the Greeks and Romans seems to have originated with the athletic games,—allusions to which are made by St. Paul in the places cited above,—and while the crown does not appear in Homer as an emblem of victory, later traditions attributed its invention to one or other of the gods. Those traditions are collected by Tertullian in his tract *De Corona*, in which he violently inveighs against the use of crowns by Christians.

LITERATURE.—Paschalius, *Coronæ*; Meursius, *De Coronis*; Fabricius, *Bibliographia Antiquaria*; Reland, *Antiquitates sacr. veter. Hebr.*; Braunius, *De Vestitu sacerd. Hebr.*; Jahn's and Keil's *Bib. Arch.*; Bähr, *Symbolik des Mosaischen Cultus*; Nowack, *Hebr. Archäol.* G. T. PURVES.

CROWN OF THORNS.—See THORN. **CRUCIFIXION.**—See CROSS.

CRUELTY.—The habits and sentiments of Gentiles and average Israelites, both in OT and NT, are often tainted with gross cruelty. Even acts of divinely appointed leaders of Israel, utterances of the psalmists and prophets, and ordinances of the inspired Law, sometimes seem inhuman when judged by the highest standards of modern Christianity. These standards require the righteous man to treat human life as sacred, and to refrain scrupulously from inflicting unnecessary pain. But Christianity has only recently secured any widespread practical recognition of these principles, and even now they prevail only with minorities in a few of the most advanced communities. Moreover, civilization has developed a sensitiveness which often renders the punishment of a criminal really as severe as in ancient times; the mitigation of physical cruelty has been compensated for by the refinement of mental torture. The constant tendency of inspired teaching is towards humanity, and ordinances which seem inhuman often mitigate prevailing barbarity.

The facts are as follows. The extermination of enemies is frequently commanded, Dt 20^{17} etc., and such extermination is described with apparent approval, Jos 6^{21} etc. David massacred the Ammonites with great barbarity, 2 S 12^{31}, 1 Ch 20^{3}, cf. 2 K 15^{16}. Amongst the Israelites themselves the Law ventures to impose only a moderate limitation of blood-revenge. Ex $21^{20.\,21}$ (JE) forbids the actual beating to death of a male or female slave, but does not feel it possible to deal with cases in which the victim survives a day or two. Death is to be inflicted for a large number of offences, some of them slight, *e.g.* sabbath-breaking, Ex 35^{2} (P). An incestuous person, Lv 20^{14} (H), and an unchaste woman of the priestly clan, Lv 21^{9} (H), were to be burnt to death. The OT records great cruelty on the part of Gentiles, barbarous outrages on women and children, 2 K 8^{12}, Hos 13^{16}, Am 1^{13}, and cruel mutilation, 2 K 25^{7}. These are more than borne out by the sculptures of the Assyrians, who delighted to depict flaying alive and other tortures inflicted upon their enemies, *e.g.* upon the Elamite prisoners on slabs 48–50 in the Kouyunjik Gallery of the British Museum. In the NT we meet with the barbarous Roman punishments of scourging and crucifixion. W. H. BENNETT.

CRUSE.—See FOOD. The English word, now archaic though not quite obsolete, is apparently of Scandinavian origin, and means an earthenware jar for holding liquids; less freq. for drinking from, as Skelton (1526), 'Then he may drink out of a stone cruyse.' In AV it holds water (1 S $26^{11.\,12.\,16}$, 1 K 19^{6}), oil (1 K $17^{12.\,14.\,16}$), honey (1 K 14^{3}), and salt (2 K 2^{20}). J. HASTINGS.

CRYSTAL.—1. In Job 28^{17} וְכוֹכִית is rendered in AV 'crystal' (*i.e.* rock-crystal); and as it occurs in a passage descriptive of the treasures of mines, this is probably to be accepted as correct. (See, however, *Oxf. Heb. Lex.* and RV which tr. 'glass'). 2. In Ezk 1^{22} another word קֶרַח is also tr. 'crystal' (RVm 'ice'), and, in this case, there is no certainty whether rock-crystal or ice is referred to (cf. Davidson, *ad loc.*); the same remark applies to κρύσταλλος in Rev 4^{6} 21^{11} 22^{1}; but this is immaterial in the case of poetic imagery, as the two substances are similar as regards transparency and absence of colour; hence the Greeks applied the same word (κρύσταλλος) to both. 3. In Job 28^{18} RV substitutes 'crystal' for 'pearls' of AV as tr. of גָּבִישׁ.

Rock-crystal is pure quartz, crystallizing in hexagonal prisms with pyramidal apices, and is abundant in veins amongst the older rocks in nearly all countries. It was used in ancient times for ornamental purposes, and being softer, could be cut by the diamond or corundum. It is possible that the Heb. word (יַהֲלֹם) tr. 'diamond' as one of the stones on the breastplate of the high priest was really rock-crystal, as it was engraved with the name of one of the tribes (Ex 28^{21}). [See, however, art. STONES (PRECIOUS), and *Oxf. Heb. Lex.*, where the jasper or the onyx are suggested as equivalents of יַהֲלֹם.] E. HULL.

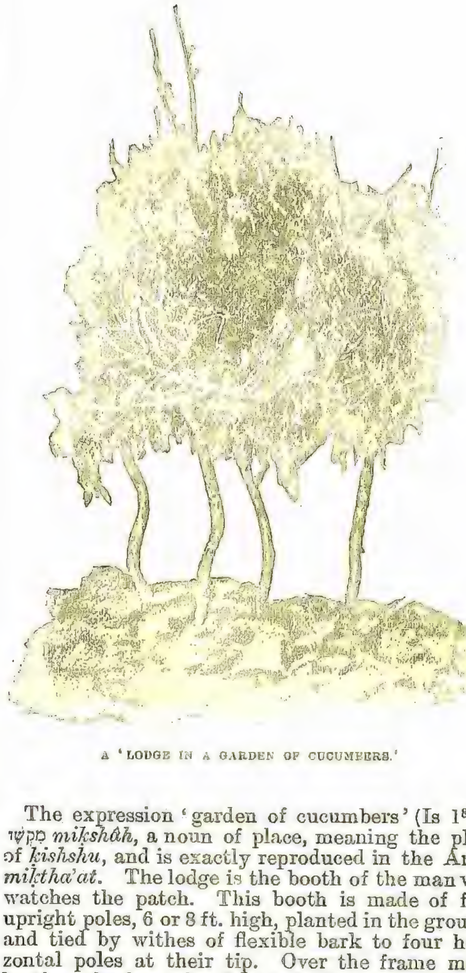
CUB (כּוּב, AV Chub), in Ezk 30^{5}, is almost certainly a corruption of לוּב (*i.e.* Lybia) as was read by LXX. The 'Lybia' of AV is a mistranslation of Put (see RV). Cf. Nah 3^{9}, where Lybians are mentioned along with Cush (Ethiopia), Egypt, and Put, as here; also 2 Ch 12^{3} 16^{8}. Identifications which assume the correctness of the text lead to no satisfactory result, and hardly deserve notice. J. SKINNER.

CUBIT.—See WEIGHTS AND MEASURES.

CUCKOW (שַׁחַף *shaḥaph*, λάρος, *larus*).—The Heb. word is from a root signifying *leanness*. It occurs only in Lv 11^{16} and Dt 14^{15}, in the list of unclean birds. No scholar now renders it by *cuckow* (*cuckoo*). Various slender birds have been proposed, as the *stormy petrel*, the *shearwater*, the *tern*, and the *gull* or *seamew*. The RV, following the LXX and the Vulg., has *seamew*. It is probably to be understood generically for birds of the *Laridæ*, the *gull* family. G. E. POST.

CUCUMBER (קִשֻּׁאִים *ḳishshu'îm*, σίκυοι, *cucumeres*).—Cucumbers are universally cultivated in the E., and are a favourite article of food. Two species or varieties are common, *Cucumis sativus*, L., which is the ordinary green or whitish cucumber, and *C. Chate*, L., which is originally an Egyptian plant. The former is called in Arab. *khiyâr*. It has a very delicate flavour, and is more wholesome than the European variety. The latter is known by the name *ḳiththâ* or *miḳtî*, which is a modification of the Heb. קִשֻּׁא, and is doubtless the vegetable referred to as one of the good things of Egypt (Nu 11^{5}). It is longer and more slender than the common cucumber, being often more than a foot long, and sometimes less than an inch thick, and pointed at both ends. It has a thick, hairy, mottled or striped green rind, with a less juicy pulp than the *khiyâr*, but a similar, though less delicate, flavour. Although originating in Egypt, it is everywhere cultivated in the East. It is esteemed coarser than the *khiyâr*, and sold cheaper.

A cardinal difference between the *ḳiththâ* and the *khiyâr* is that the latter cannot be cultivated without constant irrigation. The *ḳiththâ*, while often cultivated on watered soil, and then attaining a large size, grows on perfectly dry soil also, without a drop of water through the hot summer months, during which it flourishes. The word *khiyâr* is said to be of Persian origin.



A 'LODGE IN A GARDEN OF CUCUMBERS.'

The expression 'garden of cucumbers' (Is 1[8]) is מִקְשָׁה *miḳshâh*, a noun of place, meaning the place of *ḳishshu*, and is exactly reproduced in the Arab. *miḳtha'at*. The lodge is the booth of the man who watches the patch. This booth is made of four upright poles, 6 or 8 ft. high, planted in the ground, and tied by withes of flexible bark to four horizontal poles at their tip. Over the frame made by these horizontal poles are laid cross poles, and, over all, branches of trees. Sometimes a floor is made by tying four other horizontal poles at a few inches or feet above the ground, and laying over them a flooring of cross poles. Walls are sometimes made of wattled branches, more or less enclosing the frail tenement. Such booths are to be seen in all the cucumber and melon patches, and in vineyards and other cultivated land which requires watching. They are fitting emblems of instability, as the withes with which they are tied together give way before the winds of autumn, the branches are scattered, and the whole structure soon drops into a shapeless heap of poles and wattles, themselves soon to be carried off and used as firewood, or left to rot on the ground.

G. E. POST.

CULTURE.—Only 2 Es 8[6] AV and RV, 'give us seed unto our heart, and culture to our understanding, that there may come fruit of it.' The Eng. word is a direct and accurate tr. of the Lat. (*cultura*), and is used in its own earliest sense of the cultivation or tillage of the soil. Coverdale, Matthew, and the Bishops have 'build,' Geneva 'prepare,' but Douay 'give tillage to' the understanding.

J. HASTINGS.

CUMBER (from old Fr. *combrer*, 'to hinder,' which is from low Lat. *cumbrus*, i.e. *cumulus*, 'a heap'; thus c. = 'put a heap in the way').—1. To harass, worry, Lk 10[40] 'Martha was cumbered about much serving.' Cf. Coverdale's tr. of 1 K 21[5] 'What is ye matter that thy sprete is so combred?' The usual prep. is 'with'; here 'about' is a lit. tr. of the Gr. *περὶ* (*περιεσπᾶτο περὶ πολλὴν διακονίαν*). RVm gives 'distracted,' like Ostervald's *distraite*, and as 1 Co 7[35] 'without distraction,' AV and RV (*ἀπερισπάστως*). 'Cumbered' is Tindale's; Wyclif has 'martha bisied aboute the oft seruyse'; Coverdale, 'Martha made hir self moch to do to serue him.' 2. To 'block up,' 'burden,' Lk 13[7] 'Cut it down; why cumbereth it the ground?' again from Tindale (and scarcely obsolete in this sense); Wyclif 'ocupieth,' fr. Vulg. *occupat*; Geneva, 'why kepeth it the ground baren?' a better tr. of the Gr. here (*καταργέω*, a favourite word with St. Paul, elsewhere only in this passage and He 2[14], AV 'destroy,' RV 'bring to nought'). Cf. Bunyan, *Holy War* (Clar. Press ed. p. 47), 'Thou hast been a Cumber-ground long already.' **Cumbrance,** only Dt 1[12] 'your c.' (טָרְחֲכֶם), and Is 1[14] RVm 'your new moons . . . are a c. unto me' (הָיוּ עָלַי לָטֹרַח, AV and RV 'trouble'). The mod. forms 'encumber,' etc., are not quite equivalent, being too wholly passive. As Davies (*Bible Eng.* p. 211) remarks, Spenser's 'cumbrous gnattes' (*F. Q.* I. i. 23) seems now a singularly inappropriate epithet.

J. HASTINGS.

CUMI.—See TALITHA.

CUMMIN (כַּמֹּן *kammôn*, *κύμινον*, *cyminum*).—The seed of *Cuminum cyminum*, L., an umbelliferous plant cultivated in Bible lands. It is known in Arab. by the same name as in Heb., *kammûn*, and is used in cookery as a condiment, esp. in the dishes prepared during the fasts, which, being made without meat, require more seasoning to make them palatable. It has also carminative properties, and is used in poultices for the dissipation of swellings. It has a penetrating odour and savour, not over-agreeable to most Europeans. It is twice mentioned in Scripture. Once the reference is to the mode of threshing it (Is 28[25. 27]) by a rod instead of the *môrag*. This is still practised with this and other seeds of plants cultivated in small quantities. It is also mentioned as subject to tithe (Mt 23[23]).

G. E. POST.

CUN (כּוּן), 1 Ch 18[8].—See BEROTHAI.

CUNNING.—The Anglo-Saxon *cunnan* meant both 'to know' and 'to be able,' whence both *can*, which Bacon uses as a finite verb, *Essays* (Gold Treas. ed. p. 40), 'In Evill, the best condition is, not to will; The Second, not to Can'; and also *cunning*, which is really the pres. ptcp. of the A.-S. *cunnan* as it appears in its Middle-Eng. form *cunnen*, to know. 'Cunning,' then, up to and after 1611, is generally knowledge, skill. Cf. Purvey's Preface to the Wycliffite Version of 1388, 'the Holy Spyrit author of all wisdom and cunnynge and truth'; Bp. Barlowe's translation of Ja 3[13] (*Dialoge* [1531], ed. of 1897, p. 34), 'Who that among you is wyse endued with connynge'; and Shaks. *Othello*, III. iii. 50, 'That errs in ignorance, and not in cunning.' In AV the subst. 'cunning' occurs only Ps 137^{5}, 'If I forget thee, O Jerusalem, let my right hand forget her cunning.'* The adj. is common, applied to men who are skilful in some work, or to the work they do skilfully. Thus Ex 35^{35} 'the c. workman . . . and . . . those that devise c. work.' Once to women, Jer 9^{17}, in ref. to their skill as hired mourners (on which see Thomson, *Land and Book*, iii. 403). But in Eph 4^{14} 'c. craftiness,' 2 P 1^{16} 'cunningly devised fables,' the meaning is probably 'wily,' 'deceitful.' Amer. RV prefers 'skilful' where cunning has that meaning (except Is 3^{3} 'expert'). J. HASTINGS.

CUP.—1. In OT the rendering of various words, the precise distinction between which, either as to form or use, is unknown to us. The usual word is כּוֹס *kôṣ* (ποτήριον, *calix*), the ordinary drinking-vessel of rich (Gn 40$^{11.\ 13.\ 21}$) and poor (2 S 12^{3}) alike, the material of which varied, no doubt, with the rank and wealth of the owner. Numerous illustrations are found on the reliefs of the Assyrian palaces, such, *e.g.*, as the cups in the hands of Assurbanipal and his queen, in a scene often reproduced. With these compare the specimens of pottery actually found on Jewish soil, in Bliss, *Mound of Many Cities*, Nos. 174, 181, etc., and the illustration cited below.

Joseph's divining cup (גָּבִיעַ Gn 44$^{2\text{ff.}}$) was of silver, and, we may infer, of elaborate workmanship, since the same word is used for the bowls (AV) or cups (RV), *i.e.* the flower-shaped ornamentation, on the candlestick of the tabernacle (which see for details, also BOWL). That the גָּבִיעַ was larger than the *kôṣ* is clear from Jer 35^{5}. The קְשָׂוֹת *ḳĕsâvôth*, of 1 Ch 28^{17} (Phœn. קסם, see Bloch's *Phœn. Glossar, sub voce*), were more probably flagons, as RV in Ex 25^{29} 37^{16} (but Nu 4^{7} RV cups). The *'aggān* (אַגָּן Is 22^{24}) was rather a basin, as Ex 24^{6}, than a cup (EV).

In NT ποτήριον is the corresponding name of the ordinary drinking-cup (water Mt 10^{42} etc., wine 23^{25} etc.). The 'cup of blessing' (1 Co 10^{16}) is so named from the כּוֹס הַבְּרָכָה *kôṣ habbĕrâkhah* of the Jewish Passover (which see, also LORD'S SUPPER). The cup represented on the obverse of the so-called Maccabæan shekels may be a cup such as was used on this occasion.

2. The word cup has received an extended figurative application in both OT and NT. (*a*) As in various other literatures, 'cup' stands, esp. in Psalms, for the happy fortune or experience of one's earthly lot, mankind being thought of as receiving this lot from the hand of God, as the guest the wine-cup from the hand of his host, Ps 16^{5} 23^{5} 73^{10} etc. But also conversely for the bitter lot of the wicked, Ps 11^{6} (cf. *c*, below), and in particular for the sufferings of Jesus Christ, Mt 20$^{22.\ 23}$, Mk 10$^{38.\ 39}$ 14^{36}, Lk 22^{42}, Jn 18^{11}. (*b*) Another figure is the 'cup of salvation' (lit. 'of deliverances'), Ps 116^{13}. The reference is to the wine of the thank-offerings (שְׁלָמִים), part of the ritual of which was the festal meal before J″ (cf. vv.$^{14\text{a}.\ 17\text{ff.}}$). A striking parallel is found in the inscription of יחומלך of Gebal (Byblus), who is figured on his stele in the act of presenting such a cup of thanksgiving to the local deity (see his inscription in *CIS* i. 1). (*c*) By a still bolder figure the punitive wrath of the offended Deity is spoken of as a cup which the guilty, Israelites and heathen alike, must drain to the dregs. So Jer 25$^{15\text{ff.}}$ (the wine-cup [of] fury), Ezk 23$^{32\text{-}34}$, Is 51$^{17\text{ff.}}$ ('the cup of trembling' RV 'staggering'), Zec 12^{2} (RV 'cup of reeling'), Ps 75^{8}, Rev 14^{10} 16^{19} 18^{6}, for all which see the commentaries. (*d*) Lastly, we have 'the cup of consolation (ποτήριον εἰς παράκλησιν)' offered to the mourners after the funeral-rites were performed, Jer 16^{7} (cf. Pr 31^{6} and see Commentaries *in loc.* and Schwally, *Das Leben nach d. Tode*, § 8).

A. R. S. KENNEDY.

CUPBEARER (מַשְׁקֶה).—An officer of considerable importance at Oriental courts, whose duty it was to serve the wine at the table of the king. The first mention of this officer is in the story of Joseph (Gn 40$^{1\text{-}15}$), where the term rendered 'butler' (wh. see) in EV is the Heb. word above, rendered in other passages *cupbearer* (Arabic *es-sâḳi*). The holder of this office was brought into confidential relations with the king, and must have been thoroughly trustworthy, as part of his duty was to guard against poison in the king's cup. In some cases he was required to taste the wine before presenting it. The position of Nehemiah as cupbearer to Artaxerxes Longimanus was evidently high. Herodotus (iii. 34) speaks of the office at the court of Cambyses, king of Persia, as 'an honour of no small account,' and the narrative of Neh. shows the high esteem of the king for him, who is so solicitous for his welfare that he asks the cause of his sadness (2^{2}). The cupbearers among the officers of king Solomon's household (1 K 10^{5}) impressed the queen of Sheba, and they are mentioned among other indications of the grandeur of his court, which was modelled upon courts of other Oriental kings. The Rabshakeh, who was sent to Hezekiah (2 K 18^{17}), was formerly supposed to have been cupbearer to Sennacherib, but the word (רַבְשָׁקֵה) means *chief of the princes* (see Del. on Is 36^{2}, and Sayce, *HCM* p. 441). Among the Assyrians, the cupbearers, like other attendants of the king, were commonly eunuchs, as may be seen from the monuments; and such was the case generally at Oriental courts. The Persians, however, did not so uniformly employ eunuchs, and probably never so degraded their own people or the Jews who served them. Certainly, Nehemiah was not a eunuch. Herod the Great had a cupbearer who was a eunuch (Jos. *Ant.* XVI. viii. 1).

H. PORTER.

CUPBOARD (κυλίκιον, 1 Mac 15^{32}).—A sideboard used for the display of gold and silver plate. This is the earliest meaning of cupboard, a board or table for displaying cups and other vessels; cf. Greene (1592), 'Her mistress . . . set all her plate on the cubboorde for shewe.' J. HASTINGS.

CURIOUS.—Of the many meanings which once belonged to this word only two now remain, *inquisitive* and *peculiar*. Of these the first is found in Apocr., 2 Es 4^{23} (*interrogare*) 9^{13} (*curiosus esse*), Sir 3^{23} (μὴ περιεργάζου, RV 'Be not over busy'), 2 Mac 2^{30} (πολυπραγμονεῖν). In OT curious occurs as a description of 'the girdle of the ephod' in Ex 28$^{8.\ 27.\ 28}$ 29^{5} 39$^{5.\ 20.\ 21}$, Lv 8^{7}, for which RV substitutes 'cunningly woven,' Amer. RV 'skilfully woven.' 'Curious girdle' (AV) or 'cunningly woven band' (RV) represents one word in Heb., חֵשֶׁב *ḥêshebh*, which comes from חָשַׁב *ḥâshabh*, to think, devise, invent ingenious or artistic things; whence also חֹשֵׁב *ḥôshêbh*, tr^{d} 'cunning workman'; and מַחֲשָׁבָה *maḥăshâbhah*, device, invention, tr^{d} 'curious works,' Ex 35^{32} (RV 'cunning works'),

---

* The Heb. is simply 'let my right hand forget' (תִּשְׁכַּח יְמִינִי), which may be dealt with in three ways. 1. As a passive: so LXX, ἐπιλησθείη ἡ δεξιά μου; Vulg., oblivioni detur dextera mea; Luth., so werde meiner Rechten vergessen; Ostervald, que ma droite s'oublie elle-même; Coverdale, 'let my right hande be forgotten.' But the Heb. as it stands cannot be tr^{d} passively. 2. As a corrupt text. The simplest emendation is proposed by Delitzsch, תִּשָּׁכַח, which gives the pass. at once, and with which may be compared Jer 23^{40}. Other suggested emendations will be found in Cheyne, *Book of Psalms*, crit. n. *in loc.* But Wellhausen (in Haupt) leaves the Heb. untouched and unnoticed. 3. As an ellipsis. So Del. as an alternative, 'let my right hand show itself forgetful' (cf. Wyclif's tr. 'my rigt hond be gouun [given] to forgeting'; Cheyne, 'let my right hand deny its service' (but in parchment ed. 1884, 'let the strength of my right hand dry up'); Geneva, 'forget to play'; Bishops' Bible, AV, and RV 'forget her cunning.'

'Crafty,' 'cunning,' and 'curious' were all used formerly in the sense of clever, ingenious; cf. Barbour (1375), *Bruce*, x. 359—

> 'A crafty man and a curiouss';

and as a good parallel to the passages in Ex, Shaks. *Cymb.* V. v. 361—

> 'He, sir, was lapp'd
> In a most curious mantle, wrought by the hand
> Of his queen mother.'

The same thought is found in Ps 139^{15} 'I was made in secret, and curiously wrought in the lowest parts of the earth.' The Heb. here (רֻקַּמְתִּי) means 'variegated'; 'the body or the fœtus is described as woven together of so many different-coloured threads, like a cunning and beautiful network or tapestry'—Perowne.

The only other occurrence of 'curious' is in Ac 19^{19} 'c. arts,' meaning 'magical arts,' as RVm (Gr. τὰ περίεργα, lit. 'superfluous things,' 'things better left alone' (Page); cf. Sir 3^{23} above, and see BUSYBODY). 'Curious' here is due to Wyclif, 'curiouse thingis,' a literal tr. of Vulg. *curiosa*; Tindale, 'c. crafts'; Geneva, 'c. artes' (Vulg. marg. *curiosas artes*). From this place it has passed into English literature, as Bacon, *Essays*, 35, 'the Q. Mother, who was given to Curious Arts, caused the King her Husbands Nativitie, to be Calculated, under a false Name.' J. HASTINGS.

CURSE.—Under this title an account is given of the ideas connected primarily with the Heb. words הֶחֱרִים and חֵרֶם (*ḥērem*), and with the Gr. word ἀνάθεμα (*anathema*), so far as it is representative of the latter. The Heb. words are variously rendered in AV: 'the *accursed* thing' in Jos $7^{1.\ 11\ \text{etc.}}$; 'everything *devoted*' in Nu 18^{14}; 'every *dedicated*' thing in Ezk 44^{29}; 'and I will *consecrate* their spoil' in Mic 4^{13}. RV has in all these places 'devote' or 'devoted thing'; where the object is personal, it has usually 'utterly destroy' (see Driver on Dt 2^{34} 7^2 or *Sam.* p. 100 f.). A thing which is חֵרֶם is irrevocably withdrawn from common use. This may be done in two ways, or at least may have two kinds of result. In the one case, the devoted thing becomes God's; it falls irredeemably to Him, or to His sanctuary or His priests. In this sense, as has been pointed out, to 'devote' a thing is to make a peculiar kind of vow concerning it. The most instructive passage, in illustration of this sense, is Lv $27^{28\text{f.}}$ 'No devoted thing, that a man shall devote unto the Lord of all that he hath, whether of man or beast, or of the field of his possession, shall be sold or redeemed: every devoted thing is most holy unto the Lord. None devoted, which shall be devoted from among men, shall be ransomed; he shall surely be put to death.' In the second and third of the passages quoted above (Nu 18^{14}, Ezk 44^{29}), it is said expressly that every devoted thing in Israel is the priest's: this might include the spoil of conquered nations, carried into the temple treasury, as perhaps in Mic 4^{13}, or property of any other description which a man irrevocably alienated. But the last words in Lv 27^{29} (he shall surely be put to death) point to the second, and much the commoner, use of the words הֶחֱרִים and חֵרֶם. To 'devote' a thing means to put it under the ban, to make and to execute a vow of extermination, so far as that thing is concerned. It is this meaning that has occasioned the Eng. rendering for חֵרֶם—the accursed thing. Whatever is devoted to utter destruction is regarded as under a curse. Things which are so devoted are in a sense inviolable; in the old, morally neutral sense of holiness, it may be said that a peculiar degree of holiness attaches to them. The thing called חֵרֶם is at the same time קֹדֶשׁ קָדָשִׁים ליהוה (compare the seemingly opp. meanings of *sacer* in Latin, and the idea of *taboo*). It was common in ancient warfare to 'devote,' or put under the ban, the enemy and anything or everything which belonged to him. All wars were holy wars; warriors were consecrated (Is 13^3); and the ban, which seemed natural in the circumstances, might be of greater or less extent. In Dt 2^{34}, which speaks of the conquest of Sihon's kingdom, we are told that Israel 'utterly destroyed (devoted) every inhabited city, with the women and the little ones,' and the same terrible account is given in Dt 3^6 of Og and Bashan. In Dt 7^2 this is even laid down as the law for the conduct of the sacred war against the Canaanites. But it is only human beings that are here put under the ban: 'The cattle we took for a prey unto ourselves, with the spoil of the cities which we had taken.' In some cases the ban was more stringent. In Dt 7^{25} it is specially extended to the precious metal on the images of the Canaanites: this is an abomination to J″; and 'thou shalt not bring an abomination into thy house, and become a devoted thing (חֵרֶם) like it . . . for it is a devoted thing.' It was a ban, or curse, of this stringent type which Achan violated at the conquest of Jericho, and Hiel the Bethelite, long afterwards, when he rebuilt the town. He who appropriates what is חֵרֶם, as Achan did, becomes himself (Dt 7^{25}, Jos 6^{18}) חֵרֶם: the ban, or sentence of extermination, is extended to him, and he is ruthlessly destroyed, with all the persons and property that attach to him. It was a similar ban which Saul violated, or allowed the people to violate, in the war with Amalek; and his action is represented as equally serious, though not followed on the instant by such tragical results. In point of fact, it was not practicable for the Israelites to 'devote' the Canaanites wholesale (1 K 9^{21}); and the proclamation of ruthless warfare, under the auspices of a god, was no peculiarity of theirs. The same thing is affirmed of the Assyrians in 2 K 19^{11}, and of Mesha on the Moabite stone. It is more interesting to note that God Himself is sometimes the subject who proclaims this war, or pronounces this sentence of destruction. Thus in Is 34^2 'The Lord hath indignation against all the nations . . . He hath devoted them (הֶחֱרִימָם), He hath given them up to the slaughter.' So in v.^{5} Edom is עַם־חֶרְמִי the people whom I have devoted. And in Mal 4^6 God threatens to come and lay the earth under a ban.

It is usual to point to Ezr 10^8 as an instance marking the transition between the ancient and awful use of חֵרֶם, and that post-biblical use in which it is equivalent to **Excommunication**. We are told here that all the substance of a man who did not answer a certain summons should be forfeited (יָחֳרַם), and he himself separated (יִבָּדֵל) from the congregation. Probably this is the first trace of Jewish ecclesiastical usages, of which hints are to be found in NT in such passages as Mt 18^{17}, Jn 9^{22} 12^{42} 16^2, Lk 6^{22}. Though such usages, no doubt, would influence the practice of the Christian Church, it is not likely that they have anything to do with that 'delivering' of offenders 'to Satan,' of which we read in 1 Co 5^5, 1 Ti 1^{20}. The suggestion in both these cases, and especially in the first, which has been interpreted of a sentence of death, is rather of a severity resembling that of the ancient 'ban'; but with the significant difference, that in both the purpose of this solemn exclusion from the Christian community is remedial. Both the incestuous person at Corinth, and Hymenæus and Alexander in Asia, are to profit eventually by their discipline.

The true succession to חֵרֶם is represented in NT by those passages in which ἀνάθεμα (Anathema) is found. This is the usual LXX rendering of the word. Thus in Dt 7^{26} referred to above, the Gr. is ἀνάθεμα ἔσῃ ὥσπερ καὶ τοῦτο: thou shalt be 'accursed' like the accursed thing which thou takest. Cf. Jos $6^{17\text{f.}}$, Zec 14^{11}.

Even the place-name Hormah (Nu 21^3) is rendered *ἀνάθεμα*; a variant is *ἐξολέθρευσις*. In NT the word is used only by St. Luke and St. Paul (Rev 22^3 quotes Zec 14^{11}, but with the form *κατάθεμα*). In Ac $23^{12.14.21}$ we read of men who '*ἀναθέματι ἀνεθεματίσαμεν ἑαυτούς*'—bound themselves with imprecations on their own heads—neither to eat nor to drink till they had killed Paul. The same verb is used in Mk 14^{71} with *ὀμνύναι* to describe Peter's profane denial of Christ: he wished he might be cursed or damned if he knew the man. But the serious passages are in St. Paul. In 1 Co 12^3 we have, No man speaking in the spirit of God says, Jesus is *ἀνάθεμα*. This *may* mean that no man speaking in the spirit of God can do what Paul once tried to get Christians to do—blaspheme Christ, *i.e.* speak profanely of Him, without defining more precisely how (Ac 26^{11}). Or it may mean that no one speaking in the spirit of God can speak of Christ as an object of hatred to God, as Jews with the cross in their minds might do. For illustrations of the passage, see Edwards, *ad loc.* (*Com.* on 1 Cor.), and Harnack's note on *Didache*, xvi. 5 (*ὑπ' αὐτοῦ τοῦ καταθέματος*). In Ro 9^3 St. Paul says he could wish himself to be *ἀνάθεμα* from Christ for his brethren's sake. This is exactly the חֵרֶם of OT: he could wish to perish that they might be saved—'a spark from the fire of Christ's substitutionary love.' It is only the other side of this passion which is seen in the other passages where the word is used: 1 Co 16^{22}, Gal $1^{8f.}$. 'If any man love not the Lord Jesus Christ, let him be *ἀνάθεμα*': the apostle assents to God's will that no part in bliss, but only utter perdition, can be his who does not love the Saviour. So again, when he says, and says deliberately and repeatedly, of the man or the angel who preaches another gospel than he has preached, 'let him be *ἀνάθεμα*,' he expresses in the strongest possible style his assurance that the gospel he preaches is the one way of salvation, that to preach another is to make the grace of God vain, to stultify the death of Christ and to delude men, and that for such sins there can be nothing but a final irremediable judgment, to which he assents. The vehemence is like that with which Christ says, that better than a man should make one of His little ones stumble would it be for that man to have a millstone hanged about his neck, and be cast into the depths of the sea. In both cases the passion of indignation is the passion of sympathy with the love of God, and with the weak, to whom an irreparable injury is being done.

The word 'curse' is also used in the English Bible as the tr. of קְלָלָה and *κατάρα*. The interest of this centres in the passage Gal 3^{10-13}, and in the ref. there to Dt 21^{23}. The non-observance of the law, St. Paul teaches, puts men (some limit it to the Jews) under a curse; from this curse Christ redeems them by becoming Himself a curse (*κατάρα*) on their behalf. The proof that Christ did become a curse is given in the form of a reference to the Crucifixion: it is written, 'cursed is every one that hangeth on a tree' (Dt 21^{23}). The Heb. is קִלְלַת אֱלֹהִים, the LXX *κεκατηραμένος ὑπὸ θεοῦ*; and it has been often remarked that St. Paul does not introduce 'by God' into his quotation. Some seem to think that he shrank from doing it, as if it would have been equivalent to saying *ἀνάθεμα Ἰησοῦς*. But he does not shrink from saying that God made Christ to be sin for us (2 Co 5^{21}), which, in its identification of Christ with, or its substitution of Christ for, the sinner, is exactly the same as His becoming a curse in Gal 3^{13}. The important thing is not that St. Paul omits the *ὑπὸ θεοῦ*, but that, as Cremer remarks, he avoids the personal *κεκατηραμένος* of the LXX, and employs the abstract *κατάρα*. In His death on the cross He was identified under God's dispensation with the doom of sin: He became curse for us; and it is on this our redemption depends. See CROSS.

LITERATURE.—Besides the comm. on the various passages quoted, see Merx in Schenkel, *Bibel-Lex. s.v.* 'Bann'; Ewald, *Ant. of Isr.* pp. 76–79 (Eng. tr.); Smend, *A.T. Religionsgeschichte*, § 334; W. R. Smith, *RS*, p. 434 f.; Weber, *Die Lehren des Talmud*, 137–139; Schürer, *HJP* II. ii. 60 ff., 157.

J. DENNEY.

CURTAIN.—**1.** The ordinary tent of the Semitic nomad, in modern times, is made by sewing together a number of narrow lengths of a water-resisting material, as a rule cloth woven from yarn of goats' and camels' hair mixed with sheeps' wool. And so it must have been in ancient times.* Hence we read of a Heb. country maid being 'black as the tents of Kedar' (Ca 1^5). The name of these lengths of tent-cloth was in the Heb. יְרִיעוֹת (AV and RV 'curtains'). The weaving of them, as well as the previous spinning of the yarn, was and is one of the chief occupations of the women of the tribe (Ex $35^{25.26}$; Palmer, *Desert of the Exodus*, i. pp. 81, 125; Doughty, see footnote). With a more advanced civilization men also took to weaving as a trade (1 Ch 4^{21}); indeed this particular branch, the weaving of goats' hair cloth, is well known to have been one of the staple industries of Tarsus, which has led many scholars to interpret *σκηνοποιός* (Ac 18^3) as 'a weaver of tent-cloth' (see art. 'Paulus' in *PRE*² xi. 359).† In OT we find that ten of these *yĕrî'ôth* or curtains, of special width and workmanship, were to be 'coupled together,' in two sets of five, to form the innermost covering of the tabernacle proper (the *Mishkān*), as given in detail Ex $26^{1ff.}$. Above this was a more ordinary covering, composed of eleven curtains of the usual goats' hair, and constituting the אֹהֶל or tent of the tabernacle (Ex $26^{7ff.}$). For further particulars about these curtains see TABERNACLE. *Yĕrî'ôth* is also used in OT of the curtains or tent-cloth of ordinary nomad tents (Jer 49^{29}) and of the gala-tents of king Solomon (Ca 1^5), and often stands in poetic parallelism with אֹהֶל 'tent,' Is 54^2, Jer 4^{20} 10^{20}, Hab 3^7. The sing. יְרִיעָה is even used of the tent erected by David for the ark on Mt. Zion, 2 S 7^2 (LXX *ἐν μέσῳ τῆς σκηνῆς*, but 1 Ch 17^1 יְרִיעוֹת plur.).

2. In AV the portière (מָסָךְ) which closed the entrance to the Holy Place of the tabernacle, and is elsewhere in AV trᵈ 'hanging,' is once rendered curtain (Nu 3^{26}). The same Heb. word is also applied to the similar curtain at the entrance of the court of the tabernacle. The uniform trⁿ in RV is 'screen,' even when the name is applied to the 'veil of the screen' which separated the Holy Place from the Holy of Holies, cf. Ex 26^{36} 35^{12} etc. See further TABERNACLE.

3. Is 40^{22} the word trᵈ curtain (דֹּק) seems from its etymology to denote some fine material such as gauze (so RVm, Dillm., Duhm).

4. In the Book of Judith we read of Holofernes possessing a very magnificent *κωνωπεῖον* (EV 'canopy,' Jth 10^{21} $13^{9.15}$ 16^{19}) 'of purple and gold and emerald and precious stones inwoven.' This, as the name and the context of 10^{21} imply, must have been a mosquito-curtain. See CANOPY.

A. R. S. KENNEDY.

CUSH (כּוּשׁ).—**1.** In the hieroglyphs Kash, Kaish, Kish, Keshi, Kesh, or Kesha, a nation to which frequent reference is made in the Bible. Its founder is given in the ethnological tables of Gn (10^{6}) as son of Ham, and brother of Mizraim (Egypt), Put, and Canaan. Though the form Kush is not found in the hieroglyphs, there is no doubt of the identity of the nation ordinarily referred to in the Bible, and located by Ezk 29^{10} S. of Egypt, with the *Kesh*, whose home was in Ethiopia, but who were known to the Hebrews through the prominent part they played in Egyp. affairs. This country, 'embracing the territories S. of Egypt originally inhabited by negro tribes called Nahs. u' (Brugsch, *Geographie der Nachbarländer Ægyptens*, p. 4), and extending S. from the first cataract, though repeatedly invaded by Egyp. kings of the early dynasties, was formally enrolled in Egypt by Tahutmes I. of the 18th dynasty, and put under a governor called the prince of Kesh (Egyp. *seten-si en Kesh*, king's-son of Cush), who from the 18th dynasty regularly figures in the Egyp. records by the side of the king of Egypt. Somewhere about 1000 B.C., during the wars between the high priests of Amon (descendants of Ḥrihor) and the Tanites, the Upper Nile was lost to Egypt, and it is probable that descendants of Ḥrihor, escaping to Napata, on Mt. Barkal (according to some authorities, the Heb. נֹף, which is more probably to be identified with Memphis), founded a dynasty. These kings took the same titles as the Egyp. monarchs; at about B.C. 800, at the end of the reign of Sheshonḳ II., they occupied Thebes; and about 775, under the king Pi'anchi, they had spread as far S. as Hermopolis, while all important towns had Eth. garrisons. An attempt made by Tefnaht of Sais (whose name survives in Gr. authors under the form Τνέφαχθος) to unite the petty princes under whose rule Lower Egypt had now fallen, in resisting them, was defeated at Memphis, (the great stele of Pi'anchi, edited by Mariette, *Monuments Divers*, and tr. by Brugsch, *Gesch. Ægyp.* 682–707, in which this event is described, is one of the most important of the hieroglyphic monuments), although for reasons not known Pi'anchi afterwards made terms with Tefnaht, whose son Bokenranf, or Bocchoris, is represented by Manetho as the founder of the 24th dynasty. During the reign of this king (about B.C. 728), a successor of Pi'anchi (probably after some intermediate reigns), Shabaka, son of Kashtu, called in the Bible סוא *So'* (2 K 17^{4}, which should rather be read Sava, representing the name without the definite article), himself on the mother's side a descendant of Osorkon III. of the 23rd dynasty, invaded Lower Egypt, defeated Bocchoris, and put him to death; and, unlike his predecessor Pi'anchi, succeeded in obtaining a permanent hold on the country, whence he and his two successors are regarded as constituting a 25th, or Eth. dynasty. The conspiracy between this king and Hosea of Isr. against the Assyr. led to the defeat of the former at Raphia in 720, and to the captivity of the ten tribes; and the identification of Egypt with Ethiopia at this time is alluded to in Is 7^{18}, where the 'fly that is in the uttermost part of the river of Egypt,' *i.e.* Ethiopia, is made co-ordinate with Assyria as a first-rate power; and in Is 20$^{4\text{f.}}$ the names Cush and Mizraim are used as synonyms. (See especially Lenormant, 'Mémoire sur l'époque Eth.' *Rev. Archéologique*, 1870). Under Shabaka's son Shabataka, or Sebichos (perhaps the *Sabteca* of Gn 10^{7}), it is probable that anarchy again broke out in the Delta, a state of things reflected in the prophecy of Is 19. The king Shabataka, who had acceded in 716, was followed in 704 by Taharka (the תִּרְהָקָה of the Bible, 2 K 19^{9}), who is said to have murdered his predecessor and to have married Shabaka's widow, acknowledging her son as co-regent. As in 2 K 19^{9} he is officially described as king of Cush only, it is probable that his authority was not at first recognized in Egypt. During his reign occurred the famous conspiracy which led to Sennacherib's invasion of Pal., terminating most probably in the defeat of the Egyp. forces at Altaku, although, as the Assyr. were unable to follow up their victory, peace was made between the two powers, giving Taharka time to consolidate his authority; until in 671 a fresh quarrel with the Assyr. led to the invasion of Egypt by Esarhaddon, who conquered the country as far S. as Thebes; and a fresh attempt of Taharka to turn out the Assyr. at the accession of Assurbanipal in 668 led only to a fresh invasion and renewed disasters in the following year. Taharka's son and successor Tanuatama, or Urdamani, who acceded in 664, would seem to have made one more attempt to free the country from the Assyr., but without more success than his predecessors, and in the following year the Eth. rule came finally to an end. Their own country was invaded by Cambyses in B.C. 525, whence in the lists of Darius the Cushiya figure as a subject race. Though the Persians could not permanently occupy the country, they would seem to have destroyed Napata, the chief town after this time being Meroë or Barua, slightly N. of Shendi on the Upper Nile, which Herodotus regards as the chief city, although Napata was long regarded as the sacred city. The ancients tell us about the elective nature of the Eth. monarchy, their statements being, in part, confirmed by the monuments of Napata; and it would seem that the kings were chosen out of certain families by the god, *i.e.* by the priests, who also had the right to command the king to put an end to his life if they thought fit—a right which was finally abolished by king Erkamon, or Ergamenes, early in the 3rd cent. B.C. This custom, which has been illustrated from the practice of tribes still existing in Africa, may be regarded as specifically Eth., as also the female rule, which at most periods of Eth. history seems to have had theoretical or practical recognition; in Rom. times they were governed by queens, called always Candace (cf. Ac 8^{27}), apparently associated with their sons; but even in their earlier history the important position given to the kings' mothers and sisters anticipates this practice. Otherwise, Eth. culture, art, and religion, as well as the official language, would seem to have been directly borrowed from Egypt; and while the idea that Egyp. culture was Eth. in origin must be distinctly rejected, the theory of Lepsius, that the Cush were the nation who circulated that culture through the ancient world, would seem to rest on no secure foundation. **2.** The fact that Cush in Gn 10^{8} is represented as the father of Nimrod, probably comes from the confusion of the Kesh with the *Cossæi*, or Kashshu, a tribe who had possession of Babylonia between the 16th and 13th cent. B.C.* **3.** For the names of the sons of Cush in Gn 10^{7}, see SEBA, HAVILAH, SABTAH, RAAMAH, and SABTACA.

---

* 'The tent-stuff is seamed of narrow lengths of the housewives' rude worsted weaving; the yarn is their own spinning, of the mingled wool of the sheep and camels' and goats' hair together. Thus it is that the cloth is blackish,' Doughty, *Arabia Deserta*, i. p. 225.

† *σκηνοποιός*, *loc. cit.*, is more probably a synonym of *σκηνοῤῥάφος*, one who prepared and put together the lengths supplied by the weavers. See Ramsay and Nestle in *Expos. Times*, viii. (1897) 109, 153, 286.

D. S. MARGOLIOUTH.

CUSH (כּוּשׁ, LXX *Χουσεί*).—Mentioned only in the title of Ps 7. The older translators appear to have read כּוּשִׁי (Aq. Symm. Theod. Jer.). 'As the name of a person, the word is of uncertain meaning' (Delitzsch). Cush is described as a Benjamite, and was probably a follower of Saul who opposed David. The seventh psalm sheds no light on name, person, or character.

W. T. DAVISON.

CUSHAN-RISHATHAIM (כּוּשַׁן רִשְׁעָתַיִם, *Χουσαρσαθάιμ*, AV Chushan-rishathaim), king of Mesopotamia or Aram-naharaim, was the first of those oppressors into whose hands God delivered Israel for their apostasy in the days of the Judges (Jg 3^{8-10}). For eight years they were in bondage to this king, till they were delivered by Caleb's younger brother Othniel. Of Cushan-rishathaim nothing more is known directly, and his name has not yet been found on the monuments. The country over which he ruled, 'Aram of the Two Rivers,' was in all probability the territory lying between the Euphrates and the Chabōras, the last of the tributaries of the Great River. (See Aram-naharaim in art. ARAM, p. 138^{b}.) Its two cities mentioned in Scripture are Haran (Gn 28^{10}) and Pethor (Dt 23^{4}, Nu 22^{5}). It is known as Nahrina on the Egyptian monuments, and Nahrima in the Tel el-Amarna tablets, the native name of its people being Mitanni. Sayce (the soundness of whose argument, however, is denied by Moore and Driver) finds a remarkable correspondence between the notice of Cushan-rishathaim in Jg and the history of the reign of Ramses III. 'The eight years,' he says, 'during which the king of Aram-naharaim oppressed Israel would exactly agree with the interval between the beginning of the Libyan attack upon Egypt and the campaign of the Pharaoh against Syria. We know from the Egyptian records that Mitanni of Aram-naharaim took part in the invasion of Egypt; we also know from them that the king of Mitanni was not among those who actually marched into the Delta. He participated in the southward movement of the peoples of the north, and nevertheless lingered on the way. What is more probable than that he again sought to secure that dominion in Canaan which had belonged to some of his predecessors?' See further OTHNIEL.

---

* Hommel, however (*Expository Times* [1897], viii. 378) would regard the tribe mentioned here as one existing in Central Arabia, to which he finds further reference in 2 Ch 14^{9}, where Zerah the Cushite is said to have invaded Judah in the days of Asa (cf. LXX both here and in 2 Ch 21^{16}, where he finds the Arab. tribe *Μασουῖται*, *Mazin*, mentioned). The name Zerah (or Dirrih) is found as a title of early Sabæan kings. It may be doubted, however, if the LXX readings really preserve either the original text or an ancient tradition respecting its meaning.

LITERATURE.—Moore, *Judges*, pp. 84-89; Driver, *Contemp. Rev.* (1894), p. 420 ff.; Sayce, *HCM*, pp. 297-304.

T. NICOL.

CUSHI, CUSHITE (כּוּשִׁי, הַכּוּשִׁי).—The word occurs with the article in Nu 12^{1}, 2 S 18^{21}; without the article in Jer 36^{14}, Zeph 1^{1}. **1.** With the article it is probably merely an expression of nationality, 'the Cushite' (see CUSH). That in both instances it was a sufficient designation of the person in question, seems to show that there were but few Cushites among the Israelites. In both, the foreign character of the person intended is indicated by the narrative. It was looked upon as a disgrace that Moses should have married a Cushite. In 2 S 18^{23} the stranger is unacquainted with the short-cut made use of by Ahimaaz. **2.** Without the article the word is used merely as a proper name. It is borne by (1) the great-grandfather of Jehudi, the latter one of Jehoiakim's courtiers (Jer 36^{14}); (2) the father of the prophet Zephaniah (Zeph 1^{1}).

F. H. WOODS.

CUSTOM (*τέλος*, Mt 17^{25}, Ro 13^{7}, comp. 1 Mac 10^{31} 11^{35}), toll, tax upon goods, generally *ad valorem*, as distinguished from *κῆνσος* and *φόρος*, tribute, an annual tax on houses, lands, and persons. Custom ordinarily went into the treasury of the native government. Thus in Palestine the Herods in Galilee and Peræa received the custom, whereas in Judæa it was paid to the procurator for behoof of the Roman government. The custom (*τέλος*) was collected by the tax-gatherer (*τελώνης*). For full details see PUBLICAN and TAXES.

J. MACPHERSON.

CUTH, CUTHAH (כּוּתָה, כּוּת; B *Χουνθά*, *Χούθ*; A *Χουά*).—One of the cities from which Sargon brought colonists to take the place of the Israelites whom he had deported from Samaria, B.C. 722 (2 K $17^{24.30}$). These colonists intermingled with the Israelite inhabitants who were left by Sargon; and their descendants, the Samaritans, were in consequence termed by the Jews Cuthæans (כּוּתִים). According to the old Arabic geographers, Cuthah was situated not far from Babylon, and there seem to have been two cities of the same name close to each other (de Sacy, *Chrest. Arab.* i. 331). This view as to the site of Cuthah is borne out by the Assyrian inscriptions, from which we learn that *Kutî* (or *Kutû*) was a city of Middle-Babylonia. It has now been identified with the modern *Tell-Ibrâhîm*, N.E. of Babylon, where remains of the temple of Nergal (cf. v.^{30}) have been discovered (see Schrader, *COT*, i. 270 f.). Cuthah has also been identified as the name of a country near Kurdistan, possibly = *Ur Kasdim* (Gn 11^{31})—Neubauer, *Géogr.* p. 379; while others consider 'Cutheans' to be another form of 'Cossæans,' a tribe dwelling in the Persian province Jutipa, the modern Khuzistan, E. of the mouth of the Tigris.

J. F. STENNING.

CUTHA (A *Κουθά*, B om., AV **Coutha**), 1 Es 5^{32}.—His sons were among the temple servants who returned from Babylon with Zerubbabel. There is no corresponding name in the lists of Ezra and Neh. The name may be taken from the Babylonian town Cuthah or Cuth (2 K $17^{24.30}$).

H. ST. J. THACKERAY.

CUTTINGS IN THE FLESH.—i. In the legislation of Dt (D) and in the *corpus* known as the 'Law of Holiness' (H), the Hebrews are forbidden to 'cut themselves' (לֹא תִתְגֹּדְדוּ Dt 14^{1}) or to 'make any cutting' (lit. an incision שֶׂרֶט Lv 19^{28}, שָׂרֶטֶת Lv 21^{5}, LXX *ἐντομίς*) in their flesh 'for the dead.' The prohibition in question is aimed at one of the most widely-spread tokens of grief at the loss of relatives or friends. To scratch and beat one's self to the effusion of blood, nay, to gash and hack one's self of set purpose, may be said to be an all but universal custom among uncivilized and semi-civilized races at the present day. It must suffice to refer to such well-known works as Waitz's *Anthropologie der Naturvölker* (*passim*), and H. Spencer's *Principles of Sociology*, 3rd ed. vol. i. pp. 163 ff., 277, 292, etc. (see also authorities named at the close of this art.). The prevalence of the custom is equally attested for nearly all the nations of antiquity, the Egyptians being the most notable exception (Herod. bk. ii. 61, 85; Wilkinson, *Anc. Egyp.* [1854] vol. ii. p. 374). Thus Herodotus tells us that the Scythians of his time on the death of their king 'cut off their ears, shear their hair, and make incisions all over (*περιτάμνονται*) their arms' (iv. 71). Xenophon gives a similar account of the Armenians and Assyrians (*Cyrop.* iii. 1. 13). The legislation of Solon, acc. to Plutarch, forbade the women of Athens to beat themselves to the effusion of blood (*ἀμυχὰς κοπτομένων . . . ἀφεῖλεν*, *Sol.* 21), and the same is affirmed of the laws of the Twelve Tables ('mulieres genas ne radunto'—quoted by Cicero, *de Leg.* ii. 23). Among the ancient Arabs, further, the practice forbidden at Athens and Rome was associated, as it was among the Heb. (see below), with the cutting off of the hair (*Kitâb al-Aghâni*, xiv. 101, 28—this and other reff. in Wellh. *Skizzen*, iii. 160 f.). Thus the poet Lebîd 'says to his daughters, When I die, do not scratch your faces or shave off your hair,' xxi. 4 [ed. Huber and Brockelmann].* The earliest reference to this custom of making cuttings in the flesh among the Hebrews is in what appears to be the orig. reading in Hos 7^{14} (see RVm), where several MSS (see De Rossi, *Var. Lectt. Vet. Test. in loc.*) have יתגודדו, which was also the reading of the Greek translators (*κατατέμνονται*). It was widely prevalent in the time of Jeremiah, not only among his countrymen of the South (16^{6}) and those of the central highlands

---

* Quoted by Driver, *Comm.* on Deut. 14^{1}, p. 156, from a MS note of the late Professor W. R. Smith.

(41^5), but also among the neighbouring Philistines (47^5), and Moabites 'upon all the hands shall be cuttings' גְּדֻדֹת 48^{37}. The passages cited, taken along with the abundant evidence for the usually associated practice of shaving the head (Am 8^{10}, Is 3^{24} 15^2 22^{12}, Mic 1^{16}, Jer 48^{37}, Ezk 7^{18}), clearly prove that the customs in question were universally practised by the Hebrews in pre-exilic times. And further, the remarkable phraseology of Is 22^{12} 'J″ *called* to weeping and to mourning and *to baldness*' (with which cf. Mic 1^{16}), seems to show that the prohibition of D was unknown in the age of Hezekiah. The attitude of this code to both the above-mentioned practices is very decided: 'Ye shall not cut yourselves, nor make any baldness between your eyes for the dead' (Dt 14^1). H, incorporated in the priestly legislation of P, re-states the prohibition in more technical language, both for the people generally (Lv 19^{28}) and *à fortiori* for the priests in particular (21^5).

ii. When we inquire as to the *raison d'être* of these prohibitions we find considerable difference of opinion. We may, however, at once set aside as entirely inadequate the view that their purpose was to restrain that exuberance of emotion which the Hebrews shared with other Oriental peoples; in other words, to prohibit certain extravagant manifestations of grief as such. To say, for example, that 'the practices here (Dt 14^1) named seem to be forbidden . . . because such excesses of grief would be inconsistent in those who as children of a heavenly Father had prospects beyond this world' (*Speaker's Comm.* on Dt 14^1), is quite unscientific, inasmuch as considerations are here introduced altogether foreign to this stage of revelation. Nor yet is it sufficient to regard these prohibitions—for we must remember that artificial baldness and tattooing the skin (see below) stand in the same category with the more drastic cuttings in the flesh—as *primarily* directed against the disfigurement of the human body which is God's handiwork. It cannot be denied that both the explanations just adduced have a certain amount of force and truth, but they do not seem to reach the original significance of the prohibitions in question.

In our search for the real origin of the latter, two points have to be kept in mind: both the cuttings and the baldness are expressly stated to be 'for the dead,' and, not less explicitly, to be incompatible with Israel's unique relation to J″, a relation at once of sonship (Dt 41^1) and of consecration (קדש לי״ 14^2). Now it is admitted on all hands (1) that such mutilations of the body as are here condemned have in almost all countries formed part of the religious rites of heathenism. And, in particular, they must have been familiar enough in the Pal. of those days where such self-inflicted bloodshed formed part of the everyday ritual of the Canaanite Baal (see 1 K 18^{28}, the only passage not already cited where the Heb. word has this signification, and note 'after their manner'). (2) Both the shedding of the blood and the dedication of the hair are found, as we have seen, in the most intimate connexion with the ritual of heathen burial and the belief in the necessity of propitiating the spirit of the deceased. Thus (to give but a single example) we are told that 'a Samoan ceremony, on the occasion of a decease, was "beating the head with stones till the blood runs"; and this they called "an offering of blood" for the dead' (quoted from Turner's *Samoa* by Spencer, *Princip. of Sociol.* p. 166).

In view of the facts now stated, we are led to the conclusion that both the tokens of grief prohibited by the Heb. legislation were so prohibited because they carried with them associations of a character incompatible with the pure religion of J″. Whether we hold with Stade and others that a developed ancestor-worship was practised by the primitive Hebrews or not, there can be little doubt that the gashing of the body and the shaving of the head as practised by the Semitic peoples generally must, *in the last resort*, be traced to the desire to propitiate the *manes* of the departed, and 'to make an enduring covenant with the dead' (W. R. Smith, *RS*^{1} p. 305). But while we are forced by the evidence to this conclusion as to the ultimate origin of the practices in question, we would not have it supposed that any such animistic conception was present to the minds of the contemporaries of Isaiah and Jeremiah. In nothing is mankind so conservative as in all that concerns the respect due to the dead, and so, to the spiritually-minded at least, the practices prohibited were but the wonted outward signs of excessive grief. All excesses, then—so we conclude—such as making incisions in the hand (Jer 48^{37}) or other part of the body to the effusion of blood, and shaving the head in whole or in part, were strictly forbidden by the legislation of D and of H, not merely or even chiefly *quâ* excesses, but as being alike in origin and association unworthy of those who had attained to the dignity of the sons of J″.

iii. Under the head of 'cuttings in the flesh' falls to be considered also the particular practice forbidden in Lv 19^{28b} [Ye shall not] 'print any marks (כְּתֹבֶת קַעֲקַע, LXX *γράμματα στικτά*, Vulg. *stigmata*) upon you.' The expression does not occur elsewhere, but we may be sure that the reference is to the ancient and widely-spread custom of tattooing or branding. Which of these two modes of marking is to be understood here it is impossible to say with absolute certainty, the verbal stem, קעקע, having both meanings in post-biblical Heb., while the same ambiguity attaches to *στίζω* and its derivatives, *στίγμα*, etc. In favour of tattooing, however, the following may be urged: (1) the exegetical tradition; Rashi, for example, explains the marks in question as made with a needle (*Comm. in loc.*); (2) the probable origin of the custom, as advocated by the acute author of *RS*. 'In Lv 19^{28}, where tattooing is condemned as a heathenish practice, it is immediately associated with incisions in the flesh made in mourning or in honour of the dead, and this suggests that in their ultimate origin the *stigmata* are nothing more than the permanent scars of punctures made to draw blood for a ceremony of self-dedication to the deity' (p. 316, note 1).

The best-known illustration of the prevalence of the practice of tattooing or making *stigmata* in Syria is supplied by the priests of 'the Syrian goddess' in Lucian's treatise of that name, who were tattooed on wrist and neck (ch. 59—on which cf. the classical work of John Spencer, below). Philo (*De Monarch.* i.) refers to the allied practice of branding, familiar to us in the case of slaves and criminals, as practised by certain misguided idol-worshippers in his own time. In 3 Mac, also, Ptolemy IV. (Philopator) is represented as having the contumacious Jews branded with the ivy-leaf, the symbol of Dionysus (2^{29}). These passages, then, show that it was not an unusual practice to have tattooed or branded in one's flesh the name or symbol of the deity to whom one was specially devoted—a practice which at once gives us the true explanation of the interesting passage, Is 44^5 (another shall mark on his hand 'Yahweh's,' cf. RVm, also Gal 6^{17} *στίγματα Ἰησοῦ*). Jewish tradition, we may add, has it that the obscure phrase of the Chronicler with regard to Jehoiakim, 'that which was found in him' (2 Ch 36^8), refers to his breach of the command in Lv 19^{28b}, letters having been discovered tattooed on his flesh, presumably the name of some heathen deity (Midrash *Levit. Rabba* 19—quoted by Strack, *Comm. in loc.*; Jerome, *Quæst. Heb. in Paralipom. l.c.*).

Here, then, we have another heathen custom forbidden to the worshippers of J″; and the unmistakable evidence of its unworthy associations being the cause of its prohibition—although in itself a thing indifferent (Dillm. *Theol. d. A.T.* p. 428)—strengthens the view above advanced as to the historical *raison d'être* of the ancient custom, here (Lv 9[28a]) forbidden along with it, as alike incompatible with whole-hearted loyalty to J″.

CYAMON (Κυαμών), Jth 7[3].—The same as JOKNEAM, which see.

CYMBAL.—See MUSIC.

CYPRESS (תִּרְזָה *tirzâh, ilex*).—As in the case of the box tree (*tĕashshûr*), there is nothing in the philology to indicate what tree is signified. The root, which is obsolete in Heb., signifies in Arab. to be *strong* or *hard*. The tree is mentioned (Is 44[14]) in connexion with the cedar and the oak. It might be any of the numerous coniferous or cupuliferous trees of Bible lands, but there is no means of telling which. The LXX gives us no help, the sentence being confused, and not a tr. of the Hebrew. The cypress, *Cupressus sempervirens*, L., is abundant, and suitable as to hardness, but we have no certainty that it is intended. Furthermore, it is probable that *Cupressus sempervirens* is the *fir*. See FIR. Under these circumstances, the best way would be to transliterate, as in the case of the *algum* and *almug*, and call the tree *tirzah*.

G. E. POST.

CYPRUS lies in the N.E. corner of the Levant (34° 33′—35° 41′ N. lat., 32° 17′—34° 36′ E. long.), between the convergent coasts of Cilicia and Syria. On its N. coast Cape Kormakíti is only 46 Eng. miles from Cape Anamur, in Cilicia, and its E. extremity, Cape Andrea, only 60 (miles) from Latakia on the Syrian coast. Consequently, the whole line of the Cilician coast is easily visible from the sea-level in C., and *vice versâ*, while the Lebanon can be seen at sunrise even from Stavrovúni near Larnaka (2260 ft.).* Its greatest breadth, from Cape Gata to Cape Kormakíti, is 60 Eng. miles, and its extreme length, from Cape Drepano to Cape Andrea, is 145; but the latter includes the Karpass promontory, which, though 45 miles long, is nowhere more than 10 miles across. The nearly straight N. coast from Cape Kormakíti to Cape Andrea measures about 100 miles. The area of C. is 3707 square miles, or about equal to that of Norfolk and Suffolk; it is larger than Corsica or Crete, but smaller than Sicily or Sardinia.

C. consists of two mountain masses, separated by a broad low-lying plain: (1) The S.W. half of the island is occupied by a range composed of crystalline and metalliferous rocks, which in its western and highest section is called Tróodos (6406 ft.), and is continued through Mádhari (5305 ft.), Papútsa (5124 ft.), and the Mákhaera range (4674 ft.) to the almost isolated Stavrovúni (2260 ft.), about 12 miles from Larnaka. The same rocks reappear in the plateau of limestone and gypsum beds between Larnaka and Famagústa, but never rise to more than 300 ft. (2) The Messaorià or 'midland' plain extends along the N. and N.E. side of Mákhaera from the Bay of Mórphu to that of Famagústa. A very low watershed divides the basin of the Serákhis, flowing towards Mórphu, from that of the Pediàs (Πεδιαῖος) and Yaliàs, which rise from the N. side of Mákhaera and reach the sea at Salamis through extensive marshes. (3) The N. range is a straight, narrow, and abrupt ridge of the Anatolian limestone, and extends 100 miles from Cape Kormakíti to Cape Andrea. Its highest peak is Buffavénto (3135 ft.), crowned by a Byzantine fortress. H. Elías or Kórnos (3106 ft.) and Trýpa Vunò (3085 ft.) are conspicuous peaks in the West. Pentedáktylo, farther E., rises to 2405 ft., and Olymbos to 2431 ft.; but in the Karpass nothing is higher than Sina Óros (2380 ft.), close to the fortress of Kantára (161 ft.). Pámbulos, near Rhizokárpaso, reaches only 1194 ft. The northern coastland E. and W. of Kerynia is narrow, but well watered and very fertile.

The only accurate map of C. is the Government Trigonometrical Survey (Stanford, 1885), incorporated in the subsequent editions of the Admiralty Chart of Cyprus (No. 2074).

The principal resources of C. in ancient and mediæval times were copper and timber. The former, which in fact derives its name from that of the island, was worked in great abundance on the N. side of Tróodos and Mákhaera, from Límni near the Bay of Khrýsokhu, to Frángissa (Tamassòs) and Lithrodónda; and in less quantity near Tremithushà (Tremithus). The principal centres of export were Soloi (Karavostási) and Marion (Póli dis Khrýsokhu). The supply was finally exhausted some time in the Middle Ages. Iron was worked from the 9th cent. B.C. onwards in the country about Mákhaera, though it never rivalled copper in commercial importance. Pliny (xxxiv. 2) says that only inferior qualities were worked in his time. Much glass was made in Roman times at Tamassos and elsewhere (Pliny, xxxvi. 193).

The forests of C. had not wholly disappeared even in imperial times, though they were already very much reduced in area by the continuous export of timber (Strabo, xiv. 5). The cypress (AV 'fir') or Karamanian pine is the principal forest tree; and the juniper (?, the 'cypress' [*tirzah*] of Is 44[14f.]) probably formerly attained great size in C., and still grows freely between Larnaka and Famagústa. Besides these, C. has always produced much wine and oil; and carobs, anise, and madder are considerable crops. It grew enough corn for its own population in the time of Augustus (Strabo, xiv. 5), and exports it now. Ladanum and resin were exported under the Roman Empire (Pliny, xii. 74, xiv. 123, xxiv. 34). Both Pliny (xxvii. 23. 58. 121, etc.) and Strabo (iii. 15) record the occurrence of precious stones; and the former, mines of alum and gypsum (xxxvi. 183). Salt is made in lagoons near Larnaka (Kition), and Pliny records the manufacture here (xxxi. 75) and at Salamis (xxxi. 84).

HISTORY.—The copper and the timber of C., so long as the supply lasted, gave the island an importance in commerce and civilization out of all proportion to its size. From the earlier part of the Bronze Age Cyprus maintained a large population and an art and culture distinct and in many respects highly developed, and exported copper to Syria, Cilicia, and probably to Egypt, to the farther parts of Asia Minor, and even to Central Europe. The influence also of Cypriote pottery was felt in Syria, and widely in Asia Minor; some of the finer varieties have been found in Egypt, South Palestine, Thera, Athens, and the Troad.

C. was invaded by Tahutmes III. of the 18th dynasty of Egypt (B.C. 1503–1449), and appears to have remained tributary to Egypt for some time.

---

* Cf. Is 23[1], where the homeward-bound merchantmen first see the smoke of burning Tyre from their last anchorage at Kition; 'from the land of Kittim it is revealed to them.'

It has been suggested by Maspero and others that the Keftiu (cf. OT 'Caphtor') include the inhabitants of C.; but the usual Egyp. name for C. is Asi (Flinders Petrie, *Hist. Eg.* ii. 118. 124).

The next period of Cypriote art and civilization is of great importance, but very obscure. Mycenæan settlements have been found on a number of sites, and the contact with their higher art and culture brought about a profound change in that of Cyprus. About the same time the abundant deposits of iron began to be worked, at first for ornaments, but very soon for weapons and tools. Greek tradition asserted a very early colonization of C., and esp. of Kurion and Salamis, both of which are now known to have been Mycenæan centres; and tradition is confirmed by the primitive 'Æolic' dialect of Greek which was spoken, and the peculiar syllabic script, which was not displaced by the Greek alphabet until the 4th cent. On the other hand, Phœn. inscriptions have been found in C. of the 9th cent. and onwards, and there are indications that the culture of the Syrian coast had influence in C. even earlier. The natural centre of Phœn. influence was Kition (mod. Larnaka), but Phœnicians and Greeks seem to have settled side by side all over the island. Kition (and perhaps all C.) appears to have been irregularly tributary to Tyre in the 10th to 8th cent. (Jos. *c. Ap.* I. 18; *Ant.* VIII. v. 3, X. xiv.). Consequently, C. was involved in the conquest of Phœnicia in 709 by Sargon, an important inscription of whom has been found at Kition (Berlin Museum). Later, Esarhaddon and Assurbanipal record tribute received from twelve kings of C., some of whom appear to bear Greek names, while the island itself appears as *Javnan* ('Ionian').

About 560 C. was conquered and attached to Egypt by Amasis (Hd. ii. 182), and on his fall in 525 passed, with Egypt, to Cambyses of Persia (*id.* iii. 19. 21). In 501 the Greeks of C., in sympathy with those of Ionia, rebelled against Persia (*id.* v. 105 f.), but in so mixed a population united effort was impracticable; the revolt was soon put down, and in 480 C. furnished 150 ships to the fleet of Xerxes (*id.* vii. 90). During the 5th cent. C. remained under Persia, in spite of Cimon's repeated attempts to attach it to the Athenian League; but a brisk copper trade was maintained with Athens, which sent fine pottery and bronze work in return. Early in the 4th cent. Evagoras succeeded in making Salamis the leading state in C., and in 387 openly revolted from Persia. But the Phœnician interest was wholly against him; the Greeks, as usual, were divided, and the attempt failed. Alexander the Great, however, received the voluntary submission of all the states of C. after the battle of Issus, and efficient help at the siege of Tyre from their fleets, and supplies of timber. At his death (323) C. fell, with Egypt, to the share of Ptolemy, but was seized by Demetrius Poliorcetes, after a desperate sea-fight (Diod. Sic. xx. 759–761) and vigorous siege of Salamis. In 295, however, Ptolemy reconquered the island, which long remained closely attached to Egypt. It is under this régime that we first hear of Jewish settlers in C. (1 Mac 15^{23}). It was for a few years (B.C. 107–89) a separate but dependent kingdom under Ptolemy Lathyrus, but in B.C. 58 was annexed by Rome, as security for financial loans to the bankrupt Ptolemy Auletes. After reorganization by M. Cato it was first attached to the province of Cilicia, but was made a separate province by Augustus after Actium. As long as serious danger was to be apprehended in the East, the new province, with its neighbours, remained imperial, and was governed by a proprætor (Dio. Cass. liii. 12; Strabo, xiv. 683 [*καὶ νῦν*]). No monuments remain of this period. But very soon afterwards C. was transferred to the Senate (Dio. Cass. liii. 12, liv. 4); consequently, Ac 13^7 is strictly accurate in describing Sergius Paulus as proconsul (ἀνθύπατος) in A.D. 46. Of this Sergius Paulus no coins are known, but an inscription exists at Karavostasi, which is dated ἐπὶ Παύλου [ἀνθυ] πάτου (Hogarth, *Devia Cypria* p. 114). Several other names of proconsuls are known, *e.g.* Julius Cordus, *CIG* 2631, L. Annius Bassus, his successor, A.D. 52, *CIG* 2632 (quoted Conybeare and Howson, i. p. 187). See Hogarth, *Devia Cypria*, Appx., for a complete list.

The seat of government was at **Paphos** (wh. see), which had been the capital of the Ptolemaic priest-king, deposed in B.C. 58, and was most easily accessible from the west, though **Salamis** (wh. see) was by far the largest and most important town in the island, owing to its proximity to the Syrian coast. Paphos was connected with Salamis by two roads—one inland and north of Tróodos, *viâ* Soloi, Tamassos, and Tremithus, about four days' journey; the other easier, and along the south coast, *viâ* Kurion, Amathus, and Kition, about three days.[*] Neither of these was a Roman military road, but both followed well-worn native tracks.

Jews appear to have settled in C. in large numbers under the Ptolemaic régime, and probably more were attracted thither under the early Empire by the fact that Herod the Great farmed the Cypriote copper mines (Jos. *Ant.* XVI. iv. 5, cf. xix. 26, 28). They seem to have had more than one synagogue in Salamis (Ac 13^5).

The dispersion after the death of Stephen carried Christians as far as Cyprus (Ac 11^{19}), and shortly afterwards Cypriotes were preaching in Antioch (Ac 11^{20}). Of Cypriote Christians, two are known by name: Mnason, 'an original convert' (*ἀρχαῖος μαθητής*, Ac 21^{16}), and Joseph the Levite, surnamed Barnabas, the friend and companion of St. Paul (Ac 4^{36}).

In A.D. 117 the Jews of C. revolted, massacred 240,000 pagans, and destroyed a large part of Salamis. Hadrian, afterwards emperor, suppressed the disorder, and expelled all Jews from Cyprus (Milman, iii. 111, 112).

The Christian Church of C. was divided into thirteen bishoprics; in the 4th cent., in consequence of the supposed discovery at Salamis (wh. see) of St. Matthew's Gospel in the tomb of Barnabas, it was made autonomous, and the Patriarch has ever since enjoyed the right to sign his name in red ink. The Council of C. in 401 was summoned, on the suggestion of Theophilus of Alexandria, to prohibit the reading of the works of Origen.

The word 'Cyprus' does not occur in OT, but the island and the town Kition are frequently alluded to as 'Kittim,' which is identified with Cyprus by Jos. (*Ant.* I. vi. 1), *Χέθιμα . . . Κύπρος αὕτη νῦν καλεῖται* (cf. Epiph. *Hær.* xxx. 25). See KITTIM.

J. L. MYRES.

CYRENE (Κυρήνη), the chief city in Libya in N. Africa, about half-way between Carthage and

---

[*] The Peutinger Table gives (α) Paphos—xi—Palæphato (Palæpaphos)—xxii—Curio—xvi—Amathus—xxiiii—Cito—[xxiii]—Salamina: (xcvi in all). (β) Paphos—xxiii—Soloæ—xxix—Tamiso—xxiiii—Thremitus—xviii—Cito—[xxiii]—Salamina: (cxvi in all).

Alexandria, was the capital of a small province corresponding to the modern Tripoli. Although in Africa, it was a Greek city, dating from B.C. 631. It was famous for its beauty of situation, its commerce, and its culture. Alexander the Great granted the rights of citizenship in it to Jews on equal terms with Greeks, and it became an important centre of the Jews of the Dispersion, the fourth of the population being Jewish according to Josephus. In the reign of Manasseh, Psammitichus, king of Egypt, carried off many Jews and settled them in the parts of Libya about C., while one of the Ptolemies transported 100,000 Jews to Pentapolis in the same district. Like other communities of the Hel. Jews, the Cyrenians had a synagogue of their own in Jerus., and seem to have been more Jewish than the Jews themselves (Ac 6^{9}). There were Cyrenians among the first preachers of the gospel, and they were associated with the great forward movement of preaching it for the first time to the Gentiles (Ac 11^{19-21}).

Lucius of C. (Ac 13^{1}) is said by tradition to have been the first bishop of his native district. Tradition also connects St. Mark with the first establishment of Christianity in this part of Africa. An interesting speculation gathers round the name of Simon of C. (Mt 27^{32}). He is referred to as the father of Alexander and Rufus, evidently well known to Mark's readers (Mk 15^{21}); while St. Paul in his Epistle to the Romans refers to one Rufus as holding an honourable position among the brethren there, 'Salute Rufus, chosen in the Lord, and his mother and mine' (Ro 16^{13}). From this it has been conjectured that while St. Paul was studying at Jerus. he enjoyed the motherly care of Simon's wife.

After Alexander's death, the district of which C. was capital became a dependency of Egypt. Under the Rom. rule it was called Cyrenaica, and was politically connected with Crete. In the 4th cent. the city was destroyed by the Saracens, and is now desolate.

Cyrenian (Κυρηναῖος).—Two Cyrenians are mentioned in Scripture: Simon who bore our Lord's cross (Mt 27^{32}), and Lucius a Christian teacher (Ac 13^{1}).

W. MUIR.

CYRENIUS.—See QUIRINIUS.

CYRUS (כּוֹרֶשׁ, Κῦρος).—The name of Cyrus is written Kuras in Bab. cuneiform, Kurush in Old Persian. Ctesias stated on the authority of Parysatis, the wife of the Persian king Ochus, that her younger son was named Cyrus from the sun, as 'the Persians call the sun Κῦρος' (*Epit. Phot.* 80; Plut. *Artax.* 1). In Zend, however, the 'sun' is *hware*, which could not take the form Κῦρος in Old Persian, though in modern Persian it is *khur*, and in certain Aram. dialects of the Pamir it is *khir* and *kher*. According to Strabo (xv. 3), the original name of Cyrus was Agradates, his later name being adopted from that of the river Cyrus. But this is contrary to the fact that his grandfather's name was also Cyrus.

The classical writers have given contradictory accounts of his birth and rise to power. Herodotus (i. 95) says that he knew of three accounts different from the one he himself adopted, which was that Cyrus was the son of a Persian nobleman named Cambyses and Mandanê, a daughter of the Median king Astyages, who had caused her to marry beneath her station in consequence of a dream which the magi interpreted as predicting danger to himself from her son. A second dream induced him to order his relative Harpagus to kill the child. Harpagus gave it to the herdsman Mithridates to expose, but he and his wife Spako brought it up as their own. Subsequently Cyrus was recognized by Astyages, who, in consequence of the advice of the magi, sent him back to his parents, but punished Harpagus by giving him the mutilated limbs of his own son to eat. Harpagus therefore persuaded Cyrus to lead the Persians into revolt; after which the infatuated Astyages appointed him the general of the Median army. The result was an easy victory on the part of Cyrus; Astyages, however, impaled the magi who had advised him to let his adversary go, raised another army, and himself led it into the field. But he was defeated and captured, though his life was spared, and Cyrus became king of Media as well as of Persia.

Xenophon, in the romance of the *Cyropædia*, gives a wholly different account. He makes Cambyses, the father of Cyrus, king of Persia. Cyrus is educated first in Persia and then by his grandfather Astyages; and when the latter is succeeded by his son Cyaxares, Cyrus acts as his general, subduing the Lydians, Babylonians, and other nations, and finally succeeding him in the natural course of things. His first victory over the Babylonians was when he was sixteen years old, when Evil-Merodach wantonly invaded Media; the second when he was forty, when Neriglissar, the ally of Crœsus of Lydia, attacked Cyaxares. His final conquest of Babylonia took place before the death of the king of Media.

Nicolaus of Damascus (vii. fr. 66) asserts that Cyrus was the son of a Mardian bandit named Atradates, whose wife Argostê tended goats. He began his career as a servant in the palace of Astyages. Here he was adopted by Artembares, the cupbearer, and recommended to Astyages, who raised him to power and wealth. Cyrus now made his father Atradates satrap of Persia, and urged by a 'Chaldæan' began to plot against Astyages, with the help of Œbares a Persian. Eventually, after obtaining leave to visit Persia, where everything had been prepared for a revolt, he defeated at Hyrba the troops which had been sent against him. In a battle before Pasargadæ, however, he and his general Œbares were driven within the walls, and his father was captured and soon afterwards died. The Persians now fled to the precipitous mountain-peak where Cyrus had been reared, and there, excited by the taunts of their wives, they utterly overthrew their Median assailants and destroyed the kingdom of Astyages.

Ctesias calls Astyages Astyigas, and states that after his defeat by Cyrus he fled to Ecbatana, where he was concealed in the palace by his daughter Amytis and her husband Spitamas, whom Cyrus ordered to be tortured, along with their children Spitakes and Megabernes, to make them confess where he was. Astyages was put into fetters by Œbares, but released by Cyrus, who married Amytis after putting her husband to death.

All these versions have been shown to be unhistorical by contemporaneous cuneiform inscriptions. The most important of these are—(1) a cylinder inscription of Nabonidus, the last king of the Bab. empire, from Abu Habba (Sippara); (2) an annalistic tablet written shortly after the conquest of Babylonia by Cyrus; (3) a proclamation of Cyrus of the same date.

The inscription of Nabonidus was composed soon after the conquest of Astyages by Cyrus in B.C. 549. Nabonidus calls Astyages (Istuvigu) king of the Manda or 'Nomads,' whom the Assyr. texts identify with the Gimirrâ or Cimmerians. He states that the temple of the moon-god at Harran had been destroyed by the Manda, but that Merodach had ordered him in a dream to restore it, assuring him that within three years 'Cyrus the king of Anzan, their little servant, with his small army, shall overthrow the widespread people of the Manda; Istuvigu, the king of the people of the Manda, he shall capture, and bring him a prisoner to his own country.'

The annalistic tablet, which, when complete, began with the first year of the reign of Nabonidus, tells us that in the seventh year of the latter's reign (B.C. 549) Astyages had marched against 'Cyrus, king of Ansan,' but that his army revolted against him and delivered him to Cyrus, who then marched to Ecbatana, captured it, and carried its spoil to Ansan. Three years later (B.C. 546), Cyrus bears for the first time the title of 'king of Persia,' so that he must have gained possession of Persia between B.C. 549 and 546. In the latter year he crossed the Tigris below Arbela and conquered northern Mesopotamia as well as Armenia.

In B.C. 538, aided by a revolt in southern Babylonia, he attacked Nabonidus from the north. A battle was fought at Opis, which resulted in the defeat of the Bab. army; and a few days later, on the 14th of Tammuz (June), 'Sippara was taken without fighting.' Nabonidus fled and concealed himself in Babylon, followed by Gobryas, the governor of Kurdistan, with the army of Cyrus. On the 16th, Gobryas entered Babylon without resistance, and Nabonidus was captured. The daily services went on as usual in the temples of the city, and the contract-tablets show that there was no disturbance of trade. On the 3rd of Marcheshvan (October), Cyrus came to Babylon, and henceforth bore the title of 'king of Babylonia.' 'Peace to the city did Cyrus establish; peace to all the province of Babylon did Gobryas his governor proclaim. Governors in Babylon he appointed.' On the 11th of the month the wife[*] of Nabonidus died, and for six days there was mourning for her. On the 4th of Nisan, Cambyses conducted her funeral in the temple of Nebo. After this, offerings to ten times the usual amount were made to the Bab. deities.

The proclamation of Cyrus justifies his seizure of the Bab. crown, and declares that he had been called to it by Bel-Merodach, who was angry with Nabonidus. He describes himself as 'king of the city of Ansan,' the son of Cambyses, king of Ansan, grandson of Cyrus, king of Ansan, and great-grandson of Teispes, king of Ansan, and says that he had restored to their homes the exiles who were in Babylonia as well as their gods. He concludes by praying that the deities he has thus restored may daily intercede for him before Bel-Merodach and Nebo, whose 'worshipper' Cyrus professes himself to be.

It is clear that the Greek writers have confounded the Manda or nomad Scyths and Cimmerians with the Madâ or Medes. Cyrus, moreover, like his ancestors, was not king of Persia, but of Ansan or Anzan, one of the most important divisions of Elam, which is stated in a cuneiform tablet to be the equivalent of Elam, and of which the native kings of Susa called themselves rulers. Teispes, the son of the Persian Achæmenes, seems to have conquered it at the time of the fall of the Assyr. empire. The fact explains Is 21^2, as well as the use of Susian as one of the three official languages of the Persian empire. At Behistun, Darius states that eight of his ancestors had been kings 'in a double line.' As Teispes was the father of his great-grandfather Ariaramnes, we should have exactly the eight kings, if we suppose that while the line of Cyrus was ruling in Anzan, that of Darius was reigning in Persia.

Another fact which is due to the cuneiform texts is, that the account of the siege of Babylon by Cyrus, given by Herodotus, is a fiction, derived probably from one of the sieges of the city by Darius Hystaspis. The date of the conquest of Astyages is also fixed. The conquest of Crœsus and the Lydian empire probably took place before that of Babylon, as well as the reduction of the Greek cities in Asia Minor by the Medes, Mazares and Harpagus.

Before his death the empire of Cyrus extended from the Mediterranean to Bactria, and was thus larger than that of the Assyrians. Different stories are told of his death. Herodotus, who knew of more than one, says that he was slain when invading the Massagetæ. According to Ctesias, he had invaded the Derbikes, and after gaining a victory over them by stratagem, and capturing the son of their queen, Tomyris, was killed in a second engagement in which his troops were defeated. Diodorus asserts that he was taken prisoner by Tomyris, who crucified him; while Xenophon makes him die peacefully, and be buried at Pasargada, seven years after the death of Cyaxares.

The Bab. contract-tablets, on the contrary, prove that he reigned nine years over Babylon and 'the empire,' dying in July B.C. 529. A year before his death he had made his son, Cambyses, king of Babylon. According to Herodotus, Cambyses was the son of Cassandana, the daughter of Pharnaspês. The supposed tomb of Cyrus at Murghâb can hardly belong to the great conqueror: it is difficult to reconcile its character and position with the account given by Arrian (vi. 29), and the figure on a neighbouring column, above whose head is the inscription, 'I am Cyrus, the king, the Akhæmenian,' is that of a winged demi-god who wears an Egyptian head-dress. It can hardly, therefore, have been sculptured before the conquest of Egypt by Cambyses. The most probable view is that it represents Cyrus the younger.

The proclamation of Cyrus shows that he was not a Zoroastrian like Darius and Xerxes, but that as he claimed to be the successor of the Bab. kings, so also he acknowledged the supremacy of Bel-Merodach the supreme Babylonian god. Hence the restoration of the Jewish exiles was not due to any sympathy with monotheism, but was part of a general policy. Experience had taught him the danger of allowing a disaffected population to exist in a country which might be invaded by an enemy; his own conquest of Babylonia had been assisted by the revolt of a part of its population; and he therefore reversed the policy of deportation and denationalization which had been attempted by the Assyr. and Bab. kings. The exiles and the images of their gods were sent back to their old homes; only in the case of the Jews, who had no images, it was the sacred vessels of the temple which were restored (Ezr $1^{7\text{-}11}$). See *RP*, New Series, v. pp. 143 ff.

A. H. SAYCE.

---

[*] Or, according to the reading of Pinches, the son.

D

D.—In critical notes on the text of the Gospels and Acts this symbol is used to indicate the readings of *Codex Bezæ*, a Græco-Latin MS of the 6th cent. preserved in the Cambridge University Library. The text, both Greek and Latin, is written stichometrically, *i.e.* in lines of unequal length, divided according to the sense—the Greek on the left, the Latin on the right hand page of each opening.

The Gospels are arranged in the order, Mt, Jn, Lk, Mk—an order found also in many old Latin MSS, the Gothic version, and in *Const. Apost.* ii. 57.

Between Mk and Ac there is a gap which, according to the original numbering of the quires, must have contained 67 leaves (8 quires and 3 leaves). It closes with a fragment of a Latin version of 3 Jn $^{11-15}$. Clearly, therefore, the Epp. of Jn occupied part of the vacant space (14 or 15 leaves). What else the missing leaves contained it is impossible to say. The other Catholic Epistles, if they were all present, would require about 36 leaves. This would leave 16 leaves (=2 quires) unaccounted for; and it is possible, though not very likely, that, as Scrivener suggests, the scribe had made a mistake of 2 in numbering his quires at this point in the MS.

About 37 leaves are missing in other parts of the MS, and 12 are more or less mutilated. It is also mutilated at the end. The following passages are in consequence wanting in the Greek Text—Mt 1^{1-20} [3^{7-16}] 6^{20}–9^{2} 27^{2-12}, Jn 1^{16}–3^{26} [18^{14}–20^{12}], [Mk 16^{15-20}], Ac 8^{29}–10^{14} 21^{15-18} 22^{10-20} 22^{29} end. The gaps in the Latin are Mt 1^{1-11} 6^{8}–8^{27} 26^{65}–27^{1}, Jn 1^{1}–3^{16} [18^{2}–20^{1}], [Mk 16^{6-20}]. The passages in square brackets have been supplied by a 9th cent. hand.

The MS was written in all probability in Gaul, and Rendel Harris has given good reason for believing that it did not travel far from its birthplace for the first 1000 years of its existence. During this period it was corrected at various times by eight or nine different hands.

Its modern history begins with the Council of Trent, whither apparently it was taken in 1546 by the Bishop of Clermont in Auvergne. Stephens, in his 1550 edition, published readings from it derived from collations made for him by his friends in Italy—perhaps during this visit to the Council. When Beza presented the MS to the University of Cambridge in 1581, he stated that it had been taken from the Abbey of St. Irenæus in Lyons at the sack of that city in 1562. It is for the most part the only witness among Greek MSS to a type of text which we know from the evidence of patristic quotations and the earliest versions to have been widely current as early as the 2nd cent. It has in consequence, especially in recent years, received a great deal of attention, notably in a most ingenious work by J. Rendel Harris, *A Study of Codex Bezæ* ('Texts and Studies'), 1891, and in two careful but not altogether convincing volumes, *The Old Syriac Element in Codex Bezæ*, 1893, and *The Syro-Latin Text of the Gospels*, by F. H. Chase, 1895. The problems raised by these writers will require fuller treatment in connexion with the whole subject of the Textual Criticism of the New Testament.

An excellent edition of the MS, including a complete transcription of the text and a full introduction, was published by Scrivener in 1864, and this year (1897) the University of Cambridge has undertaken to bring out an edition in photographic facsimile.

D_2.—In the Epistles of St. Paul the same symbol —written more properly D_2 to avoid confusion—is used to denote the readings of the MS in the National Library at Paris, the *Codex Claromontanus*. This is also a Græco-Latin MS of the 6th cent. written stichometrically. It seems clear that it was the work of a Greek scribe, and that it remained for some time in scholarly Greek hands; but there seems no decisive evidence to fix either the place where it was written or its first home. The remarkable list of the canonical books of OT and NT inserted between Philemon and Hebrews —known as the Claromontane stichometry—points on the whole to a Western origin,—Carthage, Rome, or Gaul. The Latin version is of great importance throughout. In Hebrews it is the main representative of the old Latin version of the epistle.

It contains all the Pauline epistles virtually complete—including Hebrews. It has been most carefully collated both by Tischendorf and Tregelles, and sumptuously edited by Tischendorf, 1852.

J. O. F. MURRAY.

D.—The symbol ordinarily used in criticism of Hex. to signify the work of the Deuteronomist; often so as to include also his school, although this creates confusion, which may be avoided by using for this sense D^2, D^3, and similar symbols. See HEXATEUCH. F. H. WOODS.

DABBESHETH (דַּבֶּשֶׁת), Jos 19^{11}.—A place on the borders of Zebulun. The line is difficult to follow, but the extreme limits on N. and S. seem to be defined by the names Dabbesheth and Jokneam. In this case the ruin *Dabsheh*, on the hills E. of Acco, may be intended, the only place where this name (meaning 'hump,' cf. Is 30^{6}) occurs. See *SWP*, vol. i. sheet iii. C. R. CONDER.

DABERATH (הַדָּבְרַת), Jos 19^{12} 21^{28}, 1 Ch 6^{72}.—A city of Zebulun given to the Levites, noticed as the extreme point on the S.E. border; now the village *Debûrieh* at the foot of Tabor on the W. In the record of the conquests of Ramses II. (Brugsch, *Hist.* ii. p. 64) we learn that, about 1325 B.C., he attacked places in the Amorite country, named Dapur, Shalama (Shunem), Maroma (Meirûn), Ain Anamim, Kalopu (perhaps Shalabûn), and Beitha Antha (Beth Anath); and of these places Shunem was in Lower Galilee, and Beth Anath and Meirûn in Upper Galilee. Dapur is thought to be Tabor or Daberath, and is represented as a walled town. But in Egyptian the letters L and R are not distinguished, and the name may have been Dapul. In the latter case *Dibl* in Upper Galilee would be the site. See DIBLAH. The site of Daberath on Tabor was known in the 4th cent. A.D. (*Onomasticon*, *s.v.* Dabira), but wrongly identified with Debir. See *SWP* vol. i. sheet vi.

C. R. CONDER.

DABRIA.—One of the five scribes who wrote to the dictation of Ezra (2 Es 14^{24}).

DACUBI (A Δακουβί, B om., AV **Dacobi**) = AKKUB, Ezr 2^{42}, Neh 7^{45}.

DAGGER (Jg 3^{16} AV, 'sword' RV, Heb. חֶרֶב *ḥerebh*).—The Heb. word means in most cases a short weapon used for stabbing (cf. 2 S $20^{8.10}$). The Arab '*khanjar*,' still in use E. of Jordan, has a curved blade, and inflicts by a downward stab just such a horrible wound as is described in 2 S 20^{10}. See SWORD. W. E. BARNES.

DAGON (דָּגוֹן, Δαγών).—The principal deity of the Philistines, whose worship, however, seems to have extended beyond the Phil. country, as is proved by the geographical name Beth-dagon (which see), and perhaps by the later name Dagon (Jos. *Ant.* XIII. viii. 1; *Wars*, I. ii. 3).

It has commonly been held by scholars that the name is a diminutive, and so a term of endearment, from *dag*, which signifies fish, and hence that D. was worshipped under the form of a fish. He has been generally identified with a Bab. god who is represented on seals and elsewhere as having in part that form. And though there is nothing in the biblical account to confirm this view, there is also nothing to contradict it. D. had face and hands, and, according to the Sept., feet also (1 S 5^{4}); but this is not inconsistent with his having in part the shape of a fish. The pictures of the Bab. fish-god show face and hands, and in some instances feet. Indeed, one is strongly tempted to find in the phrase 'only D. remained,' the meaning 'only little fish remained,' the point being that, after the head and hands of D. were cut off, nothing was left of him save the fish-shaped part. Nevertheless, Sayce and others now insist that D. was not a fish-god, and that the resemblance of name is a mere coincidence. The Bab. fish-god was Ea, the patron god of the city of Eridu, the god of the ocean, of water, of wisdom. In some sense Ea was god of the sea, Anu of the sky, and Bel (Baal) of the earth and the under-world. Bel is closely associated with Anu, but not with Ea. And D. appears in the inscriptions as one of the names or one of the forms of Bel.

The name and worship of D. were upon either theory imported into Pal. from Babylonia. The name is held to have been originally Sumerian, but a Semitic derivation was found for it in connexion with its use to designate the god of *agriculture*. D. was identified with *dagan*, the Heb. word for corn, when corn is thought of as an agricultural product.

Presumably, D. was worshipped in Phœnicia as well as in Philistia. There is a Phœn. cylindrical seal of crystal now in the Ashmolean Museum at Oxford, on which, according to Sayce, the name Baal-dagon is written in Phœn. letters, with an ear of corn engraved near it, and other symbols, such as the winged solar disc, a gazelle, and several stars, but no figure of a fish. Eusebius (*Præp. Evang.* i. 6) quotes Philo Byblius of the 2nd cent. A.D. as citing the ancient Phœn. legends that go under the name of Sanchoniathon, to the effect that Ouranos (Anu) married his sister the earth, 'and by her had four sons, Ilus (El), who is called Kronos, and Betylus, and D., which signifies "corn," and Atlas.' 'D., after he had discovered bread-corn and the plough, was called Zeus Arotrios.'

The Phœn. Dagon, then, like the Bab., is properly 'Zeus of the plough.' With this agree all the notices found in OT in regard to the Phil. Dagon. He had temples in Gaza and Ashdod (Jg 16^{23}, 1 S $5^{1.2}$), and presumably in the other Phil. cities. His worship among the Philistines was national, and not merely local (1 Ch 10^{10}, 1 S 5^{8}–6^{18}). His worship did not exclude that of other Baals (2 K $1^{2.3}$). The Philistines regarded him as giving them victory over their enemies, rejoicing before him when Samson was in their power, and placing Saul's head in his temple (Jg 16^{23}, 1 Ch 10^{10}). But he was eminently the god of agriculture; they acknowledged J"'s victory over him through the mice that marred their fields, and offered golden mice in token of the acknowledgment (1 S $6^{4.5}$).

Apparently, the worship of D. among the Philistines was conducted with a highly developed and technical ritual. We may infer this from the elaborate discussions and arrangements for returning the ark, as described in 1 S 5. 6, the golden mice and golden tumours as a guilt-offering, the new cart, the new milch kine with their calves shut up at home. The worship of D. at Gaza continued to a late period. During the Maccabæan wars Jonathan destroyed the temple of D. there (1 Mac $10^{83.84}$ 11^{4}; Jos. *Ant.* XIII. iv. 4, 5).

LITERATURE.—Sayce, *HCM* 325-327; Sayce in *SS Times*, May 27, 1893; Smith, *HGHL* 164; Moore, *Judges*, 358 f.; Wellh. and Driver on 1 S 5^{4}; *Oxf. Heb. Lex. s.v.* W. J. BEECHER.

DAISAN (B Δαισάν, A Δεσ-), 1 Es 5^{31}.—Called REZIN, Ezr 2^{48}, Neh 7^{50}. The form in 1 Es is due to confusion of ר and ד.

DALAN (A Δαλάν, B 'Ασάν, AV Ladan), 1 Es 5^{37} = DELAIAH, Ezr 2^{60}.

DALE.—See KING'S DALE.

DALETH (ד).—Fourth letter of Heb. alphabet, and as such used in the 119th Psalm to designate the 4th part, each verse of which begins with this letter.

DALLY.—Only Wis 12^{26} 'correction, wherein he dallied with them.' By a bold anthropomorphism God is described as only sporting with the Egyptians in the lighter plagues that fell on them. The Gr. is παιγνίοις ἐπιτιμήσεως, lit. 'play-games of correction'; Vulg. *ludibriis et increpationibus*, Cov. 'scornes and rebukes,' Geneva 'scornful rebukes,' RV 'a mocking correction as of children.' 'Dally' has now chiefly the sense of 'delay,' which easily arose from the older sense of 'sport,' as in Milton, *Of Reformation* (Prose Works, ii. 410), 'Let us not dally with God when he offers us a full blessing'; and Bunyan, *Heavenly Footman* (Clar. Press ed. p. 270), 'it is not good dallying with things of so great concernment, as the Salvation or Damnation of thy Soul.' J. HASTINGS.

DALMANUTHA (Δαλμανουθά) is mentioned only in Mk 8^{10}. The corresponding statement of Mt (15^{39} RV) gives Magadan. In Tatian, *Diatessaron* (Hill's ed. p. 134), it is Magheda. Rendel Harris (*Study of Codex Bezæ*, p. 178) suggests that Dalmanutha may be simply a corruption from the Syriac; but see Chase, *Bezan Text of the Acts*, p. 145 n^{2}. On the variants in Mk see Chase, *Syro-Latin Text of the Gospels*, p. 97 f. The common reading Magdala is probably a substitution of a better for a less known place. Ewald suggested that Magadan stands here for Megidon = Megiddo; but Eusebius says this Magadan was near Gerasa. Thomson places Dalmanutha at Ed-Delemîyeh, one mile N. of the Jarmûk, at the S.E. corner of the Sea of Galilee. As the scene of the second Feeding of the Multitude is uncertain, and as there is nothing said to indicate in what direction the boat into which our Lord went was steered, the site of Dalmanutha cannot be determined with certainty. Tristram suggests a site 1½ mile from Migdel (Magdala), and Sir C. Wilson thinks it was not far from that.

LITERATURE.—Besides the works mentioned above, consult Keim, *Jesus of Nazara* (Eng. Tr.), iv. 238 n.; Edersheim, *Jesus the Messiah*^{2} (1887), ii. 67 ff.; Andrews, *Life of our Lord*, ed. 1892, p. 338; Herz and Nestle in *Expos. Times*, viii. 563, ix. 45, 95. A. HENDERSON.

DALMATIA (Δαλματία) in apostolic times was an ill-defined mountainous district on the E. coast of the Adriatic, stretching towards Macedonia. In its more exact use, the name, which is not known to the earlier Greek writers, was used of the S. portion of the Rom. province Illyricum, between the Drinus and the sea. In its more indefinite use it was practically another name for Illyricum. St. Paul preached the gospel in the district, or, at any rate, in its neighbourhood (Ro 15^{19}), and during his last imprisonment in Rome it was visited by Titus (2 Ti 4^{10}). In our ignorance of the place where the apostle was arrested, we cannot determine either the exact time when Titus was sent to D. or the reason why he was sent; but it has been conjectured that, having failed to find St. Paul at Nicopolis as he expected (Ti 3^{12}), he went on to Dalmatia. W. Muir.

DALPHON (דַּלְפוֹן, Est 9^{7}), the second son of Haman, put to death by the Jews. In the LXX *Δελφών*.

DAMARIS (*Δάμαρις*).—The name of a woman who, with Dionysius the Areopagite and certain others, is mentioned as having been converted by St. Paul at Athens (Ac 17^{34}). Ramsay (*St. Paul the Trav.* p. 252) points out that it is not stated that she was of good birth (in contrast with 17^{12} and 13^{50}); that this arose from the fact that women of social position in Athens would certainly not have the opportunity of hearing St. Paul; and that her name suggests that she was a foreigner, perhaps 'one of the class of educated *Hetairai*.' This suggestion seems to go rather beyond the evidence. The name is said to be a corruption of *δάμαλις*, a heifer, which is the reading of one Lat. MS (*et mulier nomine Damalis*, Flor.). Chrys. (*ad loc.*) suggests quite erroneously that she was the wife of Dionysius: this could not be the tr. of *καὶ γυνὴ ὀνόματι Δ.* These words and all mention of this woman are omitted by Codex Bezæ. Ramsay (*Church in Rom. Emp.* p. 161) quotes this in proof of his assertion that the reviser to whom we owe the Western text was a Catholic who objected to the prominent position assigned to women in the Acts; 'this was, firstly, pagan rather than Christian; and, secondly, heretical rather than Catholic.' (See also 17^{12} and the variation there.) A. C. Headlam.

DAMASCUS (דַּמֶּשֶׂק, *Δαμασκός*).

This city is the contemporary of all history. Its origin is lost in antiquity. Jos. (*Ant.* I. vi. 4) says it was founded by Uz, grandson of Shem. It is first mentioned in connexion with Abraham's pursuit of the defeated Chedorlaomer (Gn 14^{15}). Then (Gn 15^{2}) his servant is called Dammesek Eliezer, where both the Chaldee and the Syr. have 'Eliezer the Damascene.' It occurs in 2 S 8^{6} as אֲרַם דַּמֶּשֶׂק, Aram Dammesek, which suggests comparison with the modern Arabic name, *Dimashk esh-Shâm*. As it was the capital of Aram, so it is the chief city of *esh-Shâm*, the modern Syria. *Esh-Shâm*='the left,' *i.e.* the country on the left; as *el-Yemen*, Arabia Felix, is on the right of the Arabian looking northward. A Moslem tradition makes Eliezer the founder of the city, and Abraham king for some years before he went south to Palestine. So also Nicolaus of D., quoted by Jos. (*Ant.* I. vii. 2). He mentions a village called 'the Habitation of Abraham,' which may be identical with *el-Burzeh*, 3 miles N. of the city, where there is a *wely* sacred to the patriarch.

i. History.—The history of D. really begins for us with its capture by David. Coming to succour Hadadezer, king of Zobah, the Damascenes were themselves overthrown. David smote of the Syrians 22,000 men, took and garrisoned the city, and 'the Syrians became servants to David, and brought presents' (2 S 8$^{3-6}$). Nicolaus of Damascus says the battle was fought on the Euphrates. Rezon, son of Eliada, a follower of Hadadezer, escaped, gathered a company around him, possibly fugitives like himself, and obtained possession of Damascus. 'He was an adversary to Israel all the days of Solomon.' His experience on the Euphrates possibly led him to abhor Israel (1 K 11$^{23-25}$). But soon again the sceptre passed to the family of Hadad. Syria and Israel were in league against Judah. Hard pressed by the king of Israel, Asa bought the friendship of Benhadad with costly presents, and induced him to break with Baasha and invade his territory. A successful raid into the northern dominions of Israel called off Baasha and relieved Judah (1 K 15$^{16-21}$). Benhadad seems to have followed up his advantage in the reign of Omri. Retaining the captured cities, he held the right to 'make streets' in the new capital, Samaria (1 K 20^{34}). 'Streets' may have meant quarters for a permanent embassy, or simply accommodation for Syrian merchants, who, like the Tyrians in Memphis, would congregate in one quarter. It was a concession to a power which could enforce it if necessary. Benhadad, son of this monarch, led a great expedition against Samaria. There were with him thirty-two subject kings, with horses and chariots. Conducting the siege with a contemptuous carelessness, born of a sense of absolute superiority, he was surprised by a sudden attack, and his army routed, he himself escaping with difficulty on horseback. Meeting Israel again at Aphek, he was defeated and his army destroyed. Taken by Ahab, his freedom was granted on most humiliating terms (1 K 20). In about three years' time we find them again at war, fighting for possession of Ramoth-gilead; and there Ahab was slain (1 K 22). From D. came Naaman, to be healed of leprosy (2 K 5). Again the Syrians invaded Israel, and a company sent to arrest Elisha at Dothan was led by him, blinded, into Samaria (2 K 6$^{8-23}$). Unaffected by their chivalrous treatment, we find Benhadad directly again besieging Samaria. The city was reduced to the most appalling straits by famine, when, by a miraculous discomfiture of the Syrians, it was delivered, and plentiful supplies provided (2 K 6^{24}–7^{20}). From the cuneiform inscriptions we learn that the Assyrians also harassed Benhadad, and were too strong for him and his allies. His reputation suffered heavily from these disasters, making it easier for a strong man to usurp his place. Falling sick, he sent a messenger laden with gifts to consult Elisha. To this man, Hazael, the prophet promised the kingdom. On his return he secured the swift fulfilment of the promise by the murder of his master (2 K 8^{15}). In his encounters with the great Assyr. power, the new king was not more fortunate than his predecessor; but elsewhere success waited upon his standards. Jehoram of Israel and Ahaziah of Judah attacked Ramoth-gilead. Hazael repulsed them, the former being seriously wounded (2 K 8$^{28.29}$). He then laid waste the whole country east of the Jordan (2 K 10$^{32.33}$). He captured Gath (*ib.* 12^{17}), and threatened Jerusalem. Jehoash purchased immunity from attack, stripping the temple and the palace of all valuables for this purpose (*ib.* 12^{18}). Hazael also prevailed against Israel, and superiority was maintained by his son Benhadad (*ib.* 13^{3}). Ultimately Jehoash, son of Jehoahaz, asserted his independence, and recovered the cities Hazael had taken (*ib.* 13^{25}). Jeroboam II., son of Jehoash, the great warrior-king of the northern monarchy, extended the borders of Israel, recovering D. and Hamath, probably making their kings tributary to Israel (*ib.* 14^{28}). D. and Samaria next appear in league against Jerusalem (2 K 15^{37} 16^{5}). Rezin of D. reconquered Elath, driving out 'the Jews.' Meantime the Assyrians, under Tiglath-pileser III., whose Bab. name was Pul or Pulu (2 K 15^{19}), were rapidly extending their sway, threatening the independence of D. and Samaria alike. To consolidate their power against Assyria, Rezin and Pekah sought to attach Judah to their cause by dethroning Ahaz, and setting up 'a king in the midst of it, the son of Tabeel' (Is 7^{6}). The attempt not only failed: it hastened the disaster they wished to avert. Ahaz appealed to Tiglath-pileser, who at once 'went up against D. and took it, and carried the people of it captive to Kir,' Rezin himself being slain (2 K 16^{9}); and Assyr. colonists were placed in it (Jos. *Ant.* IX. xii. 3). This was the heaviest blow the city had yet received, and for a time she seems to have been crushed by it. To this period probably refer the prophecies of Isaiah and Amos, 'The riches of D. . . . shall be carried away before the king of Assyria' (Is 8^{4}), 'Behold, D. is taken away from being a city, and it shall be a ruinous heap' (Is 17^{1}), 'I will send a fire into the house of Hazael, and it shall devour the palaces of Benhadad . . . and the people of Syria shall go into captivity to Kir, saith the Lord' (Am 1$^{4.5}$; see also Jer 49$^{23-27}$). Ahaz came to D. to do homage to Tiglath-pileser. Here he saw the great altar, of which, at his order, a duplicate was made by Urijah the priest, and put in the temple to supplant the brazen altar (2 K 16$^{10-16}$). For the important issues of this act see W. R. Smith, *OTJC*^{2} 265, 443, *RS* 359, 466 ff.

A city occupying the position of D. could not be permanently overwhelmed. During the Persian period she displayed afresh her perennial vigour, playing a distinguished part (Strabo, xvi. 2. 9). When Darius advanced against Alexander at Issus, he sent his harem and treasures to D. for safety. After his defeat and inglorious flight, the city was treacherously surrendered to Alexander's general, Parmenio (Arrian, *Exped. Al.* ii. 11). During the Greek occupation D. yielded to Antioch on the Orontes the rank of first city in Syria. In the course of the wars with Egypt, D., with Palestine and Cœlesyria, fell at times into the hands of the Ptolemies. On the division of Syria (B.C. 111) between Antiochus Grypus and Antiochus Cyzicenus, D. fell to the latter. Against this prince Hyrcanus made a successful stand (Jos. *Ant.* XIII. x. 1–3). The next king was Demetrius Eucærus, who, assisted by Ptolemy Lathyrus, established himself in D., and divided the rule of Syria with his brother Philip (*Ant.* XIII. xiii. 4). Invited by discontented Jews, he marched against Alexander Jannæus, and defeated that prince near Shechem, returning immediately to war with Philip. The latter, assisted by Arabs and Parthians, was victorious. Demetrius was sent to Mithridates, king of Parthia, and remained with him till his death. A younger brother, Antiochus Dionysus, now seized the throne of Damascus. He fell in an encounter with Aretas, king of Arabia; and this monarch, invited by the inhabitants, entered D. and assumed the reins of government. Against Ptolemy Mennæus, 'who was such a bad neighbour to the city,' Alexandra, widow of Jannæus, sent an expedition to D., under her son Aristobulus, which achieved nothing (*Ant.* XIII. xvi. 3). Tigranes, king of Armenia, obtained temporary possession. The Romans under Metellus took the city, and here, B.C. 64, Pompey received ambassadors from the neighbouring kings, who brought him presents; among others, a golden vine from Aristobulus, valued at 500 talents. In B.C. 63 the whole of Syria became a Roman province; and, while the proconsul usually resided in Antioch, D. began to assume her old ascendency. Herod, while still a young man, escaping judgment from the Sanhedrin, came here to visit Sextus Cæsar, and was made by him general of the army of Cœlesyria (*Ant.* XIV. ix. 5). Later, according to Jos. (*BJ* I. xxi. 11), he showed his magnanimity by adorning many cities, not only within but also beyond his own dominions. To D. he added the attractions of a gymnasium and a theatre. It was on the way to D. that the miraculous event occurred through which Saul of Tarsus was converted to Christianity; and in this city he first testified for Christ (Ac 9$^{2-27}$). It was then under the Arabian Aretas, and governed by an ethnarch, whose vigilance Paul escaped, being let down over the wall in a basket (2 Co 11^{32}). Hither the apostle returned, after his sojourn in Arabia (Gal 1^{17}). It was reckoned to the Decapolis (Pliny, *HN* v. 16). Josephus curiously remarks that Scythopolis was the greatest of these cities. After Herod's time he says little of D.; but there must have been a strong Jewish colony there: at one time some 10,000 of these were slain by the populace (*BJ* II. xx. 2). Under Trajan, D. attained the rank of a Roman provincial city. Since that time, although she has often changed hands, her career of prosperity has hardly been interrupted, save perhaps when she fell before the ferocious Tamerlane (1399). D. is still the chief city in Syria, with a population of not less than 150,000. Christians have always been fairly numerous in the city. Theodosius transformed the great temple into a Christian church. On the advent of Islam it was changed into a Moslem mosque. D. was originally subordinate to Antioch, which was the seat of the patriarch; but this official, still taking his title from Antioch, now resides in Damascus. The darkest blot on the history of the city is the massacre of some 6000 Christians in the summer of 1860.

ii. GEOGRAPHY.—One of the most beautiful and fertile plains in the world is that which lies to the east of the Anti-Lebanon range, at an elevation of about 2200 ft. above sea-level. Great Hermon, *Jebel esh-Sheikh*, a vast snowy bank filling all the horizon, forms the western boundary. A chain of hills, thrown off to eastward from Anti-Libanus, runs along the northern edge. *Jebel el-Aswad* and *Jebel Mâni'* shut it in on the south. Three marshy lakes mark the eastern frontier of fertility; and away beyond them rises a range of low hills, which definitely cuts off this district from the sandy wastes of the Arabian desert. These surrounding hills, all bare and forbidding, save in the deeper and shadier wadies, enclose within their rocky arms a broad expanse of rich waving green.

This plain owes its fertility almost entirely to the river *el-Barada*, 'the cool,' which bursts through the limestone ramparts on the north, to fling itself in many a refreshing stream over its surface; and to the waters of *el-A'waj*, 'the crooked,' which, coming down from the eastern slopes of Gt. Hermon, flows through the southern meadows. Something is also due to the protection of the desert hills in the east, which in a measure bar the way against the drifting sand-storms from the wilderness. In the plain the natives distinguish five districts. The western portion, extending about two hours east of the gorge of the *Barada*, is divided by that river into the northern and southern *Ghautah*. To the east is the *Merj*, also divided by the *Barada* into north and south; while all lying between these districts and *Jebel el-Aswad* and the valley of *el-A'waj*, is known as *Wady el-'Ajam.* Scattered over this tract are some 140 villages. A population of about 50,000 are engaged almost exclusively in agricultural pursuits. Clumps of olives, and many varieties of fruit trees pleasantly diversify the landscape, while between them, in season, far and wide, wave seas of golden grain. On the edge of the plain, east of *el-Barada*, just under *Jebel Ḳasiûn*, which rises some 1700 ft., lie the famous orchards, some 30 miles in circumference, which encircle with luxuriant foliage the ancient city of Damascus. From afar are seen the white roofs, domes, and minarets, in striking relief against the green. The scene of rich beauty here presented, with the shade of fruitful trees, and on every hand the music of running water, has ever inspired the Arab with admiration; and when he dreamed of Paradise—'the garden' *par excellence*—his imagery was drawn from the gardens and streams of Damascus. Nor need we wonder if, coming from the dreary monotony of the burning desert, the Bedawi, fascinated by its delights, thinks himself in the midst of an earthly Paradise. Even for the eye accustomed to the fresh beauty and fruitfulness of the West, it possesses many a charm, although the descriptive language of the Arab may appear somewhat exaggerated. There are few places where so rich a variety of fruits is brought to maturity within a similar area. In the vicinity of the city are large vegetable gardens; and in the fields beyond different kinds of grain, tobacco, cotton, flax, hemp, madder-roots, and vicinus are grown. The olive is plentiful, and much of the oil used in the city is made in the neighbourhood. Tall, graceful poplars line the banks of the streams, yielding excellent timber for building purposes. Firewood is mostly made of the olive and the apricot. There are also the cypress, the plane tree, and the stately palm. But the charm of D. is felt chiefly in her gardens, and under the shadow of her far-stretching thickets of fruit trees. There, in generous rivalry, are found the orange, the lemon, and the citron; the apple, the pear, and the quince; plums and prunes, grapes and figs, pomegranate and mulberry, almonds and walnuts, hazel-nuts and pistachios.

D. is situated about 60 miles from the coast. Its exact position is 33° 30′ N. lat., 36° 18′ E. long. It is now most easily approached by the magnificent French diligence road from Beirût, which scales Mount Lebanon, crosses *el-Beḳa'*, and then follows the easy passes through Anti-Lebanon to the plain of Damascus. The routes by which of old she communicated with the seaboard varied with political conditions. The way to Tripoli lay past *Ba'albeḳ* and Bĕsherreh. That to Beirût followed closely the line of the present road; while the great height of the two Lebanons lay also between D. and Tyre and Sidon. When the way was clear, she found the most convenient outlet at Acre. This road led to the south-west past *Sa'sa'* and *Ḳuneiterah* over the *Jedûr* uplands, crossed the Jordan below lake *Ḥûleh* by *Jisr Benât Ya'ḳûb*, traversed the rolling downs of the upper Jordan valley, and splitting towards the west, one arm took the difficult but direct route by way of *Ṣafed*; the other swept southward past *Khân Jubb Yusif* to the plain of Gennesaret at *Khân Minyeh*, and, following an easy line by the wadies to the north-west, joined the *Ṣafed* road at *Er-Râmeh*. From Gennesaret a branch of this highway ascended the uplands west of the Sea of Galilee to *Khân et-Tujjâr*, and, passing round the base of Tabor, crossed the plain of Esdraelon to Megiddo, and thence to the Philistine plain and Egypt. Another branch kept the valley along the shore of the lake, and southward past Bethshan to Jericho. This was crossed by a road, which, leaving D. in a more southerly direction, traversed the level reaches of the *Ḥaurân*, came down into the valley from the *Jaulân* highlands east of the sea, by way of Aphek, and here dividing, one limb crossed the Jordan below the lake, climbed the hills to westward, and reached Acre by way of Kefr Kennah; the other passed up the vale of Jezreel, and again bifurcating, one branch went straight to the sea over Esdraelon: the other, bending to the south-west, is identified with the ancient caravan road from Gilead, which passes by Dothan, and comes down upon the plain of Sharon. The old gold and frankincense caravan road from Arabia the Happy has frequently changed its course in the northern reaches. The traffic has long been confined to the passing of the *Haj*, the Moslem pilgrimage to and from *El-Ḥaramein*, *El-Medînah*, and *Mecca*. The great road from Aleppo in the north is split as with a wedge at Emesa by the Anti-Lebanon ridge. It throws an arm round either side of the mountain, that on the west traversing the valley of Cœlesyria by way of *Ba'albeḳ*, and unites again at Damascus. Eastward lay the highways across the desert to Palmyra and Baghdād. Thus the great avenues of communication between north and south, east and west, along which flowed the commerce and marched the armies of the ancient world, lay through the heart of the city. Resting in the midst of a beautiful oasis on the edge of the changeless desert, surrounded by desert hills, she formed the natural harbour whither steered the argosies from the sea of sand, bearing the treasures of the East: whence again the sombre mariners set forth upon their dreary voyage homeward. Herein we have the secret of her perennial greatness. A strong position she never was, and often has she bowed beneath the stroke of the conqueror, becoming 'a servant to task work.' But, ever as the tides of war rolled back, she has arisen again, fresh and vigorous as of yore. She has been the meeting place and mart of the nations; and as she has been of use to all, to the desert nomad and to the more civilized and settled peoples alike, so the necessities of all have conspired to perpetuate her prosperity.

iii. TRADE.—It seems probable that the chief source of income to the people of D. would be the constantly passing caravans. But that they also traded on their own account is shown in Ezk 27[18], the 'handyworks' of Tyre being exchanged for 'the wine of Helbon and white wool.' *Ḥalbûn*, a village about 12 miles north of D., is still famous for its vine produce; and the mountain shepherds of Anti-Lebanon would always have a supply of white wool for the D. merchants. From Am 3[12] (RV) we may gather that the city was already known for silken manufactures. Our word 'Damask' is derived from a product of the looms of Damascus. At a later time her armourers also achieved wide fame, and the 'Damascus blade' was highly prized. They were carried off *en masse* by Tamerlane, and settled in Samarkand.

iv. ANTIQUITIES.—The main stream of *El-Barada*, the true creator of the city, enters from the N.W., and, passing under the great square, part escapes to water the gardens on the north, while the rest is carried off through multitudinous conduits to supply the houses of the inhabitants. The distribution of the water has always been a matter requiring the exercise of both care and tact among these excitable people: so it has come to be a common saying, that 'every drop of the water of *El-Barada* has to run according to law.' The ancient city was built on the southern bank of the stream. Much more ground is now covered to the north, and especially to the S. and S.W., while the long limb of *El-Mêdân*, terminating in the 'Gate of God,' *Bawwabet Ullah*, whence issue the pilgrims for *Mecca*, stretches far to the S. The old walls may be traced, however, along the edge of the stream, and through the centre of the modern city, in circumference about 4 miles. For a city of such extraordinary age, D. is not rich in antiquities. The castle, a rectangular building of great extent, standing at the N.W. corner of the old wall, probably dates only from the Middle Ages, although the substructures are ancient. To the S. of the eastern gate part of the wall is very old. The gate itself dates from Roman times; and the line of the *Via Recta*, 'the street called straight,' may be traced from this to the western gate. It is still called *Derb el-Mus-*

takîm, straight street, by the natives (*Derb es-Sultâny*, 'the king's highway,' is the name given to every important road in the country). This is the straight street common to all Syro-Greek and Syro-Roman cities, of which fine examples are still to be seen at *Bosrah* and *Shuhbah*. The great mosque possibly occupies the site of the temple of Rimmon (2 K 5^{18}). It is in accordance with the conservatism of the Orient, that the spot has preserved its religious character under the dominion of successive faiths. It was a spacious Greek temple, then a Christian church, and finally it became a Moslem mosque; the only remaining evidence of Christian use being the Greek inscription over the southern gateway, 'Thy kingdom, O Christ, is an everlasting kingdom, and Thy dominion endureth for all generations.' The Moslems say that the head of John the Baptist was buried here; but Christian tradition has it that the church was dedicated to John Damascenus, whose tomb was within it; and there his body was miraculously retained, when an effort was made to remove it. Of this mosque, which for centuries had been the pride of the Moslem world, a large part was destroyed by fire in October 1893.

The traditions associating certain spots with Abraham, Naaman, and Elisha are of the most shadowy character. Hardly more reliable are those relating to the experiences of St. Paul. A spot about half a mile E. of the city is shown as the scene of his conversion. It is now the Christian burying-ground. But tradition has several times contradicted itself as to the scene of this miracle: in any case it could not be here, as the traveller from the S. would not enter the city from the E. Between this and the gate is the grave of St. George, the kindly porter who connived at St. Paul's escape, and suffered martyrdom. The spot where the apostle was let down over the wall in a basket, 'the house of Judas' in Straight street, and also the house of Ananias, are pointed out; but considerable uncertainty attaches to them all. W. EWING.

DAMN, DAMNABLE, DAMNATION. — These words have in the course of time suffered a process of degeneration, for which, says Bishop Sanderson, 'we are not so much beholden to good acts as to bad manners.' The Lat. *damnare* signified 'to inflict loss on one,' 'to condemn.' But, under the influence of theology, the Eng. words thence derived soon acquired the sense of 'condemnation to eternal punishment'; and this special application ran alongside the orig. meaning from the 14th cent. to the 18th. In the 1619 ed. of the Bishops' NT, the translation of 1 Ti 5^{12} is 'having damnation, because they have cast away their first faith'; and there is added this note: 'S. Paul doth not here speake of the everlasting damnation, but by this word damnation, doeth rather understand the shame that those wanton widowes shall have in the world for breaking their promise.' Thus even then the sense to which the words are now wholly confined was the most familiar. But in earlier English it was not so. To Wyclif's ear the words must have had a very different suggestion, for he not only uses 'damn' freely in the sense of 'condemn,' as in his tr. of Job 9^{20} 'If I wole make me iust, my mouth shall dampne me,' but even uses it of our Lord Himself, as in Mk 10^{33} 'For lo! we stien to Jerusalem, and mannus sone schal be bitraied to the princis of prestis, and to scribis, and to the eldre men; and thei schulen dampne hym bi deth.'

In AV 'damned' occurs as tr. of κατακρίνω Mk 16^{16}, Ro 14^{23} (RV 'condemned'), of κρίνω 2 Th 2^{12} (RV 'judged'). 'Damnable' is found only 2 P 2^{1} 'damnable heresies,' Gr. αἱρέσεις ἀπωλείας, RV 'destructive heresies,' RVm 'sects of perdition.' 'Damnation' is the tr. of καταδικη Wis 12^{27} (RV 'condemnation'); of ἀπώλεια 2 P 2^{3} (RV 'destruction'); of κρίσις Mt 23^{33}, Jn 5^{29} (RV 'judgment'), Mk 3^{29} (RV 'sin,' reading ἁμάρτημα); and of κρίμα Mk 12^{40}, Lk 20^{47}, Ro 3^{8}, 1 Ti 5^{12} (RV 'condemnation'), Ro 13^{2}, 1 Co 11^{29} (RV 'judgment'), while Mt 23^{14} is omitted from RV. Thus the words are never used in AV in the sense now attaching to them, and they are completely banished from RV. See more fully Roberts in *Expos. Times*, iii. 549 ff., and the art. JUDGMENT.

J. HASTINGS.

DAMSEL, now archaic or poetical, is freely used in AV; and it is retained in RV, except where the Gr. is παιδίον (Mk $5^{39.\ 40\ bis.\ 41}$ 'child') or παιδίσκη (Mt 26^{69}, Jn 18^{17}, Ac 12^{13} 16^{16} 'maid').* In Gn 34^{3} one word (נַעֲרָה *na'ărâh*) is twice tr^{d} in AV 'd.,' in v.^{4} another (יַלְדָּה *yaldâh*); and again in Mk $5^{39.\ 40\ bis.\ 41}$ we have one word (παιδίον), in vv.$^{41.\ 42}$ another (κοράσιον). RV preserves the distinction in St. Mark. J. HASTINGS.

DAN (דָּן 'judge,' Δάν).—The elder of the two sons borne to Jacob by Bilhah, Rachel's handmaid. The origin of the name, given in Gn 30^{6} (E), is that, after her long barrenness, God had judged Rachel and had given her a son, the son of her handmaid counting as her own. No details of his history are given in the patriarchal narratives. Modern critics usually regard him as, like the other sons of Jacob, the eponymous ancestor of the tribe of Dan. These tribes are divided into two main branches, the Leah tribes and the Rachel tribes. Dan belongs to the latter; but the representation of Dan and Naphtali as sons of Bilhah implies that they were inferior members of the Rachel group. That the tribe was quite small appears from various indications. Only one son is mentioned in Gn 46^{23} Hushim (in Nu 26^{42} Shuham), that is, the tribe consisted of a single clan. It is referred to as a 'family' in the important narrative of its migration to Laish, Jg $18^{2.\ 11.\ 19}$. The fighting men on this expedition are only 600, and they seem to have been the majority of the tribe. It is unnecessary to attach much importance to the characteristic statement of P, which places the fighting men of Dan, during the wilderness wandering, at more than 60,000 (Nu 1^{39} 26^{43}).

After the settlement in Canaan, the clan seems to have broken off from the main Joseph group in order to secure a district for itself. In this it was only partially successful. Its territory lay to the S.W. of Ephraim, and joined that of Benjamin and Judah. It seems to have stretched forward towards the fertile lowlands, but whether it ever occupied any portion of them or not is uncertain. The reference in the Song of Deborah (Jg 5^{17}) is itself very obscure, and the chronology of the period so uncertain, that we learn little from it. We do not know whether it refers to the northern or the southern settlements. The most obvious sense of the words is that Dan had pushed forward to the sea. But we have no other evidence that it ever reached the coast. Nor is it certain that the words require this interpretation. Moore translates: 'Dan, why does he live neighbour to ships?' and explains—Why does he live as a dependent under the protection of Phœnician seafarers? He thinks the northern Danites are meant. G. A. Smith thinks Deborah may speak 'in scorn of futile ambitions westward, which were stirred in Dan by the sight of the sea from the Shephelah,' but admits that Dan may have reached the coast at some time (*Hist. Geog.* p. 220). RV, 'Dan, why did he remain in ships?' is not satisfactory. It is most probable that the tribe never reached the sea; but even if it did so, it must have been soon compelled to retreat. Not only so, but we learn that it was forced back even from the lowlands by the Amorites (Jg 1^{34-36}). Wellhausen thinks that it was really the Philistines who drove them back into the hill country. But it seems safer to accept the statement of the text, though possibly the Philistines forced back the Amorites, who, in turn, pushed Dan back. We find the tribe after this living in the vales of Aijalon and Sorek, in and about the towns of Zorah and Eshtaol (Jg 18, cf. 13). The lot of the tribe as given in Jos 19^{41-46} includes very much more. But it cannot be taken as proving that Dan's territory ever included, even in idea, during its actual history, all the towns mentioned. It is the work of the Priestly Writer, and therefore very late. Not only so, but the general account of the territories of the tribes makes it clear that the whole land of Palestine was regarded as occupied by the Hebrews, though the actual history was very different. In this case the method of the writer has been to specify places actually occupied by Dan (Zorah, Eshtaol, Shaalabbin, Aijalon), and to add all the adjacent places which were not assigned to other tribes, though strangely Eshtaol and Zorah are assigned to Judah as border towns (15^{33}).

---

* The spelling of AV 1611 is never 'damsel'; 'damsell' occurs in Gn 24. 34, and Damsell Mt 14^{11}, while 'damsels' is found Gn 24^{61}, Jg 19^{9}. Elsewhere it is either 'damosel' or (most freq.) 'damosell,' with 'damosels' for plural and possessive. This is nearer the Lat. *dominicella*, dim. of *domina*, 'mistress,' and the Fr. *demoiselle*.

Although the tribe still retained this small district, it was so cramped in it that it became necessary to seek a new home. We have a most valuable account of this expedition in Jg 18. The narrative in this chapter and the preceding, of which it is a continuation, is probably composite. Budde prints his analysis (which has been followed in the main both by Kittel and by Moore) in his *Richter und Samuel*. It is not, however, important for our purpose to follow the analysis, as the outlines of the story are quite clear. A small party of spies was sent northward, and found in Laish (Leshem, Jos 19^{47}, which Wellhausen thinks was originally Lesham), a city which from the fertility of the district was very inviting, and from its isolation, and the peaceful, unsuspecting character of the inhabitants, was likely to fall an easy prey. Six hundred armed men with their families and goods set out for Laish. On their way they plundered the sanctuary of Micah, an Ephraimite, of its images, and took his priest with them. He pursued them with a few neighbours; but his remonstrance was met with a grimly humorous warning that unless he was silent he might irritate them into killing him and his family, a hint which Micah discreetly took. The Danites then moved on to Laish, which they captured and burnt, while they butchered the inhabitants. They built a new city and called it Dan. Probably only a small remnant was left behind in the south, but at least a remnant, with its home between Zorah and Eshtaol in the camp of Dan (Jg 13^{25}, in Jg 18^{12} Mahaneh-dan is said to be in Kiriath-jearim, but this is less likely). That a remnant was left is made probable by the story of Samson, who belonged to this tribe. That it was small seems clear from the subsequent history. It plays no part in the later history of Israel. It is omitted from the tribes in the genealogies of Chronicles and in the list of the Apocalypse.

The character of the tribe is sketched in the blessings of Jacob and Moses. In the former we read—

'Dan shall judge his people,
As one of the tribes of Israel.
Dan shall be a serpent in the way,
An adder in the path,
That biteth the horse's heels,
So that his rider falleth backward.
I have waited for thy salvation, O Lord' (Gn 49^{16-18}).

The first sentence has been variously understood, but probably the meaning is that Dan shall take his part with the other tribes in defending Israel. The writer probably has Samson in mind. The comparison in v.[17] is to the stealthy tactics adopted by Dan in war or on marauding expeditions, by which, weak tribe though it was, it secured a victory over foes of superior strength. The attack on Laish is a good example. In the Blessing of Moses we read—

'Dan is a lion's whelp,
That leapeth forth from Bashan' (Dt 33^{22}).

Here, too, the point of the metaphor is the suddenness with which the tribe would attack. The reference is not so much to war, probably, as to attacks on caravans, for which it would lie in wait. Although the second line refers to the 'lion's whelp,' yet the mention of Bashan makes it probable that the northern portion of the tribe is in the author's mind. From 2 S 20^{18}, where we should probably read 'in Abel and in Dan,' it seems that Dan was regarded as a tribe that held fast to the good old Israelite customs.

The gentilic name **Danites** (הַדָּנִי) occurs Jg 13^2 $18^{1.11}$, 1 Ch 12^{35}.
A. S. Peake.

DAN (דָּן, Δάν).—A city which marked the most N. point of Pal., and naturally became linked with Beersheba, the boundary town in the south. The phrase 'from Dan to Beersheba' was at once picturesque and suggestive of dimension, and in times of national crisis emphasized the fact that amid all tribal distinctions there was a common inheritance —the whole land of Israel (Jg 20^1, 1 S 3^{20}, 2 S 3^{10}). The chief independent notice is the account of the Danite invasion given in Jg 18, where the change of name from Laish or Leshem is accounted for. In all likelihood it is the same place that is referred to in the census-journey of Joab as **Danjaan**, 2 S 24^6. If the reading *ja'ar* instead of *ja'an* be accepted, it would indicate the first point of contact with the rocky ground and oak scrub of Lebanon, which the Arabs call *wa'ar*.

At Dan Jeroboam set up one of the calves of gold (1 K 12^{29}). Dan disappears from Scripture after the invasion of Benhadad (1 K 15^{20}, 2 Ch 16^4). It is referred to by Josephus, Eusebius, and Jerome in terms that identify it with the present Tell el-Ḳadi (although G. A. Smith prefers to locate Dan at Banias). The mound rises out of a close jungle of tall bushes and rank reeds, with larger trees on the higher slopes, until an irregular oblong plateau is reached, about 40 ft. high on the N. side and 80 ft. on the S., and resting upon one of the broad fringe-like terraces with which the skirts of Hermon sweep down towards the plain of Huleh (L. Merom). On the W. side, amid the rough boulders and blocks of ancient masonry that cover the ground, there gushes out the immense fountain (Leddan) that forms by far the largest source of the Jordan current, where 5 miles down it meets the waters from the upper springs of Hasbeya and Banias.

G. M. Mackie.

DANCING is, in its origin, an expression of the feelings by movements of the body more or less controlled by a sense of rhythm. It was practised, therefore, long before it was raised to the dignity of an art, being simply a natural development of the tendency to employ gesture, either as an accompaniment to, or a substitute for, speech. We may distinguish three stages in the early history of dancing, as exemplified in the practice of ancient nations: (1) Its rudest and most unstudied form, the outward expression of exuberant feeling; (2) the pantomimic dance, in which, *e.g.*, the movements of hostile armies were represented; (3) the dance pure and simple, the exhibition of the poetry of motion, of all the grace of attitude and all the flexibility of which the body is capable. Social dancing, as we now understand it, was almost, if not altogether, unknown in ancient times.

Whatever view we may hold of the presence or position of Israel in Egypt, we have no evidence to show that the Hebrews borrowed thence their love or their methods of dancing. They never seem, in ancient times, to have reached the third of the stages which we have enumerated. We hear nothing of performances by professional artists, similar to those represented on the Egyp. monuments, and supposed by Lane to have been the direct ancestors of the modern Ghawazee. There is no mention of solo or figure dancing, of contra-dances (unless we attach this meaning to the מְחוֹלַת הַמַּחֲנָיִם, Ca 6^{13}), or of anything approaching in elaboration the performances associated with the Feast of Eternity. Still less can we expect a reasoned appreciation of the exercise as a means of developing the mind and body, such as we have in Plato's Laws. All the allusions point to spontaneous movements; in processions these would be impromptu on the part of the leaders, and more or less closely imitated by the others. Three ideas are represented in the vocabulary: leaping, circling, and making merry. Thus רָקַד, רִקֵּד (Ec 3^{4}, 1 Ch 15^{29}), to leap; כִּרְכֵּר, to circle (2 S $6^{14.16}$); חוֹלֵל (Jg 21^{23}, Ps 87^{7}), to twist oneself; שִׂחֵק, צִחֵק (Jg 16^{25}, 1 S 18^{7}, 1 Ch 15^{29}), *lit.* to laugh. It is self-evident that these words might be used in a looser and in a more technical sense. They were applied to the artless play of the children (Job $21^{11f.}$), as well as to the dancing of the adults.

Few as are the references in the Bible, they show that almost any occurrence might be associated with dancing: the return of the prodigal, the commemoration of an hist. event, the welcoming of a hero on his return from battle, the ingathering of the vintage,—whatever called for an expression of joy or excited the heart to gladness. Of dancing for its own sake, of its practice as an art, there is no trace. Leyrer sees a possible exception to this in Ca 6^{13}, but the passage is too obscure to admit positively of such an explanation. Whether we should look on Mahanaim as the name of a place, or as descriptive of a dancing in which two rows of performers took part, or whether, with Delitzsch, we should understand an allusion to the angels, must remain a matter of doubt. The only unmistakable instance of artistic dancing is that mentioned in Mt 14^{6}, the performance of Herodias' daughter 'in the midst' of the guests assembled on Herod's birthday. This was due, however, to the introduction of Greek fashions, through contact with the Romans, who had adopted them, and hardly belongs to our subject.

It is with dancing in connexion with the religious rites and ceremonies of the Hebrews that we are mainly concerned in this article. Their religion was, esp. in pre-exilic times, predominantly social and joyful. It found its proper æsthetic expression in a merry sacrificial feast, which was the public ceremony of a township or clan. Then the crowds streamed into the sanctuary from all sides, dressed in their gayest attire, marching joyfully to the sound of music. Universal hilarity prevailed; men ate and drank and made merry together, rejoicing before their god (W. R. Smith, *RS* 236 ff.). To such a religion dancing would be a natural adjunct. The cultus was not a system of rites, artificially contrived to express and maintain theological doctrines, but the free outcome of the religious feelings, which found vent in the way suggested by, and in harmony with, the disposition and genius of the people. It is not surprising, however, that we find comparatively few references to this part of the cultus in OT, or that no provision is made for it in the regulations contained in the recognized standards of the priests. There is no trace of the existence among the Hebrews of any class of priests corresponding to the Salii of ancient Rome, and their vintage and other festivals are far from possessing the significance of the great carnivals of the pagan world. The fact seems to be that the priestly historians and legislators resolutely excluded, as far as possible, everything that could infer any similarity between the worship of J″ and that of heathen deities. Nevertheless, enough remains to show that dancing was practised and acknowledged as part of the Heb. ritual. The dancing of Miriam and the women of Israel (Ex $15^{20f.}$) may have been due to an ancient ceremony connected with the Passover. In any view of it, the dance formed an essential part of an act of worship (cf. Is 30^{29}). At the annual vintage festival at Shiloh—'a feast of the Lord'—the maidens came out and joined in dances in the vineyards (Jg 21^{19-21}). When David took part in the procession at the removal of the ark, he did so in a priestly capacity: he wore the linen ephod, the official dress of the priests (2 S 6^{14}). These passages exhaust the list of religious dances in OT. But the allusions in the Psalms and Prophets, and the references to the rites in honour of idols, point in the same direction; *e.g.* the dance round the golden calf (Ex 32^{19}), and at the altar of Baal (1 K 18^{26}).

The people retained in later times their fondness for dancing in connexion with religious rites, as is shown by the ceremonies connected with the Feast of Tabernacles and the Day of Atonement. On the latter day, and on the 15th Abib, the maidens of Jerus. are said to have gone in white garments, specially lent them for the purpose so that rich and poor might be on an equality, into the vineyards close to the city, where they danced and sang. The following fragment of one of their songs has been preserved, and is thus given by Edersheim—

> 'Around in circle gay, the Hebrew maidens see;
> From them our happy youths their partners choose.
> Remember! Beauty soon its charm must lose—
> And seek to win a maid of fair degree.
> When fading grace and beauty low are laid,
> Then praise shall her who fears the Lord await;
> God does bless her handiwork—and, in the gate,
> "Her works do follow her," it shall be said.'

The other dance festival was held on the day preceding the Feast of Tabernacles, and is said to have been instituted by Judas Maccabæus. At the appointed time everyone went to the 'house of the Sho'ēbah,' carrying branches with lemons attached, for the procession round the altar. In the court were large candelabra, each with four arms; four priests, or youths of priestly descent, climbed ladders, filled the vessels with oil, and lit the wicks, which were made of cast-off belts of the priests. All Jerus. was lighted from the fires. The whole multitude joined in the laudations that followed. Men famous for their piety and good works danced with lighted torches, and great scholars like Hillel were not above exhibiting their dexterity and agility to the admiring crowd. Meanwhile the Levites, standing on the steps that led from the court of the men to that of the women, accompanied the performance with psalms and canticles, and the sound of the *kinnôrs* and cymbals was heard, with trumpets and other musical instruments. The whole festival is proof of that irrepressible love of display and hilarity which revealed itself in the popular religion of Judaism.

LITERATURE.—Spencer, *De Leg. Rit.* iv. 4; Voss, *Gesch. der Tanzkunst*; Grove (etc.), *Dancing*, in 'Badminton Library'; Leyrer, *PRE*² xv. pp. 206–208; Wetstein, *Zeitschr. für Eth-*

nologie, 1873, p. 285 ff.; Smith, *RS*² p. 432; Tristram, *Eastern Customs*, pp. 207–210; Delitzsch, *Iris*, pp. 189–206; Conder, *Tent Work*, pp. 306, 326, 346. J. MILLAR.

DANDLE (prob. from It. *dandola* or *dondola*, a doll), to 'toss gently,' is found Is 66^{12} 'be dandled upon her knees.' Cf. Palsgrave (1530), 'I dandyll, as a mother or nourryee doth a childe upon her lappe'; and Bp. Hall (1614), 'If our Church, on whose lappe the vilest miscreants are dandled.' It is doubtful, however, if this tr. is accurate enough, though RV retains it. The Heb. (שָׁעֲשַׁע) is to stroke or caress, rather than to toss or dandle. The older versions have 'be joyful upon her knees'; except Wyc. 1380, 'daunte you,' 1388, 'speke plesauntly to you,' and Douay, 'speake you fayre.' J. HASTINGS.

DANGER.—In Apocr. (Ad. Est 14^{4}, Sir 3^{26} 29^{17} 34^{12} 43^{24}, 2 Mac 15^{1}) and in Ac $19^{27.\ 40}$ 'danger' has its modern meaning; and so the adj. 'dangerous,' Sir 9^{18}, Ac 27^{9}. But in the other passages in which 'danger' occurs (Mt $5^{21.\ 22\ ter}$, Mk 3^{29}) it is used in the obsol. sense of 'power,' 'control'; Gr. ἔνοχος, fr. ἐν-έχω, *held in* the power of some person or thing, hence (1) 'guilty of,' as Ja 2^{10}, 1 Co 11^{27}; (2) 'liable to,' as here. RV retains 'in danger of,' except Mk 3^{29} 'guilty of an eternal sin,' for AV 'in danger of eternal damnation,' reading ἁμαρτήματος for κρίσεως.

The Lat. *dominus* 'lord,' was contracted in old French in various ways, of which one was *dans*, and was thence adopted into Eng. in the form *dan*. Spenser, *F. Q.* IV. ii. 32, has—

'Dan Chaucer, well of English undefyld.'

Chaucer himself uses 'dan' freely as a title of respect=sir. From this word was formed *danger* (first in late Lat. or Fr., and then adopted into Eng.) by adding the term. *ger*, seen in passenger, messenger. This 'danger' became a great legal word in mediæval Eng., signifying a lord's rights or sway, the extent of his jurisdiction. Hence 'power,' 'control,' as Chaucer, *Prol.* 663 (Oxf. ed.)—

'In daunger hadde he at his owne gyse
The yonge girles of the diocyse.'

Cf. More, *Utopia*, p. 116, l. 5 (Lumby), 'so disdaining to be in her daunger, that he renounceth and refuseth all her benefites'; and Shaks. *Mer. of Ven.* IV. i. 180—

'You stand within his danger, do you not?'

Thus 'to be in one's danger' passed easily into the meaning of 'be liable to' punishment or the like, and then 'be exposed to' any harm, the mod. meaning. J. HASTINGS.

DANIEL, דָּנִיֵּאל (in Ezk $14^{14.\ 20}$ 28^{3} דנאל, *kerê* דניאל), meaning 'God is my judge,' occurs in OT as the name of three (or four) persons.

1. David's second son, 'born unto him in Hebron' 'of Abigail the Carmelitess' (1 Ch 3^{1}). In the parallel passage, 2 S 3^{3}, the name is Chileab (כִּלְאָב); and since this is the evident source of the chronicler's list, the name D. probably arose from a corruption of the text. This apparently can be traced through the LXX, which in each passage has Δαλουιά (B Δαμνιήλ in 1 Ch 3^{1}) (דניאל, דלאה, כלאב) (Kittel on 1 Ch 3^{1} in Haupt's *OT*).

2. A priest of the line of Ithamar who returned in the time of Artaxerxes with Ezra to Judæa (Ezr 8^{2}), and sealed the covenant drawn up by Nehemiah (Neh 10^{6}), unless two distinct persons are mentioned.

3. The hero and traditional author of the Bk. of Daniel. According to this book, D. was a youth of noble descent and high physical and intellectual endowments, carried by Nebuchadnezzar in the third year of Jehoiakim from Jerus. to Babylon, and with other Jewish youths, esp. three companions, Hananiah, Mishael, and Azariah, assigned for education at the king's court (Dn 1^{1-7}). D. and his companions refused to defile themselves with the royal food, and for their fidelity were rewarded by being fairer in appearance 'than all the youths which did eat of the king's meat,' and in their final examination before the king by being superior in understanding and wisdom to all the magicians and enchanters of the realm (Dn 1^{8-20}). In the second year of Nebuchadnezzar, D. revealed and interpreted, on the failure of all the other wise men, the king's dream of the composite image, and was made ruler over the whole province of Babylon and chief ruler over all the wise men (Dn 2). He also interpreted the king's dream of the tree (Dn 4). After the death of Nebuch. he seems to have lost his high office and gone into retirement; but when the handwriting appeared on the wall of the palace during Belshazzar's feast (Dn $5^{1.\ 5}$), again D. was, on the failure of the other magicians, summoned at the instigation of the queen (vv.$^{10-12}$). He interpreted the writing, and was then clothed with purple, decked with a chain, and proclaimed the third ruler in the kingdom (v.^{29}). Under Darius the Mede, D. was appointed one of three presidents over 120 satraps, and was distinguished above all the others; 'and the king thought to set him over the whole realm' (Dn 6^{3}). Through this favour he incurred the enmity of his fellow-officers, who, finding no occasion of accusing him, persuaded Darius to pass a decree that for 30 days no one should present a petition unto any god or man except himself on pain of being cast into a den of lions. As they expected, D. faithfully continued his custom of praying unto his God three times a day. Thus an accusation was brought against D.; and although the king tried to rescue him, yet he was cast into the den of lions (vv.$^{12-16}$), but was miraculously saved (v.^{22}). D.'s accusers were then cast into the den and quickly devoured, and the king decreed that all men should fear and tremble before the God of D. (vv.$^{24-27}$). 'So this D. prospered in the reign of Darius and the reign of Cyrus the Persian' (v.^{28}). This is the story of D. in Dn 1–6. In chs. 7–12 he appears as the recipient of a series of divine apocalyptic revelations respecting the future of Israel, for whose welfare he is extremely concerned. Two additional stories, that of Bel and the Dragon and that of Susanna, are also related concerning him in the Apocrypha.

This narrative of D. is evidently an example of Jewish *Haggadoth* (see next art.). Whether D. represents in any way a real hist. character cannot be absolutely determined. In Ezk $14^{14.\ 20}$ a D. is mentioned with Noah and Job as a pre-eminently righteous character, and in Ezk 28^{3} as an example of the highest wisdom. This association and allusion imply that the D. in the mind of the prophet was an ancient worthy in the traditions of Israel. (We can with difficulty conceive of Ezekiel speaking thus of a younger contemporary. See Cheyne in *Expositor*, July 1897, p. 25.) Of this D. of Jewish tradition we are entirely ignorant; yet probably he was the prototype of the D. of the Exile, and many features of this ancient character probably reappear in the later one. Ewald supposed that the D. of Ezk was a Jewish exile of the ten tribes who lived at the court of Nineveh and had acquired there a reputation for wisdom and righteousness, and whom later Jewish tradition transferred to Babylon. Or it is possible that there was such a distinguished Jew at Babylon, who enjoyed the favour first of Nebuch. and then of the Persian conquerors, who was actually named D., or owing to his wisdom and righteousness was so called by his countrymen after the ancient worthy alluded to by Ezk, and thus a real historical character may have been the basis of the hero of the Bk. of Daniel.*

The story of D. appears to have been written in imitation of that of Joseph—history, however, often repeats itself; yet, if the story is historical, it is strange that no reference is made to D. in the

---

* Cheyne suggests a connexion between D. and Zoroaster, the name having been coined out of the Zend *dânu*, 'wise' or 'wisdom' (*Bamp. Lect.* on Psalter, 105 ff.).

OT narrative of the restoration; that no post-exilic writer before the Maccabæan age knows anything about him; that no one else shared his expectations; and that he, with all his patriotism, did not avail himself of the opportunity of returning to Pal.; and that Ben-Sirach, writing about B.C. 170, should entirely omit him from the worthies of Israel, and also write (Sir 49^{15}), 'Neither was there a man born like unto Joseph, a governor of his brethren, a stay of the people.' E. L. CURTIS.

DANIEL, THE BOOK OF, in the Heb. Canon, is placed among the Hagiographa, between Est and Ezr, but in the LXX, Vulg., and Eng. Bible as one of the four great prophets, immediately after Ezekiel. It falls into two divisions: chs. 1–6, the history of Daniel; chs. 7–12, visions and revelations given to Daniel. In the original, 2^{4b}–7^{28} is written in Aramaic instead of Hebrew. In literary character the Bk. of Dn is mainly an apocalypse, representing in visions under symbolical forms various historical epochs. The beginning of this kind of writing appears in Ezk and Zec; but Dn is far more complete and elaborate, and exercised a great influence upon subsequent Jewish and Christian literature.

i. AUTHORSHIP AND DATE.—The visions (chs. 7–12) are represented as given in the words of Dn (7^2 8^1 9^2 10^2), hence the inference that he wrote the entire book. This was the ancient Jewish opinion,[*] and the prevailing Christian one, until within recent years.[†] Now, however, it has generally been abandoned, and in its place are quite a variety of views all agreeing in this, that the book *in its present form* must be assigned to the age of Antiochus Epiphanes (B.C. 175–163); and there is a growing consensus of opinion that the book as a whole belongs to that period, for the following reasons:—

1. *Acquaintance with Ant. Epiphanes.*—Ch. 11 shows a clear acquaintance with minor events in his reign and in those of his predecessors. In the veiled form of a revelation of the future it gives an outline of history from the time of Cyrus to near the death of Antiochus.[‡] There are sketched the Persian period (v.^{2}), the rise and conquest of Alexander the Great (v.^{3}), the dismemberment of his empire (v.^{4}), and then principally the varying relations of the Ptolemaic and Seleucid dynasties to each other and of the latter to the Jews (vv.$^{5-39}$). Attention is called in succession to Ptolemy I. and Seleucus Nikator (v.^{5}), Ptolemy Philadelphus and Antiochus II. (v.^{6}), Ptolemy Euergetes (vv.$^{7-9}$), Antiochus the Great (vv.$^{10-19}$), Seleucus Philopator (v.^{20}), and Antiochus Epiphanes (vv.$^{21-45}$). While, from the obscurity of the history and the difficulty of determining the meaning of the Heb. text, some references are not perfectly plain, yet it is easy to point out definitely the accessions of these sovereigns, their alliances, intrigues, campaigns, victories, defeats, bestowment of gifts, treacheries, acts of violence, and frequently untimely deaths. The older commentators regarded these details as signal examples of divine prediction; but since such a revelation of the future is without analogy elsewhere in Scripture, and without any apparent moral or spiritual import, this chapter or insertions in it are now allowed, even by those who regard Daniel as the author of his visions or the rest of the book, to belong to the period of Antiochus Epiphanes.[*] Similar references elsewhere, however, seem to require these to be taken with their natural force, indicating the true date of the entire book, and not as later additions. In ch. 8 is a clear description of the conquests of Alexander (vv.$^{5-8.\ 21}$) and the division of his empire (vv.$^{8.\ 22}$), and of Antiochus Epiphanes (vv.$^{9-12.\ 23-25}$). These appear again, acc. to the most probable interpretation (see below), in ch. 7, the fourth beast representing Alexander's kingdom and its succession in the Seleucid dynasty (with which alone the writer here is concerned), culminating in Antiochus Epiphanes (vv.$^{8.\ 20-25}$). The descriptions are very exact. While the numbers of the kings, ten and three (v.^{24}), might be taken relatively or symbolically, yet the correspondence to the Seleucidæ is so precise that these kings seem evidently meant.[†] The eleventh corresponds exactly to Antiochus Epiphanes. Another clear reference to this sovereign seems also to appear in $9^{26f.}$.[‡] Thus throughout all these

---

[*] The Talm. statement (Baba bathra 15), that the men of the Great Synagogue 'wrote' Dn, does not necessarily imply the contrary or express the idea of a later editing: it may simply mean a 'recording' of the book.

[†] Porphyry, the Neo-Platonist († 303), wrote a treatise denying the genuineness of Daniel's prophecy. His views are known from the Commentary of Jerome, who refuted them. Porphyry had no followers in the Christian Church. The first systematic modern rejection of Daniel's authorship was by Corrodi in 1783 and 1792. He was followed by Bertholdt, Eichhorn, Gesenius, Bleek, De Wette, Ewald, *et al.*; while the genuineness was stoutly defended by Hengstenberg, Hävernick, Auberlen, Keil, Pusey, *et al.* Cf. for history of the criticism, Bleek's *Einleitung*; Zöckler's *Comm.* in the Lange Series, and Hengstenberg on *Genuineness of Daniel.*

[‡] Vv.$^{40-45}$ are perhaps an ideal description of events which the writer expected.

[*] Zöckler in Lange's *Bibelwerk*, 1869; C. H. H. Wright, *Introd. to OT*, 1890; Köhler, *Lehrbuch der Biblischen Gesch.* vol. ii. p. 545, 1893.

[†] We do not know, of course, just how the author reckoned these kings. Two main schemes have been suggested: (*a*) (Hitzig, Kuenen, Cornill, Bevan, *et al.*), (1) Alexander, (2) Seleucus I. Nikator, (3) Antiochus I. Soter, (4) Antiochus II. Theos, (5) Seleucus II. Callinicus, (6) Seleucus III. Ceraunus, (7) Antiochus the Great, (8) Seleucus IV. Philopator, (9) Heliodorus, (10) Demetrius I. Soter, or an unknown elder brother; (*b*) (Bertholdt Von Lengerke, Delitzsch, Meinhold, *et al.*), (1) Seleucus I. Nikator, (2)-(9)=(3)-(10) of (*a*) (10) Ptolemaus VI. Philometor. (8) (9) (10) of either (*a*) or (*b*) fulfil the conditions of the three kings put down (v.^{24}). Seleucus IV. Philopator was assassinated (the Jews may have thought by the connivance of Ant. Epiphanes). Heliodorus, who seized the government, was overthrown by Antiochus; Demetrius, the rightful heir, was thrust aside, and Ptolemy, who laid claim to it, was bitterly humbled. For Demetrius, who never became king, Kuenen, after Von Gutschmidt (*Kleine Schriften*, vol. ii. pp. 175–179), was inclined to place an elder brother who acc. to a fragment of John of Antioch was put to death by Antiochus.

[‡] Antiochus Epiphanes, to the Jewish mind, was the incarnation of wickedness, arrogance, and blasphemy (cf. 1 Mac $1^{10.\ 21}$ 2^{62}, 2 Mac $9^{7-10.\ 28}$), and every term mentioned in the above references in Dn is most appropriate to describe him and his career. The eyes ($7^{8.20}$) and 'understanding dark sentences' (8^{23}) indicate his vigilance and cunning; 'the look more stout than his fellows' and 'the fierce countenance' (7^{20} 8^{23}), the terror he inspired, and his cruelty; 'the mouth speaking great things' ($7^{8.\ 20}$ 11^{36}), his boastful arrogance, seen in the assumption of the title Epiphanes, 'the illustrious'—changed to Epimanes 'the mad' by his subjects,—and the title Theos, 'the god,' on some of his coins. His fearful persecution of the Jews and his suppression of their laws and sacred days are clearly indicated in 7^{25} 8^{24}. The following outline (abridged from *LOT* p. 461 f.) gives the leading events of his reign and the references to them in Dn:—

B.C.
176. Accession (1 Mac 1^{10}), Dn $7^{8.\ 11.\ 20}$ $8^{9.\ 23}$ 11^{21}.
175. Jason intriguing against Onias III. procures from Antiochus the high priesthood. Rise of Hellenizing party in Jerus. (1 Mac 1^{11-15}, 2 Mac 4^{7-22}).
172 [171]. Onias III. murdered (2 Mac 4^{32-35}), Dn 9^{26a} 11^{22b}.
171. 1st expedition of Antiochus against Egypt (1 Mac 1^{16-19}), Dn 11^{22-24}.
170. 2nd expedition against Egypt (1 Mac 1^{20}), Dn 11^{25-27}. Antiochus on his return plunders the temple and massacres many Jews (1 Mac 1^{21-28}, 2 Mac 5^{11-21}, Dn 8^{9b-10}, 11^{28}).
169. 3rd expedition against Egypt. Rom. legate Popilius Lænas obliges Antiochus to retire, Polyb. xxix. 1; Livy, xliv. 19, xlv. 12; Dn 11^{29-30a}.
169–8. Fresh measures against Jerusalem. City surprised on Sabbath day. Many inhabitants slain or captured and sold as slaves. Syrian garrison placed in citadel. God-fearing Jews flee. All practices of Jewish religion prohibited. Temple worship suspended, and, on 15 Chislev, B.C. 168, 'the abomination of desolation' (a small heathen altar erected on the altar of burnt-offering). Books of the law burnt, and women who had their children circumcised put to death (1 Mac 1^{29-64}, 2 Mac 6–7, Dn $7^{21.\ 24b.\ 25}$ $8^{11f.\ 13b.\ 24.\ 25}$ $9^{26b.\ 27a}$ $11^{30b-32a}$ (renegade Jews) $^{32b-35}$ (the faithful) $^{36-39}$ $12^{1.\ 7.\ 11}$).
167. Revolt of the Maccabees (1 Mac 2), Dn 11^{34} (the little help).
165. After victories by the Maccabees (1 Mac 4^{28-35}), temple puri-

chapters there are indications of the same kind of knowledge of Antiochus and of previous history as in ch. 11. Antiochus and his persecution of the Jews and defilement of their sanctuary seem ever present before the writer (cf. 1 Mac 1). When, however, he touches upon a subsequent period he gives nothing which need be interpreted as referring to specific historical events, but only symbolizes the general Messianic hope of Israel ($2^{44\text{f.}}$ 7^{27} $12^{1\text{ff.}}$). Hence the conclusion that chs. 7–12 belong to the age of Antiochus Epiphanes appears warranted, and then also chs. 1–6 if by the same author.

Unity of Authorship has been the prevailing view among scholars of all schools.* That chs. 1–6 belong to one author is evident. Ch. 1 is a necessary introduction to the others. Without it $2^{14\text{ff.}}$ and 2^{49} would be unintelligible, and 3^{12} requires 2^{49}; and $5^{10\text{ff.}}$ require chs. 2 and 4. Ch. 6 is closely connected with the preceding ones. The visions (chs. 7–12) require an account of D.'s personality and life, and the unity of the two sections is seen from the fact that the substance of the dream of the composite image (ch. 2) is repeated in the vision of the four beasts (ch. 7), and that 'they shall mingle themselves with the seed of men' (2^{43}) is evidently a reference to the unhappy marriages of the Ptolemies and Seleucidæ ($11^{6.\ 17}$). The homiletical or didactic purpose of each section is also the same.†

2. *Historical Statements*. Daniel, according to 1^{1}, began his career as a youthful student at the Bab. court in the 3rd year of Jehoiakim, and lived at least until the 3rd year of Cyrus, *i.e.* from 606 or 605 to 536 or 535 B.C. Within this period are mentioned as kings of Babylon, Nebuchadnezzar (2^{1}), Belshazzar ($5^{1.\ 30}$), Darius the Mede (5^{31} $6^{25.\ 28}$), and Cyrus (6^{28}). Events are dated by the years of these kings (2^{1} 7^{1} 8^{1} 9^{1} 10^{1}), showing that the writer must have regarded all of them as reigning sovereigns, and not in any way as subordinate rulers. Belshazzar is further described as the son of Nebuchadnezzar ($5^{11.\ 18}$) and king of Babylon at its capture by the Medes and Persians, when (acc. to $5^{30\text{f.}}$) he was slain and Darius received the kingdom. But history knows nothing of a Babylonian king Darius the Mede preceding Cyrus. The reigning monarchs within this period were Nebuchadnezzar, Evil-Merodach, Neriglissar, Nabunahid, and Cyrus. No Darius reigned in Babylon until a score of years later. The person whom Belshazzar represents was undoubtedly Bîl-sar-usur, son of Nabunahid and commander of the Babylonian army during the last years of his father's reign (*COT* ii. p. 130 f.). Being more active and energetic than his father, he seems to have supplanted him in tradition as sovereign. In reality, however, he was never king. This is proved by the long series of contract tablets, 'which, dated month by month and almost day by day from the reign of Nebuchadnezzar to that of Xerxes,' make no mention of an intermediate ruler between Nabunahid and Cyrus (Sayce, *HCM* p. 528). Belshazzar also was not a son of Nebuchadnezzar even by descent, for his father, Nabunahid, belonged to a different family.* In introducing Darius the Mede the writer shows the same confused idea of the order of events as the Greek writers.† Cyrus, we now know from the cuneiform inscriptions, obtained possession of Babylon peaceably. During the reign of Darius (B.C. 521–486) Babylon rebelled, and Darius was obliged to besiege the city, and took it by stratagem. In the tradition followed by Herodotus this siege is transferred to Cyrus (Her. i. 191). In Dn both the king and the siege seem to have been transferred to the earlier period.‡

A further confusion about Darius appears in 9^{1}, where he is called the son of Ahasuerus or Xerxes. Darius I. was the father of Xerxes.

Another apparently inaccurate statement is that of Nebuchadnezzar's siege and capture of Jerus. in the 3rd year of Jehoiakim, B.C. 605 (Dn 1^{1}). The historical books relate no such event, and that it did not happen seems implied in Jer $25^{1\text{-}9}$, and necessary from the movements of Nebuchadnezzar. Shortly after the battle of Carchemish (605) he returned to Babylon to secure his accession to the throne. The conquest of the West occupied four years more, since not until 601 or 600 did Jehoiakim begin to pay tribute (Tiele, *Bab. und Assyr. Gesch.* p. 425 f.).§

A class of wise men or magicians are called Chaldæans ($2^{2.\ 4.\ 10}$ 4^{7} $5^{7.\ 11}$). 'This signification is foreign to Assyrian and Babylonian usage, and did not arise till after the fall of the Babylonian empire' (*COT* ii. p. 125). These Chaldæans are also represented as addressing Nebuchadnezzar in Aramaic (2^{4}), which probably was not spoken then at the Bab. court, and, in no case, in the western Aramaic dialect which the writer gives.‖

In 9^{2} D. is said to have 'understood by the books the number of the years whereof the word of the Lord came to Jeremiah the prophet.' This expression

---

fied and public worship re-established just *three years* after its desecration (1 Mac $4^{36\text{-}61}$), Dn $8^{14\text{b}}$.

164 [163]. Antiochus dies somewhat suddenly in Persia (1 Mac $6^{1\text{-}16}$, but see also Polyb. xxxi. 11), Dn $7^{11.\ 26}$ $8^{14\text{b}.\ 25\ \text{end}}$ $9^{26\text{b}.\ 27\text{b}}$ $11^{45\text{b}}$.

(The explanation of $11^{22\text{-}24}$ is uncertain, for we do not know whether they refer to an Egyp. campaign or to conduct in Assyria. On Antiochus the student should consult J. F. Hoffmann, *Ant. Epiph.*, Leipzig, 1873.)

* That of Gesenius, De Wette, Bleek, Cornill, Kuenen, Driver, König, *et al.*, as well as Hävernick, Hengstenberg, Keil, Pusey, Fuller, *et al.* Diversity of authorship has, however, been held, both by those holding the late authorship and by those regarding chs. 7–12 as genuine. Of the former, Bertholdt thought the book to have been written by nine authors. Strack and Meinhold regard $2^{4\text{b}}$–6 as by an earlier writer, about B.C. 300. Of the latter, Sir Isaac Newton thought Daniel wrote only chs. 6–12. Köhler (*Lehrbuch der biblischen Geschichte*, ii. p. 537, 1893) holds that chs. 1–6 were written some time after the reign of Cyrus by the editor of chs. 7–12.

† No reason is clearly perceptible why the book is partly written in Heb. and partly in Aramaic. The following have been suggested: (1) Diversity of origin (Strack, Meinhold, see fn. above); (2) portion of the original Heb. lost and replaced by the Aram. translation (Lenormant, Bevan, Haupt); (3) the Aram. language a secret sign that the Chaldæans represented the Syrians, *i.e.* Antiochus and his followers (mentioned by König, *Einleit.* p. 382); (4) author preferred to give the speeches of the heathen in Aram. rather than in the sacred Heb., and being more at home in that language continued to use it (Behrmann).

* The remote possibility that B. was a grandson of N. on his mother's side has been urged as an explanation of the author's statements. This, however, is highly improbable, and an unnatural interpretation (cf. Bar $1^{11\text{f.}}$).

† They have given four different accounts of the origin of Cyrus and his relation to the last king of Media, no one of which is entirely correct (art. 'Cyrus,' *Ency. Brit.* 9th ed.).

‡ Ch. 5 implies no peaceable surrender of Babylon, but its capture by assault or stratagem. That Darius should be called a Mede may have arisen from Is 13^{17}, Jer $51^{11.\ 28}$, where it is predicted that the Medes will conquer Babylon. The Medes also were allies of Cyrus, and Gobryas, to whom the city surrendered, and whom Cyrus placed in command, was governor of 'Gutium,' a Median province (*Beiträge z. Assyriologie*, Delitzsch and Haupt, vol. ii. p. 223). The older commentators generally saw in Darius, Cyaxares II. of Xenophon's *Cyropædia*. This probably was the view of Jos. (*Ant.* x. xi. 4). But the *Cyropædia* is a romance, and modern hist. investigation has failed to find a place for this king. The story of festivities at the time of the fall of Babylon is given in Herodotus, i. 193. The cuneiform tablets mention a religious festival in connexion with the account of the capture of Babylon, but earlier than the entrance of Cyrus or Gobryas into the city.

§ The writer perhaps drew his statement from a combination of 2 K $24^{1\text{f.}}$ and 2 Ch 36^{6}, misunderstanding the three years in Kings and reckoning them from the beginning of Jehoiakim's reign. Or by reckoning backward he may have regarded the 3rd year of Jehoiakim as the beginning of the 70 years of captivity. That the author of Dn, both here and elsewhere, does not seem to have rightly apprehended or presented recorded facts of OT history, is no more surprising than the similar variations between the statements of Kings and Ch, and esp. the departures in NT from the Heb. text. Cf. Gn 11^{31} $12^{1.\ 4}$ (Haran) with Ac 7^{2} (Ur), Dt 10^{22} (70 souls) with Ac 7^{14} (75), Gn 23 (Ephron in Hebron) with Ac 7^{16} (Hamor in Shechem), Ex 12^{40} (430 years in Egypt) with Gal 3^{19} (430 years in Canaan and Egypt).

‖ The word ארמית = 'in Aramaic' (v.^{4} RVm), may be a gloss. So Lenormant, Bevan, Kautzsch-Marti, P. Haupt (*Bk. of Dn.*, Crit. Heb. Text, p. 16), *et al.*

implies that the prophecies of Jer. belonged to a well-known collection of sacred books, and suggests (this is the prevailing interpretation) the second division of the Heb. Canon, which was formed a century or more after the Exile. See art. CANON.

Thus the Bk. of Dn contains a series of historical statements which imply a misconception of the exilic period, and that their author lived considerably later, and may well have written during the reign of Antiochus Epiphanes.

3. *The Language* of Dn points likewise in the same direction.* The Heb. is distinguished from that of the exilic Ezk and the immediately following Hag and Zec, and resembles more nearly that of 1 and 2 Ch written about B.C. 300, and certainly does not belong to an earlier period. The Aram. also, as far as can be determined, is of the same late date. Persian words appear in both sections, some in connexion with the description of Bab. institutions before the conquest of Cyrus (see list, *LOT* p. 469). This indicates a period long enough after that conquest for Persian words to have become a part of the Jewish language. Three Gr. words, the names of musical instruments (קיתרס, *κίθαρις*, flute; פסנתרין, *ψαλτήριον*, psaltery; and סומפניה, *συμφωνία*, dulcimer or bagpipe, $3^{5.\,7.\,10.\,15}$), also occur. One of these, *συμφωνία*, as the name of a musical instrument, is peculiar to late Gr., and according to Polybius was a favourite instrument with Antiochus Epiphanes (Bevan, p. 41). This evidence brings the composition of Dn to a date at least later than the conquest of Alexander, unless the supposition be made that the Gr. musical instruments had at an earlier period through channels of trade found their way into the East, and their names become domesticated in the Aram. language. This, however, is unlikely.†

4. *The Doctrines* of Dn with respect to angels and the resurrection are the most developed in the OT. Angels have special personal names (8^{16} 9^{21} $10^{13.\,21}$ 12^{1}), special ranks ($10^{13.\,20}$ 12^{1}), and the guardianship of different countries ($10^{13.\,20.\,21}$). These representations go far beyond those of Ezk and Zec, and are relatively identical with those of Tobit and other Jewish writings of the 1st cent. B.C. Dn plainly teaches a personal resurrection both of the righteous and the wicked (12^{2}). This also is a decided advance upon the doctrine elsewhere in OT, and is mentioned by later Jewish tradition in connexion with the Maccabees (cf. 2 Mac $12^{43ff.}$). Thus, while the determination of the date of an OT writing from its religious doctrines is always a delicate procedure, yet, as far as a doctrinal development can be found in OT, the Bk. of Dn comes after all the other OT writings, and approximates most closely to the Jewish literature of the 1st cent. B.C.

5. *The Homiletical Purpose* of the Bk. of Dn is most agreeable to the Antiochian period. The narratives in chs. 1. 3. 6 are exhortations to keep the Jewish law and to remain faithful to the worship of J". While such teaching might be appropriate at all times, it was esp. so then in its peculiar form. The question of eating meat was at that time a test of faith. Then pious Jews 'chose to die that they might not be defiled with food, and that they might not profane the covenant' (1 Mac $1^{62f.}$). The lessons of the 'fiery furnace' and the 'lions' den,' chs. 3 and 6, never could have been more fitly presented than when 'came there forth out of Isr. transgressors of the law, and persuaded many, saying, Let us go and make a covenant with the nations that are round about us' (1 Mac 1^{11}), and when Antiochus commanded the worship of foreign deities on pain of death (1 Mac $1^{41\text{-}50}$). The stories of the humbling of Nebuch. (ch. 4) and the fall of Belshazzar (ch. 5) would also be fraught with particular consolation when Israel was oppressed by the heathen. The visions (chs. 7–12), whatever view is taken of their date, are universally acknowledged to have been primarily designed for consolation during the reign of Antiochus Epiphanes.

6. *The External History* of the Bk. of Dn likewise favours its composition at the time of Antiochus. There is no evidence in any OT or Apocr. writing of its earlier existence. The testimony of Josephus, written near the close of the 1st cent. A.D., that the book was shown to Alexander the Great (*Ant.* XI. viii. 5), prob. represents only a Jewish legend, and historically is of no decisive value. The earliest possible reference is in the Sibylline Verses, iii. 388 ff. (about B.C. 140), where there may be an allusion to Antiochus Epiphanes and the ten horns (Dn $7^{7.\,20.\,24}$; Schürer, *HJP* div. ii. vol. iii. p. 280). The next reference is 1 Mac $2^{50f.}$ where Matthias is reported in his dying exhortation to have said 'that Hananiah, Azariah, and Mishael believed and were saved out of the flame. Daniel for his innocency was delivered from the mouth of lions.' While this might simply indicate a knowledge of these stories, it is probable that the author of 1 Mac (about B.C. 100), who evidently composed the speech of Matthias, was acquainted with our book. From this period on there are abundant evidences of its being well known. Its influence is very appreciable in NT, esp. in Rev, but it is only once directly mentioned (Mt 24^{15}).*

The place of the Bk. of Dn among the Hagiographa favours also its late composition. If it had been written during the Exile, notwithstanding its apocalyptic character, it naturally would have been placed among the Prophets.

The Conclusion, then, in favour of the Maccabæan date, in view of this accumulation of concurrent facts, seems abundantly warranted. The exact date of composition is usually placed within the year B.C. 165. The 'abomination of desolation,' 168, is clearly before the writer, and also the Maccabæan uprising in 167, but not the re-dedication of the temple in Dec. 165, and the death of Antiochus in 163.

The great difficulty, of course, in assigning the Bk. of Dn to the late date is the fact that chs. 7–12 are represented as revelations of the future given to Daniel during the Exile. But this difficulty vanishes the moment one considers how prevailing in OT and among Jewish writers was the custom of representing present messages as given in the past through ancient worthies. Thus the law of Deut. is given as though spoken by Moses in the land of Moab, and the legislation of P as though revealed to Moses in the wilderness. The Bk. of Eccles. is written as the experience of Solomon. While in 2 Es, Bar, the Bk. of Enoch, and the Jewish Apocalypses generally, this method of composition is abundantly illustrated, and was evidently a favourite one with the devout and pious of the centuries immediately preceding and following Christ.

Assigning the entire book to the Maccabæan period, destroys, it is true, the hist. reliability of chs. 1–6. These chapters must be regarded as a species of the later Jewish Haggada, or method of inculcating moral and spiritual lessons by tales of the imagination. Here, again, we meet with striking parallels in the OT Bk. of Jonah and in the Apocr. stories of Tobit and Judith. A *quasi* defence of chs. 1–6 is frequently made on the ground that the writer used authentic written material of the Exile which he revised. This, of course, is possible, but it is a mere hypothesis, and it is more probable that his material was only traditions or tales.[*]

---

* Delitzsch, art. 'Daniel,' *PRE* (1878), Driver, *LOT* pp. 469–476 (1891); König, *Einleit.* § 80 (1893); Bevan, *Com.* pp. 26–42 (1892); Behrmann, *Komm.* pp. i–x (1894).

† Additional evidence in language appears also in the proper names Nebuchadnezzar 1^{1}, Belteshazzar 1^{7}, and Abed-Nego 1^{7}, since their spelling and formation show a lack of acquaintance with the language and gods of Babylon during the Exile (*COT* ii. $12^{4ff.}$; Sayce, *HCM* p. 532).

* This passage, like other similar NT ones, reflects the Jewish opinion of the 1st cent. A.D., but has no further weight in deciding the question of authorship. Christ or the writer of the Gospel naturally expressed himself according to this opinion, for we have no reason to believe that the Divine Spirit ever led either of them to instruct or correct their contemporaries on questions of literary and historical criticism.

The view which has been presented of the Bk. of Dn doubtless will appear to some to destroy its religious value and render it unworthy of a place within the sacred Canon. No one, however, under the modern view can read the book without being taught lessons of sublime faith, and having a firmer assurance of the ultimate triumph of the kingdom of God. The book has in the past been blessed as an instrument of the Holy Spirit for the strengthening of the Church, and, interpreted in the light of its real origin, this will continue and be enhanced. Great difficulties in receiving its lessons will be removed, and the Church will be spared endless profitless discussion and exegesis necessitated by the old view.[†]

ii. THE INTERPRETATION.—The Bk. of Dn contains three representations of the world's history more or less closely related to each other, which, with their interpretations, may be outlined as follows:—

	Ch. 2	Ch. 7	Ch. 8	
A.	Golden head	=The lion		=Babylonian Empire.
	Silver breast	=The bear	=The ram	=Medo-Persian ,,
	Brazen belly and thighs	=The leopard	=The he-goat	=Grecian ,,
	Iron legs and iron and clay feet	=The fourth beast		=Roman ,,

	Ch. 2	Ch. 7	Ch. 8	
B.	Golden head	=The lion		=Babylonian Empire
	Silver breast	=The bear	=The ram	=Medo-Persian ,,
	Brazen belly and thighs	=The leopard	=The he-goat	=Macedonian ,,
	Iron legs and iron and clay feet	=The fourth beast		=Syrian ,,

	Ch. 2	Ch. 7	Ch. 8	
C.	Golden head	=The lion		=Babylonian Empire.
	Silver breast	=The bear	=The ram	=Median ,,
	Brazen belly and thighs	=The leopard		=Persian ,,
	Iron legs and iron and clay feet	=The fourth beast	=The he-goat	=Grecian ,,

The parallelism between the composite image (ch. 2) and the four beasts (ch. 7) shows that they were designed to represent the same world-powers. In this interpreters are generally agreed. The historic fact that after the fall of the Bab. kingdom there was no distinct Median kingdom, but Media was united to Persia, naturally gave the interpretation of Medo-Persian to the silver breast and the bear, and such a united kingdom appeared in the two-horned ram of ch. 8. The brazen belly and thighs and the leopard then well symbolized the Grecian kingdom of Alexander and his successors, who acc. to ch. 8 were represented by the he-goat. While the legs of iron and feet of iron and clay and the fourth beast with the ten horns, in connexion with which appeared the final everlasting kingdom (2^{44} 7^{27}), would represent the Roman Empire in whose days the Christ appeared. Elsewhere, both in OT and NT, there were indications of great wars and distress, and even an Antichrist to precede the final consummation of the kingdom of J″. Hence the interpretation A was most plausible, and became almost universal in the early Jewish and the Christian Church.[*]

The prevailing modern interpretation is C (B has had few advocates). The reasons for the adoption of C are as follows: Whatever may have been the facts of history, the author does distinguish between the Median and Persian kingdoms. After the Babylonian he places the Median represented in the reign of Darius ($5^{30f.}$ 6^{1} 9^{1}), who has the position of an independent and absolute sovereign, and then follows the reign of Cyrus the Persian (6^{28} 10^{1}). A Medo-Persian kingdom could scarcely have been designated by the writer as *inferior* to Nebuchadnezzar or the Babylonian (2^{39}), while this would aptly describe the short-lived Median of his scheme. This kingdom seems also well represented in the bear (7^{5}). The kingdom of brass which shall rule over all the earth (2^{39}), or the leopard to which dominion was given (7^{6}), with its four wings representing rapid and successive conquests, and with its four heads (corresponding to the four kings of 11^{2}), symbolizes particularly well the Persian kingdom which advanced so widely and rapidly under Cyrus and Cambyses, and whose dominion was so great under Darius I. and his successors. It must also be noted that the two horns of 8^{3}, one of which comes up last, which are interpreted as the kings of Media and Persia (8^{20}), can as well represent two successive kingdoms, the power of one of which entered into the other, as one consolidated empire. The fourth kingdom of the image, which shall be strong as iron and break in pieces and crush (2^{40}), and the beast terrible and powerful with great iron teeth, that devoured and brake in pieces and stamped the residue with his feet (7^{7}), seem identical with the he-goat of furious power (8^{5-7}) interpreted as Alexander (8^{21}). The feet, part of clay and part of iron (2^{42}), represent well the successors of Alexander, often ‘externally allied but inwardly disunited’; and the ten toes (2^{42}) seem to be reproduced in the ten horns, which fitly represent the Seleucidæ (see footnote, p. 552). The mingling of the seed seems to refer to the futile endeavours of the Ptolemies and Seleucidæ to form stable alliances by marriages (cf. $11^{6.\,17\,?}$). *But the clear description of Antiochus Epiphanes in the little horn* ($7^{8.\,20.\,24\text{f.}}$) *is decisive for the modern interpretation.* The introduction of the Messianic kingdom immediately in connexion with or following events of the author's own time, is fully in accord with other OT representations. Isaiah places the advent of the Messianic king in immediate connexion with a deliverance from Assyr. oppression (Is 8^{16}–9^{7} 10^{33}–$11^{1\text{ff.}}$), likewise Micah (5^{4-6}); and Deutero-Isaiah blends in one picture the release and restoration from Bab. captivity, and the final consummation of the divine purposes for Israel. The same principle is illustrated in Christ's eschatological discourse in Mt 24.

---

[*] An argument often repeated rests on the assertion that the whole colouring and character of the book are Oriental and esp. Babylonian, impossible to an age so unfamiliar with them as the Maccabæan, and reference is made to the colossal image, the fiery furnace, the martyr-like boldness of the three confessors, the decree of Darius, the lions' den, the dreams of Nebuch., and his demands of the Chaldæans, etc. (Fuller, art. 'Daniel,' Smith, *DB*²). Such a view had the countenance and authority of Lenormant (*La Divination*, pp. 169–267). The truth is, however, that the Bk. of Dn contains no allusions to Bab. customs which might not have been known to a Jewish writer of the 2nd cent. B.C. (who even might have visited Babylon), or have been preserved in the tales from which he drew his material; while, on the other hand, there are the statements already given which seem to prove the author's real lack of acquaintance with Babylon during the Exile. In addition to these may be mentioned the statement of Daniel's appointment as 'chief governor over all the wise men of Babylon' (2^{48}). This, owing to the exclusiveness of Bab. sacred caste, even Lenormant regarded as impossible, and hence held the words 'all the wise men' to be an interpolation. Indeed, Lenormant's or any similar theory of the composition of the book (*i.e.* an early work thoroughly revised in the Greek period) is worthless for a defence either of the truth of its narrative or of its genuineness, because the line of separation between the early and late contents cannot be determined. The account of Nebuchadnezzar's insanity (ch. 4) has been thought to receive confirmation by a story given in a fragment of the historian Abydenus (preserved in Eusebius, *Præp. Evang.* ix. 41). The story relates that Nebuch. on the roof of his palace was inspired by some god or other, and announced the future calamities of Babylon and then suddenly vanished. In this announcement there is a wish that the author of these calamities might be driven into the desert where the wild beasts seek their food, and wander among the mountains and rocks alone. The similarity between this and the biblical narrative is not very great, and yet enough perhaps to show that the same story originally was the basis of each (Bevan, p. 87 ff.; Schrader, *JPT*, 1881, pp. 618–629).

[†] The following from Farrar is worthy of quotation in this connexion: 'Though I am compelled to regard the Bk. of Dn as a work which in its present form first saw the light in the days of Antiochus Epiphanes, and though I believe that its six magnificent opening chapters were never meant to be regarded in any other light than that of moral and religious *Haggadoth*, yet no words of mine can exaggerate the value which I attach to this part of our Canonical Scriptures. The book, as we shall see, has exercised a powerful influence over Christian conduct and Christian thought. Its right to a place in the Canon is undisputed and indisputable, and there is scarcely a single book of the OT which can be more richly profitable for teaching, for reproof, for correction, for instruction in righteousness, that the man of God may be complete, completely furnished to every good work. Such religious lessons . . are not in the slightest degree impaired by those results of archæological discovery and criticism which are almost universally accepted by the scholars of the Continent and many of our chief English critics. Finally unfavourable to authenticity, they are yet in no way derogatory to the preciousness of this OT Apocalypse' (*Bk. of Dan.* p. 3 f.).

[*] Indeed it is difficult to see how a different interpretation could have been given according to the prevailing exegesis which ignored the original historical situation and meaning of OT prophecies, and sought some fulfilment agreeable to the actual history or expected future of the Church. Christ had applied to His second coming the words of Dn 7^{13} (Mk 13^{26} 14^{62}), hence His parousia was regarded as preceded by the little horn of v.^{8}, which thus became the Antichrist. Many commentators sought hist. kingdoms to represent the 10 horns, and since the Reformation the papal power has very often been regarded as the Antichrist. The numbers three, four, and ten have also been freq. interpreted symbolically (so Briggs, *Mess. Proph.* § 105).

Corresponding with the interpretations of the four beasts are those of ‘one like unto a son of man’ ($7^{13\text{f.}}$). The prevailing Christian and Jewish interpretation has referred these words to the Messiah. In favour of this view is their application by Christ to Himself (Mt 26^{64}, Mk 14^{62}, Lk 22^{69}, cf. Mk 13^{26}, Lk 21^{27}, Mt 16^{28}, Lk 12^{40} 18^{8}, Rev 14^{14} *et al.*), and the repeated designation of Christ in NT by the term ‘the Son of Man.’ The Bk. of Enoch applies the same expression to the Messiah (46^{1-6} 48^{1-3} 62^{5-9} 69^{26-29}),[*] and this is the general exposition of our passage by the Jewish Rabbins, also in the Talm. (*Sanh.* p. 98, col. 1). A growing modern view, however, finds in 7^{13} a symbolization of the kingdom of Israel, and this probably was the intention of the writer. The expression ‘son of man’ (Aram. בַּר אֱנָשׁ = Heb. בֶּן־אָדָם) acc. to a common Heb. idiom is synonymous for man or one of mankind (cf. Ps 8^{4}, Ezk 2^{1} $3^{1.\,4.\,10.\,17}$ *et al.*), and stands here evidently for one in human form representing Israel, in contrast with the beasts symbolizing the heathen powers. A striking parallel occurs in Ps 80, where in v.^{17} ‘son of man’ symbolizes Israel, and ‘the boar’ v.^{13} the heathen. The interpretation in v.^{27} seems also decisive for this view. The kingdom is given to ‘the people of the saints of the Most High; his (the people's) kingdom is an everlasting kingdom, and all dominions shall serve and obey him (the people).’ Again, no other possible similar Messianic allusion appears elsewhere in Daniel. The ‘coming with the clouds of the heaven’ is in evident contrast to the heathen kingdoms ‘rising out of the sea’ (7^{3}). The latter appearance is fig., indicating earthly origin; the former indicates then, by parallelism, a source in the special power of God, just as the stone cut out of the mountain without hands ($2^{34.\,45}$) stands in contrast to the image, an evidently human or earthly product. That later writers, esp. those of the NT, should find in this passage a direct allusion to the Messiah, is in exact accord with their interpretation of other OT figures which primarily denote mankind or Israel (cf. Ps $8^{4\text{ff.}}$ and He 2^{6-9}, Hos 11^{1} and Mt 2^{15}, Gn 12^{7} and Gal 3^{16} *et al.*).

iii. The ‘Times’ of Daniel (7^{25} 8^{14} 9^{24-27} $12^{11.\,12}$) are difficult of interpretation. They are mainly an endeavour under the Antiochian persecution to answer the anxious thought and piercing cry, ‘Lord, how long? When wilt Thou restore the kingdom to Israel? When will the Messianic hope be realized?’ They express the thought that the time of the fulfilment of the divine promise is very near at hand. The glorious assurances of Is 40–66 had never been realized. The Jews, in their pitiful poverty and national smallness, and above all in this hour of persecution, seemed still in their captivity, still within the period of the seventy years mentioned by Jeremiah (Jer 29^{10}), and an explanation of their duration and the announcement of their end is the evident endeavour of our author in 9^{24-27}.

Of the weeks subdivided into 7 + 62 + 1 (9^{25-27}), as in the case of the image (ch. 2), and the four beasts (ch. 7), there are two main interpretations differing generally according to the view taken of the Bk. of Dn as a whole, or esp. according to the historical and prophetic references in (*a*) ‘the anointed one, the prince’ (^{25}), (*b*) ‘the anointed one cut off’ ($^{26\text{a}}$), (*c*) the destruction ($^{26\text{b}}$), (*d*) the maker of the covenant ($^{27\text{a}}$), (*e*) the desolation ($^{27\text{b}}$). The prevailing view in the past in the Christian Church has seen in (*a*) (*b*) and (*d*) the Messiah, and in (*c*) and (*e*) the destruction of Jerus. by Titus, 70 A.D. The view received at present, agreeably to the Maccabæan date of Dn, refers (*a*) to Cyrus (cf. Is 45^{1}), (*b*) to Onias III. (2 Mac 4^{34}), (*d*) to Antiochus Epiphanes, (*c*) and (*e*) to the havoc and desolation wrought by Antiochus at Jerusalem. In the case of both interpretations a week has usually been held to represent seven years, but a difficulty has always been experienced in fixing the termini, and the various solutions proposed for adjusting the 49 + 434 + 7 years have been almost endless. The more prevailing one, in the old view, places the advent of Christ at the end of 69 weeks (v.^{25} AV and RVm), and refers the commandment to the decree of the 7th year of Artaxerxes, B.C. 457 or 458 (cf. Ezr 7^{6-26}), and then 483 yrs. later is A.D. 25 or 26, the date usually assigned for Christ's baptism, which, from His anointing with the Holy Spirit, might represent His proper Messianic advent (Pusey, *Lect. IV.*). This view and all other similar ones presented by those holding the genuineness of the Bk. of Dn contain their own refutation, for the *termini a quo* must be later than the period of the prophet, who would have died many years at the latest before the commencement of the 490 years or the 70 weeks B.C., and such a date could not have been taken as the basis of his reckoning, unless the history of Israel after his death had been revealed to him in detail.

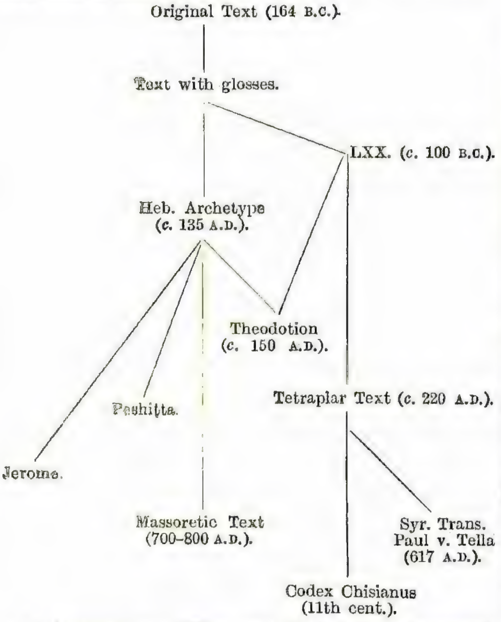
Under the other view the natural interpretation would be as follows: To the decree of Cyrus seven weeks (v.^{25}), *i.e.* 586 − 49 = 537. From this decree the city stands rebuilt during 62 weeks of 434 years, but after this period (v.^{26}) the anointed priest Onias III. shall be cut off in B.C. 171 (*i.e.* 537 − 434 = 103. This should be 171; see below). During the next seven years, the last week (v.$^{26\text{bf.}}$), occur the havoc and ruin wrought by Antiochus. The sacrifice ceased, and the heathen altar was set up in the sanctuary. The latter event was in Dec. 168 (1 Mac 1^{54}); but the former, with the terrible ruin and slaughter (1 Mac 1$^{29-40}$), occurred probably some months earlier. The temple was re-dedicated in Dec. 165 (1 Mac 4^{52}). These three years and some months represent the half week of the ceasing of the oblation, mentioned in the time, times, and half a time (7^{25}), in the 2300 evenings and mornings (8^{14}), *i.e.* 1150 days, and in the 1290 days (12^{11}) and the 1335 days (12^{12}). The representations, of course, are not exact, *i.e.* the number of days exceed in each instance 3½ years, or half a week. Did we know all the circumstances of the times, we might see a clear solution, or possibly the author designed an enigmatic surplus or remainder to be interpreted only through the future course of events, even as he had endeavoured to interpret the 70 weeks.

---

[*] The references given from the Bk. of Enoch are by some regarded as belonging to a Christian addition to the original Jewish work (see art. Enoch, Book of).

In the above interpretation the actual period between the decree of Cyrus and the death of Onias is shorter than the 62 weeks, *i.e.* 366 years instead of 434. This probably has arisen from the defective chronology of the writer. He placed the reign of Cyrus too early * (Bevan, Cornill, Schürer). Owing to the great difficulty of finding any consistent explanation of the 'times' of Dn, many writers have regarded the numbers as entirely symbolical.

iv. VERSIONS.—The LXX text of Dn has been preserved only in one MS, Codex Chisianus, which cannot be older than the 9th cent., and is perhaps much later (Bevan). In place of the LXX the Greek VS of Theodotion was used (even by Irenæus, † 202). There is no Targ. on Daniel. The following diagram (from Behrmann, p. xxx) shows tentatively the relation of the VSS to the original text and to each other :—



Original Text (164 B.C.).
Text with glosses.
LXX. (c. 100 B.C.).
Heb. Archetype (c. 135 A.D.).
Theodotion (c. 150 A.D.).
Tetraplar Text (c. 220 A.D.).
Peshitta.
Jerome.
Massoretic Text (700–800 A.D.).
Syr. Trans. Paul v. Tella (617 A.D.).
Codex Chisianus (11th cent.).

v. ADDITIONS.—There are three Apocr. additions to Dn : (1) The Song of the Three Children, preceded by the Prayer of Azarias, in LXX and Vulg. at 3$^{24-90}$; (2) The Story of Susanna, in Vulg. ch. 13, in LXX a separate book (?) ; (3) The Story of Bel and the Dragon, in Vulg. ch. 14, in LXX a separate book (?). (See sep. artt.)

LITERATURE.—The literature on Daniel is exceedingly voluminous. 'On no other book' (says C. H. H. Wright) 'has so much worthless matter been written in the shape of exegesis.' The most important *Commentaries* are those of Bertholdt, 1806–8 ; Von Lengerke, 1835 ; Hävernick, 1832 ; Hitzig (*Kgf. Hndb.*), 1850 ; Stuart, 1850 ; Ewald (*Proph. d. AB*), 1867, Eng. tr., 1881 ; Keil, 1869, Eng. tr., 1872 ; Zöckler (Lange's *Bibelwerk*), 1870, Eng. tr. and add. by Strong, 1875 ; Fuller (*Speaker's Com.*), 1876 ; Meinhold (*Kgf. Kom.*), 1889 ; Bevan, 1892 ; Behrmann (*Hand-Kom.*), 1894 ; Farrar (*Expositor's Bible*), 1895.

Special Treatises and Articles.—Hengstenberg, *Beiträge*, 1831, Eng. tr., 1848 ; Tregelles, *Defence of Authenticity*, 1852 ; Auberlen, *Der Prophet Daniel und Offenbarung Johannes*, 1854–57, Eng. tr., 1857 ; Pusey, *Dan. the Prophet*, 1864, 3rd ed. 1869 ; Fuller, *Essay on the Authenticity of Daniel*, 1864 ; Lenormant, *La Divination chez les Chald.* (pp. 169–236), 1875 ; Cornill, 'Die Siebzig Jahrwochen Daniels,' in *Theol. Stud. u. Skizzen*, 1889 ; Schrader, 'Die Sage vom Wahnsinn Nebuch.' *JPT*, 1881 ; Kamphausen, 'Das Buch Daniel,' in *Neu. Geschichtsforschung*, 1893 ; Margoliouth in *Expos.* Apr. 1890 ; Fuller in *Expos.* 3rd series, vols. i. and ii. ; Sayce, *HCM* (pp. 495–537), 1893 ; Terry, *Proph. of Dan. Expounded*, 1893 ; C. Bruston, *Études sur Dan. et l'Apoc.* 1896.

In add. to these works, the student will find valuable material on Dn in Kamphausen's *Daniel* in Haupt's *OT*, in the *OT Introductions* of Cornill, Driver, König, Strack, *et al.*, and the *OT Theologies* of Dillmann, Schultz, Smend, *et al.*, and the *Messianic* or *OT Prophecies* of Briggs, Delitzsch, Hofmann (*Weissagung u. Erfüllung*), Orelli, Riehm, *et al.*, and in the *Histories of Israel* or *the Jews* of Ewald, Grätz, Köhler, Kittel, Stade, Schürer, *et al.* See also art. APOCRYPHA. E. L. CURTIS.

DAN-JAAN.—Joab and his officers in taking the census came 'to Dan-jaan and round about to Zidon' (דָּנָה יַּעַן וְסָבִיב אֶל־צִידוֹן), 2 S 24^{6}. No such place is mentioned anywhere else in OT, and it is generally assumed that the text is corrupt. It has indeed been proposed to locate Dan-jaan at a ruin N. of Achzib which is said to bear the name *Khan Dâniân* ; but this identification, although accepted by Conder, has not made headway. The reference is more probably to the city of Dan which appears so frequently as the northern limit of the kingdom. Three leading emendations of the text have been proposed. (1) Wellhausen (*Sam. ad loc.*) instead of the MT יַּעַן וְסָבִיב would read וּמִדָּן סָבְבוּ ('They came to Dan) *and from Dan they went about.*' This is accepted by Driver (*Sam. ad loc.*, cf. *Deut.* p. 421), Budde (in Haupt's *OT*), Kittel (in Kautzsch's *AT*). (2) Klostermann would read וְעִיֹּן וַיָּסֹבּוּ . . . 'and to Ijon and they went about.' Ijon and Dan are associated in 1 K 15^{20} (cf. 2 K 15^{29}). (3) Gesenius would change יַּעַן into יַּעַר . . . 'to Dan *in the wood*' (cf. Vulg. *silvestria*). After εἰς Δάν LXX reads, B Εἰδὰν καὶ Οὐδάν, A Ἰαρὰν καὶ Ἰουδάν. This does not help us much, but Wellh. points out that it indicates at least that the translators found דן twice in their text and had a verb in place of וסביב. J. A. SELBIE.

DANNAH (דַּנָּה), Jos 15^{49}.—A town of Judah mentioned next to Debir and Socoh. It was clearly in the mountains S.W. of Hebron, probably the present *Idhnah.* This place is noticed in the 4th cent. A.D. (*Onomasticon, s.v.* Jedna) as six Roman miles from Eleutheropolis (*Beit Jibrîn*). It is now a small village on the W. slopes. See *SWP*, vol. iii. sheet xxi. LXX has Ρεννά. C. R. CONDER.

DAPHNE (Δάφνη).—A place mentioned in 2 Mac 4^{33} to which Onias withdrew for refuge, but from which he was decoyed by Andronicus and treacherously slain. Its site, which has been identified with the mod. *Beit el-Mâ*, or House of Waters, is placed by Strabo and the Jerus. Itinerary at a distance of 40 stadia, or about 5 miles, from Antioch. This grove, which owed its establishment to Seleucus Nikator, was famous for its fountains, its temple in honour of Apollo and Diana, its oracle, and its right of asylum. (See Gibbon, *Decline and Fall*, c. xxiii.)

R. M. BOYD.

DARA, דָּרַע 1 Ch 2^{6}, Δάρα AB ; but codd. Heb., Luc. Δαραδέ, Pesh., Targ. presuppose דַּרְדַּע DARDA (which see).

DARDA (דַּרְדַּע, Δαραλά B, Δαραά A, Δαρδαέ Luc.)—Mentioned with Ethan the Ezrahite, Heman, and Calcol as a son of Mahol, and a proverbial type of wisdom, but yet surpassed by Solomon (1 K 4[31]). In 1 Ch 2[6] apparently the same four (Dara is probably an error for Darda. See DARA) are mentioned with Zimri as sons of Zerah, the son of Judah by Tamar (Gn 38[30]). So Targ. in 1 K 4[31] interprets 'the Ezrahite' as בר זרח 'the son of Zerah.' This statement of Ch need not conflict with that of K, 'sons of Mahol,' since Zerah, as is suggested by the title 'the Ezrahite,' may have been the remoter ancestor, Mahol the immediate father. See MAHOL. C. F. BURNEY.

---

* Josephus fell into a similar error, also the Jewish Hellenist, Demetrius (Schürer, *HJP* II. vol. iii. p. 53 f.).

DARIC.—See MONEY.

DARIUS (דָּרְיָוֶשׁ, Δαρεῖος).—1. Darius, the son of Hystaspes (Vistáshpa), written Dârayavaush in Old Persian, was the true founder of the Persian empire. The usurpation of the crown by the Magian Gaumáta, who pretended to be Smerdis the brother of Cambyses, had thoroughly shaken the empire of Cyrus, and the murder of the usurper by Darius and six others (B.C. 521) caused it to break up. The nations of which it was composed revolted under different pretenders, and had to be reconquered and reorganized by Darius. The history of all this is given in the trilingual inscription he caused to be engraved on the rock of Behistun (Bagistana). First Susiana rebelled under Atrina, then Babylon under Nidinta-Bel, who pretended to be Nebuchadrezzar, son of Nabonidus. Contract-tablets show that the latter pretender reigned from October B.C. 521 to August B.C. 520, when Babylon was taken and Nidinta-Bel himself put to death. Next came the revolts of Martiya in Susiana; of Phraortes in Media, who called himself Khshathrita, descendant of Uvakhshatara; of the Armenians; of Chitrantakhma in Sagartia, who said he was a descendant of Uvakhshatara; of Phraortes in Parthia and Hyrcania, where Hystaspes was satrap; of Frâda in Margiana; of a second false Smerdis in Persia itself; and of the Armenian Arakha, son of Khaldita, in Babylon, who professed to be Nebuchadrezzar, the son of Nabonidus. But the revolts were all suppressed and the leaders impaled, though many months of hard fighting were needed for the work. D. ascribes all his successes to the help of Ahuramazda (Ormazd), the supreme god of the Zoroastrian faith.

He now set about the organization of the empire, which he placed under a bureaucracy centralized in himself. The provinces were governed by satraps appointed by the king, and each province was required to furnish the royal treasury with a fixed amount of annual tribute. Justice was administered by royal judges who went on circuit.

The second revolt of Babylon probably took place in B.C. 514, as no Bab. contract-tablets have been found dated in the seventh year of Darius, and after its suppression a part of the walls of the city were pulled down. Soon afterwards Darius overcame Iskunka the Sakian or Scyth, and henceforward the Sakians formed part of the Persian army. The expedition against the Scyths of Europe was still later. Darius crossed the Danube near Ismail by a bridge constructed by the Ionians, who had already performed the same service in the case of the Bosphorus, and, leaving it in charge of the Ionian 'tyrants,' he marched eastward to the Don. Eight fortresses were built on the banks of the Oarus (probably the Volga), and Darius then returned through a desert country to the Danube, harassed by the Scyths. Histiæus of Miletus saved his army by dissuading the Greeks from destroying the bridge. Histiæus was afterwards the indirect cause of the Ionian revolt, which led to the burning of Sardis by the Athenians, and the determination of Darius to punish Athens and annex Greece. Thrace and Macedonia had already submitted. Mardonius, the son of Gobryas, was sent against Attica; but his ships were wrecked off Mount Athos, and he was compelled to return. Another army was despatched accordingly the following year. Eretria was pillaged; but the Persian host was utterly defeated by the Athenians at Marathon (B.C. 491), and compelled to retreat. Darius now fitted out another expedition on a larger scale, but just as it was ready to start Egypt revolted.

D. had already explored the Indian Ocean. Skylax of Karyandria sailed down the Indus, and, after a voyage of thirty months, reached Suez. One of the results of the expedition was the subjugation of the Indians.

The Egyptian revolt was followed by the death of the king, B.C. 486. He had married the daughter of Gobryas in early life, and Artobarzanes, his eldest son by her, was not allowed to succeed him, as he had been born while Darius was still a private citizen. After his accession he married Atossa, the daughter of Cyrus and wife of Cambyses and of the pseudo-Smerdis, as well as Parmys the daughter of Smerdis, and Phædyma the daughter of Otanes. Xerxes, his son by Atossa, was his successor to the crown.

It was in the reign of Darius that the second temple of Jerusalem was finished. The work had languished till the second year of his reign, when Haggai and Zechariah excited Zerubbabel, 'the governor of Judah,' and the high priest Joshua to undertake it afresh (Ezr 5[1f.]). This made Tattenai, the Persian governor of Syria, inquire by what authority they acted (v.[3ff.]). On being told that it was a decree of Cyrus, he wrote to Darius, who had search made for the decree, which was found in the palace of Ecbatana. Darius caused it to be published, and added that money for the building should be given out of the revenue of the province, as well as cattle and other things for the temple services, 'that they may offer sacrifice . . . and pray for the life of the king and of his sons.' Accordingly, the temple was completed on the 3rd of Adar, in the sixth year of Darius (6[1-15]).

According to Josephus (*Ant.* XI. i. 3), whose narrative rests on chs. 2 and 3 of 1 Es, the goodwill of Darius towards the Jews went back to the time when he was a private individual, and had vowed that if he became king he would restore the sacred vessels to the temple of Jerusalem. He and Zerubbabel were old friends, and, after the return of the Jewish prince from Jerusalem, Darius made him one of his bodyguard. In this capacity Zerubbabel was called on to amuse the king one night when he was sleepless, in the first year of his reign, by determining the relative strength of 'wine, kings, women, and truth.' His explanation that truth was the strongest pleased Darius, who promised to grant whatever he asked. He therefore reminded the king of his promise to build Jerusalem and its temple, and Darius thereupon did all he could to further the work, giving fifty talents towards it, and relieving the Jews of all taxation.

2. DARIUS *the Persian* (Neh 12[22]). Which king of Persia is meant is uncertain. Some commentators have supposed it to be Darius II. (Nothus) B.C. 423–404, but it was more probably Darius III. (Codomannus), the last king of Persia, and the contemporary of the high priest Jaddua, who is mentioned in the same verse. Darius III. reigned from B.C. 336 to 330, when he was overthrown by Alexander of Macedon in the decisive battle of Arbela, and the Persian empire destroyed.

3. DARIUS in 1 Mac 12[7] AV is a false reading for the Lacedæmonian Areus. See ARIUS.

4. DARIUS *the Mede*.—See next article.

LITERATURE.—Spiegel, *Die altpersischen Keilinschriften* (1881).

A. H. SAYCE.

DARIUS THE MEDE (דָּרְיָוֶשׁ הַמָּדִי Dn 11^1, Aram. ד׳ מְדָיָא (*Kethibh*), ד׳ מָדָאָה (*Kerê*) 6^1 [Eng. 5^{31}]), the son of Ahasuerus (=Xerxes), 'of the seed of the Medes' (9^1), is said (5^{31}) to have succeeded to the Bab. kingdom after Belshazzar's violent death, and to have been 62 years old when he 'received the kingdom.' His first year only is mentioned (5^{31} 9^1 11^1).

Who this D. was, is difficult to ascertain with certainty. Besides other proposals, D. the Mede has been identified with (1) Cyaxares II., the son and successor of Astyages (Jos. *Ant.* X. xi. 4), but no proof is given to support this theory; (2) Darius Hystaspis; (3) Astyages himself; but all these identifications seem quite untenable. It is true that D. Hystaspis conquered Babylon, but that was some thirty years later. Besides this, he was a Persian, not a Mede; and he was about thirty-six years old, not sixty-two, when he began to reign.

The passage in Dn 5^{31} where he is described as having received the kingdom (RV) leads one to ask whether, in spite of the title of king which is given to him ($6^{6.7}$ etc.), he may not have been really governor only. In the Gr. historians and in the *Bab. Chronicle* the name of D. the Mede does not occur, he who preceded Cyrus to Babylon, on the occasion of the siege and capture of that city, being Gobryas, who may thus be regarded as having 'received the kingdom for him.'* Gobryas, like Darius the Mede (6^1), appointed governors in Babylon, and seems also to have been in the attack which resulted in Belshazzar's death (*Bab. Chronicle*, Rev. col. i. l. 22). It will thus be seen that Cyrus gave great power to Gobryas, who was, in fact, his viceroy.† Apparently, therefore, the later Jewish writers looked upon Gobryas as having as much authority as Belshazzar, whom they regarded likewise as king, though he does not appear ever to have reigned. The confusion of the names of D. the Mede and Gobryas of Gutium (he being governor of that place, which is regarded as having included a part of Media), may have been due to the scribes, who, being more familiar with the Gr. form of the name of D. (the end of which, when carelessly pronounced, bears a certain resemblance to that of Gobryas in that language) than with the Heb. form *Daryawesh*, wrote one name for the other; and there is also the possibility that one of Gobryas' names was Darius,‡ which would account for the mistake. Under these circumstances we must accept, until further proof, the explanation, that D. the Mede was no other than Gobryas of Gutium, who, being practically viceroy, may have been regarded as king during the absence of Cyrus from Babylon, and who, under the name of D. the Mede, by which he was known to the Hebrews later on, conquered and entered Babylon on the 16th Tammuz, called Daniel to the very high dignity of 'one of the three presidents who were placed over the hundred and twenty satraps,' and issued a decree, after Daniel's miraculous deliverance, enjoining 'reverence for the God of Daniel' throughout his dominions. Josephus gets rid of all difficulties presented by the title of 'king' which is given to D. the Mede in Daniel, by explaining that he took Daniel the prophet with him into Media, and that it was there that he appointed him one of the three presidents whom he set over his 'three hundred and sixty' provinces. According to this authority, therefore, D. the Mede was in fact never ruler of Babylonia.* I. A. PINCHES.

DARKNESS (Heb. חֹשֶׁךְ and אֹפֶל [and their cognates], עֵיפָה, עֲרָפֶל, Gr. *σκότος, σκοτία, ζόφος*). Besides its literal meaning, darkness is frequently used in Scrip. metaphorically. Since God is light, because the perfect embodiment of rational and moral truth, and since the knowledge of Him is man's light, darkness is the natural antithesis of these ideas. Hence in OT it is emblematic of nothingness (Job $3^{4.5.6}$); more freq. it is equivalent to death (Job $10^{21.22}$ 15^{23} $17^{12.13}$, 1 S 2^9, Ec 11^8 etc.), and to the unknown or undiscovered (Job 12^{22} 28^3, Is 45^3 etc.). So, too, it is the emblem of mysterious affliction, and of the ignorance and frailty of human life (2 S 22^{29}, Job 19^8 23^{17}, Ps 18^{28} $107^{10.14}$, Is 9^2 29^{18} $42^{7.16}$ etc.); of moral depravity (Is 5^{20} 60^2, Pr 2^{13}), and of confusion and destruction visited on the wicked (Job 5^{14} 15^{30} 20^{26}, Ps 82^5, Pr 4^{19} 20^{20}, Is 8^{22} 59^9, Ec 2^{14}, Jer 2^{31} etc.). It is also the symbol of that which causes terror and distress (Gn 15^{12}, Is 5^{30} 47^5, La 3^2, Ezk 32^8 etc.). Since, moreover, God is incomprehensible, His ways mysterious, and His judgments severe, darkness is sometimes associated with His operations in providence (Ps $18^{9.11}$), in punishing (Am 5^{18}, Zeph 1^{15}), and in His self-manifestations generally (Ps 97^2, 1 K 8^{12}, 2 Ch 6^1), even as the guiding 'pillar' was light to Israel but darkness to the Egyptians (Ex 14^{20}), and Sinai was covered with dark clouds when J″ descended on it (Ex 20^{21}, Dt 4^{11} 5^{23}, Heb 12^{18}). In NT darkness is prevailingly the emblem of sin as a state of spiritual ignorance and moral depravity (Mt 4^{16} 6^{23}, Lk 1^{79} 11^{35} 22^{53}, Jn 1^5 3^{19} 8^{12} $12^{35.46}$, Ac 26^{18}, Ro 2^{19} 13^{12}, 1 Co 4^5, 2 Co 6^{14}, Eph $5^{8.11}$ 6^{12}, Col 1^{13}, 1 Th $5^{4.5}$, 1 P 2^9, 1 Jn $1^{5.6}$ $2^{8.9.11}$), but also of the desolation of divine punishment (Mt 8^{12} 22^{13} 25^{30}, 2 P $2^{14.17}$, Jude $^{6.13}$).

Two instances of special darkness, recorded in the Bible, call for notice. (1) The ninth of the plagues sent by God upon the Egyptians was a plague of darkness (Ex $10^{21.23}$). Many commentators explain this as due to a storm of fine dust and sand driven from the desert by the S. wind, the *Ḥamsîn*, noted for such effects in the spring. The LXX seems to have taken such a view, describing it as 'darkness, thick cloud (*γνόφος*), storm (*θύελλα*).' Some have regarded it as wholly miraculous; but the other plagues seem due to God's use of natural agencies. (2) The darkness at the crucifixion from the sixth to the ninth hour (Mt 27^{45}, Mk 15^{33}, Lk $23^{44.45}$). This the evangelists seem plainly to represent as supernatural. The true text of Lk 23^{45} (*τοῦ ἡλίου ἐκλείποντος* or *ἐκλιπόντος*, 'the sun failing' or 'having failed'; RV 'the sun's light failing') has indeed been thought to describe it as an eclipse. This reading and interpretation were noted by Origen, from whose remarks it appears that objectors to Christianity had so explained it. Origen rejected the reading, attributing it either to a scribe's wish to provide an explanation or to an enemy's wish to pervert the evangelical account (see WH, Notes on selected readings). Origen also rejected the view itself that an eclipse, natural or miraculous (for so some explained it), was intended by Luke, though his language elsewhere seems to imply the true text. The charge that it was a natural eclipse is put into the mouth of the Jews in the *Acts of Pilate*, contained in the pseudo-

---

* He brought the army of Cyrus to Babylon on the 16th Tammuz, Cyrus arriving nearly four months later, on the 3rd Marcheshvan.

† It is noteworthy that Xenophon (*Cyrop.* N. 6) says that Gobryas was 'a man in years.'

‡ Jos. (*Ant.* x. xi. 4, says that Darius (the Mede), whom he represents as the kinsman of Cyrus, 'had another name among the Greeks.' Apparently, the name of Gobryas was present to his mind when he wrote this.

* Driver, who in *LOT*^{1} pp. 469, 479 n. maintained a cautious reserve, admitting the possibility that D. the Mede might prove to be a historical character, agrees in his later editions with Sayce, that the existence of such a ruler is completely excluded by the monuments (cf. Sayce, *HCM* 528 ff.). The latter, as well as P. Haupt (note on Dn 6^1 in Haupt's *OT*), and a host of modern scholars, argue that 'D. the Mede' is due to confusion with D. Hystaspis, who conquered Babylon (B.C. 520). On the theory of the Maccabæan date of Daniel, such a confusion is held to be quite explicable.

Gospel of Nicodemus. Eusebius (*Chronicon*) and later Fathers appealed also to the statement of Phlegon of Tralles (of the 2nd cent.) that in the 202nd Olympiad (July A.D. 29 to 33) there was the greatest eclipse of the sun ever known, that it became night at the sixth hour of the day, so that stars appeared, and that there was a great earthquake in Bithynia. These writers differ as to the year of the Olympiad, but Wurm and Ideler place it on Nov. 24, A.D. 29 (Wieseler, *Synopsis of Four Gospels*, p. 354; see, on the other hand, Whiston, *Testimony of Phlegon Vindicated*, Lond. 1732). The insuperable objections to its identification with the darkness at the crucifixion are, even apart from the above date, that at passover the moon was full, and the darkness lasted three hours. Seyffarth's view (*Chron. Sacr.* pp. 58, 59), that the Jewish calendar was so deflected that the passover actually fell at a new moon, has found no advocates, and is wholly improbable, since the Jewish calendar depended on observations of the moon. There is, however, no need to interpret Luke of an eclipse in the astronomical sense (WH, Notes on selected readings). It is simply a statement that the sun's light failed. See also LIGHT, PLAGUES.

G. T. PURVES.

DARKON (דַּרְקוֹן).—'Children of D.' were among those who returned with Zerubbabel (Ezr 2^{56}, Neh 7^{58}). D. is called in 1 Es 5^{33} **Lozon**. See GENEALOGY.

DARK SAYING.—This is the tr^{n} of Heb. חִידָה *ḥîdhâh*, in Ps 49^{4} 78^{2}, Pr 1^{6}. Elsewhere *ḥîdhâh* is tr^{d} 'dark speech' Nu 12^{8}; 'dark sentence' Dn 8^{23}; 'hard question' 1 K 10^{1}, 2 Ch 9^{1}; 'riddle' Jg $14^{12.\ 13.\ 14.\ 15.\ 16.\ 17.\ 18.\ 19}$, Ezk 17^{2}; and 'proverb' Hab 2^{6}. See RIDDLE. In Wis 8^{8} we find 'dark sayings,' and in first Prologue to Sir 'd. sentences' (αἰνίγματα. This Gr. word is the LXX tr. of *ḥîdhâh* in Nu 12^{8}, 1 K 10^{1}, 2 Ch 9^{1}, Pr 1^{6}; it is found in NT only 1 Co 13^{12} ἐν αἰνίγματι, 'darkly,' marg. 'in a riddle'). In Jn $16^{25.\ 29}$ Amer. RV has 'dark saying' for AV and RV 'proverb' (παροιμία). Cf. Coverdale, *Letter to Cromwell* of Dec. 13, 1538, 'Pitie it were that the darck places of the text (upon the which I have alwaye set a hande) shulde so passe undeclared.' J. HASTINGS.

DARLING.—This is the tr^{n} of Heb. יָחִיד *yâḥîdh*, in Ps 22^{20} 'Deliver . . . my d. from the power of the dog,' and 35^{17} 'rescue . . . my d. from the lions' (marg. 'my only one'). 'My darlings' is also found in Bar 4^{26} AVm (AV and RV 'my delicate ones,' Gr. οἱ τρυφεροί μου). Cf. Ro 1^{7} Wyclif, 'to alle that ben at rome, derlyngis of god and clepid holy'; and Latimer (*Works*, ii. 438), 'Christ Jesus, the dear darling and only begotten and beloved son of God.' The word, now too familiar for such usage, is formed from *dear* with suffix *-ing*, which became *-ling* through its freq. addition to words ending in *l*; so nestling, seedling, etc. The Heb. *yâḥîdh* is used for an only son, but in Ps 22^{20} 35^{17} it is poetically transferred to the psalmist's own life 'as the one unique and priceless possession which can never be replaced'—*Oxf. Heb. Lex.* For the Eng. use compare Shaks. *Othello*, III. iv. 70—

> 'Make it a darling like your precious eye.'

J. HASTINGS.

DART.—Joab is said to have thrust three 'darts' (שְׁבָטִים *shĕbhâṭîm*, LXX βέλη) into the heart of Absalom (2 S 18^{14}). *Shēbheṭ* is, however, rather a shepherd's rod, which might be used as a club if one end were heavy and studded with nails (cf. Cheyne on Ps 23^{4}), or as a rough spear if one end were pointed. Hezekiah (2 Ch 32^{5}) made darts, שֶׁלַח *shelaḥ*, in abundance for the defence of Jerusalem.

In Job 41^{26} AV and RV give 'dart' for מַסָּע *maṣṣa'*, a ἅπαξ λεγόμενον of uncertain meaning.

In 1 Mac 6^{51} two kinds of darts are referred to as employed at a siege, and cast by engines—(*a*) ordinary bolts or large arrows; (*b*) darts wrapped in some burning material. Ancient defences, being built largely of wood, were easily set on fire.

In Eph 6^{16} the suggestions of the evil one are called βέλη πεπυρωμένα, with an obvious allusion to the practice mentioned above. St. Paul opposes Faith to the suggestions, as the soldier would oppose the great shield (θυρεός) to the darts.

W. E. BARNES.

DATHAN.—See KORAH.

DATHEMA (Δάθεμα), 1 Mac 5^{9}.—A fortress in Bashan. It may perhaps be the modern *Dâmeh* on the S. border of the Lejjah district, N. of Ashteroth-karnaim. The Peshiṭta reads *Rametha* (Ramoth-gilead ?). See G. A. Smith, *Hist. Geog.* 588 f. C. R. CONDER.

DAUB.—To daub, from Lat. *dealbare* (*de* down, *albus* white), is properly to rub down a wall with whitewash. But in English the word has always been used for washing or plastering with any available substance. It is now used, even in its literal sense, contemptuously. It has always been used to describe bad writing, as *Marprel. Ep.* (1589), 'When men have a gift in writing, howe easie it is for them to daube paper'; or painting, as Foote (1752), *Works*, i. 9, 'How high did your genius soar? To the daubing diabolical angels for ale-houses'; or besmearing of any kind, but esp. with flattery, as South (1716), 'Let every one therefore attend the sentence of his conscience; for, he may be sure, it will not daub, nor flatter'; or to hide deformity. In AV daub occurs once literally, Ex 2^{3} 'she took for him an ark of bulrushes, and daubed it with slime and with pitch' (וַתַּחְמְרָה, from חֵמָר, mortar, clay). Elsewhere only in Ezk ($13^{10.\ 12.\ 14.\ 15\,bis}$ 22^{28}) fig. of whitewashing Jerus. to hide its corruption, Heb. [טוּחַ], which is also found in Lv $14^{42.\ 43.\ 48}$ (EV 'plaister'), 1 Ch 29^{4} (EV 'overlay'), Is 44^{18} (EV 'shut,' margins 'daubed'). The subst. **daubing** occurs only Ezk 13^{12} 'where is the d. wherewith ye have daubed it?' (טִיחַ) for the plaster itself, a tr^{n} which has come from Wyclif. J. HASTINGS.

DAUGHTER.—See FAMILY.

DAVID (דָּוִד, but דָּוִיד 1 K 3^{14} $11^{4.\ 36}$, Ezk 34^{23}, Hos, Am, Zec, Ca, Ezr, Neh, Ch [except 1 Ch 13^{6}]; LXX, NT, Δαυείδ, but TR Δαβίδ).—The name, which in the Bible is given to no one except the great king of Israel, is perhaps a shortened form of Dodavahu (דּוֹדָוָהוּ 2 Ch 20^{37}), 'beloved of J″,' or Dodo (דּוֹדוֹ 2 S 23^{24}, דּוֹדַי 2 S 23^{9}, *Kethibh*), 'beloved of him'; but, according to Sayce, was originally Dodo, a title of the sun-god (cf. דודה on Moabite Stone, l. 12). In the Tel el-Amarna tablets of the 15th cent. B.C. the form Dûdu is found. Our authorities for the life of David are derived entirely from the OT. The extra-biblical narratives, of which the earliest are the fragments of Eupolemus in Eusebius, *Præp. Evang.* ix. 30, and of Nicolas of Damascus in Josephus, *Ant.* VII. v. 2, are either dependent upon the OT, or are entirely legendary (cf. Stanley, art. 'David' in Smith's *DB*). The reign of D., according to the traditional chronology, is dated B.C. 1055–1015; but from Assyr. inscriptions it appears that Jehu is placed about 40 years too early in Ussher's chronology, and we must accordingly bring down the reign of D. by a period of from 30 to 50 years.

The biblical account of D. is to be found (i.) in the narrative of 1 S 16–1 K 2; (ii.) in 1 Ch 2. 3.

10–29; see also Ru 4^{18-22}; and (iii.) in the titles of many psalms. Of these three sources the first is alike the oldest and the primary authority; information derived from the other two can be used only sparingly.

A considerable portion of the history in 1 Ch is derived directly or ultimately from the Books of Samuel, and cannot be cited as an independent narrative, though it is often valuable for the restoration of the text. The fresh information given by the Chronicler consists mainly of lists of names and statistical details. In many cases the numbers given condemn themselves; where we have to deal with series of names, there is no absolute criterion to guide us; but it is to be noticed that the new narratives are nearly always marked by their late Heb. style, and by the characteristic language of the Chronicler, while the statements made are often more or less at variance with the older account in Samuel. It is rarely clear that the author had access to ancient documents other than the Books of Samuel, and his unverified statements must therefore be received with caution. The picture of D. presented by him differs in important respects from the earlier portrait; it is indeed the picture of an idealized David, such as was present to the minds of devout Jews of the 3rd cent. B.C., when the true founder of the Isr. monarchy was regarded as a model of piety; and the recognition of the full Priestly Code in the time of D. was a fact never questioned (see CHRONICLES).

Seventy-three psalms bear the title 'to David,' and in many cases, especially in Book II., there is a fuller inscription connecting the psalm with some particular event in D.'s life. Many of these titles recall the language of the Books of Sam., from which indeed they may be derived. The picture of D. which they suggest is not unlike that of Chronicles. On closer examination, however, it is seen that the contents of the psalm are often not suitable to the alleged occasion; and so frequently is this the case, that it becomes unsafe to accept the superscriptions, or even the Davidic authorship of 'Davidic' psalms, unless the titles are directly supported by internal evidence. But, without entering upon the wide question of the date and authorship of the Psalter (see PSALMS), it may be said that in a large number of cases the thoughts and language even of 'Davidic' psalms remind us of the teaching of the great prophets, and seem to be largely dependent on it; the circumstances of the psalmists are often those of the post-exilic Jews; and the religious ideas and spiritual tone of the Psalter as a whole differ widely from those which the most trustworthy authorities ascribe to D. himself, or to the period of the early monarchy. The tendency among the best scholars of the present day is to reduce the directly Davidic element in the Psalter to the narrowest limits. Hence it does not seem advisable to illustrate the history or character of D. by quotations from the Psalms.

For the history of D. we are thus practically reduced to the Books of Samuel (with 1 K 1. 2); but even this work contains elements of unequal historical value, and it is necessary to consider briefly the structure of the book, and to form a critical estimate of its contents.

One noticeable feature of the D. narratives contained in 1 S 16–31 is the existence of a number of 'doublets,' *i.e.* accounts of very similar events, or divergent accounts of the same event. These may be here enumerated. (1) The introduction of D. to Saul, 1 S 16^{14-23} and 17^{1}–18^{5}; (2) the slaying of Goliath of Gath, 1 S 17^{1}–18^{5} and 2 S 21^{19}; (3) Saul casts his spear at D., 1 S $18^{10.\ 11}$ and $19^{9.\ 10}$; (4) Jonathan's intercession for D., 19^{1-7} and 20; (5) the covenant between D. and Jonathan, $20^{12-23.\ 42}$ and 23^{16-18}; (6) the origin of the proverb, 'Is Saul also among the prophets?' $19^{23f.}$ and 10^{10-13}; (7) D. at the court of Achish, 21^{10-15} and 27–28^{2} 29; (8) D. spares Saul's life, 24 and 26; (9) the death of Saul, 1 S 31 and 2 S 1^{1-16}. These parallels are not all equally convincing; in certain cases the divergent narratives may be harmonized more or less satisfactorily; in others it is possible that an event occurred more than once in D.'s life, though it would be strange that with reference, *e.g.*, to D.'s flight to Gath, or his sparing Saul's life, no allusion should be made in the narrative to a previous similar occurrence. We cannot, however, separate these peculiarities in the history of D. from similar phenomena in the history of Saul, where we find two accounts of his appointment as king, and of his rejection. We are therefore obliged to recognize the existence of two parallel narratives in the present 1 S, and these must be separated as far as possible, and compared, if we would gain a clear idea of D.'s earlier life. In 2 S the case is somewhat different. Of a double narrative there we have hardly any traces. On the other hand, we have a detailed and continuous narrative (ch. 9–20 with 1 K 1. 2), the work of a single writer, which describes the history of D.'s family and court at Jerus., and is a document of the highest importance. The earlier chapters (1–8) and the appendix (21–24) are of composite origin; there are indications that their contents have been partially rearranged; and later editors or redactors have left their mark on these chapters. The following analysis, taken mainly from Budde (*Richter und Samuel*), will be found useful. Some comments upon it will be found in the course of this article; for fuller particulars see SAMUEL, BOOKS OF.

A. (Budde, J) 1 S 16^{14-23} $18^{5.\ 20-30\ (6-8)\ 9-11}$ 20. 22. $23^{1-14a.\ 19-29}$ 25^{2-44} 24. 27. $28^{1.\ 2}$ 29. 30. 28^{4-25} 31, 2 S $1^{1-4.\ 17-27}$ 2. $3^{1.\ 6-39}$ 4. $5^{1-3.\ 17-25}$ (? 21^{15-22} 23^{8-39}) 5^{6-12} 6. 3^{2-5} 5^{13-16} $8^{16-18}=20^{23-26}$ 9–20, 1 K 1. 2.

B. (Budde, E) 1 S 17. $18^{1-4\ (6-8)\ 12-19}$ 19^{1-17} 21^{1-9} $23^{14b-18b}$? 26, 2 S 1^{5-16}.

Detached narratives of various dates:—2 S 21^{1-14} 24, 1 S 16^{1-13} 19^{18-24} 21^{10-15}, 2 S 7. 22. 23^{1-7}.

Editorial additions, based in part on older material:—2 S 8^{1-15}, 1 K $2^{(1-12)}$.

No account is taken here of minor interpolations and editorial additions.

Of these different authorities the oldest and most valuable is the family history of D. referred to above (2 S 9–20, 1 K 1. 2); its detailed descriptions and graphic touches do not indeed prove the writer to have been a contemporary of the events; but he clearly possessed trustworthy sources of information, and must be placed not very long after D.'s time. The remaining portions of A are not so detailed, and are apparently of somewhat later date. B is still later, and in several points less reliable than A; while of the shorter sections some are shown by their contents, and by the ideas there expressed, to be of high antiquity (2 S 21. 24), others are certainly later than B, and in part dependent on B. All, however, are earlier than the time of Josiah; and only in 2 S 7 (pre-exilic), in the Songs (2 S 22. 23^{1-7}) and the editorial additions, can we trace the influence of Deuteronomy.

David was the youngest son of Jesse, a Judæan of Bethlehem, who seems to have belonged to one of the principal families of his native town (yet cf. 1 S 18^{18}). No particulars as to the ancestry of Jesse are given in 1 Sam. (contrast the case of Saul, 1 S 9^{1}); but in the (later) genealogy in Ruth he is called the son of Obed, and grandson of Boaz, and his descent is traced back to the family of Perez (Ru 4^{18-22}; see also 1 Ch 2^{3-17}). The name of D.'s mother is nowhere given; his three elder brothers were called Eliab (? Elihu, 1 Ch 27^{18}), Abinadab, and Shammah (Shimeah, 2 S 13^{3}; Shimei, 2 S 21^{21}), see 1 S 16^{6-9} 17^{13}. 1 S $16^{10f.}$ and 17^{12} speak of eight sons of Jesse, and in 1 Ch 2^{14-16} three more names are given, Nethanel the 4th, Raddai the 5th, and Ozem the 6th, D. being there termed the 7th. The sisters of D., Zeruiah (the mother of Joab, Abishai, and Asahel) and Abigail (the mother of Amasa), were probably half-sisters, for in 2 S 17^{25} Abigail is called daughter of Nahash and sister to Zeruiah; cf. 1 Ch $2^{16.\ 17}$).

We first hear of D. when he was introduced to the court of Saul. The king had been attacked with morbid melancholy, called by the historian 'an evil spirit from J″.' His servants suggested that a skilful player upon the harp should be brought to soothe the king with his music, and D., the son of Jesse, was chosen for this office. The narrative (1 S 16^{14-23}) is probably to be connected with the statement of 14^{52}, that Saul gathered round him every valiant warrior in Israel; and in like manner D., who is described as 'a mighty man of valour and a man of war,' was summoned to the court. In addition to being a skilful musician, he was prudent in speech (or business), a comely person, and one who enjoyed the favour of J″. The young minstrel won the favour of the king, who made him his armour-bearer (cf. 1 S $14^{1ff.}$ 31^{4-6}, 2 S 18^{15} 23^{37}), and kept him in attendance upon his person.

From another source, however, we have a different account of D.'s first introduction to Saul, in the beautiful and familiar story of the encounter with Goliath (ch. 17^{1}–18^{4}). Here David is represented as a mere lad, a goodly youth of fair countenance, inexperienced in war ($17^{33. 42}$), who used to tend his father's sheep. During a war with the Philistines, D. was sent by his father with a present to his three brothers, who were serving in Saul's army in the Valley of Elah. On reaching the camp he heard the defiant words of the giant, Goliath of Gath, and, undeterred by his eldest brother's reproaches, he inquired among the soldiers concerning the king's reward promised to any man who would overcome the Philistine champion. When brought before the king, the youth at once offered to go out against the Philistine, relating how he had protected his father's sheep from the lions and bears which had attacked them (tenses in $17^{34f.}$ frequentative, see Driver, *Text of Sam.*). Putting aside the armour offered by the king, he advanced to meet the giant. He brought his opponent to the ground by a stone slung against his forehead, and then cut off his head with his own sword. The fall of their champion was followed by the rout of the Philistine army. So far was D. at this time unknown to Saul, that the king instructed his chief commander, Abner, to inquire concerning the 'stripling's' parentage,—a question which D. answered for himself as he returned from the fray with the giant's head in his hand. From this time forward D. was kept at the court of Saul, while a close friendship sprang up at once between him and the king's son Jonathan.

Many attempts have been made to harmonize the two narratives. It is suggested that D. had returned home from his position as minstrel, and had since grown out of recognition; or that Saul's question to Abner related to D.'s family, but that he personally was known to Saul. Neither of these explanations can be regarded as satisfactory, nor do they account for the discrepancy between the skilled warrior of 16^{18} and the shepherd lad of $17^{33. 42}$. The difficulty attracted attention at an early period. 17^{15} seems to be a harmonistic addition by some later editor, and represents D. as going backwards and forwards between his home and the court. Similarly, 16^{19} 'which is with the sheep,' a clause which does not agree with v.^{18}, must be regarded as a later gloss. The LXX (cod. B) offers a more violent solution of the problem, omitting $17^{12-31. 41. 50. 55}$–18^{5}; it thus gets rid of the description of D. as sent to the camp by his father, and of Saul's question concerning the young hero, D. being represented (v.^{32}) as already in attendance upon Saul. The LXX text has been accepted as original by competent scholars (W. R. Smith, Stade, Cornill); but others with good reason adhere to the MT, and regard the omissions of the LXX as due to an attempt to reconcile chs. 16 and 17 (Driver, Cheyne, Wellhausen [*Composition*], Kuenen, Budde, etc.). Even in the LXX text D. is a shepherd lad (vv.$^{33. 42}$), not the warrior of $16^{18. 21}$; in language and style the omitted paragraphs do not differ from the rest of the chapter, while certain expressions which suggest a later hand (*e.g.* *assembly* v.^{47}, *Jerusalem* ^{54}) are found also in the LXX; and the original covenant between D. and Jonathan, to which allusion is made more than once subsequently, is related only in 18^{1-4}. In fact all these attempts to reconcile the two accounts of the first meeting of D. and Saul are unsuccessful; we can only recognize them as two versions of the history, and choose between them. And here we see the importance of the statement of 2 S 21^{19} that 'Elhanan the son of Jair (cf. Driver, *Text of Sam.*) the Bethlehemite, slew Goliath the Gittite, the staff of whose spear was like a weaver's beam' (cf. 1 S 17^{7}). The Chronicler indeed states that 'Elhanan slew Lahmi the brother of Goliath' (1 Ch 20^{5}), but the 'harder' reading of 2 Sam. is certainly to be preferred. It has been suggested that Elhanan was the original name of David (Böttcher, Sayce),—but of this there is no hint in either passage, and the father of Elhanan is Jair (or Jaʿir), not Jesse;—or that the name of Goliath has been wrongly transferred to D.'s enemy, who, in 1 S 17, is usually termed simply 'the Philistine.' On the whole, however, it seems more probable that Goliath of Gath was slain at a later period by one of D.'s warriors, also a native of Bethlehem; and subsequently the victory was by tradition ascribed to D. himself, and put back to the period of his boyhood. In this case we must accept 1 S 16^{14-23} as giving the true narrative of D.'s first introduction to Saul; but the popular tradition has left its mark on other parts of the history of David.

A story of D.'s earliest life is given in 1 S 16^{1-13}, where we read how, after Saul's rejection, Samuel was sent in accordance with J″'s instructions to Bethlehem. There he invited Jesse to a sacrifice, and, after sending a special summons to the young David, who was tending the sheep, anointed him in the midst of his brothers. This narrative now forms the introduction to the history of D.; it is the counterpart to 1 S $10^{1ff.}$ (the anointing of Saul by Samuel), and explains the coming of the Spirit of God upon D., and its departure from Saul; but, as it stands, the account can hardly be accepted as historical. Independently of any difficulties raised by the character and position here assigned to Samuel, which resemble what we find in the later narrative of the choice of Saul, the fact that D.'s anointing attracted so little attention has more than once been remarked as strange. His own brother Eliab seems unaware of it (17^{28}), while D. himself appears unconscious of his destiny (18^{18}), and always regards Saul as the Anointed of J″ (1 S 24^{6} 26^{9}, 2 S 1^{14}). The explanation that this anointing was only a mark of favour bestowed on the most honoured guest, and that D. was here given a place like that assigned to Saul at Ramah (9^{22}, so Klostermann, Ewald, W. R. Smith), does not do justice to the narrative, and anointing in the OT implies the conferring of some office.

Our authorities do not enable us to say how long D. continued in the position of Saul's minstrel and armour-bearer. His success in war against the Philistines; his popularity among the soldiers; the love of Michal and her marriage with D.; the strong friendship between D. and Jonathan, who entered into a covenant of brotherhood,—these facts are all attested by more than one passage in both the main narratives. But it is not quite easy to trace and explain the beginning of the distrust which Saul conceived for his young favourite, who had been promoted to the position of captain of the bodyguard (1 S 22^{14} LXX). It is only natural that there should be some want of definiteness in the narratives. The facts could be known only to those belonging to the innermost circle of the court, and all our records are written from the point of view of friends of David. If any ill-advised action on his part contributed to excite Saul's ill-will, we are told nothing about it. The main reason alleged for Saul's enmity is his jealousy of D.'s popularity and success in war, which is said to have been excited by the song of the women, who met the victorious warriors with the words, 'Saul hath slain his thousands, and D. his ten thousands.' But besides this there are hints of a suspicion that D. had conspired with Jonathan to dethrone him (cf. 1 S $20^{30f.}$ 22^{13}). Everything that we are told of Jonathan goes to prove the baselessness of such a suspicion, and his continued affection for D. is evidence of D.'s innocence; but we can well imagine that the melancholy from which Saul suffered served to increase any jealousy or distrust when once aroused, and it is possible that he feared that his subjects might regard him, owing to his occasional attacks of madness, as no longer a fit ruler of the nation.

The chapter which describes the growth of the estrangement between Saul and D. lies before us in two forms. Here again the LXX has a shorter text, omitting from ch. 18 vv.$^{9-11.\ 12b.\ 17-19.\ 21b.\ 29b.\ 30}$. Thus the account of Saul's casting his spear at D. is omitted, and the promise of marriage with the elder daughter Merab; the gradual growth of Saul's jealousy is described, and each stage is appropriately emphasized with the words 'Saul was afraid of D.' (v.^{12}), 'Stood in awe of him' (v.^{15}), 'was yet more afraid' (v.^{29}); and on account of the clear and consistent picture given in this version, many scholars accept the LXX text as original (so Wellh., Kuenen, Stade, Driver, W. R. Smith, Kirkpatrick). But Cornill allows that the promise of Merab is the proper fulfilment of the king's promise to the slayer of Goliath (17^{25}); and Budde urges the inconsistency of adopting the LXX recension in ch. 18, and rejecting it (as Wellh., Kuenen, Driver do) in ch. 17. He accounts for the difficulties presented by the MT by analysing the chapter into sections derived from the two principal documents (so also Cheyne); and this seems to be the most satisfactory solution of the problem. Comparing the parallel narratives, we gather that D. was placed by Saul at the head of an armed force, either as a mark of favour (18^{5} A), or because of his growing distrust (v.^{13} B); that Saul's jealousy was excited on some occasion when D. returned from a victory over the Philistines (vv.$^{6-9}$, probably A and B,—note the double introduction to v.^{6}); that this did not prevent the marriage of D. to Saul's younger daughter Michal (vv.$^{20-30}$ A, cf. $^{17-19}$ B). Indeed it is not improbable that the estrangement is placed too early, and that Saul gave his daughter to the popular and successful officer in order to bind him to his interests, rather than that he already desired to compass D.'s death. Jonathan's intercession for his friend failed to effect a real reconciliation (19^{1-7} B, 20 A); and when Saul, in a fit of madness, hurled his spear at D. while he played the harp before the king, D. felt that his life was in danger, and that he must flee from the court ($19^{9.\ 10}$ B, $18^{10.\ 11}$ A, probably removed from its original position when A and B were combined).

The details given by the two narratives differ. According to A, Saul offered his daughter to D. as a mere snare, hoping that he might fall in battle, as the dowry was fixed at 100 foreskins of the Philistines; but D., without loss of time, procured twice the required number (18^{27} 200, MT; 100, LXX), and won his bride. After this (vv.$^{9-11}$), Saul in a frenzy attempted the life of his son-in-law, and, when D. complained to Jonathan, the latter repudiated the idea that his father had any real intention of harming him. To determine the king's true feelings, it was then agreed that D. should stay in hiding during the new-moon festival, while Jonathan was to excuse his friend's absence from the royal table on the pretext that he had been summoned to a family feast at Bethlehem. On the first day of D.'s absence nothing was said; on the next day, in answer to Saul's inquiries, Jonathan made the excuse agreed upon, whereat the king burst forth into furious reproaches against D. and his son, and hurled his spear at Jonathan, who attempted to intercede for his friend. In anger Jonathan left the table, and next morning went to the appointed place in the field. Under pretence of shooting at a mark, he sent an arrow beyond the stone where D. lay concealed; and while the boy carried back his master's weapons, the two friends took an affectionate farewell. On ch. 20, which has perhaps not reached us quite in its original form, it may be remarked that Jonathan's denial of any wish on the part of Saul to harm D. (20^{2}) is hardly appropriate after $19^{1-7.\ 11-17}$; and that while a mere act of frenzy ($18^{10f.}$ $19^{9f.}$) might leave D. uncertain as to Saul's intentions, he could not have any doubt after Saul had deliberately sent messengers to kill him (19^{11-17}), or be expected to appear at the king's table ($20^{5.\ 6.\ 27}$).

According to the second narrative (B), it was owing to Saul's jealousy that D. was removed from the position of armour-bearer to that of captain of a thousand (18^{13}), and when the time came for his promised marriage (cf. 17^{25}), Merab the elder daughter was given to Adriel of Meholah. Our account of D.'s marriage with Michal seems to be derived from the other source, but the obscure words at the end of v.^{21} are perhaps a fragment of the second narrative. Saul's ill-will towards his former favourite increased so greatly that he purposed to put him to death. Jonathan, however, pleaded to his father D.'s good deeds, and especially his victory over the Philistine (Goliath); and on Saul's relenting he brought D. out of his hiding-place in the field, and presented him to his father (19^{1-7}). The reconciliation, however, was of no long duration, for, shortly *after* Jonathan's appeal, Saul, in a fit of madness, cast his spear at D. as he played on the harp before him. D. fled to his house, but that night (19^{11} LXX) Saul sent messengers to watch the house, and, while respecting his sleeping enemy in accordance with Oriental custom, he ordered them to kill him in the morning. D. was saved by the faithful Michal, who lowered him through the window, while she placed in his bed the *teraphim* or household image, and covered it with the bed-clothes. Next morning the messengers brought word that D. was ill; but, when charged to bring him in the bed, the fraud was discovered, and Michal had to plead in self-defence that D. had threatened her life if she hindered his escape. With regard to this series of narratives it may be pointed out that the similarities between portions of 19^{1-7} and ch. 20 suggest, though they do not prove, that we have before us two different versions of the same event, while the reference to the victory over Goliath connects the former passage with ch. 17. Further, the difference of phraseology in $18^{10f.}$ $19^{9f.}$ (cf. also 20^{33}) favours the view that these verses are the work of independent writers, rather than that the former passage has merely been borrowed from the latter after the time of the LXX.

For the rest of Saul's reign D. was an exile from his home, and an outlaw (1 S 21–31). Some incidents during this period of his life are described with minute and graphic touches, which bear the evident stamp of genuineness; in other cases the accuracy of the narrative is more doubtful. The analysis of these chapters does not present many difficulties, and more than once the existence of double versions of the same story can hardly be doubted. It is only natural that many stories of D.'s adventures should have been current among the people long before they were written down; and many a place in the wilds of Judah would doubtless claim to be the site of some memorable event in the outlaw life of the great national hero; while from ch. 30^{26-31} it is clear that we possess but a fragmentary account of his many wanderings. According to the present Book of Samuel, D., after escaping from Saul's messengers, fled first to Ramah, where he took refuge with Samuel at a prophetic school. Thrice Saul sent messengers to capture him (cf. 2 K 1), but each time the men were overcome by the sacred minstrelsy of the prophets; and when Saul came in person, he too was filled with prophetic frenzy, and stripping off his clothes lay naked all the night (19^{18-24}). Grave doubts, however, have been raised against this narrative. For a Judæan like D., flight southwards was more natural from Gibeah than northwards to Ramah; the connexion between Samuel and the prophets is not that presented by the older history of Saul and Samuel, where indeed there is another explanation given of the proverb 'Is Saul also among the prophets?' ($10^{11f.}$); while the present narrative can hardly be by the author of ch. 15, who implies (v.^{35}) that Saul and Samuel did not meet again. The conception of the prophetic school as here described is probably later than the time of D.; and we must regard it as at least doubtful whether D. had any dealings with Samuel.

If we reject this narrative as of later origin, the first place visited by D. in his flight will be the priestly city of Nob, which lay south of Gibeah and due north of Jerusalem. To Ahimelech, the head of the priests of Eli's family, he alleged that he was bound on urgent business for the king, and accordingly obtained through him, as on previous occasions (22^{15}), an answer from the oracle. The only provisions which the priest could offer was the sacred shewbread, removed that day from the sanctuary; and this David accepted, stating that he and his companions were ceremonially clean. Ahimelech is said also to have given to D. the sword of Goliath, which was kept wrapped in a cloth behind the EPHOD. This visit to Nob was followed by important consequences. Shortly afterwards, while Saul was holding court under the tamarisk in Gibeah, he complained to his Benjamite followers of their ingratitude in taking part against him with his own son and David. Hereupon the Edomite Doeg, the chief herdman of Saul, or rather 'the mightiest of his runners' (21^7, so Grätz, Driver), declared that he had seen D. at Nob, where Ahimelech had consulted the oracle on his behalf, and supplied him with food and weapons. Saul at once suspected that the priest also was party to a conspiracy against him, and perhaps that he had been consulting the oracle as to its success. He summoned to his presence Ahimelech and the priests of his family, and, refusing to accept their denial of any knowledge of a conspiracy, ordered his guards to put them to death. The guards hesitated, but Doeg carried out the king's orders. Eighty-five priests were slain, and the city of Nob completely destroyed. Only one member of Eli's family escaped the massacre, Abiathar, a son of Ahimelech, who fled to D., probably to Adullam; and the latter, feeling that the disaster was in some measure due to himself, promised the fugitive his protection. According to Budde, we have underlying 1 S 21^{1-9} 22^{6-23} two versions of D.'s visit to Nob, and the denunciation of Doeg: notice that $22^{10.15}$ imply that Ahimelech consulted the oracle for David, whereas nothing is said of this in 21^{1-9}. Budde connects the earlier passage with B, the second with A, and regards the allusions to Goliath's sword in $22^{10.13}$ as added to connect the two narratives. Others (Wellh., Kuenen, Stade) ascribe both chapters to the same writer, and reject $21^{8.9}$ (Heb. $^{9.10}$) 22^{10b} as later glosses. In any case, these verses presuppose the account of D. and Goliath in ch. 17.

Our present narrative represents D. as fleeing from Nob to Gath. Here, it is said, at the court of Achish, he was recognized as the Isr. warrior, and 'king of the land'; in consequence he feigned madness, drumming (v.^{13} LXX) on the doors, and letting the spittle fall on his beard, so that at the command of Achish he was driven away (21^{10-15}). It is doubtful, however, whether D. would really have taken refuge among the Philistines at such an early period of his wanderings; and when he appears at Gath at a later time, no hint is given of this earlier visit. Probably we have here again a 'doublet,' and our narrative represents a popular legend, the product of a desire to represent in a more patriotic light D.'s residence among the Philistines. Far more reliable is the account in $22^{1ff.}$, according to which D. fled (from Nob) to the cave, or stronghold (so Wellh., Stade, Budde; cf. v.^{4}), of Adullam. This place must be looked for, not, according to a tradition dating from the 12th cent. A.D., on the south of Bethlehem in the *Wady Khareitun*, but in the Shephêlah west of Hebron (cf. Gn 38^1, Jos 15^{35}; and see G. A. Smith, *Hist. Geog.* p. 229 f.). Here the wild character of the country afforded him a hiding-place; he was among his own tribesmen, and on the extremity of Judah Saul's authority was weakest. The brothers and kinsmen of D., who had to fear Saul's vengeance, gathered round him, together with distressed debtors and discontented men of every class, so that D. soon found himself the leader of a band of some 400 men. Of these, several doubtless were not of Israelitish origin (cf. 1 S 26^6 and perhaps 2 S $23^{37.39}$); according to 1 Ch 12^{8-18} certain valiant Gadites and men of Judah and Benjamin joined him here, and not long afterwards (1 S 23^{13}) D.'s followers are reckoned at 600. His parents he placed under the protection of the king of Moab, a step which may perhaps be explained by reference to the Book of Ruth, where D.'s descent is traced from Ruth the Moabitess. According to 22^5, a verse of which the connexion is somewhat obscure, D., at the advice of the prophet Gad, removed from his stronghold to the forest of Hareth; but he is certainly again in the Shephêlah when we next hear of him. News came to D. that the Philistines were raiding Keilah, doubtless a frontier town west of Hebron, and perhaps south of Adullam. An opportunity now offered itself to him of at once assisting his countrymen and making a fresh name as a warrior. Having inquired of the priestly ephod, which Abiathar had brought from Nob, and received a favourable answer, D. marched down with his band, and drove away the Philistines from Keilah. To Saul it seemed that the time for capturing his enemy had now come. He summoned his army in order to besiege Keilah; but D., learning from the oracle that the inhabitants would save themselves by delivering over him and his men to Saul, escaped betimes, and Saul abandoned his expedition.

D. is next found in the wild and partially desert country to the south of Judah, or in the neighbourhood of the Dead Sea. The wilderness of Ziph and of Maon are especially connected with his wanderings. Here doubtless D. was welcome, and probably he was able to protect the inhabitants from the inroads of wild nomad tribes living farther to the south and east.

At this point the double narrative reappears, as is specially noticeable in the case of the two accounts of D. sparing Saul's life. That ch. 26 refers to a second occasion, although no reference is there made to a former proof of D.'s generosity, seems antecedently improbable; and this impression is confirmed on comparing the two narratives. Each is introduced by an offer of the Ziphites to betray D.'s hiding-place to Saul (23^{19} 26^1); each ends with a confession of D.'s noble conduct placed in the mouth of Saul; and a careful comparison of the language (see Kuenen, Budde) shows either literary dependence of one upon the other, or the dependence of both on some common tradition. Owing to the occurrence in ch. 26 of certain antique conceptions (esp. v.^{19}), it has commonly been supposed that this is the earlier chapter (so Kuenen, Wellh., Stade, Driver); Budde, on the other hand (so Cheyne), shows good reason for connecting ch. 24 with the A narratives, in which case it belongs to the earlier document, while the archaic colouring of ch. 26 may be due to the fact that it has undergone less editorial revision than the earlier chapter (see esp. $24^{20f.}$). Budde further argues from the scene of ch. 25 (Maon v.^{2} LXX^1, cf. $23^{24ff.}$) that this chapter came originally between chs. 23 and 24, probably having been transposed in order to separate the doublets, chs. 24 and 26. There are other traces of editorial revision in ch. 23, especially in the somewhat exaggerated language of v.$^{14f.}$, and the redundant description of D.'s haunts (*ib.*) is probably the result of conflation. Many regard the covenant of the two friends (vv.$^{18.18}$) as a mere doublet of 20^{11-23}; like that passage, the verses suggest the objection that Jonathan could hardly have thus definitely regarded D. as his father's successor. However this may be, the narrative proceeds smoothly after the account of Jonathan's visit, when the transposition above mentioned has been made.

While D. was hiding in the hill of Hachilah and the neighbouring desert, the Ziphites sent word of his haunts to Saul, and at the king's request began to watch his movements, while an army was being collected. D. meanwhile withdrew southwards to the wilderness of Maon, on the edge of the Arabah, whither he was pursued by Saul. At one time, we are told, a single rocky ridge separated the two forces; but while D. was endeavouring to make good his escape before his band was completely surrounded, Saul was unexpectedly recalled to repel a sudden raid of the Philistines. Popular tradition pointed out the cliff known as *Sela-hammaḥlĕḳôth* (*i.e.* prob. 'Rock of Divisions') as the scene of this narrow escape (23^{19-29}).

One of the most detailed and most reliable accounts which we possess of the whole period of D.'s wanderings relates to the time when he was still in the region of Maon. Here dwelt a wealthy landowner named Nabal, belonging to the Calebites, a tribe closely connected with that of Judah, though originally distinct from it. His large flocks were pastured on Carmel, S.E. of Hebron; and not only were they unmolested by D.'s men, but the latter had served to protect them from the attacks of nomad tribes. Hearing that Nabal was shearing his sheep, D. sent ten men with a courteous request for a present for his band, but was met with a churlish refusal. In wrath D. at once commanded his men to arm; and while a third of the company was left in charge of the baggage, he marched with the rest to avenge the insult received from Nabal. Fortunately Abigail, Nabal's beautiful and prudent wife, had been warned by a servant of her husband's unseemly conduct. She immediately caused a large supply of provisions to be prepared, and without informing her husband rode to meet D. with her present. She met the armed band coming down the mountain side, and throwing herself at D.'s feet begged him to accept the gift, and to pay no heed to her husband's insults, while she expressed a hope that in time to come no remembrance of blood needlessly shed might rise up to trouble his mind. Her discretion and her pleadings were not lost on D.; he accepted the present from her hand, and abandoned his purpose of vengeance and bloodshed. When Abigail returned home, she found her husband drunk at a shearing feast, but next morning she told him of the danger which he had just escaped. Fear and vexation caused a shock, of which he died ten days later; and D., who felt that now J″ had indeed defended his cause, took Abigail to wife. He thus established a powerful family connexion with the south of Judah, and he further increased his influence by marriage with Ahinoam of the southern Jezreel (cf. Jos 15^{56}). At the same time his first wife, Michal, was given by Saul to Paltiel, the son of Laish, of Gallim (1 S 25).

It seems to have been after this, according to the original history of A, that David removed to the desert tract west of the Dead Sea, and made his abode in Engedi, whither he was followed by Saul, after the retreat of the Philistines. We are told that on one occasion Saul entered a large cave for a necessary purpose, at a time when D. and his men were hidden in the recesses of the cave. Though urged by his followers to slay his pursuer, D. refused to harm the 'Anointed of J″,' and contented himself with cutting off a corner of the long robe which lay spread out before and behind the owner. D. followed Saul as he left the cave, and, holding out the portion of his robe, showed the king how he had been at the mercy of the man whom he was so relentlessly pursuing; and he begged him no longer to listen to those who charged D. with conspiring against him. Saul was touched at this generosity; and in language which clearly reflects the thoughts of a historian of a later time, he is made to openly acknowledge his rival's superiority, and to recognize him as the future king of Israel (1 S 24). The other version of this story (ch. 26), which, though coming from a later document, has preserved many original features lost in ch. 24, places D. in the hill of Hachilah, and attributes his pursuit hither by Saul to the information of the Ziphites. One night Saul encamped in a deep valley surrounded by steep cliffs; but the place being discovered by D.'s spies, D., accompanied by Abishai, descended from the hills, and entered unobserved into the laager where Saul lay sleeping. Refusing to allow Abishai to smite a sleeping enemy, he bade him carry away Saul's spear and water-cruse; and when they had again climbed the hill above the camp, D. shouted aloud, and thus aroused first Abner, whom he blamed severely for his careless watch, and then Saul himself. To Saul, who recognized his voice, D. made a passionate appeal: 'Why did the king continually pursue him? if J″ had stirred him up to do so, might he be propitiated with an offering; or were men seeking to drive D. out of J″'s land?' The king confessed that he had sinned, and promised to do D. no more harm, and the two parted their several ways.

Whatever be the exact details of this meeting, it is clear that D. felt himself no longer safe in Judah, and as a last resort he passed over to the national enemy, and took refuge with his family and his followers at the court of Achish, son of Maoch, king of Gath. A tried warrior at the head of 600 men, he was readily welcomed; but, not liking to dwell in the capital, he asked for a settlement of his own, and received the southern town of Ziklag, where he established himself as the vassal of his protector. It was now necessary for David to devise some means of ensuring the confidence of his master without injuring or estranging his own people. Accordingly, he made a succession of raids upon the Amalekites, Girzites, and other desert tribes living between Egypt and the south of Palestine. By putting to death all who fell into his hands, D. was able to represent to Achish that his frays were directed against Judah, and against the allied tribes of the Kenites and Jerahmeelites (1 S 27). He had been living at Ziklag some 16 months (v.^{7}), when the Philistines prepared for a decisive struggle against Israel. Achish called upon his vassal to accompany him to the war, and D. with professions of fidelity responded to the call. He had now placed himself in a false and dangerous position. Even if he were willing to aid the Philistines against his fellow-countrymen, success in the war would have effectually prevented him from becoming the accepted leader of Israel. Fortunately, the other Phil. leaders were less ready than Achish to trust him. When D. and his troops appeared in the rearguard with Achish at Aphek, as the Philistine hosts were mustering, the princes protested against the presence of the famed Israelitish leader, and urged that treachery to them in battle would be the surest way to a reconciliation with the king of Israel. Achish was therefore reluctantly compelled to bid D. depart, and next morning he turned homewards with his men (chs. 28$^{1f.}$ 29). Two days later they reached Ziklag, to find that a sudden raid of the Amalekites had laid the town in ruins and carried the inhabitants captive. D. was the first to recover his composure, and, encouraged by an answer from J″ given through the ephod of Abiathar, he started to pursue the foe. At the brook Besor, probably the *Wady Esheria* south of Gaza, 200 of his men were compelled to remain, overcome by fatigue. The pursuit, however, was continued, and an Egyp. slave, who was found half dead in the way, offered in return for a promise of life and liberty to guide D. to the enemy's encampment. The Amalekites were surprised at dusk while feasting, and few of the men escaped. All the captives were recovered, and a large booty was taken. On the return to the brook Besor, a dispute arose as to the right of the men who had been left there to share in the spoil. D., however, decided in their favour, and thus established the principle that those who fought and those who guarded the baggage should share alike. Of the rich spoil D. had a further use to make, for he sent costly presents to the elders of Hebron and other towns in the south of Judah, where he had been accustomed to find shelter during his earlier outlaw life (ch. 30). In this way he secured friends whose assistance was soon to be of the highest importance to him. It would seem, indeed, that these presents were sent *after* the battle of Gilboa, for it was only two days after his return to Ziklag that D. heard of the defeat of Israel and the death of Saul and his three eldest sons. The tidings were brought by a young Amalekite, who is said to have presented to D. the royal crown and bracelet; but the account given by him of the death of Saul (2 S 1^{1-10}) cannot be reconciled with the more reliable narrative in 1 S 31. The messenger was rewarded for his tidings by being at once put to death (2 S 1^{13-16}, cf. 4^{10}); the defeat of Israel was commemorated with mourning and fasting, while D. himself expressed in a beautiful ode his grief for Saul and Jonathan. Of both he speaks in tones of warmest respect and affection; his love for Jonathan is expressed in a burst of passionate feeling; but it is noticeable that no religious thoughts are contained in the poem. Its genuineness is not unquestioned, but its Davidic authorship is accepted by Kuenen, Wellh., Stade, Budde, Cheyne, Driver, and others.

The opportunity had at last arrived for D. to return to his native country. After inquiring of J", he removed to Hebron, the ancient sacred city of Judah, accompanied by his family and his followers with their households. His presents had already gained him the goodwill of the Judæan elders; a renowned warrior of their own tribe was more likely to defend their interests than a younger descendant of the house of Saul; and D. was forthwith anointed king in Hebron (2 S 2^{1-4}). We hear of no opposition on the part of the Philistines. D. still retained Ziklag (1 S 27^{6}), and doubtless continued to be a Philistine vassal. A division of the Isr. kingdom was conducive to the Philistine supremacy. According to the Chronicler, he had received accessions to his forces, outside his own tribe, while still at Ziklag; twenty-two men are named of Saul's tribe (1 Ch 12^{1-7}), while of the tribe of Manasseh several chiefs are said to have deserted to D., when he came with the Phil. army against Saul, and to have assisted him against the Amalekites (*ib.* vv.$^{19-22}$). The Chronicler, indeed, makes no direct mention of the reign of Eshbaal (Ishbosheth), or of the division of the kingdom, but in reality there were still several years of fighting and waiting before D. was recognized as king over all Israel.

D.'s first public act was at once generous and politic. He sent messengers to the men of Jabesh-gilead, and thanked them for their loyal and courageous conduct in rescuing the bodies of Saul and his sons. But the adherents of the house of Saul still remained true to the family. The natural heir to the throne was the only surviving legitimate son of the late king, Ishbosheth, or rather Eshbaal (1 Ch 8^{33}), who was perhaps still under age; for the later gloss in 2 S 2^{10} is certainly incorrect. His kinsman Abner, Saul's powerful general, retired with him across the Jordan to the ancient city of Mahanaim, and there made Eshbaal king. His dominions extended over Gilead and Geshur (Vulg. and Syr.), and on the west of Jordan over Jezreel, Ephraim, and Benjamin; but Abner was the real ruler and the support of the dynasty, and perhaps he, too, was compelled to recognize the over-lordship of the Philistines (so Kamphausen). Regarding the seven years during which D. reigned at Hebron we have but the scantiest information. He seems to have acted on the defensive, and probably felt that his cause would gain by waiting. Possibly, it was only by degrees that Abner extended his authority, so that some time elapsed before the rival forces were brought into collision. Only of one engagement is any account given; Joab's followers were victorious, but in the flight Abner killed Asahel, Joab's youngest brother. The cause of Eshbaal was declining even before he alienated his protector Abner, whom he reproached for taking one of his father's concubines. In anger Abner entered into communication with D., offering to bring over the whole kingdom into his hands. The only condition made by D. was the restoration of his wife Michal, through whom he doubtless hoped to support his claim as Saul's successor. Michal was sent back by Eshbaal's orders, and Abner conferred with the elders of the various tribes, who had already begun to recognize the inability of the house of Saul to defend them against their foes, and to look to D. as the one hope of the nation. Abner then visited Hebron, where he was entertained by D.; but on his departure he was murdered by Joab, in revenge for his brother Asahel. D. already began to find his loyal but unscrupulous nephew too strong for him. He could only express his abhorrence of the murder, which was indeed likely to alienate the supporters of Saul's house, and cause Abner to be honourably buried in Hebron, while he himself composed the funeral dirge—conduct which further increased the king's popularity (2 S 3). The death of Abner could not long delay the fall of Eshbaal; two Benjamite captains shortly afterwards murdered him during his midday sleep, and brought his head to D. in Hebron. The king commanded the instant execution of the murderers, while Eshbaal's head was buried in the tomb of Abner (ch. 4). D., who had formerly led Israel to victory against the Philistines, was now recognized as the natural leader of the people; the elders of the nation assembled at Hebron, a solemn league was made, and D. anointed king over the whole of Israel. He is said to have been at this time 37 years of age (2 S 5^{1-5}). The Chronicler gives an account of the bodies of men sent by the different tribes to make D. king, and of the three days' feast which they kept at Hebron (1 Ch 12^{23-40}); but the language used is that of a later time, the numbers given are in most cases certainly too large, while the position assigned to the contingent of priests and Levites does not increase our confidence in the narrative.

Except for the important record of events in D.'s family, our accounts of his reign are fragmentary and incomplete; our history is not arranged in a strictly chronological manner, and the time and order of events must be to some extent a matter of conjecture. In spite of the present arrangement of 2 S 5, there can be little doubt that the Phil. wars were the first important events after D.'s recognition by the whole nation. The task imposed upon him by his election as king was that of freeing his country from Phil. domination. It was no longer possible for him to continue a vassal to a foreign power, nor were the Philistines likely to acquiesce, when without their consent he assumed sovereignty over all Israel. When, therefore, 'the Phil. heard that they had anointed D. king over Israel' (2 S 5^{17}), they at once invaded the country. D. seems to have been unprepared, and was compelled 'to go down to the hold,' *i.e.* probably the old stronghold of Adullam, of such importance during his outlaw life, while the Philistines penetrated to the heart of the country and occupied Bethlehem and the Valley of Rephaim, probably between Bethlehem and Jerusalem (2 S $23^{13f.}$; so Stade, and Kittel who places the valley of Rephaim north of Jerusalem). Of the duration and progress of the war we have no certain information, but some detached notices of it have been preserved. It was while the Philistines had a garrison in Bethlehem that the three 'mighty men' forced their way to the well by the gate, to bring D. a draught of water for which he had expressed a wish; but the gift obtained at such a risk was too precious to drink, and D. poured out the water as an offering to J" (2 S 23^{13-17}). Other incidents of the war are recorded in 2 S 21$^{15-22}$. At Gob D. was nearly slain in combat with a giant, but rescued by Abishai, and in consequence D.'s men declared that he should no longer risk his life in battle. On another occasion Elhanan of Bethlehem slew Goliath of Gath, and other feats of D.'s heroes are recorded (2 S 23$^{8-12}$). A decisive battle was fought at Baal-perazim, where D., encouraged by an oracle, attacked his enemies, and dispersed them 'like a breach of waters,' and the images of the enemy were carried off as booty (2 S 5$^{18-21}$, cf. Is 28^{21}). Another decisive engagement took place in the valley of Rephaim. D. on inquiring of J″ was bidden not to make a direct attack, *i.e.* from the south, but to take the enemy in the rear, and attack them when a rustling noise was heard in the *Baca* trees. He was again completely successful, and the Philistines were defeated from Gibeon to Gezer (1 Ch 14$^{13-17}$, 2 S 5$^{22-25}$). Following up his victories, D. destroyed the Philistine supremacy, taking from them, as is said, 'the bridle of the mother city' (2 S 8^{1}). The importance of these victories must have been far greater than the scanty notices of them would at first suggest.

The nation was now freed from external oppression: the next task was to weld it into one whole. A great step towards this end was the capture of Jebus, and the creation of a new capital. A Can. tribe still unsubdued occupied the district between Judah and Benjamin, settled round the city of Jebus, from which they derived their name. The strong fortress of Zion, standing on the eastern ridge between the Kidron and the so-called Tyropœan valley, protected their city (see JERUSALEM). Situated as it was in the centre of the land, and commanding the principal lines of communication between north and south, and between east and west, it was admirably suited for a capital; and here D. marched with his forces. The inhabitants, trusting in their strong walls, derisively declared that 'the blind and lame' would be sufficient to defend them. Nevertheless, the place was taken by storm (2 S 5$^{6-10}$). According to 1 Ch 11^{6} Joab was the first to scale the walls, and received in reward the post of commander-in-chief. The city was newly fortified, and here D. removed with his family and court. The importance of this step can hardly be overestimated. Gibeah of Saul and Hebron were merely tribal capitals; Jerus. stood on neutral ground, and was the capital of the whole nation, while, bordering alike on Judah and Benjamin, it would be regarded with favour by the king's own tribe and by that of his predecessor. The choice of the site is a signal proof of D.'s genius and statesmanship. Here gathered now inhabitants from all Israel, but mainly, no doubt, from Judah and Benjamin, while, to judge from the case of Araunah (2 S 24$^{18-25}$), the original Jebusite population was allowed to retain its former possessions. The effects of the capture of Jerus. were felt beyond the borders of Israel. Hiram, king of Tyre, entered into friendly relations with D., and supplied him with builders and material for a palace in his new capital. In true Oriental fashion D. marked the fresh increase of his power by increasing his harem. While still in Hebron he had married four more wives, and had already six sons: Amnon the firstborn, the son of Ahinoam of Jezreel; Chileab the son of the prudent Abigail; Absalom the son of Maacah, daughter of Talmai, the Aramæan king of Geshur; Adonijah the son of Haggith; Shephatiah the son of Abital; and Ithream the son of Eglah (2 S 3$^{2-5}$; cf. 1 Ch 3$^{1-3}$, where Daniel is put for Chileab). Michal, who had been restored to David, unfortunately bore no children; otherwise the grandson of Saul would have been the natural heir to the throne, and the subsequent disputes with regard to the succession would have been avoided. On removing to Jerusalem D. took fresh wives and concubines from this place, and the names of several more sons are recorded (2 S 5$^{13-16}$, 1 Ch 3$^{5-9}$ 14$^{3-7}$; on variations in the three lists, cf. Driver, *Text of Sam.*). We must not judge D. herein from a modern Western standpoint. In the East a man's wealth and power are to a great extent measured by the number of his wives and the size of his family; and by politic alliances, as, for example, with the daughter of the king of Geshur, D. increased his influence at home and abroad. At the same time he introduced into his capital the source of many of the dangers and corruptions of an Oriental court, and the evil was increased by the weak affection with which D. treated his favourite sons.

The next measure was to make the political capital also the religious centre of the nation; and for this purpose D. resolved to bring up to Jerus. the old sacred ark, which had for many years been left at Kiriath-jearim (1 S 7^{1}), or Baal-judah (2 S 6^{2}; cf. Jos 15$^{9.60}$, 1 Ch 13^{6}). Thither D. went with a large number of Israelites; the ark was drawn in a new cart, accompanied by two of its attendants, Uzzah and Ahio; while D. and his subjects marched behind to the strains of festal music. But at Nacon's threshing-floor, probably not far from Jerus., Uzzah, while attempting to steady the ark, suddenly fell dead. Dismayed at this occurrence, D. was afraid to have so dangerous a symbol near him, and the ark was placed in the house of Obed-edom the Gittite, probably one of David's Philistine mercenaries. Three months later, however, on hearing that the ark had brought blessing upon this house, D. took courage to carry out his original design. This time the ark was safely carried in triumph into the 'city of David,' while the king himself, wearing a priestly linen ephod, danced in the procession before it. A tent had already been prepared for its reception in the citadel; here solemn sacrifices were offered, after which the people were dismissed with the king's blessing and gifts of food. When D. returned to his house, he had to meet the scoffs of Michal, who taunted him with his undignified appearance in the procession that day; but the king with true dignity expressed his readiness to dance before J″, who had chosen him above the house of Saul. To this irreverence of Michal's was attributed the fact that she remained childless: but she had at this time been married some fifteen or twenty years.

It is instructive to compare with the narrative of 2 S 6 the account given by the Chronicler of the bringing of the ark to Jerus. (1 Ch 13. 15. 16). The old history is largely rewritten to bring it into accordance with later ideas and institutions. An important place in the ceremonial is assigned to the priests and Levites, who in the older version are conspicuous by their absence: Obed-edom of Gath becomes a Levitical musician and doorkeeper.

The contrast between the simple tent for the ark and his own palace suggested to D. the need of building some more permanent temple; but the king's adviser, the prophet Nathan, who had at first approved of the design, subsequently induced D. to abandon it. Possibly, both prophet and people feared the effects of innovations in religious matters. Nathan's message to D. is contained in 2 S 7, a chapter which in its present form shows the influence of Deut., but is in the main of somewhat earlier date (see Budde). There we are told how Nathan, the night after his approval of D.'s design, received from God a message for the king: Never yet had J″ required a temple of the judges of His people; tent and tabernacle had been sufficient hitherto. D. should not build a house for Him; He would build a house (*i.e.* a line of descendants) for D.; and though D.'s seed might need to be chastised, God's mercy should not depart from them, (v.^{13}, which speaks of D.'s successor, who was to build a temple for J″, seems not to belong to the original form of the chapter; it weakens the antithesis of vv.^{12} and ^{14}). This message is followed by a beautiful prayer, in which D. thanks God for all His goodness to himself and his people.

It was probably soon after his settlement in Jerus. that D., in remembrance of his covenant with Jonathan, inquired whether there remained yet any survivors of Saul's house, whom he might benefit for the sake of his friend. He was told that there was still a son of Jonathan, and at D.'s orders Mephibosheth or Meribaal (1 Ch 8^{34} 9^{40}) was brought from the house of Machir at Lo-debar; the property of Saul, apparently confiscated, was restored to him, and given to Ziba, a former servant of Saul's family, who was to till the ground for his master, while Meribaal dwelt at Jerus., where his conduct would be under the royal supervision, and ate at the king's table. Meribaal was lame, having been dropped by his nurse as she fled on hearing of the Israelite defeat at Mt. Gilboa. He was then five years old; now he is described as having a young son, an indication that these events took place some ten years after D. became king over all Israel. With other descendants of Saul, however, D. was compelled shortly afterwards to deal in a different manner. The land was afflicted with drought, and consequent famine, for three years, and D., on inquiring of the sacred oracle, was told that a curse of blood rested upon the land, because of an attempt made by Saul to exterminate the Gibeonites, an Amorite tribe bound by a covenant to Israel. The only compensation which the Gibeonites would accept was that seven of Saul's sons should be put to death; and D. delivered to them the two sons of Saul's concubine Rizpah, and five sons of his daughter Merab (MT wrongly Michal). These were accordingly hanged to J″ in the sacred hill of Gibeon (cf. Driver, *Text of Sam.*), while the corpses were lovingly watched by the devoted Rizpah, till the first rains showed that the atonement was accepted. Then D., in recognition of the mother's devotion, gave orders for the burial of the corpses; and the bones, as well as those of Saul and Jonathan, were interred in the ancestral sepulchre of Kish (2 S 21^{1-14}). This occurrence must be placed after the recognition of Meribaal (v.^{7}), but before the rebellion of Absalom (2 S 16^{8}). We have no right to blame D.'s action in this matter; he acted in accordance with the religious beliefs of his time, and with what he conceived to be the best interests of the nation; and, in spite of Shimei's reproaches, we may believe that D.'s contemporaries regarded the matter in the same light as himself.

Under D. the kingdom was more completely organized than it had been under his predecessor, and the administration was intrusted to royal officers (2 S 8^{16-18}, 20^{23-26}). Foremost of these was Joab the son of Zeruiah, D.'s nephew, who was commander-in-chief of the whole army; the scribe or chancellor, to whom belonged the control of all official documents, was Shisha (1 K 4^{3}; corrupt readings in 2 S 8^{17} 20^{25}, 1 Ch 18^{16}); the state historian or chronicler (*mazkîr*, *i.e.* remembrancer), Jehoshaphat the son of Ahilud; Adoram controlled the levy, *i.e.* the forced service exacted by the king from his subjects; at the head of the priesthood, beside Abiathar, the representative of the house of Eli, stood Zadok, the ancestor of the later priestly house, but of his origin or appointment no authentic information is preserved; Ira, a Manassite of the family of Jair, was another priest, and D.'s sons also performed priestly duties. Traces of a royal council are to be found in allusions to Ahithophel, D.'s counsellor (2 S 15^{12}), and to Hushai, D.'s friend (*ib.* v.^{37}, cf. 1 K 4^{5}). A very important institution was that of the royal bodyguard, taking the place of the 'runners' of Saul (1 S 22^{17}). The nucleus of it was doubtless David's old band, which had accompanied him during his wanderings and his residence at Ziklag. The technical name of this force was the *Gibborim*, heroes or mighty men; and their numbers were probably kept at the traditional 600. They were now largely recruited from foreigners, especially Philistines and Cherethites, a people of the south of Palestine (1 S 30^{14}, Zeph 2^{5}), perhaps originally connected with Crete; hence the guards were commonly called the **Cherethites and Pelethites** (wh. see). That these were the same body as the Gibborim appears from 1 K $1^{8.\,10.\,38}$: the text of 2 S 15^{18} is too uncertain to form an argument to the contrary. The whole corps was under the command of Benaiah the son of Jehoiada. Included in or distinct from this guard, was a select body of *Thirty* distinguished for special valour, over whom was Abishai, the brother of Joab; while *Three* warriors are named as ranking even higher than Abishai and Benaiah (2 S 23^{8-39}, and cf. Driver, *ad loc.*). This guard of experienced soldiers formed the only standing army in the kingdom; and being stationed in the capital (cf. 2 S $11^{8\text{ff.}}$, Neh 3^{16}) they became a powerful support to the king's authority, and ensured the discharge of his orders. As will appear later, they played an important part at the accession of Solomon.

For war on a large scale the army still consisted of the whole male population of military age, who were summoned to arms in time of danger. The force seems to have consisted wholly of infantry, except for a few chariots and horses retained after the defeat of Hadadezer (2 S 8^{4}). But when D.'s wars of foreign conquest began to involve protracted campaigns, and long absence from home, some new system became desirable. It was perhaps partly to meet these requirements that D. instituted the **census**, which was carried out evidently after the completion of the Syrian wars, for his officers travelled as far north as the Hittite city of Kadesh (2 S 24^{6}, LXX. Luc.). The military aspect of this measure is clear from its being intrusted to Joab and the captains of the host (v.^{4}, 1 Ch 21^{2}); but the census may have been also intended as a basis for a regular system of fixed taxation, to meet the needs of an organized government. The measure was regarded with suspicion, perhaps as involving an undue increase of royal authority, and even Joab protested against it; nevertheless, he carried out his task in 9 months and 20 days. A severe pestilence, which visited the land immediately afterwards, was regarded by D. and the people as a sign of the divine displeasure. We are told that the prophet Gad offered D. the choice of three punishments—three years' famine (LXX, 1 Ch), three months' flight before his enemies, or three days' pestilence; and that the king chose the last, preferring to fall into the hand of God rather than of man. But when the destroying angel reached Jerus., he was bidden, in consequence of D.'s penitence, to stay his hand; and D., at Gad's bidding, bought the threshing-floor of Araunah or Ornan (Ch) the Jebusite, and offered there a sacrifice, whereby he obtained from God mercy for the land (2 S 24). The place of sacrifice became afterwards the site of Solomon's temple (2 Ch 3^{1}). The narrative shows that we must not expect to find for D.'s reign careful records of the numbers and divisions of the people. Yet such statistics are presupposed by the Chronicler, who in his account of David's armies and officers (1 Ch 23–27) describes a far more numerous and elaborately organized body of religious and civil and military officials than is likely to have existed in the time of David. Fragments of old records may be incorporated in his work (*e.g.* 1 Ch 27[25-31]); but the older history shows no trace of the thousands of Levites, or of the bodies of 24,000 men continually under arms (1 Ch 27[1-15]) of which the later historian speaks.

Of most of D.'s wars we possess but a short summary in 2 S 8; the Ammonite war, on account of its connexion with Bathsheba's history, is related at length. The complete victory over the Philistines (8[1]) has been already named. For some unexplained reason D. made war on Moab, where his parents had formerly taken refuge, and, on conquering the country, treated it with great severity, putting to death two-thirds of the prisoners. The exploits of Benaiah (2 S 23[20]) may be referred to this campaign. Moab now became tributary. The next war was provoked by the neighbouring Ammonites. Their king, Nahash, Saul's enemy (1 S 11), had shown himself friendly to D., and on his death D. sent an embassy of condolence to his successor Hanun. But Hanun, suspicious of D.'s intentions, and perhaps alarmed by the subjugation of Moab, dismissed the messengers with gross insults. The Ammonites knew that they must now prepare for war, and sought for alliances among the small Aramæan kingdoms of Zobah, Beth-rehob, Maacah, and Tob, which were united in a common interest to check the rising power of Israel. Joab, with the Isr. army, marched out to Rabbah, the Ammonite capital, and, finding an enemy opposing him on both sides, divided his forces. With the picked troops he prepared to meet the Aramæan allies, 33,000 strong, while the rest of the army he placed under the command of his brother Abishai, to confront the Ammonites. The rout of the Syrians by Joab was the signal for the flight of the Ammonites within the walls of their capital, and thus ended the first campaign. The next year Hadadezer, king of Zobah, summoned to his assistance allies from beyond the Euphrates. The whole Aramæan force, under his general Shobach, was encamped at Helam, where D. himself, having crossed the Jordan at the head of the whole Isr. army, attacked them, and defeated them with great slaughter, Shobach being among the slain. All the chariot-horses which were captured were disabled, with the exception of sufficient for a hundred chariots. The summary (8[5]) seems to speak of another great victory won by D., when the Syrians of Damascus came to the assistance of Hadadezer. Zobah now made peace with Israel; prefects were appointed in Damascus and elsewhere, and, in addition to numerous presents, D. brought back to Jerus. the golden shields of Hadadezer's guard, and large quantities of brass from two of his treasure cities. An alliance was made between D. and Tou (v.[9f.] LXX, 1 Ch 18[9f.]), king of Hamath, and Hadoram (1 Ch 18[10]) the son of Tou was sent with presents and greetings to David. These and other treasures, including spoil taken from the Amalekites, D. is said to have dedicated to J″ (2 S 8[10]). Ammon remained unsubdued, but in a third campaign Joab besieged Rabbah, and at last succeeded in capturing the part known as 'the city of waters.' As the fall of the whole city was now assured, Joab summoned D. from Jerus., that the king himself might have the glory of the conquest. D. advanced with a fresh army, and completed the capture of Rabbah. A large amount of spoil fell into his hands, including the costly gold crown of the idol Milcom (RVm, see 2 S 12[26-31]). The prisoners, according to the ordinary translation of 12[31], were tortured and treated with great cruelty. There are, however, difficulties about the rendering of the verse; a slight change of reading (הֶעֱבִיד for הֶעֱבִיר, see RVm) would give the meaning that the people were reduced to servitude (so Hoffmann, Kautzsch, Driver [doubtfully]; Stade regards the verse as corrupt). The last of D.'s foreign conquests was that of Edom, but we have only a few disconnected allusions to the war. It appears that D. gained a great victory in the Valley of Salt after his Syrian campaign (2 S 8[13f.] LXX, 1 Ch 18[11f.], Ps 60 title). By this conquest he obtained command of the ports on the Red Sea. Prefects were appointed throughout the country, and for six months Joab remained in Edom, to destroy the male population (1 K 11[15f.]).

It now remains to relate certain events in D.'s own family which troubled the later years of his reign. During the Ammonite war, D., who had remained in Jerus., committed adultery with Bathsheba, the wife of one of his officers then serving before Rabbah. In hopes of concealing his guilt he sent for Uriah; but the latter, who had perhaps heard rumours of what had taken place, refused, on the plea of military duty, to see his wife. Thereupon D. sent orders to Joab to place Uriah in a post of danger, and ensure his death. When the husband was dead, and the time of mourning past, Bathsheba was taken into the royal harem. The story was doubtless not unknown in Jerus.; the moral sense of the people found expression through Nathan the prophet, who by means of a parable boldly rebuked David; and though on the king's confessing his guilt the prophet assured him of forgiveness, he predicted the death of Bathsheba's newly-born child. (2 S 12[10-12] are perhaps a later addition, a true comment on the subsequent history; for it has been pointed out that with the old Heb. ideas of guilt and penalty it is hardly consistent to regard the sin as forgiven [v.[13]] while the curse remains. So Kuenen, Wellh., Stade.) In spite of all D.'s prayers and fastings, the child died; but in due time a second son was born to Bathsheba, the future king Solomon (2 S 11. 12[1-25]).

It was probably not long afterwards that the fruit of D.'s evil example appeared. His eldest son Amnon outraged his half-sister Tamar, and when D., though greatly displeased, yet partly from partiality for his firstborn (13[21] LXX), partly perhaps from the remembrance of his own guilt, failed to punish the offender, the duty of avenging the maiden's wrong fell to her own brother Absalom. He waited his opportunity for two years, and then caused Amnon to be murdered at a sheep-shearing feast, to which all the king's sons had been invited. Absalom fled to the court of his grandfather, the king of Geshur. D. mourned long for his firstborn, then his longings turned to the son in exile; but out of season he could show severity. For three years Absalom remained in banishment; then Joab, divining the king's secret feelings, by the instrumentality of the woman of Tekoa procured his recall. For two years longer Absalom was excluded from the court, until he compelled Joab to intercede for him; then he was brought to the king, and received a kiss of reconciliation (2 S 13. 14). After the death of Amnon, and probably also of Chileab, Absalom was the natural heir to the throne. He was now completely estranged from his father, and soon began to endeavour to supplant him. To impress the people, he assumed royal state; to gain their favour, he would stand by the gate to meet all who came to the king with their suits, and lament that he was not king to do them justice. Thus he 'stole the hearts of the men of Israel.' There is no evidence that D., who used to 'execute judgments and justice to all his people' (2 S 8[15]), now neglected to do so. The stories of Nathan and the woman of Tekoa imply the contrary, but with the extension of the borders of Israel the number of suits may well have increased beyond the king's power to deal with them. We cannot say whether the crimes in the royal household had shaken the loyalty of the people,—in certain matters the nation at large did not show itself very sensitive to moral irregularities (2 S 16[21-23]),—but it is probable that at Hebron the removal of the capital to Jerus. was still a grievance, and the tribesmen of Judah seem to have considered themselves not sufficiently favoured by the king. Absalom made preparations for four years (15[7] LXX. Luc.), then under pretence of a vow he visited the old sacred city of Hebron. Here he was joined by D.'s counsellor, Ahithophel of Giloh, perhaps the grandfather of Bathsheba (cf. 2 S 11[3] 23[34]), and Absalom's rebellion was proclaimed by messengers throughout the country. D. was taken entirely by surprise, and resolved to withdraw at once from Jerusalem. If he escaped the first attack of the conspirators, he possessed better troops than were to be found on the other side. Delay would increase the difficulties of his opponents, and give his supporters time to rally. Leaving the palace in charge of ten concubines, he crossed the Kidron, accompanied by his household and bodyguard, amid the weeping of the whole land, and took the road by Olivet to Jordan. Many traits of D.'s character are brought out during this flight,—the devotion which he inspired in his followers, when Ittai of Gath, though but a short time in his service, refused to leave him; his piety and confidence, when he commanded the priests to carry back the ark, trusting to J", without any outward symbol of His presence; his craft and dissimulation, when he bade Hushai ingratiate himself with Absalom, and try to frustrate his plans; his prudence, in establishing communications between himself and the capital by means of Ahimaaz and Jonathan; his impetuous hastiness in judgment, when he promised Ziba the lands of Meribaal; and at the same time his submission and forbearance, when he endured the curses of Shimei because J" had bidden him, and urged that a Benjamite had more right than his own son to seek his life (2 S 15. 16^{1-14}).

D.'s plan of meeting treachery by treachery was successful. By Ahithophel's advice, Absalom did take over his father's concubines as a token of succession to his throne; but, instead of pursuing D. at once, he accepted the counsel of Hushai, to wait till he could muster troops from the whole country. Ahithophel, who realized the artificial nature of the enthusiasm for Absalom, foresaw that this delay was fatal to the rebellion, and forthwith hanged himself. Warned by the two priests' sons, Ahimaaz and Jonathan, of the need of haste, D. and his followers crossed the Jordan in safety before daybreak. He took up his headquarters at Mahanaim, the former capital of Eshbaal, and there received support from Shobi, the son of his old protector the king of Ammon, who may now have been a vassal prince; from Machir, the guardian of Meribaal, and from a wealthy Gileadite named Barzillai (16^{15}–17). Absalom was the first to act on the offensive, and crossed the Jordan with his army. D. was prevented from going into battle by the entreaty of the people, who urged that he was worth 10,000 of them; but he publicly charged his generals, Joab, Abishai, and Ittai, to deal gently with Absalom. Joab knew that he was strong enough to disobey, and that the death of the leader would put an end to the rebellion. D.'s soldiers were victorious, and Joab himself slew Absalom as he hung in the branches of a large terebinth. D. by the gate of Mahanaim awaited anxiously the issue of the day; then he forgot all else in his passionate grief for his ungrateful son. Joab, however, roused him to put his duty as a king above his private feelings as a father, and D. returned to the gate to receive the greetings of his servants who had risked their lives for him (18–19^{8}).

Only tact and diplomacy were now required to bring about the king's return. Among the tribes of Israel a speedy revulsion of feeling took place, and they repented of their ingratitude to the king who had saved them from their enemies. But Judah still stood aloof; D. therefore sent to Zadok and Abiathar, to influence in his behalf the elders of his own tribe, and to urge them not to be behind the rest of Israel in bringing back their king. At the same time he sent a special message to Amasa, the son of his sister Abigail, whom Absalom had made commander-in-chief, and swore to give him the office now held by the self-willed Joab. The men of Judah were soon won over; and when, in response to their invitation, the king returned homewards, the tribe assembled at Gilgal on the Jordan to welcome him. Shimei came with them at the head of a thousand Benjamites, and implored D.'s pardon, which was freely granted. In spite of Abishai's remonstrance, D. would not have the day of his triumph marred by putting any man to death. To Meribaal, however, who also came to meet the king, D. gave less than justice. Meribaal charged Ziba with slandering him, and failing to provide him with an ass to follow D. in his flight; Ziba had said that his master was waiting in Jerus. in hopes of recovering his grandfather's throne. It was not easy to decide where the truth lay, and D. hastily dismissed the matter by bidding the two divide the land. The king appears in a more favourable light when he turns to reward his benefactors. He pressed the aged Barzillai, who accompanied him to Jordan, to come and live with him in Jerus.; and when Barzillai pleaded to be excused, on the ground of his great age, his son Chimham was allowed to take his place and be the recipient of the royal favours. But even before the king reached Jerus. it appeared that he had not succeeded in conciliating Judah without exciting the jealousy of the other tribes. While he had sent special messengers to his own tribesmen, he had taken no notice of the half-expressed goodwill of the rest of Israel. When therefore, at Gilgal, half the host of Israel came to escort D. home, they complained that the men of Judah had stolen him away; they had been slighted, although they had ten parts in the king, and the rights of the firstborn (2 S 19^{43} LXX). A sharp dispute arose between the two sections of the nation, and a Benjamite, Sheba the son of Bichri, gave the signal for a fresh revolt. The men of Israel followed him, renouncing all part in the son of Jesse, while the men of Judah accompanied D. to Jerusalem. It was necessary to take immediate steps against the rebels. D. therefore bade Amasa assemble the forces of Judah within three days, thus tacitly depriving Joab of the supreme command. Amasa delayed beyond the appointed time, and D. was compelled to have recourse again to his old tried general. Joab (20^{6} Pesh., MT Abishai) was bidden to take the royal bodyguard, 'the mighty men,' and pursue after Sheba. At Gibeon Amasa met him. It might have been expected how Joab would treat his rival; he took his opportunity to murder him, and then, with his troops, hastened to Abel-beth-maacah, a town in the far north of the country, where Sheba had taken refuge. To save the town the inhabitants delivered up Sheba's head, and the rebellion was at an end (19^{8}–20^{22}). From 2 S 24^{13} we may perhaps infer with Ewald that Absalom's rebellion lasted for three months.

Some years must have elapsed before the closing scene of D.'s life. The old warrior, who at the time of Absalom's rebellion was never without resource, and had to be kept back by his soldiers from the battle, is now seen in the feebleness of extreme old age, kept within the palace, where no clothing will supply warmth to his bodily frame, and he is nursed by a fair young damsel of Shunem, named Abishag. He had neglected to make any definite arrangements with regard to the succession to the throne, but his eldest surviving son was generally regarded as the heir. This was Adonijah, a young man of great beauty, who had always been indulged by his fond father. Like Absalom before him, he assumed the state appropriate to the heir-apparent. On his side were most of D.'s older supporters, including Joab and Abiathar, but another party in the palace favoured Solomon, the son of D.'s favourite wife, Bathsheba. To the latter belonged the prophet Nathan, who perhaps felt that Adonijah was not the fittest man to rule, Zadok, the younger and probably rival priest, and Benaiah the captain of the bodyguard. An obvious danger awaited the unsuccessful aspirant to the throne after D.'s death (cf. 1 K 1^{21}), and Adonijah resolved to make in good time a public declaration of his claims. He invited his supporters, including the king's sons and the royal officers of the tribe of Judah, to a feast at the sacred stone of Zoheleth, at the lower end of the Kidron Valley, and here the guests are said to have greeted Adonijah as already king. But tidings of this step were brought by

Nathan to Bathsheba, and at the prophet's advice she informed the king, and reminded him of a promise that her son should reign. By agreement Nathan came in and confirmed her words, whereupon D. repeated with an oath to Bathsheba the promise that Solomon should succeed. Then, rousing himself to act, the old king commanded Nathan, Zadok, and Benaiah to place Solomon on the royal mule, conduct him to the spring of Gihon, and solemnly proclaim him king. The support of Benaiah and the troops would make opposition useless. D.'s orders were carried out, Solomon was anointed, and a rejoicing crowd escorted the young king back to the city to set him on the royal throne. The shouts from Gihon, half-way up the Kidron Valley, had reached Adonijah at his feast, when Jonathan the son of Abiathar came in with news of Solomon's coronation. The guests fled, and Adonijah took sanctuary at the altar, but received from Solomon a promise of his life on condition of good conduct (1 K 1).

Our narrative in 1 K 2^{1-12} gives us an unpleasing picture of D.'s last days. He is represented as counselling Solomon to do good to Barzillai, but not to let Joab or Shimei die in peace. The genuineness of the narrative is much disputed. Vv.$^{2-4}$ are doubtless a later addition by a Deuteronomic editor; Wellh., Stade, Kautzsch reject the whole of vv.$^{1-9}$; but it seems more probable that vv.$^{5-9}$ formed part of the original document (so Kuenen, Budde, Kittel, Cheyne). Their historical character is another question, which can only be judged on subjective grounds. It is argued, with considerable exaggeration, that D. was too infirm to trouble about public matters, or to counsel his successor; and that another tradition gives us a religious song under the title of D.'s 'Last Words' (2 S 23^{1-7}). We must not measure the advice ascribed to D. by our own standard. A young and untried ruler like Solomon might be endangered by opponents whom D. was strong enough to spare; and the king, who had delivered up to death Saul's seven sons to atone for their father's guilt, may have feared that the curse of Shimei, or the murders of Joab, unless avenged, would bring down punishment on some other man. To us the words put into D.'s mouth do not appear seemly for a dying man, or in accordance with the noblest traits of D.'s character; it cannot be said they are impossible. Many would be glad to think that they are only due to the historian, who represented D. as the real author of some of Solomon's earliest acts, hoping to glorify the aged king, or else to clear the memory of the builder of the temple. It is easy to understand why a later historian preferred to ascribe to D. far nobler sentiments when he recorded the king's last words and his final charge to Solomon (1 Ch 28. 29).

D. is recorded to have reigned 7 years and 6 months in Hebron, and 33 years in Jerus. (2 S 2^{11} $5^{4f.}$, 1 K 2^{11}). Forty years is a conventional round number in Heb. chronology, but the figure is approximately correct. Absalom, who was born in Hebron (2 S 3^{3}), was grown up at the time of Amnon's outrage; his rebellion took place some 10 or 11 years later ($13^{23.38}$ 14^{28} 15^{7}), and, as was remarked above, several years must have intervened between this and D.'s death. Again, the Philistines and Moabites had been subdued before the Ammonite war; the marriage of Bathsheba took place in the third campaign against Ammon; and Solomon, her second son by D., was of full age when he came to the throne. Since D., when he first appears before Saul, is a tried warrior, he must have died at an advanced age. According to 2 S $5^{4f.}$ he reached 70 years. He was buried in the capital, which received from him the name of the 'city of David'; and after the return from exile the sepulchres of D. were still pointed out between Siloam and the 'house of the mighty men' (Neh $3^{15f.}$; cf. Ac 2^{29}).

Later biblical writers and editors describe D. as he appeared to the Jews of their own age. To the compiler of the Books of Kings D. is a standard of piety, with whom his successors are compared; he is the king whose 'heart was perfect with J″' (1 K 11^{4} etc.), 'who turned not aside save in the matter of Uriah the Hittite' (*ib.* 15^{5}). The Chronicler, from feelings easily understood, passes entirely over the darker side of D.'s life, and the troubles in his family (see esp. 1 Ch 20). He represents the pious king in his later years as absorbed in preparations for the temple; for this he has accumulated vast treasures, and he exhorts the people to give freely for the same purpose (1 Ch 22. 29). He arranges for the services of the future sanctuary, organizing the sacred choirs, and determining the courses of priests and Levites, porters and treasurers (chs. 22–26). Finally, he hands to Solomon the pattern of the temple, which has been revealed to him by God (28^{11-19}), and admonishes his son on the greatness of the sacred duty which has been laid upon him (22^{6-19} $28^{1-10.20f.}$). The figures given in these chapters, as in many parts of Chronicles, are incredibly large; the arrangements described for the sacred ministers and services are those of Zerubbabel's temple, though on a grander scale. In the older records the only direct connexion between D. and the temple is that implied in his sacrifice at Araunah's threshing-floor (2 S 24^{18-25}), and possibly in his dedication of his spoils (*ib.* $8^{11f.}$). Older material may well underlie the narrative of the Chronicler or his authority; but for our general estimate of D. and his times we must rely entirely on the Books of Samuel.

Allusion has been made earlier in this article to D.'s connexion with the Psalter. Minuter study makes it more and more difficult to conceive of him as the author of some of the most spiritual products of the OT religion. This is not merely on account of D.'s sins, acknowledged and repented of, but because of his crude ideas on religious matters which appear from time to time in the old records, and because the historians attribute to him, apparently without blame, both words and acts, which from the standard of a higher religion must be emphatically condemned. D. was first introduced to Saul as a minstrel; as a deviser of musical instruments he is named in Am 6^{5}. The Lament over Saul and Jonathan, a secular song, reveals to us D.'s poetic power; as a composer of sacred poems he appears in the appendix to Samuel (2 S 22. 23^{1-7}) and in Chronicles (esp. 1 Ch 16^{7-36}). How much older this representation may be is hard to say; but it points to a tradition that D. was the father of Heb. psalmody, and it would be rash to deny the possibility that some psalms or portions of psalms of Davidic authorship are to be found in the Psalter. If such there be, we may expect to find them in the group of psalms which Ewald selected as being genuinely Davidic, viz. Ps 3. 4. 7. 8. 11. 15. 18. 19^{1-6} $24^{1-6.\,7-10}$ 29. 32. 101, and the fragments 60^{6-9} 68^{13-18} 144^{12-14}; but probably this list requires to be considerably reduced. By the titles 73 psalms are assigned to D., the principal groups being Ps 3–41 (omitting 10. 33) and 51–70 (omitting 66. 67). In the LXX the number is somewhat larger, the title 'to David' being added to 14 more (including 93–99 Heb.), but omitted in some MSS from 3 or 4 others. The following special occasions are named in the Heb. titles:—3, when he fled from Absalom; 7, concerning the words of Cush, a Benjamite; 18, when J″ delivered him from his enemies and from Saul; 30, at the dedication of the House; 34, when he changed his behaviour before Abimelech; 51, after his rebuke by Nathan; 52, when Doeg denounced him to Saul; 54, when the Ziphites betrayed his hiding-place; 56, when the Philistines took him in Gath; 57, when he fled from Saul, in the cave; 59, when Saul's messengers watched the house to kill him; 60, after the defeat of Edom in the Valley of Salt; 63, in the wilderness of Judah; 142, when he was in the cave.

The character of D. has been very variously estimated, exaggerated praise naturally producing a revulsion to the opposite extreme. Undue weight has often been attached to the description of D. as 'the man after God's own heart'; but the phrase, which occurs only in 1 S 13^{14} (quoted thence in Ac 13^{22}), may be seen in the original context to denote one according to God's mind or purpose, one who possesses the necessary qualities for a ruler of God's people (cf. Jer 3^{15}). It has been more difficult to do justice to D. on account of the different representations, found together in the Bible, but belonging to very different dates. The picture in Chron. of a Jewish saint has led many to censure unfairly the warrior king of a rude age. But if a critical examination of our authorities compels us to reject as unhistorical some pious deeds or noble words attributed to D., on the other hand it affords a more trustworthy standard by which to measure D.'s position among his contemporaries, and removes many of the glaring inconsistencies which have occasioned difficulties to students and historians.

We may first look at the darker side of his character and its numerous limitations, which show that he did not rise entirely above the level of the barbarous age in which he lived. His foreign wars are sometimes marked by very great cruelty. Even if the Ammonites were not tortured, yet in his desert raids no life was spared (1 S 27$^{9ff.}$), and the victories over Moab and Edom were followed by massacres. The story of the patriarch Jacob suggests that deception and cunning were part of the Isr. character; certainly they often appear in D.'s history. The deceit practised at Nob may be excused by his circumstances; his professions of loyalty to Achish (1 S 28^{2} 29^{8}) may have been cautious words used to one who has power to compel; but the continued fraud practised at Ziklag points to a man who was used to crooked dealing; he could induce Hushai to counteract Ahithophel's advice by mean and treacherous ways; and after his sin with Bathsheba he stooped to base and cowardly means to conceal his guilt and remove Uriah from his path. Moreover, D.'s religious beliefs fell far short of the teaching of the great prophets. If he did not himself worship idols, he at least allowed Michal to keep the teraphim in his house; and to determine the will of God he had constant recourse to the sacred ephod. He associated the worship of J″ with His presence in the land of Israel, could think that J″ had stirred up Saul to pursue him, and that His displeasure might be removed by the fragrance of a sacrifice (1 S 26^{19}); and he put to death seven innocent men to procure J″s favour for the land (2 S 21$^{1-14}$). And there are other blemishes in D.'s character. He can judge a case on the impulse of a moment (2 S 16^{4}), or dismiss one but half heard (19^{29}); and breaks out against Nabal into a passionate desire for vengeance. The great sins of his life, his adultery with Bathsheba and murder of Uriah, are perhaps but the common crimes of an Oriental despot; but, so far as we can judge, they were not common to Israel, and D. as well as his subjects knew of a higher moral standard. Lastly, his weakness in dealing with his own family is little to his credit. The imperious Joab is 'too hard' for him; Amnon and Adonijah are indulged and spoiled, and even the outrageous conduct of the former meets with no punishment; Absalom and Adonijah are allowed to declare their pretensions to the crown, while D. neglects to take proper measures to determine the succession to the throne. But in justice to D. it must be remembered that his family difficulties were in part the natural outcome of polygamy, and partly due to the state of culture of his time. In the East the same unwise and selfish love is still often manifested by a brave father to his children. The last charge to Solomon (1 K 2$^{1-9}$) has been already sufficiently discussed.

It is now necessary to turn to the other side of the picture, remembering that we must not expect to find a saint, but a king, a hero, and a man. No testimony to D. could be more eloquent than that of the charm he exerted on all who had to do with him. Everywhere he inspires love and devotion. Jonathan is his closest friend; Saul, Michal, all Israel love him. It is the same in later years. Achish pronounces him blameless (1 S 29$^{6.9}$); whatever D. does pleases the people (2 S 3^{36}); the three mighty men risk their life to bring him a draught of water; his soldiers call him the 'lamp of Israel,' and will not let him endanger himself in battle (2 S 21^{17} 18^{3}); Ittai of Gath will follow him in life or death (*ib.* 15^{21}). Nor was this devotion and admiration undeserved. A brave and successful warrior, who had fought many a campaign against his country's foes, he safely led and ruled the rough men who gathered round him as an outlaw. His justice was experienced alike by Nabal's shepherds and his own followers (1 S 25$^{7.15f.}$ 30$^{23-25}$); his concern for his followers' lives is seen when he cannot drink the water from the well of Bethlehem. Hasty and passionate he could be, even in his zeal for justice (2 S 4$^{9-12}$ 12$^{5f.}$); but far more marked is his signal generosity. He spares Saul's life when he is in his power (1 S 24. 26), and laments for his death in a noble song (2 S 1); the messenger from Mt. Gilboa and the murderers of Eshbaal are put to death, when they think that they are bringing D. good tidings. He can bear with Shimei's curses during his flight, and forgive him freely on his return. For the sake of Jonathan he spares and shows favour to his son, and in the person of Chimham he repays the kindness of Barzillai. The warmth and tenderness of D.'s affection is revealed in his lamentation for his 'brother' Jonathan; and still more in his own family, as in his distress at the illness of Bathsheba's child, or at the death of Amnon and Absalom. Nor are higher elements wanting in D.'s religion; as may be seen from his simple but pious faith, when he dances before the ark, and is ready to abase himself before J″ who has exalted him (2 S 6^{21}); or still more when he prepares to leave Jerus. without the protection of the ark. He accepts his misfortunes with resignation, and acknowledges them as the consequence of his sins; while he retains his trust in God's goodness (2 S 12$^{22f.}$ 15$^{25f.}$ 16$^{10-12}$ 24$^{14.17}$). And even in the record of his sin his better qualities come out; for not many rulers would have accepted such a plain rebuke, or manifested such sincere repentance. When compared with a Joab or a Gideon, we recognize the greatness of David's character.

But it is especially as a ruler that D. left his mark on his own generation and on posterity. He set himself to free his country from its enemies, to secure it against invasion, and to make the people one. Jerus. was virtually his creation; he strove to make it the religious and political centre of his kingdom; and the discontent of Judah bears witness to the zeal with which he laboured for the whole nation, and not only for his own tribe. His efforts were the more successful, because with remarkable penetration (cf. 2 S 14^{19}) he always knew the right measures to adopt. He wins the Judæan elders by judicious presents, but can wait at Hebron for Eshbaal's fall; he thanks the men of Jabesh-gilead, disavows all part in Abner's murder, retires from the first attack of Absalom, but keeps up communication with the capital. In all the varied difficulties of his eventful life he is never without resource. Nor was he negligent of the administration of his kingdom. It is said that he 'executed judgment and justice to all his people' (2 S 8^{15}); and this statement is borne out by the readiness with which he listened to Nathan or the woman of Tekoa. Doubtless he once forced a census on an unwilling people, but except in one instance we never hear of him using his power for selfish ends.

In two respects the reign of D. became an ideal for later times. He was remembered as a just and patriotic ruler; and when oppression and injustice became only too common in Israel, the great prophets looked forward to a time when again a righteous king should sit on his throne (Jer 23[5], cf. Is 16[5]); and the name of D. became the symbol of the ideal ruler of his line, who they believed must come (Jer 30[9], Ezk 34[23f.] 37[24f.]), and who was afterwards termed the Messiah. Again, it was through D. that the group of Isr. tribes became a powerful nation, and extended its sway over the neighbouring peoples. Thus Israel began to feel that it had a mission in the world; and though D.'s empire began to melt away even before his successor's death, this conviction never died, even in the darkest hour. Still the people believed that in God's own time they would be called upon once more to subdue the surrounding nations (cf. Am 9[12]), or like a second D. to proclaim to heathen races J″'s great and holy name (cf. Is 55[3-5]).

LITERATURE.—For the analysis of Samuel see esp. Wellhausen, *Composition* (1889), pp. 248–266; Kuenen, *Onderzoek* (1887), i. 386 ff., or *Hist. Krit. Einleitung* (1890), I. ii. 37–62, 72; Budde, *Richter und Samuel* (1890), pp. 210–276. For the text, Driver, *Heb. Text of Sam.* (1890); Wellhausen, *Text d. Bücher Sam.* (1871). DAY (יוֹם, *ἡμέρα*).—In Hebrew the word 'day' is frequently used in phrases such as 'day of distress,' 'of evil,' 'of calamity,' 'of death' (cf. 'day of salvation,' Is 49[8]), which for the most part explain themselves. It is also used more widely of *time* in general, esp. when some event is described vividly as that of a single day, *e.g.* Dt 16[3], Jg 18[30], Mal 3[2] (בְּיוֹם with infin. or perf., but not בְּיוֹם אֲשֶׁר, which refers to some particular day, 2 S 19[19] ([20] Heb.), Est 9[1]). With a personal genitive we find the singular used to express (1) the birthday, or festal day, Job 3[1], Hos 7[5]; and (2) the time of calamity or death, Jer 50[31], Ezk 21[25], 1 S 26[10], Ps 37[13], Job 18[20]. The plural 'days,' according to a very common usage, denotes the lifetime, reign, or period of activity of any one, Gn 26[1], Jg 5[6], 1 K 10[21], Is 1[1] etc. Hence the repeated דִּבְרֵי הַיָּמִים of K and Ch = Annals. With a local proper name the 'day' implies some notable battle, a signal judgment or disaster, *e.g.* Is 9[4] the day of the defeat of Midian; Ps 137[7] the day of the fall of Jerus.; Ezk 30[9] the day of Egypt; Hos 1[11] the day of Jezreel. With the prophets 'in that day' is a common formula in describing what is to come at some future period of blessing or retribution, Is 2[11], Jer 4[9], Am 2[16] etc. etc. Cf. also the phrases 'Lo, days are coming' (esp. in Jer and Am), and 'in the latter end of the days' (בְּאַחֲרִית הַיָּמִים), *i.e.* at the end of the period to which the prophet's vision extends, *e.g.* Gn 49[1] (the time of the settlement in Caanan), Dt 4[30] (Israel's repentance in exile), Hos 3[5], Mic 4[1] (the Messianic period).

Many of these expressions have passed into the language of NT, *e.g.* 'in the days of Herod,' Mt 2[1], Lk 1[5]; 'in these (those) days,' Lk 1[39] 2[1], Ac 3[24]; 'in the last days,' 2 Ti 3[1], Ja 5[3]; also 'my day,' the day when Christ appeared among men, Jn 8[56]; 'the day of salvation,' the time during which salvation is offered to mankind, 2 Co 6[2]; 'the evil day' of trial and temptation, Eph 6[13]; 'in that day,' *e.g.*, when Christ reveals Himself more fully to His disciples, Jn 14[20] 16[23. 26]. In particular, the last day of the present dispensation, when Christ shall return to earth for the final judgment, is described in various phrases: 'the day,' He 10[25]; 'that day,' Mt 7[22], 2 Th 1[10]; 'the last day,' Jn 6[39] 11[24]; 'the day of judgment,' Mt 11[22], 1 Jn 4[17]; 'the day of Christ,' Ph 1[10]; 'the day of the Lord,' 2 Th 2[2], cf. Lk 17[30], Ro 2[16], 2 Co 1[14], Rev 6[17] etc.; 'the day of God,' 2 P 3[12].

Prob. it is with allusion to the 'day of the Lord' or 'the day of judgment' that St. Paul uses the phrase 'of man's day' (*ὑπὸ ἀνθρωπίνης ἡμέρας*) to denote mere human judgment (1 Co 4[3]).

The contrast between *day* and *night* gives rise to certain metaphorical expressions. Thus 'day' is the period of life during which there is opportunity for working (Jn 9[4], cf. 11[9]). Christians are said to belong to the day, since they should abstain from evil deeds, which are usually done under the cover of darkness, 1 Th 5[5. 8], cf. Ro 13[13]. On the other hand, this life, with its ignorance, trials, and difficulties, is contrasted with the future day of fuller knowledge (2 P 1[19]) and of completed salvation (Ro 13[12]). See also TIME; for the Creative 'Day' see COSMOGONY; and for **Day of the Lord** see ESCHATOLOGY OF THE OLD TESTAMENT.

H. A. WHITE.

DAY OF ATONEMENT.—See ATONEMENT, DAY OF.

DAY'S JOURNEY (Gn 30[36] דֶּרֶךְ יוֹם, Jon 3[4] מַהֲלַךְ יוֹם, Lk 2[44] *ἡμέρας ὁδός*).—When the making of a day's journey is predicated of any one, we are not to understand merely that the person travelled for a day or for so many hours thereof. 'Day's journey' is no mere indication of time, but a real though very indefinite measure of space. Its length would vary according to the nature of the ground traversed; on a level plain it would be longer than over a country broken by hills or water-courses. Its distance would, again, be conditioned by the circumstances or capabilities of the traveller; a messenger on a hasty errand (cf. Gn 31[23]) would achieve better results than a caravan, the rate of which would be regulated by the slowest beast of burden. A sturdy courier, without undue exertion, might put 25 to 30 miles behind him in a day; while a caravan, with its encumbrances, would not be able to overtake more than about 20 miles at the most. The camel usually proceeds at a rate of about 2½ miles an hour, and as 6 to 8 hours would be sufficient for a day, a caravan (probably implied Lk 2[44]) might accomplish 15 to 20 miles; with much impedimenta, as recorded in the travels of the patriarchs Gn 30[36], or of the Israelites Nu 10[33], the day's journey would necessarily be much less. In the present-day pilgrimages to Mecca, 22½ miles is said to be a common day's journey for a caravan. We may perhaps safely figure to ourselves in connexion with the expression 'day's journey' an average distance of 20 to 25 miles. See further SABBATH DAY'S JOURNEY.

A. GRIEVE.

DAYSMAN.—In 1 Co 4[3] 'man's judgment' is lit. 'man's day' (*ἀνθρωπίνη ἡμέρα*), and is so tr^{d} in Wyclif, Tind., Cov., and Rheims; for the word 'day,' or its equivalent, has been used in many languages in the special sense of a day for hearing causes and giving judgment. (See DAY.) From 'day' in this sense was formed the word 'daysman,' after the example of craftsman, herdsman, and the like, to signify a judge, umpire, or arbiter. The oldest instance given in *Oxf. Eng. Dict.* is *Plumpton Corresp.* (1489) p. 82, 'Sir, the dayesmen cannot agre us'; the next, Coverdale's tr. of Job 9[33] 'Nether is there eny dayes man to reprove both the partes, or to laye his honde betwixte us,' from whom it has been retained in AV and RV.

J. HASTINGS.

DAYSPRING.—Job 38[12] 'Hast thou . . . caused the dayspring to know his place?' (שַׁחַר): Wis 16[28] 'at the dayspring pray unto thee' (*πρὸς ἀνατολὴν φωτός*, RV 'at the dawning of the day'); and Lk 1^{78} 'the d. from on high hath visited us' (*ἀνατολὴ ἐξ ὕψους*). The word is of freq. occurrence for the dawn of day, as Eden, *Decades* (1555), p. 264, 'The day sprynge or dawnynge of the daye gyveth a certeyne lyght before the rysinge of the soonne.' Davies (*Bible Eng.* p. 249) points out that virtually the same expression occurs in Jg 19^{25} 'when the day began to spring, they let her go,' and 1 S 9^{26} 'it came to pass about the spring of the day.' In Gn 32^{24} the marg. has 'ascending of the morning' for 'breaking of the day'; and in Ps 65^{8} east and west are called 'the outgoings of the morning and evening.'

J. HASTINGS.

DAY-STAR.—This is Wyclif's transl. of the Gr. *φωσφόρος* in 2 P 1^{19}, and he has been followed by all subsequent translators. The Eng. word (in all VSS till RV there are two sep. words, 'day star,' RV 'day-star') was used in two senses. (1) It signified the planet Venus (Lat. *Lucifer*), that star which preceded or accompanied the rising of the sun, the morning star, as in Lydgate, *Temple of Glas* (1355), 'Fairest of sterres . . . O Venus . . . O mighti goddes, daister after nyght'; and Holland's *Pliny*, ii. 8, 'For all the while that shee [the planet Venus] preventeth the morning, and riseth Orientall before, she taketh the name of Lucifer (or Day Starre) as a second sun hastening the day.' (2) It was applied poetically to the sun, especially by Milton, as *Lycidas*, 168—

> 'So sinks the day-star in the ocean bed,
> And yet anon repairs his drooping head,
> And tricks his beams.'

In 2 P the word is used in the first sense, the morning star. The passage is therefore parallel to Rev 2^{28} 'the morning star,' and 22^{16} 'the bright, the morning star.' These passages, Plumptre thinks, are evidence that this had come to be recognized among the apostolic Christians as a symbolic name of the Lord Jesus as manifested to the souls of His people.

Wyclif has 'day-star' in Job 38^{32} 'Whether thou bryngist forth Lucifer, *that is, dai-sterre*, in his tyme'; and it is found in Is 14^{12} AVm and RV 'O day star,' AV text 'O Lucifer.' See LUCIFER.

J. HASTINGS.

DEACON.—The words *διάκονος* (*-εῖν-ία*) refer to service rendered without regard to the quality of the person rendering it. Thus the *διάκονοι* at a feast may be either bond or free; and any one doing such service is a *διάκ.* for the time being. Thus, in NT they are used—(1) of service generally (Ac 12^{25}, Ro 15^{25}, 1 Co 16^{15}); (2) of our Lord's work in particular (Mt 20^{28}); (3) of the temporal ruler (Ro 13^{4}) as *θεοῦ διάκ.*; (4) of the work of the apostles (*e.g.* Ac 1^{17} 6^{3}, 1 Co 3^{5}, 1 Ti 1^{12}): but in none of these places is there any trace of *διάκονος* as an official title. The transition is found Ro 12^{7}, where the *διακονία* in contrast with *προφητεία*, *διδασκαλία*, *παράκλησις*, seems to indicate specific services, though the *διάκονος* himself is not mentioned. (Cf. Hort, *Christian Ecclesia*, 198 f.).

Where do we first find official *διάκονοι*? In Ac 5^{6} *οἱ νεώτεροι* are of course tacitly contrasted (as Lk 22^{26}) with *οἱ πρεσβύτεροι*; but the parallel *νεανίσκοι* in 5^{10} seems to show that the contrast is only of age, not of office. Coming to Ac 6, were 'the seven' deacons? Permanent officials of some sort they probably were; if we take account of St. Luke's way of recording 'beginnings' of movements.

For the common identification of them with the later deacons, we have (1) The general correspondence of their duties. (2) The word *διακονεῖν τραπέζαις* used of them, though this is balanced by *διακονία τοῦ λόγου* of the apostles themselves in the next verse. (3) Common opinion from Irenæus (*Hær.* iii. 12. 10, iv. 15. 1 'Stephanus primus diac.') onward. (4) The number of deacons limited to seven at Rome (Cornelius ap. Eus. *HE* vi. 43: also Soz. *HE* vii. 19, referring to Ac 6), and by Conc. Neocæs. *Can.* 15, also referring to Ac 6, though Conc. Trull. *Can.* 16 rejects it.

Against it, (1) They are nowhere in NT called *διάκονοι*, and Philip in Ac 21^{8} is simply 'one of the Seven.' So neither is their work called *διακονία*. (2) The qualifications laid down Ac 6^{3} for the seven are higher than those required by St. Paul, 1 Ti 3^{8}, for deacons. (3) Of the Seven, Stephen was largely a preacher, and Philip in Ac 21^{8} (some twenty-five years later) holds the much higher rank of an evangelist. (4) The Seven evidently rank next to the apostles, and have much the same position at Jerusalem as the presbyters we find a little later. The arguments are not very strong either way; but, upon the whole, the adverse one seems the stronger, for this is a question on which tradition (150 years to Irenæus) would seem specially liable to slip. The Seven, then, would seem to have been neither (*a*) deacons, nor (*b*) temporary officers (Weizsäcker), and concern us no further if they were (*c*) almoners pure and simple (Conc. Trull. *supra*), or (*d*) presbyters (Ritschl), though they may have been (*e*) the original from which both the two later orders diverged, of deacons and presbyters (Lange).

In any case, the first explicit mention of deacons (Ph 1^{1}) is at Philippi, about A.D. 63; and again (1 Ti 3^{8}) at Ephesus a few years later. They are not mentioned with Titus in Crete, but afterwards every church seems to have had its deacons.

Concerning Jewish parallels to the office. The deacon has no likeness to the Levite, who was rather a porter of the temple, who looked after the beasts, and sang in the choir. Neither do the deacons resemble the single חַזָּן (Lk 4^{20}, *ὑπηρέτης*) of the synagogue, who was more like our verger, opening and shutting the doors, cleaning the building, handing the roll of the Law to the reader, etc. The nearest Jewish parallel is the גַּבָּאֵי צְדָקָה or collectors of the alms. This phrase, however, rather suggests the tax-gatherer (ורמא מגבּיתא על עמא דארעא, 2 K 23^{33} Targ., with which compare Clement, *Ep.* 42, misquoting Is 60^{17}), than the deacon whose duties lay so much among the poor. Upon the whole, the office was substantially new.

Qualifications are laid down by St. Paul (1 Ti 3) first for the bishop, then for the deacon. Generically they are alike, but with clear specific differences. Each must be grave, temperate, and free from greed of money, the husband of one wife, and a good ruler of his own house. But while the deacon may serve, if there is no actual charge against him, the bishop must be *ἀνεπίληπτος*—one against whom no just charge can be made. The deacon's temperance and gravity are emphasized for the bishop, who is further reminded that if he cannot rule his own house well, he cannot be trusted to rule the house of God. The deacon is specially told not to be double-tongued or a lover of dirty gain, whereas it is enough to say generally that the bishop is not to be a lover of money. Then the bishop must have sundry qualifications for dealing with other men. He must be apt to teach others, whereas it is enough for the deacon to hold the mystery of faith in a pure conscience. He must also be a lover of hospitality, and a moderate and peaceable man, with some experience, and a good character even among the heathen.

Different qualifications point to different duties. The deacon's work evidently consists very much in visiting and relieving the poor, where his special temptations would be in one direction to gossip and slander, in the other to picking and stealing from the alms. If he uses his office well, he may look forward to a good footing towards God, and much boldness towards men. On the other hand, the teaching, the hospitality, and the general intercourse with Christians and heathens, which are so conspicuous in the bishop's work, seem no *regular* part of the deacon's.

Of the appointment of deacons we are told very little. In the case of the Seven (Ac 6), first the apostles lay down the qualifications required, then the Church elects seven, then the apostles approve and admit them. In the Pastoral Epistles St. Paul does not get beyond the first stage of laying down qualifications, though Timothy is plainly intended to approve the candidates, and there is no hint given that the Church did not elect them. The process would most likely be the same as for the bishops or elders. H. M. GWATKIN.

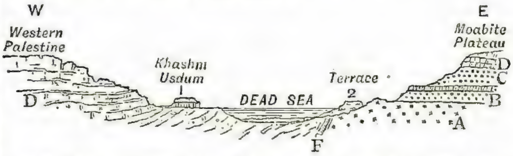
DEACONESS.—See WOMAN.

DEADLY has now only an active meaning, 'causing death'; but formerly was passive also, 'subject to death.' Thus Wyclif's tr. of 1 Co 15^{53} is, 'For it byhoueth this corruptible thing to clothe vncorrupcioun, and this deedli thing to putte awei vndeedlinesse.' Wyclif has 'deadly' in all passages in which AV has 'mortal' (except that in Job 4^{17} he omits the adj.), as well as often elsewhere, as He 7^{8} 'heere deedi men taken tithis,' Ja 5^{17} 'Elye was a deedli man lijk vs.' In AV d. occurs in this sense Rev 13$^{3, 12}$ 'his d. wound was healed' (πληγὴ τοῦ θανάτου, RV 'death-stroke'); and as an adv. Ezk 30^{24} 'a d. wounded man' (חָלָל).

J. HASTINGS.

DEAD SEA (Arab. *Bahr Lûṭ*, or 'Sea of Lot').—This remarkable inland lake lies in the deepest part of the depression of the earth's surface which stretches from the Gulf of Akabah northwards into the Jordan Valley (see ARABAH). The name 'Dead Sea' is not found in the Bible, and appears first to have been used in Gr. (θάλασσα νεκρά) by Pausanias and Galen, and in Lat. by Justin. In OT it is known as the **Salt Sea** (Gn 14^{3}, Dt 3^{17}) and as the Sea of the Arabah (Jos 3^{16}). Both these names are appropriate and expressive of its physical conditions. With reference to its geograph. situation, it is called the **East Sea** (Ezk 47^{18}, Jl 2^{20}). The name 'Asphaltites' given to it by Josephus (*Ant.* I. ix.) is derived from the deposits of bitumen which are found in some of the valleys entering the W. shore; and, lastly, the name Dead Sea (*Mare mortuum*) is used to indicate the absence of animal life in its waters. This is owing, not so much to the high salinity of the waters, as to the large proportion of bromide of magnesium which they contain. In the streams, often of a high temperature, which enter the lake to the S. of the promontory of El-Lisân, some living forms are exceedingly abundant, especially those of small fishes of the genus *Cyprinodon.* The name 'Bahr Lûṭ,' by which the Dead Sea is known amongst the Arabs, is a remarkable instance of the persistence of traditionary names amongst these E. tribes, if, as is believed by not a few, it comes down to us through a period of nearly 4000 years, and has been preserved by the descendants of the patriarch Lot, who took possession of the territory of Moab and Ammon on the borders of the Arabian desert overlooking the Dead Sea basin, and who naturally associated this inland lake with the name of their progenitor who had lived on its shores (Gn 13^{11}).

Physical Features.—The Dead Sea lies nearly N.–S. along a line corresponding to that of the Jordan Valley; its length is 47 miles, and its greatest breadth about 10 miles. It receives the waters of the Jordan from the N.; those of El-Hessi, El-Jeib, and El-Fikreh from the S.; those of the Kerak, Arnon (Mojib), Zerka Ma'in from the E., and the Kidron (En-Nar) and several lesser streams from the W.; and as the Dead Sea, like all salt lakes, has no outlet, the consequence is that the waters which enter it pass off in the form of vapour into the atmosphere. The quantity of water poured into the Dead Sea basin must be very great, especially during the months of April and May, when the Jordan is swollen by the melting of the snow in the Lebanon range; but such is the dryness of the air and the heat of the sun's rays in the Ghōr that this increased supply fails permanently to raise the level of the surface, which seems only to rise and fall within the limits of 10 to 15 ft., between the months of October and May, as estimated by Dr. Robinson from the position of the driftwood along the shore.



El-Lisân.—The Dead Sea is divided into two unequal portions by a remarkable promontory known as 'El-Lisân' (the tongue), which projects outwards from the E. shore for a distance of half the breadth of the lake. This promontory seems to be referred to in the passage describing the boundary of the lot of the tribe of Judah (Jos 15^{2}, marg. '*tongue*'). El-Lisân is composed, according to Lartet, of white calcareous marl with beds of salt and gypsum. It breaks off in a cliff facing the W., 300 ft. high and 9 miles long, terminating northwards at Point Costigan, and is connected with the Moabite coast by a narrow neck of marshy land. The terraced form, as well as the composition, of El-Lisân show that it was once part of the bed of the lake when its waters rose several hundred feet higher than at present; and it corresponds in character and composition to the terraced ridge of Khashm Usdum now to be described.

Khashm Usdum (or Salt-mountain).—This remarkable ridge follows the W. shore of the lake from Umm Zoghal southwards to the banks of Wady el-Fikreh at the S. margin of the Ghōr, a distance of 7 miles. Its upper surface is about 600 ft. above the lake, and seen from a distance appears flat; but it is deeply furrowed and seamed by streamlets, which have penetrated into the mass below. The upper part of Khashm Usdum is formed of strata of white saliferous and gypseous marl, the lower of solid salt-rock; and these materials are laid open to view in the nearly vertical cliff along which the ridge breaks off on the E. side. There can be no doubt that this terrace, like that of El-Lisân, and others to be found at intervals on both sides of the lake, were parts of the bed of the lake itself when its waters stood at a much higher level than at present. It is separated from the base of the limestone table-land by a valley of broken ground, strewn with blocks of rock, about half a mile in width, and eroded by torrential action.

The Ascent of Aḳrabbim ('scorpions').—From the S. shore of the lake an extensive tract, composed partly of slime, partly of woods and pastures, extends as far as the semicircular terrace which bounds the Ghōr in that direction. This marsh is liable to floods, and its surface is strewn with trunks of trees brought down by the torrents. The terrace by which it is bounded is 500 ft. high, and is formed of marls overlaid by beds of sand, gravel, and loam, which extend southwards into the Arabah. They are deposits formed over the old bed of the lake when its waters were 500–600 ft. above their present level. The terrace seems to answer to the 'Ascent of Akrabbim' referred to in Jos 15[3] in connexion with the boundary of Judah. Robinson regards the edge of the terrace as marking the limits of the Ghōr and the Arabah respectively: a view in which the present writer concurs.

Level of the Surface.—The Dead Sea was sounded in 1848 by Lieut. Lynch, who found that it descended to a depth of 1278 ft. at a point about 5 miles N. of Costigan. It is now known that the surface itself descends to a greater depth below that of the ocean than any sheet of water on the globe. This fact remained unrecognized until 1836–7, when H. von Schubert and Prof. Roth visited Palestine, and made barometric observations in the Jordanic basin. These were followed and confirmed by Col. Wilson (now Gen. Sir C. W. Wilson) and the officers of the Ordnance Survey of Palestine by actual levelling from the shore of the Mediterranean to that of the Dead Sea itself, and have established the fact that the surface of the latter falls to a depth of 1292 ft. below that of the former. Nor is it surprising that this result was not detected before the barometer and the level were brought to bear on its determination; for there is nothing in the atmosphere around the lake which suggests to the traveller, by his sensations alone, that he sustains a more than ordinary atmospheric pressure; and the two seas being shut off from each other by a high table-land 50 miles across, comparison of levels by means of the eye is impossible. With the increase of barometric pressure there is a corresponding increase of temperature. Hence, while in winter snow frequently lies on the plateaux of Judæa and of Moab, it is unknown on the shores of the Dead Sea; and the Arab tribes go down to the Ghōr with their flocks of sheep and goats, and camp over the plain during the winter months. Thus when, in December 1893, the writer found himself standing on the edge of the terrace overlooking the Ghōr, he beheld at his feet a wide plain stretching away northwards towards the margin of the Dead Sea, and to a large extent green with vegetation and thickets of small trees. To the right in an open space were seen several large Bedâwin camps, from which the shouts of wild men, the barking of dogs, and the bellowing of camels ascended. Numerous flocks of black goats and white sheep were being tended by women in long blue cloaks; and on the party of travellers being observed, groups of merry children came tripping up towards the path accompanied by a few of the elders, and, ranging themselves in a line, courteously returned salutations. Here the Arabs remain enjoying the warmth of the plain till the increasing heat of the summer's sun calls them away to their high pasture grounds on the table-land of Edom and Moab. At a short distance farther towards the shore of the lake is the village of Es-Safieh, inhabited by a tribe of fellahîn called the Ghawarneh, who by means of irrigation from the Wady el-Hessi cultivate with success fields of wheat, maize, dhurah, indigo, and cotton, while they rear herds of camels and flocks of sheep and goats. On the produce of these fields the Arabs largely depend for their supplies of food and raiment, which they obtain by a kind of rude, often compulsory, barter.

Boundaries of the Ghōr.—The Dead Sea basin and its ancient deposits are bounded along the E. by the high plateau of Moab, and on the W. by the nearly equally high table-land of Judæa. The plain of El-Ammaya in Moab reaches a level of 3100 ft. above the Mediterranean, and, consequently, of about 4400 ft. above the Dead Sea. The slopes of the escarpment along which the plateau breaks off are sometimes terraced, sometimes precipitous, and are eroded by numerous streams with thermal springs, of which that of the Zerka Ma'in (or Callirhoë) is the most celebrated. The W. slopes of the Ghōr are equally seamed by river courses which cut deep into the limestone strata, and have their sources in springs near the summit of the table-land. The cliffs of Râs Mersed, Engedi, and Masada,* the latter crowned by the ruined fortress, are prominent features of the W. shore; while the walled city of Kerak, the capital of Moab, crowns the heights on the E. side.

Geology.—Investigations by geologists in recent times have dispelled some of the old ideas regarding the origin of this mysterious inland lake. It is now known not to be the crater of a volcano, and it is almost equally certain that Sodom and Gomorrah were not overwhelmed in its waters. These researches have also resulted in showing that the area of the Dead Sea waters is not very different from what it was in the days of Abraham and Lot. It is now known, through the observations of Tristram, Lartet, Hull, and others, that the Dead Sea occupies a part of the trough, or depression in the crust, produced by subsidence along the line of a 'fault' or system of 'faults' (fractures accompanied by displacement of the strata) which has been traced from the G. of Akabah along the line of the Jordan-Arabah Valley to the base of Hermon (see ARABAH). This fracture was produced owing to the terrestrial movements which resulted in the whole region being elevated out of the sea after the close of the Eocene period. In consequence of this faulting and displacement, the formations on the opposite sides of the Ghōr do not correspond with each other; those on the E., or Moabite, side being more ancient than those on the W. side at similar levels. Thus, while the whole W. side of the Ghōr is formed of Cretaceous limestones, the flanks of the Moabite escarpment are composed of very ancient volcanic rocks at the base; overlain successively by Carboniferous and older Cretaceous beds, and only surmounted at a level of about 3000–4000 ft. above the lake by the Cretaceous limestones which come down to the water's edge along the W. shore.

The fundamental rocks laid open on the flanks of Jebel Shomar, a massive and precipitous mountain which rises behind Es-Safieh, and runs along the E. side of the Ghōr for several miles, are composed of great beds of volcanic materials (agglomerates, tuffs, and sheets of porphyry, penetrated by numerous dykes). They have a slight dip northwards, and are overlain by red and purple sandstones and conglomerates of Carboniferous age ('Desert sandstone'), then by Carboniferous limestone forming the terrace of Lebrusch, and this by the red and variegated sandstones of Lower Cretaceous age ('Nubian sandstone') which form the greater part of the mountain flanks, and are ultimately overlain by the Cretaceous limestones composing the crest of the Moabite and Edomite escarpment.

Such is the general geological structure as far as regards the more ancient formations. The form and features of the Ghōr were considerably modified by rain and river action in Pliocene and Pleistocene times. At the latter stage, corresponding to the close of the Glacial epoch, the waters of the Jordanic Valley appear to have risen to such a degree as to have formed a lake whose area included those of Merom, Galilee, and the Dead Sea, and whose S. margin extended into the Arabah as far as the 'Ain Abu Werideh; thus producing a lake which had a length from N. to S. of 200 miles, and whose surface rose to the level of the Mediterranean. The evidence for this conclusion is to be found in the occurrence of terraces of lacustrine materials at intervals down the Arabah from 'Ain Abu Werideh, a locality nearly 40 miles S. of the margin of the Ghōr. These terraces contain numerous semi-fossil shells of the genera *Melania* and *Melanopsis.** It is easy to understand that during the Glacial epoch the large rainfall and the melting of the snows of the Lebanon, accompanied by a climate less tropical than that which now prevails, may have added enormously to the supplies of water poured into the Jordanic basin, thus raising the surface to the level indicated. With the subsequent diminishing rainfall, and the recurrence of sub-tropical conditions of climate, evaporation would gradually gain upon precipitation; and the surface of the waters, contracting stage by stage, would ultimately fall to their present limits, where evaporation and supply have nearly balanced each other. It was during such successive stages of diminution in volume, and lowering of the surface, that the terraces of lacustrine materials were formed, and converted into land surfaces; these commence at their highest limit with those of Abu Werideh, and are succeeded by others at lower and lower levels till the present margin of the Dead Sea shore is reached. The salinification of the waters necessarily accompanied this process; because the salts dissolved in the waters remained behind during the process of evaporation, and consequently tended to augment till saturation was reached. The Dead Sea waters, therefore, resemble those of all closed lakes which are more or less saline owing to similar causes.†

---

* The fortress of Masada was the last refuge of the band of Zealots of the Jews who defended themselves against Silva, the Roman general (A.D. 71), and at last destroyed themselves to escape capture (Jos. *Wars*, VII. viii. ix.).

DEAFNESS.—See MEDICINE.

DEAL.—A 'deal' is a part or share (A.-S. *dael*, Ger. *theil*), and it may be a large or small part. In mod. Eng. we are allowed to say only 'he gave a great deal, or a good deal, of trouble,' scarcely 'he gave a deal of trouble,' and never 'a small deal.' In older Eng. Chaucer could say (*House of Fame*, i. 331)—

> 'O, have ye men swich goodliheed
> In speche, and never a deel of trouthe?'

And Latimer could represent philosophers saying that 'God walked up and down in Heaven, and thinketh never a deal of our affairs.' In AV deal is used in the phrase 'tenth deal' or 'tenth deals,' for Heb. עִשָּׂרוֹן *'issârôn*, wherever that word occurs (RV 'tenth part' or 'tenth parts'). See WEIGHTS AND MEASURES.

To 'deal' is to divide or distribute (A.-S. *daelan*), as in 2 S 6[19] 'he dealt among all the people . . . to every one a cake'; 1 Ch 16[3], Is 58[7] 'd. thy bread to the hungry'; and Ro 12[3] 'according as God hath dealt to every man the measure of faith.' Cf. Wyclif, Lk 9[16] 'And whanne he hadde take the fyue looves and twei fischis, he biheeld in to heuene, and blesside hem, and brak and delide to hise disciplis, that thei schulden sette forth bifor the cumpanyes'; and Coverdale, Dn 5[28] 'Thy kyngdome is delt in partes.' From this the verb passed into the sense of dealing well or ill with a person, and then having any transaction with,—meanings that are freely found in AV as in mod. use, Ac 25[24] 'this man, about whom all the multitude of the Jews have dealt with me' (ἐνέτυχόν μοι, RV 'made suit to me').
J. HASTINGS.

DEAR, DEARTH.—Dear is used in AV in two senses: (1) *Beloved*, as Eph 5[1] 'Be ye therefore followers of God as dear children' (ἀγαπητός, RV 'beloved'). In this sense is Col 1[13] 'the kingdom of his d. Son,' which AV, along with Cov., Cran., Gen., and Bishops', retained from Tindale, though Wyclif's 'the sone of his louynge' was nearer the Greek (ὁ υἱὸς τῆς ἀγάπης αὐτοῦ; Rheims, RV, 'the Son of his love'). See BELOVED. (2) *Precious*, Ac 20[24] 'neither count I my life d. unto myself' (τίμιος). Cf. Ps 72[14] Cov. 'deare shal their bloude be in his sight,' and 116[15] 'right deare in the sight of the Lorde is the death of his sayntes,' both preserved in Pr. Bk. version, the meaning being that he counts it too precious to leave it unavenged.

Dearth.—That which is precious is rare, as 1 S 3[1] Cov. 'The worde of yᵉ Lorde was deare at the same tyme'; and from 'dear' in this sense was formed 'dearth'=scarcity, famine. Dearth occurs in AV Gn 41[54] *bis*, 2 K 4[38], 2 Ch 6[28], Neh 5[3] (all רָעָב, RV 'famine' in Gn, 2 Ch, keeping 'dearth' in 2 K, Neh); Jer 14[1] (בַּצָּרֹת, RV 'drought'); Ac 7[11] 11[28] (λιμός, RV 'famine'); and RV adds Job 5[22] (כָּפָן, AV 'famine'), though it retains 'famine' for the same Heb. in 30[3].
J. HASTINGS.

DEATH.—See ESCHATOLOGY, LIFE.

DEBATE.—To debate (fr. old Fr. *debatre*, Lat. *de* down, *batuere* beat) now means to discuss, and a 'd.' is a discussion, which is expected to be amicable. But in earlier Eng. 'to debate' was to fight or wrangle, and 'debate' was strife, quarrelling. Thus Gn 13[7] Geneva 'there was debate betweene the heardmen of Abrams cattell, and the heardmen of Lots cattell'; and Lk 12[51] Cov. 'Thynke ye that I am come to brynge peace upon earth—I tell you nay, but rather debate.' In this sense only is debate used in AV, whether as vb. or subst. As vb. Pr 25[9] 'Debate thy cause with thy neighbour' (so RV), and Is 27[8] (RV 'contend'; both רִיב= 'strive,' 'go to law'). As subst. Is 58[4] (מַצָּה, RV 'contention'); Sir 28[9] 'A sinful man disquieteth friends, and maketh d. among them that be at peace' (ἐκβάλλει διαβολήν; cf. 2 Ti 3[3] AVm, Tit 2[3] AVm, and see MAKEBATE); Ro 1[29], 2 Co 12[20] (ἔρις, RV 'strife').
J. HASTINGS.

DEBIR (דְּבִיר).—The king of Eglon, who acc. to Jos 10[3] joined other four kings against Joshua, but was defeated and put to death along with his allies at Makkedah.

DEBIR (דְּבִיר, Δαβείρ, *Dabir*).—**1.** The name is generally supposed to mean 'back'; hence= *hindmost chamber, innermost room of a temple*, and so it is used in 1 K 6[5] to denote the Holy of Holies. The city must have been a sacred one, with a well-known temple. This is borne out by its two other names, Kiriath-sepher or 'Book-town' (Jos 15[15], Sept. πόλις γραμμάτων), and Kiriath-sannah, 'city of instruction' (?) (Jos 15[49]); and W. Max Müller (*Asien und Europa*, 1894) has shown that in an Egyptian papyrus, known as the 'Travels of the Mohar,' which was written in the time of Ramses II. (B.C. 1300), and is a sarcastic account of an Egyptian traveller's misadventures in Canaan, reference is made to the town. The writer remarks: 'Thou hast not seen Kiriath-anab near Beth-thupar, nor dost thou know Adullam and Zidiputa.' We learn from the geographical list of Shishak that the last-named place was in the south of Judah, and the Egyptian Thupar, which is followed by the determinative of 'writing,' would represent a Hebrew *Sōpher* or 'scribe.' As Anab is associated with Kiriath-sepher in Jos 11[21] 15[50], we must conclude that the Egyptian writer has interchanged the equivalent terms Kiriath and Beth, and that the Massoretes have wrongly vocalised the second element in the name of the city, which should be *sōpher*, 'scribe,' instead of *sēpher*, 'book.' It was a 'city of scribes,' where a library must have existed, filled with clay books inscribed with cuneiform characters similar to those found at Tel el-Amarna, and in the libraries of Assyria and Babylonia. The latter were usually established in the chamber of a temple.*

* *Mount Seir*, p. 99; *Phys. Geol. Arabia Petræa, etc.* pp. 15–79.

† The waters of the Dead Sea yield 24·57 lbs. of salt in 100 lbs. of water, those of the Atlantic yielding only 6 lbs. of salt in the same quantity; the former consist of chlorides of lime, magnesia, sodium, and potassium, and in smaller proportions of sulphates and bromides of the same substances. The large quantity of bromine (occurring as bromide of magnesium) has attracted the attention of naturalists, and is supposed to be a volcanic emanation.

It is possible that the name of Kiriath-sannah may be found in one of the Tel el-Amarna tablets (*Mittheilungen aus den orientalischen Sammlungen*, iii. No. 199), where we read: 'The country of Gath-carmel has fallen away to Tagi, and the men of the city of Gath; he is in Beth-sani.' This would locate the city in the neighbourhood of Gath.

In the OT Debir is described as in the mountains of Judah, like Socoh and Eshtemoh (Jos 15$^{48-50}$), and not far from Hebron, from whence Caleb 'went up' to it (v.^{15}). It was in 'the Negeb' of Judah, and near it were 'the upper springs and the nether springs' of water. After leaving Lachish (*Tell el-Hesy*) and Eglon (*Tell en-Nejîleh* ?), Joshua marched to Hebron, and then 'returned' to Debir (Jos 10^{38}). Unfortunately, these passages do not enable us to fix the exact position of the city, though the expression 'went up' may imply that it lay to the north. This would certainly have been the case if it is the same as the Beth-sani of the Tel el-Amarna tablet. The identification with the modern Dhâherîyeh (from Arab. *dhahr*, 'back') rests upon a mistaken interpretation of the name of Debir: Petrie found there no traces of anything older than the Roman period.

Debir was taken by Othniel the Kenizzite, in return for which Caleb gave him his daughter Achsah in marriage (Jos 15$^{15-19}$, Jg 1$^{11-15}$). There must consequently be some error in the text of Jos 10$^{38.39}$, where it is said that Joshua had already taken Debir, and destroyed all its inhabitants. Moreover, the city of Debir is not mentioned among the confederates in vv.$^{3.5}$, where, on the contrary, Debir is stated to be the king of Eglon.

2. DEBIR (Jos 13^{26}). The border of Debir (or Lidebir) is stated to have formed part of the frontiers of Gad, not far from Mahanaim. If the reading Lidebir is accepted, the place may perhaps be identified with Lodebar of 2 S 9^{4}.

3. DEBIR in Jos 15^{7} is described as in the direction of the north-eastern corner of Judah, towards the valley of Achor and Gilgal. The Sept. however, reads *ἐπὶ τὸ τέταρτον τῆς φάραγγος Ἀχώρ*, and the Vulg. has *Debera*. Acc. to Hupfeld (Ps 28^{2}) and Wellh. (*Sam.* 145 n.) דְּבִירָה here = *westward*. A. H. SAYCE.

DEBORAH (דְּבוֹרָה 'a bee').—1. The nurse of Rebekah, died on Jacob's return to Can., and was buried under the terebinth ('Allon-bacuth') below Bethel (Gn 35^{8} E). 2. The heroine of the great battle by the Kishon in which Sisera and his allies were defeated (Jg 4 and 5). After a period of oppression and insecurity, which had lasted since the days of Shamgar (Jg 5^{6}), and had fallen heavily upon the tribes bordering on the plain of Jezreel, D., a woman of martial and determined spirit, together with Barak, resolved to free their people from the aggressions of the Canaanites. Issachar, their tribe (Jg 5^{15}), had been the principal sufferer, but could not cope with the enemy unaided. Accordingly, the summons was sent round to all the tribes,* claiming their assistance in the cause of J″ the national God. Ephraim, Benjamin, West Manasseh, Zebulun, Naphtali, with their chiefs, rallied round Issachar; Reuben, Gilead (= Gad), Dan, and Asher refused to respond (Jg 5$^{12-18}$). For the first time after the settlement in Canaan the tribes of Isr. acted in something like a national capacity; it was the genius and courage of D. that instigated this united action. To meet the Isr. confederation, the kings of Canaan, under the leadership of Sisera, marched to the attack; the battle took place in the neighbourhood of Taanach and Megiddo, along the right bank of the Kishon (Jg 5^{19}). A great storm came on, and the swollen torrent worked havoc among the Can. forces, so that it seemed as if the powers of nature were fighting against them (Jg 5$^{20-22}$); Sisera had to seek safety in flight. A woman had successfully initiated the war, and a woman brought it to a victorious conclusion. Jael, by a bold stratagem, slew Sisera with a shattering blow from a tent-mallet as he stood drinking in her tent (Jg 5$^{24-27}$).

Such is the history of the event which has made D. famous among the women of the Bible, as it may be gathered from the song in Jg 5. This splendid ode was prob. not written by D. herself; the verbs in v.^{7b} are to be rendered by the 2nd pers. rather than by the 1st; cf. v.^{12}. V.^{1} merely says, 'then sang D. and Barak,' a remark due to the later editor. But the song may well be the work of a contemporary, as its style and contents suggest; it may claim, therefore, to be the highest authority for the events which it records.

Another account, a prose version, is contained in chapter 4. The two accounts agree in the main features, but exhibit considerable differences in detail. In 4$^{4-22}$ D. is styled both prophetess and judge, while her seat is 'under the palm-tree of D., between Ramah and Bethel, in the hill country of Ephraim,' whither the children of Israel resorted for judgment.

It is here implied that her authority had been long established, and that it extended over Israel ('she was judging Israel at that time,' 4^{4}). This generalization of her position reflects the theory of the compiler of Judges—a late writer.† Further, her seat is placed in the S., in the territory of Benjamin, far from the area of the troubles. This necessitates distant negotiations with Barak, and introduces serious difficulties into the narrative. It is possible that D.'s connexion with Ramah and Bethel may be due to a confusion based on Gn 35^{8}, for which, again, the compiler may be responsible. We may conclude from 4$^{6-9}$ that her home was somewhere near Kadesh, the city of Barak;‡ thus both would belong to Issachar (as 5^{15}), the chief sufferer under the oppression. See BARAK.

In the prose version (4$^{4-22}$ *in the main*) she is styled a prophetess. Thus, in the manner of prophecy, she announces the plan of the attack (4$^{6.7a}$), promises success (v.^{7b}), and declares who shall carry off the honours of the victory (v.^{9}). All these are features not found in ch. 5, and as coming from ch. 4 must be pronounced of inferior historical value.

For the other divergences connected with the mention of Jabin, the position of the battle, the deed of Jael, the authorities must be consulted.

[*] A full discussion of the meaning of the name is given by Moore (*Judges*, p. 25 ff.), who formerly connected ספר in ק׳ ספר with Aramaic סְפָר 'border, frontier.' Kiriath-sepher would on this etymology be 'Frontier-town,' a suitable enough meaning. But for phonetic difficulties that stand in the way Moore has now abandoned this derivation.

[*] Except Simeon and Levi. Judah is not mentioned; it had not entered into any close connexion with the other tribes, and was cut off from them by a line of Canaanite strongholds (Jg 1$^{29.35}$, Jos 9^{17}).

[†] 4$^{1-3.23.24}$ 5$^{1.31b}$ belong to the Deuteronomic compiler of Judges; his hand may also be traced in 4^{4b} 9$^{a\beta}$ 14^{a}.

[‡] Barak = *lightning*, Lappidoth = *flames* (4^{4}); hence some think that both are names of the same person, and that Barak was Deborah's husband. This is merely a fancy.

3. Deborah (AV Debora), the grandmother of Tobit, To 1^{8}. G. A. COOKE.

DEBT, DEBTOR.—*A.* IN OT.—i. *Terms.*—לוה in *Qal*, EV *borrow*, ptcp. *borrower*, LXX δανείζεσθαι, Vulg. *fœnus accipio, mutuo sumo pecunias, mutuor, mutuum accipio*; in *Hiph.* EV *lend* (*i.e.* cause to borrow), ptcp. *lender*, LXX δανίζω, ἐκδανίζω, κίχρημι, Vulg. *pecuniam mutuam do, fœneror.* לוה is also used in the sense of *join*, and the sense of *borrow* may be derived from the dependence of the borrower on the lender; but לוה *join*, and לוה *borrow*, may be independent roots of different origin (so Fuerst). לֵוִי *Levi, Levite*, is not necessarily connected with either.

נשה (also in form נשא) *Qal* and *Hiph.*, EV *lend on usury, take usury, exact* (*usury*); *Qal* ptcp. *creditor, extortioner*, also given in Dt 15^{2} for בַּעַל מַשֵּׁה יָדוֹ ‘possessor of a loan of his hand,’ in Dt 24^{11} *thy debtor* is הָאִישׁ אֲשֶׁר אַתָּה נֹשֶׁה בוֹ, *i.e.* ‘the man to whom thou are lending,’ or ‘a creditor.’ So Is 24^{2} אֲשֶׁר נֹשֵׁא בוֹ, cf. 1 S 22^{2} ‘he to whom anyone is a usurer,’ *i.e.* ‘one who borrows on usury,’ EV *the giver of usury to him.* LXX ἀπαιτεῖν, paraphrases with ὀφείλειν (owe), and (for ptcp.) δανειστής, and in Is 50^{1} ὑπόχρεως (debtor). Vulg. *commodo, exigo, usuras exigo*, and for ptcp. *creditor, fœnerator.* נְשִׁי 2 K 4^{7} EV *debt*, LXX τόκους, Vulg. *creditori* (reading the ptcp.). מַשָּׁאָה, EV *debt, loan*, LXX ὀφείλημα, Vulg. *debitum.*

מַשָּׁא, EV *usury, exaction*, LXX ἀπαίτησις, Vulg. *æs alienum, exactio.* This root has been connected with נשך *bite*, cf. נֶשֶׁךְ in ref. to the nature and effects of usury; or with נשה *forget*, because payment of a debt is remitted for a time (Ges. *Thes.*).

נֶשֶׁךְ (נשך = bite) EV *usury*, LXX τόκος, Vulg. *usura.* In Dt 23$^{20.\ 21}$ (Eng.$^{19.\ 20}$) the *Hiph.* of נשך is used for ‘lend on usury,’ and the *Qal* for ‘borrow on usury.’ LXX *Hiph.* ἐκτοκιεῖς, *Qal* ἐκδανίσῃς; Vulg. *Hiph. fœnero, commodo.*

תַּרְבִּית, מַרְבִּית (רבה become great), EV *increase* (and in AV of Pr 28^{8} *unjust gain*), LXX πλεονασμός, ἐπὶ πλήθει, Vulg. *superabundantia, fœnus, amplius.* נֶשֶׁךְ and תַּרְבִּית are often coupled together, Lv 25^{36}, Ezk 18$^{8.\ 17}$ etc.; Nowack, *Heb. Arch.* i. 354, takes נשך as interest on a loan of money, and תרבית as interest on a loan of corn, etc. etc., but in Dt 23^{20} (Eng. ^{19}) we have נשך ‘of money . . . of food . . . of anything.’

חוֹב, Ezk 18^{7}, EV *debtor*, Oxf. Heb. Lex. *debt*, LXX ὀφείλοντος, Vulg. *debitori.*

עבט *Qal*, borrow on pledge, EV *borrow*, LXX δανείζομαι, Vulg. *accipio mutuum*; *Hiph.* lend on pledge, EV *lend*, LXX δανείζω, Vulg. *fœnero, mutuum do.* עֲבוֹט, anything given as security for the payment of a loan or the fulfilment of any obligation, EV *pledge*, LXX ἐνέχυρον, Vulg. *pignus.* In Dt 24^{10} a *Qal* denom. occurs = secure (the security). עַבְטִיט Hab 2^{6}, RV *pledge* = עֲבֹט; AV *thick clay*, Vulg. *densum lutum*, is due to a mistaken etymology. In Jl 2^{7} *Piel* of עבט = twist, bind; so the root = ‘borrow,’ because the borrower was bound to the lender; but Wellhausen regards עבט as an Aram. loan word, and Driver proposes to connect with צבט ‘hold firmly.’

חבל *Qal* (lit. *bind*, cf. עבט), EV *take* or *lay a pledge*, LXX ἐνεχυράζω, Vulg. phrases with *pignus*; חֲבֹל, חֲבֹלָה, EV *pledge*, LXX ἐνεχύρασμα, -μός, Vulg. *pignus.*

ערב *Qal*, *Hithpa.*, EV *be surety, give pledges, mortgage, make a wager*, LXX διεγγυᾶν, Vulg. *spondo, fidem facio, fidejussor esto, vadem me offero.* ערבון, EV *pledge*, LXX ἀρραβών, Vulg. *arrhabo, pignus.* עֹרֵב עֲרֻבָּה (Pr 17^{18}), EV *becometh surety*, LXX ἐγγυώμενον ἐγγυᾶσθαι, Vulg. *spondo.*

שָׁאַל (*ask*) obtains from the context the sense of *borrow* in Ex 22^{14}, 2 K 4^{3} EV, and similarly the *Hiph.* may = *lend* in 1 S 1^{28} RVm.

ii. *In History.*—1. *Causes of Debt.*—There is no trace in OT of any system of commercial credit. Loans of money or large purchases on credit do not occur as ordinary and natural incidents of trade. Debt (except of the most temporary character, see below on Pledges, and on Gn 38^{18}; and cf. Ex 22^{14}) is an exceptional misfortune; it is always the poor man who borrows, Ex 22^{25}. The existence of a developed credit system in Babylonia is no proof of the existence of any similar system in Israel. In such, as in many other matters, it is as precarious to argue from Babylon to Israel as it would be now from England to Afghanistan. This absence of commercial credit naturally resulted from the fact that the Israelites of the monarchy were not a commercial people, and that their trade was mostly in the hands of the Phœn. and other foreigners. The other ordinary causes of debt must have operated in Israel. Passing exigencies would create debts speedily paid (Gn 38^{18}); misfortune, extravagance, and suretyship gave rise to more serious indebtedness. Such misfortunes specially arose from failure of crops (Neh 5^{3}), foreign raids, pressure of taxation for the home government or for the payment of foreign tribute (Neh 5^{4}). Though debt cannot be said to have been uncommon in Israel,—Is 24^{2} mentions the borrower and the lender as social types,—yet it seems to have been comparatively rare, so that it was never accepted as natural and legitimate. This appears from the paucity of references to debt, and of terms connected with debt, and also from the primitive character of these terms, *e.g.* ‘he who has a creditor’ for ‘debtor’ (1 S 22^{2}).

2. *Leading Cases.*—In Gn 38^{18} Judah promises Tamar a kid, and gives her his signet, etc., as a pledge that he will discharge the debt thus created. He forthwith sends her the kid. In 2 K 4$^{1-7}$ a widow's late husband had incurred a moderate debt,—it could be paid by selling a quantity of oil,—his family were still liable for the debt. The creditors were expected to recoup themselves by selling her two sons for slaves. Elisha accepts this as a matter of course, and can only relieve his friend by a miracle. In Neh 5 the farmers are in distress through drought and taxes, they have borrowed money at 1 p. c. per month on their land. (Nowack, i. 354, proposes to read משאת for מאת.) The debtors had defaulted, their lands had been seized, and some had been compelled to sell their children. In response to a solemn appeal from Nehemiah (he and his suite being among the lenders) the lands and interest were restored, possibly the debts were wholly or partially cancelled. The only other mention of actual debt is 1 S 22^{2}, where debtors resort to David in his exile.

iii. *In the Law, Prophets, etc.*—The necessity of borrowing is regarded as a misfortune, sometimes a punishment for sin (Dt 15^{6} 28$^{12.\ 44}$), oftener undeserved, and therefore entitling the borrower to assistance. His richer brethren should assist him with loans (Dt 15$^{7-11}$), even in view of the approaching year of release (Ps 37^{26} 112^{5}, Pr 19^{17}); without interest (Ex 22^{25} [JE], Dt 23$^{20.\ 21}$ [Eng. $^{19.\ 20}$], Lv 25$^{36.\ 37}$ [H], Ps 15^{5}, Pr 28^{8}, Ezk 18$^{8-17}$ 22^{12}, Neh 5). Nowack, i. 354, and Benzinger, 350, understand that Ex 22^{25} only forbids excessive usury (B. takes ^{25b} as gloss), so that the absolute prohibition of interest first appears in Dt. Such prohibitions do not extend to loans to foreigners. No provision is made in the law for the recovery of debt, but nonpayment of debt is condemned in Ps 37^{21}. Both the law and the prophets are chiefly concerned to protect the debtor. The law restricts the exaction of pledges: a widow's clothing (Dt 24^{17}), the nether or upper millstone (Dt 24^{6}), the widow's ox (Job 24^{3}), should not be taken in pledge. The creditor (Dt 24$^{10-13}$) may not go into the debtor's house to fetch a pledge, but must wait outside till the debtor brings him a pledge of the debtor's choosing (Dillm., Benz.). This pledge would often consist of clothing (Am 2^{8}, Pr 20^{16} 27^{13}, Job 22^{6}); and might not be kept overnight (Ex 22^{26} [JE], Dt 24^{13}). Pledges are rather tolerated than approved of; a pious Israelite would not require a pledge (Job 22^{6} 24^{9}), or, at any rate, would promptly restore it (Ezk 18$^{7-16}$ 33^{15})—whether with or without payment is not obvious. The law also limits claims on debtors by the laws of Jubilee and of the Seventh Year. In Ex 23$^{10.\ 11\mathrm{ff.}}$ (JE) the *land* is to be released (תִּשְׁמְטֶנָּה ‘thou shalt release it’), *i.e.* left fallow, every seventh year; cf. Lv 25 $^{1-7}$ (H). This provision does not occur in Dt, but Dt 15^{1-6} appoints a release, שְׁמִטָּה, of debt every seventh year. This שְׁמִטָּה has been understood (*a*) as a cancelling of interest during the seventh year, which is impossible in view of the absolute prohibition of interest in the immediate context; (*b*) as *moratorium*, the creditor being forbidden to demand payment during the seventh year, but being allowed to do so at its close; (*c*) as an absolute and final cancelling of debt, as in Solon's *χρεῶν ἀποκοπή*. In any case, some relief in the matter of debt would be specially welcome for the year during which the land lay fallow. The שְׁמִטָּה did not extend to foreigners.

As the debtor or his family might be sold to pay debt (cf. above and Lv $25^{39.47}$, Is 50^1), the provisions for the humane treatment of Heb. slaves, for their release in the seventh year (Ex 21^2), or (with the land) at the Jubilee (Lv 25^{30-55}), are a further limitation of the rights of creditors.

iv. *Actual Practice*.—Apart from Neh 5 and the vague engagement in Neh 10^{31} we do not read of these benevolent laws being observed. Probably, they were never consistently enforced as public law for any long period. When the Jews conceived themselves bound by the letter of the law, they at once devised a means of systematically evading the Deuteronomic שְׁמִטָּה. This and other laws represent a standard favoured by public opinion and sometimes observed by generous and pious Israelites (Ezk 18^7). Creditors generally took pledges, required sureties, exacted interest, and seized the land, family, and person of their debtors. Is 24^2 mentions the giver and taker of usury as social types. The warnings against suretyship (Pr 6^1 11^{15} 20^{16} 22^{26} 27^{13}) indicate severe treatment of debtors; according to Pr 22^7 the borrower is the slave of the lender, and Jer 15^{10} indicates a bitter feeling between borrower and lender quite at variance with the ideal of charitable loans.

B. Apocr. and NT.—No actual case of debt occurs in either. Both, like OT, inculcate duty of lending and paying (Sir 29, Lk $6^{34.35}$, Ro 13^8). Mt 6^{12} suggests a generous treatment of debtors. Sir 18^{33} points out the danger of borrowing.

In NT debt occurs chiefly in the parables, The Two Debtors (Lk $7^{41.42}$), the Two Creditors (Mt 18^{23-35}). In the latter we find that, as in Greece and Rome, the slave could have property of his own, and thus become a debtor to his master. The treatment of a defaulter is entirely at his master's disposal. Here too, however, the person of the ordinary debtor may be seized for debt. In the parables of the Talents (Mt 25^{14-30}) and Pounds (Lk 19^{11-27}), and the narratives of the Cleansing of the Temple (Mt $21^{12f.}$, Mk 11^{15-18}, Lk 19^{45-48}, Jn 2^{12-17}), we come upon the advanced commercial system of the Rom. Empire, with money-changers, bankers, and commercial usury, which Christ mentions without condemning. In the parable of the Unjust Steward (Lk 16^{1-13}) we trace a credit system in connexion with agriculture. Interest is not condemned in NT.

Literature.—See commentaries on passages cited, esp. Driver on Dt 15^{1-8}, and sections on debt in *Heb. Arch.* of Benzinger and of Nowack.

W. H. Bennett.

DECALOGUE.—The law of the Ten Words, virtually a translation of the original Heb. name עֲשֶׂרֶת הַדְּבָרִים Dt 4^{13} 10^4, cf. Ex 34^{28}) is the most suitable title of the ethical code prefixed to the Sinaitic legislation. The name 'Ten Commandments' is a less accurate rendering, and it prejudges the disputed question as to whether all of the ten words are of the nature of commandments. It is also called the Testimony (עֵדוּת Ex 25^{21}), and the Covenant (בְּרִית, Dt 9^9).

The accounts of the first publication of the D. contain a variety of extraordinary particulars in attestation of its immediate divine origin and of its sovereign authority. The nation gathered at the foot of Sinai to receive a revelation (Ex 19^{17}). Amid thunder and lightning, and with the sound of a trumpet, the Lord descended upon the smoking mount ($19^{16ff.}$), and from thence proclaimed the words of the law in articulate tones in the ears of the terrified people (20^{19}, Dt 4^{12}). The words thus uttered by the very voice were thereafter graven by the very finger of God on two tables of stone (Ex 31^{18}, Dt 4^{13}). These tables, which were broken by Moses on witnessing the temporary apostasy of the people (Ex 32^{19}), were replaced by another pair on which God had promised to rewrite the former words (Ex 34^1), and which were thereafter deposited in the ark with a view to their safe-keeping and in token of their paramount importance (Dt 10^5).*

In consideration of these details, in which so much stress is laid on the authority of the D. and on the precautions taken for preserving it in its purity, it is remarkable that the Pent. contains two versions of it which exhibit not a few, or altogether unimportant, variations—the classic version, as it may be called, of Ex 20^{2-17}, and the less-regarded version of Dt 5^{6-21}. The principal divergences occur in the reasons annexed to the fourth and fifth commandments. Under the fourth Dt founds the duty of Sabbath observance, not upon the example of the God of Creation who rested from His works on the seventh day (Ex 20^{11}), but upon the dictates of humanity and of gratitude. 'Observe the Sabbath-day to keep it holy . . . that thy man-servant and thy maid-servant may rest as well as thou. And thou shalt remember that thou wast a servant in the land of Egypt, and J" thy God brought thee out thence by a mighty hand and by a stretched out arm: therefore J" thy God commanded thee to keep the Sabbath-day' (Dt 5^{12-15}). The fifth commandment, in the Deuteronomic text, sanctions filial conduct with the promise of prosperity as well as of long life (5^{16}). In the tenth, it may be added, Dt has a different order from Ex—the wife being placed at the head of the series, while the coveting of the neighbour's field, which would count for much with a peasant people, is expressly prohibited (5^{21}).†

That the Exodus version of the D. is on the whole superior to, *i.e.* older and purer than, the text of Dt, is the opinion of the great majority of modern scholars, including Delitzsch, Dillmann, W. R. Smith, Driver.‡ For this opinion the principal ground is that the variations in Dt are obviously a personal contribution from this author, some being mere amplifications in his wonted style, others instances of the intrusion of his characteristic ideas or expressions (cf. Dillmann, *Exod.* p. 200; Driver, *LOT* p. 31).

---

* The account in Ex of the Sinaitic revelation is highly composite, and many details of the critical analysis are still unsettled. The Decalogue is imbedded in E, which furnishes most of the matter in Ex 19-24; but this is not decisive as to its date—one section regarding it as derived by E from pre-existing sources (Driver, *LOT* p. 30), while another assumes its intrusion into the E stratum after the formulation of the Decalogue of Dt (Meisner, *Der Dekalog* p. 11). The J narrative is more prominent in Ex 32-34, and has often been alleged to set forth an older summary as the kernel of the legislation (see *infra*). This latter inference, apart from other grounds, is rendered very precarious by the fact that a great part of the original contents of J is no longer before us. The final redaction does not determine whether the words were rewritten by God (Ex 34^1) or by Moses (Ex 34^{28}).

† Other Dt variations are multiplication of connecting particles, and of details (the ox and the ass entitled to Sabbath rest), verbal changes ('observe' for 'remember' in c. 4, 'desire' for 'covet' in the main body of c. 10), and allusive phrases ('As the Lord thy God commanded thee' in cs. 4 and 5).

‡ Wellhausen, however, 'protests against the *à priori* and consistent preference of the Exod. text,' *Comp. d. Hex.*; and evidence that his view is spreading is furnished by the argument of Meisner's painstaking monograph (*Der Dekalog*).

In opposition to the traditional conception of the D. as strictly Mosaic, three theories are widely represented in modern criticism—(1) that it is a prophetic compendium or manifesto belonging at the earliest to the 8th cent. B.C.; (2) that it is in substance Mosaic, but that it was enlarged at a later period by the addition of one or more commandments, or at least (3) of amplifications and sanctions of the original 'words.'

(1) Against the Mosaic origin it is argued that the tradition does not consistently maintain its claim, but alternatively exhibits a summary of a widely different character (Ex $34^{14ff.}$) as the Mosaic D. (Wellhausen, *Comp. d. Hex.* p. 331 ff.)*; that the ancient 'Book of the Covenant' shows no acquaintance with its content (Baentsch, *Das Bundesbuch*, p. 92 ff.), and especially that both in general spirit and in detail it is out of harmony with the essentially ritualistic religion of pre-prophetic times (following Wellhausen, Kayser, Smend, Baentsch, *op. cit.* 98). Upon this it is sufficient here to observe that the cardinal assumption of this group of scholars, viz. that the D. was impossible before the prophetical teaching of the 8th cent., exaggerates the part played by the prophets in fixing the character of the OT religion. Assuredly, the prophets did not first enunciate, but inherited, the doctrine that true religion utters itself in morality; and it is an obvious inference from the broad facts of the tradition that this fundamental idea was affirmed by and descended from Moses. That as the founder or reformer of a religion he should have embodied its leading principles in 'terse' sentences is not only possible but probable, and the testimony to the fact that in the D. we possess such a summary is too strong to be set aside in the interests of a historical theory.†

(2) A second group of critics, while holding that 'Moses in the name of J″ prescribed to the Israelites such a law as is contained in the ten words' (Kuenen, *Rel. Isr.*, Eng. tr. i. p. 285), support the contention of the first group, that one or more of the commandments are post-Mosaic. The main objection to the Mosaic authorship of c. 4—that it presupposes conditions of agricultural life unlike those under which Moses could have conceived and promulgated it (Montefiore, *Hib. Lect.* p. 554; cf. Smend, *Religionsgesch.* p. 139)—is at the most valid against certain of the amplifications. More serious is the case against the Mosaic origin of c. 2, founded on the facts that its prohibition of graven images was disregarded in the time of the judges and of the early monarchy, that the prophets of the Northern Kingdom offered no opposition to the cult of the golden calves, and that the prophetic conscience appears first to have revolted against them in the 8th cent. in Judah (Kuenen, *Rel. Isr.*, Eng. tr. i. 283 ff.). To this it is replied, in general, that the non-observance of a religious law is no proof of its non-existence; and, in particular, that as the central sanctuaries possessed no image in the times of Eli, David, and Solomon, the prohibition must have been early operative as a recognized part of the pure Mosaic system (cf. Kittel, *Hist. Heb.*, Eng. tr. i. pp. 248, 249). It may be added that contact with Egyptian idolatry is likely to have made Moses recoil from image-worship. It must, however, be granted that the historical facts are perplexing; and it is at least possible that c. 2 is a development by the prophetical school of a consequence originally only latent in the Mosaic prohibition of the worship of other gods.

(3) A third view leaves undisturbed the tradition that Moses was the author of an essentially spiritual and ethical code of ten precepts, but alleges the probability of this having originally existed in a briefer form, to which from time to time various reflexions and promises were added which strengthened their appeal to the mind and will. On this theory, widely held by scholars since Ewald (*Gesch. Isr.*^{3} ii. 231), commandments 2, 3, 4, 5 originally wanted the 'reasons annexed,' while 10 may have stopped at 'house.' It is strongly supported by the variations of the two texts, and seems irresistible in consideration of the fact that c. 4 presupposes acquaintance with Gn 1^1–2^3. It may be added that the terser version gives a better balance to the two tables, and was more suited to the capacity of the popular memory; and in particular that it represents material common to, and thus attested by, the joint testimony of the two divergent recensions.*

The division of the D. into its ten constituent parts has occasioned considerable difficulty. The three systems, as adopted by different religious communities, may be thus represented—

	Greek and Reformed.	R. C. and Lutheran.	Jewish.
God the Deliverer out of Egypt . . .	Preface	Preface	c. 1.
Prohibition of polytheism . . .	c. 1	c. 1	c. 2.
Prohibition of graven images . .	c. 2		
* * * * *	cs. 3–9	cs. 2–8	cs. 3–9.
Prohibitions of covetousness . . .	c. 10	c. 9 c. 10†	c. 10.

The second of these divisions, introduced after Jewish precedent by Augustine (*ad Exod.*) is slightly supported by the fact that cs. 1 and 2 have a joint sanction, and also by the Dt text of c. 10, but is equally unhappy in combining the two distinct prohibitions of polytheism and idolatry, and in separating the particulars, possibly not original, of the precept against covetousness. The Talmudic division, which treats the preface as the first word, is liable to the objection, not only that it affects the unity of the code, but that the same formula appears elsewhere as introduction or conclusion (Lv 18^2 19^{36}). In view of these objections the Greek-Reformed division, represented in antiquity by Philo, Josephus, and many Fathers (Origen, *In Ex. Homilia*, 12), is favoured by the majority of modern critics (Oehler, Ewald, Delitzsch, Dillmann). See also Nestle in *Exp. Times*, June 1897.

The original sequence of the 'words' is disturbed in LXX, where the two commandments which bear upon the life of the family (5 and 7) are brought together, and the sixth becomes the eighth. In NT the order is variable, but usually the seventh precedes the sixth (Mk 10^{19}, Ro 13^9).

The classification of the commandments is suggested by their distribution between two tables. Obviously, they fall into two groups—(1) the religious (1–4), which define certain duties which man owes to God; and (2) the ethical (5–10), which define certain duties which he owes to his brother man. It has, however, been frequently pointed out that, in the antique mode of thought, filial duty was more closely allied to the religious than to the ethical obligation, and that the first five commandments may accordingly be suitably grouped as precepts of piety, the last five as laws of probity.

---

* The so-called Jahwistic D., first indicated by Goethe, has been finally reconstructed by Wellhausen as follows (*Isr. Gesch* p. 66):—

1. Thou shalt not worship any strange god.
2. Thou shalt not make unto thee molten gods.
3. Thou shalt keep the feast of Unleavened Bread.
4. All the first-born are mine.
5. Thou shalt keep the feast of Weeks.
6. Thou shalt keep the feast of Ingathering in the fall of the year.
7. Thou shalt not mingle leavened bread with the blood of my sacrifice.
8. Thou shalt not retain until the morning the fat of my feast.
9. Thou shalt bring the best of the first-fruits of thy field to the house of J″ thy God.
10. Thou shalt not seethe a kid in its mother's milk.

In Ex the code really contains 12 precepts, hence there is no agreement as to the selection to be made. It may be noted that it is not claimed that it is Mosaic, but only that it is older than the D. of Ex 20 (cf. Smend, *Religionsgesch.* p. 47).

† Of this evidence an important element is the tradition that two tables of stone containing the D. were placed by Moses in the ark (Ex 40^{20}, Dt 10^5). The arguments used to discredit the tradition are set forth fully by Stade, *Gesch. d. V. Isr.* i. p. 457 ff., where its existence is explained by the supposition that the ark originally contained sacred stones associated with the presence of J″. But surely Mosaism cannot have bequeathed to posterity as its most precious legacy a stone-fetish (see ARK OF THE COVENANT).

* The view that the 'torso' was the original D. is assailed by Meisner on the ground that the irreducible minimum of the words of the first table has been 'inundated' by Dt (*Dek.* p. 10), but it is at least as probable that the vocabulary of Dt was enriched by the original D.

† While the R.C. and Luth. Churches agree in subdividing the prohibitions of covetousness, the former makes c. 9 protect the neighbour's wife, the latter his house.

The precepts of piety, which may fairly be assigned to the first table, are on the whole clear. The first, while not unambiguously sounding the monotheistic note, at least excludes polytheism from Israel. The second prohibits the worship of the true God under a visible form—idolatry. That the third had an equally definite aim is probable, and it is a plausible suggestion that its point was directed against the use of God's name in spiritualistic and other magical rites (Smend), though most exegetes make it include various abuses of God's name—as perjury, lying, cursing, and other forms of profanity. In the reasons annexed to the words of this table may be noticed the two remarkable features of c. 2, the profound insight into the law of heredity, and the intimation that the soul of religion is the love of God; the Deut. grounding of c. 4, which breathes compassion towards man and beast; and the confident assertion in c. 5 of the doctrine of temporal retribution.

The laws of probity take under their protection human life (c. 6), the institution of marriage (c. 7), property (c. 8), and character or reputation (c. 9); while c. 10 strikes at the roots of wrong-doing by proscribing the lawless desire. They may be further classified according as they condemn criminality in act (cs. 6–8), in word (c. 9), and in thought (c. 10).

From this brief sketch of the contents of the D. we may obtain an impression both of its greatness and its limitations. Its first distinction is that within the brief compass of the ten words it lays down the fundamental articles of religion (sovereignty and spirituality of God), and asserts the claims of morality in the chief spheres of human relationship (home, calling, society). Its ethical precepts are the most far-reaching and the most indispensable. It is, again, a further testimony to the moral value of the code that it provided forms capable of receiving a richer and fuller content than that which they originally held. But the sovereign distinction of the D. lies less in its exhibition of the foundations of religion and of the landmarks of morality, than in its representation of religion and morality as knit together by a vital and indissoluble bond. The D. is, in brief, the charter of ethical piety, or, in other words, the great pre-Christian advocate for righteousness as the highest form of ritual. In an age of the world's history when popular religion found satisfaction in an ethically indifferent ceremonialism, in a country where Mosaic sanction was claimed for an elaborate system of sacrifices and festivals, the D. excluded from the summary of duty almost every reference to this class of obligations, and made it clear that what God above all required was justice and mercy. Consistently with this, the one religious duty, narrowly so called, which finds a place in the code, is Sabbath observance; for this commandment not only had in view the provision of an opportunity for meditation and worship, but was equally conceived, if we may follow Dt, as a beneficent institution founded in compassion toward the weary and heavy laden.

The limitations of the D. lie on the surface. Its brevity forbids us to expect exhaustiveness, and, as a fact, its ethical requirements may almost all be connected with the single virtue of justice. Wisdom and fortitude, which figure prominently in the Greek scheme of virtue, are not recognized, and even in the prohibitions of adultery and covetousness it is less temperance or self-control than justice that appears to interpose to forbid the sin. Again, it followed from the undisciplined character of the people to whom it was first given, that the D. should be elementary in its teaching. They were children who had need to be taught the first principles of the oracles of God. The demands accordingly are not very high-pitched: with the exception of the tenth, the moral precepts belong exclusively to the region of conduct where actions condemned by the conscience as sins are also punished by the state as crimes. Further, of the ten, eight are prohibitions, two only are positive injunctions. And herein lies the principal limitation of the D. In the main a condemnation of superstition and crime, and as such of the highest value in the training of a primitive people, it does not meet the demand of the enlightened conscience for a positive moral ideal. For this we must advance to Christ's interpretation or revision of the Decalogue.

The frequent references of Christ to the D. are marked by two main features—(1) a hearty recognition of its divine authority (Mt 5^{17}); (2) a purpose of so interpreting its precepts as to widen their range and exalt their demands. Its inadequacy as an ideal, due to its preponderantly negative character, He rectified by condensing the law into the two positive commandments to love God with all our heart, and our neighbour as ourselves (Mt 22^{36-40}). Indeed, so closely did the teaching of Jesus lean on the Mosaic form that it is possible to construct with scarcely a gap the D. according to Christ. The following are the principal additions: C. 1. Thou shalt love the Lord with all thy heart (Mt 22^{37}). C. 2. They that worship, worship in spirit and truth (Jn 4^{24}). C. 3. Swear not at all (Mt 5^{34}). C. 4. The Sabbath was made for man (Mk 2^{27}). C. 5. Duty to parents paramount over other religious obligation (Mt 15^{4-6}). C. 6. Murder includes anger (Mt 5^{22}). C. 7. Adultery includes lust (5^{28}). Of c. 8 we have not Christ's exposition, but the absence is readily explained by the fact that c. 10 had already extended the prohibition of theft in the spirit of the teaching of Jesus. Similarly, the false witness of c. 9 is referred to a foul heart (Mt 12^{34}), while the idle is included in condemnation with the calumnious word (12^{37}). Of Christ's definite consciousness of a mission to handle the D. in the light of the final revelation there is further evidence in His announcement of the new commandment of brotherly love (Jn 13^{34}), by which He re-emphasizes the nature of the positive ideal substituted for the warnings of the second table.[*]

Of the apostolic references to the D. those of St. Paul are most noteworthy. Like Jesus, he employs it as a standard to test conduct and measure wickedness. He supposes the law to have been communicated to Moses through angelic mediation (Gal 3^{19}, cf. He 2^{2}). What St. Paul held as to the place of the D. in the Christian dispensation is a question of some difficulty. He nowhere draws a distinction between the ceremonial and the moral elements of the Mosaic law, and declares that, while the former are repealed, the latter remain binding: his general thesis is that the law as such has no longer dominion over the Christian (Ro 7^{4}). But as certainly it follows for St. Paul that the Christian, while placed in a new attitude to the law, voluntarily and joyfully re-subjects himself to and obeys its ethical commandments. Filled by the Spirit and animated with gratitude, he exhibits towards his fellow-men a measure of love to which it is a small thing to forbear from injustice, as required in the second table of the ancient law (Ro 13^{9}).

In Christian theology the D. is commonly regarded as a revelation, or as a republication, of the fundamentals of religion and morality. It is the most important part of the OT or legal economy, and as such was designed to show the path of duty, to deepen the sense of guilt, and to awaken a profound sense of human inability. The question of its continued validity for the Christian, while capable of being diversely grounded, possesses practical importance only in the case of c. 4, where the issue is whether the Sabbath is to be kept as a divine command or as a measure of Christian expediency and a dictate of Christian feeling (see SABBATH). The latter view, energetically maintained by Luther, and favoured in the Federal School of Reformed theology, is most in harmony with the Pauline doctrines of law and Christian liberty. See LAW.

---

[*] The perfection of the D. was a favourite thesis of 17th cent. orthodoxy as against the Socinians and Arminians, who declared that Christian ethics added three principles—abnegatio nostri, tolerantia crucis propter Christum, imitatio Christi. The orthodox view was that it did not require to be supplemented or corrected, but only properly interpreted, to furnish the full Christian ideal (see Turretin, *Theol. Elenc. Inst.* Locus 11).

DECAPOLIS (Δεκάπολις), 'ten cities,' Mt 4^{25}, Mk 5^{20} 7^{31}.—A region of allied cities (see PALESTINE) E. of Jordan in Bashan, but including Bethshean W. of the river. Such leagues existed in other parts of the Roman Empire for purposes of trade and of defence. The mention of swine kept by the people of Decapolis suggests the presence of a Gr. colony; and the region had a Gr.-speaking population, mingled with natives, as early as the time of Herod the Great. The cities of Decapolis, according to Pliny (*HN* v. 18), were Scythopolis (*Beisân*), Hippos (*Susieh*), Gadara (*Umm Keis*), Pella (*Fahil*), Philadelphia (*'Ammân*), Gerasa (*Jerâsh*), Dion (*Adûn*), Canatha (*Kanawât*), Damascus, and Raphana. The region thus included all Bashan and Gilead. In the *Onomasticon* (*s.v.*) it is defined as the region round Hippos, Pella, and Gadara. (Cf. further, Schürer, *HJP* II. i. 94 ff.; G. A. Smith, *Hist. Geog.* 593 ff.)

C. R. CONDER.

DECEASE.—In OT Is 26^{14} only, 'they are deceased.' The Heb. is *rĕphâ'îm* (רְפָאִים), 'shades,' which RV translates 'they that are deceased' in Job 26^5, Ps 88^{10}. See REPHAIM. In NT 'decease' is used as an intrans. vb. in Mt 22^{25} 'the first, when he had married a wife, deceased' (τελευτάω, 'come to an end,' used with θανάτῳ, Mt 15^4). Cf. Fuller, *Holy War* (1639), III. x. 132, 'Queen Sibyll who deceased of the plague.' The subst. is found Lk 9^{31} 'his decease which he should accomplish at Jerusalem,' and 2 P 1^{15} (both ἔξοδος, *exodus*, 'outgoing'; used of death also Wis 3^2 7^6, Sir 38^{23}; cf. εἴσοδος='entering into' the world, Ac 13^{24}). J. HASTINGS.

DECEIT.—The misleading of another by word or deed, in which case it is equivalent to falsehood (Pr 14^{25}, Hos 12^7); or the overreaching of another, as when a false balance is used. Every kind of wickedness, as a rule, involves deceit, since the just and holy must be assumed as a mask, in order to gain credit with men, and make the accomplishment of the evil design possible (Pr 12^{20} and 26^{24}). D. shows itself not merely in isolated acts, but also as a settled habit of mind (Jer 23^{26}). It is so characteristic an element of evil that it is frequently used in Scripture as synonymous with it (Ps 119^{118}, Jer 7^5). W. MORGAN.

DECEIVABLENESS.—Only in 2 Th 2^{10} 'With all d. of unrighteousness' (RV 'deceit'). The adj. 'deceivable' also occurs only once, Sir 10^{19} 'a d. seed.' The meaning is 'able to deceive,' 'deceitful'; and that is the usual meaning of the words, as 2 P 1^{16} Tind. 'we followed not deceivable fables,' and Gouge (1653) on He 3^{14} 'Sin prevails the more by the deceiveablenesse thereof.' But Milton uses the adj. in the sense of 'liable to be deceived' in *Samson Agonistes*, 942, 'blind, and thereby deceivable.' J. HASTINGS.

DECENTLY.—'Decent' and 'decently' have deteriorated with use. From Lat. *decens*, they expressed originally that which is becoming, as Latimer, 1*st Serm. bef. Edw. VI.* (1547) 'God teacheth what honoure is decente for the kynge'; and generally that which, by being seemly, adds lustre, hence comely, handsome (cf. Lat. *decus*), as Pref. to *Pr. Bk.* (1549) 'this godly and decent Order of the ancient Fathers': Bacon, *Essays*, p. 177, 'the Principall part of Beauty is in decent motion'; Milton, *Il Pens.* 36—

'And sable stole of cypress lawn
Over thy decent shoulders drawn.'

Now, the meaning is no more than 'fair,' 'passable,' as Darwin, *Life*, i. 151, 'If I keep decently well.' In AV 'decent' does not occur, and 'decently' only 1 Co 14^{40} 'Let all things be done d. and in order,' for which all previous VSS have 'honestly,' after Vulg. *honeste*, Luther *ehrlich* (Gr. εὐσχημόνως, which occurs also Ro 13^{13}, 1 Th 4^{12}, where all Eng. VSS have 'honestly,' with 'decently' in AVm of Ro 13^{13}). J. HASTINGS.

DECISION.—1. The decision of questions of right between man and man necessarily depends on the form of authority recognized in each successive stage of society. In the nomadic condition a patriarchal government is tempered by custom and the counsels of tribal headsmen. It can scarcely be altogether as a reflection from later times, that Moses continually appears in the Pentateuch accompanied by elders. The appointment of the 70 is distinctly described as designed to afford relief to the leader in the decision of cases of dispute between Israelites (Nu 11^{10-17}). The judges appear as dictators, who would necessarily add to their military rule the administrative and judicial functions that accompany supreme power, though the local influence of heads and families must always have tempered their authority. It is as judge to settle disputes that Samuel is represented as making his annual visitation of Bethel, Gilgal, and Mizpah (1 S 7^{16}, which is of late origin). The kings of Judah and Israel were supreme judges. A judicial decision is the typical instance of Solomon's wisdom (1 K 3^{16-28}). After the Captivity, since the Jews were now a subject race, the supreme authority for the decision of important cases rested with an alien government; but the transformation of the nation into a Church led to the private settlement of internal affairs on the advice of the scribes. The development of the synagogue may have given shape to this method, the local court of elders settling minor cases. The formation of the Sanhedrin at Jerus. as both a civil and an ecclesiastical court led to the decision there of cases affecting Judæa, though with various powers at different times, the Romans recognizing the legal authority of this court, but requiring cases of life and death to be referred to the procurator (Jn 18^{31}). Our Lord instructed His disciples to avoid litigation and to settle disputes with their brethren privately, or, if that were impossible, by reference to the Church as a court of judgment (Mt 18^{17}). St. Paul expostulated with the Corinthians for resorting to the heathen law courts on account of quarrels among themselves, directing them to appoint their own judges within the Church (1 Co 6^{1-8}).

2. The decision of questions of perplexity in early times was determined by **casting lots**, with the conviction that what seemed to be chance with man was really directed by God (Pr 16^{33}). This method was employed in the division of the land (Jos 14^2, P), and in the cases of Achan (Jos 7^{14}), Saul (1 S 10^{21}), Saul and Jonathan (14^{42}). The Urim and Thummim and the ephod seem to have been used for casting lots (Ex 28^{30}, Nu 27^{21}, 1 S 28^6). This method of decision was missed at the restoration,

but its recovery anticipated (Ezr 2[63], Neh 7[65]). The prophets, however, did not encourage it. Under the influence of the inspiration they enjoyed, the oracle was obtained more directly. Thus, unlike the choice of Saul, the choice of David was made by means of the prophetic spirit in Samuel (1 S 16[1-13]). Kings would resort to prophets for advice on questions of going into battle, etc., *e.g.* the case of Ahab and Jehoshaphat, in which the contrast between the lying spirit of the false prophet and the true spirit of the genuine prophet of J″ is illustrated (1 K 22[1-28]). The decision of the prophet is clearly distinguished from divination, witchcraft, dealings with familiar spirits, and attempts to consult the dead—dark practices which are severely condemned (Dt 18[9-12]). In NT the lot reappears, not only in the case of the division of the garments of Jesus among the Rom. soldiers (Mk 15[24], Lk 23[34], Jn 19[24]), but also in a solemn decision of the Christians as a means of obtaining a successor to Judas. In this case, however, it only decides between two men, each of whom has been chosen after careful investigation has proved him to possess the qualities essential to apostleship, and then with prayer for divine guidance (Ac 1[21-26]). Doubts have been thrown on the wisdom of this course. It is a significant fact that it never seems to have been followed in subsequent elections of church officers in the apostolic Churches.

For **Valley of Decision** see JEHOSHAPHAT (VALLEY). W. F. ADENEY.

DECK.—To deck (=Lat. *tegere*, Ger. *decken*, Eng. *thatch*) is simply 'to cover,' hence the 'deck' of a ship. Thus Cov. has (Hag 1[6]) 'Ye decke youre selves, but ye are not warme' (Gen., AV, and RV 'Ye clothe you'). In this sense possibly is Pr 7[16] 'I have decked my bed with coverings of tapestry' (רָבַדְתִּי, LXX τέτακα, Vulg. *intexui*). But Luther has 'Ich habe mein Bette *schön geschmücket*, Wyc. 'I have arayed,' and it is certain that by 1611 'deck' had taken on the sense of *decorate*, no doubt through confusion with that word, with which it has no proper connexion. Thus *Pr. Bk.* (1552) Com. Service (Keeling, p. 191), 'when a man hath prepared a rich feast, decked his table with all kind of provision, so that there lacketh nothing but the guests to sit down.' In this sense 'deck' is used elsewhere in AV. J. HASTINGS.

DECLARE, DECLARATION.—The oldest meaning of the vb. 'declare' is to make clear (*de-clarus*), explain, expound, as in the Title of Tylle's ed. of Tindale's NT, 'declaryng many harde places conteyned in the texte.' So perhaps Dt 1[5] (see Driver). Elsewhere in AV 'declare' is the tr. of a great number of different Heb. and Gr. words, but its meaning is probably never more precise than 'make known,' as Ps 50[6] 'the heavens shall d. his righteousness,' Ac 17[23] 'Whom therefore ye ignorantly worship, him d. I unto you' (RV 'set forth'), Ro 1[4] 'declared to be the Son of God with power . . . by the resurrection from the dead.' And this is the meaning of **declaration** in its few occurrences, Job 13[17], Est 10[2] (RV 'full account'), Sir 43[6], Lk 1[1] (RV 'narrative'), 2 Co 8[19] (RV 'to shew'). J. HASTINGS.

DECLINE.—In AV to 'decline' is always (except Ps 102[11] 109[23]) used in the original but now obsolete sense of 'turn aside.' Thus, Job 23[11] 'His way have I kept, and not declined' (RV 'turned not aside'); Ps 119[51] 'yet have I not declined from thy law' (RV 'swerved'; so 119[157]); Pr 7[25] 'Let not thine heart decline to her ways' (so RV). In Ps 102[11] 'My days are like a shadow that declineth,' and 109[23], the image is of the shadow which lengthens as the sun goes down, till at last it vanishes into night. RV adds Jg 19[8] 'until the day declineth' (see AVm), 2 K 20[10] 'It is a light thing for the shadow to decline ten steps' (AV 'go down'), and Jer 6[4] 'the day declineth' (AV 'goeth away'). Tennyson combines both meanings (*Locksley Hall*, l. 43)—

> 'Having known me, to decline
> On a range of lower feelings and a narrower heart than mine.'

J. HASTINGS.

DEDAN, דְּדָן, LXX Δαδάν, Δεδάν (in Is, Jer, Ezk, Δαιδάν), according to Gn 10[7], a son of Raamah, one of the sons of Cush. In Gn 25[3] he is named along with Sheba, as in Gn 10[7], but is represented, not as a Cushite, but as a Keturæan. Dedan is in this latter passage a son of Jokshan, son of Abraham by Keturah; but according to Josephus (*Ant.* I. xv. 1) he was the son of Shuah (or Sous), another of Keturah's sons. The Shuhites were neighbours of the Temanites (Job 2[11]) in North-Western Arabia. There are traces still of the ruins of a city Daidan in that region, and the Sabæan inscriptions mention the Dedanites as a tribe in that neighbourhood.

The **Dedanites** are represented as an important commercial people, carrying on an extensive caravan trade with Damascus and Tyre. They frequented the highway that ran through the Arabian desert as they journeyed northward with their wares, and when driven back by a hostile force they were thrown upon the charity of their southern neighbours of Tema (Is 21[13]). According to Jeremiah (25[23]) they formed an Arabian tribe alongside of Tema and Buz, and were accustomed on their business journeys to pass through the land of Edom. The Dedanites share in the judgments which fall upon the Edomites and upon the kings of Arabia. In all these prophetic passages, as in the OT generally, Arabia designates, not the whole of the peninsula now known by that name, but merely the northern part, colonized by the Ishmaelite and Keturæan descendants of Abraham. In Jer 25[23] the reference to Dedan follows immediately upon the mention of the kings of Tyre and Sidon, and the coast beyond the sea. This does not seem to require the locating of Dedan by the sea-coast. The connexion with Tyre is quite sufficient to justify such an arrangement. Besides, the order in which the countries and peoples are named in vv.[20-26] is evidently in a broad way from west to east, with an excursion midway northward and then southward, from Edom to Tyre and back again to Arabia. In Ezk 25[13] Dedan is described as forming the extreme south of Edom, as Teman represents the farthest north. This may only mean that the country of the Dedanites constituted the southern frontier of Edom. The destruction of all Edom is described as a desolation extending from Teman to Dedan. In Ezk 27[20] Dedan is spoken of as carrying to the market of the wealthy and luxurious Tyre precious cloths for chariots or saddle cloths for riding. From the place which it occupies in this passage, it is evidently to be regarded as a country of Northern Arabia. If we accept the correction of some of the ablest modern critics in the reading of v.[19], we find the mention of Dedan preceded by a reference to Southern Arabia; while v.[21] names Arabia, in the narrower acceptation of Northern Arabia, and the princes of Kedar. This precisely suits the locality assigned in other passages to the Keturæan Dedanites.

Considerable difficulty has arisen over the only other allusion to Dedan in the OT, to which we have not yet referred. In Ezk 27[15] we read: 'The men of Dedan were thy traffickers; many isles were the mart of thine hand: they brought thee in exchange horns of ivory and ebony.' The ivory and ebony are represented as tribute due to the supreme importance of Tyre as mistress of the commercial world. There is no reason why the Dedanites of Northern Arabia should not have acted as intermediaries in transporting to the western markets the products of the far East. But the mention of the isles is supposed to make the assumption of a Dedanite people on the sea necessary. The LXX reads *Rhodians*, R (ר) and D (ד) in the writing of Heb. being easily mistaken for one another. In this case, however, it has all the appearance of a correction made by the Gr. translators, so as to make the whole verse refer to islands and islanders. But the order in which the names are given in this passage seems unfavourable to such a view. The list of those who brought their goods to the market of Tyre begins with Tarshish in the far West, passing on to Javan, Tubal, Meshech (Asia Minor and the coasts of the Black Sea), Togarmah (Armenia). With Dedan there is clearly a fresh start made, whether we understand it of Rhodes or of a part of North-Western Arabia. But if in v.[16] we read Edom instead of Aram (Syria), where again only the interchange of R and D is required, we have in vv.[16-18] the order from south to north (Edom, Judah, Damascus). Seeing, then, that Dedan lay south of Edom, it would form the appropriate starting-point for this second list.

Thus in all the prophetic passages the only theory that easily and naturally fits into the text is that which places Dedan on the south border of Edom, and regards the Dedanites as a Keturæan tribe, occupying a position alongside of other allied tribes in the north-west of Arabia. The only trace, therefore, that we have of a Cushite Dedan is in Gn 10[7]. It is quite impossible to conjecture with any confidence how it came about that both Sheba and Dedan should be names recurring in two families so far removed from one another as that of the Cushite Raamah and that of the Keturæan Jokshan. Possibly, a branch of the Keturæan Dedanites may have settled among Cushites near the Persian Gulf, and, while retaining their ancestral name, may have been included in the genealogy with their Cushite neighbours. It is, however, difficult to assume that the same had happened with respect to the sons of Sheba.

The Dedan of the Edomite border is placed by Eusebius in the neighbourhood of Phana on the east of Mount Seir, between Petra and Zoar, the ancient Punon or Phunon, at which the Israelites encamped during their wanderings (Nu 33[42f.]).

LITERATURE.—Besides Dillmann and Delitzsch on Gn and Is, and Davidson on Ezk, see Winer, *Realwörterbuch*,³ 263 f., whose article is much more satisfactory than those of Steiner (Schenkel, *Bibellexicon*, i. 595 f.) and Kautzsch (Riehm, *Handwörterbuch*, 266). See also Hommel, *Anc. Heb. Trad.* 239 f.

J. MACPHERSON.

DEDICATION.—The idea of withdrawing (persons, places, things) from a common and setting apart to a sacred use, which seems to be the original connotation of the important Sem. root קדשׁ, is embodied in various expressions of EV, such as consecrate, dedicate, devote, hallow (holy, etc.), sanctify. Of the first two we may say that the general usage is to apply 'consecrate' and 'consecration' to the setting apart of persons, and 'dedicate' and 'dedication' to the setting apart of things. Accordingly, we read of silver being 'dedicated unto J″' (Jg 17[3]), so that it could no longer be used for other than sacred purposes, of 'vessels of silver, and vessels of gold, and vessels of brass (נְחֹשֶׁת)' so dedicated or set apart by David (2 S 8[10. 11] = 1 Ch 18[10. 11], 1 K 7[51] = 2 Ch 5[1]), just as we read of the dedication of a bowl 'of the first (quality) of copper (נְחֹשֶׁת)' to Baal-Lebanon (*CIS*, Tab. iv.; cf. Mesha's inscription, lines 17, 18, כְּלֵי יהוה vessels of J″ dedicated to Chemosh). The same Heb. word is used of the dedication of the 'tent of meeting' (Ex 29[44], EV 'sanctify'), of the altar of burnt-offering (Ex 29[36]), and of other parts of the furniture (Ex 40[10]), all as described in Lv 8[10ff.]. In another ref. to this dedication (so EV, but RVm dedication-gift, Nu 7[84. 88]) we first meet with the חֲנֻכָּה *Ḥănukkah* (for wh. see Dillmann *in loco*, Jo. Selden, *De Synedriis*, 1679, bk. iii. p. 148 ff., and the next art.). Other dedication ceremonies in OT are the dedication of Solomon's temple, related in detail, 1 K 8 (where note v.[63] חָנַךְ, *ἐνεκαίνισεν*, EV dedicate, but v.[64] קִדֵּשׁ, *ἡγίασεν*, EV hallow), the dedication of the second temple (Ezr 6[16. 17]) * and of the wall of Jerusalem (Neh 12[27]). The last passage is of interest, moreover, as showing that the completion of buildings of a more secular character was also the occasion of a dedicatory service. That this holds good, even of a private house, is to be inferred from Dt 20[5]. For much curious information on this practice among other ancient peoples, and on its continuation in later times, see Selden, *op. cit.* (cf. CONSECRATION).

A. R. S. KENNEDY.

DEDICATION, THE FEAST OF THE (*τὰ ἐγκαίνια* Jn 10[22], *ὁ ἐγκαινισμὸς τοῦ θυσιαστηρίου* 1 Mac 4[56]), was instituted by Judas Maccabæus (B.C. 164) in commemoration of the purification of the temple and altar after they had been polluted by Antiochus Epiphanes (1 Mac 4[59]). It was to be 'kept from year to year by the space of eight days from the five and twentieth day of the month Chislev' (about the time of the winter solstice). The Feast of the Ded. is only once mentioned in NT (Jn 10[22]), and in this passage there is an incidental reference to the season of the year, apparently to explain why it was that Jesus was walking under cover instead of in the open air. This is one of the numerous instances in which the author of the Fourth Gospel shows a close acquaintance with Jewish customs. Westcott thinks that the title chosen by our Lord in Jn 9[5] may refer to the lighting of lamps at this feast, no less than to the ceremonies of the Feast of Tabernacles. This illumination was so prominent a feature in the Feast of the Ded. that it was sometimes called the Feast of Lights (Jos. *Ant.* XII. vii. 7). Josephus, however, does not mention the illumination in private houses, which has been a marked feature of the feast from the end of the 1st cent. to the present time. According to Maimonides, every house should set up at least one light. Those who did honour to the command should set up a light for each person in the house, and those who did more honour still should begin with one light for each person, and double the number each night (Lightfoot, *Hor. Heb. in loc.*). Another school directed that eight lights should be used on the first night, and the number diminished by one each night. The feast lasted eight days. The reference in 2 Mac 10[6] seems to show that the points of resemblance between some of the ordinances of this feast and the Feast of Tabernacles were not accidental, but were designed from the first. The Feast of Dedication, however, was unlike the great feasts, in that it could be celebrated anywhere and did not require the worshipper to go up to Jerusalem.

The words of the Jews in Jn 10[24] would naturally be suggested by the direction which this feast would give to men's thoughts. The hymn which is at present used in Jewish synagogues during its continuance records the successive deliverances of Israel, and contains a prayer for yet another.

J. H. KENNEDY.

DEEM was once in freq. use, but is now almost extinct. Even in AV it occurs but twice, Wis 13[2] 'deemed either fire or wind or the swift air, or the circle of the stars, or the violent water, or the lights of heaven, to be the gods which govern the world' (ἐνόμισαν, RV 'thought'), and Ac 27^{27} 'the shipmen deemed (ὑπενόουν) that they drew near to some country,' though Wyclif has the word and its cognates often, and uses it with fine effect. Thus 1 Co 11$^{29.31.32}$ 'for he that etith and drynkith unworthili etith and drinkith *dome* to hym, not wiseli *demynge* the bodi of the Lord. And if we *demeden* wiseli us silf we schulden not be *demed*, but while we ben *demed* of the Lord we ben chastisid, that we be not *dampned* with this world.' RV gives 'surmised' for 'deemed' in Ac 27^{27}, but 'deemed' for 'as' in Ezr 2^{62}, Neh 7^{64} 'therefore were they deemed polluted and put from the priesthood' (Heb. simply 'and were polluted from the priesthood'). J. HASTINGS.

---

* The title of Ps 30 most probably refers to the dedication by Judas Maccabæus (see Baethgen *in loco*, and next art.).

DEEP.—The adj. is used fig. in the sense of 'profound' without any thought of malevolence, as Ps 92^{5} 'Thy thoughts are very deep'; Ec 7^{24} 'that which is far off, and exceeding deep' (עָמֹק עָמֹק 'deep, deep'); Is 29^{15} 'woe unto them that seek deep to hide their counsel from the Lord' (הַמַּעֲמִיקִים); Dn 2^{22} 'He revealeth the deep and secret things'; 1 Co 2^{10} 'the deep things of God' (Wyclif's tr.; Tind. 'the bottome of Goddes secretes,' so Cranmer, Geneva (1557); but Gen. 1560 restored 'the deepe things of God,' and so Bishops'; Rhem. 'the profoundities of God'). Cf. Bacon, *Essays*, 'the more deepe and sober sort of Politique persons.'

'Deep' is a common subst. in Shaks. and others of that day, and is often used figuratively, as *Jul. Cæs.* IV. iii. 226—

> 'The deep of night is crept upon our talk.'

But in AV where 'the deep' is not the sea, it refers to the waste of waters (the primitive *tĕhôm*), or to the bottomless pit. The Heb. words are תְּהוֹם *tĕhôm*, as Gn 1^{2} 'darkness was upon the face of the deep' (see COSMOGONY); צוּלָה *zûlâh*, Is 44^{27}, and מְצוּלָה *mĕzûlâh*, Job 41^{31}, Ps 69^{15} 107^{24}, or מְצֹלָה *mĕzôlâh* (in the plu. 'deeps'), Neh 9^{11}, Ps 88^{6}. The Gr. words are ἄβυσσος (see ABYSS), βάθος, Lk 5^{4}, 2 Co 8^{2}; and βυθός, 2 Co 11^{25}.

Deepness, now almost replaced by 'depth,' is retained from Wyc. in Mt 13^{5} 'they had no deepness of earth' (RV retains, and restores 'deepness' to the par. passage Mk 4^{5}, which Wyc. had also; Tind. has 'depth' in both places). J. HASTINGS.

DEER.—See FALLOWDEER.

DEFECTIVE.—Sir 49^{4} only, and the meaning is 'guilty of wrongdoing,' 'All, except David and Ezechias and Josias, were defective: for they forsook the law of the Most High' (πλημμελείαν ἐπλημμέλησαν, lit. 'erred an error,' *i.e.* acc. to the Heb. idiom 'erred greatly,' RV 'committed trespass.' The same Gr. is found in LXX Lv 5^{19}, Jos 7^{1} 22$^{20.31}$). Bissell (*in loc.*) says 'were defective' is not strong enough. Nor is it now, but in older Eng. it was used for positive transgression or wrongdoing, as *Act* 10 *Henry VIII.* 1518, 'Persons . . . so founden defective or trespassing in any of the said statutes.' 'Defect' in the mod. sense of a shortcoming is given by RV in 1 Co 6^{7} (ἥττημα, AV after Wyc. 'fault,' Gen. 'impatience,' RVm 'loss': see Sanday-Headlam on Ro 11^{12}).

J. HASTINGS.

DEFENCED is used in AV (only of cities) where we should now say 'fortified,' the Heb. being either the vb. [בָּצַר] *bâzar* (Is 25^{2} 27^{10} 36^{1} 37^{26}, Ezk 21^{20}) 'to cut off, render inaccessible,' or the subst. מִבְצָר *mibhzâr* (Jer 1^{18} 4^{5} 8^{14} 34^{7}, always with עִיר *'îr*, city), 'a place cut off.' RV gives 'fenced' in Is 36^{1} 37^{26} and in Jer 4^{5} 34^{7}; Amer. RV has 'fortified' in all the passages. J. HASTINGS.

DEFER.—From *dis* apart, and *ferre* to carry, to defer is properly 'to put aside,' and this meaning is found in early English. The mod. meaning is 'to put off to another occasion,' 'to postpone'; but in older Eng. the word was loosely used in the general sense of 'put of,' 'delay,' as Dn 9^{19} 'defer not, for thine own sake, O my God' (אַל־תְּאַחַר 'delay not,' 'tarry not,' the vb. is never used in the sense of putting off to another occasion; so Gn 34^{19}, Ec 5^{4}); Pr 13^{12} 'Hope deferred maketh the heart sick' (מְמֻשָּׁכָה 'drawn out,' 'protracted,' cf. Is 18$^{2.7}$ where same part of vb. is tr. 'tall' in RV); Is 48^{9} 'For my name's sake will I defer mine anger' (אַאֲרִיךְ, not postpone to another occasion, but delay so as not to vent it at all if possible, so Pr 19^{11}). Delay is the meaning also in Apocr., Jth 2^{13} (μακρύνω), Sir 4^{3} (παρέλκω), 18^{22} (μείνω). But in NT (Ac 24^{22} only) the meaning is postpone to another occasion, viz. to a fuller hearing; the obsol. construction is, however, employed of having a person as the object, 'Felix . . . deferred them' (ἀνεβάλετο αὐτούς). Cf. Rogers (1642), *Naaman*, 137, 'If it seem goode to thy wisdome to deferre me.' RV gives 'deferred' for 'prolonged' Ezk 12$^{25.28}$ (מָשַׁךְ).

J. HASTINGS.

DEFILEMENT.—See UNCLEANNESS.

DEFY.—When Goliath 'defied' the armies of Israel, it is probable that the translators of AV understood him to challenge them to combat, though the Heb. (חֵרֵף) means to *taunt* or *scorn* (so 1 S 17$^{10.25.26.36.45}$, 2 S 21^{21} 23^{9}, 1 Ch 20^{7}). But when Balaam is summoned to Balak's camp with the words (Nu 23$^{7.8}$),

> 'Come, curse me Jacob,
> And come, defy Israel,'

it is manifest that 'defy' is used in some other and now obsol. sense. The Heb. (זָעַם) means to be indignant, then express indignation against one, denounce, curse; and that is the meaning the parallelism would require (LXX ἐπικατάρασαι, Vulg. *detestare*, Luth. *schelten*). Now 'defy' (from late Lat. *dis-fidare*, dis-trust) primarily means to renounce allegiance or affiance, to pronounce all bonds of faith and fellowship dissolved (whence war would generally follow, and so the modern sense of the word). Thus Tindale's tr. of 1 Co 12^{3} 'no man speakynge in the sprete of God defieth Jesus.' This is probably the sense in which 'defy' should be taken in Nu, since it is Tindale's word; though there is a meaning of the word that is closer to the Greek, viz. 'despise,' 'set at nought,' as Olde (1549), *Erasm. Par. Thess.* 4, 'I defie all thinges in comparison of the gospel of Christ'; and a rare use nearer still, viz. 'curse,' as Hall (1548), *Chron.* 52*b*, 'The faire damoselles defied that daie [at Agincourt] in the whiche thei had lost their paramors.' Geneva and Douay have 'detest' in its old sense of 'denounce.'

J. HASTINGS.

DEGREE.—Late Lat. *degradus* (*de* down, *gradus* a step) gave Fr. *degré*, whence Eng. 'degree.' So a 'degree' is simply a *step*, whether up or down, and esp. one of a flight of steps, or the rung of a ladder. Thus Chaucer, *Romaunt of Rose*, 485—

> 'Into that gardyn, wel y-wrought,
> Who-so that me coude have brought,
> By laddre, or elles by degree,
> It wolde wel have lyked me.'

And Shaks. *Jul. Cæsar*, II. i. 26—

> 'But when he once attains the upmost round,
> He then unto the ladder turns his back,
> Looks in the clouds, scorning the base degrees
> By which he did ascend.'

This is the meaning of 'degree' in AV wherever it occurs in the plur.: the ref. being either to the degrees of Ahaz's dial (2 K 20$^{9\ bis.\ 10\ bis.\ 11}$, Is 38$^{8\ ter}$, see DIAL) or to the Songs of Degrees (Ps 120–134 titles, see PSALMS) and the Heb. מַעֲלָה *ma'ălâh.*

But from signifying a step literally, 'degree' soon passed to express also a step in rank, whence 1 Ch 15^{18} 'their brethren of the second d.' (הַמִּשְׁנִים, lit. 'the seconds'); 17^{17} 'a man of high degree (הָאָדָם הַמַּעֲלָה), Ps 62^{9} 'men of high d.' (בְּנֵי־אִישׁ); 62^{9} 'men of low d.' (בְּנֵי־אָדָם), Sir 11^{1} 'wisdom lifteth up the head of him that is of low d.' (*ταπεινός*: so Lk 1^{52}, Ja 1^{9}); 1 Ti 3^{13} 'they that have used the office of a deacon will purchase to themselves a good d.' (*βαθμός*, lit. 'step,' RV 'standing').

In the last passage the meaning is quite exceptional in the Eng. as in the Greek. The Eng. word is Wyclif's, who has been followed by all the versions except RV. It is simply a literal tr. of the Vulg. *gradus*, itself a literal tr. of the Greek. The Gr. word occurs here only in NT. In the LXX it is used either as tr. of *ma'ălâh* (2 K 20$^{9\,bis.\,10\,bis.\,11}$) or of *miphtân* (1 S 5^{5}), the former being the 'steps' or 'degrees' of Ahaz's dial, the latter the 'threshold' of Dagon's temple: it is also found once in Apocr. (Sir 6^{36}) for the 'steps' of the wise man's door. See further Humphrey's note *in loc.* (*Camb. Bible*), and Hort, *Ecclesia* (1897), p. 202. J. HASTINGS.

DEGREES, SONGS OF.—See PSALMS.

DEHAITES (AV Dehavites, דֶּהָוֵא, *Ḳĕrê* דֶּהָיֵא, Ezr 4^{9}).—The Dehaites were among the peoples settled in Samaria by Osnappar, *i.e.* probably the Assyr. king Assurbanipal. They joined with their fellow-colonists in sending the letter written by Rehum and Shimshai to king Artaxerxes, to complain of the attempt made by the Jews to rebuild the walls of Jerusalem (probably about 447 B.C.). The name has been connected with that of a nomadic Persian tribe, the *Δάοι*, mentioned in Herod. i. 125 (Rawlinson), or with the name of the city Du'-ûa, mentioned on Assyrian contract-tablets (Fried. Delitzsch); but according to Schrader these identifications are very doubtful. The LXX reads *Δαναῖοι* (A), but in B the text runs *Σουσυναχαῖοι οἵ εἰσιν Ἠλαμαῖοι* (for 'the Shushanchites, the Dehaites, the Elamites'; cf. Meyer, *Judenthum*, 36). H. A. WHITE.

DEHORT.—Only 1 Mac 9^{9} 'they dehorted him, saying, We shall never be able' (*ἀποστρέφω*); and in the headings of some chapters. 'Dehort' (fr. Lat. *dehortari*) is the opposite of 'exhort.' '"Exhort" continues, but "dehort," a word whose place "dissuade" does not exactly supply, has escaped us'*—Trench, *Eng. Past and Pres.*^{7} 179. Ussher (1656) in *Ann.* iv. 24 has 'Exhorting them to observe the law of God . . . and dehorting them the breach of that law.' J. HASTINGS.

DELAIAH (דְּלָיָה, דְּלָיָהוּ).—**1.** One of the sons of Elioenai, a descendant of David (1 Ch 3^{24}, AV **Dalaiah**). **2.** A priest and leader of the 23d course of priests in the time of David (1 Ch 24^{18}). **3.** The son of Shemaiah, one of the 'princes' or officers of state at the court of Jehoiakim (Jer 36$^{12.\,25}$). **4.** The son of Mehetabel, and father of Shemaiah, who was associated with Neh. in the rebuilding of Jerus. (Neh 6^{10}). **5.** The head of the children of D., who returned with Zerub. from Babylon (Ezr 2^{60}=Neh 7^{62}). The name in 1 Es 5^{37} is **Dalan.** R. M. BOYD.

DELECTABLE.—Is 44^{9} only, 'Their d. things shall not profit.' AV and RV retain the word from Geneva Bible, which explains, 'Whatsoever they bestow upon their idoles to make them to seeme glorious.' But it is the idols themselves that are called 'the d. things' (חֲמוּדִים *ḥămûdhîm*), which the Bishops' expressed by the (too) free tr. 'the carved image that they love can doe no good.' 'Delectable,' from Lat. *delectabilis*, came in through old Fr., whence came also the form 'delitable,' which was afterwards spelt 'delightable' by a mistaken association with *light*; later forms are 'delightsome' and 'delightful.' Only the last has held its ground; but 'delectable' is remembered by Bunyan's 'delectable Mountains' (*Pil. Prog.* p. 52); cf. Shaks. *Rich. II.* II. iii. 7—

> 'And yet your fair discourse hath been as sugar,
> Making the hard way sweet and delectable.'

J. HASTINGS.

DELICACY.—Trench (*Select Glossary*, p. 52 f.) says, 'In the same way as self-indulgence creeps over us by unmarked degrees, so there creeps over the words that designate it a subtle change; they come to contain less and less of rebuke and blame; the thing itself being tolerated, nay allowed, it must needs be that the words which express it should be received into favour too. It has been thus with *luxury*; it has been thus also with this whole group of words.' The words are 'delicacy,' 'delicate' (adj. and subst.), 'delicately,' 'delicateness,' 'delicious,' 'deliciously,' all of which except 'delicious' are found in AV.

Delicacy.—Rev 18^{3} 'the merchants of the earth are waxed rich through the abundance of her delicacies' (*στρῆνος* sing., RV 'wantonness,' RVm 'luxury'). 'Delicacies' is Rhemish tr., after Vulg. *deliciæ*, so Wyclif; but Tind. and others 'pleasures.' Voluptuousness is the oldest meaning of 'delicacy'; see *Delicate*, and cf. Chaucer, *Former Age*, 58—

> 'Jupiter the likerous, [=lecherous]
> That first was fader of delicacye.'

Delicate.—The adj. has two meanings in AV. 1. *Softly nurtured*, as Sus ^{31} 'Now Susanna was a very d. woman, and beauteous to behold' (*τρυφερός*); Bar 4^{26} 'my d. ones' (*οἱ τρυφεροί μου*); and probably Dt 28$^{54.\,56}$, Is 47^{1} (all עָנֹג, LXX *τρυφερός*), Jer 6^{2} 'a comely and d. woman' (הַמְּעֻנָּגָה, LXX different reading), and Mic 1^{16} (תַּעֲנוּג, LXX *τρυφερός*). 2. *Luxurious*, as Wis 19^{11} 'they asked d. meats' (*ἐδέσματα τρυφῆς*, RV 'luxurious dainties'); Sir 29^{22} 'Better is the life of a poor man in a mean cottage, than d. fare in another man's house' (*ἐδέσματα λαμπρά*, RV 'sumptuous fare'); and Pr 19^{10} RV 'delicate living' (תַּעֲנוּג, AV 'delight'). As a *subst.* delicates occurs Jer 51^{34} 'he hath filled his belly with my d.' (עֲדָנִים, Amer. RV 'delicacies'); Sir 30^{18} (*ἀγαθά*, RV 'good things'), 31^{3} (*τρυφήματα*, RV 'good things'). Cf. Ps 141^{4} Gen. 'let mee not eate of their delicates' (AV 'dainties'); W. Brough (1650), 'Hunger cooks all meats to delicates,' which Herrick seems to copy (*Country Life*), 'Hunger makes coarse meats delicates.' **Delicately** means 'luxuriously' in the foll. passages in AV, La 4^{5} (מַעֲדָן), Pr 29^{21} 'he that d. bringeth up his servant from a child, shall have him become his son at the length' (פִּנֵּק='fondle,' 'indulge'; 'delicately' is Wyclif's tr., who, following Vulg., renders 'who delicatli fro childhed nurshith his seruaunt, afterward shal feelen hym vnobeisaunt,' V. *contumacem*); Lk 7^{25} 'they which are gorgeously apparelled, and live delicately, are in kings' courts' (*τρυφή*, as LXX La 4^{5}, and at 2 P 2^{13} where AV 'riot,' RV 'revel'); 1 Ti 5^{6} AVm 'she that liveth delicately (text 'in pleasure,' Gr. *ἡ σπαταλῶσα*), is dead while she liveth'; and add 2 S 1^{24} Ja 5^{5} RV. But in Ad. Est 15^{3} (AVm and RV 'carrying herself d.,' AV 'daintily,' Gr. *τρυφερεύομαι*) the meaning is 'as one that was tender' (Cov.), that is, *weak*; and so perhaps 1 S 15^{32} 'Agag came unto him delicately.'

The last is the only doubtful passage. AV took 'delicately' from the Bishops' Bible; Cov. 'tenderly,' Gen. 'pleasantly.' The Bishops' marg. is 'in hondes,' and RVm 'cheerfully.' The LXX gives *τρέμων*; Vulg. *pinguissimus, et tremens*, whence Douay 'very fatte, trembling'; Luther, *getrost* (confidently); Ostervald, *gaiement*. The possible ways of taking the Heb. (מַעֲדַנֹּת) are given by Driver (*Notes on Sam.* p. 99), who decides that it is safest, on the whole, to acquiesce in 'delicately,' 'voluptuously.' And, undoubtedly, voluptuously or luxuriously is the most natural meaning of the Heb. (for which see La 4^{5}).

---

* Yet *Oxf. Eng. Dict.* quotes from Cheyne, *Isaiah* (1882), p. xx, 'Isaiah had good reason . . . to dehort the Jews from an Egyptian alliance.'

but its use in this place is not very apparent. The Eng. expression 'delicately' is probably meant to express weakness and fear (as Ad. Est 15^{3}) rather than pride or voluptuousness.

Delicateness.—Only Dt 28^{56} 'the tender and delicate woman . . . which would not adventure to set the sole of her foot upon the ground for d. (מֵהִתְעַנֵּג) and tenderness,' *i.e.* not 'weakness,' but 'fineness.' **Deliciously**=luxuriously, Rev $18^{7.9}$ 'lived deliciously' (*στρηνιάω*, RV 'lived wantonly'). Cf. Latimer, ii. 412, 'I am more inclined to feed many grossly and necessarily, than a few deliciously and voluptuously'; and Lk 16^{19} Tind. 'a certaine rich man, which . . . fared deliciously every daye.'

J. HASTINGS.

DELIGHTSOME, now only poet. for 'delightful,' was once good prose, and occurs in Mal 3^{12} 'ye shall be a d. land' (אֶרֶץ חֵפֶץ). Davies (*Bible Eng.* p. 236) quotes appositely from T. Adams, *Works*, i. 273, 'If this gentle physic make thee madder, He hath a dark chamber to put thee in—a dungeon is more lightsome and delightsome—the grave.'

J. HASTINGS.

DELILAH (דְּלִילָה, *Δαλειδά*).—The woman who betrayed Samson into the hands of the Philistines. The account as given in Jg 16 does not say whether she was an Israelite or a Philistine; but she was doubtless the latter, and Sorek, her place of residence, was then within the Philistine territory. Samson often sought her society, and allowed her to gain a great influence over him. That she was his wife is very improbable, notwithstanding that that is the opinion of Chrysostom and other patristic writers. See SAMSON. W. J. BEECHER.

DELOS (Δῆλος), a famous island in the Ægean Sea, has played a part in history quite out of proportion to its tiny size and rocky unproductive character. It was considered to have been anchored by Zeus to the bottom of the sea, and therefore not to be exposed to ordinary earthquakes.* It was the seat of a very ancient and widely-spread worship of Apollo, who, with his twin sister Artemis, was said to have been born there; and the Gr. peoples flocked from a great distance to the annual festival on the island, which is celebrated in the Homeric hymn to the Delian Apollo. The festival of the Virgin on the neighbouring island of Tenos is the modern representative of the ancient feast of Apollo. D., in B.C. 478, was selected as the meeting-place of the great confederacy of Gr. states on the Ægean coasts and islands for defence against the Persians; but after a time Athens, the presiding city of the confederacy, became also its centre. The Athenians treated D. as a rival to their own interests. As Athens became great, D. lost its importance; but when Athens grew weak, D. recovered. During the 2nd and 1st cent. B.C. it became one of the greatest harbours of the Ægean Sea, playing the same part in ancient trade that the island of Syra has played in modern commerce, and being favoured by the Romans after B.C. 190 as a rival to the maritime power of Rhodes. It was a nominally independent state under Rom. protection from B.C. 197 to 167. Then it was punished, for coquetting with Macedonia, with the loss of freedom; it was given to Athens, and its natives fled and settled in Achaia; and the Delian archons came to an end. The island was repeopled by Athenian colonists (*κληροῦχοι*), along with many Roman settlers; and henceforth its inscriptions are dated by the Athenian archons; and it was always considered to be part of the Roman province Achaia (which see). The earliest trace of a Roman settler in D. is contained in an inscription of B.C. 250. During the 2nd cent. it became the largest settlement of Roman (or Italian) merchants and traders in the Mediter. lands; mainly through their efforts and wealth its rather poor harbour was greatly improved; in their interest it was declared a free port by the Roman state in B.C. 166 in order to strike a blow at their commercial rivals, the merchants of Rhodes; and to satisfy them their other commercial rival Corinth (which see) was destroyed utterly by the Romans in B.C. 146.

Owing to its great importance in the E. Mediterranean trade, D. is mentioned in the list of states to which the Roman government addressed letters in favour of the Jews in B.C. 138–137, 1 Mac 15^{16-23}; and the inscriptions of D. form the best commentary on that important historical document. D. was the great exchange where the products and the slaves of all the states of the E. were bought for the Italian market, and most of the names mentioned in the passage of 1 Mac occur in the Delian documents. The strange omission of the kingdoms of Pontus and Bithynia in 1 Mac becomes all the more remarkable by comparison with the frequent mention of them at Delos. As Homolle says, 'Among the Orientals who frequented D., the Jews doubtless held a considerable place' (*Bulletin de Corresp. Hellén.* viii. 1884, p. 98); but, as the inscriptions are to a large extent concerned with religious purposes, it is not easy to find the traces of their presence. A decree of the Delians confirming the immunity of the Jews from military service is quoted in full by Jos. (*Ant.* XIV. x. 14).

A frightful calamity brought the prosperity of D., and especially of the Roman settlers, to an end. In the Mithridatic war Athens took part with the king, while D., where the Roman settlers were so numerous, naturally remained true to the Roman interest. After maintaining itself for a short time, D. was captured in B.C. 87 by the enemy; 20,000 Italians were massacred there and in the neighbouring Cyclades; and, when the Romans recovered it in the course of the war, they found it, as Strabo says, deserted. It recovered to a certain extent in the following years; but direct trade between Italy and the E. harbours now became more common; Ostia and Puteoli took the place of D. as the great emporia for the purchase of E. products required in Italy, and under the Roman Empire D. became utterly insignificant.

LITERATURE.—The excavations conducted at Delos for many years by the French School of Athens have thrown a flood of light on the history of the island. An excellent summary and estimate of their earlier results, as published in many scattered works, is given by Jebb in *Journal of Hellenic Studies*, 1880, pp. 7–62. Since then numerous articles in the *Bulletin de Corresp. Hellén.*, by Homolle, S. Reinach, and others, have added much information, especially vi. pp. 1–167, vii. pp. 103–125, 329–373, viii. pp. 75–158, xiv. pp. 389–511, xv. pp. 113–168. See also Homolle, *Archives de l'Intendance Sacrée à Delos*; Schœffer, *de Deli Insulæ rebus.* W. M. RAMSAY.

DELUGE.—See FLOOD.

DEMAND.—Throughout AV 'demand' is simply to ask, as Fr. *demander*, without the sense of authority. This is manifest from the Heb. and Gr. words so tr^{d}, which have all this simple meaning. In Introd. to Gen. Bible we read, 'The Catechisme, or maner to teache children the Christian religion, wherein the minister demandeth the question, and the childe maketh answer.' See Field, *ON* iii. on Mt 2^{4}. As a subst. d. occurs only Dn 4^{17} with the same simple meaning. Cf. Chaucer, *Troilus*, v. 859—

> 'And of th' assege (siege) he gan hir eek byseche,
> To telle him what was hir opinioun.
> Fro that demaunde he so descendeth doun
> To asken hir, if that hir straunge thoughte
> The Grekes gyse, and werkes that they wroughte.'

Once RV introduces d. in mod. sense (Neh 5^{18}) for AV 'require' (see Ryle's note). J. HASTINGS.

---

* An earthquake at D. was considered a specially grave expression of the will and power of the god; see Herod. vi. 98; Thucyd. ii. 8.

DEMAS (Δημᾶς, possibly an abbrev. of Demetrius) is described by the Apostle Paul as a fellow-labourer, and unites with him in sending salutations from Rome to the Colossians and to Philemon (Col 4^{14}, Philem v.^{24}). In the 2nd Ep. to Timothy (4^{10}) he is described as having forsaken the apostle when he was awaiting his trial before Nero, because he 'loved this present world.' Whether he was discouraged by the hardships of the Christian life, or allured by the hope of some earthly advantage, and whether his apostasy was temporary or final, we have no means of knowing. Tradition leans to the darker view of his character, and classes him among the apostates from the faith (Epiph. *Hær.* 51). R. M. BOYD.

DEMETRIUS I., surnamed Σωτήρ, 'Saviour,' by the Babylonians in gratitude for the removal of their satrap Heraclides, was the son of Seleucus Philopator. In his boyhood he was sent (B.C. 175) to Rome as a hostage, and remained there during the reign of his uncle, Antiochus Epiphanes. When the Senate several times refused his request to be recognized as the king of Syria, he fled from Rome, with the assistance chiefly of the historian Polybius (Polyb. xxxi.; Justin, xxxiv. 3). Landing at Tripolis, he was joined by large bodies of the people, and even by the bodyguard of his cousin, Antiochus Eupator. Eupator was soon defeated and put to death, and in B.C. 162 D. was proclaimed king (1 Mac 7^{1-4}, 2 Mac $14^{1.\ 2}$; Jos. *Ant.* XII. x. 1; Liv. *Epit.* xlvi.). He conciliated Rome by valuable presents (Polyb. xxxi. 23), and, after interfering in the affairs of Babylon (App. *Syr.* 47; Polyb. xxxii. 4), turned his attention to Judæa. Alcimus (wh. see) was established in the high priesthood, and the Syrian lordship was for a time completely renewed. In the seven years that followed, D. again offended the Romans by putting a supporter of his own in the place of Ariarathes on the throne of Cappadocia (Polyb. xxxii. 20; Liv. *Epit.* xlvii.), whilst his tyranny and excesses alienated his own people. Alexander Balas (wh. see) was set up as a claimant to the crown of Syria (B.C. 153); and he and D. competed for the support of Jonathan (1 Mac 10^{1-21}; Jos. *Ant.* XIII. ii. 1–3). The former, offering princely rank and the high priesthood, won at the first bid; and when the latter made a further promise of exemption from taxation and investment with privilege (1 Mac 10^{25-45}), the people 'gave no credence' to his words, which are very important for the light they cast upon the nature of the imposts exacted by the Syrian kings. The salt tax, the king's share of the crops and fruits, the poll-tax, the pressed service, with a variety of other burdens, were to be remitted, and the expenses of the temple to be met from the royal revenue (see Mahaffy, *Emp. of Ptolemies*, § 117). With the help of the Jews, Balas was able to recover from the reverses he suffered during the two years' war that followed; and in B.C. 150 a decisive engagement took place, in which D. displayed the utmost personal bravery, but was defeated and slain (1 Mac 10^{48-50}; Jos. *Ant.* XIII. ii. 4; App. *Syr.* 67; Polyb. iii. 5; Justin, xxxv. 1; Euseb. *Chron.* ed. Schoene, i. 263 sq.).

R. W. MOSS.

DEMETRIUS II., surnamed Νικάτωρ, 'Conqueror,' was sent by his father, D. Soter, for safety to Cnidus after the success of Balas seemed probable (Justin, xxxv. 2). For several years he remained in exile; but as soon as the unpopularity of Balas gave him an opportunity, he landed (B.C. 147) with an army of Cretan mercenaries on the Cilician coast. The entire country rallied to him except Judæa, where Jonathan still supported Balas. But Ptolemy Philometor declared in his favour, and their combined forces inflicted a fatal defeat upon Balas (B.C. 145) on the banks of the Œnoparas, from which event D. derived his surname (1 Mac 11^{14-19}; Jos. *Ant.* XIII. iv. 8; App. *Syr.* 67; Liv. *Epit.* lii.). Jonathan now set himself to separate Judæa from the Syrian Empire, and besieged the citadel in Jerus.; but D. persuaded him to raise the siege on the addition of three Samaritan provinces to Judæa, and the exemption of the country thus enlarged from tribute (1 Mac 11^{20-37}; Jos. *Ant.* XIII. iv. 9). When the excesses of D. had estranged his subjects, Tryphon (Diodotus), a former general of Balas, set up the latter's son as a pretender to the throne; but D. obtained the help of Jonathan by promising the removal of the Syrian garrisons from Judæa, and put down the revolt (1 Mac 11^{41-52}; Jos. *Ant.* XIII. v. 2, 3). On Jonathan's return to Judæa the revolt broke out again, and Tryphon made himself master of Antioch. As D. failed to keep his promise to the Jews, they now took the side of Tryphon, and drove the royal forces out of Cœle-Syria (1 Mac 11^{53-74}; Jos. *Ant.* XIII. v. 5–11). D. withdrew from the S. part of his kingdom; but when Tryphon, who had secured the Syrian crown for himself, attempted to reduce Judæa, Jonathan's brother Simon attached himself to D., and extracted from him a formal recognition of independence (1 Mac 13^{34-42}; Jos. *Ant.* XIII. vi. 7). Soon after D. invaded the dominions of the king of Parthia, by whom, in B.C. 138, he was taken prisoner (1 Mac 14^{1-3}: though Jos. *Ant.* XIII. v. 11, Justin, xxxvi. 1, and App. *Syr.* 67, 68, arrange the events in a different order, and support B.C. 140 as the date of the disaster). The imprisonment lasted for ten years, at the close of which D. was liberated by the Parthian king, who was engaged in war with Antiochus Sidetes, brother of D. (Jos. *Ant.* XIII. viii. 4; Eus. *Chron.* ed. Schoene, i. 255). D. recovered the kingdom (B.C. 128), and at once undertook a war against Ptolemy Physkon of Egypt. Ptolemy thereupon claimed the Syrian crown for Alexander Zabinas, who was announced to be the son of Balas (Eus. *Chron.* i. 257), or of Sidetes (Justin, xxxix. 1). D. was conquered by Zabinas at Damascus, and fled to Ptolemais, and thence to Tyre, where in B.C. 125 he was murdered (Jos. *Ant.* XIII. ix. 3), possibly at the instigation of his wife Cleopatra (App. *Syr.* 68; Liv. *Epit.* lx.).

R. W. MOSS.

DEMETRIUS III. (surnamed Εὔκαιρος, 'Prosperous,' and on coins Theos, Soter, Philometor, etc.) was a son of Antiochus Grypus, and grandson of D. Nikator. On the death of his father civil wars ensued, in the course of which two of his elder brothers lost their lives, whilst Philip, the third, secured a part of Syria, and D. established himself in Cœle-Syria, with Damascus as his capital, by the aid of Ptolemy Lathyrus, king of Cyprus (Jos. *Ant.* XIII. xiii. 4). In Judæa, too, civil war broke out between Alexander Jannæus and his Pharisee subjects. The latter invited the assistance of D. (Jos. *Ant.* XIII. xiii. 5; *Wars*, I. iv. 4), who possibly regarded it as a good opportunity to extend his kingdom to its ancient limits on the West and the South. He entered the country with a large army, was joined by the insurgent Jews, and defeated Jannæus in a pitched battle near Shechem (Jos. *Ant.* XIII. xiv. 1; *Wars*, I. iv. 5). But the desertion of the Jews, who either pitied the plight of Jannæus (Jos. *Wars*, *ib.*) or more probably feared the re-establishment of Syrian supremacy, made it impossible for D. to follow up the victory, and he withdrew to Berœa (Aleppo). The town was occupied by Philip, who, when besieged by his brother, called the Parthians to his aid. D. was in turn shut up closely within his encampment and starved into surrender. He was sent as a prisoner to Arsaces IX., by whom he was detained in captivity until his death (Jos. *Ant.* XIII. xiv. 3). The dates of the reign of D. cannot be fixed with precision; but coins of his are known, dated from the Seleucid year 217 to 224, *i.e.* approximately from B.C. 95 to 88 (Eckhel, iii. 245; Gardner, *Catalogue of Gr. Coins in the Brit. Mus.* 101). R. W. MOSS.

DEMETRIUS (*Δημήτριος*).—Two persons of the name are mentioned in NT—the ringleader in the riot at Ephesus (Ac 19[24]), and a disciple commended by St. John (3 Jn v.[12]). Both of these dwelt either in Ephesus or its vicinity,—the very name is redolent of Ephesian surroundings, and there is nothing impossible in the suggestion that the agitator had become the disciple of good report, and that, therefore, both references are to the same man. In its contracted form of Demas this is also the name of one who has an unhappy notoriety as a recreant, 'Demas hath forsaken me' (2 Ti 4[10]). He is also mentioned in Col 4[14] and Philem v.[24], and it is not certain that St. Paul meant to imply anything like utter apostasy. W. MUIR.

DEMON, DEVIL, Gr. *δαίμων*, or *δαιμόνιον* (more frequently), Heb. שֵׁד, Syr. ܫܐܕܐ, Aram. שֵׁידָא (cf. Assyr. *šídu*). The supposed Heb. root is [שׁוּד] 'to be mighty,' hence 'to rule,' Arab. ساد (cf. שָׁדַד 'to treat violently, to destroy'). **Demoniac**, *δαιμονιζόμενος*. For 'devil' (properly *διάβολος*, see SATAN) RV rightly substitutes 'demon' wherever the Greek text has *δαιμόνιον*.

Both physical and moral evil may be regarded from two standpoints—(1) As existing *in* man physically in the form of bodily disease, or spiritually as moral evil; (2) as having a source *outside* man. It is with physical and moral evil in the *latter* aspect that we are now dealing. Among the Hebrews, both in pre-exilic and post-exilic times down to a comparatively late period of the Christian era, both moral and physical evil were attributed to personal agencies. This conception of personal evil agencies, that affected man's body and soul, exercised a profound and enduring influence over the minds of Christ and the apostles, and played a very considerable part in the writings of the Church Fathers.

In tracing this conception of evil spirits influencing man to its primitive sources, we shall find that it has its springs in early Semitic ideas which surrounded the Israelite people in the dawn of their history. Baudissin has clearly shown how the demonology of the Græco-Roman period of Judaism emerged out of the earlier polytheism. On this we shall have more to say later on. But it should be noted that that polytheism was itself the outcome of the principle called by Tylor, in his well-known work *Primitive Culture*, by the name 'animism.' Even early mankind instinctively sought for *causes*, and interpreted the forces and other manifestations of nature as *personal*, *i.e.* as emanating from beings analogous to himself (cf. Siebeck, *Lehrb. d. Religionsphilosophie*, p. 58 ff.). Thus primitive man dwelt in a cosmic society of superhuman agencies, some of which ministered to his well-being and others to his injury. At the dawn of human consciousness man found himself confronted by forces which he was unable to control, and which exercised a baleful or destructive influence. Hurricane, lightning, sunstroke, plague, flood, and earthquake were ascribed to wrathful personal agencies, whose malignity man would endeavour to avert or appease.

The nomadic Arabs of the time of Mohammed believed in the existence of hostile powers or *Jinns*, who were held to be the inhabitants of lonely spots, and Mohammed himself recognized their existence just as fully as his heathen contemporaries did. Various names were given to them, viz. *Ghûl*, *'Ifrît*, *Si'lâ*, *'Alûk*; and we have likewise feminine names. The word *'Ifrît*, which occurs so frequently in the 'One thousand and one nights,' is also found in the Korân (Sur. 27. 39), and according to Wellhausen means, like the Heb. שָׂעִיר, 'hairy.'* 'The desert is full of these spectral shapes. Whoever spends his time there as a traveller must steel his heart against them. A child of the desert must be on friendly terms with the wolf and on terms of intimacy with the *ghûl*.' On this subject consult W. R. Smith, *RS*², p. 119 f.

A. THE DEMONOLOGY OF THE OT.—The parallels which we find in OT to the *Jinn* of ancient as well as modern Arabia may now be noted. Isaiah, in an oracle describing the doom of Edom, portrays a scene among Edom's ruined fortresses, when 'one שָׂעִיר (hairy satyr) shall call out to another, and Lilîth (the night hag) shall take up her abode' (Is 34[14]). This Lilîth is a demon of feminine sex. The same mythical creature meets us in the cuneiform inscriptions (see Schrader, *COT* ii. p. 311). In one of the magical texts cited by Hommel (*Semiten*, p. 367) occurs the line (iv. Rawl. 29, No. 1, Rev. 23)—

'The *lilu*, the *lilat*, the handmaid of *Lilu*.'

The Babylonian *lîlâtu* or *lîlîtu* is placed in this incantation in close connexion with the plague-demon *Namtar*. There can be little doubt that this plague-demon was connected in the popular imagination with the Semitic-Babylonian word *lilâtu*, which means 'night,' and so became a word of terror, denoting the night-demon, who sucked the blood of her sleeping victims. This grim feminine personality became a subject for later Jewish legends (see Sayce, *Hibbert Lect.* p. 146), which multiplied these night-demons (*lîlîn*).

---

* *Skizzen u. Vorarbeiten*, iii. ('Reste des Arabischen Heidenthums'), p. 135 *ad fin.* But this view appears to me somewhat doubtful, and the connexion of عفريت with عفر (עָפָר) 'dust,' seems more probable. When we bear in mind the close connexion between the *Jinn* and the serpent according to Arabic belief (see Nöldeke, *Zeitschr. für Völkerpsychologie u. Sprachwissenschaft*, vol. i. 1860, p. 412 ff.; and Baudissin, *Stud. zur Semit. Religiongesch.* i. 279 ff.), we might connect with this the curse pronounced on the serpent in Gn 3[14] 'Dust thou shalt eat' . . . Winckler, it is true, regards this as simply an expression of dishonour or disgrace, and compares the phrase *tikalu ipra* in one of the Tel el-Amarna letters (*Altorient. Forsch.* iii. 271). But a hint which we obtain from Doughty's *Arabia Deserta* (i. p. 136) places us on the right track both for the explanation of the word *'Ifrît* and of Gn 3[14] 'Malignity of the soil is ascribed to *jân*, ground demons, *ahl el-ard*, or earth-folk.' Malignant demons are believed to inhabit the seven stages of the under-world (*ib.* p. 259). I should therefore prefer to cite, as an Assyrian illustration of Gn 3[14], the 8th line in the Descent of Ištar to Hades, *ašar ipru madu bubussunu akalšunu ṭiṭu*, 'a place where much dust is their sustenance, mire their food.' Mr. Buchanan Gray of Mansfield College, Oxford, in a letter which he kindly sent to me on this subject, says, 'I have looked through the article in the *Lisân el 'Arab* on عفر, and can find nothing that *necessitates* giving to *'Ifreet* the sense "hairy." I daresay you have noticed that some of the derivatives of the root عفرا, عفرى (in plu.) denote the feathers of the neck, or the mane, or the front hairs of a horse. In the line cited by Wellh. from *Hudh.* 227[10] عفارى (plu. of عفرى) is used of the hair of women. The feminine of عفرى is عفرية, whence, according to Arabic lexicographers, عفريت (*'Ifrît*), through quiescence of the *yā*, and subsequent change of the ة into ت. This is all the connexion with hair which I have yet been able to find, and thus there seems less in favour of connecting *'Ifreet* with hairiness, than of your attractive alternative view of connecting it with dust.' In the new ed. (1897) of Wellhausen's *Reste*, see pp. 151 ff., and footnote 1. p. 152.

See Weber, *Syst. der altsynagog. Palästin. Theol.* p. 246; Eisenmenger, *Entdecktes Judenth.* ii. p. 413 ff.

Even conservative critics like Dillmann and König assign Is 34 (together with 35) to a period not earlier than the end of the exile; Cheyne, indeed, would regard it as post-exilic (*Introd. to Isaiah*, p. 205 ff.). In the case of this chapter, as well as 13^2–14^{23}, it is impossible to deny the existence of clear traces of direct Babylonian influence. But the date of authorship of these passages does not determine the question when the belief in demonic personalities embodied in animal shapes first became prevalent in Israel. From the mention of jackals, ostriches, wild cats, and hyænas in connexion with the שְׂעִירִים 'satyrs,' both in $34^{13ff.}$ and its parallel $13^{21ff.}$, we are led to infer that demons were held to reside more or less in all these animal denizens of the ruined solitude. From Lv 17^7 we also learn that in post-ex. times sacrifices were offered to שְׂעִירִים—a practice which is expressly forbidden. On the other hand, the curious rite respecting 'Azâzel (עֲזָאזֵל), detailed in Lv $16^{8ff.}$, formed an integral part of the ceremonies on the great Day of Atonement, and clearly shows how firmly embedded in popular imagination was this belief in evil powers of the solitude. 'Azâzel is here an evil spirit, and stands opposed to J".[*] See AZAZEL.

The belief that certain animals were endowed with demonic powers, somewhat like the Arabic *Jinn*, must have existed in comparatively early pre-ex. times, since Gn 3^{1-19}, containing the temptation of Eve by the serpent, belongs to the earlier stratum of J. We might compare with this Nu 22^{22-34}, coming from the same documentary source. But in the narrative of the temptation of Eve by the serpent there is no hint that an evil spirit resided in the serpent. The serpent is identified with it, and we have no suggestion that a demon was able to detach itself from the animal and pass into something else. This was a later development. The animal was itself the demonic power, and the latter is not abstracted or treated as a separable personality.

The Jewish exile, covering the larger part of the 6th cent. B.C. and the close of the 7th, wrought a great change. It is probably to this period that we owe the Heb. word שֵׁד. This word, occurring in the plural form שֵׁדִים in Dt 32^{17}, like the Aram. שֵׁידָא, is probably a loan-word, taken from the Assyro-Babylonian (*šidu*). The word *šidu* in Assyr. means good or evil genius, represented in the monuments in the form of a colossal bull. The word occurs only twice in OT (Dt 32^{17} and Ps 106^{37}). The Song of Moses (Dt 32) in its present form can hardly be earlier than the time of Jeremiah and Ezekiel (Kuenen). Indeed, its retrospective and didactic character, as well as the references to Israel's past sins of idolatry, would point quite as well to the 6th cent. as to the 7th for the date of its composition. In other words, it may be held, with considerable probability, to reflect the feelings of pious Jews in the exile period.

Now, magic played a very considerable part in Babylonian religion. Magic rests on the basis of a belief in evil and destructive spirits, to whose baleful influences man is daily exposed, and which can be counteracted by certain incantations, whereby the countervailing name and power of the higher beneficent gods are invoked. As Sayce has clearly shown (*Hibbert Lect.* p. 317), magic was closely bound up with medicine, since 'all sickness was ascribed to demoniacal possession; the demon had been eaten with the food and drunk with the water, or breathed in with the air, and until he could be expelled there was no chance of recovery' (p. 310). Specimens of these magical texts may be seen in the translations given in Appendix 3 of Sayce's *Hibbert Lectures.* We subjoin the following specimen:—

> 'The plague (*namtar*), the fever which will carry the people away,
> The sickness, the consumption which will trouble mankind,
> Harmful to the flesh, injurious to the body,
> The evil incubus, the evil *alu*, the evil *maskum*,
> The evil man, the evil eye, the evil mouth, the evil tongue . . .
> Against my body never may they come,
> My eye never may they injure . . .
> Into my house never may they enter,
> O spirit of heaven conjure, O spirit of earth conjure.'[*]

A comparison of this vast system of belief in evil spirits and in incantations, which prevailed in Babylonia, with the later Jewish traditions of demonology, at once reveals the close connexion between the two. During the exile these Babylonian traditions effected an entrance into the Jewish world of ideas, and there became permanently domiciled.

But while שֵׁד is obviously borrowed from the Bab. *šidu*, its signification was by no means the same. For שֵׁדִים is used in the sense of deities of the heathen, אֱלֹהִים אֲחֵרִים. Now, the attitude of ancient Israel towards foreign deities varied considerably in different periods of the nation's history. The continued declension of the people towards idolatry in the pre-exilic times clearly shows that, in the popular mind, belief in the power as well as existence of foreign deities was firmly rooted. Many OT passages clearly indicate this, Jg 6^{31} 9^{24}, Nu 21^{29} (cf. Jer 48^{46} 49^1), 1 S 26^{19}, Ru 1^{15} 2^{12} (see Baudissin, *Stud. zur Semit. Religionsgesch.* Heft i.). In other words, the religion of Israel in early times was henotheism rather than monotheism. In fact, monotheism came very slowly to displace the 'monarchic polytheistic' belief of primitive Israel. It is true that, from the 8th cent. B.C. downwards, the 'other gods' are called 'no gods,' 'emptiness,' 'wind,' 'vanity' (or 'breath'), 'corpses,' and 'dead'; but these are terms which are rather selected to express the utter powerlessness and insufficiency of foreign deities in comparison with the supreme might of J", the true living God of Israel, than to assert their absolute non-existence.[†]

Accordingly, in the two passages Dt 32^{17} and Ps 106^{37}, the word שֵׁדִים 'demons' is used to describe the subordinate position, as compared with J", of the Moabite deities, to whom the Hebrews sacrificed in the time of Moses. Baudissin rightly observes in reference to Dt 32^{12} 'when in the Song of Moses it is said that J" alone has led Israel, and no strange god (אֵל נֵכָר) was with Him, we must merely understand that the active influence of strange gods over Israel is excluded, but that their existence was rather recognized than denied.'

The use of שֵׁדִים in these two passages may, in fact, be regarded as the first step taken by Israel in the direction of demonology, under Babylonian influence, the deities of foreign nations being relegated to this subordinate rank, and designated by this term. Elsewhere in OT and in the literature of a later period, we find the deities of the heathen identified with the host of stars. Of this we have an example in the apocalyptic section in Isaiah (24–26), which is placed by many critics, with good reason, in the Greek period, not much earlier than the Maccabæan book of Daniel. In Is 24²¹ we read 'And it shall come to pass in that day, that J″ will visit the host of the height in the height, and the kings of the earth upon the earth, and they shall be carried away captive to the pit, and shut up in the prison, and the moon shall grow pale,' etc. This is a fresh development of the old pre-exilic Heb. conception of the heavenly host of attendant personal powers or angels, represented as stars. This belief is reflected in Micaiah's vision (1 K 22¹⁹), Deborah's song (Jg 5⁴· ²⁰), and embodied in the name יהוה צְבָאוֹת, which frequently recurs in prophetic literature (Am 5²⁷, Is 1⁹ 6³ etc.),* and thence passed into post-exilic psalm liturgy (Ps 103²¹ 148²). In the apocalyptic passage Is 24²¹, the host of the height are the heathen deities identified with fallen angels. Here, again, the roots of the conception of *fallen* national deities may be found in the influences of the exile (cf. Is 46¹). It is impossible to mistake the significance of the passage Is 14¹²ᶠᶠ·—

---

[*] See Schultz, *Alttest. Theologie*^{4} (1888), p. 368; and also Cheyne in *ZATW*, 1895, Heft i. p. 135 ff. The curious rite of sending forth the goat for 'Azâzel into the wilderness (Lv $16^{21.\,22}$) should be compared with the despatch of the bird into the field in the ceremony respecting leprosy (14^{53}).

[*] See Tiele, *Babylon-Assyr. Gesch.* p. 548 ff.; Hommel, *Gesch. Babyl. Assyr.* p. 388 ff. The subject was first comprehensively dealt with in Lenormant's *Chaldæan Magic*, about twenty years ago. The latest work is L. W. King's *Bab. Magic and Sorcery, Cuneiform Texts from the Kouyunjik Collections in B.M.*

[†] Baudissin (*ib.* p. 72) in our opinion errs in holding that, in all passages which describe the victorious conflict in which J" engages with the gods of the heathen, we have merely poetic personification of the latter, *e.g.* Is 19^1, Jer 46^{25}. The language of Ex 15^{11} 'Who is like unto thee, O J", among the gods' (בָּאֵלִם, cf. Ps $77^{14ff.}$ 105^3 96^4, in which comparison is made between God and the deities of other nations), clearly indicates that *some* kind of existence and power, however slight, is assigned to the latter. That the terms אֱלִילִים, הֶבֶל, שֶׁקֶר, לֹא אֱלֹהִים, etc., cannot be pressed into signifying the absolute denial of existence, is recognized by Baudissin himself (*ib.* p. 101 *ad fin.*).

> 'Oh! how art thou fallen from heaven Lucifer (הֵילֵל) son of the dawn!
> How art thou hewn down to earth who didst lay peoples low!
> And thou saidst in thy heart: To the heavens will I mount up,
> Above the stars of God will I set my throne on high' . . .

B. THE DEMONOLOGY OF LATER JUDAISM.—During the Greek period the conception of the gods of the heathen as demons became firmly established, and its development was no doubt largely helped by a growing tendency to assume an intermediate realm of δαίμονες (later δαιμόνια). Its beginnings may be traced even in Hesiod, who made a distinction between θεοί and δαίμονες—the latter being good, and the survivors of the happy golden race whom the Olympic gods first made. But in the 5th cent. B.C. Empedocles widened the gap between gods and demons. The gods were powerful and good, without appetite or passion; the demons, on the other hand, held a middle position between men and gods, and were the ministers from the latter to the former. These δαίμονες lived long, but were not immortal like the gods. They had passions like men, and there existed varying grades among them, some being beneficent and others malignant. It was the demons who communicated dreams and oracles to men, and inspired them towards good and evil (Grote, *Hist. of Greece*, i. pp. 66, 409 ff.). Stoic theology subsequently adopted into its system this conception of an intermediate realm of δαιμόνια, in order that polytheism, as a moral power, might be rehabilitated. This finds full expression in the 2nd cent. A.D. in such writers as Plutarch, Apuleius, and Maximus of Tyre. The demons stand between men and gods, and all the elements of mythology that were derogatory to the character of the national deities were referred to the demons.

Greek influence, therefore, stimulated the growth of Hebrew angelology and demonology. Intermediate personal agencies became interpolated between the absolute transcendent God and the phenomenal world. As God in His transcendence became removed from participation in the material world, these mediating personalities became a quasi-intellectual necessity. Accordingly, the LXX renders אֱלִילִים in Ps 95 [Heb. 96]⁵ by δαιμόνια, and so also שֵׁדִים in Dt 32¹⁷, Ps 105 [Heb. 106]³⁷, גַּד in Is 65¹¹, and צִיִּים in Is 34¹⁴. Similarly, in the Bk. of Baruch heathen deities are called δαιμόνια or evil spirits. The Ethiopic Bk. of Enoch designates the gods *Aganent*, 'demons,' while in the pröem to the Sibylline books the gods of the heathen are called δαίμονες οἱ ἐν ἅδῃ. It should be noted, moreover, that both in the Sibylline books and in the Bk. of Enoch the deities are regarded as *evil* spirits. Philo, on the other hand, who came more directly and completely under Greek influence, occupied an exceptional position. He treats the gods of the heathen as *good* heavenly powers, identified with stars, in opposition to the prevalent Jewish-Alexandrine conception.* We notice again in To 6¹⁵ᶠᶠ· the evil spirit Asmodæus is called simply δαιμόνιον, and in 3⁸· ¹⁷ πονηρὸν δαιμόνιον. Similarly, in Josephus δαιμόνιον is used of the ghostly evil spirit.

The subject of Jewish demonology is too vast to compress into the compass of this article. We shall therefore cite a few only among the salient features which may be gathered from Weber's *System der altsynagog. Paläst. Theol.* § 54.

The ordinary word for 'devil' in later Heb. is שֵׁד. Similarly, in the Peshiṭtâ ܫܐܕܐ is the rendering of the δαιμόνιον of NT.† Another term employed by the Jews was מַזִּיקִין, meaning 'destructive' or 'injurious ones' (cf. Pael נַזֵּיק 'injure'). Thus the Targ. renders שֵׁדִים in Ps 106³⁷ by מַזִּיקַיָּא. In fact, the πνεύματα ἀκάθαρτα (πονηρά) of NT is merely a rendering of רוּחִין בִּישִׁין or רוּחֵי טוּמְאָה; and just as רוּחִין is sometimes used by itself to express this, so also in NT with πνεύματα.

According to Jewish conceptions, **Satan** stands at the head of the demons. From *Berachôth* 51*a* we learn that they form societies or bands which lie in wait for men. The sick, women in menstruation, bridegrooms and brides, those in sorrow, and even disciples (תַּלְמִידֵי חֲכָמִים), are liable to their assaults. According to *Pesachim* 112*b* the nightly wanderer is specially open to danger, for the night season until cock-crow is the time when demons walk abroad. They surround the house, and injure those who fall into their hands. More particularly, they destroy children who during the night pass outside the house. As soon as the cock crows this power ceases, and the demons return to their place of abode. Also there are special animals which, according to Jewish belief, are united with demons, viz. serpents, asses, bulls, mosquitos, etc. We are here again reminded of the *Jinn* of the desert in primitive as well as modern Arabian belief.‡ 'Don't remain standing,' is the warning of *Pesachim* 112*b*, 'when the bull comes from the meadow, for Satan dances between his horns.' God alone has power to quell the demons. His protection is always bestowed on the congregation when the priest recites the יִשְׁמְרֶךָ of Nu 6²⁴, an expression which, according to *Sifre* 12*a*, bears special reference to evil thoughts and demons. The protection is afforded by means of the guardian angels whom God assigns to His pious followers. *Berachôth* 40*a* gives the advice that covenant salt (Lv 2¹³, Nu 18¹⁹) should be eaten and drunk at every meal as a protection against demons. Certain formulæ or passages from Holy

---

* I disagree, however, with Smend in his conclusion that this name was a speciality of prophetic literature, borrowed, as Wellhausen suggests, from Amos (*Lehrbuch d. Alttest. Religionsgesch.* p. 185 ff.). The origin of the phrase was undoubtedly much more primitive.

* Philo also identifies the heroes and demons of Greek speculation with the angels of Moses. His tendency was to rationalize myth, 'In souls and demons and angels we have, it is true, different *names*, but, in conceiving the thing represented by them all to be one and the same, you will set aside a heavy burden, viz. superstition' (Conybeare in *JQR*, Oct. 1896, p. 79).

† This is the Syr. equivalent of δαίμων in Lk 8²⁹, and δαιμόνιον (Mt 17¹⁸ etc.), and שָׂעִיר (Lv 17⁷, Is 13²¹ 34¹⁴).

‡ Cf. Mk 1¹³ ἦν μετὰ τῶν θηρίων.

Writ were considered specially potent against demons. *Berach.* 51*a* recommends the passage from Zec 3^2 'The Lord rebuke thee, Satan,' as specially effective against the Angel of Death. *Aboda Zara* 12*b*, *Pesachim* 112*b*, warn the reader against drinking water in the night, for he runs the risk of death, or of the demon Shabriri, who can make men blind. The remedy is to strike the water-jug with the lid, and say to oneself, 'Thou N., son of N., thy mother hath warned thee, and said, Guard thyself from the *Shabriri, beriri riri, iri, ri*,' the pronunciation of the name with a syllable short each time being a potent spell to drive the demon away.

We shall now cite an interesting illustrative passage from Josephus (*Ant.* VIII. ii. 5), which is significant because it shows how profoundly the belief in demonology affected even the most cultivated and cosmopolitan of Jews. In his account of Solomon's wisdom * we are informed that 'God enabled him to learn that skill which expels demons,' and that Solomon composed such incantations as alleviate distempers. 'And he left behind him the mode of using exorcism by which they drive away demons so that they never return. And this method is prevalent unto this day, for I have seen a certain man of my own country, whose name was Eleazar, releasing people that were demoniacal in the presence of Vespasian. . . . The manner of the cure was as follows:—He put a ring that had a root, of one of those sorts mentioned by Solomon, to the nostrils of the demoniac, after which he drew the demon out through his nostrils; and when the man fell down at once, he adjured him (the demon) to return unto him no more, making still mention of Solomon, and reciting the incantations which he composed.' Another passage shows that Josephus considered demons to be the spirits of departed wicked men (*BJ* VII. vi. 3).

Passing for a few moments to the Jewish apocryphal literature of the age *preceding* the birth of Jesus, we observe that according to the *Book of Enoch* the demons are lost angels. They assail men's bodies, cause convulsions, and in other ways vex and oppress mankind (ch. 15); and this war of the demons on men will continue until the day of consummation—the great judgment (16), when they will receive dire chastisement.† In 19^1 we learn that evil spirits in various shapes shall corrupt men, and lead them astray to sacrifice to demons as if to gods until the great judgment day. In 53^5 we read of the iron chains prepared for the angelic hosts who are hurled down into the abyss of condemnation (cf. 2 P 2^4, Rev $20^{2.3}$).

In the *Testaments of the Twelve Patriarchs* (test. Reuben) we are informed that there are seven evil spirits sent out from Beliar against mankind, viz. those of life, seeing, hearing, smell, talking, taste, and the procreative impulses. Another group of seven is mentioned, viz. of fornication, gluttony, combativeness, flattery, pride, falsehood, injustice.

C. THE DEMONOLOGY OF THE NEW TESTAMENT.—This is in all its broad characteristics the demonology of the contemporary Judaism stripped of its cruder and exaggerated features. Evil demons or unclean demons, *δαιμόνια* (שֵׁדִים), *πνεύματα ἀκάθαρτα* or *πονηρά* (רוּחִין בִּישִׁין), hover about the world, and these are under subjection to Satan (*ἄρχων τῶν δαιμονίων*), Mt 9^{34} 12^{24}, Mk 3^{22}, Lk 11^{15}. The demon was said to enter (*εἰσέρχεσθαι*) into a man somewhat as though it were a physical entity, and similarly was said to pass out (*ἐξέρχεσθαι*), or was forcibly expelled by some superior power who had authority to cast out (*ἐκβάλλειν*) demons. The demons may pass into other animals, *e.g.* into the Gadarene swine. A man possessed with a devil was said to have or hold a demon (*ἔχει δαιμόνιον*), or to be a demoniac (*δαιμονιζόμενος*, cf. the Arabic *mejnûn*, said of a man possessed by a *Jinn*, Doughty, i. p. 259). Mt (4^{24} 17^{15}) also employs the verb *σεληνιάζεσθαι*, 'to be a lunatic,' as though it expressed something distinct from *δαιμονίζεσθαι* (4^{24}). In Mk 1^{23} 5^3 the phrase used is (*ἄνθρωποι*) *ἐν πνεύματι ἀκαθάρτῳ*, where the preposition *ἐν* means 'in the power or under the influence of'; cf. Winer, § xlviii. (Eng. ed. p. 483*a*). Luke also uses *ἐνοχλεῖσθαι* of demon possession (6^{18}).

The manifestations of demoniac possession are very varied in NT. In the case of the Gadarene he is compelled to dwell among the tombs, which are associated with solitude and uncleanness. As water is connected with purity and cleansing, the demons have a preference for waterless spots. Demons are, however, chiefly associated with abnormal forms of human life, especially disease. Dumbness (Lk 9^{39}, Mk 9^{17}), deafness and dumbness (Mk 9^{25}), blindness and deafness combined (Mt 12^{22}), and epilepsy (Mk 1^{26} 9^{20}, Lk 9^{39}), are the manifestations of demoniac influence. Of all the synoptic evangelists, *Luke* is the most powerfully impressed with this conception. Even high fever is attributed to demoniac agency, as we can clearly infer from the fact that, in the case of Peter's mother-in-law, Jesus stood over her and *rebuked* the fever which possessed her (Lk $4^{38.39}$, cf. 13^{16}). It is to be noted, however, that in this Gospel a saying of our Lord is reported which expressly distinguishes between ordinary cures and expulsion of demons, *ἐκβάλλω δαιμόνια καὶ ἰάσεις ἀποτελῶ* (Lk 13^{32}). The demons, moreover, were able to *speak*, and exercised mastery over the vocal organs of the human subject. Thus in one case, as the demon came forth, it cried with a loud voice (Mk 1^{26}). It was possible for many demons to possess a human being at the same time. Seven demons were cast out from Mary Magdalene by Jesus (Lk 8^2), while the Gadarene demoniac was possessed by a legion.

As regards the *method of procedure* adopted by Jesus, we observe the stress which is laid upon His own personality. The power which He wielded in His person is placed in direct opposition to the kingdom of moral and physical anarchy. Faith was necessary in order that the exorcist should accomplish his task (Mt $17^{19.20}$), and this was aided by prayer (Mk 9^{29}). Faith was sometimes required on the part of near relatives, as in the case of the father of the epileptic patient (Mk $9^{23.24}$), in order that the cure might be effected. In these circumstances Jesus relied upon a simple direct command addressed to the demon, 'Thou dumb and deaf spirit, I charge thee come out of him' (Mk 9^{25}), or 'be muzzled and depart' (Mk 1^{25}). 'He cast out spirits with a word, and healed all who were sick.' He Himself declared that He did this by the finger or spirit of God (Lk 11^{20}, Mt 12^{28}). There was no use of magic formulæ. In the case of the woman who had been bound by Satan for eighteen years, He merely laid His hand upon her (Lk 13^{13}). In Mt 12^{27} He appears to place His own expulsions of demons on a footing of equality with those worked by Jewish exorcists; but here it is impossible to deny that there is irony latent in the question, 'By whom do your sons cast them out?' It is asked by way of argument rather than direct statement, and is intended to apply to the special belief and standpoint held by His Jewish opponents.

This power of delivering men from unclean

---

[*] Respecting Solomon as a nucleus of later legend, see Stade, *Gesch.* p. 309 ff., and the Arabic story of Bilkis (given in the Chrestomathy of Socin's *Arabic Grammar*).

[†] Conybeare, in quoting this, appositely cites the cry of the demons to Jesus, 'Art thou come hither to torment us *before our time?*' I desire here to express my obligations to this writer, whose interesting articles on the 'Demonology of the New Testament' (*JQR*, July and October 1896) contain much valuable information. They are occasionally marked, however, by a certain tendency to accentuate unduly some of the details of the NT narrative. Note, for example, his rendering of *ἐπέπεσε* as 'fell bodily' in Ac 10^{44}, whereas it has no more physical significance than in Eurip. *Androm.* 1042, *σοὶ μόνᾳ δύσφρονες ἐπέπεσον λῦπαι.*

spirits Jesus bequeathed to His disciples (Mt 10^{1}). They effected their cures simply by *naming the name* of Jesus (Mk 16^{17}, Ac 3^{6}). This belief in the powerful efficacy of the *name* comes from a hoary Semitic past (see Sayce's *Hibbert Lect.* pp. 302–307). It should be remembered that *name* meant to an ancient Semite personal power and existence, and hence involved to those who invoked the name of Jesus belief in the actual presence and might of the divine Saviour of mankind.

Before passing from the subject of the Gospel narratives in their relation to demonology, it should not be forgotten (1) that we are dealing with the *reports of chroniclers whose minds were necessarily coloured by the prevailing beliefs of the age, psychic and cosmic*; (2) that the properly demoniac element *is almost wholly absent* from the *Fourth* Gospel. In 8^{48} 10^{20} the language employed by the Jews is quoted, while in 6^{70} Judas is called διάβολος and not δαιμόνιον.

St. Paul, however, shared the conceptions of his contemporaries respecting devils. Several passages may be cited in illustration. In the first place, the much disputed passage 1 Co $10^{19.\,20}$ points, in our opinion, to the conclusion adopted by Baudissin, and more recently by Everling (*Die Paulinische Angelologie u. Dämonologie*, p. 27 ff.), that St. Paul had borrowed from Alexandrian Judaism the belief that the offerings to heathen deities were offerings to demons (cf. above the demonology of the Bk. of Enoch and the Sibylline books). In 1 Co 10^{20} Paul argues, 'But I say, that the things which the Gentiles sacrifice, they sacrifice to devils, and not to God: and I would not that ye should have communion with devils. Ye cannot drink the cup of the Lord and the cup of devils.' He is pleading that it is not permissible to partake of the heathen sacrificial offerings. He quotes the two examples of the Christian Lord's Supper and the Jewish sacrifice. In both cases there is a real communion between the participator and the object of worship. The statement in 8^{4} 'We know that no idol is anything in the world,' does not involve any inconsistency. For St. Paul the gods *as such* are creatures of the imagination; yet he does not hold that nothing at all exists behind the image-worship of the heathen, but that demons lurk there and the kingdom of Satan, and that participators in heathen feasts are drawn into the circle of their evil influence (so Holsten).* Moreover, Everling (*ib.* p. 33 ff.) has shown with considerable probability that the reference in the obscure phrase 1 Co 11^{10} 'for this cause ought the woman to have *power* over her head on account of the angels' is to be found in the legend of the intercourse of the fallen angels with the daughters of men. Book of Enoch (ch. 6) and other citations from the Book of Jubilees, Apocalypse of Baruch 56^{12} in Charles' ed., and the Testaments of the Twelve Patriarchs (test. Reuben 5), show the important place held by this tradition in the literature that preceded the time of St. Paul.

It would lie beyond the scope of this article to trace the development of demonology in post-apostolic Christian writers. The elaborate demonology of Origen is portrayed in Conybeare's interesting article (*JQR*, Oct. 1896), to which the reader is referred. The enormous range of this belief in all its varieties, and the extent to which it penetrated into popular belief and practice from the hoary antiquity of Babylonian and Egyptian magic down to the time of the Reformation and beyond, is a fact of which this modern age of scientific discovery is but dimly conscious. Readers of Doughty's *Arabia Deserta*, however, soon become aware how fervently the modern Arab of the desert believes in the *Jân* (see especially vol. ii. p. 188 ff.). Monumental evidence presents a vast array of examples. A considerable mass of Aramaic inscriptions could be cited, if space permitted, consisting of nothing else than conjurations, charms, or spells. See, for example, the transcription and translation by Jos. Wohlstein, in *Zeitschr. für Assyriologie*, April 1894, of Aramaic inscriptions on clay vessels preserved in the Royal Museum at Berlin, No. 2416 (consisting of nearly 100 lines); also in Dec. 1893, No. 2422 (of 44 lines). See also the interesting Greek form in Deissmann, *Bibelstudien*, p. 26 ff., and cf. art. EXORCISM. Respecting modern examples of demoniacal possession and exorcism it is difficult to speak with certainty, though some examples appear well authenticated. One of the most striking is to be found in the account given by the missionary Waldmeier of his ten years' labour in Abyssinia, *Autobiography of Thomas Waldmeier*, pp. 64–66. Though the shadows of such beliefs have been slowly passing away from Western Europe, the gloom still invests a large portion of the world, and fills the hearts of many millions of our fellow-men with anguish and terror. Like our first parents, we behold

> 'all the eastern side
> With dreadful faces thronged and fiery arms.'

OWEN C. WHITEHOUSE.

DEMOPHON (Δημοφῶν, 2 Mac 12^{2}), a Syrian commandant in Palestine under Antiochus Eupator. According to the author of 2 Mac, after terms of peace had been agreed upon for the first time between Judas Maccabæus and Lysias (see ABSALOM IN APOCR.), some of the provincial commandants, and Demophon among them, continued to act in a hostile manner towards the Jews.

H. A. WHITE.

DEN (אֶרֶב the lurking-place of wild beasts, Job 37^{8}; מְעָרָה a cave where robbers hide, Jer 7^{11}; מִנְהָרָה in Jg 6^{2} is perhaps [but see Moore, *ad loc.*] a deep valley or water-course. In NT σπήλαιον).—The lions' den into which Daniel was cast (Dn 6^{7} etc.) was doubtless that in which the king's lions were kept, in accordance with a custom known to prevail at Oriental courts. Layard (*Nin. and Bab.*) shows that these beasts were used for purposes of sport by the kings of Assyria. A royal lion hunt is depicted in a bas-relief of the palace of Assur-naẓir-pal (B.C. 885–860) discovered at Nimroud, now in the British Museum. A seal of Darius has also been found, on which the king is represented in the act of shooting an arrow at a lion rampant.

G. WALKER.

DENARIUS.—See MONEY.

DENOUNCE.—In AV Dt 30^{18} only, 'I d. unto you this day, that ye shall surely perish' (הִגַּדְתִּי, trd 'I profess' 26^{3}). This is the orig. meaning of the word (fr. Lat. *denuntiare*, 'to give official intimation'). So Peacock (1449), 'The Euangelie of God . . . which to alle men oughte be denouncid'; and 2 Th 3^{10} Wyc. (1380) 'we denounceden this thing to you, that if ony man wole not worche: nether ete he' (after Vulg. *hoc denunciabamus vobis*).

J. HASTINGS.

DENY.—In the sense of 'refuse,' deny (Lat. *de-negare*, 'say no,' 'refuse') is not yet obsolete. Examples in AV are 1 K 2^{16} 'I ask one petition of thee, deny me not' (אַל־תָּשִׁבִי אֶת־פָּנָי 'turn not away my face'; in v.^{20} the same phrase is twice trd in AV 'say not nay,' RV 'deny not'; cf. Lk 12^{27}); 1 K 20^{7}, Pr 30^{7} 'Two things have I required (RV 'asked') of thee; deny me them not before I die' (both מָנַע). But we cannot now say 'deny to do' a thing, as Wis 12^{27} 'the true God, whom before they denied to know' (*ἠρνοῦντο εἰδέναι*, Vulg. *negabant se nosse*, RV 'refused to know,' RVm 'denied that they knew'); so 16^{16} 'the ungodly that denied to know thee'; and 1 Mac 5^{heading} 'He destroyeth Ephron for denying him to pass through it.' Cf. Shaks. *Winter's Tale*, v. ii. 128: 'You denied to fight with me this other day, because I was no gentleman born'; and Knox, *Historie*, 88, 'the Lord Gray . . . plainely denyed to charge again.'

---

* The opposite view is taken by Beyschlag in his Programme, 'Did the Apostle Paul regard the gods of the heathen as demons?' and he is followed by Marcus Dods (*Expositor*, March 1895, p. 237 ff.). But on the subject of Demonology in the NT, and the belief of Jesus in a personal devil, Beyschlag is an unsafe guide, as I shall attempt to show in my article SATAN.

J. HASTINGS.

DEPART.—The earliest meaning of 'depart' is 'divide into parts' (*dis-partire*), as Maundeville, xi. 43: 'The yerde of Moyses, with the whilk he departid the Reed See.' Then to 'distribute,' as Jn 19^{24} Gen. 'They departed my rayment among them.' Next came 'separate,' which occurs once (intrans.) in AV, Ac 15^{39} 'they departed asunder one from the other' (*ἀποχωρίζομαι*, RV 'parted asunder'). This is the meaning (but trans.) of 'depart' in the Pr. Bk., 'till death us depart,' which was retained from 1549 till 1662, when 'depart' was changed into 'do part.' Cf. Ru 1^{17} Cov. 'death onely shal departe us.'

J. HASTINGS.

DEPUTY, the rendering once (1 K 22^{47}) of נִצָּב, elsewhere in OT of פֶּחָה. The latter was a governor subordinate to the satrap (which see), and is mentioned under both the Assyr. and the Chald. governments (2 K 18^{24}, Ezk $23^{6.\,23}$), although the office seems to have been better defined under the Persian rule (Est 8^{9} 9^{3}, cf. *Behist. Inscr.* col. iii. par. 3, § 4; par. 9, § 2). The deputies who were set over the lesser districts and cities within the satrap's province occupied a position of considerable dignity and authority (Rawlinson, *Anc. Mon.* iv. 416; cf. Xen. *Hell.* iii. 1. § 10–12; iv. 1. § 1).

In NT 'deputy' is AV tr. in Ac 13^{7} 18^{12} 19^{38} of *ἀνθύπατος*, which is more accurately rendered in RV 'proconsul' (which see). G. WALKER.

DERBE (*Δέρβη*, ethnic *Δερβαῖος*, Ac 20^{4}, but *Δερβήτης* in Strabo, p. 569, and Cicero, *ad Fam.* xiii. 73) was a city of Lycaonia, on the main road from Iconium (or Lystra), S.E. to Laranda. Of its early history nothing is recorded. It was in the part of Lycaonia that was added to Cappadocia as an 'eleventh *Strategia*' by the Romans (prob. in B.C. 65); but, under the weak rule of the Cappadocian kings, it was seized by a native ruler, Antipater (called 'the robber' by Strabo, p. 569, which merely shows that he opposed the Rom. policy; he was a friend of Cicero, *ad Fam.* xiii. 73). Amyntas, king of Galatia, conquered Derbe and Laranda, and at his death in B.C. 25 they passed with his kingdom to the Romans, were incorporated in the province Galatia, and supplied soldiers to the Rom. legions (*CIL* iii. 2709, 2818). In A.D. 37 or 41 Laranda was probably transferred to the kingdom of Antiochus, and the coins of king Antiochus mentioning the Lycaones must have been struck there; hence from 41 to 72 Derbe became the frontier city of the Rom. province, and was honoured with the title Claudio-Derbe. Soon after, it was visited by St. Paul (Ac 14^{6}), who, having here reached the extremity of Rom. territory, now turned back and retraced his former steps to Lystra, Iconium, Antioch, and Perga. Nothing is said in Ac about any sufferings of St. Paul at D., nor is it mentioned among the places (like Antioch, Iconium, and Lystra) where he had suffered (2 Ti 3^{11}). On his second journey, coming from Cilicia (doubtless through the 'Cilician Gates'), St. Paul passed through D. to Lystra, etc., and on his third journey he took the same route (acc. to those who maintain the 'S. Galatian' view, though most scholars consider that on this occasion he went northward from the 'Gates' through Cappadocia towards N. Galatia). Gaius of D. was one of the delegation which accompanied St. Paul to Jerusalem in charge of the contributions of the Pauline Churches for the benefit of the poor in Jerus. (Ac 20^{4}). According to the text of *Codex Bezæ*, Gaius is styled *Δούβριος*; this is the ethnic derived from Doubra, doubtless a local pronunciation of the name (which may be compared with Seiblia or Silbion or Soublaion). A third form, *Δέλβεια*, is mentioned by Stephanus Byzant. as meaning 'juniper' in the Lycaonian tongue (cf. Ac 14^{11}). Very little is recorded of D. in NT; it is rarely mentioned in general history; and in Christian history it hardly reappears until A.D. 381, when its bishop, Daphnus, was present at the Council of Constantinople.

The site of D., after many diverse conjectures, was placed by Prof. Sterrett at Zosta or Losta; though the evidence is still not perfect, yet general considerations point conclusively to this neighbourhood, and especially to a large mound called Gudelissin, evidently in great part artificial, from which protrude numerous remains of a city, about three miles N.W. of Zosta. The buildings that remain above ground at Gudelissin are all of the Byzantine period; but the mound has the appearance of great antiquity, as one of those sites where city has been built over city, until a hill is formed (like the 'mounds of Semiramis' at Tyana and Zela, Strab. pp. 537, 559). The statement of Stephanus Byzant., that Derbe was a fortress and harbour (*λιμήν*) of Isauria is erroneous; and the proposed change of text (*λίμνη*) has no authority.

LITERATURE about Derbe begins with Sterrett, *Wolfe Expedition in Asia Minor*, pp. 22-30; Losta was visited by MM. Radet and Paris, who, however, wrongly identified it with Lystra, *Bulletin de Correspond. Hellénique*, 1886, pp. 509-512. The reasons for the identification of D. with Zosta are stated by Ramsay, *Hist. Geog. of Asia Minor*, p. 336 f., and more definitely (after a visit to the place) in *Church in Rom. Emp.* pp. 54-58; *St. Paul the Trav.* pp. 110 ff., 178 ff. See GALATIA.

W. M. RAMSAY.

DERISION.—With one exception, all instances of the phrase 'have in derision' represent a simple verb: either לָעַג *lâ'agh*, 'mock,' Ps 2^{4} 59^{8}, Ezk 23^{32}; שָׂחַק *sâḥaḳ* 'laugh at,' Job 30^{1}; הֵלִיץ *hêlîẓ*, 'deride'; or *μυκτηρίζω*, 1 Es 1^{51} (RV 'mocked'). The exception is Wis 5^{3} 'This was he whom we had sometimes in derision' (*ὃν ἔσχομέν ποτε εἰς γέλωτα*, Vulg. *habuimus in derisum*).

J. HASTINGS.

DESCRIBE.—In Jos $18^{4.\,6.\,8\ \textit{bis}.\,9}$ 'to describe' is to map out, or divide into lots, as Jos 18^{6} 'Ye shall therefore describe the land into seven parts, and bring the description hither to me, that I may cast lots for you here before the Lord our God.' This is Coverdale's tr., from Vulg. *describere* (in Jos $18^{4.\,6.\,8.\ \textit{bis}}$, in ^{9} *diviserunt, scribentes*). In Jg 8^{14} the same Heb. (כָּתַב 'write') is again tr. 'describe' (Vulg. *describere*), but the meaning is 'write a list of.' In this passage the LXX gives *γράφω*, the word used in Ro 10^{5} 'Moses describeth the righteousness which is of the law' (RV 'writeth that,' etc.); while in 4^{6} 'describeth the blessedness' the vb. is *λέγω* (RV 'pronounceth blessing upon').

Besides Jos 18^{6} (above), where there is no corresp. Heb., **description** occurs only 1 Es 5^{39} with the meaning of 'list': the description of 'the kindred' (*τῆς γενικῆς γραφῆς*, *i.e.* the genealogy).

J. HASTINGS.

DESCRY.—'Describe' and 'descry' are both from Lat. *describere*, the former immediately, the latter through the old Fr. *descrire*. And in earlier Eng. their meanings were often very close, to 'descry' being to 'reveal,' even as late as Milton, *Comus*, 141—

'And to the tell-tale Sun descry
Our concealed solemnity.'

But Milton uses the word also in the sense of reconnoitre, as *Par. Lost*, vi. 530—

> ‘And scouts each coast light-armed scour,
> Each quarter, to descry the distant foe.’

This is the meaning of ‘descry’ in AV, where it occurs only Jg 1^{23} ‘And the house of Joseph sent to descry Bethel’ (וַיָּתִירוּ, RV ‘sent to spy out’).

J. HASTINGS.

DESERT.—See WILDERNESS.

DESIRE.—‘To desire,’ says Trench (*Sel. Gloss.* 56), ‘is only to look *forward* with longing now: the word has lost the sense of regret or looking *back* upon the lost but still loved. This it once possessed in common with *desiderium* and *desiderare*, from which more remotely, and *désirer*, from which more immediately, we derive it.’ And he quotes as an example 2 Ch 21^{20} ‘and [Jehoram] departed without being desired.’ Now this sense of ‘desire’ is certainly found, as Berners (1533), ‘Of the death of suche an entierly desyred husbande’; Jer. Taylor, ‘she shall be pleasant while she lives, and desired when she dies.’ But it is not so certain that 2 Ch 21^{20} is an example. The Heb. is lit. ‘he went [or walked] without desire’ (וַיֵּלֶךְ בְּלֹא חֶמְדָּה; LXX *καὶ ἐπορεύθη οὐκ ἐν ἐπαίνῳ*; Vulg. *Ambulavitque non recte*, whence Cov. ‘and walked not well’), and the tr. of AV is taken from Gen. Bible, which has ‘and *lived* without being desired,’ with the gloss ‘he was not regarded, but deposed for his wickedness.’*

J. HASTINGS.

DESOLATE.—An example of the primary meaning (*de-solus*, alone) ‘left alone,’ ‘solitary,’ is Ad. Est 14^3 ‘help me, d. woman, which have no helper but thee’; and an example of the obsolete constr. with ‘of,’ is Bar 2^{23} ‘the whole land shall be d. of inhabitants’ (RV ‘d. without inh.’). So 1 Ti 5^5 Wyc. ‘sche that is a widewe verili, and desolate’; and Ru 1^5 Cov. ‘the woman remayned desolate of both hir sonnes and hir huszbande.’ For **Desolation** see ABOMINATION OF DESOLATION.

J. HASTINGS.

DESPITE is now only a prep., though as a subst. it is still used in poetry. The subst. (=‘contempt’ actively shown, ‘dishonour,’ from Lat. *despicere*, to look down on) occurs Ezk 25^6 ‘rejoiced in heart with all thy despite against the land of Israel’ (בְּכָל־שְׁאָטְךָ בְּנֶפֶשׁ, RV ‘with all the d. of thy soul’); and He 10^{29} ‘hath done despite unto the Spirit of grace’ (*ἐνυβρίσας*; ‘doith dispit’ is Wyclif’s word; Tin., Cov., Cran., Gen. ‘doth dishonour’; Rhem. ‘hath done contumelie’). Cf. Jer. Taylor, ‘Liberality . . . consists in the despite and neglect of money.’ As a vb. ‘d.’ occurs in Pref. to AV, ‘The Romanists . . . did no lesse then despite the spirit of grace,’ that is, ‘treated with contempt.’ **Despiteful** is found Ezk 25^{15} ‘a d. heart,’ 36^5 ‘d. minds’; Sir 31^{31} ‘give him no d. words’ (*λόγον ὀνειδισμοῦ*, RV ‘a word of reproach’); and Ro 1^{30} (*ὑβριστάς*, RV ‘insolent’). **Despitefully**, 1 Mac 9^{26} ‘used them d.’ (*ἐνέπαιζον αὐτοῖς*); Mt 5^{44}, Lk 6^{28} ‘which d. use you’ (*ἐπηρεάζω*); Ac 14^5 ‘to use them d.’ (*ὑβρίσαι αὐτούς*, RV ‘to entreat them shamefully’). **Despitefulness**, Wis 2^{19} ‘Let us examine him with d. and torture’. (*ὕβρει*, Vulg. *contumelia*, RV ‘outrage’). Here, and in the passages where ‘despitefully’ occurs, the idea is cruelty more than contempt; but the meaning of ‘spite,’ ‘spitefulness,’ is never present in these words. In Est 1^{18} Cov., ‘thus shall there aryse despytefulness and wrath ynough,’ d.=contempt, as AV and RV.

J. HASTINGS.

DESTRUCTION (אֲבַדּוֹן).—See ABADDON.

DETERMINATE.—Only Ac 2^{23} ‘the d. counsel and foreknowledge of God’ (*ὡρισμένος*, fr. *ὁρίζω*, to mark a boundary, fix, appoint. The closest parallel is Lk 22^{22} ‘the Son of man indeed goeth, as it hath been determined’ RV, Gr. *κατὰ τὸ ὡρισμένον*). ‘Determinate’ is Tindale’s word, whom all the VSS follow; but Wyclif has the form we should now employ ‘determyned.’ Chaucer has ‘determinat’ in the same sense, as *Astrolabe*, I. xxi. 7: ‘sterres fixes, with hir longitudes and latitudes determinat’; and cf. Shaks. *Twelfth Night*, II. i. 10: ‘My determinate voyage is mere extravagancy.’ **Determination**, Zeph 3^8 ‘my d. is to gather the nations’ (מִשְׁפָּט, lit. ‘judgement,’ as RVm); 2 Es 10^{16} ‘if thou shalt acknowledge the d. of God to be just’ (*terminus*, lit. ‘end,’ RV ‘decree’; cf. Ja 5^{11} ‘ye have seen the end of the Lord,’ *τέλος*). **Determine** was common about 1611 in the sense of ‘end,’ ‘terminate’; but in AV only the derived meanings are found, fix, decide, resolve. In AV Pref. the obsolete construction with ‘of’ is used: ‘For as it is a fault of incredulity, to doubt of those things that are evident; so to determine of such things as the Spirit of God hath left (even in the judgement of the judicious) questionable, can be no less than presumption.’

J. HASTINGS.

DETESTABLE THINGS.—The trⁿ in AV and RV of שִׁקּוּצִים in Jer 16^{18}, Ezk 5^{11} 7^{20} $11^{18.\,21}$ 37^{23}, the reference being either to actual idols or to objects connected with idolatry. Elsewhere the word is trᵈ ABOMINATION (see the references above, p. 12,—adding Nah 3^6 [AV, RV ‘abominable filth’], Dn 9^{27} 11^{31} 12^{11}, 2 Ch 15^8), which usually represents תּוֹעֵבָה (see p. 11); but as in the first five passages cited both Heb. words occur together, ‘detestable things’ is adopted for שִׁקּוּצִים for the sake of distinction. It would have conduced to accuracy and clearness, had it been adopted uniformly. The cognate verb שִׁקֵּץ, *to treat as detestable*, is rendered ‘to detest’ in Dt 7^{26}, but unfortunately ‘to have in abomination’ in Lv $11^{11.\,13}$, and ‘to make abominable’ (for ‘make detestable’) in Lv 11^{43} 20^{25} (in these four passages, in connexion with שֶׁקֶץ, the technical term for the flesh of prohibited animals. See ABOMINATION, No. 3).

In 2 Mac 5^{24} ‘that detestable ringleader’ (Apollonius) stands for *τὸν μυσάρχην*; RV ‘lord of pollutions,’ with marg. ‘Gr. *Mysarch*, which may also mean ruler of the Mysians.’ The trⁿ of the text is, no doubt, correct (similarly Grimm, Rawl., Zöckler: Pesh. ‘ruler of all the unclean’); the term is evidently one of disparagement, framed on the model of titles such as *ἐθνάρχης*, *στρατοπεδάρχης*, etc.

S. R. DRIVER.

DEUEL (דְּעוּאֵל ‘knowledge of God,’ *Ῥαγουήλ*).—Father of Eliasaph, prince of Gad (Nu 1^{14} $7^{42.\,47}$ 10^{20}) =Reuel, Nu 2^{14} (perhaps the original name, see LXX, ר being put for ד) P.

G. H. BATTERSBY.

DEUTERONOMY.—i. THE NAME OF THE BOOK.—The name Deuteronomy is taken from the Lat. ‘Deuteronomium,’ which transliterated the Gr. word *Δευτερονόμιον*. This Gr. word appears in the LXX of Dt 17^{18}, where the words ‘a copy of this law’ (מִשְׁנֵה הַתּוֹרָה הַזֹּאת) are incorrectly trᵈ *τὸ Δευτερονόμιον τοῦτο*, as if the Heb. had been ‘this copy of the law’ (מִשְׁנֶה הַתּוֹרָה הַזֶּה). The word also occurs, with the same error of trⁿ, in Jos 9^5 [Heb. 8^{32}]. Though the word was a mistranslation, it furnished an appropriate title to a book which in a large measure ‘reformulated’ previous laws. The book is referred to by this name in the writings of Philo (*Leg. Allegor.* iii. § 61, i. 121, *Quod Deus immutab.* § 10, i. 280), although that writer also quotes it by the name of ‘The Appendix to the Laws,’ *ἡ Ἐπινομίς* (*Quis rer. dives hæres.* § 33, i. 495).

---

* This is the sense in which the passage is taken by *Oxf. Heb. Lex.* (*s.v.* חמדה), ‘he lived as no one desired.’

In Heb. literature the book was known by a title taken from its opening words, 'These are the words' (אֵלֶּה הַדְּבָרִים), or, simply, 'words' (דְּבָרִים). In Rabbinic writing it is sometimes cited as 'The book of Threatenings' (סֵפֶר תּוֹכָחוֹת); but in such cases the reference is to the latter portion of the book, which also appears to have been known to Philo as 'The Curses' (αἱ Ἀραί). See *Leg. Allegor.* iii. § 35, i. 109, quoting Dt 27^{17}; *De Posterit. Caini*, § 8, i. 230, quoting Dt 28^{65}. (Ryle's *Philo and Holy Scripture*, Introd. p. xxiii f.)

ii. THE CONTENTS OF THE BOOK.—The book purports to contain the last utterances of Moses, delivered in the plains of Moab just before his death. The historical position is defined by the brief Introduction (1^{1-5}) and by the Epilogue (34), which narrates the death of Moses. The utterances of Moses comprise *three* main discourses: (1) The first is chiefly historical, reviewing the life of Israel in the wilderness, 1^{6}–4^{43}. (2) The second, which has a brief historical preface (4^{44-49}), is, at first, hortatory (5–11), but is chiefly taken up with the legislation (12–26), *i.e.* the code of laws which constitutes the nucleus of the whole work. To this is appended the description of a ceremony which was to symbolize the popular ratification of the laws in the land of Canaan (27), and a rehearsal of warnings and blessings that should ensue upon the neglect and observance of these laws (20). (3) The third address is an additional exhortation urging the people to keep the covenant with J", promising restoration even after relapse into idolatry, and offering the alternatives of obedience or disloyalty to J" (29. 30).

These *three* addresses to the people are followed by a collection of more miscellaneous materials, such as Moses' farewell, his deliverance of the Deut. law to the priests, his commission to Joshua, the Song of Moses, the Blessing of Moses (31–33). The whole is concluded by an account of the Death of Moses (34).

Although it is true to say that the legislation constitutes the nucleus of the book, the character of the writing is very far from being that of a legal work. The tone of exhortation which runs through the earlier and later addresses, pervades also the legislative portion. The laws are not systematically and technically stated. They are ethically expounded in order to set forth their relation to the theocratic principles laid down in chs. 5–11. The purpose of the book is thus, practically, wholly 'hortatory,' or, as it has been termed, 'parenetic'; and its 'parenetic' aim accounts for the diffuse and somewhat discursive treatment which is found in the historical and legislative, no less than in the directly homiletical passages. A very cursory perusal enables us to see that the writer is neither historian nor jurist, but a religious teacher.

When we investigate Dt in relation to the books which immediately precede and follow it in the Hex., we cannot fail to be struck by the general unity of its composition, and by the distinctiveness of its character and style.

In Nu $27^{12f.}$ it has already been said, 'And the LORD said unto Moses, Get thee up into this mountain of Abarim, and behold the land which I have given unto the children of Israel. And when thou hast seen it, thou also shalt be gathered unto thy people, as Aaron thy brother was gathered.' Again, in Nu 27^{18-23} we find the commission to Joshua thus described, 'And the LORD said unto Moses, Take thee Joshua the son of Nun, a man in whom is the spirit, and lay thine hand upon him, etc. And Moses did as the LORD commanded him; and he took Joshua and set him before Eleazar the priest, and before all the congregation; and he laid his hands upon him, and gave him a charge, as the LORD spake, by the hand of Moses.'

Now, at the close of Dt we find in 32^{48-50} 'And the LORD spake unto Moses that self-same day, saying, Get thee up into this mountain of Abarim . . . and behold the land of Canaan, which I give unto the children of Israel for a possession; and die in the mount whither thou goest up, and be gathered unto thy people; as Aaron thy brother died in Mount Hor, and was gathered unto his people.' Again, we find in 31^{14-23} the charge given to Joshua, 'And the LORD said unto Moses, Behold, thy days approach that thou must die; call Joshua, and present yourselves in the tent of meeting, etc. And he gave Joshua the son of Nun a charge, and said, Be strong and of a good courage.' Dt thus practically repeats the incidents which have already been recorded in Nu 27; and the whole work, which intervenes between the two commands to Moses to prepare for death, presents the appearance of a great parenthesis, interrupting the main thread of the narrative. The command to go up to the heights of Abarim, in Dt 32, is followed almost immediately by the narrative, in Dt 34, of the death of Moses. The same command has occurred in Nu 27; but between the two commands is interposed the series of three addresses which were given, according to Dt 1^{3}, on the first day of the eleventh month of the fortieth year.

Not only, however, has the Book of Dt all the appearance of a parenthesis, but it is rendered distinct from the other books of the Pent. by its very clearly marked characteristics of style and diction. These will require fuller consideration later on. But they are so distinct and so obvious to the reader, whether of the original or of a translation, that they inevitably contribute very largely to the general impression that Dt represents a work in some way separate from the rest of the Pentateuch.

The same general impression is produced by a comparison of the laws in Dt with the three principal groups of laws contained in Ex, Lv, and Nu. The Deut. legislation 'stands in a different relation to each of the three codes referred to; it is an *expansion* of that in Ex 20–23; it is, in several features, *parallel* to that in Lv 17–26; it contains *allusions* to laws such as those codified in the rest of Lv–Nu' (Driver, *s.v.* 'Deuteronomy' in Smith's *DB*²). The legislative section of Dt is distinct in contents and treatment from the parallel sections in Ex–Nu.

The principal historical allusions in Dt (as presented by Driver) are the following:—

1^{8} (and frequently) the *oath* to the patriarchs	Gn 15^{18} $22^{16f.}$ 24^{7} 26^{3}.
4^{3} (Ba'al-pe'or)	Nu 25^{1-5}.
$4^{10ff.}$ $5^{2ff.}$ 18^{16} delivery of Decalogue, etc.	Ex 19^{3}–20^{21}.
6^{16} (Massah)	Ex 17^{7}.
$6^{21f.}$ and elsewhere (deliverance from Egypt)	Ex 13^{14} 14^{30}.
$8^{3.16}$ (the manna)	Ex $16^{4.5}$.
8^{15} (fiery serpents; and rock (צוּר) of flint)	Nu 21^{6} and Ex 17^{6}. [*N.B.* In Nu 20^{8-11} (P) the term for 'rock' is סֶלַע, not צוּר.]
9^{22} Tab'ērāh, Massah, Ḳibroth-hattá'ăvah)	Nu 11^{1-3}, Ex 17^{7}, Nu 11^{34}.
11 (passage of the Red Sea)	Ex 14^{27}.
11^{6} (Dathan and Abiram)	Nu $16^{1b.27b.30.32a}$.
$23^{5f.}$ ($^{4f.}$) Bala'am)	Nu 22^{2}–24^{25}.
24^{9} (Miriam's leprosy)	Nu 12^{10}.
25^{17-19} (opposition of 'Amalek)	Ex 17^{8-16}.
26^{6-8} (affliction and deliverance from Egypt)	Ex $1^{9.12}$ $3^{7.9}$ etc.
29^{22} (^{23}) (overthrow of Sodom and Gomorrah)	Gn $19^{24f.}$

An investigation of the historical allusions in Dt confirms the impression produced by the legislative portion. The references are, almost without exception, made to events recorded in those portions of Ex and Nu which scholars assign to JE, or the 'prophetic' group of narratives incorporated in the Pentateuch. The other main group of narratives in the Pent., denominated P from its generally 'priestly' characteristics, does not appear to have supplied the foundation for the treatment of the history in D. Thus in 1^{36} the reader notices that Caleb alone is mentioned as the recipient of especial favour; there is no mention made of Joshua. In the Book of Nu the passage which records the favour granted to Caleb alone (Nu 14^{24}) belongs to JE, the passage which associates Joshua with Caleb (Nu 14^{30}) belongs to P. Similarly, in 11^{6} we find mention of Dathan and Abiram, but not of Korah, who figures so conspicuously in Nu 16. But in Nu 16 the Korah passages are assigned by scholars to P; the JE portion of the narrative speaks only of Dathan and Abiram.

There are only *three* incidents in the historical references of Dt which are to be found in the P and not in the JE narrative of the Pentateuch. These are (1) the mention of the number 'twelve,' of the spies, Dt 1^{23}, cf. Nu 13^{2-16}; (2) the mention of the number 'seventy,' of the family of Jacob, Dt 10^{22}, cf. Gn 46^{27}, Ex 1^{5}; (3) the mention of acacia-wood as the material of which the ark was made, Dt 10^{3}, cf. Ex 25^{10}. But it is to be remembered that these facts may have been recorded in JE, but have been preserved to us only in the excerpts from the P narrative.

Assuming the correctness of the general proposition, which is universally admitted by modern scholars, that the Pent. is of composite origin, we are brought, by a consideration of the distinctiveness in D's treatment and style, to the opinion that D must take rank with JE and P as one of the component elements of the Pentateuch. Not, of course, that D should necessarily be assigned any more than J, or E, or P, to any one writer or author, but only that in style and treatment it may be attributed to a literary source, representing the influence of a particular period, or of particular circumstances, upon a writer, or a school, or a succession of writers.

iii. THE UNITY OF THE BOOK.—Though we have hitherto spoken of Dt as if it were a unity in itself, it would be a mistake to suppose that it presents an unbroken homogeneous piece of literature written by a single person. There is good reason to suppose that the same kind of literary history is to be attributed to D as to JE and P. The original nucleus of writing has been revised, expanded, and modified. It is not difficult to indicate portions which could hardly have worn their present appearance if from the first they had been part of a consecutive piece of writing.

It appears the most probable view that Dt 5–26 ($27^{9.10}$). 28 represent the original work, either in part or in its entirety. In this work chs. 5–11 formed the introduction; ch. 28 the peroration.

Wellhausen, indeed, limits the original work of Dt to chs. 12–26. But there seems no sufficient ground for separating 5–11 from 12–26. The style and diction are in marked agreement; and the differences which have been detected in the two sections are only those which might be expected to arise from the difference of subject-matter.

With regard to chs. 1–4 doubts have been more generally expressed. It has seemed to many improbable that the introduction, consisting of 5–11, should have been preceded by a long prefatory section. It is objected that the arrangement is too cumbrous to be the original one; that the awkwardness of the present arrangement is emphasized by the presence of two formal headings, 1^{1-5} and 4^{44-49}. Moreover, the absence in the hortatory passage 4^{1-40} of any allusion to the preceding historical summary has suggested a doubt whether ch. 4 could be homogeneous with chs. 1–3. On the other hand, the style is admittedly Deuteronomic; and it is difficult to believe that 1–4 did not come in some form or another from the same writer or school as the contents of 5–26. 28.

Dillmann has made the suggestion that 1–3 formed originally the hist. introduction, which was written in the third person, and that this was altered in character from narrative into a speech by the redactor of the Pent., who incorporated Dt into the main work. Dillm. also considered that 4^{1-40} originally belonged to the conclusion of the book, and that it was transferred from that position by the redactor: for confirmation of this view, he appealed to the disordered and inconsecutive condition of chs. 29. 30, and to the use of the past tense in 4^{5}, which seemed to imply that the legislative portion had already been recorded, and was present to the reader's mind.

It may, however, be doubted whether there is not a danger of too great ingenuity in the hypothetical rearrangement of the original materials. Taking into consideration (1) the very close resemblance of style, and (2) the absence of any serious contradiction in statement between the different portions, there is not room for any confident theory of different authorship for 1–4, though it may have been composed at a later time than the rest, and prefixed afterwards.

When, however, we come to consider the question of chs. 29–34, it is impossible not to admit that we have there to deal with materials widely differing in origin.

One passage in particular, 30^{1-10}, obviously has no direct connexion with the section 30^{11-20}, which immediately follows; 31^{16-22} interrupts the thread of the narrative; while 32^{1-43} and 33, two lyrical pieces, have evidently been derived from some independent collection of early Heb. songs. A few portions of 32 and 34 (32^{48-52} and $34^{1a.5b.7-9}$) are, on literary grounds, assigned with great probability to P as their original source.

The most reasonable explanation of the history of the structure of the book is excellently summarised in Driver's *Deuteronomy* (p. lxxvii). 'Some little time after the kernel [chs. 5–26. 28] of Dt was composed, it was enlarged by a second Deuteronomic writer (or writers), D^2, who (1) supplemented the work of D by adding the passages indicated; (2) incorporated, with additions of his (or their) own, the excerpts from JE, and (taking it probably from a separate source) the Song 32^{1-43}, with the historical notices belonging to it, 31^{16-22} 32^{44}. Finally, at a still later date, the whole thus constituted was brought formally into relation with the literary framework of the Hexateuch as a whole by the addition of the extracts from P.'

iv. THE RELIGIOUS TEACHING OF DEUTERONOMY. — The characteristics of the religious thought of this book are very marked. They exercised a profound influence upon the religious development of the people.

The great lessons of the spirituality of the Godhead (4^{12}), and the uniqueness of J″, and His absolute unity ($4^{35.39}$ 6^{4} 7^{9} 10^{17}), are strongly and impressively taught. We pass from the older conception of 'monolatry' into the fuller and deeper thought of 'monotheism.' The relation in which the God of the people stands to the people is represented primarily as one of love rather than of law. The thought of the love of Israel towards her God, which is indeed laid down in the words of the Decalogue (Ex 20^{6}, Dt 5^{10}), is not required elsewhere in the Pent., but in Dt it is earnestly insisted on as the basis of faithful service on the part of the creature to the Creator and of the redeemed to the Deliverer (cf. 10^{12} $12^{1.13.22}$ 13^{3} 19^{9} $30^{6.16.20}$). Appeals made to Israel to keep the commandments are, it is true, often based on the recollection of God's might and of His terrible visitation, on motives of awe and fear; but the highest appeal is made to the consciousness of J″'s love, in that He had *chosen* Israel, not for Israel's greatness or goodness, but out of His own free love (Dt $7^{7.8}$ 8^{17} 9^{4-6}). The love and affection of God towards the *nation*, as distinguished from His love towards *individuals*, constitutes an especial feature in Dt (4^{37} 7^{13} 23^{6} 33^{3}); and Dt shares with Hosea (3^{1} 11^{1} 14^{4}) the distinction of first familiarizing Israel with the thought and teaching that underlie so much of NT theology (cf. 1 K 10^{9}, 2 Ch 2^{11} 9^{8}, Mal 1^{2}). Again, love as indicating the people's affection and devotion to J″ is again and again insisted on as the true spring of all human action (cf. 5^{10} 6^{5} 7^{8} $10^{12.15}$ $11^{1.13.22}$ 13^{3} 19^{9} $30^{6.16.20}$). This teaching of the reciprocal relation of love between J″ and Israel has left the mark of Dt deeply impressed upon OT theology. It is this which leads more directly than any other line of OT teaching to the revelation ultimately contained in the words, 'God so loved the world,' etc. (Jn 3^{16}).

As the outcome of the thought of the divine love which Israel has enjoyed, there also comes into view the consideration of Israel as 'the son' and of J″ as the people's Father. The loving God had given Israel life by redemption from Egypt; He had brought Israel up and educated him in the wilderness (see Dt 14^{2} and $8^{2. 3. 16}$).

The intimacy of the relation between J″ and Isr. emphasizes the demand that Israel should also 'cleave' to J″ (11^{22} 13^{4}), and not follow 'other gods' ($6^{14. 15}$ 7^{4} $8^{19. 20}$ $11^{16. 17. 20}$ $30^{17. 18}$). Idolatry is the great peril; its temptations must be resisted with ruthless severity (13^{2-12} 17^{5}); no compromise is to be allowed nor alliance struck with the idolater (7^{2} 20^{16-18}).

The inducements to yield to superstitious practices are pictured as strong and numerous; but to yield is fatal. J″'s wrath and His just punishment are the nation's penalty, and will be its extermination (6^{10-15} 8^{11-20} $11^{16. 17}$ 31^{29}). The alternative between obedience and disobedience, between the service of J″ and the service of 'other gods,' constitutes the theme of the great passage of warning and denunciation which is presented in ch. 28.

The holiness of the people is another chief thought, the prominence of which is a marked feature in this book, resulting from the conception of the close relationship between Israel and J″ the Holy One. The people are holy to J″, and cannot therefore join themselves to 'other gods' (7^{6}). It is this 'holiness' which should prevent them from bodily mutilation as a sign of mourning; for such behaviour was the mark of a nation serving 'other gods' (14^{2}). This 'holiness' is the reason for which the people must refrain from food that would render unclean those who were J″'s possession (14^{21}). God has chosen His people, not only to make them 'high above all nations which he hath made, in praise, and in name, and in honour'; but also that they may be 'an holy people' unto J″' (26^{19}). The 'holiness' of the people depends upon its obedience (28^{9}). The spirit of 'holiness' to J″ is ethically to be expressed by the observance of love towards the neighbour, and by kindness and charity towards the poor, the widow, the orphan, the Levite, and the stranger ($10^{18. 19}$ 24^{17-21}). The millstone was never to be taken in pledge; the garment taken in pledge was to be returned before nightfall ($24^{6. 10-13}$). Feelings of humanity were to be extended towards the animals; the ox treading out the corn was not to be muzzled (25^{4}); and thought was even given to the bird and its young ones ($22^{6. 7}$).

In outward worship the 'holiness' of the people can be adequately safeguarded only by worship at the central sanctuary chosen by J″. This regulation, which is laid down in ch. 12, is repeated in connexion with the laws of tithe (14^{23} etc.), the firstborn (15^{20}), the festivals ($16^{2. 6. 11}$), the firstlings (26^{2}), the judges ($17^{8. 10}$). So long as worship was carried on at local shrines, on the high-places, and under trees (12^{2}), it was inevitably tainted with heathenism; the hearts of the people would be alienated from the service of J″; and the moral purity of the nation would be corrupted by the assimilation of idolatrous practices.

Thus the relationship of Israel to J″ is asserted as the spiritual principle which must animate the people's whole existence. The laws which are mentioned illustrate how the high mission of Israel is to be interpreted in daily life. These laws are no formal code. The blessing for obedience is promised as a reward for particular acts, and for the whole regulation of life; and the blessing promised is expressed in terms which Israel could understand and appreciate,—outward prosperity and length of life ($12^{25. 28}$ 13^{18} 14^{29} $15^{10. 18}$ 16^{20} 19^{13} 23^{21} 24^{19} 25^{15}). It is to preserve unimpaired the recollection of their spiritual relation to J″ that so much stress is laid upon the training of the children (4^{9} $6^{7. 20-25}$ 11^{19}); while provision is also made, that even in the dress and the dwellings of individuals ($6^{8. 9}$ $11^{19. 20}$ 22^{12}) the people should be reminded of their spiritual duties.

v. LANGUAGE AND STYLE OF DEUTERONOMY.—The style in which the book is written has very clearly marked characteristics of its own. It is quite distinct, and easily recognizable. It bears no resemblance to the style of P, nor does it show any likeness to the narrative style of JE. In certain hortatory passages of JE there may be noticed 'an approximation to the style of Dt; and these sections [Gn 26^{5}, Ex 13^{3-16} 15^{26} 19^{3-6}, parts of 20^{2-17} 23^{20-33} 34^{10-26}] appear to have been the source from which the author of Dt adopted some of the expressions currently used by him' (Driver).

The style of Dt is remarkable for its command of rich and effective periods, in which the sentences are framed with great oratorical skill. They are rhythmical without being tedious; and copious without being shallow and rhetorical. Some of the writing of Jeremiah approaches most closely in style to Dt; and the influence of Dt upon subsequent Heb. literature was very marked. The Deut. style was imitated and adopted by a group or succession of writers in and after the days of the exile. The Deut. passages in Jos, Jg, and K are easily distinguishable; they are generally of a hortatory character, and represent a particular attitude of fervent patriotism and religious thought, expressed with considerable redundancy of language, and with the use of certain characteristic phrases.

Very full and complete lists of the characteristic Deut. words and phrases have been drawn up by Driver (*Deut.* Introd. p. lxxviii ff.) and Holzinger (*Einleit. in d. Hex.*). The following are instances of words perfectly simple in themselves, but used with great frequency or with marked effect in Dt, though elsewhere not found, or only used with great rareness, in the Hexateuch:—

Thy (*your*) *gates* (=cities).
A mighty hand and a stretched out arm.
The land whither thou goest in to possess it.
Statutes and judgments; commandments and statutes.
With all your heart and with all your soul.
the priests the Levites.
observe to do.
that it may be well for thee.
a peculiar people.
to make his name to dwell there.
to do that which is right (*good or evil*) *in the eyes of J″.*
as J″ hath spoken.
to walk in the ways of J″.
to hearken to the voice.

Under this head should be noticed the use of אָהַב *to love* (*a*) with God as obj.; (*b*) of God's love to His people.

אֱלֹהִים אֲחֵרִים	*other gods.*
הֶאֱרִיךְ	*to prolong* (of days).
הוֹרִישׁ	*to dispossess.*
בָּחַר	*to choose.*
דָּבַק בְּ	*to cleave to.*
הֵיטֵיב	*thoroughly.*
נָתַן לִפְנֵי	*to deliver up before.*
פָּדָה	*to ransom.*
מִשְׁלַח יָדְךָ	*that to which thou puttest thine hand.*
הִשְׁמִיד	*to destroy.*
תּוֹעֲבַת יהוה	*the abomination of J″* (of idolatry).
בִּעֵר הָרָע	*to root out the evil.*
כַּיּוֹם הַזֶּה	*as at this day.*
כָּל־הַיָּמִים	*continually.*
עַם קָדוֹשׁ	*a holy people.*

Other characteristics of his style are—

(1) The preference for אָנֹכִי (56 times) above אֲנִי (12^{30} 29^{5}); the use of אֲנִי in the Song $32^{21. 39}$ and $32^{49. 52}$ is not from the same hand as D.

(2) The preference for לֵבָב (47 times) above לֵב (4^{11} 28^{65} $29^{3. 18}$).

(3) The use of the emphatic ־וּן in the 2nd and 3rd per. plur. of the impf.

(4) The frequent employment of the reflexive dative.
(5) The collocation of words without the conjunction (*asyndeta*).
(6) The fem. form of the infin. יִרְאָה, אַהֲבָה, שִׂנְאָה.

The following words or phrases are found in Dt only (see Driver, *Deut.* p. lxxxiv).

אָזֵן	23^{14}.
הֶאֱמִיר	$26^{17.18}$.
מְבוּשִׁים	25^{11}.
מְגֻעֶרֶת	28^{20}.
דְּאָבוֹן	28^{65}.
מַדְוֶה	7^{15} 28^{60}.
דַּלֶּקֶת	28^{22}.
הַהִין	1^{41}.
חָסַל	28^{38}.
חֶרְמֵשׁ	16^{9} 23^{26}.
חַרְחֻר	28^{22}.
חֶרֶס	28^{27}.
חָשַׁל	25^{18}.
טֶנֶא	$26^{2.4}$ $28^{5.17}$.
כָּלֶה	28^{32}.
לֵחַ	34^{7}.
מְלִילָה	23^{26} [EV 25].
מִסַּת	16^{10}.
עִיר מְתִים	2^{34} 3^{6} (cf. Jg 20^{48}).
נָשַׁל	19^{5} 28^{40}.
מִסְכֵּנֻת	8^{9}.
סָכַת	27^{9}.
עָבַט	$15^{6.8}$ $24^{10.13}$.
עֲלִילוֹת דְּבָר״	$22^{14.17}$.
הִתְעַמֵּר	21^{14} 24^{7}.
הַעֲנִיק	15^{14}.
מַעֲקֶה	22^{8}.
עַשְׁתְּרוֹת	7^{13} $28^{4.18.51}$.
עֶרְוַת דָּבָר	23^{14} 24^{1}.
פֵּאֵר	24^{20}.
צְלָצַל	28^{42}.
קְשִׁי	9^{27}.
רַגָּז	28^{65}.
שְׁגַר אֲלָפֶיךָ	7^{13} $28^{4.18.51}$.
שִׁלְיָה	28^{57}.
שְׁמִטָּה	$15^{1.2.9}$ 31^{10}.
שִׁנֵּן	6^{7}.

'The following expressions, occurring mostly only once in Dt, are more or less frequent in subsequent writers, esp. those of the Deuteronomic school :—

גִּלּוּלִים and שִׁקּוּצִים $29^{16\ 17}$; זַעֲוָה 28^{25} ; הִכְעִיס *to vex* (esp. by idolatry), 4^{25} 9^{18} 31^{29} 32^{16} (cf. כַּעַס v.^{21}); הוֹרִישׁ *to expel* (from Canaan), 30^{1}, cf. v.^{4}; *the name to be called over*, 28^{10} ; רֹעַ מַעֲלָלֶיךָ 28^{20} ; שְׁנִינָה ,שַׁמָּה 28^{37} ; שְׁרִירוּת $29^{18\ 19}$; נָתַשׁ 29^{27}.' (Driver *ib.*)

vi. THE LEGISLATION OF DEUTERONOMY.—Turning to the subject of the laws contained in Dt, we have only space to make the following general observations :—

(1) The laws are arranged upon a rough general plan, in which the order observed is that of (*a*) religious duties, chs. 12–16 ; (*b*) civil ordinances, chs. 17–20 ; (*c*) rules for social and domestic life, chs. 21–25. But the reader will notice that there is no strict adherence to orderly arrangement.

(2) The language in which the laws recorded in 12–20 are written is, as a rule, somewhat diffuse and hortatory ; but in 21–25 there are many passages having a close resemblance to the style of Ex 21–23, terse, and evidently often reproducing the precise terms of the ancient codes.

(3) The laws make no claim to be a new code. So far as they are peculiar to D, they 'have, with very few exceptions, the appearance either of being taken directly, with unessential modifications of form, from older law-books (especially many of those in 21^{10}–25^{19}), or else of being accepted applications of long-established principles (as 17^{8-13} 19^{16-21}), or the formulation of ancient customs (as 21^{1-9} 22^{13-21} 25^{5-10}) expressed in Deuteronomic phraseology. And such laws as are really new in Dt are but the logical and consistent development of Mosaic principles' (Driver, *Deuteronomy*, Introd. p. lvi).

The following outline will serve as a rough analysis of the principal laws :—

A. NATIONAL RELIGIOUS LIFE.
  1. *Public Worship.*
    (*a*) Law of single sanctuary, 12^{1-28}.
    (*b*) Law against idolatry, 12^{29}–13^{19}.
  2. *Religious Duties.*
    (*a*) Personal purity, 14^{1-21}.
    (*b*) Charity, 14^{22}–15^{18}.
  3. *Religious Observances.*
      Offering and festivals, 15^{19}–16^{17}.
B. NATIONAL ADMINISTRATION.
  1. *Civil Officers.*
    (*a*) Judseg, 16^{18-20} 17^{8-13}.
    (*b*) King, 17^{14-20}.
  2. *Religious.*
    (*a*) Priests, 18^{1-8}
    (*b*) Prophets, 18^{9-22}.
C. CRIMINAL LAW.
    (*a*) Murder and homicide, 19^{1-13} 21^{1-9}.
    (*b*) Property, 19^{14}.
    (*c*) Witness, 19^{15-21}.
    (*d*) War, 20. 21^{10-14}.
D. MISCELLANEOUS LAWS, *e.g.* primogeniture, seduction, divorce, 21^{15-21} 22^{13-30} 24^{1-5} 25^{5-11}, interest and loans, $23^{20.21}$ $24^{6.10-13}$.

SYNOPSIS OF LAWS IN DEUTERONOMY
(taken from Driver's *Commentary*, pp. iv–vii).

JE.	DEUTERONOMY.	P (INCLUDING H).
Ex 20^{2-17}.	$5^{6-18\,(21)}$ (the Decalogue).	
20^{24}.*	12^{1-28} (place of sacrifice).	Lv 17^{1-9}.*
cf. 23^{24}. $34^{12-15f.}$	12^{29-31} (not to imitate Canaanite rites).	Nu 33^{52}.
cf. $22^{19\,(20)}$.	ch. 13 (cases of seduction to idolatry).	
	$14^{1.2}$ (disfigurement in mourning).	Lv 19^{28a}.
	14^{3-20} (clean and unclean animals).	,, 11^{2-23} 20^{25}.
$22^{30\,(31)}$.	14^{21a} (food improperly killed).	,, 17^{15} 11^{40}.
23^{19b} 34^{26b}.	14^{21b} (kid in mother's milk).	
	14^{22-29} (tithes).	,, 27^{30-33} ; Nu 18^{21-32}.*
$23^{10f.}$.*	15^{1-11} (year of release).	,, 25^{1-7}.*
21^{2-11}.*	15^{12-18} (Hebrew slaves).	,, 25^{39-46}.*
$22^{29\,(30)}$ 13^{12} 34^{19}.	15^{19-23} (firstlings of ox and sheep: cf. $12^{6.17.18}$ 14^{23}).	Nu $18^{17f.}$* (cf. Ex $13^{1f.}$; Lv 27^{26} ; Nu 3^{13} 8^{17}).
23^{14-17} 34^{18-20} *end.* $^{22-24}$.	16^{1-17} (the three annual pilgrimages).	Lv 23* ; Nu 28–29.*
	16^{18} (appointment of judges).	
$23^{1-3.6-8}$.	16^{19-20} (just judgment).	,, 19^{15}.
	16^{21-22} (Ashérahs and 'pillars' prohibited).	,, 26^{1}.
	17^{1} (sacrifices to be without blemish ; cf. 15^{21}).	,, 22^{17-24}.
$22^{19\,(20)}$ 20^{3} 23^{13} 34^{14}.	17^{2-7} (worship of 'other gods,' or of the host of heaven).	
	17^{8-13} (supreme tribunal).	
	17^{14-20} (law of the king).	
	18^{1-8} (rights and revenues of the tribe of Levi).	,, 7^{32-34}* ; Nu $18^{1-7.8-20}$.*
	18^{9-22} (law of the prophet).	
	18^{10a} (Molech-worship ; cf. 12^{31}).	,, 18^{21} 20^{2-5}.
$22^{17\,(18)}$ (sorceress alone).	$18^{10b.11}$ (different kinds of divination and magic).	,, $19^{26b.31}$. $20^{6.27}$.
$21^{12.14}$.*	19^{1-13} (asylum for manslayer : murder).	Nu 35^{9-34}; Lv 24^{17-21}.
	19^{14} (the landmark).	
23^{1}.	19^{15-21} (law of witness).	Lv 19^{16b}.
	ch. 20 (military service and war ; cf. 24^{5}).	
	21^{1-9} (expiation of an untraced murder).	
	21^{10-14} (treatment of female captives).	
	21^{15-17} (primogeniture).	
cf. 21^{15-17}.	21^{18-21} (undutiful son).	cf. Lv 20^{9}.
	$21^{22.23}$ (body of malefactor).	
$23^{4.5}$.	22^{1-4} (animal straying or fallen ; lost property).	
	22^{5} (sexes not to interchange garments).	
	$22^{6.7}$ (bird's nest).	
	22^{8} (battlement).	
	22^{9-11} (against non-natural mixtures).	Lv 19^{19}.
	22^{12} (law of 'tassels').	Nu 15^{37-41}.
	22^{13-21} (slander against a newly-married maiden).	
20^{14}.	22^{22-27} (adultery).	Lv 18^{20} 20^{10}.
$22^{15\,(16)}$ f.	$22^{28f.}$ (seduction).	
	23^{1} (22^{30}) (incest with step-mother).	,, 18^{8} 20^{11}.
	$23^{2-9\,(1-8)}$ (conditions of admittance into the theocratic community).	
	$23^{10-15\,(9-14)}$ (cleanliness in the camp).	Nu 5^{1-4}.*
	$23^{16\,(15)}$ f. (humanity to escaped slave).	
	$23^{18\,(17)}$ f. (against religious prostitution).	
$22^{24\,(25)}$.	$23^{20\,(19)}$ f. (usury).	Lv 25^{35-37}.
	$23^{22-24\,(21-23)}$ (vows).	Nu 30^{2}.
	$23^{25\,(24)}$ f. (regard for neighbour's crops).	
	24^{1-4} (divorce).	
$22^{25\,(26)}$ f.	$24^{6.10-13}$ (pledges).	
21^{16}.	24^{7} (man-stealing).	
	$24^{8f.}$ (leprosy).	Lv 13–14

JE.	DEUTERONOMY.	P (INCLUDING H).
	$24^{14f.}$ (wages of hired servant not to be detained).	Lv 19^{13}.
	24^{16} (the family of a criminal not to suffer with him).	
Ex $22^{20-23\,(21-24)}$ 23^{9}.	$24^{17f.}$ (justice towards stranger, widow, and orphan).	„ $19^{33f.}$.
	24^{19-22} (gleanings).	„ $19^{9f.}$ 23^{22}.
	25^{1-3} (moderation in infliction of the bastinado).	
	25^{4} (threshing ox not to be muzzled).	
	25^{5-10} (levirate marriage).	
	$25^{11.\,12}$ (modesty in women).	
	25^{13-16} (just weights).	„ $19^{35f.}$.
17^{14}.	25^{17-19} (Amalek).	
cf. $22^{28a\,(29a)}$ 23^{19a} 34^{26a}.	26^{1-11} (thanksgiving at the offering of first-fruits).	cf. Nu $18^{12f.}$.
	26^{12-15} (thanksgiving at the payment of the triennial tithe).	
23^{20-33}.	ch. 28 (peroration, presenting motives for the observance of the Code).	Lv 26^{3-45}.
$20^{4.\,23}$ 34^{17}.	$4^{16-18.\,23}$ 7^{25} (against images).	Lv 19^{4b} 26^{1}.
23^{12b}.	5^{14b} (philanthropic object of Sabbath).	
cf. $13^{9.\,16}$.	6^{8} 11^{18} (law of frontlets).	
20^{3} $13^{13.\,14}$.	6^{14} 11^{16} (against 'other gods').	„ 19^{4a}.
13^{14}.	6^{20} (instruction to children).	
$23^{24a.\,32f.}$ $34^{12.\,15f.}$.	$7^{2-4.\,16}$ (no compact with Canaanites).	Nu 33^{55}.
23^{24b} 34^{13}.	7^{5} 12^{3} (Canaanite altars, 'pillars,' etc. to be destroyed).	„ 33^{52}.
19^{6} $22^{29\,(30)}$.	7^{6} $14^{2.\,21}$ 26^{19} 28^{9} (Israel a 'holy people'). (in different connexions).	Lv $11^{44f.}$ 19^{2} $20^{7.\,26}$; Nu 15^{40}.
$22^{20\,(21)}$ 23^{9}.	10^{19} (to love the 'stranger').	„ 19^{34}.
	$12^{16.\,23}$ 15^{23} (blood not to be eaten).	„ 17^{10-14} 19^{26a} (cf. 3^{17} $7^{26f.}$; Gn 9^{4}).
23^{18a} 34^{25a}.	16^{3a} (leavened bread not to be eaten with Passover).	Ex 12^{8}.
$13^{6f.}$ 23^{15} 34^{18}.	$16^{3b\,4a\,8}$ (unleavened cakes for seven days afterwards).	„ $12^{15.\,18-20}$, Lv 23^{6}.
23^{18b} 34^{25b}.	16^{4b} (flesh of Passover not to remain till morning).	„ 12^{10} Nu 9^{12}.
	$16^{13.\,15}$ (feast of 'booths,' 'seven days').	Lv $23^{34.\,39.\,41-43}$.
	17^{6} 19^{15} ('two or three witnesses').	Nu 35^{30}.
21^{23-25}.	19^{21} (*lex talionis*). (but in a different application in each case).	Lv $24^{19f.}$
20^{25}.	$27^{5.\,6}$ (altars of unhewn stones).	

[The instances in which the divergence is most marked are indicated by an asterisk *.]

vii. DATE AND AUTHORSHIP. — The date to which the composition of Dt should be assigned cannot be determined with any degree of certainty. But it is clear, from what has been already said, that it cannot reasonably be attributed to any very early period in the history of Heb. literature.

a. The testimony of the style and language connects it with the period preceding the age in which the imitators of the Deut. style wrote and flourished. Certainly, the rich and fluent oratorical periods of Dt belong to a period of ripe literary development, and not to the rough beginnings of a national literature.

It has been asserted that this is contradicted by the presence of certain archaisms. But, even if there were a few archaisms, their presence would not affect the general impression produced by the character of the Deut. style. The alleged 'archaisms,' however, are not of a kind to furnish any proof of the antiquity of the book.

(*a*) הוא. The 'epicene' use of the pronoun throws more light upon the history of the text than upon the antiquity of the book.

The vowels in הוא and הִיא were in all probability absent from the original autographs.

The fem. form *hi* seems to have existed in the earliest periods of the language.

(*b*) הָאֵל for הָאֵלֶּה. This form occurs 8 times in the Pent., 4 times in Dt 4^{42} 7^{22} 9^{11}, once in 1 Ch 20^{8} אֵל. As the usual 'dissyllabic' form occurs in the Pent. some 260 times, and in the cognate dialects the dissyllabic form was usual, the monosyllable is almost certainly an orthographical anomaly, and should have a second vowel, אֵלֶ, הָאֵלֶ; cf. אַתְּ.

(*c*) זְכוּר (16^{16} 20^{13}), as in Ex 23^{17} 34^{33}, instead of זָכָר, which is used over 50 times in the Pent. The use of זְכוּר for זָכָר goes back to the old law of Ex 23^{17}.

(*d*) יְרֵחוֹ (32^{49} $34^{1.\,3}$), as elsewhere in Pent. In Jos it is spelt יְרִיחוֹ 28 times, and we have יְרֵחוֹ in 2 S 10^{5}, Jer 39^{5} 52^{8}. The suggestion has been offered that 'Israel picked up a new pronunciation after they came to the place,' in other words, that until the death of Moses the Israelites called the place 'Yĕrēchō' incorrectly, and that this was embodied in the Pent., but that the local pronunciation was given by Joshua. It might have been supposed that the writer of the account of the death of Moses (Dt $34^{1.\,3}$) would have had as good opportunities for 'picking up a new pronunciation' as the writer of Jos 2^{1}. But the pronunciation followed in the Pent. is found also in K, Ezr-Neh, and Ch; so that no argument can be based upon the variety of the spelling.

Other supposed archaisms seem to arise from the mannerism of the author rather than from any real antiquity in their form.

The use of נַעַר, equally for masc. or fem., appears indeed to be a genuine archaism; but the fact that נַעֲרָה appears as the fem. of נַעַר elsewhere in the Heb. Scriptures except in the Pent., is merely an indication that the text of the Pent. had become regarded as too sacred to modify, at an earlier date than the other books subsequently admitted into the Heb. Canon.

Finally, the presence of an archaism is no more proof of a very early date than the presence of an Aramaism would be proof of a very late date. We have to account for the one as well as for the other.

b. The evidence derived from the language is corroborated by that which the religious teaching supplies.

(1) It has already been noticed that the emphasis laid upon the *love* of God is a feature almost unique (except for Ex 20); and it is generally believed that the prophet Hosea is the first exponent of this teaching. Dt 'builds upon the foundation of the prophets' (Driver).

(2) The 'monotheism' of Dt is an expansion of the 'monolatry' of early Israel; and the command to worship at a single sanctuary expresses in a concrete form the conception of a monotheistic religion. We are confronted with a stage of religious thought which has been reached only after a long preparatory period of discipline and teaching.

c. A comparison of the laws with those in Ex 20–23 shows that whereas the Deut. legislation is founded upon the laws of 'the Covenant,' and often repeats them almost *verbatim*, *e.g.* 14^{21} = Ex 23^{19} 34^{26}, 7^{5} = Ex 34^{13}, and, as a rule, merely expands them with hortatory phrase, in other cases Dt presents us with a modification of the earlier law, showing a more advanced and humane civilization. Thus comparing the law of release for bondservants in Dt 15^{12-17} with the parallel law in Ex $21^{2ff.}$, we notice (1) that female slaves are included in the law of release, (2) that provision is granted to the released slave so that he should not starve, (3) that the old custom of boring the ear is not required to be done publicly. Similarly, in Dt 5 the institution of the sabbatic year is put in force to restrain the exactions of the usurer, whereas in Ex 23^{10} it had only an agricultural significance.

d. The laws in Dt regulating national worship represent a later stage of Isr. history than those in Ex 20–23. This is conspicuously shown in regard to the place of sacrifice. In Ex 20^{24} an Israelite may erect local altars: 'in every place where I record my name, I will come unto thee and bless thee.' The practice of sacrificing at local altars and shrines was apparently universal from the time of Joshua (Jos $24^{1.\,26}$, 1 S 7^{9} 9^{12-14} 10^{3-8} 11^{15} 14^{35} 20^{6}, 2 S $15^{12.\,32}$) until the days of Hezekiah, who endeavoured to centralize all worship at Jerus. as the one national sanctuary (2 K $18^{4.\,22}$). The law of Dt insists (12^{4-18} etc.) upon the necessity of sacrificing at one place which J″ shall have chosen 'to set his name there.' It expresses in the terms of direct injunction the change for which Hezekiah contended and which Josiah finally carried into execution.

e. It may be granted that the laws of worship in Dt are quite too incomplete to be regarded as containing any exhaustive account. Thus the precise dates for the Festivals of Passover and Tabernacles are not given. In the former case the month is given, but not the day; in the latter case, neither month nor day. In the description of the Passover no direction is given that everyone should partake of it; while the command to observe the 7th day of Passover as 'a solemn assembly' and a day of rest is not applied to the other two feasts.

But, making all allowance for the general and fragmentary character of the religious legislation in Dt, we cannot pretend to be able to reconcile the discrepancies between the law of Dt and that of the (so-called) Priestly Code. The most notable discrepancy is in reference to the status of the Levite, and the provision for his maintenance. In Dt the regular expression 'the priests, the Levites' ($17^{9.\,18}$ 18^{1} 24^{8} 27^{9}), does not seem to recognize the distinction between 'the sons of Aaron' and 'the Levites,' which is found in the priestly laws. The Levites are pictured as wanderers and objects of Israelite charity, for which special regulations are laid down (12^{12-19} $14^{27.\,29}$ $16^{11.\,14}$ 18^{6} $26^{11.\,12}$); there is no reference to the provision in Nu 18 for the maintenance of priests and Levites, and in Nu 35 for the reservation of 48 cities for their place of residence.

A complete difference is also expressed in the laws relating to *firstlings* and to tithes. In Dt $12^{6.\,17\text{ff.}}$ $15^{19\text{ff.}}$ the firstlings are to be presented at the central sanctuary, and there eaten by the owner. In Nu 18^{18} the firstlings are pronounced to belong to Aaron, 'And the flesh of them shall be thine; as the wave-breast and as the right thigh it shall be thine.' In Dt ($12^{17\text{ff.}}$ 14^{22}) it is enjoined that a tithe of the vegetable produce is to be set aside, and to be consumed by the offerer at the central sanctuary; while, in every third year, the tithe is to be devoted to the poor or the destitute and the Levite. In this there is no resemblance to the tithe law of Nu 18^{21-28} and Lv $27^{30.\,32}$, according to which the tithe was to be paid of animal as well as of vegetable produce; it was to be paid to the Levites, who, in their turn, were enjoined to render a tenth to the priests.

Another instance of ritual discrepancy is found in the description of the priestly dues. In Dt 18^{3-5} the sacrificing priest received as his share 'the shoulder, two cheeks, and maw'; in Lv 7^{31-34} 'the wave-breast' and 'heave-thigh' or shoulder are assigned to the priest.

Added to this, there is the argument from silence, in that Dt makes no mention of the year of jubilee, the great Day of Atonement, the Levitical cities, the meal-offering, guilt-offering, or sin-offering, nor even of the tent of meeting (Dt $31^{14\text{f.}}$ is from JE). And it is incredible to suppose that the Levitical system, if formulated as we have it in P, should have been so wholly overlooked in an address to the people.

It is impossible to resist the impression that the law of Dt represents an expansion and development of the ancient code contained in Ex 20–23, and precedes the final formulation of the priestly ritual, which only received its ultimate form in the last period of revising the structure of the Pentateuch.

In order to approach more nearly the limits of time within which it is reasonable to suppose that Dt was composed, we may take into consideration the further possible indications of time, and judge of them not as individually convincing items of evidence, but as collectively carrying considerable weight.

(*a*) It was written on the W. side of the Jordan; cf. the use of 'beyond Jordan' in Dt $1^{1.\,5}$ 3^{8} $4^{41.\,46.\,47.\,49}$, as in Jos 2^{10} 7^{7} etc. See BEYOND.

(*b*) The law of the kingdom, 17^{14-20}, is expressed in language indicating acquaintance with the evils of Solomon's reign.

(*c*) The law of the judicial tribunal in 17^{8-13} does not ordain a new institution, but *describes a court already existing*, and having a close resemblance to the one described in 2 Ch $19^{8.\,11}$ as appointed by Jehoshaphat.

(*d*) Isaiah, who speaks of the erection of an 'obelisk' (*mazzēbâh*) for a sacred purpose in connexion with the worship of J″ in Egypt, could hardly have been acquainted with the law of Dt 16^{22} 'Thou shalt not set thee up an obelisk, which J″ thy God hateth.'

(*e*) Dt refers to the worship of 'the host of heaven' as a dangerous form of idolatry (4^{19} 17^{3}). We do not find in the historical books any mention of this superstition being a source of religious temptation until the days of Ahaz; see 2 K 23^{12}.

(*f*) The style of Jeremiah's writing shows abundant traces of the influence of Dt.

If we may take these hints together, we arrive at the probability of Dt having been composed during the period which intervenes between the accession of Ahaz and the literary activity of Jeremiah.

A *terminus ad quem* for the composition of Dt is supplied by the discovery of 'the book of the law' in the 18th year of the reign of Josiah (B.C. 621). There can be no manner of doubt that this book corresponded to a work practically identical with the main portion of Dt (5–26. 28). This work contained denunciations and curses, such as are found in Dt 28 (cf. 2 K $22^{11.\,13.\,19}$); it contained mention of the covenant with J″, with clear reference to Dt 28^{69} (cf. 2 K $23^{2.\,3.\,21}$). The reforms instituted by Josiah are such as would be required by conformity with the law of Dt, especially in regard to the centralization of worship, 2 K $23^{8.\,9}$; the prohibition of the worship of the heavenly bodies, 2 K $23^{4.\,5.\,11}$; the prohibition of the high-places, obelisks, Ashérim, etc., 2 K $23^{4.\,5.\,14.\,15}$; the prohibition of religious prostitutes, 2 K 23^{7}; the maintenance of the priests ejected from the local shrines, 2 K $23^{8.\,9}$; the prohibition of Molech worship, 2 K 23^{10}; the celebration of the Passover in Jerusalem 'as it is written in this book of the covenant,' 2 K 23^{21-23}; the ejection of diviners and consulters with familiar spirits, 2 K 23^{24}.

The finding of this 'book of the law' in the temple is described as a fortuitous occurrence. There is no foundation for the suggestion that Hilkiah himself had written the book, and that the story of its finding was a fabrication. The account is straightforward and natural. It is generally agreed that the book may have been written in the reign of Manasseh, or in the early part of the reign of Josiah. Hezekiah, who had commanded all Isr. worship to be offered at the sanctuary in Jerus. (2 K $18^{4.22}$ 21^3), commenced the policy of removing the high-places. Manasseh's reign reversed all that Hezekiah had done. It is thought probable that the composition of Dt was intended, in the days of Manasseh, to protest against the religious evils of that time, against the forms of superstition that had begun to find their way into Judah from Babylonia, as well as against the corruptions and disorders at the high-places which presented a form of J″ worship wholly alien to the teaching and spirit of the prophets of Israel.

Such a work, written in the troublous reign of Manasseh, may well have been deposited for safety within the precincts of the temple. The description of its discovery leads the reader to suppose that the book was one that had been written some considerable time before the 18th year of Josiah's reign. The character of Dt agrees exactly with the spirit of Huldah's warning in 2 K 22^{16-20}, where she speaks of the people of Judah having forsaken J″, and burned incense to other gods, etc.

The traditional view, that the work in its present form was written by Moses, is now generally recognized by critical scholarship as impossible. The fact that Moses is described in Dt $31^{9.24}$ as having committed the Deut. legislation to writing, was, in former times, regarded as sufficient proof that the whole work came from his hand. The writer (Dt 31^9) narrates the fact that Moses 'wrote this law'; he also narrates the fact that Moses delivered farewell discourses to the people. There is no appearance of autobiography in Dt. There is no claim to Mosaic authorship for the whole work. A copy of the Deut. law is stated (Dt 31^{26}) to have been committed by Moses to the keeping of the priests 'by the side of the ark.'

Heb. laws went back to the founding of the nation under Moses. The name of Moses embraced the whole legislation, both in its earlier forms and in their later expansion and modification. The writer of Dt employed the nucleus of ancient law as the means of conveying the teaching needed by his time. The authority of Moses is invoked as impersonating the spirit of Isr. law in its later application, no less than in its original framing. Moses is made to plead with his people, and to show the abiding principles of the worship of J″.

The work is that of a prophet, a religious teacher, not of a jurist or a statesman. In language, in thought, and in character, it is most easily understood as the composition of one who lived in the 7th cent., and who sought, by a 'dramatic' use of the last words of Moses, to recall his countrymen to a holier life, and a purer service of J″. It has been objected that the allusions to the dwellers in Canaan, and to the Amalekites (7^{1-5} 20^{16-19}), would be unintelligible and unnecessary at so late a period as the 7th cent. B.C. But the writer's purpose is to transfer himself to the age of Moses, and from that historic standpoint to appeal to the nation's conscience. If Moses were represented as speaking in the plains of Moab, it would be natural for the writer to make him refer to the Canaanites, and to introduce suitable local allusions. And the writer's argument was perfectly intelligible. If severity of the sternest kind was traditionally said to have been inculcated by Moses against the idolatrous inhabitants of the land, how much more was it required in dealing with those who, in Israel itself, had proved so faithless to J″, in spite of the warnings of the prophets!

It has been objected that the substance of Deut. laws is alluded to in writings earlier than the 7th cent. B.C. Thus 1 S 28^3 has been compared with Dt 18^{11}, Hos 4^{14} with Dt 23^{18}, Hos 5^{10} with Dt 19^{14}, Am 8^5 with Dt 25^4, Neh 2^1 with Dt 1^{15}, while 2 K 14^6 refers to the law contained in Dt 24^{18}. But this line of objection assumes that the existence of the laws is contemporaneous with the composition of Dt, and it ignores the fact, which criticism has clearly revealed and strenuously reiterated, that Dt contains and expands laws of very much greater antiquity than its own composition.

In the following passages, in which the words of the prophetical writers have been regarded as referring to Dt, it is obvious that Dt, as well as the prophets, refers back to the older law of Ex 20–23:—

Is $1^{17.23}$ 10^2 = Ex 22^{21}, Dt 24^{17}.
,, 1^{23} 5^{23} = ,, 23^8 ,, 16^{19}.
Am 2^8 = ,, 22^{25} ,, 24^{12}.
,, 5^{12} = ,, 23^6 ,, 16^{10}.

There are, of course, in Dt abundant allusions to offerings (*e.g.* ch. 12), tithes (14^{22-29}), distinctions of 'clean' and 'unclean' ($12^{15.22}$ 14^{3-20}), the 'solemn assembly' (16^8), law of leprosy (24^8), and kindred topics, which show the familiarity of Dt with the national religious observances; they do not exhibit acquaintance with the distinctive ordinances of P, although reference to them is necessarily made with technical terms.

Certain words and phrases have also been adduced from the prophetical writers, which it is alleged must have been taken from Dt, *e.g.* Hos 5^{11} *oppressed* from Dt 28^{33}; 8^{13} *they shall return to Egypt* from Dt 28^{68}; 11^8 *Admah and Zeboim* from Dt 29^{22}; Am 4^9 *blasting and mildew* from Dt 28^{22}; 4^{11} overthrow of Sodom and *Gomorrah* from Dt 29^{23}; 5^7 *wormwood* from Dt 29^{17} etc. But the occurrence of such words and phrases is not sufficient to justify the claim for direct citation. They are expressions, most of them, which would quite naturally occur independently to the writers. Nor is there any means of showing that there is more probability of these writers having borrowed a phrase from Dt than of Dt having borrowed a phrase from them. Considering the resemblance of Dt's style to the writing in Jer and Kings, it would be more natural to expect Dt to have borrowed from Hosea or Amos than for Hosea or Amos to have borrowed from Dt. The Deuteronomic style in Jer, Jos, Jg, Kings, shows at once the influence of Dt; but there is no clear proof of the earlier prophets having been acquainted with Dt.

LITERATURE.—For a fuller discussion of the subject the reader is referred to the admirable treatment of it by Driver, in his commentary on 'Deuteronomy' (*International Critical Commentary*, T. & T. Clark, Edinburgh), in his *LOT*, and in his art. 'Deuteronomy' in Smith's *DB*²; to all of which the writer of the present article is largely indebted. Other works dealing with the same subject, to which reference may be made, are the commentaries of Oettli and Harper, and *Einleitungen* of Riehm, Cornill, König, Strack, Kuenen, Holzinger; Cheyne, *Jeremiah* ('Men of the Bible' series); W. R. Smith, *OTJC*²; Ryle, *Canon of the OT*; Montefiore, *Religion of the Ancient Hebrews*; Wildeboer, *Lit. d. A.T.*; Piepenbring, 'La Reforme et le Code de Josias,' in *Revue d. l'Histoire des Religions*, t. xxix. 1894.

H. E. RYLE.

DEVIL.—See DEMON, SATAN. **DEVOTED THINGS.**—See ACCURSED, CURSE.

DEVOTION.—RV gives 'devotion' for AV 'prayer' in Job 15^4 (שִׂיחָה). In AV the word is found only Ac 17^{23} 'as I passed by, and beheld your devotions,' Gr. *τὰ σεβάσματα ὑμῶν*, RV 'the objects of your worship.'

That RV gives the meaning of the Greek there is no doubt. The same Gr. word occurs Wis 14^{20} (Vulg. *deus*, AV 'a god,' RV 'object of devotion'), 15^{17} (Vulg. *quos colit*, AV 'the things which he worshippeth,' RV 'object of his worship'); Bel ^{27} (EV 'the gods ye worship'); and 2 Th 2^4 (EV 'that is worshipped,' RVm 'an object of worship'). Did the AV translators understand 'devotions' in the sense of 'objects of worship,' then? Aldis Wright (*Bible Word-Book*,² p. 198 f.), after a full discussion, concludes that they did not. He quotes, however, from Sidney, *Arcadia* (ed. 1598, p. 282 [ed. 1622, p. 277]), as follows: 'Dametas began to speake his lowd voyce, to looke big, to march up and downe, and in his march to lift his legges higher than he was wont, swearing by no meane devotions, that the walls should not keepe the coward from him.' The *Oxf. Eng. Dict.* gives 'an object of religious worship' as one of the meanings of 'devotion,' quoting the above from Sidney, Ac 17^{23}, and a passage from Fletcher (1625), *Double Marriage*, IV. iv.: 'Churches and altars, priests and all devotions, Tumbled together into one rude chaos'; but says, 'this sense is not very certain, the meaning of the quotations being in every case doubtful.' As Wright points out, AV took the word from Gen. Bible of 1560; Wyclif (1380) having 'mawmetis'; Tind. 'the maner how ye worship your goddes,' so Cran., Gen. of 1557 (Whittingham), Bishops'; Cov. 'youre gods seruyce' (from Zurich Bible, *euwre Gottsdienst*); Rhem. 'your Idols.' But it has not been observed that Tomson's NT of 1576, which from 1587 onwards supplanted the NT of 1560 in most copies of the Gen. Bible, has the marg. note: 'Whatsoever men worship for religion's sake, that we call devotion.' That note, which removes all doubt of this meaning from the word, was before the translators of AV, and they would have no hesitation in using an abstract word in this concrete sense: cf. Ac 14^{15} Gr. *τὰ μάταια*, AV 'vanities,' RV 'vain things.' Coverdale has 'devotion' in Ja 1^{26} for AV and RV 'religion.'

J. HASTINGS.

DEW (טַל, *tal*).—i. The atmosphere is capable of holding in suspension a certain amount of aqueous vapour proportionate to its temperature under a given pressure. The greatest amount is taken up during the daytime; but on the approach of sunset, when the temperature is lowered, part of the vapour is precipitated in the form of dew, till the dew-point is reached.

This process is enhanced in Eastern countries like Palestine, where the surface of the ground and the air in contact therewith are highly heated during the daytime, but where at night, and particularly under a cloudless sky, the heat of the ground is radiated into space and the air becomes rapidly cooled down. The excess of moisture in the air then gently 'falls as dew on the tender herb,' and sometimes so copiously as to sustain the life of many plants which would otherwise perish during the rainless season; or even, as in the case of Gideon, to saturate a fleece of wool (Jg 6^{38}). When the sky is clouded, radiation is retarded, and rain may fall. Thus rain and dew alternately benefit the vegetation; and to the latter agent may possibly be ascribed the presence of a beauteous, though dwarfed, flora amongst the waterless valleys of the Sinaitic Peninsula, which in the early morn sparkles in the sunshine, owing to the multitudes of dewdrops which have settled on the leaves and stems of the plants during the cool hours of the night.

ii. Thus deprivation of dew, as well as of rain, becomes a terrible calamity in the East. On this account 'dew and rain' are associated in the imprecation called down by David on the mountains of Gilboa in his distress at the tidings of the death of Saul and Jonathan (2 S 1^{21}); and in the curse pronounced on Ahab and his kingdom by Elijah (1 K 17^{1}); as also by the prophet Haggai on the Jews after the Restoration (Hag 1^{10}) owing to their unwillingness to rebuild the temple.

iii. In the Book of Job the formation of dew is pointed to as one of the mysteries of nature insoluble by man (Job 38^{28}); but in Pr it is ascribed to the omniscience and power of the Lord (Pr 3^{20}).

iv. Dew is a favourite emblem in Scripture; the following are examples: (*a*) Richness and Fertility, 'God give thee of the dew of heaven (Gn 27^{28}, Dt 33^{13}). (*b*) Refreshing and Vivifying effects, 'My speech shall distil as the dew' (Dt 32^{2}); 'Like a cloud of dew in the heat of summer' (Is 18^{4}). (*c*) Stealth, 'We will light upon him as the dew falleth on the ground' (2 S 17^{12}). (*d*) Inconstancy; the goodness of Judah is 'as the early dew, it goeth away' (Hos 6^{4}); Ephraim . . . shall be 'as the early dew that passeth away' (ch. 13^{3}). (*e*) The young warriors of the Messianic king, with flashing weapons like dewdrops, 'Thou hast the dew of thy youth' (Ps 110^{3}).

E. HULL.

DIADEM.—This term (*διάδημα*) was applied by the Greeks to the emblem of royalty worn on the head by Pers. monarchs (Xen. *Cyr.* viii. 3. 13). It consisted of a silken fillet, 2 inches broad, of blue or purple, mixed with white, tied at the back of the head. Originally intended to confine the hair, and worn by all Persians, it became an ornamental head-dress, the king's being distinguished by its colour, and perhaps by jewels studding it. It was tied round the lower part of the *khshatram* (Heb. כֶּתֶר, Gr. *κίδαρις* or *κίταρις*; see Rawlinson, *Anc. Mon.* iii. 204 note), a tall, stiff cap, probably of felt, and of bright colours, which formed the tiara or turban of the king (Q. Curt. iii. 3. 18, 19; see head from Persepolis in Rawlinson, iii. 166). The head-dress of soldiers other than the king was soft, and fell back on the head (Suidas, *Lexicon*, *τιάρα*. See also the Pompeian mosaic of the battle of Issus, given in Ainé, *Herculaneum and Pompeii*). Later, the fillet was enlarged by broad pendants falling on the shoulders. The Persian diadem was adopted by Alexander and his successors (1 Mac 1^{9}; Herodian, i. 3. 7). To the Greeks and Romans it was the distinctive badge of royalty, unlike the wreath, and is commonly described as white (Tac. *Annales*, vi. 37). Its presentation to Julius Cæsar was therefore specially offensive (Cic. *Phil.* ii. 34; Sueton. *Jul.* 79). Pliny (*NH* vii. 57) attributes its invention to Father Liber (the supposed Latin Dionysus), and it was long confined in art to him; but later artists placed it on the head of other deities. Diocletian was the first Rom. emperor to wear it permanently and publicly. Out of it, in combination with the 'corona,' the later royal crowns were developed.

In LXX *διάδημα* is used loosely to translate not only 'crown royal' (כֶּתֶר מַלְכוּת Est 1^{11} 2^{17}) but 'pallium' (תַּכְרִיךְ Est 8^{15} *διάδημα βύσσινον πορφυροῦν*) and 'tiara' (צָנִיף Is 62^{3}. But not so in Job 29^{14}, Is 3^{23}; in Zec 3^{5} צָנִיף is tr. *κίδαρις*, a rendering also given to the high priest's turban in Ezk $21^{31\,(26)}$ 28^{4}, Lv 16^{4}). In 1 Mac 1^{9} 13^{32} it describes the strictly royal insignia for the head adopted by the Greeks from the Persians (*διάδημα τῆς Ἀσίας*). In AV of OT, diadem is again used loosely for the high priest's turban (Ezk 21^{26} מִצְנֶפֶת), a royal tiara (Job 29^{14}, Is 62^{3} צָנִיף) and a crown (Is 28^{5} צְפִירָה). RV more properly confines diadem to the last three passages, using 'mitre' in Ezk 21^{26}, and also 'turban' in the marg. of Job 29^{14}. But though thus the royal head-dress of the kings of Israel is not described as a diadem, there can be but little doubt that it was such (see CROWN). In NT the distinction between *crown* and *diadem* is accurately observed in the Gr. and in RV, but not in AV. *Diadem* should be read in Rev 12^{3} 13^{1} 19^{12}, where it symbolizes respectively the empire of 'the dragon,' 'the beast,' and of the royal Christ. The phrase 'on his head were many diadems,' describes Christ's universal dominion (see CROWN; also for bibliography).

G. T. PURVES.

DIAL (מַעֲלוֹת, *ἀναβαθμοί*, *horologium*), RVm 'Heb. *steps*,' 2 K 20^{11}, Is 38^{8}.—The Heb. word commonly denotes 'steps' (see Ex 20^{26}, 1 K 10^{19}), and is so rendered elsewhere in this narrative (2 K 20^{9-11}, Is 38^{8}; AV *degrees*). The 'steps' referred to are doubtless not simply the steps of the palace (so LXX, Jos. *Ant.* x. ii. 1), but formed part of some kind of sun-clock (so Targ., Vulg., Jerome on Is 38^{8}, and most commentators). According to Herod. ii. 109, the Babylonians were the inventors of the *πολός* or concave dial, the *γνώμων*, and the division of the day into 12 hours. The introduction by Ahaz of a device for measuring the time may be regarded as a result of his intercourse with the

Assyrians (2 K $16^{10\text{ff.}}$), but it is uncertain what kind of clock is intended. Some have supposed that it was in the form of a dial with concentric circles, and a central gnomon (Ges., Hitz., Keil, etc.); but it is doubtful whether מַעֲלוֹת can denote 'degrees.' Hence it seems simpler to think of actual 'steps' arranged round a pillar or obelisk, the time of day being then indicated by the position of the shadow on the steps. Since in 2 K *l.c.* it is regarded as possible for the shadow to go down or to return 10 steps, it is clear that these steps did not each mark an hour of the day, but some smaller period of time. In biblical Heb., indeed, no word denoting an *hour* is found; שָׁעָה first appears in the Aram. of Dn 4^{16} (Eng. ^{19}) 5^5. Our ignorance of the real form of the 'dial' of Ahaz renders precarious all attempts at explaining the phenomenon of the recession of the sun's shadow. Moreover, a discussion of the problem requires a critical comparison of the parallel accounts in Is and 2 K; and it must be recognized as probable on independent grounds, that our narrative is considerably later than the time of Hezekiah. Cf. esp. Dillmann and Cheyne on Is $38^{1\text{-}8}$.

H. A. WHITE.

DIAMOND.—See STONES (PRECIOUS).

DIANA OF THE EPHESIANS is the Latinized rendering of the name Artemis (Ἄρτεμις τῶν Ἐφεσίων), by which the Greeks designated a goddess whose sanctuary was situated close to Ephesus. The situation and splendour of the temple, and the part that the sanctuary and its priests played in the history of the city, through the influence of the conservative anti-Greek party, which favoured the interests of the temple and the power of the goddess, are described under EPHESUS. The goddess, who had her seat in the rich valley near the mouth of the Cayster long before Gr. colonists had set foot on the Asian coast, had little in common with the chaste virgin goddess Artemis of Greek poetry and mythology. She was the impersonation of the vitality and power of nature, of the reproductive power which keeps up the race of man and animals in an unbroken series of offspring, and of the nourishing power by which the earth tenders to the use of man and animals all that they require to keep them in life. She was worshipped, with almost complete identity of character and image, over the whole of Lydia; and the Lydian Artemis presents such close analogies with the Phrygian Cybele, and with other feminine envisagements of the divine power in Asiatic countries, like the Cappadocian Ma, the Phœnician Astarte or Ashtaroth, the Syrian Atargatis and Mylitta, as to suggest that these are all mere varieties of one ultimate religious conception, presenting in different countries certain differences, due to varying development according to local circumstances and national character. The old hypothesis that this widespread similarity was due to Phœn. colonists, who carried their own goddess with them to new lands, is now discredited: there is no evidence that Phœnicians ever settled in the Cayster Valley, still less in other parts of Lydia.

The Ephesian goddess was represented by a rude idol, which was said to have fallen from heaven (Ac 19^{35} [*])—a tradition which attached to many sacred and rude old statues, such as that of Cybele at Pessinus (said to be merely a shapeless stone), Athena Polias on the Athenian Acropolis, etc. In the representation which is familiar to us from coins, statues, and statuettes, the goddess appears as a standing idol, in shape partly human; the upper part of the body in front is covered with rows of breasts (symbolizing her function as the nourishing mother of all life); the lower part is merely an upright block, without distinction of legs or feet, covered with symbols and figures of animals; the arms from below the elbows are extended on each side, and the hands are supported by props; the head is surmounted either by a lofty ornament, *polos*, or by a mural crown, and something like a heavy veil hangs on each side of the face down to the shoulders; the figure stands on a peculiarly shaped pedestal, generally low on coins, but sometimes high; frequently stags accompany the goddess, one on each side. A similar representation of the native goddess is found very widely both in Lydia and in Phrygia. The Gr. colonists in Ephesus identified this Oriental deity with their own Artemis, on account of certain analogies between them; they represented her on their coins in the Gr. character, and introduced some of the Gr. mythology of the twins Artemis and Apollo; but they never succeeded in really affecting the cultus, which remained always purely Asian and non-Greek. The chief priest bore the Persian title *Megabyzos*, and in earlier time he had to be a eunuch; but Strabo seems perhaps to imply that this condition was no longer required, when he was writing (about A.D. 19). Some authorities think that there was a body of Megabyzoi in the ritual; but Canon Hicks seems rightly to argue that the title was appropriated to the single chief priest, who represented the divine associate of the goddess, Attis or Atys, whom she herself mutilated. A large body of priestesses were under his authority, divided into three classes (Plutarch, *An seni sit per. resp.* p. 795, § 24), called Mellierai, Hierai, and Parierai; and according to Strabo they originally had to be virgins. Some authorities seem to apply the name Melissai, 'Bees,' to them; and the bee is the most characteristic type on earlier Gr. coins of Ephesus. A single priestess (ἱέρεια) is mentioned in inscriptions, who was probably the head of the cultus and representative of the goddess.

There was also a body of priests (some wrongly say a single high priest), to whom was given the title *Essenes*. The Essenes were appointed for a year only (Paus. viii. 13. 1); and they seem to have been officials at once of the city and of the sanctuary, for they allotted new citizens to their proper tribe and division, sacrificed to the goddess on behalf of the city, and seem in general to have guarded the relations between the State and the goddess. Various other bodies of ministers attended the sanctuary, such as the Kouretes, the Akrobatai, the Hieroi, whose nature and duties are obscure (the first two, perhaps, colleges similar to the modern dervishes, the last a Greek form of *hierodouloi*). There can be no doubt that the ritual was of an orgiastic type, and accompanied with ceremonial prostitution and other abominations: traces of the ritual and its accompaniments are collected in the works on Ephesus (which see); the Lydian ritual of the Mysteries, which are mentioned at Ephesus in inscriptions (Hicks, p. 147, *CIG* 3002; Strabo, p. 640), as well as in many other cities, is described in *Cities and Bishoprics of Phrygia* (Ramsay), i. p. 91 ff., and the general character of the religion in *Lyd. et le Monde Grec.* (Radet), p. 261 ff.

The epithets 'Queen of Ephesus' and 'great' or 'greatest' seem to have been specially appropriated to Artemis in Asia: so *CIG* 2963 c. τῆς μεγάλης θεᾶς Ἄ., 6797, Ἐφέσου ἄνασσα; Xen. *Eph.* i. 11. p. 15, τὴν μεγάλην Ἐφεσίων Ἄ.; Achilles, *Tat.* viii. 9. p. 501, ἡ Ἄ. ἡ μεγάλη θεος; Hicks, No. 481, l. 278, τῆς μεγίστης θεᾶς Ἄ. Further, the expression μεγάλη Ἄρτεμις seems to have been a formula of an invocatory character: see the inscriptions given in *Bulletin de Corresp. Hellénique*, 1880, p. 430, from Lesbos; and in Ramsay, *Hist. Geogr. of As. Min.* p. 410, from Pisidia (cf. μέγας Ἀπόλλων, *id. Cities and Bishoprics of Phrygia*, p. 151, No. 49, μεγάλη Ἄναιτις; *Mous. et Bibliotheca Smyrn*, No. νλζ′). It is therefore probable that the shouts of the excited crowd in the Ephesian theatre (Ac 19^{34}) were really invocations to the goddess, as her worshippers repeated a formula familiar in her ritual (see Ramsay, *Church in Rom. Emp.* p. 138 f.).

---

[*] In this place the rendering 'which fell down from Jupiter' (AV and RV) gives a wrong impression: the word διοπετοῦς merely indicates that the image was believed to have fallen from the clear sky. In Eurip. *Iph. T.* 977, 1384, οὐρανοῦ πέσημα is given as the equivalent and explanation of διοπετὲς ἄγαλμα.

The **Naoi** or **Shrines** of Artemis, which were made in silver by artisans such as Demetrius, and in other less expensive materials (esp. marble and terra-cotta) by 'the workmen of like occupation' (τοὺς περὶ τὰ τοιαῦτα ἐργάτας, Ac 19^{25}), were first correctly explained by Prof. E. Curtius (*Athen. Mittheil. d. Instituts*, ii. p. 49 f.). They were not mere statuettes of the Ephesian Diana,* for such could not be called 'shrines.' The worshippers of the goddess dedicated to her representations of herself in her shrine: 'a great city erected a great temple with a colossal statue of the goddess; private individuals propitiated her with miniature shrines containing embodiments of her living presence. The vast temple and the tiny terra-cotta shrine were equally acceptable to Artemis; she accepted from her votaries offerings according to their means; she dwelt neither in the temple nor in the terra-cotta shrine; she lived in the life of nature; mother of all, and nurse of all, she was most really present wherever the unrestrained life of nature was most freely manifested: in the woods, on the mountains, among the wild beasts. Her worshippers expressed their devotion, and their belief in her omnipresence, by offering shrines to her, and doubtless by keeping shrines of the same kind in their own homes, certainly also by placing such shrines in graves beside the corpse, as a sign that the dead had gone back to the mother who bore them' (*Church in Rom. Emp.* p. 125 f.). These small dedicatory shrines were not modelled after the splendid Gr. temple of Artemis; for the creations of Gr. art in sculpture and architecture, beautiful as they were, were never so holy in the estimation of devotees as the simple and rude types of primitive art and religion. The type most familiar to us from extant remains shows the goddess seated in a niche or naiskos, sometimes alone, sometimes accompanied by one or two figures (among them her favourite Atys). In the ruder examples, she sits in stiff fashion, holding in one hand the tambourine (τύμπανον), in the other a cup (φιάλη). Beside her are one or two lions. In some more artistic examples, she has laid aside the stiff symbols, and sometimes caresses with one hand the lion which climbs to her knee or lies in her lap. Sometimes the lion serves her as a footstool; in other cases two sit in stiff symmetry, one on each side of her throne. Works of this class are found very widely both at Ephesus and elsewhere, in marble and in terra-cotta; the examples in marble are usually marked by inscriptions as dedicatory; no examples in silver have been preserved, but naturally their intrinsic value led to their being melted down. The precise relation between this type and the Lydian type already described (commonly designated, wherever found, as the Eph. Artemis) has not yet been determined. It is highly probable that the whole class of sacred dedicatory objects fabricated by the artisans for use in the cultus of Artemis were designated by the generic term *naoi*, taken from the most common and characteristic type.

LITERATURE.—See under EPHESUS.

W. M. RAMSAY.

DIBLAH (דִּבְלָה), Ezk 6^{14}.—Four MSS read Riblah (which is accepted by Cheyne, Davidson, Hitzig, Smend, Cornill, Siegfried-Stade, and *Oxf. Heb. Lex.*). It was near a wilderness, and this would suit for Riblah. It has also been supposed to be Beth-Diblathaim. There is a village in Upper Galilee called *Dibl*. See *SWP* vol. i. sh. iii.

C. R. CONDER.

DIBLAIM (דִּבְלַיִם, Διβηλαίμ), the father of Gomer, Hosea's wife. See GOMER, HOSEA.

DIBON.—**1.** (דִּיבוֹן in MT, but the spelling דיבן of the Moabite Stone and Δαιβών of LXX indicate that the י had a consonantal value; see Driver, *Notes on Heb. Text of Samuel*, lxxxix.). A city east of the Dead Sea and north of the Arnon in the land which, before the coming of the Israelites, Sihon, king of the Amorites, had taken from a former king of Moab (Nu 21$^{26. 30}$). The Israelites dispossessed Sihon, and the territory was assigned to Reuben (Jos 13$^{9. 17}$), but the city Dibon is mentioned among those built (or rebuilt) by Gad (Nu 32$^{3. 34}$), hence the name **Dibon-gad** by which it is once called (Nu 33^{45}). The children of Israel were not able to retain possession of the land, and in the time of Isaiah Dibon is reckoned among the cities of Moab (Is 15). In Is 15^{9} **Dimon** is supposed to be a modified form of Dibon, adopted in order to resemble more closely the Hebrew word for blood (Dām), and support the play on words in that verse.

The modern name of the town is Dhibān, about half an hour N. of 'Ara'ir, which is on the edge of the Arnon Valley. It is a dreary and featureless ruin on two adjacent knolls, but has acquired notoriety in consequence of the discovery there of the Moabite Stone. See Tristram, *Land of Moab*, p. 132 f., Seetzen, *Reisen*, i. 400, and cf. MOAB.

2. A town in Judah inhabited in Nehemiah's time by some of the children of Judah (Neh 11^{25}). Perhaps it is the same as **Dimonah** (Jos 15^{22}) among the southernmost cities of Judah. If this identification be correct, it illustrates the passage Is 15^{9} referred to in (1).

Dibon-gad (Nu 33^{45} only); see above.

A. T. CHAPMAN.

DIBRI (דִּבְרִי).—A Danite, grandfather of the blasphemer who was stoned to death, Lv 24^{11}.

DIDRACHMA.—See MONEY.

DIDYMUS.—See THOMAS.

DIE.—To die by a specified form of death is a common expression; as Caxton (1477), *Jason*, 42: 'If I dye not of bodily deth I shal dye of spirituel deth'; and so Caxton, *G. de la Tour*, Gv v.: 'Your sone deyd this nyght of a good dethe.' Similar is the phrase Nu 16^{29} 'If these men die the common death of all men'; and 23^{10} 'Let me die the death of the righteous,' and other examples in which the prep. is omitted. But the expression 'die the death' is un-English, and is prob. everywhere due to a literal rendering of the Heb. idiom. It occurs Sir 14^{17} 'the covenant from the beginning is, Thou shalt die the death' (Gr. θανάτῳ ἀποθανῇ, from Gn 2^{17} 'thou shalt surely die,' Heb. מוֹת תָּמוּת, lit. 'dying thou shalt die,' LXX θανάτῳ ἀποθανεῖσθε); and Mt 15^{4} 'He that curseth father or mother, let him die the death' (Gr. θανάτῳ τελευτάτω, lit. 'let him end by death,' Vulg. *morte moriatur*, Cov. 'shal dye the death,' after whom Cran., Gen., Bish., AV, RV; but Rhem. 'dying let him dye'). The phrase 'die the death' is not uncommon in Shaks., and is generally interpreted as meaning 'die the death appointed for the particular offence'; but it is probably a reminiscence of the phrase in Mt,* and means 'let him assuredly die.' Thus *Mids. Night's Dream*, I. i. 65—

'Either to die the death, or to abjure
For ever the society of men.'

J. HASTINGS.

DIET (fr. Gr. δίαιτα, mode of life, through late Lat. *dieta*) is used in AV in the obsol. sense of 'an allowance of food,' Jer 52^{34} 'And for his [Jehoiachin's] diet, there was a continual diet given him' (אֲרֻחָתוֹ אֲרֻחַת תָּמִיד, RV 'allowance,' as AV in par. passage 2 K 25^{30}. In Pr 15^{17} the same Heb. is tr. 'dinner,' with 'portion' in RVm; in Jer 40^{5} 'victuals,' RVm 'an allowance'). The Eng. word is rare in this sense, and is not used in any previous version here. In the more usual sense it occurs Sir 30^{25} 'A cheerful and good heart will have a care of his meat and diet'; cf. Chaucer (*Prol.* 435)—

'Of his diet measurable was he,
For it was of no superfluitee,
But of greet norissing and digestible.'

J. HASTINGS.

DIKLAH (דִּקְלָה, Δεκλά).—The name of a son of Joktan (Gn 10^{27}, 1 Ch 1^{21}), probably representing a nation or community. The Aramaic name for the river Tigris (*Diḳlath*) is practically identical with this form, and hence the conjecture of Michaelis, that Diklah signified the dwellers on that river, is not wholly improbable; we know, however, of no community so called, and the home of such of the Joktanidæ as can be identified with certainty is in Arabia. The word *daḳal* (in Syr. *deḳla'*, 'palm') is well known in Arabic, and signifies dry dates of bad quality; as they possess no cohesive power, to 'scatter like *daḳal*' is a proverbial phrase. The geographer Yāḳūt knows of a place in Yemamah called *Daḳalah*, 'where there were palm trees,' of too little importance to be connected with the son of Joktan; moreover, the corresponding form in Hebrew should be Dĕkālāh rather than Diklah. The names immediately preceding and following Diklah give no clue to its identification. D. S. MARGOLIOUTH.

---

* Canon Hicks, *Expositor*, June 1890, p. 403 ff., takes a different view.

* Cf. *Macbeth*, IV. iii. 111: 'Died every day she lived,' a recollection, no doubt, of 1 Co 15^{31} 'I die daily.'

DILAN (דִּלְעָן), Jos 15^{38}.—A town of Judah in the same group with Lachish and Eglon. The site is unknown. C. R. CONDER.

DILIGENCE.—'Derived from *diligo*, to love, "diligence" reminds us that the secret of true industry in our work is love of that work' (Trench, *Study of Words*, p. 314). But as diligence has gradually forgotten the rock whence it was hewn, it has also lost some of its proper meaning. It is a synonym now for 'industry'; but formerly it was also a syn. for 'carefulness,' since our love of a work may express itself as readily in care or caution as in perseverance. Hence Wyclif's tr. of 1 Ti 3^5 'If ony man kan not gouerne his hous, how schal he haue diligence of the chirche of God'; and Coverdale's tr. of Pr 4^{23} 'Kepe thine hert with all diligence,' which is retained in AV and RV. Cf. Knox, *Historie*, 15: 'He declared what diligence the ancients took to try true miracles from false.' *Diligent* and *diligently* had the same range of meaning. Thus Job 42^5 Cov. 'I have geuen diligent eare unto the' (Gen., AV 'I have heard of thee by the hearing of the ear,' RV 'I had heard,' etc.—thus reversing Coverdale's meaning); AV 1611 Title, 'with the former Translations diligently compared and revised'; Shaks. *Tempest*, III. i. 42—

> 'The harmony of their tongues hath into bondage
> Brought my too diligent ear.'

J. HASTINGS.

DILL.—See ANISE.

DIMINISH.—To diminish is to make less, and that primary meaning is alone in use now. We do not even use the word figuratively, 'to lessen the influence of,' 'belittle,' as Ezk 5^{11} 'therefore will I also d. thee'; 29^{15} 'I will d. them, that they shall no more rule over the nations'; Is 21^{17} 'the mighty men . . . shall be diminished' (RV 'shall be few'); Ro 11^{12} 'if . . . the diminishing of them [be] the riches of the Gentiles' (τὸ ἥττημα αὐτῶν, RV 'their loss,' Sanday-Headlam 'their defeat'). Cf. Argument of Ep. to Heb. in Gen. NT: 'For seing the Spirit of God is the autor thereof, it diminisheth nothing the autoritie, althogh we knowe not with what penne he wrote it.' Still less can we speak of diminishing one thing from another, *i.e.* withdrawing or withholding, so as to *cause* diminution, as Dt 4^2 'Ye shall not add unto the word which I command you, neither shall ye d. ought from it'; Jer 26^2 'd. not a word' (RV 'keep not back'). So in Atkinson's tr. (1504) of *De Imitatione*, IV. ix.: 'Take from our hertis . . . all that may . . . dimynyshe vs from thy eternall loue.'

J. HASTINGS.

DIMNAH (דִּמְנָה).—A Levitical city in Zebulun, Jos 21^{35}. Dillmann, followed by Bennett in Haupt's *OT*, emends to רִמּוֹנָה, Rimmon (cf. 1 Ch 6^{22}, Jos 19^{13}). J. A. SELBIE.

DIMON, DIMONAH.—See DIBON.

DINAH (דִּינָה).—The daughter of Jacob by Leah (Gn 30^{21}). The composite and very obscure narrative of Gn 34 relates how, when Jacob was encamped at Shechem, after his return from Mesopotamia, she was seduced by Shechem the son of Hamor, a Hivite prince. This outrage was bitterly resented by her full brothers, Simeon and Levi. Shechem was ready to prove his attachment by marrying the maiden, and offered to pay any marriage price or dowry that might be fixed by her family. To this her brothers consented, but only on condition that all the men of Shechem should be circumcised. This being conceded, her brothers made it the means of inflicting a barbarous revenge for their sister's dishonour, by killing all the men of the place on the third day, when the effects of the circumcision made them incapable of self-defence. Both at the time and on his death-bed, their father Jacob (according to J) spoke of this act with indignation and abhorrence (Gn 34^{30} 49^{5-7}). It was, however, approved by later Jewish fanatics (Jth 9^2). (For the tribal significance of Dinah and the historical incidents which may underlie the above narrative, see SIMEON). R. M. BOYD.

DINAITES (דִּינָיֵא, LXX Δειναῖοι, Ezr 4^9), a people settled in Samaria by Osnappar (*i.e.* probably Assurbanipal). They joined with the other Samaritans in denouncing the Jews to Artaxerxes. The Dinaites have been variously identified with the Da-ja-êni, a tribe of western Armenia, mentioned in inscriptions of Tiglath-pileser I. (Schrader); and with the inhabitants of Deinaver, a Median city (Ewald), or of Din-Sharru near Susa (Fried. Delitzsch). On account of the other peoples named in the same verse, the last view seems the most probable. See further Meyer, *Judenthum*, 39 f. H. A. WHITE.

DINHABAH (דִּנְהָבָה).—The capital city of king Bela in Edom (Gn 36^{32}=1 Ch 1^{43}). There is some doubt as to its identification. The name, which is accented so as to mean 'Give judgment' (Ball, *Genesis*, *ad loc.*), occurs in Palmyrene as *Danaba* or *Dahbâna* (רהבנא); cf. Δανάβη in Babylonia, and see Dillm. and Del. on Gn 36^{32}. It has been proposed by Neubauer (*Academy*, 1891, p. 260) to identify Dinhabah with *Tennib*. This is accepted by Tomkins (*ib.* p. 284), who further identifies Tennib with Thenib, E.N.E. from Heshbon, described in Tristram's *Moab*, p. 222. See further Hommel, *Anc. Heb. Tradition*, 223 n. J. A. SELBIE.

DINNER.—See FOOD.

DIONYSIA (Διονύσια, *Bacchanalia*, EV 'Feast of Bacchus'), 2 Mac 6^7.—A festival in honour of Dionysus. Dionysus is usually regarded as the god of the vine, but, as Frazer shows in the *Golden Bough*, he was a god of trees in general. As he comes before us in Greek worship, he is quite clearly a vegetation deity; but Jevons may be right in thinking that two cults have been combined,—that of the vegetation spirit and that of the wine-god Dionysus, the latter lending its name to the former, which at first was naturally nameless. The character of the god is to be determined, not from the myths told about him, which are tales invented to explain the ritual, but from the ritual itself, interpreted through comparison with parallel rites among other peoples. The festival was intended to celebrate the revival of vegetation in spring after the long sleep of winter. Not only to celebrate it, however, but by sympathetic magic to secure the fertility of the fields. This imitation of the processes of nature was associated with the wildest orgies and excesses, stimulated no doubt, in this instance, by the connexion of Dionysus with the vine. Jevons gives a reconstruction of the festival as it was held at Thebes and other places. A branch, or something else representing the vegetation spirit, was carried round the cultivated fields, to secure his blessing on the crops. A human figure, also representing this spirit, was fastened to the top of a tree trunk, which had been felled and prepared for the purpose. This was hoisted up and then pelted till it fell. The women then tore it in pieces, and the woman who got the head raced with it to the temple or chief house and nailed it to the door. But in many cases the rites were much more savage, and bulls or goats, which represented the god himself, were torn to pieces by the worshippers in a mad scramble to possess themselves of portions of the flesh, and even human beings suffered at times in this way. The flesh was taken home and some of it buried in the fields. (For parallels to this custom of killing the god the *Golden Bough* should be consulted. It secured a certain communion with the deity, the preservation of his vigour through the death of his temporary representative and his re-incarnation in a fresh life, and the fertility of the land in which the flesh was buried). The most famous festivals of Dionysus were held in Attica. Besides the *Anthesteria* and *Lenæa* there were two, known as the Lesser and the Greater Dionysia. The former was held in country districts in December, and was a vintage festival, accompanied by dancing, songs, improvised dramatic performances, and a procession, in which the phallus was borne. The utmost licence of speech and conduct characterized it. The Greater Dionysia were held in the city, and were chiefly important from the fact that at them the great dramas of the tragic and comic poets were produced. Before the dramatic performances there was a great public procession of worshippers, wearing masks and singing the dithyramb, in which an image of Dionysus was carried from one temple to another. This was followed by a chorus of boys. According to 2 Mac 6[7] Antiochus compelled the Jews, when the feast of Dionysia (RVm) came, to go in procession in honour of Dionysus, wearing wreaths of ivy. The ivy was specially sacred to the god. See further under DIONYSUS. A. S. PEAKE.

DIONYSIUS.—Dionysius, designated the Areopagite (ὁ Ἀρειοπαγίτης), is mentioned as one of the few converts made by St. Paul at Athens (Ac 17[34]). He is probably thus specially named as having been a member of the Council of Areopagus (see AREOPAGUS). Nothing further is known of him. It has been suggested that St. Luke, who apparently was not at Athens, may have owed to Dionysius his report of the speech on Mars' hill. According to Dionysius of Corinth (in Euseb. *HE* iii. 4) he became the first bishop of the church at Athens; according to one account (Niceph. *HE* iii. 11) he suffered martyrdom at Athens under Domitian; according to another (*Martyr. Rom.*), having come to Rome, he was sent by Clemens I. (about 95) to Paris, and there beheaded on the Martyrs' Mount (*Montmartre*); and no small controversy has arisen in France over his title to be regarded as St. Denys, the patron saint of France. Various mystical writings, circulated in the Middle Ages under his name, are still extant; but they have long been regarded as non-genuine, and are now generally supposed to have been put into circulation about the 5th century. WILLIAM P. DICKSON.

DIONYSUS (Bacchus).—A Greek god, in whose worship there are three distinct strata. The first consists of those rites with which spirits of vegetation (originally probably plant-totems) are worshipped by all primitive peoples, in the new world as well as the old, who possess any cultivated plants. This stratum is probably not older than the separation of the European from the other members of the Aryan family, for it was only after that separation that the Aryans began to domesticate plants. The next consists in the worship associated with the cultivation of the vine: this originated where, according to the most recent researches, the vine was first cultivated by the European branch of the Aryans, viz. in Thrace. The process of syncretism by which these rites were amalgamated with those of the vegetation-spirit was not completed, if indeed it had begun, in the time of Homer; for in the Homeric poems D. occurs as a god, but is not associated with the vine, except in passages generally admitted to be comparatively late interpolations. The third stratum belongs to the 7th cent. B.C., the period in which, among the E. nations conquered by the Assyrians and Babylonians, national calamity led men to look for assistance to a ritual more potent than that in daily use. This more potent ritual was found in the older and more awful forms of sacrifice which lingered on in connexion with out-of-the-way altars. To the form of worship thus revived, only those were admitted who were formally initiated into these 'mysteries.' From the East the institution of 'mysteries' spread to Greece; and the reason why it attached itself particularly to the worship of such deities as Demeter and Dionysus was that that worship was an evolved form of the rites (common to many Aryan and Semitic and other peoples) with which vegetation-spirits were originally worshipped. The resemblances which thus made possible the spread of 'mysteries' from the East to the West also facilitated that dissemination of the worship of Dionysus over the E., for which mythologists (*e.g.* Nonnus) accounted by the hypothesis of an E. campaign on the part of the god. It is in the readiness with which the worship of D. was received in many parts of Syria and Pal. that we find the explanation of the attempts or threats to establish the worship of D. amongst the Jews: it was presumed, *e.g.* by Nicanor (2 Mac 14[33]) and Antiochus Epiphanes (2 Mac 6[7]), that it would be acceptable to them as to other peoples, while Ptolemy Philopator, who branded the Jews with the ivy-leaf of Dionysus (3 Mac 2[29]), had an additional motive, in the fact that D. was the family God of the Ptolemies, for forcing his worship on them by a means analogous to that which many Hindoo sects adopt to symbolize their devotion to their particular god, and which has a further parallel in the common barbaric custom of tattooing the worshipper's body with the symbol of the god under whose protection and power he is. See further under DIONYSIA. F. B. JEVONS.

DIOSCORINTHIUS (Διὸς Κορινθίου [τετράδι καὶ εἰκάδι], *Dioscorus*, 2 Mac 11[21]). See TIME.

DIOSCURI (Διόσκουροι, RVm at Ac 28[11]; text, **The Twin Brothers**; AV, **Castor and Pollux**) are mentioned as giving their name to the ship in which St. Paul sailed from Melita to Puteoli, on his way to Rome. The D. in mythology were the sons of Zeus and Leda, and brothers of Helen. Castor was the horse-tamer, and Pollux the prince of boxers. For their brotherly affection they were placed in the sky as the constellation of the Twins (Gemini). They were worshipped from early times in Greece, ('Græcia Castoris memor' Hor. *Od.* iv. 5. 35), in Cyrene in Africa (Pind. *Pyth.* v.), not far from Alexandria, in Southern Italy, and enjoyed especial honour at Rome on account of their supernatural appearance at the battle of Lake Regillus. Their image was printed on the reverse of the earliest silver coins of the Romans (*denarii*) as that of two youths on horseback. They were, however, best known as the tutelary gods of sailors, who identified their presence with the pale blue flame or light seen in thundery weather at the mast-head. They are thus mentioned Hor. *Od.* i. 3. 2: 'Sic fratres Helenæ *lucida* sidera'; also *Od.* iii. 29. 64: 'tutum feret geminus Pollux'; also *Catull.* iv. 27 and lxviii. 65; and Eurip. *Helen.* 1663–65. It was a common practice to put, as a παράσημον (Ac 28^{11}) or *insigne*, some device for a figure-head to a ship, in imitation of the person or object (not always complimentary, Virg. *Æn.* x. 188) after which the vessel was named. See Virg. *Æn.* v. 116, 'Mnestheus agit Pristin'; *Æn.* x. 166, 195, 209, 'Hunc vehit immanis Triton,' etc. This figure-head was to be distinguished from the *tutela* (Ov. *Trist.* i. 10. 1), 'tutela Minervæ,' or image of the protecting genius, under which the ship sailed, placed generally in the stern of the vessel. In later times the distinction appears to have been effaced, and, in the vessel which carried St. Paul, the Dioscuri were probably intended for the 'tutela' as well as the 'insigne,' and their heads were probably fastened, one on each side, in front.

LITERATURE.—Seyffart, *Dict. of Class. Antiq.* by Nettleship and Sandys; Rich, *Dict. of Antiq.*; Page, *Acts of the Apostles, in loc.*

C. H. PRICHARD.

DIOTREPHES (Διοτρεφής, WH-έφης).—A person, otherwise unknown, who is introduced in 3 John (vv.$^{9, 10}$) as ambitious, resisting the writer's authority, and standing in the way of the hospitable reception of brethren who visited the Church—probably travelling evangelists, such as are mentioned in the *Didaché*. It has been inferred by some that he was a presbyter or a deacon in the Church. It has also been supposed that he was in conflict with the Jewish-Christian party; or, on the other hand, that he was a teacher of false doctrine, Judaistic or Gnostic. But all is matter of conjecture. Others think that his action indicates an illegitimate assumption of authority over the Church, connected with the tendency to the establishment of a monarchical episcopate, which may have begun during the lifetime of St. John.

S. D. F. SALMOND.

DIPHATH (דִּיפַת) occurs in RV and AVm of 1 Ch 1^{6}, but it is practically certain that AV Riphath is the correct reading. By an easily explicable scribal error דִּיפַת has arisen from רִיפַת, the reading of MT in the parallel passage Gn 10^{3}. See RIPHATH.

J. A. SELBIE.

DISALLOW.—'Allow' is in AV either to 'approve' or 'accept' (see ALLOW); 'disallow' is always distinctly to 'reject.' So Nu 30$^{5\ bis.\ 8.\ 11}$ (הֵנִיא refuse, reject; see Ps 141^{5} RV); and 1 P 2$^{4.\ 7}$ (ἀποδοκιμάζω, RV 'reject'). So Latimer (*Serm. and Rem.*, 11), 'I must not suffer the devil to have the victory over me. I must disallow his instructions and suggestions.'

J. HASTINGS.

DISANNUL, which scarcely differs in meaning from 'annul,' the prefix being only intensive, is now going out of use. RV removes it only from Gal 3^{15}, giving 'make void' instead (Gr. ἀθετέω, of which the subst. ἀθέτησις is tr^{d} 'disannulling' He 7^{18} and retained by RV). Amer. RV prefers 'annul' in Job 40^{8}, Is 14^{27} 28^{18}. The use of the word in biblical English may be illustrated by Coverdale's tr^{n} of Is 14^{27} 'For yf the LORDE of hoostes determe a thing, who wyl dysanulle it?'; and Tindale's tr^{n} of He 8^{13} 'In that he sayth a new testament he hath abrogat (πεπαλαίωκεν) the olde. Now that which is disanulled (παλαιούμενον) and wexed olde, is redy to vannysche awaye.'

J. HASTINGS.

DISAPPOINT has a stronger meaning in AV than in mod. English, Job 5^{12} 'He disappointeth the devices of the crafty' (מֵפֵר, RV 'frustrateth,' as Is 44^{25} AV, RV; so Pr 15^{22}); Ps 17^{13} 'Arise, O Lord, d. him' (קַדְּמָה פָנָיו, RV 'confront him,' RVm 'forestall him,' Cheyne 'intercept him'); Jth 16^{6} 'the Almighty Lord hath disappointed them by the hand of a woman' (ἠθέτησεν αὐτούς, RV 'brought them to nought': see under DISANNUL). Cf. Hall, *Hard Texts* (1633), 311: 'All those curious and wealthy Trades . . . shall be utterly undone and disappointed.'

J. HASTINGS.

DISCERN.—To discern (Lat. *dis* apart, *cernere* separate) is to separate things so as to distinguish them, as Coverdale, *Erasm. Par.* 1 *Jn*, p. 48: 'It is not the sacramentes that discerne the children of God from the children of the devyll; but the puritie of lyfe and charitie.' So Ezr 3^{13} 'the people could not discern the noise of the shout of joy from the noise of the weeping.'

To discern a person or thing is therefore, in biblical lang., to separate out from others, so as to recognize, as Gn 27^{23} 'he discerned him not, because his hands were hairy, as his brother Esau's hands'; He 4^{12} 'the word of God . . . is a discerner of the thoughts and intents of the heart' (κριτικός, RV 'quick to discern'); 1 Co 11^{29} 'not discerning the Lord's body' (μὴ διακρίνων τὸ σῶμα τοῦ Κυρίου; Vulg. *non dijudicans corpus Domini*; Calvin, *non discernens*; Wyc. 'not wiseli demynge'; Luther, *dass er nicht unterscheidet*; Tind. 'because he maketh no difference of'; so Cov., Cran., Gen. 1557; but Gen. 1560, 'because he discerneth not,' with marg. note, 'But as though these holie mysteries of the Lordes bodie and blood were commune meats, so without reverence he commeth unto them'; so Tomson; Bisb. 'making no difference of'; Rhem. 'not discerning the body of our Lord'; whence AV; but RV 'if he discern not the body'—omitting τοῦ Κυρίου with edd.

J. HASTINGS.

DISCIPLE.—This word—in Greek μαθητής; fem. μαθήτρια (occurring only Ac 9^{36}); verb, μαθητεύω (occurring four times)—is in sacred literature confined to the Gospels and the Acts, though it often appears in Attic Greek (esp. Plato) as denoting the *pupil* of a philosopher or rhetorician, in contradistinction to the *master*, διδάσκαλος (just as in NT, Mt 10^{24}), or to the *discoverer*, εὑρετής. We have a similar contrast in OT, *e.g.* 1 Ch 25^{8} τελείων καὶ μανθανόντων, *the perfect and the learning* (AV and RV, *the teacher* and *the scholar*), referring to the senior and junior members of David's trained musical guilds. Likewise, in the case of the prophetic guilds superintended by Samuel and more fully organized by Elijah and Elisha, in order that by spiritual force they might cherish the theocratic spirit among the people, and check the tendency to apostasy, the general 'company' is contrasted with him who 'stood as head over them' (1 S 19^{20}), and the 'sons,' 2 K 2^{7} (*i.e.* pupils; cf. Pr 4$^{1.\ 10}$, and *passim*) with him 'before' whom they 'sat,' 2 K 4^{38}, their *master* (κύριος), 2 K 6^{5}. [*Teacher*, διδάσκαλος, however, occurs in LXX only in connexion with heathen monarchs, and then but twice: Est 6^{1} (the teacher of Ahasuerus) and 2 Mac 1^{10} (the teacher of Ptolemy); and the phrase '*schools* of the prophets' (however truly it may represent facts) is 'a pure invention of the commentators' (Smith, *Prophets of Israel*, 85).] In Talmudic literature *talmîdê ḥăkhâmîm*, *pupils of the learned* (*i.e.* the scribes), is a frequently recurring phrase, and of these St. Paul was one when he was 'brought up at the feet of Gamaliel,' sitting, *i.e.* with the rest of the pupils, on the lower benches in front of him (Ac 22^{3}; cf. Mt 5^{1}).

The usage of the word in NT is very simple. We read of the disciples of John the Baptist (Mk 2^{18}), of the Pharisees (same place), of Moses, Jn 9^{28} (only by way of contrast to Jesus), but most of all of Jesus, to whose disciples, in fact, the subst. is almost entirely, and the verb entirely, limited. The word maintains its classical connotation of compliance with the instruction given: the *μαθητής* is not only a *pupil*, but an *adherent* (see Cremer, *Bib. Theol. Lex.*; cf. Xen. *Mem.* i. 6. 3, where *μαθηταὶ* are called the *μιμηταί*, *imitators*, of their διδάσκαλος; so Jn 8^{31}, '*If ye abide in my word, then are ye truly my disciples*,' cf. 15^{8}). Hence it is applied most esp. to the Twelve in all four Gospels, sometimes with δώδεκα and sometimes without; they are '*the* disciples,' Mt 10^{1} 12^{1}, Mk 8^{27}, Lk 8^{9}, Jn 3^{22}. Mt seems, indeed, to confine the plural to them (Weiss), unless 8^{21} and 5^{1} be exceptions. When it denotes the wider circle, as in Lk (particularly 6^{13} 7^{11}), it has the same sense of adherence. Hence it stands, occasionally in Gospels (Mt 10^{42}, taken with 18^{6}) and invariably in Ac, as a synonym for *πιστεύων*, *a believer* (cf. Aristot. Περὶ σοφ. ἐλεγχ. 161^{b} 3—*δεῖ πιστεύειν τὸν μανθάνοντα*, *the learner is bound to have faith*), even where, as in Ac $19^{1.\ 4}$, the word is applied to half-instructed believers, who, while believing apparently in Jesus as greater than John the Baptist, were still (as it seems) not sure that Jesus was absolutely the Messiah, and that they had not to 'look for another' (Mt 11^{3}). So also, quite distinctly, with the verb *μαθητεύω* (three times in Mt, once in Ac), which is once intrans. (Mt 27^{57}), twice trans. (Mt 28^{19}, Ac 14^{21}), and once deponent (?) (Mt 13^{52}, where, in accordance with the usual dative construction, the phrase signifies *a disciple of the kingdom of heaven* personified). (See Meyer and Meyer-Weiss).

J. MASSIE.

DISCIPLINE.—'Discipline' is properly instruction, that which belongs to the *discipulus* or scholar, and is distinguished from 'doctrine,' which pertains to the *doctor* or teacher. In this sense Wyclif (1382) gives Pr 3^{4} 'Thou shalt finde grace and good discipline (1388 'teching') befor God and men'; and Chaucer (Skeat's Student's ed. p. 716), 'Thanne shaltow understonde, that bodily peyne stant in disciplyne or techinge, by word or by wrytinge, or in ensample.' But under the influence of the Vulg. and the Church, 'discipline' came early to be used for 'chastisement.' In Pr 3^{11} Wyc. has 'the discipline of the Lord, my sone, ne caste thou awey.' See CHASTISEMENT.

In AV whether 'discipline' means instruction or chastisement it is not easy always to decide. It occurs Job 36^{10} 'He openeth also their ear to d.' (*mûsâr*, RV 'instruction,' which the sense seems to demand; but the Heb. has nowhere else this meaning, and the whole passage is of chastening or moral discipline); Wis 1^{5} 6^{17} *bis*, Sir 4^{17} [-*ία*] 17^{18} 18^{14} $23^{2.\ 7}$ 32^{14} 41^{14}, Bar 4^{13} (all *παιδεία*, which in class. Greek means 'education' or its result, 'mental culture,' never 'chastisement,' but is used in LXX as the regular tr. of *mûsâr*, hence = chastisement there, and so in NT thrice, He $12^{5.\ 6.\ 8}$; see Kennedy, *Sources of N.T. Greek*, p. 101).

J. HASTINGS.

DISCOMFIT, DISCOMFITURE.—From *dis* apart, and *conficere* to put together, to 'discomfit' is to undo, destroy. Both words, now archaic if not obsolete, are always used in AV of defeat in battle, Is 31^{8} being a mistrans. for 'become liable to forced service.' Cf. More, *Utopia* (Rob. tr.), p. 140: 'if al their whole armie be discumfeted and overcum'; and Chaucer, *Knight's Tale*, 150—

> 'After the bataille and disconfiture.'

RV introduces 'discomfit' for 'destroy,' Ex 23^{27}, Ps 144^{6} (הָמַם), Dt 7^{23} (הוּם); for 'trouble,' Ex 14^{24} (הָמַם); and 'discomfiture,' Dt 7^{23}, 1 S 5^{9} (AV 'destruction'), Dt 28^{20} (AV 'vexation'), Is 22^{5} (AV 'trouble'), the Heb. being always מְהוּמָה *mĕhûmah*.

J. HASTINGS.

DISCOVER.—In mod. Eng. 'to discover' is 'to detect,' 'find out,' which is a late use of the word. The meanings in AV are: **1.** Uncover, lay bare (the primary sense, lit. 'to take off the cover,' Fr. *découvrir*), Ps 29^{9} 'The voice of the Lord . . . discovereth the forests' (חָשַׂף, RV 'strippeth bare': 'I do not understand this of stripping the foliage merely, but rather of the breaches and openings made by the lightning and the wind in the heart of the wood'—Earle, *Psalter of* 1539, p. 271); Ezk 16^{57} 'Before thy wickedness was discovered'; Hos 2^{10} 'now will I d. her lewdness in the sight of her lovers'; 7^{1} 'the iniquity of Ephraim was discovered'; Sir 1^{30} 'Exalt not thyself, lest thou fall . . . and so God d. thy secrets' (RV 'reveal'); 11^{27} 'his deeds shall be discovered' (RV 'the revelation of his deeds'). Cf. Knox, *Hist.* p. 182, 'Which God of his infinite goodness hath now discovered to the eyes of all that list to behold'; and p. 250, 'who rashly discovering himself in the Trenches, was shot in the head.' **2.** Withdraw (spoken of the cover itself, so as to uncover), Job 41^{13} 'who can d. the face of his garment?' (RV 'strip off his outer garment'—see Davidson *in loc.*); Is 22^{8} 'he discovered the covering of Judah' (RV 'took away'); Jer 13^{26} (= Nah 3^{5}) 'I will d. thy skirts upon thy face.' So Bacon, *New Atlantis*, 129: 'At the beginning he discovered the face of the deep, and brought forth dry land'; Chapman, *Hesiod*, i. 161—

> 'When the woman the unwieldy lid
> Had once discover'd, all the miseries hid
> . . . dispersed and flew
> About the world.'

3. Disclose or reveal, 1 S 14^{8} 'we will d. ourselves unto them'; 22^{6} 'when Saul heard that David was discovered' (נוֹדַע 'made known,' 'revealed'); Job 12^{22} 'He discovereth deep things out of darkness'; Pr 25^{9} 'd. not a secret to another' (RV 'disclose not the secret of another'); Sir 6^{9} 27^{16}, 1 Mac 7^{31} 'when he saw that his counsel was discovered' (*ἀπεκαλύφθη*, 'made known,' 'revealed,' not 'found out'); 2 Mac 6^{11} 'others, that had run together into caves near by, to keep the Sabbath secretly, being discovered to Philip, were all burnt together' (RV 'betrayed'). Cf. Bacon, *Essays*, p. 17: 'For Prosperity doth best discover Vice; But Adversity doth best discover Vertue'; and Shaks. *Merry Wives*, II. ii. 190—

> 'I shall discover a thing to you.'

4. Exhibit, display, as Blount (1600): 'The more he mounted, the more he discovered his incapacitie.' In AV Pr 18^{2} 'A fool hath no delight in understanding, but that his heart may d. itself' (RV 'reveal'). **5.** Descry, sight, Ac 21^{3} 'When we had discovered Cyprus, we left it on the left hand' (*ἀναφαίνω*, RV 'come in sight of'). **6.** Notice, Ac 27^{39} 'they discovered a certain creek' (*κατενόουν*, RV 'perceived').

J. HASTINGS.

DISCUS.—See GAMES. **DISEASE.**—See MEDICINE. **DISH.**—See FOOD.

DISHAN (דִּישָׁן).—A son of Seir, Gn $36^{21.\ 28.\ 30}$ = 1 Ch $1^{38.\ 42}$. In Gn 36^{26} the reading דִּישָׁן of MT should be emended to דִּישׁוֹן, after 1 Ch 1^{41}. See following article.

DISHON.—**1.** A son of Seir, דִּישׁוֹן Gn 36^{21} = דִּישׁוֹן 1 Ch 1^{38}. **2.** A son of Anah and grandson of Seir, דִּשֹׁן Gn 36^{25}, cf. v.^{30} = דִּישׁוֹן 1 Ch 1^{41}, which should also be read for MT דִּישָׁן in Gn 36^{26}. Dishan (see art. above) and Dishon are, of course, not individual names, but the eponyms of Horite clans. Their exact location is a matter of uncertainty. דִּישֹׁן occurs in Dt 14^{5} (only) as the name of a clean animal (LXX *πύγαργος*, AV and RV 'pygarg'), which is generally taken to be some species of gazelle or antelope. Tristram (*Nat. Hist. of Bible*, 127) identifies it with the *Antilope addax*; but Hommel (*Namen der Säugethiere*, 391), deriving the word from a root דושׁ = *spring*, *leap* (cf. Assyr. *daššu*), thinks of the mountain-goat. So also Delitzsch (*Assyr. Stud.* i. 54). The existence of such animal names amongst the Horites has been used by W. R. Smith as an argument in favour of totemism. See *Journal of Philology*, ix. 75 ff., *Kinship and Marriage in Early Arabia*, and *RS* (*passim*); and for the contrary opinion, Nöldeke in *ZDMG* (1886), 148–187. Cf. also Jacobs, *Studies in Bib. Archæol.* (1894), and Gray, *Heb. Prop. Names* (1896), p. 86 ff. J. A. SELBIE.

DISHONESTY in 2 Co 4^{2} is used in the obsolete sense of 'disgrace' (*αἰσχύνη*, RV 'shame,' after Wyc., Gen.; AV followed Rhemish NT; Tindale has 'unhonesty'). Cf. Coverdale's tr. of Ru 2^{15} 'Let her gather betwene the sheues also, and do her no dishonestye'; and of Sir 3^{11} 'Where the father is without honoure, it is the dishonesty of the sonne.' 'Dishonest' Sir 26^{24}, and 'dishonestly' 22^{4}, are used in the same sense. J. HASTINGS.

DISPATCH.—To 'dispatch business' is still in use, as in To 7^{8} 'let this business be dispatched,' 2 Mac 12^{18} 'before he had d. anything he departed.' But to 'd. a journey,' *i.e.* 'expedite,' is out of use; nor is any example given in *Oxf. Eng. Dict.*, 2 Mac 9^{4} being missed: 'Therefore commanded he his chariotman to drive without ceasing, and to dispatch the journey.'

To 'dispatch,' *i.e.* 'get rid of quickly' by death, is found Wis 11^{19}, and in Ezk 23^{47}, where RV gives 'despatch,' a spelling which is incorrect, and which was unknown till the beg. of the 19th cent. It seems to have arisen from Johnson having accidentally entered the word so in his Dict., though he himself always spells it 'dispatch.' See *Oxf. Eng. Dict. s.v.*

J. HASTINGS.

DISPERSION.—See ISRAEL.

DISPOSITION.—Ac 7^{53} 'Who have received the law by the d. of angels' (Gr. *εἰς διαταγὰς ἀγγέλων*; RV 'as it was ordained by angels'; RVm 'unto ordinances of angels,' cf. Ro 13^{2} *τοῦ θεοῦ διαταγῇ*, AV and RV 'the ordinance of God'). 'Disposition' is the Rhemish word here (Wyc., Tind., Gen. have 'ordinance'; Cov., Cran. 'ministration'), and it is used in the archaic sense of administration. In the same sense 'disposer' is used by Tind. in 1 Co 4^{1} 'Let men this wise esteeme us, even as the ministers of Christ, and disposers of the secretes of God' (EV 'stewards,' Gr. *οἰκονόμοι*); and by Gen. (1560) in 1 P 4^{10} 'Let eueric man as he hathe received the gifte, minister the same one to another, as good disposers of the manifolde grace of God' (EV 'stewards'). 'Disposing' in Pr 16^{33} 'The lot is cast into the lap; but the whole disposing thereof is of the Lord,' is used in the earlier sense of control, disposal; while the vb. 'dispose' in Job 34^{13} 37^{15}, 2 Es 5^{49} 8^{11}, Sir 16^{26} has the still earlier and primary meaning of 'arrange in proper order.' This primary meaning (as Lat. *disponere*) seems to be intended by 'disposition' in 2 Es 8^{38} (*plasma*) 8^{39} (*figmentum*), the Lat. words so tr. having ref. to the creation of man; but in Jth 8^{29}, Ad. Est 16^{6}, Sir 20^{26}, the word is used in the familiar sense of 'bent of mind,' 'character,' a sense which is found as early as 1387: Trevisa, *Higden*, iii. 113: 'Nought by chaungynge of body, but by chaungynge of disposicioun of wit and of semynge.'

J. HASTINGS.

DISPUTE, DISPUTATION.—As 'debate' has lost the meaning of wrangling, so 'dispute' has acquired it. In older Eng. to 'dispute' was to discuss or argue, without strife. Thus Bp. Carleton (1610), *Jurisd.* Pref., 'I have disputed the Kings right with a good conscience, from the rules of Gods word,' *i.e.* I have discussed it, argued *for* it: cf. Sir T. More, *Utopia*, p. 53, 'that they maye in everye matter despute and reason for the kynges right'; Knox, *Hist.* p. 25, 'after that Sir James Hamilton was beheaded (justly or unjustly we dispute not),' and p. 215 'He [Knox] did gravely dispute upon the nature of the blinde world.' So in AV, Job 23^{7} 'There the righteous might dispute with him' (נֹכָח, RV 'reason'); Mk 9^{33} 'What was it that ye disputed among yourselves by the way?' (*διαλογίζομαι*, RV 'were ye reasoning,' as $2^{6.8}$ AV); 9^{34} 'for by the way they had disputed among themselves who should be the greatest' (*διαλέγομαι*): RV keeps 'dispute' here, but the disciples' shame was not that they had wrangled, but that they had discussed such a question at all. The same Greek is similarly tr^{d} in AV of Ac 17^{17} (RV 'reasoned'), $19^{8.9}$ (RV 'reasoning'), 24^{12}, Jude ^{9} (so RV). The subst. *διαλογισμός* is once tr. 'disputing,' Ph 2^{14} AV, RV, 'Do all things without murmurings and disputings'; but even here Thayer prefers 'hesitation,' 'doubting,' Lightfoot 'inward questionings.' In Ac 6^{9} 9^{29} (*συζητέω*) the meaning is plainly 'discuss,' 'argue'; so 15^{7} (*συζήτησις*) and 1 Co 1^{20} (*συζητητής*). The only passage in which 'dispute' seems to have the meaning of 'wrangle' is 1 Ti 6^{5} 'Perverse disputings of men of corrupt minds' (TR *παραδιατριβαί*, edd. *διαπαρατριβαί*, RV 'wranglings'). Here Wyc. has 'fightyngis' and Rhem. 'conflictes' after Vulg. *conflictationes*, but Tind. and the rest 'disputations,' a word which never seems to signify 'altercation,' 'wrangling.' The Gr. word is found nowhere else.

'Disputation' occurs in AV, Ac 15^{2} (TR *συζήτησις*, edd. *ζήτησις*, RV 'questioning'), and Ro 14^{1} 'Him that is weak in the faith receive ye, but not to doubtful disputations' (*εἰς διακρίσεις διαλογισμῶν*; lit. 'unto discussions of doubts'; RVm 'for decisions of doubts'; see Sanday-Headlam *in loc.*). Bp. Bonner's injunction for the reading of the Bible (1541) ends thus: 'he is not to expound, nor to reade with a lowde voyce, and without disputacion,' where, as elsewhere, d. means 'discussion': the reader is neither to expound the meaning himself, nor to discuss it with others.

J. HASTINGS.

DISTAFF (פֶּלֶךְ).—This term occurs in AV only in Pr 31^{19}. The Hebrew word is found repeatedly in Neh 3, where it means 'part' or 'district' of the city, something 'cut off' or 'divided' from the rest. It is found also in 2 S 3^{29}, where it is rendered 'staff,' but prob. = *distaff* (see Driver's note). RV renders the word in Pr 31^{19} 'spindle,' for which it may no doubt be used; but if we may judge from the cognate Arab. word (*falkat*), it means the *whorl* of the spindle, a piece of wood or other material, of hemispherical form, through which the spindle-pin passes, and above which is the hook holding the thread. The design of this piece is to give steadiness to the circular motion of the spindle. This form of spindle is in common use among the women of Syria to-day.

H. PORTER.

DIVERS, DIVERSE.—'Divers' has now dropped out of use, or, if used archaically, is restricted to the sense of 'several.' But formerly 'divers' and 'diverse' were indifferent spellings of the same adj., which expressed either 'varied,' 'different' (Lat. *diversus*); or 'various,' 'several.' Thus Ridley, *A Brefe Declaration* (Moule's ed. p. 106): 'in the matter of thys Sacrament ther be diverse [=several] poyntes, wherein menne (counted to be learned) can not agree'; Grindal, *Letter to Q. Eliz.* (1577): 'divers [=different] men make divers senses of one sentence of Scripture.' In AV 1611 'diverse' occurs Lv 19^{19}, Est 3^{8}, Dn $7^{19.23.24}$, Mt 4^{24}; elsewhere 'divers.' The conjunction of 'divers' with 'sundry,' as in He 1^{1}, is common in old Eng., as in the Act authorizing Matthew's Bible (Hen. VIII. 1543): 'divers and sundrye his subjects of this his realme.' J. HASTINGS.

DIVES.—See LAZARUS.

DIVINATION has many different modes amongst the different peoples of the earth, but all are in their origin either natural or supernatural. Methods which originally were supernatural may come to lose their supernatural character; methods which were at first natural may come to be regarded as supernatural; and, from lack of evidence, it may be difficult or impossible to say with regard to any given method whether in its origin it was a natural or a supernatural method.

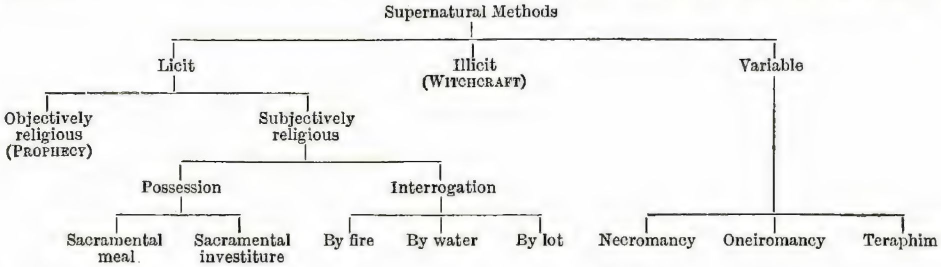
We shall begin with the supernatural methods as being those first suggested by the word 'divination,' and we shall define them as those by which man gains foreknowledge of the future from a supernatural source, *e.g.* by inspiration, possession, or direct interrogation of the divine will. These methods, the supernatural, again fall into two classes, the licit and the illicit, according as the supernatural source is or is not a god of the community. We may think what we will of the honesty of the priests of Apollo, and entertain what idea we like as to the way in which the oracle of Delphi or of Baal-zebub (2 K 1^{2-6}) was worked, but the worshipper of Apollo who consulted the oracle was doing what was approved of by the religious consciousness of his age and race (however low we rank it in the scale of religion): his action was licit. On the other hand, we may pity both the witch and the witch-finder of the time of James I. of England, but we cannot deny that witchcraft was considered, both by those who practised and those who persecuted it, to be irreligious: it was illicit. And the same distinction has prevailed over the world: savages, however low, distinguish in their way between the worship of their tribal gods and commerce with supernatural spirits who are no gods of theirs.

But before proceeding to inquire more closely into the licit modes of divination, *i.e.* those which are religious, we must notice that these, again, fall into two classes, viz. those which are objectively religious and those which are only subjectively religious. That is objectively right, true, or religious which is so, whether a man thinks it so or not; that is subjectively right, true, or religious which is honestly believed to be so, whether it really is so or not. All peoples of the earth have honestly believed that their gods communicated supernatural foresight to certain favoured men, and so divine inspiration or possession is a subjectively religious method of divination. When and where the belief is not merely subjectively but also objectively true, the divine inspiration takes the form, not of 'divination,' but of PROPHECY (which see). In this article the only side of inspiration we have to deal with is the subjectively religious — without prejudice to the question whether any given example is or is not, as it is honestly believed to be, really divine.

Amongst this class of diviners we must place the sacred scribes of Gn 41^{8} and the 'magicians' of Ex 7^{11}, as also the Sibyl of Virgil or the Pythia of Delphi, and the inspired priests or 'divine kings' of savages all over the world. All are believed by themselves and their fellow-worshippers to be inspired by one of their respective national or tribal gods; and in all cases possession or inspiration is conditioned by some kind of sacrament or communion. That communion may take the form either of a sacramental meal or of a sacramental investiture. The worshipper may partake of the substance of the animal or plant in the shape of which his deity habitually manifests himself, and which is sacrificed to the deity: thus the priestess of Apollo Diradiotes at Argos and the priestess of Earth at Aegira became inspired by drinking the blood of the animals offered to those deities respectively; the Bacchæ of Dionysus obtained inspiration by tasting the blood of the grape, sacred to that god; the Pythia, by eating the leaves of Apollo's sacred plant, the laurel. Or the worshipper may be (like the idol of the god) clad in the skin or smeared with the blood or fat of the animal, or the juice or oil of the plant, which is the corporate manifestation of the deity, or be robed in the insignia of the god, and so be 'invested' by the power of the divinity. Possession, then (whether by means of the sacred meal or of sacramental investiture), is one of the licit and subjectively religious ways in which foreknowledge of the future may be derived from a supernatural source. It is the way peculiarly appropriate to gods which manifest themselves in animal or vegetable form. But it is not the only way: there are deities of earth, air, fire, and water, who may or must be interrogated in another way. In one cult a draught of a sacred stream may have the same effect as a draught of sacred blood in producing inspiration; but in another cult the deity of the stream may be consulted by casting offerings into the sacred waters, and inferring that the prayer made at the time will or will not be granted, according as the offering is or is not accepted by the sacred waters. And the ordeal by fire is based on the same principle as this ordeal by water. Divination by a bowl or cup of sacred water (Gn 44^{5}), again, has the same origin. The leaves of a sacred tree may be eaten to produce inspiration, but their voice in the wind may speak directly to the worshipper, as did the rustling of the leaves of the sacred oaks of Dodona. Or the branches and twigs themselves, being of the substance of the divinity, may be made to give indications of the divine will: our word 'lot,' like the Gr. κλῆρος, originally meant simply 'a twig.' See LOT. Rhabdomancy or xylomancy (Hos 4^{12}) and belomancy (Ezk 21^{21}) are but forms of divining by the aid of a tree-god. Still more, when a deity habitually manifests himself in animal form, may the inward disposition of the deity be augured by the sacrificing priest, according as the entrails of the victim have or have not anything extraordinary in their appearance (Ezk 21^{21}). In the same way and for the same reason the flight of a sacred bird may be 'auspicious' or 'inauspicious' (Ps 58^{5}, 2 K 17^{17} 21^{6}).

The illicit or irreligious forms of divination need not detain us long. They are those in which the supernatural Being consulted is one who is not a god of the community, has no bond of loving-kindness with the community, and is accordingly regarded by it, not merely as a strange god, but as a malevolent and evil spirit. No man consults such a spirit except for purposes which the national gods, as being the guardians of the nation's interests and the national morality, cannot sanction. Commerce with such a spirit is anti-social as well as anti-religious; and the man who is guilty of it is a wizard (Lv 19^{3} 20^{6}), and has always been punished as a criminal all over the world by the peoples who believe in the possibility of such commerce.

Necromancy, consulting the spirits of the dead (Lv 19^{31}, Is 8^{19} 19^{3}), is a way of obtaining foreknowledge from a supernatural source which was illicit among the Jews (to whom ancestor-worship was forbidden), but licit amongst all other peoples. Consultation of the teraphim (Ezk 21^{21}, Zec 10^{2}) seems to have persisted amongst the Jews in spite of the fact that it was, strictly speaking, idolatrous: the teraphim were images (1 S 19^{13}), like the altar-stones of the Scandinavians and the clay or wooden idols of the Balonda and Barotse, which could be made to prophesy by smearing them with the blood of sacrifice. For oneiromancy see DREAMS. All we need here remark is that it is a form of divination which may be licit (Jg 7^{13}) or illicit (Dt $13^{2.3}$), according as the source of the dream is a divine or an evil spirit. We have now finished our account of the supernatural methods of divination, and may sum it up in tabular form as follows:—



We have now to consider the natural methods: they are, in a word, exploded science. The modern man of science makes forecasts of the future which are not supernatural, but strictly scientific. So, too, the savage and primitive man make forecasts (*e.g.* as to the rising and the setting of the sun and stars) which may not be exact but are certainly scientific, and which, even when wholly erroneous, are not supernatural or superstitious. The science of the savant has been evolved by slow and imperceptible degrees out of the science of the savage. The difference between them is, not that the savant uses methods of observation and experiment unknown to the savage,—for the savage employs all four of the Inductive Methods,—but that the savage, when he goes wrong (which he does not do always, else he would speedily perish), does so because he has not yet learned the limits within which the method or logical conception is valid. Thus he observes that in many cases the effect resembles the cause: fire causes fire; to make a thing moist, or to make it move, you must impart moisture or movement to it; and he jumps to the conclusion that in all cases 'like produces like.' Thus he becomes armed with a very simple and ready means of forecasting the future: the effect of anything which strikingly arrests his attention will resemble the cause—a fiery comet will be followed by conflagrations, the mention of the name of what is evil will be followed by the appearance of the evil thing, that which moves as the sun moves (*i.e.* E., S., W., N., 'clock-wise') will follow the same glorious and beneficent course as the sun, and so on. In the same way the savage unduly extends the sphere of the Inductive Method which is known as the Method of Concomitant Variations: according to that method, things which vary together are causally related to one another. Thus the movement of the great tidal wave varies with the movement of the moon round the earth, and it is therefore inferred that the motion of the moon causes the movement of the tides. But the savage jumps to the conclusion that all things which are related together (according to *his* notion of relation) vary together and are cause and effect, the one of the other. A footprint and the foot which makes it vary together, and what affects the one affects the other, and therefore a knife stuck in a footprint will cause a wound in the foot. And so, if you can observe one of two things which are thus related to each other, you can, by watching the changes in it, tell what changes are going on in the other: a lock of a person's hair will inform you by the changes in its condition of the changes in the fortunes of the person from whose head it was cut. In making these and similar primitive forecasts the savage is but acting on the same theory of causation, and employing the same methods of induction, as he uses, *e.g.*, in judging as to the probable behaviour of the animal he is hunting. In a word, at first, and until he finds out their incorrectness, they are to him just as scientific as the rest of his stock of acquired and inherited knowledge; and consequently it would be as erroneous to call them 'divination' as it would be to apply that term to the predictions in the *Nautical Almanac*. But as these primitive modes of forecasting the future come to be discarded, with the advance of knowledge, as erroneous and unscientific, their character also changes. They still continue to be practised in holes and corners not yet illumined by the rising sun of science; they are known to be wholly unscientific, and yet the ignorant to whom they have descended believe in them more sincerely than in the science which they do not comprehend. The exploded science of primitive times becomes the divination of a later age. It is then literally a 'superstition,' something which 'stands over' and survives into a period and environment with which it is wholly incongruous. Finally, a deeper shade than that cast by mere ignorance is frequently imparted to the character of this antiquated science because it is practised by the same persons who give themselves up to the illicit and irreligious forms of divination described above. See also EXORCISM, MAGIC, SOOTHSAYING.

LITERATURE.—A. Bouché Leclerq, *Histoire de la divination dans l'antiquité*; W. R. Smith, *RS*, 246, 407, 427; F. B. Jevons, *Introd. to Hist. of Religion*; Driver on Dt $18^{10ff.}$.

F. B. JEVONS.

DIVORCE.—See MARRIAGE.

DIZAHAB (דִּי־זָהָב; Καταχρύσεα; *ubi auri est plurimum*).—The name of a place mentioned in the obscure topographical notice Dt 1^1, which is intended apparently to define the locality in the 'steppes of Moab,' in which the Deuteronomic discourses were delivered, but several of the names in which resemble those of places passed by the Israelites in the previous stages of their wanderings. If it be the name of a place in the 'steppes of Moab,' the situation is unknown. Upon the supposition that it is the name of some previous camping-place of the Israelites, it has been identified by Burckhardt, *Syria* (1822), p. 523, Knobel, and others, with *Mina edh-Dhahab*, the third of seven boat-harbours between the Rās Muḥammad and 'Aḳaba, nearly due E. of Jebel Mûsa. Keil objects that this is too inaccessible on the side of Sinai for the Israelites to have made it one of their halting-places, and considers it to be the name of a place otherwise unknown in the desert of the wanderings. The same view is taken by Dillm. (who supposes the verse to have originally formed part of an itinerary of the Israelites). The form of the name is curious; the דִי suggests naturally the oblique case of ذُو *possessor of* (often in names of places); but it is not apparent how an Arabic ذو ذهب would become in Hebrew די־זהב, the ذ being represented differently in the two parts of the name. Jerome, in rendering 'ubi auri est *plurimum*,' probably thought of דֵּי, constr. of דַּי *enough*.

S. R. DRIVER.

DO.—Most of the forms and uses are familiar. But as to *form*, notice 'doeth' in the plu. Sir 35^{15} (AV 1611) 'Doeth not the teares run downe the widowes cheeks?' (mod. edd. 'do'). Cf. *Pr. Bk.* (1549) Com. Ser.: 'And whosoever willingly upon no just cause, doth absent themselves: or doth ungodly in the Parish church occupy themselves: . . . to be excommunicate'; and in the imperat. *Piers Plowman*, v. 44—

> 'That ye prechen to the peple · preue it on yowre-seluen,
> And doth it in dede · it shal drawe yow to good.'

As to *usage*, notice that 'do' is steadily losing its active and independent power. 1. We now prefer a stronger word like 'perform' in such phrases as 'do sacrifice,' Is 19^{21} 'the Egyptians . . . shall do sacrifice* and oblation' (RV 'shall worship with sac. and obl.'); or 'do a trespass' Nu 5^{6}; or 'do goodness' Nu 10^{32} (RV 'do good'); or 'do service' (Heb. לַעֲבֹד אֶת־עֲבֹדָה, lit. 'to serve the service'), a freq. phrase in Nu; cf. also Jn 16^{2} 'whosoever killeth you will think that he doeth God service' (λατρείαν προσφέρειν, RV 'offereth service unto God'). 2. 'Do' meaning to *act* is still in use, but scarcely as Ac 17^{7} 'these all do contrary to the decrees of Cæsar' (TR πράττουσι, edd. πράσσουσιν); Ph 2^{13} 'it is God which worketh in you both to will and to do of his good pleasure' (τὸ ἐνεργεῖν, RV 'to work'). 3. But 'do well' is good Eng. still, as Jn 11^{12} 'if he sleep, he shall do well' (σωθήσεται, Tindale 'he shall do well ynough,' and so Cov., Cran., Gen. 1557; but Wyc. 'he schal be saaf,' and so Gen. 1560, Tomson, Rheims; RV 'he will recover,' RVm 'be saved'). 4. To 'do,' meaning to 'fare,' is in use in the phrase 'how d'ye do?' but not as 2 S 11^{7} 'David demanded of him how Joab did and how the people did' (לִשְׁלוֹם יוֹאָב וְלִשְׁלוֹם הָעָם, lit. 'for the health of Joab and for the health of the people,' RV 'how Joab did and how the people fared'), so Est 2^{11}; Ac 15^{36} 'Let us go again and visit our brethren . . . and see how they do' (πῶς ἔχουσι, RV 'how they fare'); Eph 6^{21} 'that ye also may know my affairs and how I do' (τί πράσσω). 5. The phrase 'to have to do with' is still good idiomatic Eng., but notice the Greek Mt 8^{29} 'what have we to do with thee?' (τί ἡμῖν καὶ σοί; lit. 'what to us and to thee?' as Wyc. has it, after Vulg. *quid nobis et tibi?* the idiom of AV being Tindale's); He 4^{13} 'all things are naked and opened unto the eyes of him with whom we have to do' (πρὸς ὃν ἡμῖν ὁ λόγος, lit. as Wyc. 'to whom a word to us,' Vulg. *ad quem nobis sermo*, Tind. 'of whom we speake,' Gen. 1557 'with whome we have to do'). 6. As an auxiliary, 'do' is noted by the grammarians as (1) the vicegerent for any antecedent verb, Ac 7^{28} 'Wilt thou kill me, as thou diddest the Egyptian yesterday?' (in Gr. the vb. is repeated, ἀνελεῖν . . . ὃν τρόπον ἀνεῖλες, hence RV 'as thou killedst); (2) to express the tense, now used in negative sentences, as 'I do not know' and interrog. 'do you know?' but formerly in affirm. also, as Gn 22^{1} 'God did tempt Abraham.' This is a peculiarly Eng. idiom; but closely akin to it is another, which is older, and is common to French, but now quite obsolete. As Fr. has *faire savoir* 'cause to know,' so Eng. had 'I do you to know' with the same meaning. Thus North, *Plutarch*, p. 561: 'I do thee to understand that I had rather excell others in excellency of knowledge than in greatness of power'; Chaucer, *Troilus*, ii. 1022—

> 'And we shal speke of thee somwhat, I trowe,
> When thou art goon, to do thine eres glowe!'

In Malory's *King Arthur* we read: 'And so they looked upon him and felt his pulse, to wit (*i.e.* to know) whether there were any life in him. In the name of God, said an old man. For I do you verily to wit he is not dead.' That is, 'I cause you to know,' mod. Eng. 'I would have you know.' This phrase is found in AV, 2 Co 8^{1} 'we do you to wit of the grace of God bestowed on the churches of Macedonia' (γνωρίζομεν ὑμῖν, RV 'we make known to you,' which was Wyclif's tr.; 'do you to wit' came from Tindale; Rheims has 'we doe you to understand'). The Eng. auxiliary and this form are sometimes found together; an interesting example being in Caxton's *Game of the Chesse* (1474), Pref.: 'I delybered in myself to translate it in to our maternal tonge. And whan I so had achyeued [achieved] the sayd translacion, I dyde doo set in enprynte [I caused to be printed] a certyn nombre of theym, Which anone were depesshed and solde.' 7. Lastly, notice the phrase 'do away,' Nu 27^{4} 'Why should the name of our father be done away from among his family, because he hath no son?' (יִגָּרַע, RV 'be taken away'); 1 Ch 21^{8} 'I beseech thee, do away the iniquity of thy servant' (הַעֲבֶר־נָא, RV 'put away'); 1 Co 13^{10}, 2 Co $3^{7.\,11.\,14}$ (all καταργέω='render inoperative,' a peculiarly Pauline word; St. Paul uses it 25 times, elsewhere in NT Lk 13^{7}, He 2^{14} only; RV in 2 Co $3^{7.\,11}$ 'pass away'). Cf. Wyclif's tr. of He 10^{9} 'he doith awei thi first, that he make stidfast the secunde,' and of 12^{1} 'do we aweie al charge and synne.' J. HASTINGS.

DOCTOR, DOCTRINE.—Doctor is used in the old Eng. sense of 'teacher' in Lk 2^{46} (διδάσκαλος); and 'doctor of the law' for 'teacher of the law' in Lk 5^{17}, Ac 5^{34} (νομοδιδάσκαλος). Cf. *Melvill's Diary* (Wodrow, p. 95), 'to the Doctor is giffen the word of knawlage, to open upe, be simple doctrine, the mysteries of fathe.' So Bacon (*Essays*, p. 9) calls St. Paul 'the Doctor of the Gentiles,' and Latimer (*Works*, i. 430) calls the devil 'that old Doctor,' and this is the use in Pope's lines—

> 'Who shall decide, when doctors disagree,
> And soundest casuists doubt, like you and me?'
> *Ep. to Ld. Bathurst*, i. 1.

See under SCRIBE. **Doctrine** (see next art.) is similarly used for 'teaching' in Dt 32^{2}, Job 11^{4}, Pr 4^{2}, Is 29^{24} (all לֶקַח, lit. 'something received,' elsewhere only Pr 1^{5} 4^{2} 9^{9} $16^{21.\,23}$); Is 28^{9} (שְׁמוּעָה, lit. 'something heard,' RV 'message,' RVm 'report'); Jer 10^{8} (מוּסַר, really 'discipline,' RV 'instruction'); 1 Es 5^{40} (δήλωσις), Sir 16^{25} $24^{27.\,32}$ (παιδεία), 24^{33} (διδασκαλία); and freq. in NT for Gr. διδασκαλία. Still more freq. for 'the process of teaching,' 'instruction' (διδαχή), as Ac 2^{42} 'they continued stedfastly in the apostles' doctrine and fellowship.' Cf. Chaucer, *Non. Preest. Tale*, 622—

> 'For seint Paul seith, that al that writen is,
> To our doctryne it is y-write, y-wis.'

J. HASTINGS.

DOCTRINE, etymologically regarded, signifies the work of a *doctor* or teacher, from *doceo*, to teach; hence it denotes sometimes the act of teaching, sometimes the substance or matter of that which is taught. It may also be theoretical or practical, refer, that is, to either truth or duty—that which is to be believed, or that which is to be done.

On the theoretical side, doctrine may be compared with, and distinguished from, dogma or tenet. Dogma and doctrine, especially in the plural, are often identified, but the latter is really a wider conception than the former. It differs from it in two respects—a doctrine is less formal, less of a scientific construction than a dogma, and there is implied in the latter a reference to some religious community on whose authority it is maintained. By some the distinction is thus stated: 'Doctrine summarizes the statements of Scripture on a particular point, adding and diminishing nothing; dogma formulates the principles and relations involved in the doctrine, and the inferences following from it. Every dogma, therefore, is of the nature of a theory, giving the *rationale* of the facts.' The word dogma does not occur in EV nor in the original, except in the sense of a 'decree' or 'ordinance' (Lk 2[1], Ac 16[4] 17[7], Eph 2[15], Col 2[14], He 11[23] [Lachm. *δόγμα*, but TR and WH *διάταγμα*]). The modern meaning of the word is foreign to the sacred book. On its practical side, doctrine is almost synonymous with *precept* or *principle*.

---

* Cf. Shaks. *Jul. Cæs.* II. ii. 5: 'Go bid the priests do present sacrifice.'

In OT, doctrine occurs chiefly as tr. of לֶקַח (mostly in Wisdom literature) 'that which is received' (Dt 32[2], Job 11[4], Pr 4[2], Is 29[24]); it appears once only in each case as trⁿ of מוּסָר 'discipline' (Jer 10[8]), and שְׁמוּעָה 'that which is heard' (Is 28[9], RV 'message'). In Apocr. there are several occurrences of the word. It appears in Sir as tr. of *παιδεία*, as when 16[25] the writer says: 'I will show forth doctrine in weight' (RV 'instruction by weight'), that is, as is made apparent by the parallel clause, 'with exactness.' In 1 Es 5[40] 'doctrine and truth' appear for the Gr. *δήλωσις καὶ ἀλήθεια*, which in their turn represent the אוּרִים וְתֻמִּים, Urim and Thummim—'Lights and Perfections (?)' of the parallel passage Neh 7[65]. In NT, with one exception (He 6[1], where for AV 'the principles of the doctrine of Christ' RV reads 'the first principles of Christ'), doctrine is employed to represent either *διδαχή* or *διδασκαλία*, both of which words are used in active and passive sense, the active being predominant in the case of *διδασκαλία*, the passive in that of *διδαχή*. 'The latter emphasizes the authority, the former the act' (Cremer; but see Hort, *Chr. Ecclesia*, 191). Both words are employed in an absolute way for 'the teaching' (*διδαχή* in Tit 1[9], 2 Jn [9] RV; *διδασκαλία* in 1 Ti 4[16] 6[1], Tit 2[7]). It is worth noting that out of 21 occurrences of *διδασκαλία* in NT, no fewer than 15 are in the Pastoral Epistles. RV has almost uniformly substituted 'teaching' for doctrine as tr. of *διδαχή*, but has only occasionally made the same substitution in the case of *διδασκαλία*. In only one instance has it introduced the word doctrine when it does not appear in AV, viz. in 1 Ti 6[3] where it reads 'If any man teacheth a different doctrine,' for AV 'If any man teach otherwise.'

The intimate relation between doctrine and practice, between right thoughts and right action, is fully and constantly recognized in Scripture. The warnings against false doctrine and its evil effects are numerous (1 Ti 1[10] 4[1], Tit 2[1], He 13[9], 2 Jn [9] etc.). Christ's hearers were astonished at His doctrine (Mk 1[22]) not less than at His wonderful works; while, on the other hand, He Himself indicated that His doctrine is only to be truly known through obedience (Jn 7[17]). The forms of teaching characteristic of the Bible as a whole, as well as of its individual writers, will fall to be considered in the article THEOLOGY.

A. STEWART.

DODAI.—See DODO.

DODANIM (דֹּדָנִים, LXX Ῥόδιοι, Gn 10[4]).—Fourth son of Javan (Ionians, Greeks), and therefore undoubtedly intended to designate a Gr. tribe or colony. There can be no connexion, beyond an accidental similarity in sound, with the inland town of Dodona in Epirus. Nor can it mean Dardanians, as Delitzsch still maintains, for the Trojan province of Dardania was never of such consequence as to give its name to a leading family in the genealogy of mankind. Dillmann and others are inclined to accept the reading of the LXX (which is also that of the Samaritan translation of the Pent. and of Jerome, as well as the MT of 1 Ch 1[7]), and identify the Dodanim with the Rhodians or the inhabitants of the islands of the Ægean Sea. If Elishah be Southern Italy and Sicily, the two pairs of sons of Javan will be named from east to west: Elishah and Tarshish; Kittim (Cyprus) and Dodanim (Rhodes). The inhabitants of Rhodes from B.C. 800 onward were Ionian Greeks, sons of Javan, who took the place of the earlier Phœnician population. The Rhodians are certainly in their proper place alongside of the Kittim. They were known even to Homer, and were visited from a very early period by all the trading peoples of the Mediterranean coasts. Bochart's idea that they might be identified with the Gr. colonists on the banks of the Rhone (Rhodanus) has not commended itself to anyone.

LITERATURE.—Baudissin in Herzog², iii. 634, under 'Dodanim,' treats ably of the four sons of Javan. See also Winer, Schenkel, Riehm; and Bertheau on 1 Ch 1[7] in his Commentary.

J. MACPHERSON.

DODAVAHU (דּוֹדָוָהוּ 'beloved of J″,' AV Dodavah).—Father of Eliezer of Mareshah, the prophet who censured Jehoshaphat for entering into alliance with Ahaziah (2 Ch 20[37]). Gray (*Heb. Prop. Names*, 62, 232) contends that the correct Heb. text is דּוֹדְיָה. So also Kittel in *SBOT* (cf. Nestle, *Eigennamen*, 70).

J. A. SELBIE.

DODO (so the Ḳerê דּוֹדוֹ, Kethibh **Dodai** (דּוֹדַי), or possibly **Dodi** (דּוֹדִי); LXX combines the two, translating, *υἱὸς πατραδέλφου αὐτοῦ υἱὸς Σουσεί*).—**1.** The father of Eleazar, the second of the three captains who were over 'the thirty' (2 S 23[9]). In the parallel list (1 Ch 11[12]) the name is given as Dodo (דּוֹדוֹ, LXX Δωδαί), and also 'the Ahohite' for the erroneous 'son of Ahohi.' In the third list (1 Ch 27[4]) Dodai (דּוֹדַי, LXX Δωδειά) is described as general of the second division of the army, but the words 'Eleazar the son of' appear to have been accidentally omitted. Bertheau considers that Dodai is the more correct form, and appeals to the LXX and Jos. (Δωδείου); he accordingly restores this form in 2 S 23[9] and 1 Ch 11[12].

The traditional spelling (Dodo), however, is most probably right: the name Dudu has been found on the Tel el-Amarna tablets, apparently as that of an Amorite official at the Egyp. court. In the Inscription of Mesha (l. 12) we also find דודה (probably דודה = Dodo); it appears to be the name of some deity. **2.** A Bethlehemite, father of Elhanan, one of 'the thirty' (2 S 23[24], 1 Ch 11[26] דּוֹדוֹ). **3.** A man of Issachar, the forefather of Tola the judge (Jg 10[1]). LXX and Vulg. tr. *πατραδέλφου αὐτοῦ*; *patrui Abimelech*.

J. F. STENNING.

DOE.—RV (Pr 5[19]), AV 'roe,' is in Heb. יַעֲלָה *ya'ălâh*, the *female ibex*. See GOAT, under יְעֵלִים.

DOEG (דֹּאֵג, דּוֹאֵג, דּוֹיֵג *).—An Edomite, and chief of the herdmen [or better, 'runners,' reading with Grätz הָרָצִים for הָרֹעִים] of king Saul. When David fled to Nob, to Ahimelech (or Ahijah) the priest, D. was there 'detained before the Lord.' Having witnessed the aid given to the fugitive, he reported what he had seen to the king, who summoned Ahimelech before him, and accused him of treason. Regardless of his protestations of innocence, Saul ordered him to be slain. The king's guard shrank from laying hands upon the sacred person of a priest, and the order was then given to D., who not only slew all the priests, but perpetrated a general massacre of all the inhabitants of Nob, destroying even the cattle (1 S 21[7] 22[9-19]). D. is mentioned in the title of Ps 52.

R. M. BOYD.

DOG (כֶּלֶב *keleb*, *κύων*, *κυνάριον*, *canis*).—The dog is mentioned in many places in the Bible, and (with the somewhat uncertain exception of the *greyhound*, Pr 30[31], where the Heb. signifies *slender in the loins*, and is rendered in the marg. *horse*, RVm *war-horse*) always with contempt. The dog referred to is doubtless the pariah animal so common in the streets of all villages and cities in Bible lands. The original of this degenerate race of dogs is probably the shepherd dog (Job 30^{1}), which differs from the town animal chiefly in his long fur and bushy tail, and his far greater strength, courage, and ferocity. All of these qualities are the natural result of the hardships of his life. Compelled to go long distances, to guard the flocks from the wolves and other savage beasts, to face the cold winds of winter, and its pelting rains or sleet or snow, he needs all the endowments which he possesses over those of his idle, cowardly relative, who spends most of the time, when not in search of his carrion food, in sleeping under the shelter of walls or vaulted passages, or sprawling in the soft mud or dust of the streets.

---

* On this form see Driver on 1 S 22[18].

The street dog is 2 to 3 ft. long, exclusive of his tail, and from 18 inches to 2 ft. high, usually tawny in colour, but often cream-coloured, white, or black, with short, stiff fur, small eyes, and usually with little or no bushiness to the tail. These dogs usually occupy defined quarters of the towns, and any dog intruding into a quarter not his own is certain to be set upon and very severely bitten. They act as public scavengers (1 K 14^{11} 16^{4} $21^{19.\ 23}$ 22^{38}, 2 K $9^{10.\ 36}$, Jer 15^{3}). They wander from place to place, especially in the neighbourhood of the city walls, and make the night hideous with their barking (Ps $59^{6.\ 14}$). They not infrequently attack passers in lonely places, especially in the neighbourhood of Arab encampments. Violent men are compared to them (Ps $22^{16.\ 20}$). They are used to watch houses and tents (Is 56^{10}). The name dog is a term of reproach (1 S 24^{14}, 2 S 3^{8} 9^{8} 16^{9}, 2 K 8^{13}, Is 66^{3}, Ph 3^{2}, Rev 22^{15}). 'The price of a dog' (Dt 23^{18}) probably refers to the practices of the male *ḳĕdēshîm* (see Driver *ad loc.* and Hommel, *Anc. Heb. Trad.* 114). In a word, the Eastern street dog is a type of all that is cowardly, lazy, filthy, treacherous, and contemptible. They seem to have been omnipresent in the time of Christ (Mt 15^{26}, Mk 7^{27}, Lk 16^{21}), as the former citations prove them to have been in more ancient times.

With the doubtful exception before given (Pr 30^{31}), there is no allusion to hunting dogs in Scripture. As the friend of man, endowed with noble intelligence, the dog had no place in Heb. life.

G. E. POST.

DOGMA, properly an opinion or judgment; then, as a decision of one in authority, a decree—of rulers (Lk 2^{1}, Ac 17^{7}, He 11^{23}), of Moses (Eph 2^{15}, Col 2^{14}), of apostles (Ac 16^{4}). The same word in its verbal form is used of the decisions of the elders (Ac $15^{22.\ 25.\ 28}$). Hatch (*Hib. Lect.* 1888, pp. 119-120) has very well shown how, from this original meaning of 'personal opinion,' the word came to signify 'decrees' in the case of rulers, and 'doctrines' in the case of teachers. By far the most important NT use of the term is in Eph and Col. All the early Gr. commentators understand by 'dogmas' in both passages the doctrines or precepts of the gospel. Lightfoot correctly insists upon rendering the word, as in all other NT passages, *decree*, *ordinance*; in Eph it is restricted to *Mosaic* ordinances, but in Col it is applied more generally to all decrees in which moral principles and religious precepts are set forth. The restriction in the one case, however, is not in the word, but only in the context. In Eph the δόγματα as 'authoritative decrees' are distinguished from ἐντολαί as separate precepts, by both of which terms the Mosaic law is characterized from different points of view. By styling these precepts 'dogmas' the apostle emphasizes the point that they were imposed by external authority. This is in keeping with the ecclesiastical use of the word to indicate doctrines which are enunciated authoritatively by the Church. See DOCTRINE.

J. MACPHERSON.

DOK (Δώκ).—A fortress near Jericho, where Simon the Maccabee, along with two of his sons, was murdered by his son-in-law Ptolemy, 1 Mac 16^{15}. The name survives in the modern *'Ain Dûk*, 4 miles N.W. of Jericho (Robinson, *BRP* ii. 309; Ritter, *Erdkunde*, XV. i. 460; *SWP* iii. 173, 191, 209). In Jos. (*Ant.* XIII. viii. 1; *Wars*, I. ii. 3) it appears as Dagon (cf. G. A. Smith, *Hist. Geog.* 250).

J. A. SELBIE.

DOLEFUL.—Is 13^{21} 'their houses shall be full of doleful creatures' (Heb. אֹחִים *'ôḥîm*); and Mic 2^{4} 'and lament with a doleful lamentation' (וְנָהָה נְהִי נִהְיָה, AVm 'lament with a lamentation of lamentations,' RVm 'lament with the lamentation, It is done,' after Ewald, Cheyne, and others, taking the last word as Niph. of הָיָה, instead of a subst. from נָהָה to wail). There is a general agreement that the *'ôḥim* of Is 13^{21} are jackals, as there is the Assyr. *aḥû* used in the bilingual texts for Bab. *likbarra*, lit. 'evil-dog.' The older Eng. VSS mostly give 'great owls,' the Geneva keeping the Heb. Ohim, with a note suggesting the possibility that they and the Ziim (AV 'wild beasts') are 'wicked spirits whereby Satan deluded man, as by the fairies, gobblins, and suche like fantasies,' which probably suggested the 'doleful creatures' of AV (cf. Wyc., Douay, 'dragons'). The Heb. is probably onomatopoetic, from [אחח] to howl; but 'doleful' is mournful (fr. Lat. *dolere*), as in Shaks. *Pass. Pil.* xxi.—

> 'She, poor bird, as all forlorn,
> Lean'd her breast up till a thorn,
> And there sang the dolefull'st ditty.'

Shaks. uses 'dole' in the same sense, as *Hamlet*, I. ii. 13—

> 'In equal scale weighing delight and dole.'

J. HASTINGS.

DOLPHIN.—See BADGER.

DOMINION, used in the ordinary sense, is the tr. of various words in OT and NT, and only noteworthy as the rendering of κυριότης in Eph 1^{21}, Col 1^{16} (pl.), and, perhaps, 2 P 2^{10} and Jude ^{8} (sing.). Associated as it is in Col 1^{16} with ἀρχαί and ἐξουσίαι, and in Eph 1^{21} with these and δύναμις (all sing.),—words used elsewhere (*e.g.* Eph 6^{12}, Col 2^{15}, Ro 8^{38}, 1 Co 15^{24}) primarily, at any rate, of the angelic powers, good or bad or both,—it stands, without doubt, in Eph (ascensively) and Col (descensively) for a grade in the angelic hierarchy; probably, along with θρόνοι (Col), the highest grade (as Lightfoot concludes from the earliest lists; see his note on Col 1^{16}), being at the same time second in that grade, while ἀρχαί and ἐξουσίαι belong to the next grade below; just as *kingship*, suggested in θρόνος, is naturally superior to *lordship* (κυριότης), (compare the θεοί and κύριοι of 1 Co 8^{5}), and both are superior to the ordinary *rule* and *authority*. Θρόνος, κυριότης, ἀρχή, ἐξουσία, and δύναμις, or their linguistic equivalents, are found among the orders of angels in Jewish or Jewish-Chr. books ranging over the NT period or its immediate neighbourhood. Thus in *Jubilees*, § 15: 'Over all [the Gentile nations] hath [God] set spirits as *lords*' (cf. Sir 17^{17}); in *Test. XII. Patr. Levi* 3, 'In the heaven next to God are thrones (θρόνοι), powers (ἐξουσίαι),' angels being, in the same passage, assigned to each of the first six out of the seven heavens, in descending order; in Enoch 6^{10}, 'The host of the heavens and all the holy ones above, and the host of God . . . all the angels of *power*, and all the angels of *principalities*,' etc. Christian Fathers, such as Origen, Ephrem Syrus, Pseudo-Dionysius, accept similar though varying gradations (see Lightfoot, Col 1^{16}). The belief in such gradations may be traced to the OT, with its Elohim and sons of Elohim (Pss 58 and 82), the mighty beings of the same class as God, yet ruled by Him (Ps 103$^{19f.}$), His host, led by His captain (Jos 5$^{13-15}$ *ἀρχιστράτηγος δυνάμεως κυρίου*, cf. *ἀρχάγγελος*, 1 Th 4^{16}). Being originally, in all probability, the nature-spirits of Semitic heathenism, they were physical rather than ethical (Gn 6$^{1-3}$), and are sometimes connected or identified with the stars of heaven (Job 38^{7}, Is 45^{12}; cf. Enoch 18$^{13-16}$, and see article ELEMENT). As the knowledge of God advanced, these 'gods' ceased to have any religious importance, and receded more and more into the position of comparative nonentities (Ps 89^{6}), but were still regarded as superintending the nations under Him (Dn 10^{13}, Is 24^{21}), though in some special sense God reserved Israel for Himself (Dt 32$^{8f.}$ LXX), making Michael, the chief archangel (Dn 12^{1}), their prince. Being thus distinguished from God, and not irrevocably bound by the moral law, they could come into opposition to Him, not merely relative but actual, either by blameworthy conduct of the charges committed to them (Is 24^{21}, Job 4^{18}, cf. Enoch 18$^{13-16}$; also the 'angels' in Rev 2, 3), or by diametrical contravention of God's purposes (Dn 10^{13}, 2 Co 4^{4}, Eph 6$^{11-16}$; and see ANGEL, DEMON, and SATAN).

The interpretation of *κυριότης* in Jude ^{8} and its parallel 2 P 2^{10} is perplexing, and is much disputed. A reference to angelic powers—unseen dignities worthy of reverence (cf. 1 Co 11^{10})—is supported by the contiguous *δόξαι* ('beings in light like God'), and by the example of the sin of the Sodomites (Gn 19); while a reference to the lordship of Christ or God is suggested by Jude ^{4}, and 2 P 2^{6} (angels that sinned, *i.e.* against God). See Spitta on the two passages, and Harnack, *Texte*, ii. 14.

LITERATURE.—Schultz, *Old Test. Theology* (Eng. tr.), i. 215 ff.; Everling, *Die Paulinische Angelologie und Dämonologie*, pp. 88, 122 ff.; Lightfoot, *Colossians*. J. MASSIE.

DOOM.—In AV, 2 Es 7^{43} only, 'the day of doom shall be the end of this time' (*dies judicii*, RV 'the day of judgment'); to which RV adds Ezk 7^{7} 'Thy doom is come unto thee, O inhabitant of the land,' v.^{10} 'thy doom is gone forth' (הַצְּפִירָה, AV 'the morning,' RVm 'the turn' or 'the crowning time'—see Davidson), and the vb. 1 Co 4^{9} 'God hath set forth us the apostles last of all, as men doomed to death' (*ὡς ἐπιθανατίους*), AV 1611 'approved to death,' mod. editions 'appointed,' of which Scrivener (*Camb. Parag. Bible*, p. xcvii) says: 'A deliberate but needless correction [in 1616] derived from Tind., Cov., the Great and the Bishops' Bibles. The Gen. (1557) has "destinate to death."'

For 'doom' in the sense of 'judgment,' cf. Wyclif's tr. of Ps 9^{8} 'He made redi his trone in dome,' and of Rev 19^{2} 'trewe and iust ben the domes of hym.' Shaks. (*Macbeth*, II. iii. 59) speaks of 'the great doom,' *i.e.* the day of judgment; and in *Jul. Cæs.* III. i. 98—

'Men, wives, and children stare, cry out, and run
As it were doomsday.'

The word is connected with 'deem' to judge, whence the 'Deemsters' of Isle of Man and Jersey, and philologically with Gr. *θέμις* law, fr. *τίθημι* place, whence 'something laid down, 'a decision.' See Craik's *Eng. of Shaks.* p. 226; Verity, *Shaks. Jul. Cæs.* p. 158 f.; and art. DEEM. J. HASTINGS.

DOOR, DOORKEEPER, DOORPOST.—See HOUSE.

DOPHKAH (דָּפְקָה).—A station in the itinerary of the children of Israel (Nu 33$^{12f.}$). This station and the next one, Alush, which lie between the 'encampment by the sea' and Rephidim, have not been identified, and they are not alluded to in Exodus. As, however, the itinerary in Nu has every appearance of being taken from a regular pilgrim book, we should say that, on the hypothesis that Mount Sinai and Rephidim [=Feiran] have been correctly located, the position of Dophkah cannot be far from the entrance to the Wady Maghara; this wady contains the oldest Egyptian mines, and as the blue-stone which the Egyptians quarried is known by the name of Mafkat, and gave its name to the district of Mafkat, it is a tempting suggestion to identify Dophkah as an erroneous transcription of Mafkah. Alush would then lie half-way between this and Feiran; it does not appear that any more exact location can be suggested. The identification suggested for Dophkah was made, in the first instance, by Ebers; I arrived at it independently.

J. RENDEL HARRIS.

DOR (דּוֹר, דֹּאר), Jos 11^{2} 12^{23} 17^{11}, Jg 1^{27}, 1 K 4^{11}, 1 Ch 7^{29}.—A Can. city in Galilee, in the 'uplands' (נָפַת, RVm Naphath-[or Naphoth-]dor) towards the W. Its king is noticed between Jokneam and Gilgal of the Goïim—which was in Sharon. It seems to have been in Issachar or in Asher, and is noticed as attacked by Manasseh with Taanach. The 'uplands' of Dor formed that part of Solomon's kingdom, which seems to correspond with Zebulun, the next province to Issachar; but, according to the last cited passage, Dor belonged to Manasseh, though noticed with towns of Issachar. These indications do not suffice to fix the site. Jos. makes it a seaside town (*Ant.* V. i. 22, VIII. ii. 3) near Carmel (*Contra Apion.*, ii. 10). It was at Dor that Tryphon (*c.* B.C. 139) was besieged by Antiochus Sidetes, 1 Mac 15$^{11ff.}$. In the 4th cent. A.D. (*Onomasticon, s.v.* Dornapheth) it is identified with *Tantûrah* on the sea-coast, 9 Roman miles from Cæsarea Palestina on the way to Tyre; but the names have no connexion, and the site is not on the uplands. The low hills S. of Carmel may be intended, but the name has not been recovered.

C. R. CONDER.

DORCAS.—'Tabītha, which is by interpretation called Dorcas' (Ac 9^{36}); טְבִיתָא is Aram. for Heb. צְבִי, by regular interchange of ט for צ (see Driver, *Hebrew Tenses*^{3}, p. 225 f.). When occurring as the name of an animal, it is tr^{d} in AV 'roebuck' or 'roe,' in RV 'gazelle.' *Δορκάς* is the Gr. equivalent, used in LXX. Both the Aramaic and the Greek were, also, not uncommon names for women: the former denoting 'beauty,' the latter the animal's gaze (fr. *δέρκομαι*). For instances see Wetstein's Comm. on Ac 9^{36}; Jos. *BJ* IV. iii. 5 may be mentioned as one.

The raising of Dorcas of Joppa is the second of three narratives (Ac 9$^{32-35.\,36-43}$ 10–11^{18}) connected with St. Peter's visit to the towns of the Maritime Plain on the W. coast of Pal., whither he came in the course of a journey undertaken by him after the Church at Jerus. was scattered through 'the persecution which arose about Stephen.' The first of these narratives, like the second, relates a miracle; they are told to illustrate the supernatural powers granted to St. Peter, whose miracles in Jerus. have already been described Ac 3$^{1-11}$ 5$^{1-11.\,15}$. The Churches in Lydda and Joppa were not founded by St. Peter (Ac 9$^{32.\,38}$), but on this occasion his presence and his miracles served to strengthen and extend them. He does not seem to have visited Joppa till the Church there, in its distress on account of Dorcas' death, sent to fetch him from Lydda (9^{38}).

Dorcas was a 'disciple' (*μαθήτρια*, this fem. form occurs in NT only here). She must have been a person of some worldly substance so as to have had leisure for the 'good works' and means for the 'almsdeeds' of which she was 'full.' The former term is more comprehensive than the latter. Nevertheless, by it also in all probability, according to Jewish associations, works of charity are more especially denoted (cf. the Talm. expression מעשים טובים, and see on it Weber, *Theol. d. Synagoge*, § 61; see also *τὰ ἀγαθά μου* at Sir 20^{16}, and cf. *ib.* 18^{15} and To 12^{13}). Dorcas' labours for the good of others were instances. We may note that they were the more creditable in one who was able to give alms, and might have contented herself with doing this. The garments which the widows showed to St. Peter may most naturally be supposed to be those which she had previously given to them. The widows are thus seen here, as in 6^{1}, to form a recognized class, dependent upon bounty. The account of the actual raising of Dorcas (vv.$^{40. 41}$) bears a close resemblance to that of the raising of Jairus' daughter (Mt 9^{25}, Mk $5^{40. 41}$, Lk 8^{54}).

V. H. STANTON.

DORYMENES (Δορυμένης), the father of Ptolemy Macron, who was a trusted friend of Antiochus Epiphanes (2 Mac 4^{45}), and was chosen by Lysias to command the Syrian army in Pal. in conjunction with Nicanor and Gorgias (1 Mac 3^{38}). Ptolemy had formerly been in the service of the Egyp. king Ptolemy VI. Philometor (2 Mac 10^{13}); and his father, Dorymenes, may perhaps be identified with the Ætolian Dorymenes who fought for Ptolemy IV. against Antiochus the Great (Polybius, v. 61). H. A. WHITE.

DOSITHEUS (Δοσίθεος). — **1.** The priest who, according to a note in one of the Greek recensions of Esther, brought the book to Alexandria in the 4th year of Ptolemy Philometor (?) and Cleopatra, *c.* B.C. 178 (Ad. Est 11^{1}). **2.** A soldier of Judas Maccabæus, who (2 Mac 12^{35}) laid hold, in the heat of battle, of Gorgias the general of the enemy, and sought to take him alive. The attempt was frustrated by a Thracian horseman, who cut off the arm of Dositheus. **3.** A renegade Jew who frustrated the plot of Theodotus to assassinate king Ptolemy Philopator (3 Mac 1^{3}). **4.** An officer of Judas Maccabæus (2 Mac $12^{19. 24}$). J. A. SELBIE.

DOTÆA (Δωταία).—Another form of DOTHAN (which see). AV has incorrectly Judæa.

DOTE.—The orig. meaning of to 'dote' is to be foolish (cf. 'dotage,' and Scotch 'doited'), as in Chaucer, *Legend of Good Women*, 261—

> 'Wel wot I ther-by thou beginnest dote
> As olde foles, whan hir spirit fayleth';

and *Piers Plowman*, i. 138—

> 'Thow doted daffe, quod she, dull arne thi wittes.'

In this sense occurs 'dote' in Jer 50^{36} 'A sword is upon the liars, and they shall dote' (Cov. 'they shall become fooles,' Heb. נֹאָלוּ, the vb. [יאל] is only found in Niph., and always = be foolish, or act foolishly, whether innocently as Jer 5^{4}, or not as Is 19^{13}); Sir 25^{2} 'an old adulterer that doteth' (ἐλαττούμενον συνέσει, RV 'lacking understanding'); and 1 Ti 6^{4} 'doting about questions and strifes of words' (AVm 'a fool,' RVm 'sick,' Gr. νοσῶν, only here in NT, and νόσημα only Jn 5^{4} TR; but the sense is clearly 'unsound,' 'mad,' a common meaning of the word; Tind. tr. freely 'wasteth his braynes'; 'doteth' is the Geneva word of 1560). Elsewhere 'dote' occurs only in the sense of 'be (foolishly) fond,' Ezk $23^{5. 7. 9. 12. 16. 20}$ (עָגַב). J. HASTINGS.

DOTHAN (דֹּתַיִן and דֹּתָן, Δωθάειμ), Gn 37^{17} (**Dothaim**, in Jth 4^{6} etc.), now Tell Dothân, was an ancient town situated 10 miles N. of Samaria. Thither Joseph followed his brethren from Shechem (Gn 37^{15}). The pasturage about it is still the best and freshest in a time of drought (Thomson, *Land and Book*, p. 466). The site of Dothan, known in earlier times by Eusebius, who placed it 12 miles N. of Samaria, had for some centuries been lost till recovered by Van de Velde (vol. i. p. 364 ff.). It lay on an ancient (Jewish?) road, of which Van de Velde found the remains, crossing from the plain of Esdraelon into the plain of Sharon, and must have always been an important military post. It stood on the top of a mound, as the language of 2 K 6^{14-17} would suggest. There are still two large ancient cisterns, into one of which possibly Joseph was cast. There are two wells, as the name implies, but only one of them seems ancient. It bursts from the foot of the hill (*Sur. Mem.* ii. 169, 215). Most probably, Joseph's brethren were gathered watering their flocks when he approached. Dothan was the residence of Elisha when the incident of 2 K $6^{12\text{ff.}}$ occurred. It is several times mentioned in the account of the siege of Bethulia (Jth 4^{6} $7^{3. 18}$ 8^{3}).

A. HENDERSON.

DOUBT.—See next article. The middle Eng. *douten* most freq. meant to *fear*, after *dubitare* in late Lat. And this meaning is still very common for 'doubt' in Shaks., as *Macbeth*, IV. ii. 66—

> 'I doubt some danger does approach you nearly.'

In AV this meaning is evident in Sir 9^{13} 'Keep thee far from the man that hath power to kill; so shalt thou not doubt the fear of death' (οὐ μὴ ὑποπτεύσῃς φόβον θανάτου, RV 'thou shalt have no suspicion of the fear of death'). But in NT also it is often more than 'hesitate' or 'mistrust,' esp. where the Gr. is ἀπορέομαι, 'to be at a loss' (Jn 13^{22}, Ac 25^{20}, Gal 4^{20}), or the stronger διαπορέω, 'to be utterly at a loss' (Ac 2^{12} 5^{24} 10^{17}). In like manner **doubtful** means 'perplexing' or 'perplexed,' Sir 18^{7} (ἀπορέομαι, RV 'in perplexity'); Lk 12^{29} 'neither be ye of doubtful mind' (μὴ μετεωρίζεσθε, a word of disputed meaning here, see Plummer, *ad loc.*); Ro 14^{1} 'd. disputations' (see under DISPUTE).

J. HASTINGS.

DOUBT.—The Heb. of OT seems to lack an exact equivalent to our term 'doubt,' when used in a religious reference. Some have, indeed, understood 'doubters,' 'sceptics' to be meant when the Psalmist, who loves God's law and hopes in His word and delights in keeping His commandments, declares that he 'hates them that are of a double mind' (Ps 119^{113} סֵעֲפִים). Apparently, however, it is rather hypocrites, what we should call 'double-faced men,' who are meant; and it seems to be hypocrisy, rather than doubt, which is in mind also in 1 K 18^{21}, where the kindred term סְעִפִּים occurs, and in 1 Ch 12^{33}, Ps 12^{2}, where the similar phrase 'double heart' (לֵב וָלֵב) appears, as well as in Hos 10^{2}, where the comm. differ as to whether the words חָלַק לִבָּם are to be tr^{d} 'their heart is divided,' or, perhaps better, 'their heart is smooth,' *i.e.* deceitful.

In NT, on the other hand, we meet with a series of terms which run through the shades of meaning expressed by our words, perplexity, suspense, distraction, hesitation, questioning, scepticism, shading down into unbelief.

Perplexity is expressed by the verb ἀπορέω (Mk 6^{20}, Lk 24^{4}, Jn 13^{22}, Ac 25^{20}, 2 Co 4^{8}, Gal 4^{20}), with its strengthened compound, διαπορέω (Lk 9^{7}, Ac 2^{12} 5^{24} 10^{17}), expressing thorough perplexity, when one is utterly at a loss, and the still stronger compound ἐξαπορέω (2 Co 1^{8} 4^{8}), in which perplexity has passed into despair. This perplexity is never assigned in NT to the sphere of religion. Even in such instances as Lk 24^{4}, where we are told that the women, finding the Lord's tomb empty, 'were perplexed thereabout;' Mk 6^{20}, Lk 9^{6}, where Herod's perplexity over John's preaching and the subsequent preaching of Jesus and His followers is spoken of; and Ac 2^{12}, where the extreme perplexity of those who witnessed the wonders of the Day of Pentecost is adverted to, it is not a state of religious doubt but of pure mental bewilderment which is described. The women merely had no explanation of the empty tomb ready, they were at a loss how to account for it; Herod simply found John's preaching and the reports concerning the preaching and work of Jesus and His disciples inexplicable, he had no theory ready for their explanation; the marvels of Pentecost, before Peter's explanation of them, were wholly without meaning to their witnesses; and, similarly, in Ac 10^{17}, Peter was just at a complete loss to understand what the vision he had received could mean, and required a revelation to make it significant to him. It was this state of mind, a state of what we may call objective suspense due to lack of light, which the Jews claimed for themselves when in Jn 10^{24} they demanded of Jesus: 'How long dost thou lift up our soul (*τὴν ψυχὴν ἡμῶν αἴρεις*)? If thou art the Christ, tell us plainly.' They would suggest that they were in a state of strained expectation regarding His claims, and that the lagging of their decision was due, not to subjective causes rooted in an evil heart of unbelief, but to a lack of bold frankness on His part. Jesus, in His reply, repels this insinuation and ascribes the fault to their own unbelief. They were not eager seekers after truth, held in suspense by His ambiguous speech; they were men in possession of full evidence, who would not follow it to a conclusion opposing their wishes; they were therefore not perplexed, but unbelieving.

For the doubt of the distracted mind the NT appears to have two expressions, *μετεωρίζεσθαι* (Lk 12^{29}) and *διστάζειν* (Mt 14^{31} 28^{17}). This state of mind is superinduced on faith, and is a witness to the faith which lies behind it; only those who have faith can waver or be distracted from it. But the faith to which it witnesses is equally necessarily an incomplete and imperfect faith; only an imperfect faith can waver or be distracted from its firm assurance. The exhortation, 'Be ye not of a wavering mind,' is appropriately given, therefore, in Lk 12^{29}, to those who are addressed as 'of little faith' (*ὀλιγόπιστοι*), of whom it is the specific characteristic. It is to trust in God's providential care without carking anxiety as to our food and drink and clothing that the Saviour is exhorting His hearers in this context—to fulness of faith, which, according to its definition in He 11^{1}, is absorbed in the unseen and future in contrast with the seen and present. Those who have full faith will have their whole life hid with God; and in proportion as care for earthly things enters, in that proportion do we fall away from the heights of faith and exhibit a wavering mind. It was a similar weakness which attacked Peter, when, walking, by virtue of faith, upon the water to come to Jesus, he saw the wind and was afraid (Mt 14^{31}); and, accordingly, our Saviour addressed him similarly, 'O thou of little faith, wherefore didst thou doubt (*ἐδίστασας*)?' Here, again, is real faith though weak, but a faith that is distracted by the entrance of fear. The same term, and surely with similar implications, is used again and on an even more interesting occasion. When the disciples of Jesus came to the mountain where He had appointed them and there saw their risen Lord, we are told (Mt 28^{17}), 'They worshipped: but some doubted (*ἐδίστασαν*).' It is this same doubt of imperfect and distracted faith, and not the sceptical doubt of unbelief, that is intended. All worshipped Him, though some not without that doubt of the distracted mind which is no more 'psychologically absurd' here than in Lk 12^{29} and Mt 14^{31}. Whence the distraction arose, whether possibly from joy itself, as in Lk 24^{41}, or from a less noble emotion, as possibly in Jn 20^{25}, we do not know. But the quality of doubt resulting from it, although manifesting the incompleteness of the disciples' faith, was not inconsistent with its reality; and the record of it is valuable to us as showing, along with such passages as Lk $24^{37.\,41}$, Jn 20^{25}, that the apostles' testimony to the resurrection was that of convinced rather than of credulous witnesses.

A kindred product of weak faith, the doubt of questioning hesitation, is expressed in NT by the term *διαλογισμός* (Lk 24^{38}, Ro 14^{1}, Ph 2^{14}, 1 Ti 2^{8}). It is the Nemesis of weakness of faith that it is pursued by anxious questionings and mental doubts. Thus, when Christ appeared to His disciples in Jerus., 'they were terrified and affrighted, and supposed that they had beheld a spirit' (Lk 24^{36}), provoking their Master's rebuke, 'Wherefore do questionings arise in your heart?' And in St. Paul's Epistles, the timid outlook of the weak in faith is recognized as their chief characteristic. This seems to be the meaning of Ro 14^{1}, where 'he that is weak in faith' is to be received into full Christian brotherhood, but not 'for the adjudication of questionings' (cf. the *κρινέτω* of v.^{3} and the *κρίνων* of v.^{4}): here is a man whose mind is crowded with scruples and doubts,—he is to be received, of course, but not as if his agitated conscience were to be law to the community; he is to be borne with, not to be obeyed. The same implication underlies Ph 2^{14}, where the contrast between 'murmurings and disputings' seems to be not so much between moral and intellectual rebellion, as between violent and timid obstacles in the Christian pathway,—a contrast which appears also in 1 Ti 2^{8}. It would seem that those who are troubled with questionings are everywhere recognized as men who possess faith, but who are deterred from a proper entrance into their privileges and a proper performance of their Christian duties by a settled habit of hesitant casuistry, which argues lack of robustness in their faith.

The NT term which expresses that deeper doubt which argues not merely the weakness but the lack of faith is the verb *διακρίνεσθαι* (Mt 21^{21}, Mk 11^{23}, Ro 4^{20} 14^{23}, Ja $1^{6\,bis}$, Jude ^{22}). Wherever this critical attitude towards divine things is found, there faith is absent. The term may be used in contrast to that faith by which miracles are wrought, or in which God is approached in prayer (Mt 21^{21}, Mk 11^{23}, Ja $1^{6\,bis}$); in either case it implies the absence of the faith in question and the consequent failure of the result,—he that 'doubteth' in this sense cannot expect to receive anything of the Lord. It may be used of a frame of mind in which one lives his life out in the Christian profession (Ro 14^{23}); in this case, the intrusion of this critical spirit vitiates the whole course of his activities,—because they are no longer of faith, and 'whatsoever is not of faith is sin.' Or it may be used as the extreme contrast to that fulness of faith which Abraham exhibited in his typical act of faith; and then it is represented as the outgrowth of unbelief (Ro 4^{20}). From the full description of its opposite here, and the equally full description of it itself in Ja $1^{6\,ff.}$ (see Mayor's note), we may attain a tolerably complete conception of its nature as the critical, self-debating habit of the typical sceptic, which casts him upon life like a derelict ship upon the sea, and makes him in all things 'double-minded' and 'unstable.' Such a habit of mind is the extreme contradiction of faith, and cannot coexist with it; and it is therefore treated everywhere with condemnation—unless Jude ^{22} be an exception, and there the reading is too uncertain to justify its citation as such. See further, FAITH.

B. B. WARFIELD.

DOVE (יוֹנָה *yônâh*, *περιστερά*, *columba*).—There are several species of wild doves in Bible lands, which all go by the name of *ḥamâm* in Arabic. (1) The ring dove or wood pigeon (*Columba Palumbus*, L.), which appears twice a year, at the spring and autumn migration, in all the wooded districts of

Palestine. It is taken by means of a decoy bird, tied to a perch, with its eyelids sewn up. A considerable number remain through the winter. (2) The stock dove (*Columba œnas*, L.), which is common in Gilead and Bashan, and in the Jordan Valley. (3) The rock dove (*Columba livia*, Bonnat), which is found along the coast, and in the highlands W. of the Jordan and in Lebanon. (4) The ash-rumped rock dove (*Columba Schimperi*, Bp.), which is found in the interior of Pal., and makes its nests in the caves and fissures of the chalk precipices. The name *ḥamâm* is associated with a number of wadis and other natural features of the country.

Tame doves are found in every city and village, often in immense numbers. They have been kept from most ancient times. The writer discovered in Wady Sîr, in Gilead, a rock-hewn dove-cot of large size. It is described and figured in *PEFSt*, Oct. 1886. It is a favourite amusement of boys and young men, especially in the interior cities, as Damascus, Ḥems, Ḥamath, etc., to spend the later afternoon hours in superintending the flight of pigeons. They train them to wheel about over the houses, making their own home a centre, and to come back and alight on their owner's hand, and, with a shrill whistle, to be tossed off into the air again for a short whirl. It is one of the earliest mentioned birds in the Bible (Gn 8$^{8-12}$). It is a bird capable of distant flight (Ps 55^{6}). A domesticated variety has yellow plumage (Ps 68^{13}). The wild doves make their nests in the cliffs overhanging the wadis (Ca 2^{14}, Jer 48^{28}, Ezk 7^{16}). The mournful cooing of the dove is well known, and often alluded to in Scripture (Is 38^{14} 59^{11}, Nah 2^{7}). Its harmlessness is proverbial (Mt 10^{16}). Its foolishness is used to illustrate the stupidity of Ephraim (Hos 7^{11}). Its lovable qualities are also proverbial (Ca 1^{15} etc.). Young pigeons were used in sacrifice (Gn 15^{9}).

Dove's Dung accumulates in immense quantities around the dove-cots, and is an invaluable manure, especially for cantelopes. It is owing to the use of this fertilizer that the melons of Persia are so renowned for their excellence. The talus in front of the cliffs where wild doves nest in large numbers is covered with thick deposits of their excrement, which is almost as powerful a fertilizer as guano.*

G. E. Post.

DOVE'S DUNG.—See Dove and Food.

DOWRY.—See Marriage.

DOXOLOGY, which is not a biblical word, is the name which has been applied to any formal ascription of praise or glory to God (δοξολογία, *glorificatio*). Such are the closing sentences of several apostolic prayers, *e.g.* Ro 16^{27}, Jude ^{25}, Eph 3^{20}. In particular, the name is given to the last sentence of the Lord's Prayer as it stands in TR and our AV of Matthew (cf. 1 Ch 29^{11}). This verse, however, is omitted in the parallel passage of St. Luke, neither is it found in the earlier Uncials or the Vulg., but first in the *Teaching of the Twelve Apostles* and Chrysostom. Hence it has been omitted from the text of WH and RV (text, not margin). See Chase, *Lord's Prayer*, 168 ff.

The 'angels' hymn' (Lk 2^{14}), *Gloria in Excelsis*, etc., has been made the foundation of another doxology by the addition of several non-biblical sentences. This, which is known liturgically as the 'greater doxology,' occurs in one of its forms in the Psalter of Codex A (LXX), while the 'lesser' (*Gloria Patri*, etc.) is wholly extra-biblical.

C. A. Scott.

DRACHMA.—See Money. **DRAG.**—See Net.

DRAGON.—Four Heb. words are rendered in AV by this fabulous name. 1. תַּנִּים *tannîm*, *dragons*, the plural of תַּן *tan*, which latter is not used in Scripture. This word signifies *a howler*, and refers to a beast inhabiting the desert. RV tr. it in every instance by *jackals*. But in Is 13^{22} 34$^{13.14}$ it is found associated with אִיִּים *'iyyîm* (which would seem to be the same as *ibn-âwa* in Arab., vulgo *wâwi*). This animal is undoubtedly the *jackal*. It is clear that the same animal would not be mentioned twice in a short list of animals, and by two totally different names. We must therefore seek for another desert howler, than which none could fulfil the conditions better than the *wolf*. The Arab. word *tinân* is one of the names of the wolf. The LXX renders *tannîm* variously. Thus Job 30^{29}, Is 34^{13} 43^{20} σειρῆνες, Ps 44^{19} κάκωσις, Is 13^{22} ἐχῖνοι, Jer 10^{22} 49^{33} στρουθοί, Jer 9^{11} 14^{6} 51^{37}, Mic 1^{8} δράκοντες. 2. תַּנִּים *tannîm*, a singular form, which is probably a clerical slip for תַּנִּין *tannîn* (Ezk 29^{3} 32^{2}), as the latter is the reading in several MSS. This is properly rendered *dragon* in both AV and RV of the first passage, and in RV of the second, where AV has *whale* in text and *dragon* in marg., the reference being to the *crocodile*, and applied to Pharaoh. 3. תַּנּוֹת *tannôth* (Mal 1^{3}), a fem. plural of *tan*, rendered by RV *jackals*, but preferably, for the reason given above (1), *female wolves*. 4. תַּנִּין *tannîn*, pl. תַּנִּינִים *tanninîm*. This word is the exact equivalent of the Arab. *tannîn*, pl. *tanânîn*, which signifies 'a great serpent,' or 'a dragon,' or some mythical sea monster, of which it is said that it was two leagues in length, of a colour like that of a leopard, with scales like those of a fish, two great fins, a head of the size of a hill, but in shape like a man's, two great ears, and two round eyes, and from its neck branched six other necks, every one nearly 20 cubits long, and every one with a head like a serpent. The LXX translates this δράκων, *dragon*, in every case except Gn 1^{21}, where it is κῆτος, AV *whales*, RV *sea*

---

* There seems to be no doubt of the etymological significance of the word חֲרֵי־יוֹנִים *ḥărî yônîm* (2 K 6^{25}). *Ḥărî* means literally *dung*. The Arab. preserves the word exactly, *ḥeri*, with the same signification. It is, however, now regarded as obscene, and constantly so used by low-lived people in the East. What was the substance which was sold at the rate of five pieces of silver the quarter cab, that is, 6s. 4d. the pint? Many efforts have been made to find some *plant* which might have been called by this name. Avicenna says (ii. 141) that the best quality of *ushnân*, a name for several species of *Salsolaceæ*, is called *ḥeri el-'aṣâfîr*, that is, *sparrow's dung*. There are numerous instances of a similar nomenclature. Nevertheless, no one has as yet found a plant that bears the name of *dove's dung*, or which can be identified with the material which was sold so dear; and nothing is gained for science by mere conjecture. It is better to accept the literal interpretation, and conclude that, in the last resort, the dove-cots were drawn upon to satisfy the cravings of starving men. The ordure and urine of almost all kinds of animals and birds, domestic and wild, were administered by the ancients as medicine—among them dove's dung. There are long unsavoury articles in the ancient medical treatises of Avicenna and others on their virtues. They were and are still used as collyria in the treatment of ophthalmia. Houghton cites a statement from a Spanish author, who says that in the year 1316 so great a famine distressed the English that 'men ate their own children, dogs, mice, and *pigeons' dung*.' With this statement compare Rabshakeh's threat (2 K 18^{27}, Is 36^{12}). It is well known that pigeons and other birds often pass seeds unchanged through their alimentary canal. When the Dutch tried to enhance the price of nutmegs in their E. Indian possessions by limiting the growth of the trees, the large wild pigeons of those regions thwarted their purpose by carrying the nutmegs in their crops, and depositing them in their excrement at points far removed from the Dutch possessions. The seeds took root, and produced nutmeg trees. Birds are a recognized factor in the propagation of plants in this manner. The flora of the coral islands is largely indebted to them for species thus introduced. The existence of such undigested seeds would account for the alimentary value (slight though it might be) of dove's dung. Furthermore, doves convey nourishment to their squabs by disgorging some of the partially digested food from their crops. Some of the grains would occasionally be spilled. In addition, the dung contains feathers, scales of epidermis, and other organic débris. When it is remembered that such substances as *tanned leather*, *glue*, *ground wood*, and all manner of *tainted garbage* are greedily devoured by starving men, it is not strange, or beyond belief, that dove's dung was eaten in Samaria in the last agony of despair.

monsters. In AV (Job 7^{12}) it is rendered *whale*, and in RV *sea monster*. It is applied to sea monsters under the name *dragons*, in AV and RV (Ps 74^{13} 148^{7}, Is 27^{1}); and to *land serpents*, even of the smaller sort (Ex $7^{9.\,10.\,12}$, where it is tr. *serpents* [RVm 'Heb. *tannin*, any large reptile,'] Dt 32^{33}, Ps 91^{13}, where it is tr. in AV *dragon*, and in RV *serpent*). In every case it might have been translated 'dragon' as in LXX (see SERPENT, 2). It is applied metaphorically to Pharaoh (Ps 74^{13}, Is 51^{9}; cf. תַּנִּים (2) above). In the comparison of Nebuchadnezzar with a *dragon* (Jer 51^{34}), we may still imagine the reference to be to a *crocodile*, which may well have existed in the Euphrates at that time.

The word תַּנִּין *tannîn* (La 4^{3}) is either the Aram. form of תַּנִּים *tannîm* or a textual error for it (Siegf.-Stade), or a defective scription for תַּנִּינִים (Löhr). It is rendered in AV *sea monsters*, and in RV *jackals*. The reference is prob. to some fierce desert mammalian. The same objection obtains to the *jackal* as that stated in the case of תַּנִּים *tannîm* (1). The word is preferably rendered *wolves*. It might, as in AV, refer to some cetacean sea monster were it not for the comparison with the ostrich, which would seem to imply that it was a land animal.

In NT the word *dragon* (Rev $12^{3\text{ff.}}$) clearly refers to a symbolical, serpent-like monster. Modifications of this ideal have obtained credence in the legends of almost all civilized nations. Dragons of all shapes and sizes have been described and figured, and their lairs are still pointed out in every land. Representations of them are found on coins, in pictures, sculptures, and even on the banners of nations, as on that of China to-day. Dragon worship has prevailed in many lands. The serpent of Gn 3 was transformed ultimately into the 'old serpent called the Devil and Satan' (Rev 20^{2}). Apollo slew the Python. The story of Bel and the Dragon shows how the idea of this monster was lodged in the Hebrew mind. G. E. POST.

DRAGON'S WELL.—See JERUSALEM and WELL.

DRAM.—See MONEY.

DRAUGHT, DRAUGHT HOUSE.—The 'draught' (ἀφεδρών) of Mt 15^{17}, Mk 7^{19} is a privy, as in Burton, *Anat. of Mel.* 165: 'Muck hills, draughts, sinks, where any carcasses or carrion lies.' And the 'd. house' (מַחֲרָאָה) of 2 K 10^{27} is the same (lit. 'place of *ḥărî*,' see p. 620 n.); Cov. 'prevy house.' In earlier writers this and other words in *ugh* are generally spelt with *f* (see Earle, *Philology*, § 153); thus Wyclif's tr. of Ps 40^{3} 'he ledde out me fro the lake of wretchidnesse, and fro the filthe of draft.'

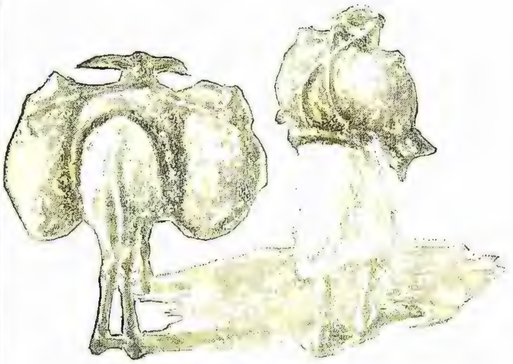
J. HASTINGS.

DRAW.—In mod. usage 'draw' is too mild a word for the action expressed by סָחַב *sâḥabh*, in Jer 49^{20} 50^{45} (RV 'draw out'); or by *σύρω* in Ac 14^{19} 'having stoned Paul, drew him out of the city' (RV 'dragged'), 17^{6} 'they drew Jason and certain men unto the rulers of the city' (RV 'dragged'); Rev 12^{4} 'his tail drew the third part of the stars of heaven, and did cast them to the earth' (RV 'draweth'): or by ἕλκω in Ac 16^{19} 'they caught Paul and Silas, and drew them into the market-place' (RV 'dragged'); 21^{30} 'they took Paul and drew him out of the temple' (RV 'dragged'). In older Eng. 'draw' had a stronger sense than now; the verb to 'drag,' which sprang from the same Anglo-Saxon *dragan*, having in course of time carried off some of its strength. Cf. Spenser, *F.Q.* II. v. 23—

> 'Tho gan that villein wex so fiers and strong,
> That nothing might sustaine his furious forse;
> He cast him downe to ground, and all along
> Drew him through durt and myre without remorse,
> And fowly battered his comely corse.'

J. HASTINGS.

DRAWER OF WATER (שֹׁאֵב מַיִם).—According to Jos $9^{21.\,23.\,27}$ the humiliating drudgery of bringing water for the service of the sanctuary, coupled with the task of providing wood, was the price paid by the Gibeonites for being allowed to live (cf. Dt 29^{11} and Driver's note there). The business of carrying water to the different houses in a town or village is one of the humblest and most poorly paid in Oriental life. It requires little skill or capital. The water is carried in a goat-skin, slung on the back; or two skins are loaded, one on each side of a small donkey, usually driven along by an infirm old man. His clothes are splashed and soiled; the fountain is often some distance away, and on account of the number of women impatiently waiting to fill each one her jar in turn, he has often to bring some of the water at night or very early in the morning. He is engaged continually in what the Samaritan woman found irksome even as an occasional duty (Jn 4^{15}).



CARRIER AND WINE-SKIN.

G. M. MACKIE.

DREAD, DREADFUL.—1. These words have gained in intensity during their history. Bp. Fisher says: 'I well perceived it in myself, but all too late, I dread me'; and it once was possible to say 'without dread' for 'without doubt,' as in Chaucer (?) *Rom. of Rose*, B. 2199—

> 'For certeynly, withouten drede,
> A cherle is deemed by his dede.'

By 1611 the word had gained somewhat of its present strength, so that 'fear' is used in AV where 'dread' was used by Wyclif, as Mt 2^{22} 'he hirde that Archilaus regnede in Judee for Eroude, his fadir, and dredde to go thidir'; 14^{5} 21^{46} 'thei dredden the puple'; Lk 2^{9} 'thei dredden with great drede' (AV 'they were sore afraid'). But even in AV dread is used with scarce more intensity than modern 'fear,' as 1 Ch 22^{13} 'dread not, nor be dismayed' (אַל־תִּירָא, RV 'fear not'). 2. But the change is not in intensity only; there is also a change in quality. We may still say that we *fear* God, but we must not say that we *dread* Him, or that He is our dread, as in Is 8^{13} 'let him be your fear, and let him be your dread' (הוא מוֹרַאֲכֶם וְהוּא מַעֲרִיצְכֶם), for 'dread' has lost the sense of 'awe' or 'reverential fear' it once possessed, and signifies that which shocks or terrifies. Jacob's exclamation, Gn 28^{17} 'how dreadful is this place,' conveys a wrong impression to our ears; 'awful' would be a nearer word now. So in Dn 9^{4} 'the great and dreadful God.' Dreadful in AV is simply that which may be feared, as Wis 10^{16} 'd. kings' (*φοβερός*, RV 'terrible'); 17^{6} 'a fire kindled by itself, very d.' (*αὐτομάτη πυρὰ φόβου πλήρης*, RV 'full of fear'). Cf. *Act. Henry VIII.* (1543) 'by lawes dredful and penall, to take awaye, purg, and clense this his highnes realme.' J. HASTINGS.

DREAMS are regarded by men in the lowest stage of culture as objective realities, and all dreams are to them equally true: in the case of every dream the savage believes that he really visits the places he dreams of, or is visited by the persons of whom he dreams. Hence those savages whose gods are, for instance, animal-totems, believe that when they dream of the animal they have been visited by the god: thus the young Red Indian adopts as his manitou the animal of which he dreams during his puberty-fast. A person who is visited by frequent dreams is regarded as a chosen medium between men and gods: the Zulus term a person thus chosen 'a house of dreams.' For the purpose of obtaining supernatural communications of this kind, dreams are induced by artificial means, *e.g.* by fasting or the use of drugs. Then dreams come to be considered less as objective experiences than as visions, warnings, revelations of the future sent by the gods. Such revelations may be sought, *e.g.* as by those who visited and slept in the cave of Trophonius for the express purpose of obtaining supernatural communications, or they may come unsought, as, *e.g.*, the dream sent by Zeus to Agamemnon in the *Iliad* (ii. 1–34), or that of Xerxes described by Herodotus (vii. 12). To Homer and Herodotus it seems quite natural that the gods should, to accomplish their larger ends, send dreams to the individual which are intended to deceive him, and the dreams of Agamemnon and Xerxes are deceptive dreams of this kind. But to the deeper spiritual insight of Plato it appears a manifest impossibility, a violation, so to speak, of the laws of religious thought, that a god should deceive men in any way (*Rep.* 382 E), whether by waking visions or by dreams in the night; while at the same time he does not deny that dreams may come from the gods, and elsewhere (*Tim.* cc. 46 and 47) he assigns a prophetic character to some dreams. But side by side with this, the religious view of dreams, there existed and exists the superstitious view: the religious view discriminates between dreams (which are sub-conscious states) just as it discriminates between our waking states of full consciousness, and marks off some of them as moments in which the spirit of man is in direct communication with his god; the superstitious view, however, makes no such discrimination, it regards all dreams as omens, none as having a religious import. Its object is not to know the will of God, but to forecast the future; and its method of doing so is neither religious nor scientific;—not religious, for it makes no attempt humbly to approach the throne of heavenly grace; and not scientific, because for the patient study of the laws by which God rules the universe it substitutes a system of jumping at conclusions. It applies to dreams the same mode of interpretation as to other omens: it blindly assumes that things casually connected in thought are causally connected in fact, and draws its erroneous conclusions accordingly. These illogical processes frequently become developed into regular codes of interpretation (as, for instance, among the Arabs, the Persians, and in the *Oneirocritica* of Artemidorus) by means of which anyone can interpret his own dreams, and thus the uneducated classes in a civilized people relapse into a stage of thought as low as that of the savage.

Assuming it, for the moment, to be true that the state of partial consciousness which we call dreaming may, in exceptional cases, be chosen as the moment for divine communications to man, we see from the above sketch that the human race generally has reached the truth only after, and in consequence of, making many mistakes, just as Kepler invented and rejected fourteen theories to account for the apparent position of Mars before he hit upon the right one, and just as the path of every science is strewed with the ruins of abandoned hypotheses. The question then arises whether the Jews also struggled through error into truth. In the first place, dreams are recorded both in NT (Mt 1^{20} $2^{13.20}$) and in OT (Dn 2^{28}) which are expressly said to be communications from God; though it is only in OT, and there only in Gn (28^{12}, Jacob's ladder), that God is said to appear Himself. In the next place there are dreams recorded (*e.g.* those of the chief butler and baker and of Pharaoh, Gn 40 and 41) which, though prophetic, are not expressly said to come from God; indeed, from Gn 40^{8} it appears that in the case of such dreams it is rather the 'interpretations' that 'belong to God.' Third, all the dreams actually mentioned in the Bible are dreams which came unsought, but the words of Saul (1 S 28^{15} 'God is departed from me and answereth me no more, neither by prophets nor by dreams') seem to indicate the existence of the practice (whether approved or disapproved of by the higher religious consciousness of the community) of deliberately seeking supernatural dreams, as they were sought in the cave of Trophonius. Fourth, it would appear from Jer 27^{9} that there was amongst the Israelites a tendency, which the prophets opposed, to regard the mere dreaming of dreams as itself an indication that the dreamer was a chosen medium of divine communications, as the Zulus regard a 'house of dreams' as a chosen medium also. On the other hand, we do not find in the Bible any traces of the superstitious interpretation of dreams such as was known to the Arabs; on the contrary, Joseph declares (Gn 40^{8}) with emphasis that 'interpretations belong to God'; and we do not find that dreams, when sought, were induced by artificial means. Thus, to sum up, on the one hand the Scriptures start from a spiritual height to which the religious consciousness of the heathen world attained only after a long course of evolution, and then only in the case of an isolated genius like Plato; on the other hand, there are indications that the Israelites passed through several of the same stages of error as the rest of mankind.

Thus far we have said nothing of the psychological and physiological laws of dreams. The connexion between bodily states and dreams is recognized in practice if not in theory by the savage who induces dreams by fasting or the use of drugs. Civilized man, even in the prescientific period, further recognizes that the experiences of the day furnish most of the material for our fancies of the night: dreams, says Lily, 'come either by things we see in the day or meates that we eat'; Herodotus makes Artabanus explain Xerxes' dream as due to his anxiety about his projected invasion of Greece; and the dream of Pharaoh may similarly have been due to the anxiety which a 'low Nile' must cause in any one responsible for the government of Egypt. Hippocrates discovered that certain diseases announce their approach by disturbing dreams, and modern medical science confirms the discovery. Without going further into the physiological theory of dreams, we may note that the ordinary concomitant of dreaming is probably an excessive or a deficient supply of blood to the brain. Now, the recognition of the fact that dreaming has its laws, combined with the belief that some dreams are supernatural communications, sometimes leads to the statement that some dreams are sent by God, some (most) not; and this statement conveys a truth in a form open to serious misapprehension. It may be taken to imply two things, both false, viz. (1) that dreams which happen according to natural laws are not part of God's will and design; (2) that dreams which are divine are irreconcilable with the laws by which He governs the universe. A less misleading way of stating the facts would seem to be to say that His laws act in such a way that we find ourselves at some times in closer communion with Him than at others. All our states of consciousness (whether of complete or of partial consciousness) have their psychological laws and also their physical counterparts in the chemical processes of the brain and nervous tissue; the mental processes which issued in the production of the *Iliad* or *Hamlet* were all in accordance with psychological laws, and all had their physiological counterparts. So, too, every process of reasoning has its psychological and physiological laws, but we do not consider that this fact impedes us in any way from distinguishing good reasoning from bad, or that it prevents us from recognizing the truth when it is presented to us, or that any study of either of those sciences will enable us to dispense with logic or supply us with a better means of distinguishing, say, between a correct syllogistic inference and an illicit process of the minor than logic already affords us. So, too, the fact that our states of partial consciousness are all under law—physiological and psychological—does not constitute any impediment to our distinguishing those states which do from those states which do not possess the characteristics of divine revelations; nor can it impeach the validity of the distinction thus drawn by the religious consciousness of mankind, Christian, Jew, and Gentile, any more than it can impeach the validity drawn by logic between correct and incorrect inferences. The question is one of fact. Do sub-conscious states, possessing the characteristics in question, occur? And to recognize those characteristics is the prerogative of the religious consciousness. If it be said that in the waking state such recognition is possible, but not in a state of partial consciousness, we must inquire on what grounds the statement is made. If on the ground that our sub-conscious states are under physiological laws, then our reply is that so also are states of complete consciousness. If on the ground that in a state of partial consciousness the very faculty whose function is recognition of the kind in question may be dormant, to this our reply is that in the vast number of cases it undoubtedly is dormant; but just as Condorcet, in an exceptional abnormal condition, could, in sub-conscious sleep, work out a mathematical problem which awake he could not solve, and just as Coleridge could compose in sleep the poem of *Kubla Khan*, so in abnormal cases the power of spiritual perception, relieved from the pressure of external sensations, may conceivably be heightened to a pitch of exaltation as far above its ordinary degree of activity and receptivity as the imagination of Coleridge or the mathematical reason of Condorcet was in the cases alluded to. 'The fact that all or most men suppose some significance in dreams constitutes a ground for believing that the supposition is based on experience' (Aristotle, *Div. per Somn.* i.).

F. B. JEVONS.

DRESS.—To 'dress' (fr. Lat. *directus*, through old Fr. *dresser*) is in meaning as in deriv. the same as 'direct.' Thus Wyclif translates Ps 5^8 'dresse thou my weie in thi sight,' 40^2 'he dresside my goyngis'; Lk 1^{79} 'to dresse oure feet in to the weie of pees.' (Cf. the use still of 'dress' as a military technical term.) In AV the word is used in the general sense of 'put right,' much as we now use 'do.' Indeed the Heb. most freq. translated 'dress' is the ordinary verb 'to do' (עָשָׂה *'âsâh*), Gn $18^{7.8}$ a calf for food; Lv 7^9 meat-offering, 'dressed in the frying-pan,' 1 S 25^{18} sheep for food, 2 S $12^{4\,bis}$ a lamb for food, $13^{5.7}$ meat, 19^{24} the feet = wash, 1 K 17^{12} a cake, $18^{23.25.26}$ a bullock for sacrifice. The other words are עָבַד *'âbhadh*, to 'work,' Gn 2^{15} the garden of Eden (in 2^5 tr. 'till'), Dt 28^{39} vineyards; cf. Lk 13^7 ἀμπελουργός, AV 'dresser of his vineyard,' RV 'vinedresser'; γεώργιον ξύλου, Sir 27^6, AV 'if the tree have been dressed,' RV 'the husbandry,' as in 1 Co 3^9; γεωργέω He 6^7, AV 'dress,' RV 'till'; הֵיטִיב *hêṭîbh*, 'prepare' (lit. 'do good to'), Ex 30^7 lamps. Cf. Tindale, *Works*, p. 453: 'The lampe must be dressed and snuffed dayly.' RV gives 'dresser' for AV 'gatherer' Am 7^{14} (בּוֹלֵס, see Driver's note).

J. HASTINGS.

DRESS.—The study of Oriental dress serves to explain particular allusions to clothing in the Bible; it imparts a fresh interest to the narrative by presenting to the eye a picture of those written about; and through a knowledge of the various articles of costume and of Oriental usage and sentiment connected with them, it enables us to follow the sacred writers into the figurative meanings they sought to convey when common facts about the outward garments were applied to the clothing of the inner man. Special attention is rendered necessary by the fact that while the general character of Oriental dress is recognized by all, it is often difficult to pronounce upon particular articles as to origin, material, and usage. In this respect the subject resembles that of Pal. architecture, inasmuch as an ancient wall may have stones of Phœnician, Jewish, Greek, Roman, Saracenic, and Crusading styles, and yet the experienced archæologist may have much difficulty in naming the builder and assigning the date of actual construction. So with regard to dress, amid certain features that were characteristic of Israel, the separated people copied largely from the customs of Canaan, Egypt, Babylon, Greece, and Rome. The chief points of inquiry are those that deal with 1. Materials of Dress; 2. Articles of Dress; 3. Oriental Custom and thought about Dress.

I. MATERIALS OF DRESS.—These were (1) wool and hair; (2) linen and cotton; (3) silk. 1. Wool (צֶמֶר), Hair (שֵׂעָר). One of the earliest forms of clothing in the East would be that of a sheepskin worn as a vest or jacket, or in the larger form of a cloak made of several sewn together, with the wool left on. These are still in use with the wool either inside or outside. The next stage was the removal of the wool and the art of weaving (which see). Sheep-shearing is mentioned in Gn 31^{19} 38^{12}, 1 S $25^{2ff.}$, 2 S $13^{23ff.}$ etc. The hair of the goat has also been used from time immemorial, especially for material that had to bear much exposure and strain. The shepherds' tents are made of it, also bags for holding grain and flour. Hence it is called sackcloth (שַׂק). The hair of the camel was also manufactured into cloth, rougher than that made from wool, but softer than sackcloth. At present it is largely employed for cloaks and rugs, and naturally for camel-harness. The term אַדֶּרֶת (1 K $19^{13.19}$, 2 K 2^{13}, Jos $7^{21.24}$, Jon 3^6) may either indicate that the cloak was originally taken from a skin, or may be simply descriptive of its size. The combination אַדֶּרֶת שֵׂעָר occurs Gn 25^{25}, Zec 13^4.

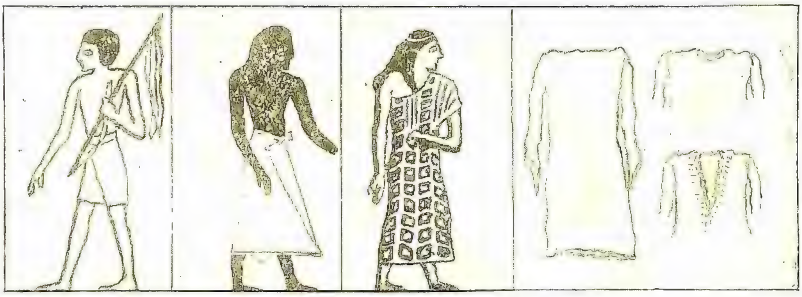
2. Cotton, Linen, שֵׁשׁ (Arab. *shash*), פִּשְׁתִּים; בַּד, בּוּץ (Arab. *bazz*), βύσσος; כְּתֹנֶת (Arab. *kitan*), ὀθόνιον, λίνεος. The warmth of the Oriental climate and the advance of civilization bringing more of indoor-life and social gradation, tended to create a widespread demand for this manufacture. Egypt and Syria sent their merchandise of linen and broidered goods to Tyre, Ezk $27^{7.16}$. The Indian source of supply is preserved in the Arab. name *Shesh-Hindi* (Indian cambric). The word *karpas* (of Persian origin) should also be translated 'cotton' in Est 1^6. See COTTON. Cotton and linen were not carefully distinguished. At the present day the Indian

cotton cloth with stamped bright patterns, used for hangings and dados, is very like the linen of the Egyptian mummy-cloths. For the Israelites it was enough to know that those stuffs were both of vegetable fibre, and not of wool. The mixture of wool and linen was called שַׁעַטְנֵז (Dt 22[11], Lv 19[19] only), a word of uncertain (perhaps Egyptian) origin (see Driver, *ad loc.*). Garments made of it were forbidden to the Israelites.

3. Silk. מֶשִׁי* Ezk 16[10.13], *σηρικόν*, Rev 18[12] (from *Σῆρες*, the name of an Indian people from whom, acc. to Strabo [516, 701], the ancients got the first silk). A common name for silk in Arabic is *ḥarîr*, a word whose derivation is most uncertain (see Fränkel, *Aram. Fremdwörter*, 39. In Pr 31[22] AV incorrectly gives 'silk' as tr[n] of שֵׁשׁ (RV correctly 'fine linen').

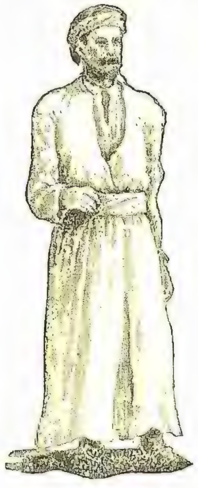
II. ARTICLES OF DRESS.—1. *Shirt, Sheet, Linen Garment* (סָדִין *sādîn*, *σινδών*, Jg 14[12.13], Pr 31[24], Is 3[23], 1 Mac 10[14], Mk 14[51]). This was worn next to the body, and was nearest in purpose to the first coverings mentioned in Gn 3[7.21]. When it appears as the only garment, it is a cotton or linen wrapper of various sizes. Once representing all, it continued to give something of its character to all the other articles of Oriental dress. It would be the waist-cloth of the Israelites in the brick-fields of Egypt as shown in the monuments, a towel, white or coloured, wrapped tightly round the loins or reaching down towards the knees. Of similar material and shape, though somewhat larger, it was worn in Palestine by boatmen, fishermen, wood-sawyers, and drawers of water. It was also found as a simple large sheet thrown round the body (Mk 14[51]), with an end flung over the shoulder, with or without a girdle.

When worn with other garments it took the form of a night shirt, of white cotton or linen, or coarse silk, reaching below the knees. It was made by taking a long piece of the material and folding it into two equal lengths, with the sides sewn up, and holes at the top corners for the arms, or with sleeves inserted. At the present day it is usually sold without any opening for the head. This is the proof that it is new, and allows the purchaser to please himself as to whether the opening is to be small or large, plain or ornamental. It is the same for men and women, the latter requiring a larger opening for convenience in nursing. Anyone wearing only the shirt is called naked (Jn 21[7]). It is undress.



EGYPTIAN LOIN-CLOTH AND SYRIAN SHIRT.

2. *Coat* (כְּתֹנֶת *kĕthôneth*, *χιτών*, *tunica*). The shirt passed by easy transition to the tunic-coat or second garment. It completed the indoor costume for family life, the shop, and familiar outdoor surroundings. It was not needed in the simple privacy of pastoral or Bedawi life, and its presence marked the change to the life of the village and town under conditions of trade and agriculture. The alterations consisted in having the entire front cut open, long sleeves attached, and the shape more adapted to the figure. The two fronts were drawn tightly round the body overlapping each other, and the waist was firmly bound with a belt or sash. It thus resembled a cassock or dressing-gown. From the fact of its covering and supplementing the shirt, and being like it in form, it was obviously meant to be superior to it in material and appearance. It was most frequently made of striped and bright-coloured cotton or linen, and sometimes of woollen cloth. The overlapping front confined by the girdle formed a recess for carrying any small parcel, such as bread for the journey. A slit was made on each side of the skirt, about a foot long, so as to allow greater freedom in walking. See COAT.



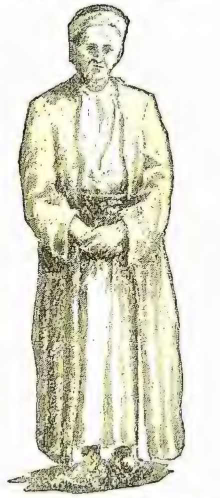
COAT (*Kĕthôneth*).

3. *Cloak* (מְעִיל *mĕ-'îl*, שִׂמְלָה *simlâh*, בֶּגֶד *beged*, *ἱμάτιον*; Arab. *jubbeh*, *meshlaḥ*, *abâa'*).—The outermost garment was distinguished by its greater size, and the absence of the girdle. There was much variety in shape, quality, and material caused by the social position of the wearer and the style of Babylonia, Egypt, or Syria, which it most resembled. It was called מַד, *ποδήρης*, from its length; לְבוּשׁ, כְּסוּת, שִׁית, *ἐπενδύτης*, *περιβόλαιον*, from its enveloping fulness. Hence it represents clothing generally, and is translated 'apparel,' 'raiment,' 'vesture,' 'attire,' etc. To it especially refer the expressions 'changes of raiment,' 'suits of apparel.' Two varieties may be distinguished. (*a*) מְעִיל, *στολή*. This was a long loose robe with very wide sleeves worn over the belted coat and shirt. It was a dress

---

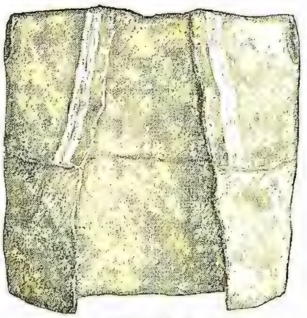
* 'Silk' is accepted by Siegfried-Stade as the meaning of מֶשִׁי, but A. B. Davidson (*Comm. ad loc.*) doubts if silk was worn as early as the time of Ezekiel. 'The LXX (*τρίχαπτος*) and ancients thought of some very thin and delicate material. The kind of garment was probably some large wrapper or veil covering the whole person.'

that expressed dignity, culture, and distinction, and was expressly the mark of the priestly, educated, wealthy, and official classes. It resembled (2) in length, and was as much superior to it as it was to the shirt. While a public dress, it was of lighter and more ornamental material than the square *simlâh*, which was pre-eminently the outdoor cloak. It was the characteristic robe of the professions (1 Ch 15^{27}, 1 S 2^{19} 15^{27}), the mark of high rank and station (1 S 18^{4} 24^{5}), the מַחֲלָצָה *maḥălâẓâh*, suit of exchange of the Hebrews (Is 3^{22}, Zec 3^{4}), the *thaub* or *badăleh* of the Arabs. In Egypt it is sometimes worn as a long black surplice, but usually it is open and unconfined. Such was the robe of the Ephod with its fringes and bells swaying with the motion of the figure. The Jewish *ṭallith* and the Arabic *burnous* resemble it in ornamental lightness, but the stripes of the one and the form of the other point rather to the *simlâh*. It was worn by Saul (1 S 24^{4}), was given by Jonathan to David (1 S 18^{4}), was the long robe of the Pharisees (Lk 20^{46}), and of those 'arrayed in white robes' (Rev 7^{13}). It was always emblematic of social intercourse and high rank. It was the *full dress* of ancient times. At present in Syria it is almost confined to the Oriental clergy, and to Moslems of the official and merchant classes, the latter often having it faced and partly lined with soft fur. Joseph's coat (כְּתֹנֶת פַּסִּים) was most likely an open long *mĕ-'îl*. It was an unusual article of pastoral or Bedawi dress, which generally comprises the shirt with belt, and the square cloak or *simlâh* of wool or haircloth, with frequently a sheepskin vest between. Such a special garment worn by Joseph would be a mark of favour and an occasion of jealous comparison. The coat (RV 'robe'), 1 S 2^{19}, annually brought to Samuel would also be of this sort.

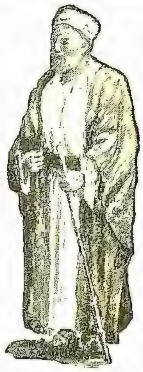


CLOAK OR ROBE (*Mĕ-'îl*, στολή).

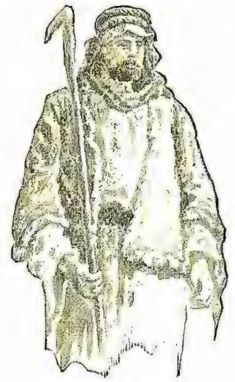
(*b*) שִׂמְלָה *simlâh*, ἱμάτιον. This was the largest and heaviest article of Oriental dress, being the dress of travel, of the shepherd, worn for protection against cold and rain, and used as a covering during sleep (Ex 22^{26}). It consisted of a piece of cloth about 7 ft. from right to left, and 4½ from top to bottom. A width of 1½ ft. was folded in at each side, and sewn along the top, with a slit at each top-corner through which the hand and wrist could pass. The garment thus losing about 1½ ft. on each side became a square. Usually, two pieces, each 7 ft. long and 2 ft. wide, were sewn together to make the block material, and the over-edged joining is seen running across the back. The finest kind, however, is made of one entire piece. Such, most likely, was Christ's 'garment without seam' (Jn 19^{23}). The 'hairy garment' (אַדֶּרֶת), Gn 25^{25}, may have been a camel-hair *simlâh*. The Arabs call their black tents *houses of hair*, and the term usually distinguishes cloth of camel or goat hair from that made of sheep's wool. Cloaks of camel hair are common at the present day, those made in the neighbourhood of ancient Cilicia having a rough surface like that of Scotch shooting tweed, but much firmer and heavier in the make. They are often of a coppery-brown colour, and the comparison in Gn 25^{25} would be easily suggested. They are also made of wool and of goats' hair. Ornamentation of coloured silk or red wool is frequently sewn upon the neck, front, and back. The general surface is often further relieved by its being woven in broad stripes of darker and lighter, or black and white colours. In the ordinary *simlâh* of the Syrian shepherd and farmer this is the most characteristic feature. Elijah's mantle and John the Baptist's raiment were of the square cloak pattern. The Bab. garment in Jericho was an ornamental one, possibly of crimson colour, like those described in Ezk 23^{15}. The large outer garments of shepherds on the hills and inward plains is often made of sheep skins with the fleece left on; but as frequently this is a vest, and the ordinary cloak is worn over it. See CLOKE.



CLOAK (*Simlâh*, ἱμάτιον).



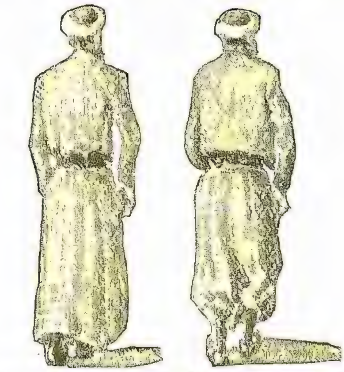
SIMLÂH AS WORN.



SHEEPSKIN COAT.

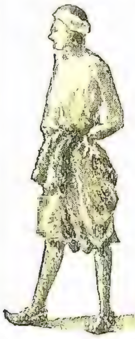
4. *Breeches of linen* (מִכְנְסֵי בַד *mikhnĕsê bad*, Ex 28^{42}; סַרְבָּלִין *ṣarbâlîn*, Dn 3^{21}; RV *hosen*; Ges. *Thes.* 'vel feminalia vel pallia'). The first word indicates that which is drawn together, that is, by the waist-cord passing inside the hem of the gathers. The second means most likely the Persian divided skirt or loose trousers, Arab. *sirwâl*, as the principal article of the common dress when such trousers are worn. In modern Arab. it is called

libâs=‘clothing,’ for the same reason. It was evidently a modification of the long shirt or tunic-coat, dividing it into two parts at the belt, the upper part being a short Zouave jacket, often highly ornamented, and the lower part being the *ṣarbâlîn*, ‘hosen.’ A long piece of cloth was made into a wide open bag by sewing up the bottom, except a hole at each corner for the feet to pass through. The upper edge was hemmed, and drawn together by a cord or sash within the hem. A mass of plaited cloth thus hung down between the knees, and even trailed between the feet, as a sign of leisure and luxury. During active exercise, such as hoeing, walking, running, these folds were tucked up under the belt in front or behind or at the sides. This was to have the loins girt.

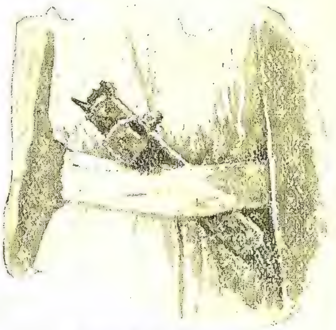


TRANSITION FROM ‘KĔTHÔNETH’ TO ‘SARBÂLÎN.’

5. *Girdle*. **1.** חֲגוֹר 1 S 18^4. **2.** אַבְנֵט *’abnēṭ*, only of high priest or a high official, Ex 28^4, Is 22^{21}, prob. a sash wound round the waist several times and falling to the feet; cf. Stade, *ThL* (1894), p. 236; Jos. *Ant.* III. vii. 2. **3.** אֵזוֹר ‘waistband,’ see W. R. Smith as quoted in *Oxf. Heb. Lex. s.v.*, also *Expos. Times*, iii. (1893), 243, 256. The girdle was worn over (1) and (2), and was sometimes a cord, often a leather belt as now worn by Eastern monks. For the purse arrangement in it, see BAG. The girdle braced the hip-joints for prolonged exertion, and under it the hanging skirts were drawn up. It served to hold the ink-horn of the scribe, with its box of *atramentum* or black fluid, soaked up into sponge or pith, and its case for holding reed pens. The sash was *the order of the garter* in Oriental costume, the ends being richly ornamented with needlework in silk and gold (see EMBROIDERY). The military girdle (2 S 20^8) was a baldrick, often set with gems. The girdle was not used to bind up the loose outer garment for purposes of activity, although the Bedawin occasionally apply it to this purpose. The *simlâh*, cloak, was then rather folded over the arm, or thrown over the shoulder, or laid aside, as at the stoning of Stephen. But when a large bundle had to be carried a considerable distance, the cloak was drawn up somewhat, and the belt fastened tightly around it over the waist, thus forming a large pouch or sack behind. This was prob. the way in which the Israelites carried their kneading-troughs (Ex 12^{34}).

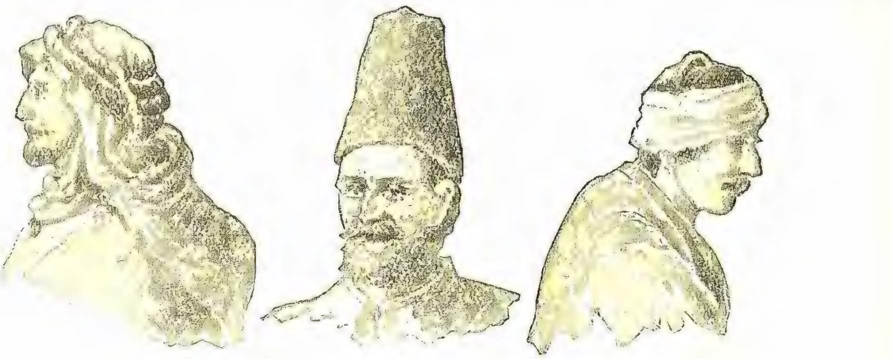


1. LOINS GIRT.



2. GIRDLE WITH INKHORN.

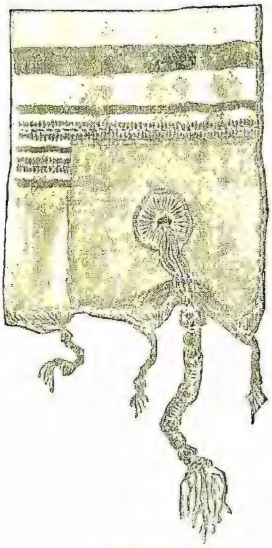
6. *Head-dress*; AV Bonnet, RV Head-tire (מִגְבָּעָה *migbâ‘âh* (see BONNET); פְּאֵר *pĕ’êr*, Is 3^{20}; צָנִיף *ẓânîph*, Is 3^{23}). The head-dress of the Israelites in early pastoral times would be the same as that which is worn by their successors the Bedawin. It is a piece of cotton or linen, white, blue, or black, or of brightly coloured silk, about a yard square, folded diagonally, and laid on the head so as to screen the eyes, protect the cheek-bones and the back of the neck. It is held in its place by a cord (פָּתִיל Gn 38^{18}) of soft elastic wool, usually dark brown or black, or of twisted cotton whipped with threads of silk and gold, coiled in several rings tightly round the head, making a covering at once picturesque, comfortable, and protective. The rich colours of the Bab. head-dress are described as ‘dyed attire,’ טְבוּלִים (Ezk 23^{15}). The article is now called *kufîyeh* (from the town of Kufah). Afterwards a skull-cap came to be worn, with a napkin usually white, or white with gold thread, folded into a long band and wound round it. In 1 K $30^{38.\,41}$ the *head-band* is drawn over the face to conceal the features, after the manner of Bedawin robbers. The פַּטִּישִׁין of Dn 3^{21} (RV tunics, RVm turbans, see Bevan, *ad loc.*) may have been the Persian *fez*, named from the mould in which the felt was pressed. In the case of the royal crown the cord



MALE HEAD-DRESS (1. PASTORAL. 2. PERSIAN. 3. SYRIAN PEASANT).

of the original head-dress was represented by the gold circlet, and the scarf by the cap of cloth and the coronation veil. For military head-dress see HELMET.

7. *Border, Hem, Skirt* (כָּנָף *kânâph*, 1 S 24[4]; שׁוּל *shûl*, Ex 39[4]; *κράσπεδον*, Mt 9[20]). The outer garment had four cords with tassels (צִיצִת *ẓîẓîth*, Nu 15[38], גְּדִלִים Dt 22[12], see Driver's note) at the corners. To make the border and fringes large and conspicuous was part of the Pharisaic form (Mt 23[5]). The corner fringes are seen on the large *ṭallith* of synagogue worship, and on the small one of white cotton worn like an unseen ephod next to the shirt. In the large *ṭallith*, about 2 yds. sq., of white cotton or wool with black border or stripes, a sq. inch of coloured silk is sown on each corner inside, and through a hole made precisely in the middle of the patch, so as to make the opening a mathematical corner, there is passed a cord composed of eight threads and five knots. This, with the numerical value of ציצית, 600, makes up 613, the rabbinical number of commandments in the Law. During worship the tassel is taken in the hand and raised to the lips, and the symbol of devotion used by an unchanged heart becomes a substitute for obedience. It is the letter that killeth.

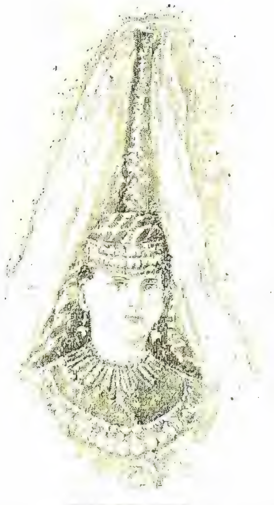


FRINGES.

8. *Napkin* (*σουδάριον*, Lk 19[20], Jn 20[7], Ac 19[12]). In a climate like that of Palestine the need of a napkin was occasioned not by cold so much as by dust and heat, as its name implies. At the present day it is used to wipe the face and the back of the hands, and is often partly folded in around the neck to protect the collar of the coat from perspiration and to give coolness. The same name is given by the Arabs to the small cotton cap which they wear under the woollen fez, and call an *arḳîyeh* (sweat-cloth).

9. *Sandals* (נַעֲלַיִם, נְעָלִים, נְעָלוֹת, *σανδάλια*, Mk 6[9], Ac 12[8]). The primitive shoe or sandal was a flat sole of leather, wood, or matted grass with loops attached, through which the shoe-latchet, a leather thong, passed and strapped in the foot. The Arab. *na'al* means the sole of the shoe, as being the principal part, thus pointing to the sandal origin. Even with the shoes or slippers of red, black, and yellow leather in common usage, the ancient habits survive, as the natives like to bend down the leather behind the heel, and make it more like a sandal. The wooden sandal in very common use has a strap nailed on to hold the foot across the toes, showing the beginning of the upper. Those worn by brides at the marriage feast are made 7 or 8 inches high to give the dignity of the cothurnus. Sandals are removed when entering a house or church, or any place where prayer is offered. The shoe being associated with outside defilement, and being the lowest article of dress, is used as an epithet of contempt and vituperation, and as an implement of beating. Socks are seldom worn, and in walking the shoe is often removed, or the foot with the shoe on is held up to shake out the dust.

10. *Female Dress.* This so far resembled male attire as to make interchange possible and prohibited, Dt 22[5]. There was the *ṣâdîn* or shirt-dress, Is 3[23]; over it a *kĕthôneth* or tunic-robe, Ca 5[3], bound with a girdle, Is 3[24]. Over this, ladies of nobility wore an ungirded *mĕ'îl* or robe after the pattern of Joseph's 'coat,' 2 S 13[18]. Social life made it possible also for women to have festival robes (AV 'changeable suits of apparel,' Is 3[22]). There is mention of *turbans*, ornamental bands of silk, or embroidered linen, Is 3[23], probably rather deeper than those commonly worn by men. Another ornamental head-dress is described by the term used for the priestly head-dress, פְּאֵר. These must have been very elaborate, judging from those of the Egyptian monuments, and the tardiness with which the metal head-bowl and horn (Arab. *tantur*) were given up by the women of Syria in modern times. The horn was worn erect, day and night, the veil of a widow being black, others white.

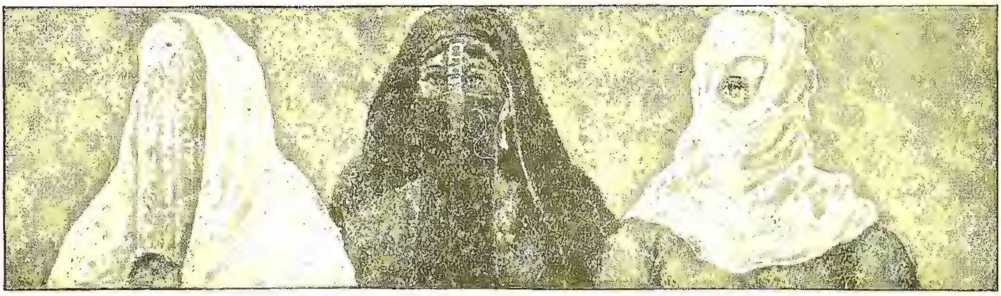


ELEVATED HORN.

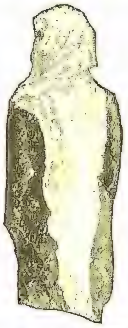
The chief articles of specially fem. attire were the veils and mantles. There were *mufflers* (רְעָלוֹת), Is 3[19], thin face-veils like gauze-muslin and nun's-veiling, the former brightly coloured with floral designs, used for the face and breast (Arab. *barḳa'a, mandil*).

It is impossible to say precisely what sort of mantle-robe the מַעֲטָפָה *mantle*, Is 3[22], may have been. The מִטְפָּחוֹת *shawls* (AV *wimples*), Is 3[22], were large veils of white lace, or tough muslin (white or indigo at present), worn over the head and falling down the back. Those worn by Bedawi and peasant women are often used for carrying grass, vegetables, or various parcels, Ru 3[15].

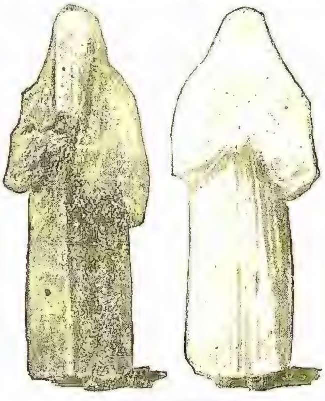
The *veils* (רְדִידִים Is 3[23]) were the largest enveloping veils, now called by the Arabs *izars*, made of white cotton, black twilled silk, or rich silk stuffs of the brightest colours and of highly ornamental patterns. This veil is one of the most familiar objects in the streets of Eastern towns. About the *caul* (RVm 'networks,' שְׁבִיסִים Is 3^{18}) there is no certainty; possibly it was a light netted veil covering the hair and falling over the shoulders, set with tiny discs of silver and gold and other pendants, something like what is still worn. So with regard to *stomacher* (פְּתִיגִיל), Is 3^{24}; as the antithesis suggests some sort of girdle, highly or even fantastically ornamental in contrast with sackcloth, it may have been the loose apron-sash with dangling ribbons and attachments worn by dancing girls.



FACE VEILS (1. SYRIAN MOSLEM. 2. EGYPTIAN. 3. LEBANON DRUZE).



HEAD AND BACK VEIL (*Mitpahath*).



LARGE VEIL (*Rădîd*).

III. ORIENTAL CUSTOM AND THOUGHT CONCERNING DRESS.—Food and clothing are the two great requisites of the natural life, 1 Ti 6^8. Clothing is the second necessity. Of its three services, *protection*, *decency*, and *ornament*, the warmth of the climate of Palestine causes the first to be less important than it is in colder countries, while the domestic customs make the second very important for women, and the love of respectful attention and dignity makes the third equally so for men. Clothing distinguishes man from the beast. 'To be unclothed' is not merely to suffer cold, but 'to be found naked' (2 Co 5^3). The phrase 'naked, and ye clothed me' (Mt 25^{36}), over and above personal comfort to the individual, means restoration to human society and human dignity. 'Clothed and in his right mind' (Mk 5^{15}) were two equal indications that Legion was no longer an outcast. So to have fine apparel was apt to carry the assumption of all inward graces (Ja 2^3).

Eastern clothing is throughout an adaptation not only to climate but to character. Clothes are flung off and on with the same rapidity as that with which heat changes to cold and sunshine to starlight; so it is with the quickly-varying moods of the people. Oriental clothes appear to the European to be cumbersome and prohibitive of exercise. This to the ordinary Oriental mind carries a subtle recommendation, implying that the wearer does not need to work. A common Arab proverb says, 'There is a blessing in being busy,' but it is usually the spectator that quotes it. The loose and ornamental style of Oriental dress emphasizes the thought that the chief good of life is not in active achievement, but in rest and the privilege of rest. Among the trades a work loses in public respect in proportion as the worker has to take off clothing when engaged in it. All clothing above the undermost easily takes on meanings of office, investiture, and precedence. Brightness and colour are synonymous with happiness and prosperity, and grief of soul is expressed by the darkest object seen in nature, the intense black of goat hair (Rev 6^{12}). Orientals always travel in their best clothes; it was scarcely necessary for the Gibeonites to assure Joshua that their raiment had been new when they started, except as indicating the length of their journey. In public worship Orientals are impressed and apparently satisfied by changed vestments and spectacular ritual to a degree that always puzzles the more ethical and introspective mind of the West.

In the Bible there are numberless instances of the employment of facts concerning dress for the expression of spiritual truth. The metaphorical application is carried out in much detail, showing that the subject was at once familiar and of extreme interest. We have such phrases as 'clothed with humility' (1 P 5^5), 'the garment of salvation, the robe of righteousness' (Is 61^{10}), into which is meant to be borne all that Oriental dress means with regard to completeness of covering and dignified grace. The girdle, head-dress, and sandals are especially rich in similitudes of strength, honour, and defilement. Thus with ref. to the *girdle*, there is the significance of its cleaving to the loins (Jer 13^{11}); of its being loosened (Is 5^{27}); its strengthening value (Is 22^{21}, 1 P 1^{13}, Eph 6^{14});

there is the pathos of being compulsorily girded (Jn 21^{18}); and the mystery of invisible support (Is 45^{5}).

Literature.—Keil, Benzinger, and Nowack, *Heb. Arch.*; Schürer, *HJP* (see 'Clothing' in Index); Conder, *Handbook to the Bible*; Edersheim, *Jesus the Messiah* ^{4} (1887), i. 621-626; Thomson, *Land and Book*, 3 vols. 1881-1886 (see 'Garments' under 'Manners and Customs' in Index to each vol.); Tristram, *Eastern Customs in Bible Lands* (1894), pp. 155-176; Maspero, *Dawn of Civilization* (1896), p. 718 f.; Lagarde, *Gesammelte Abhandlungen* (1866), p. 209 ff. G. M. Mackie.

DRINK.—See Food. **DRINK-OFFERING.**—See Sacrifice.

DROMEDARY.—Besides the word (בֵּכֶר) rendered dromedary, but which ought to have been tr^{d}. young camel (see Camel), there are two words, רֶכֶשׁ *rekesh* (rendered in 1 K 4^{28} *dromedaries*, and in Est $8^{10.\,14}$ *mules*, and in Mic 1^{13} *swift beasts*), and רַמָּךְ *rammâk* (Est 8^{10} AV *young dromedaries*). *Rekesh* (a rare synonym of סוּס) probably denoted a species of horse noted for some choice quality. That this quality was *swiftness* is quite uncertain. *Rammâk* is Pers. *ramah*, 'flock' or 'herd' (see Ges. *Thes.*). In Est 8^{10} בְּנֵי ר׳, lit. 'sons of the herd,' is tr^{d} in RV 'bred of the stud.' To all appearance, then, we must drop the dromedary from the list of Bible animals. G. E. Post.

DROPSY.—See Medicine.

DROSS (סִיג, Kethibh סוּג, sing. only in Ezk 22^{18a}, elsewhere always plur. סִגִּים, סָגִים, סִיגִים).—For the process whereby dross was separated from the pure metal, see Furnace, Refiner. The word is several times used in the OT metaphorically for what is base and worthless, *e.g.* Ps 119^{119} (of the wicked), Is $1^{22.\,25}$, Ezk $22^{18.\,19}$ (of degenerate Israel). J. A. Selbie.

DROUGHT.—See Crimes and Punishments, also Famine.

DROVE.—This word is the equivalent in AV of two Heb. words. 1. עֵדֶר *'êder* (Gn $32^{16.\,19}$). *'Êder* is elsewhere rendered *flock* (see Flock), except in one place (Jl 1^{18}), where it occurs twice in the construct state, עֶדְרֵי־בָקָר, which is tr^{d} '*herds* of *cattle*,' and עֶדְרֵי הַצֹּאן '*flocks* of *sheep*.' 2. מַחֲנֶה *maḥăneh*. This word, although rendered in Gn 33^{8} AV *drove*, is rendered once in the same connexion (32^{7}) *bands*, and twice (32^{8}) *company*. This last, which is the correct tr., is adopted by RV (cf. Gn 50^{9}). See Herd. G. E. Post.

DROWNING.—See Crimes and Punishments.

DRUNKENNESS.—The spectacle of men beside themselves through alcoholic drink has been familiar from the beginning of history, and all languages have terms in which to describe it. It is a subject that appears in the Bible, as in other ancient writings.

1. *Some of the terms used in the Scriptures in connexion with drunkenness.*—The Heb. has no word that describes this vice, like the Eng. words 'drunken,' 'drunkard,' 'drunkenness,' 'inebriate,' in terms derived from the physical act of drinking. It has two stems in common use ([*shâḳâh*] and *shâthâh*, שָׁקָה and שָׁתָה) referring to the act of drinking; and each denotes indifferently the drinking of water or wine or other liquids, drinking by men or by animals or by the ground. From one of these stems comes the word *mashḳeh*, not often used, denoting a butler or cupbearer, one who serves wine at table (Neh 1^{11}, Gn 40^{1} etc.). From the other comes the word *mishteh*, much used, denoting a formal feast, a banquet. This is often tr^{d} by the Gr. πότος, and once (Est 7^{7}) by συμπόσιον. Like the Gr. word, it has in it the idea of a social feast as a gathering where men *drink* together. This shows that the idea of social drinking is older than the differentiation of the Heb. language. Hence it is the more remarkable that the words of these Heb. stems never, of themselves, denote either vicious carousal or intoxication. They are sometimes used in connexion with carousal or intoxication, but in such cases the author always adds other words to indicate the vicious meaning. Even Ec 10^{17} is not an exception to this. See Banquet.

A different stem is *râwâh* (רָוָה), occurring 14 times as a verb, and 6 times in all in the form of three different nouns. The idea is that of being brimful, or saturated, or soaked (Ps 23^{5}, Job 37^{11}, Is 58^{11} 16^{9} $34^{5.\,7}$ etc.). It is possible to tr. the Heb., in every passage where these words occur, without recognizing an allusion to drunkenness. But LXX commonly tr. them by derivatives of μεθύω or πίνω, and they are no doubt to be regarded as denoting drunkenness. It is as when we speak of a habitually drunken man as a soaker, or as sodden with drink (Jer 46^{10}, La 3^{15}).

Another stem, *ṣâbhâ* (סָבָא), is used in all 8 or 9 times. Its meaning is nearly that of our Eng. 'to guzzle,' that is, to drink intoxicants greedily, with stupefying effect. The active participle denotes the guzzler as in the act, the passive participle describes him as affected by the liquor, the noun denotes either the liquor or the act of guzzling (Is 56^{12}, Dt 21^{20}, Pr $23^{20.\,21}$, Nah 1^{10}, Is 1^{22}, Hos 4^{18}).

More important than all these is the stem *shâkhar* (שָׁכַר). The verb means to become intoxicated, and in common use are the nouns *shēkhār*, 'intoxicating liquor' (see Strong Drink); *shikkōr*, 'drunkard,' and *shikkārôn*, 'drunkenness.' Many hold that the word is the same with our *sugar*, and that group of words in the Western languages. If so, the Heb. word and the Western word start together with the fact that sugar is present at the formation of alcohol, but follow entirely different lines of meaning. The usage of the Heb. stem is abundant and clear, leaving no doubt as to its meaning. Hebrew-speaking people were familiar with the spectacle of men overcome by alcohol, and they used the words of this stem to express this familiar fact.

In NT, and in Gr. VSS of OT, quite a variety of terms are used, but we need mention only one group: μέθη, 'habitual intoxication'; μεθύω, 'to be intoxicated'; μεθύσκω, 'to make intoxicated'; μεθύσμα, 'an intoxicant'; μέθυσος, 'intoxicated.' In their meaning and use (both literal and metaphorical) the words of this group are similar to those of the Heb. group last mentioned.

2. *Particulars given in the Bible concerning drunkenness.*—The OT and NT passages that give these particulars, though numerous, are too familiar to need direct citation. If one needs to refer to them, they are easily found by the help of a concordance. Of apocr. passages one will easily recall the contest concerning wine, kings, women, and truth, in 1 Es $3^{4\,\mathrm{ff.}}$; the drunkenness of Holofernes, as described in Jth 12^{20} 13^{2}; the many references to drinking usages in Sir; and other like passages.

These various canon. or apocr. passages mention abundantly many of the familiar physical effects of drunkenness: staggering, reeling, dizziness, incoherent speech, redness of eyes, vomiting, stupid sleep, insensibility to blows, insatiable appetite for more stimulant. They speak of its mental effects: exhilaration, jollity, loss of good judgment, inconsequence of thought and purpose, inability to keep secrets, quarrelsomeness, shamelessness, failure to remember afterwards what occurred while one was drunk, the purposed forgetting of one's misery, such facts as the nakedness of Noah, the helplessness of Amnon, the sodden condition of Nabal. They speak of festal drinking, of usages compelling one to drink, or exempting him from compulsion (Est 1^{8}), of carousals, dissipations, excess, riot, of the Syrian king drinking himself drunk in his tent in the face of the enemy, many times of the high-born people of both Israel and Judah as wasting their property and energies in costly drinking feasts, of the connexion of drunkenness with licentiousness and gambling, of orgies in which the three were mingled (Jl 3^{3}). They speak of the permanent effects of these things on one's condition of life, of the guzzler and the glutton who bring themselves to poverty, to loss of energy, to rags. They speak of sociological effects, of men who by reason of private dissipations neglect public duty, of men who ought to be ambitious to serve God and their country, but whose actual ambitions run in the line of compounding or drinking intoxicating beverages (*e.g.* Is 5$^{11. 12. 22}$), of consequent incapacitation for leadership, and resulting oppression and injustice at home, and boundless defeat and slaughter by foreign invaders.

In these and other particulars no one can fail to recognize the widespread prevalence of drunkenness and its evils in the biblical times, and their identity with the same evils as now existing. Especial importance attaches, therefore, to anything the Bible has to say in regard to the remedy.

The author of Sir says: 'Wine drunk in season and to satisfy is joy of heart and gladness of soul; wine drunk largely is bitterness of soul, with provocation and conflict' (31$^{28.29}$). Similar passages abound in ancient literature. They commend the moderate use of intoxicants, and condemn the excessive use; generally drawing the line, however, not between exhilaration and drunkenness, but between drunkenness that is regarded as occasional and seasonable and drunkenness that is habitual and unseasonable. In view of this, it is worth noting that our canonical books contain no such passage. On the other hand, they unqualifiedly condemn drunkenness. They lay down the proposition, 'Look not on the wine when it is red' (Pr 23^{31}). In such cases as those of the priests (Lv 10^{9}), of Daniel, of the Rechabites, of the Nazirites, they teach that even total abstinence is sometimes a duty.

An account of the intoxicating liquors mentioned in the Bible will be found under the titles STRONG DRINK and WINE. See also FOOD.

3. *The difference between the ancient and the modern problem.*—With all their many points of identity, there is a large and important group of differences. Any one who will carefully study all the passages in the Bible which speak of this matter will note that, in a large majority of them, drunkenness is explicitly spoken of as the vice of the wealthy. Perhaps there is not an instance in which habitual drunkenness is attributed to any who are not wealthy. In modern times, on the contrary, drunkenness is supposed to be much more prevalent among the poor than among the well-to-do. This difference is not an accident. It is mainly the result of the cheapening of intoxicants, through improved processes of distilling and brewing, introduced within the past two or three centuries. When the price of enough wine or beer to make a man drunk was equal to half a month's wages, and no other intoxicants were to be had, it was impossible for most men to become sodden drunkards. The case is different when an hour's labour will pay for an intoxicating quantity of cheap liquor. In the older time, habitual drunkenness was possible for thousands where it is now possible for hundreds of thousands. This vast modern extension of the domain of intemperance should not be forgotten when we study the Bible for practical light on the subject. To this might be added a large number of important differences of detail between ancient life and modern life that have bearings on the question in hand. The outcome of such a comparison is that drunkenness and its attendant evils, inexcusable, widespread, harmful, and dangerous as they were in the civilizations in which the Scriptures were written, are immeasurably more so in our existing civilization, and we ought to deal with the problem accordingly.

W. J. BEECHER.

DRUSILLA (Δρούσιλλα).—See HEROD.

DUKE.—This word being applied in AV with two exceptions * to the chiefs of Edom, the impression is formed that in the family of Esau this was a hereditary title, as it is in Britain now. It is, however, never a title in AV, but a general expression for 'chief,' being formed from Lat. *dux* (the word in the Vulg.), and the tr. of a word (אַלֻּף or אַלּוּף *'allûph*) which is also applied to the princes of Judah (Zec 9^{7} 12$^{5.6}$. See CHIEF, ii. 3).

The Heb. word is probably more specific than its Eng. equivalent, being held by Dillmann (on Gn 36^{15}) to be derived from אֶלֶף *'eleph*, a thousand; so properly 'a chiliarch,' and understood by Driver (*Expos.* III. ii. 9) 'to denote properly the *leader of a clan*,' and as 'probably the indigenous name borne in Edom by the chiefs of the several φυλαί or clans'; while in Eng. 'duke' was freely applied to any leader or chief of any rank and nation. Thus 'Annibal, duke of Carthaginensis'—Sir T. Elyot, *The Governour*, ii. 233; 'Ther was a duk that highte Theseus'—Chaucer, *Knight's Tale*, 2; after whom Shaks. *Mids. Night's Dream*, I. i. 20: 'Happy be Theseus, our renowned duke!'; Latimer (*Works*, i. 31) calls Gideon 'a duke'; and Wyclif uses the word of the Messiah, Mt 2^{6} 'And thou, Bethleem, the lond of Juda, art not the leest among the prynces of Juda; for of thee a duyk schal go out, that schal gouerne my puple of Israel'; and *Select Works*, iii. 137, 'Jesus Christ, duke of oure batel, taght us lawe of pacience, and not to feght bodily.' Between 1572 and 1623 (that is, when AV was made) the title was extinct in England.

J. HASTINGS.

DULCIMER.—See MUSIC.

DUMAH (דּוּמָה).—1. Son of Ishmael (Gn 25^{14}, 1 Ch 1^{30}), representing some Arabian tribe or locality. There are many places of this name mentioned by the Arabian geographers, its signification in Arabic (*daumun*, nom. unit. *daumatun*) being the branched wild nut, common in Arabia Deserta (Doughty, *Travels in A. D.*, Index). The most important of the places called after it, *Dumat al-Jandal* (also written *Daumat* and *Daumā'*) was identified by the earlier Mohammedan archæologists with the place mentioned in Gn (Yakut, *s.v.*); and it is probable that the same place is referred to by Pliny (*HN* vi. 32), who is acquainted with a *Domatha* in the neighbourhood of the Thamudeni (as well as a Thumati), and Ptolemy, who mentions a city Δουμεθά or Δουμαιθά in Arabia Deserta (v. 19, 7), as well as a city of importance of the same name in Arabia Felix (viii. 22, 3). Stephanus Byz. *s.v.* quotes Glaucus in the second book of his *Arabian Antiquities* as mentioning a city of the name, and Porphyry, *De Abstinent.* ii. 56, asserts that an Arabian tribe named *Dumathii* sacrificed a boy every year, and buried him under the altar which they used as an idol, probably with reference to the same place. Its site is fixed by the geographer Al-Bekri (i. 353) as 'ten days' journey from Medina, ten from Cufa, eight from Damascus, and twelve from Misr'; but by Mas'udi (*Bibl. Geog. Arab.* vii. 248) as 'five from Medina, and fifteen or thirteen from Damascus,' the latter numbers being probably more correct. The 'sūḳ Dūma,' discovered by Burckhardt in the Jauf (*Travels in Syria*, 662), has been identified with it partly on the ground of the correspondence of the names of the surrounding villages with those mentioned by the geographers (cf. Ritter, *Erdkunde von Arabien*, ii. 360–388). The only further reference to it in the Bible is perhaps to be found in the heading of Is 21[11], where an obscure oracle in a strange dialect is introduced with the words 'the *massa'* of Dumah'; for this the LXX substitutes Idumæa, and many modern critics are inclined to interpret the name Dumah (in Heb. 'silence') allegorically. It is probable that more accurate knowledge of the purport of the oracle would show the geographical interpretation to be right. 2. Name of one of the mountain cities of Judah (Jos 15[52]) according to the reading of most of the editions; but in that of Ginsburg, Rumah (רוּמָה) is substituted, and this reading is supported by the LXX (Ῥεμνά or Ῥουμά) and the Vulg. It is probable, however, that the ordinary reading Dumah is correct. In the *Onomast.* Δουμά is given as the name of a large village in the Daroma, seventeen miles from Eleutheropolis (Beit Jibrin); and it was identified by Robinson with *Khirbet Daumah*, in the neighbourhood of Beit Jibrin, where are to be seen the ruins of a village situated on two hills separated by a valley, with remains of many cisterns and caves excavated in the rock, belonging to the Canaanite or Jewish epoch, as well as vestiges of Christian buildings. The 'seventeen miles' of the *Onomast.* is an overstatement, due to the tortuous routes followed in the mountain country (Guérin, *Judée*, iii. 359–361).

---

* The one exception is Jos 13^{21} 'dukes of Sihon' (נְסִיכִים, RV 'princes'), and the other 1 Mac 10^{65}, where Jonathan Maccabæus is said to have been made a 'duke' by king Alexander (στρατηγός, RV 'captain').

D. S. MARGOLIOUTH.

DUMB.—See MEDICINE.

DUNG.—1. Used in the East as manure (Lk 13[8]) and for fuel; especially that of cattle, where wood and charcoal are scarce or unattainable. In Eastern cities there is usually a receptacle for the offal of cattle, whence it is carried out and either burnt or used as manure. Directions for personal cleanliness are given in Dt 23[10-14]; and in the case of sacrifices the dung of the animals was burnt outside the camp (Ex 29[14], Lv 4[11. 12] 8[17], Nu 19[5]).

2. The word is used (*a*) to express contempt and abhorrence, as in the case of the carcase of Jezebel (2 K 9[37]); and in that of the Jews (Jer 9[22], Zeph 1[17]). (*b*) To spread dung upon the face was a sign of humiliation (Mal 2[3]). (*c*) As representing worthlessness, St. Paul counted all things but dung that he might win Christ (Ph 3[8]). E. HULL.

DUNG GATE.—See JERUSALEM.

DURA (דּוּרָא Dn 3[1], a plain 'in the province of Babylon'). Etym. uncertain. The word may be connected with the Bab. *duru*, a strong wall or fortification, possibly also with Dor (Jg 1[27]) and with צוֹר. Ammianus Marcellinus (xxv. 6) mentions it as situated E. of the Tigris. The distance of such a locality from Babylon seems to preclude the possibility of its being the same as that alluded to in Daniel. The validity of this objection depends upon the extent of territory which may be regarded as included in the expression בִּמְדִינַת בָּבֶל. The same objection of distance applies to the place of this name which occurs in Polybius (v. 48), which was on the Euphrates near the mouth of the Chaboras, more than 200 miles N.W. of Babylon.

A third (and the most probable) locality suggested is to the E. of Babylon, where Oppert found what appears to be the base of a great statue, near a mound known as Dúair. G. WALKER.

DURE.—The simple vb. 'dure' (fr. Lat. *durare*, 'be hard,' 'last') is now obsol., its place being filled by 'endure.' It occurs in AV Mt 13[21] only: 'Yet hath he not root in himself, but dureth for a while' (RV 'endureth for a while,' Gr. πρόσκαιρός ἐστι, lit. 'is temporary'; Wyc. 'is temperal,' Rhem. 'is for a time'; 'dureth' is Tindale's word, who translates the same expression in Mk 4[17] by 'endure,' and is followed by AV). 'During,' still in use, is the pres. ptcp. of this verb; cf. Tindale, *Works*, p. 476: 'when the disciples were come together vnto the breakyng of the bread, Paule made a sermon duryng to mydnight.' Not in AV, 'during' is introduced by RV into Mt 26[5], Jn 2[23] 13[2], Rev 11[6]. **Durable** is still in use, and applicable to *clothing*, as Is 23[18], but scarcely now to *riches*, as in Pr 8[18]. Cf. Purchas, *Pil.* p. 28: 'They might take up their Crosse, and follow the second Adam unto a durable happinesse.' J. HASTINGS.

DUTY is that which is *due*. In mod. Eng. it is only that which is due *by* one, but formerly expressed also that which is due *to* one. This is the meaning of Ex 21[10], AV 'If he take him another wife; her food, her raiment, and her duty of marriage shall he not diminish' (so RV). Cf. Tindale's tr. of Mt 20[14] 'Take that which is thy duty, and go thy waye,' and of Lk 12[42] 'to geve them their deutie of meate at due season'; and Knox, *Hist.* p. 117: 'I will serve my Prince with body, heart, goods, strength, and all that is in my power, except that which is God's duty, which I will reserve to him alone.' Shaks. uses the word in both senses, *Tam. of Shrew*, IV. i. 40: 'Do thy duty, and have thy duty.' For the biblical conception of Duty, see ETHICS. J. HASTINGS.

DWARF is the rendering in AV and RV of דַּק, a word (Lv 21[20]) denoting one of the physical disqualifications by which a priest was unfitted for service. The word means thin, lean, small. It is applied to Pharaoh's lean kine (Gn 41[3] etc.), to the minute grains of manna (Ex 16[14]), to the still, small voice (1 K 19[12]), and in other like instances. The conjecture that it here means a dwarf is plausible. But others regard it as meaning an unnaturally thin man—a consumptive, perhaps. The Sept. (ἔφηλος) and Vulg. connect this specification with the one that follows, as indicating defective eyes. So the meaning must be regarded as uncertain.

W. J. BEECHER.

DYEING.—The art of dyeing is not mentioned in Scripture, but *dyed stuffs* are referred to in various passages, and hence it is altogether probable that dyeing was known to the Israelites. The coloured stuffs mentioned are *blue*, *purple*, and *scarlet*; these all occurring together in the description of the hangings of the tabernacle (Ex 26[36]). It would seem that the yarn was dyed before weaving (cf. Ex 35[25]), as we know was the custom of the Egyptians (cf. Wilk. *Anc. Eg.* ii. p. 166, ed. 1878), from whom the Israelitish women may have acquired the art. The Egyptians were certainly acquainted with the art of dyeing by the use of chemicals, though they may not have understood the chemical properties of the materials employed (cf. Pliny, xxxv. 11, and Wilk. ii. 168, 169), and the Hebrews no doubt knew something of it at the time of the Exodus. At a later period they may have learned from the Phœnicians the process of making the Tyrian purple, so renowned among the ancients; but it is not probable that they produced it, as they could not readily procure the shell-fish used in its manufacture. The purple of the tabernacle, if made by the Hebrews, must have been obtained from other sources and by other methods. Purple occurs in Pr 31[22] as the clothing of the virtuous woman; and as it stands in a long list of items of her handiwork, it may indicate that she knew how to make it. Scarlet was obtained by a process similar to that of purple, as we learn from Kenrick, *Phœn.* ch. viii., and Rawlinson, *Phœn.* ch. viii. Blue was doubtless obtained from indigo, which was known to the Egyptians from their commerce with India (Wilk. ii. 164). See COLOURS.

Rams' skins 'dyed' red (עֹרֹת אֵילִם מְאָדָּמִים) are mentioned in Ex 25^{5}. This process the Hebrews could have learned also from the Egyptians (cf. Wilk. ii. 185). The art is still carried on in Syria, and large quantities of skins are tanned red for the native shoes and saddles. H. PORTER.

DYSENTERY.—See MEDICINE.

E

E.—The symbol ordinarily used in criticism of Hex. to signify the work of the [second] Elohist. See HEXATEUCH.

EAGLE (נֶשֶׁר *nesher*, ἀετός, *aquila*).—The Arab. retains the same name, in a modified form, *nisr*, substituting *sîn* for *shîn*. This term is used by the Arabs for the vultures, of which there are four species in the Holy Land. (1) *Gypætus barbatus*, Cuv., the lammergeier, the פֶּרֶס *pereṣ* of the Hebrews, AV *ossifrage*, Arab. *'anûḳ*. (2) *Gyps fulvus*, Sav., the griffon. (3) *Neophron percnopterus*, L., the Egyptian vulture, called in Arab. *raḥam* or *dejâj-Fir'aun*, Pharaoh's hen. It is the *gier eagle* of AV, not of RV. (4) *Vultur monachus*, L.

It is also used for the true eagles, of which there are eight species in the Holy Land. (1) *Aquila chrysætus*, L., the ospray of AV, which is the golden eagle, עָזְנִיָּה *'ozniyyâh*. (2) *A. heliaca*, Sav., the imperial eagle. (3) *A. clanga*, Pall., the greater spotted eagle, and perhaps *A. pomarina*, Brehm, the lesser spotted eagle, of which, however, only one specimen has been noted. (4) *A. rapax*, Temm., the tawny eagle. (5) *A. pennata*, Gmel. (6) *A. Nipalensis*, Hodges, the steppe eagle. (7) *A. bonelli*, Temm. (8) *Circætus Gallicus*, Gmel., the short-toed eagle. The last is easily recognized by its large flat head, its huge golden eyes, and brightly spotted breast. Its short toes and tarsi are covered with tesselated scales to protect it from the serpents on which it preys. It is the most abundant of the eagle tribe in Palestine. All the above birds are included by the Arabs under the generic term *nisr=nesher*, even those which have also specific names, as the ossifrage, the ospray, and the Egyptian vulture. They agree in swiftness of flight (Dt 28^{49} etc), in soaring high into the air (Pr 23^{5} 30^{19}, Is 40^{31}), in making their nests in high trees or inaccessible rocks (Job 39^{27-30}, Jer 49^{16}), and in keenness of vision (Job 39^{29}).

The expression 'enlarge thy baldness as the eagle' (Mic 1^{16}), refers to the griffon, which has its head and neck free from feathers. The references to feeding on the slain (Job 39^{30}, Mt 24^{28}) are not to be understood of vultures alone, as eagles also will feed on dead animals if they find them. But it is especially applicable to the griffon and Pharaoh's hen. Therefore in such passages (cf. Pr 30^{17}, Mt 24^{28}) the allusion is generic. The 'ravenous bird from the East' (Is 46^{11}) describes Cyrus, probably in allusion to the fact that the griffon was the emblem of Persia, and embroidered on its standard. This emblem in various forms has been copied by the Romans, Russians, Austrians, Germans, and by the United States.

The renewal of the youth of the eagle (Ps 103^{5}) is an allusion to its longevity, which sometimes reaches a hundred years. The eagle is one of the 'living creatures' of Ezk 1^{10}, Rev 4^{7}. It has been adopted as an emblem of St. John (in Irenæus of St. Mark), owing to his insight into the divine character, and his power of looking at the divine glory.

The 'bearing on eagles' wings' (Ex 19^{4}) is clearly metaphorical, and does not refer to any habit of the eagle. The passage in Dt 32^{11} 'As an eagle stirreth up her nest, fluttereth over her young, spreadeth abroad her wings, taketh them, beareth them on her wings,' is explained by the preceding verse, which reads, 'He found him in a desert land, and in the waste, howling wilderness; he led him about, he instructed him, he kept him as the apple of his eye'; and in the following verse, 'So the Lord alone did lead him, and there was no strange god with him.' The allusion is to the fostering care of the eagles for their young, and the pains they take to lure them from the nest and teach them to fly. These are well-known facts. It would be no wise difficult for an observer to fancy, in their evolutions, that the old birds actually bore up the younger ones in the air, as well as fluttered over them. G. E. POST.

EAR (אֹזֶן, *'ôzen*, οὖς).—Hearing is associated with obedience as seeing is with conviction. In the East when an order is given, the responsive gesture is to lift the hand to the head and breast, implying that the order is understood and will be carried out. Thus also in the *Arabian Nights*, after a command by a superior, the invariable reply is, 'Hearing and obeying!'

Eye, ear, and heart are concrete terms for understanding, will, and affection, and the gospel is declared to be something beyond human thoughts, desires, and passions. Men had at all times offered sacrifices to influence the will of the gods appealed to, but here God made the sacrifice to lead captive the will of man. 'Ear hath not heard' (1 Co 2^{9}). Its limit is in man's willingness to listen (Mt 13^{9}, Rev $2^{7.11.17}$, etc.). Assurance concerning God's ability to hear is drawn from the fact that He planted the ear (Ps 94^{9}). The alienated heart is called an uncircumcised ear (Jer 6^{10}).

The boring of a slave's ear by his consent was the token of life-long surrender and ownership (Ex 21^{6}; but not Ps 40^{5}, see Kirkpatrick, *ad loc.*); the tip of the ear was touched with blood in the consecration of Aaron and his sons (Lv $8^{23f.}$) and in the cleansing of a leper ($14^{14.17.25.28}$); the cutting off of the ears is mentioned as one of the atrocities perpetrated by an enemy (Ezk 23^{25}); to incline the ear is a frequent expression for to give attention (Ps 45^{10}, Pr 22^{17} etc.); the ears tingle (צָלַל) at dreadful news (1 S 3^{11}, 2 K 21^{12}, Jer 19^{3}); to open one's ear (גָּלָה אֹזֶן) is a common expression for to reveal a secret to one (1 S 9^{15} $20^{2.12.13}$, 2 S 7^{27}, 1 Ch 17^{25} etc.). G. M. MACKIE.

EAR.—To 'ear' is to plough (Old Eng. *erian*, connected with ἀρόειν and *arare*), as 'After that he tempereth it with dong, then eareth it, soweth it, and haroweth it' (*Pilgr. Perf.* 1526, p. 23); 'A silver saucer . . . was eared up by a plough' (Harrison, *England*, i. 361). In AV, Dt 21^{4} 'A rough valley, which is neither eared nor sown'

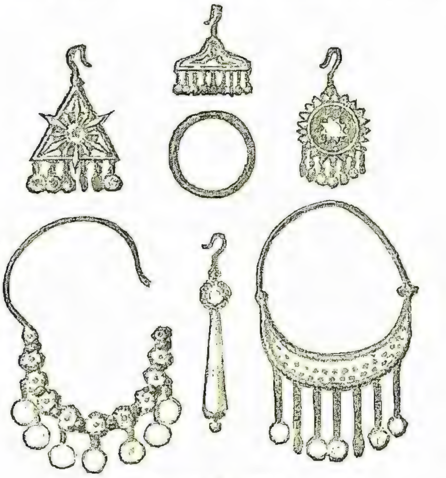
(RV ‘plowed’; so at Gn 45^{6}, Ex 34^{21}, 1 S 8^{12}); Is 30^{24} ‘the young asses that ear the ground’ (RV ‘till,’ Heb. עָבַד ‘work,’ as in Dt 21^{4}).

J. HASTINGS.

EARNEST.—There are three well-known NT passages in which this word occurs: Eph 1^{14} ‘The earnest of our inheritance’; 2 Co 1^{22} and 2 Co 5^{5} ‘The earnest of the Spirit.’ In all three instances the Greek word (introduced perhaps by Phœnician traders) is the same, ἀῤῥαβών. Its Lat. equivalent is *arrha* or *arrhabo* (not *pignus*), and its Eng. *arles*, now obsolete except in Scotland. The corresponding word in Heb. עֵרָבוֹן (Gn $38^{17.\,18.\,20}$) means a pledge or token, something to be returned when the terms of the contract have been observed; but by ἀῤῥαβών, *arrhabo*, *arles*, we are to understand a first instalment, given as a sure and binding engagement that the rest shall follow in due time. The earnest is a pledge, but it is a pledge consisting of part of the possession, or benefit, or blessing with which the contracting parties are concerned. The *arles* given to a servant signifies that a contract has been entered into, and it is a binding promise that the wages agreed upon will be forthcoming when the term of engagement has expired. It is really a part of the wages, and it is the same in kind as the money payment to be afterwards made. In very olden times a similar formality used to obtain in connexion with the conveyance of land, or houses, or mills. In buying a field, the purchaser had given him a clod of earth as an earnest that, at the appointed time, he should enter upon complete possession. When houses were transferred from one owner to another, the purchaser or receiver had handed him some of the thatch as *arles* or earnest that by and by the whole property should pass over into his possession. In the case of a mill, some small piece of the machinery was passed from hand to hand. These simple ceremonies were as binding as an agreement written upon parchment and made valid by the impression of a Government stamp. The idea underlying them all appears in various forms in Scripture history. Abraham’s sojourn in Canaan was a kind of earnest to a wanderer like him that his seed should by and by possess the land. When Abraham’s servant, having gone to Mesopotamia to fetch a wife for Isaac, gave Rebekah a nose-ring and bracelets and jewels of gold and silver, these were to her an earnest of Isaac’s wealth, and the evidence of a comfortable home in Canaan. Using the word in the sense above explained and illustrated, the apostle tells us that the work of the Holy Spirit in our hearts is an earnest of our heavenly inheritance. Christian knowledge, holiness, and happiness are not only a pledge, but also a foretaste of heaven’s bliss. See Eadie, *Eph.* p. 68f.

G. M. PHILPS.

EAR-RING.—נֶזֶם *nezem*, orig. nose-ring (וָאָשִׂים הַנֶּזֶם עַל־אַפָּהּ Gn 24^{47}, נִזְמֵי הָאָף Is 3^{21}, cf. Ezk 16^{12}, where first clause should read as in RV ‘I put a ring upon thy nose’), perhaps equiv. to חָח in Ex 35^{22} (AV bracelet, RV brooch); also applied to ear-ring, הַנְּזָמִים אֲשֶׁר בְּאָזְנֵיהֶם, Gn 35^{4}. In RV it is tr. *ring*, where the text makes no special reference to nose or ear. For the nose the *nezem* was a plain ring of gold worn either in the wing or central cartilage of the nose. For the ear the circular form (עָגִיל Ezk 16^{12}) was the most common, but usually ornamented with some sacred or talismanic symbol, or having one or more balls attached, hence called נְטִפוֹת Is 3^{19} (AV *chains*, RV *pendants*). In Is 3^{20} for לְחָשִׁים AV ‘ear-rings,’ RV gives ‘amulets’ (see AMULET). Such rings formed an important part of the bride’s ornaments (Gn 24^{22}). At the present day in Syria, when a young peasant woman comes into town with her friends to buy the marriage outfit, the first purchase is usually that of the ear-rings. Ear-rings are now confined to women, being regarded as barbaric and effeminate when worn by men. Among the Bedawin, in the case of an only son, the ear-ring is sometimes worn as an amulet in the form of a large silver ring suspended round the outer ear, with discs or balls attached to the lower half of the ring, hanging visible below the lobe of the ear. Rings for nose and ear formed the material of the golden calf (Ex 32^{2}), of Gideon’s image (Jg 8^{24}), and were offered for the furnishing of the tabernacle (Ex 35^{22}).



SYRIAN EAR-RINGS.

LITERATURE.—Benzinger, *Heb. Arch.* 107; Lane, *Modern Egyptians* (Append. A. ‘Female Ornaments’); Wilkinson, *Anc. Egyp.* ii. 336 ff.; Hartmann, *Hebräerin*, iii. 205; Wellsted, *Travels*, i. 321; Harmer, *Obs.* iv. 311, 314; Moore on Jg 8^{24}.

G. M. MACKIE.

EARTH is the tr. of various Heb. and Gr. terms, the most notable of which are—

1. אֲדָמָה (deriv. uncertain, perhaps from a root containing notion of being *tilled*, or of *smoothly covering and closely fitting*. See *Oxf. Heb. Lex. s.v.*), which with its LXX and NT equivalent γῆ is used (1) of the earth as tilled, Gn 2^{5} 3^{17} etc. Hence אִישׁ הָאֲדָמָה = a husbandman, Gn 9^{20}. (2) Of earth as a material substance, from which were fashioned man Gn 2^{7}, animals v.^{19}, vessels Is 45^{9} (see POTTERY), of which at times altars were made Ex 20^{24}, cf. 2 K 5^{17}, and which was put upon the head as a token of woe or of contrition 1 S 4^{12}, 2 S 1^{2}, Neh 9^{1}. In this last reference the term more frequently employed is עָפָר = dust, which is rendered *earth* in such passages as Gn 26^{15}, Job 8^{19} 19^{25} 28^{2} 30^{6} 41^{33}, Is 2^{19}, Dn 12^{2}. (3) Of earth as the visible surface of the globe, in such phrases as ‘everything that creepeth upon the face of the earth’ (RV ‘ground’) Gn 1^{25} 6^{20} etc. (4) Of earth as = land or country Gn 47^{19}, Is 19^{17}, esp. of the Holy Land Zec 2^{12}. (5) Of earth as = whole earth Gn 12^{3} 28^{14}. This last usage is rare, and, like the preceding, belongs rather to—

2. אֶרֶץ (in Aram. portions of Ezr and Dn אֲרַע, Syr. *’ar’â’*), which is used (1) of earth as opposed to heaven Gn 1^{1}, cf. Mt 28^{18}; (2) of earth as opposed to sea Gn 1^{20}, cf. Mk 4^{1} 6^{47}; (3) of the whole earth Gn 18^{18}, or its inhabitants Gn 1^{28}, cf. Lk 18^{8} 21^{35}; (4) = land, country, district Gn 10^{10} 19^{28}, cf. Mt 2^{20} 4^{34}; (5) as synonymous with אֲדָמָה = soil Gn $1^{11.\,12}$, cf. Mt 13^{5}. See GROUND.

3. A poetic synon. of אֶרֶץ is תֵּבֵל (perhaps fr. a root = *productive*; according to Hommel, *Expos. Times*, 1897, viii. 472, it had originally a mythological sense), 1 S 2^{8}, Is 14^{21} etc. Both אֶרֶץ and תֵּבֵל are reproduced in the LXX by γῆ and οἰκουμένη, the latter of which occurs a good many times also in NT, *e.g.* Lk 4^{5}, Ro 10^{18}, Rev 16^{14}.

See further COSMOGONY, WORLD.

J. A. SELBIE.

EARTHQUAKE.—Palestine has from time immemorial been a country subject to earthquakes, and it is therefore not surprising that several references to these phenomena should be found in Holy Writ. Nor is it improbable that during prehistoric times, especially during the Miocene and Pliocene epochs, it was even more liable to seismic shocks than in the former period, when we consider that the regions beyond the Jordan witnessed volcanic eruptions on a vast scale from craters and foci which are now altogether dormant.[*]

The references in this article will be restricted to the region of Pal. and the adjoining territories of Syria, Asia Minor, and Arabia Petræa, and the subject will be treated under the foll. heads:—

1. Historical. 2. Prophetic. 3. Earthquakes of the Christian Era. 4. Origin of Earthquake Phenomena. 5. Literature.

1. HISTORICAL.—(*a*) Earthquake at Mount Sinai on the giving of the Law: 'the whole mount quaked greatly' (Ex 19^{18}).

(*b*) Earthquake accompanied by fissures and sinking of the ground, by which Korah and his companions were destroyed (Nu 16^{31}; also Jos. *Ant.* IV. iii. 3).

(*c*) Earthquake in the days of Saul (1 S 14^{15}).

(*d*) Elijah, fleeing from the wrath of Jezebel, finds a refuge on the solitary heights of Horeb (Mount Sinai) in Arabia Petræa (1 K 19^{11}). Assuming Jebel Musâ to be actually the mount in question, tradition has handed down to us the name of the cave from which the prophet witnessed the effects of the earthquake. At about 200 feet below the summit of this mountain there lies in a recess a circular pool surrounded by rocks of granite and porphyry penetrated at one spot by a cave, probably of artificial origin, known amongst the Arabs and the monks of St. Catherine as 'Elijah's cave.' The position and surroundings fit in so well with the narrative that it would be useless to call in question the truth of this identification.[†] The solitude of the place would have afforded the prophet protection; the cave, shelter; and the pool, water to quench his thirst.

(*e*) Earthquake in the reign of Uzziah. This earthquake must have been one of extraordinary severity, as it is twice referred to, Am 1^{1} and Zec 14^{5}; and from the latter passage we may infer that it caused a precipitate flight of the inhabitants of Jerus., and may have been accompanied by fissuring of the earth at the Mount of Olives. The exact date cannot be determined, as Uzziah's reign was long, extending from *c.* B.C. 790–740.

(*f*) B.C. 31, Sept. 2. In the reign of Herod an earthquake occurred in Judæa, 'such as had not happened at any other time,' destructive to men and animals (Jos. *Ant.* XV. v. 2).

(*g*) Earthquake at the Crucifixion. In this case the earthquake described in Mt 27^{51} was one of the miraculous manifestations of divine power which accompanied the death of our Lord on the cross, and was followed by rending of the rocks and of the veil of the temple, and opening of the tombs, A.D. 29.

(*h*) Earthquake at Philippi. This has often been considered a miraculous manifestation of divine power, called forth for the release from prison of St. Paul and Silas, A.D. 51.

2. PROPHETIC.—Earthquakes being amongst the most terrible and impressive of natural phenomena, are made use of in the Bible for prophetic imagery connected with future calamitous events; thus—(*a*) 'she (Ariel or Mount Zion) shall be visited of the Lord of hosts with thunder and with earthquake' (Is 29^{6}, RV). (*b*) 'And there shall be famines and earthquakes in divers places' (Mt 24^{7}). (*c*) 'And I saw when he opened the sixth seal, and there was a great earthquake' (Rev 6^{12}). (*d*) 'And he (the angel) taketh the censer, and he filled it with the fire of the altar, and cast it upon the earth; and there followed thunders, and voices, and lightnings, and an earthquake' (Rev 8^{5}). (*e*) 'And there were killed in the earthquake seven thousand persons' (Rev 11^{13}). (*f*) 'And there was a great earthquake, such as was not since there were men upon the earth' (Rev 16^{18}).

3. EARTHQUAKES OF THE CHRISTIAN ERA.—Out of the large number of recorded earthquakes, of greater or less intensity, from which Pal. and the neighbouring countries have suffered, only a few of special importance can be noticed here.

(1) A.D. 494. Syria and Asia Minor; the cities of Laodicea, Hierapolis, Tripolis, and Agathicum were overthrown (*Mar. Comes*, p. 46, quot. by Mallet).
(2) A.D. 551. Felt over Pal., Arabia, and Syria (Theophanes, p. 192).
(3) A.D. 658. Month of June; very destructive in Pal. and Syria (Theoph. p. 282).
(4) A.D. 746. Jerus. and surrounding regions suffered greatly (Theoph. p. 363).
(5) A.D. 755. A severe shock of earthquake occurred at Jerus., whereby the Haram es-Sherif ('Mosque of Omar') was much injured (Besant and Palmer, *Hist. Jerusalem*, ed. 1888, p. 97).
(6) A.D. 859. Earthquake throughout Syria; in Antioch 1500 houses were thrown down (Abulfaraj, p. 166, quot. by Mallet).
(7) A.D. 1036. Earthquake by which Jerus. was much injured (Cedrenus, p. 737).
(8) A.D. 1170. Succession of earthquakes passed through Pal., which, by their violence and frequency, filled all men's hearts with fear; hundreds perished in the ruins of their houses; grief and consternation spread around (*Hist. Jerusalem*, p. 352).
(9) A.D. 1202 (or 1204). An earthquake shook Pal. from end to end; Damascus, Tyre, and Nablûs were reduced to heaps of ruins; the walls of Acre and Tripoli fell; Jerus. alone seemed spared, and there Christian and Mohammedan met together to thank God for their safety (*Hist. Jerusalem*, p. 492; Abulfeda, *Ann.* iv. p. 211).
(10) A.D. 1402. Coast of Syria affected; sea retired and then invaded the land; several towns ruined (Muratori, t. xviii. p. 974).
(11) A.D. 1759. An earthquake protracted through a period of three months, in which Acco, Saphat, Baalbek, Damascus, Sidon, etc., were severely injured (*Volcanoes, Past and Present*, p. 219).
(12) A.D. 1822. On Aug. 13 an earthquake occurred at Aleppo, lasting only ten or twelve seconds, by which this town, together with several others in Syria, were converted into a heap of ruins, and 20,000 human beings were destroyed (Chesney, *Survey of the Euphrates and Tigris*).
(13) A.D. 1837, 1st Jan. Great earthquake in Pal. by which the town of Safed was destroyed, with many of the inhabitants (Tristram, *Land of Israel*, p. 581).

4. ORIGIN OF EARTHQUAKE PHENOMENA.—From the observations made by Hopkins, Lyell, and others regarding the cause and nature of earthquakes, it seems clearly established that they have their origin in some sudden impact of gas, steam, or molten matter, impelled by gas or steam under high pressure, beneath the solid crust. The effect of such impact is to originate a wave of translation through the crust, travelling outwards from a focus, and causing a movement of the surface to greater or less distances. These waves of translation can in some cases be represented on a map by curved lines; each line representing approximately an equal degree of seismal intensity. That there is an intimate connexion between earthquake shocks and volcanic action is proved by the fact that eruptions from volcanic craters

---

[*] In Keith Johnston's *Physical Atlas*, as also in Prestwich's *Map of Active and Extinct Volcanoes* (*Geology*, vol. i.), the region of Pal. and Syria is shown as one greatly subject to earthquake shocks.

[†] The only other rival is that of Serbâl; but the claims of J. Musâ to be Horeb far outweigh those of Serbâl. See Stanley, *Sinai and Pal.*, ed. 1860, p. 49; *Picturesque Pal.*, p. 113.

are generally preceded by earthquake shocks, and these latter are more frequent in those regions where volcanoes, either active or extinct, abound. At the same time, the most destructive earthquakes are not necessarily in the neighbourhood of volcanoes, many of the most disastrous having occurred in places far removed from centres of eruption; as, for example, those of Lisbon in 1755, and of Charleston in N. America in 1886. Such cases as these have given rise to the view that active volcanoes act as safety-valves for the escape of the elastic gases and vapour underlying the crust.*

LITERATURE.—Hopkins, 'Theory of Earthquakes,' in *Rep. Brit. Assoc.* 1847, p. 33; Mallet, *Earthquake Catalogue, ibid.* 1858; Lyell, *Principles of Geology*, vol. ii.; Prestwich, *Geology*, vol. i. ch. 13, with map of earthquake areas; Judd, *Volcanoes*, ed. 1888, p. 343; Hull, *Volcanoes, Past and Present*, Contemp. Science Ser. p. 217 (1892): for the earthquakes referred to in Bible, Plumptre, *Biblical Studies*, 136; Andrews, *Life of Our Lord*, 561, 575; Schürer, *HJP*, I. i. 403, 426; Pusey on Am 4^{11}.

E. HULL.

EASE.—The subst. is found chiefly in the phrase 'at ease,' which has both a good and a bad meaning: Ps 25^{13} 'His soul shall dwell at ease; and his seed shall inherit the earth' (בְּטוֹב 'in good'); but Am 6^{1} 'Woe to them that are at ease in Zion' (הַשַּׁאֲנַנִּים), so Job 12^{5}, Ps 123^{4}, Is $32^{9.\,11}$, Zec 1^{15} with same Hebrew. Once 'ease' means 'relief,' Sir 38^{14} 'that which they give for ease and remedy to prolong life' (*ἀνάπαυσις*, RV 'relief'). Elsewhere 'rest' or 'enjoyment,' as Dt 28^{65} 'among these nations shalt thou find no ease' (לֹא תַרְגִּיעַ); Jth 1^{16} 'there he took his ease, and banqueted' (*ἦν ἐκεῖ ῥαθυμῶν*); Lk 12^{19} 'take thine ease, eat, drink, and be merry' (*ἀναπαύου*). But in Apocr. the word occurs as the opposite of difficulty, as 2 Mac 2^{25} 'that they that are desirous to commit to memory might have ease' (*εὐκοπία*), 2^{27} 'it is no ease' (*οὐκ εὐχερές*). In these places we should now use the adverb 'easily.' But we still have 'with ease,' as in Jg 20^{43} 'they . . . chased them, and trod them down with ease' (מְנוּחָה, RV 'at their resting place').

But the meaning of this passage is uncertain; Moore thinks the Heb. is corrupt. The word *mĕnûḥâh* means 'a resting place,' as Nu 10^{33}, and is often translated 'rest' (see Cox on Ru 1^{9}); but it may be a place-name here, as AVm 'from Menuchah,' RVm 'at Menuhah'; there is, however, no prep. in the Heb. The older versions are at a loss. The AV rendering is from the Geneva Bible 'chased them at ease,' with marg. 'drove them from their reste.' Taverner gives 'chased them to Menoah'; Cov. 'folowed upon them unto Menuah'; Bishops' 'chased them diligently,' m. 'from their rest'; Wyc., Douay, 'neither was there any rest of men dying,' after Vulg. 'nec erat ulla requies morientium.' The LXX is *ἀπὸ Νουά*; Luther 'bis gen Menuah'; Ostervald 'depuis Ménuha.' On the whole it seems best, if we are to accept the text, to take the word as a place-name; and then Ostervald is probably nearest the mark 'depuis Ménuha jusqu' à l'opposite de Guibha.'

The verb has always the meaning of 'give relief'; but that may be either by lightening a burden, as 2 Ch 10^{4} 'ease thou somewhat the grievous servitude of thy father'; or by removing it altogether, as Is 1^{24} 'I will ease me of mine adversaries' (אֶנָּחֵם), 2 Es 7^{68} 'if he did not so of his goodness, that they which have committed iniquities might be eased of them, the ten thousandth part of men should not remain living' (*ut alleventur*). Cf. Jer. Taylor (1630), *Works*, iii. 90, 'I am no sooner eased of him, but Gregory Gandergoose . . . catches me by the goll'; and Pope, *Odyss.* xxi. 342, 'Ease your bosoms of a fear so vain.' Tindale meant to express the *removal* of the burden when he tr^{d} Mt 11^{28} 'Come unto me all ye that laboure and are laden, and I will ease you'; and so Hos 11^{7} Cov. 'their prophetes laye the yocke vpon them, but they ease them not of their burthen.'

J. HASTINGS.

EAST, CHILDREN OF THE (בְּנֵי־קֶדֶם, *υἱοὶ ἀνατολῶν*).—A general name for the inhabitants of the country east of Palestine, especially the Syrian desert, but also including what was known of Arabia; in Jg 6^{3} 7^{12} and 8^{10}, the Children of the East are coupled with Midian and Amalek; in Jer 49^{28} with Kedar. The mention of their טִירוֹת, or Bedawin encampments (Ezk $25^{4.\,10}$), which they are to erect on the lands of Moab and Ammon, identifies them with the Ishmaelites, of whom the same technical term is used. To their proverbial wisdom reference is made in 1 K 5^{10} and Is 19^{11}, and it is probably the reason why the author of the Book of Job made his hero one of them (Job 1^{3}). In Gn 29^{1} 'the land of the children of the E.' might seem to be Mesopotamia; but it is more probable that different views of the habitation of Laban are conflated in that chapter.

D. S. MARGOLIOUTH.

EAST SEA, EASTERN SEA.—See DEAD SEA.

EASTER, used in AV as the tr. of *τὸ πάσχα* in Ac 12^{4} 'intending after E. to bring him forth to the people.' RV has substituted correctly 'the Passover.' The anachronism of AV was inherited from older VSS which avoided, as far as possible, expressions which could not be understood by the people.

A. C. HEADLAM.

EBAL or OBAL.—1. Name of a son of Joktan (עוֹבָל Gn 10^{28} MT, עֵיבָל *ib.* Sam., Γαιβάλ Luc., 1 Ch 1^{22}), probably representing a place or tribe in Arabia. There are several places in S. Arabia with names approximating to the Hebrew forms, *e.g.* *'Aibān*, a mountain near San'ā frequently mentioned by Hamdani; *'Obal*, a place in the neighbourhood of H̱ujailah visited by Glaser (*Skizze*, ii. 427); *'Ābil*, mentioned by Halévy; but till more is known of the source of the ethnological tables in Gn, it is impossible to assign any probability to such identifications. Derivatives from the root *'abl* occur as tribal names at the commencement of Islam (*Tāj al-'arūs*, viii. 4), and it is likely that the author had in mind some tribe, otherwise unknown, bearing such an appellation. 2. Name of a son of Shobal son of Seir (עֵיבָל Gn 36^{23}, 1 Ch 1^{40}).

D. S. MARGOLIOUTH.

EBAL (עֵיבָל, Arab. *el-Islamîyeh*).—Ebal and Gerizim, the mounts of Cursing and Blessing, form the most conspicuous and important summits of the hills of Samaria. This distinction is due partly to their superior height and to their central position in the whole land, but chiefly to the deep cleft between them which breaks the outline of the long mountain ridge running N. and S. This natural pass between E. and W., led up to by wheat-growing plains on each side, became inevitably a place of importance both for purposes of commerce and in times of war. The existence of a branch of the main road from N. to S. leading through the narrow opening between Ebal and Gerizim, would still further tend to make the locality familiar and important. It needed only the additional circumstance of numerous fountains in the fertile hollow where the bases met, to create an Oriental town where the traveller might rest in safety and the inhabitants would possess all that was necessary for man and beast. Such a town was the ancient Shechem (Gr. Neapolis, Arab. Nablûs), occupying the defile where it is only 150 yds. wide.

This attractiveness and convenience of the place is exemplified in the lives of Abraham and Jacob; the former arriving here on his first entry into the land of Canaan (Gn $12^{6.\,7}$), and Jacob resting at the same spot on his return from Paddan-aram (Gn 33$^{18-20}$).

---

* The theory of Mr. R. Mallet differs somewhat from the above; briefly stated, he considers that earthquakes originate in shocks caused by the strain overcoming the resistance along lines of fracture traversing the earth's crust; this strain being due to the secular cooling of the crust and consequent contraction (*Trans. Roy. Irish Acad.* vol. xxi.).

Ebal and Gerizim face N. and S., the latter being the more celebrated in religious history, but the N. summit (3077 ft.) being 200 ft. higher, and commanding a more free and extensive prospect.

1. *View of the Land from Ebal.*—The beginning of the ascent from Nablûs is over grass of intensest green and enamelled lustre, through irrigated vegetable gardens of rank luxuriance, and under foliage of juicy transparency sparkling in the sunlight—one of the most fertile and picturesque spots in Palestine.

Above this, one enters immediately upon the silvery grey of the olive trees, which rapidly become scanty and irregular as the path opens in earnest upon the mountain climb. Then stony terraces and rocky face, with thistles and thorny shrubs, until the traveller reaches the broad, bare summit, and stands upon the central height of the whole land. Looking N., one sees Mt. Hermon towering aloft in the distance, glimmering with snow-streaked crests beyond the boundary plain in which lay Abel (Ibl), Baal-gad (Cæsarea Philippi, Banias), and Dan (Tell el-Ḳadi). On the E., rising steeply from the Jordan bed, is seen the long, slumbrous, uniform ridge of Gilead and Moab. To the S., conspicuous summits can be identified in the neighbourhood of Jerus.; and to the W., beyond the lower hills and patchwork of broad plain, the yellow coast-line sweeps from Jaffa to Carmel.

Such a commanding view from such a central point emphasizes at once the limitations of the land and the grandeur of the events that have given it immortality.

2. *Religious Connexion.*—One of the most important of those events was the arrival at this spot of Abraham in his journey of faith to the land of Canaan, and his receiving by the terebinth of Moreh a promise from the Lord, 'unto thy seed will I give this land' (Gn 12^{7}). It was fitting that the fulfilment of the promise, after more than 400 years of waiting and preparation, should receive its great public announcement at the very place where it had been given. It was also deeply appropriate that in a land where customs and occupations, scenery and social life, were to be a storehouse of parable and moral teaching to the world, its central heights of Ebal and Gerizim should be baptized into this service and be known as the mountains of Cursing and Blessing. It was accordingly here that Joshua (Jos 8$^{30-35}$) assembled the congregation, and erected the memorial altar according to the command and detailed instructions of Moses (Dt 11$^{29.30}$ and 27. 28). In addition to the duty of formal compliance with such a command, there was an inner urgency of the hour that called for such an act of declaration and decision. During the past 40 years the Isr. had received the discipline of adversity: they were now to face the greater temptation of success. The emergency was a suitable one for setting forth the moral regalia of the kingdom, and the responsibilities of its service. The recent experience at Jericho and Ai had emphasized the plain conditions of triumph and failure. Still further the incident of the Gibeonites, and the rumour of confederated opposition, set before them the dangers and difficulties of the work. And so on that memorable day, in the defile between Ebal and Gerizim, the Isr. entered upon the inheritance of the promises in the only way that it can be entered—through the door of complete and conscious surrender to the will of God. They were to possess the land, but not for themselves. The assemblage was on a scale of vastness suitable to the moral elevation of the thought. In the central hollow of the hills rested the sacred ark that had so unerringly guided them in their journeyings, and was now pointing to the final resting-place of secure possession. Up the opposing sides of Ebal and Gerizim, six tribes to each, rising with the mountain slopes and terraces in solid masses where the ground was level, with fluttering groups and sprinklings on points of advantage, all bright colours mingling with the predominant white, the whole congregation of Israel was drawn up—an army in array for the battle of life. It was the Coronation Day of the Moral Law. God could not do more for His people, and, to invert the familiar phrase, *His* extremity became *man's* opportunity. If righteousness could come by law, it might have come then and continued. As the solemn entail of forfeiture was proclaimed from Ebal, and the bright succession of blessings from Gerizim, the announcement was received with an acclamation of amens. It was a mingling of the two voices of Destiny and Disposition, of Divine purpose and human choice.

LITERATURE.—Robinson, *BRP*; Stanley, *Sinai and Pal.*; Thomson, *Land and Book*; Smith, *Hist. Geog.*; Murray's and Bædeker's *Guide Books*. G. M. MACKIE.

EBED (עֶבֶד).—**1.** The father of Gaal, who headed the rebellion against Abimelech (Jg 9$^{26-35}$). **2.** One of those who returned from Babylon with Ezra (Ezr 8^{6}), called in 1 Es 8^{32} Obeth.

EBED-MELECH (עֶבֶד־מֶלֶךְ).—An Ethiop. eunuch, at whose intercession and by whose personal exertions Jeremiah was released from the pit-prison of Malchiah. For this kindly service E. was promised immunity from the fate of his companions at the capture of Jerus. (Jer 38$^{7ff.}$ 39$^{15ff.}$). It is possible that the name E., which means 'servant of [the] king,' may have been an official title. A very ancient seal (see fig. on p. 258 of Benzinger's *Heb. Arch.*) is inscribed 'Obadiah servant of the king' (*Obadjahu 'ebhed hammelekh*). More probable, however, is the view of Gray (*Heb. Prop. Names*, 117, 147), who takes Melech as a divine name.

J. A. SELBIE.

EBENEZER (אֶבֶן הָעֵזֶר or הָאֶבֶן 'Stone of help').—Mentioned three times in 1 S. According to 4^{1} 5^{1} it is the scene of a great defeat of the Isr. at the hands of the Phil. in the time of Eli, while in 7^{12} it is the name of a stone set up by Samuel to commemorate a great victory over the Philistines; it is further noticeable that in 7^{12} the name is apparently given for the first time, though the victory there described happened some twenty years after the events of ch. 4^{1} 5^{1}. In 7^{12}, which belongs to a somewhat later document, E. is placed under Beth-car, and between Mizpah and Hasshen ('the tooth'); but we must here follow the LXX (τῆς παλαιᾶς), and read 'between Mizpah and Jashan (or Jeshanah)'; the latter (cf. 2 Ch 13^{19}) is probably the modern 'Ain Sinia, to the N. of Bethel. On this view, E. would lie somewhere at the head of the valley of Aijalon; this site is further favoured by the notice in 4$^{1f.}$. The more generally accepted theory, however, places E. more to the south, at the head of the vale of Sorek, and either identifies the stone set up by Samuel with the great stone at Bethshemesh (6^{18}) or places it in the immediate neighbourhood. But this identification does not suit 7^{12}, and is hardly compatible with the narrative of 4^{1}–7^{1}. See G. A. Smith, *Hist. Geogr.* p. 223 f. J. F. STENNING.

EBER (עֵבֶר).—**1.** The eponymous ancestor of the HEBREWS (which see), great-grandson of Shem, son of Shelah, and father of Peleg and Joktan (Gn 10$^{24f.}$ 11$^{14ff.}$, 1 Ch 1$^{18.19.25}$), perhaps used poetically for Israel in Nu 24^{24} (but see Dillm. *ad loc.*).

2. The representative of the priestly family of Amok in the days of Joiakim, Neh 12^{20}. **3.** A Gadite family name, 1 Ch 5^{13}. **4. 5.** The name of two Benjamite families, 1 Ch $8^{12. 22}$. See GENEALOGY. J. A. SELBIE.

EBEZ (אֶבֶץ), 'white.'—A city of Issachar (Jos 19^{20}). The site is uncertain. Probably the ruin *El-Beidhah*, 'the white,' east of Carmel. *SWP* vol. i. sheet v. C. R. CONDER.

EBIASAPH.—See ABIASAPH.

EBONY (הָבְנִים *hobnîm*).—The Arab. name for this wood is very near the Heb., being *ebnûs*. There can be no reasonable doubt of the identity of the wood intended in the single passage in which it is mentioned (Ezk 27^{15}). It was brought to Tyre by merchants from Dedan, on the Pers. Gulf. It is the black heart-wood of *Diospyros Ebenum*, L., and several other species of the same genus, trees growing to a large size in Ceylon and S. India. *D. Ebenum*, however, furnishes the best wood. It resembles the common and the Japanese *persimmon* in its mode of growth and inflorescence, and in bearing an edible fruit, between a pome and a berry. The sap-wood is white and valueless, but the heart often yields a log 2 ft. in diameter, and 10 to 15 ft. long. G. E. POST.

EBRON (עֶבְרֹן).—A town in the territory assigned to Asher (Jos 19^{28} RV; wrongly written Hebron in AV, as if from חֶבְרוֹן, the name of the famous Judæan city). It is just possible that we should read 'Ebdon, for 'Ebron, the latter form having arisen from the substitution, not uncommon, of ר for ד. It is noteworthy that this name, 'Ebron, occurs but once, while in the other name-lists for Asher (Jos 21^{30}, 1 Ch 6^{74}) we have an 'Ebdon or 'Abdon, which is absent here. This supposition has the support of twenty MSS (Gesenius). It is, however, in conflict with the ancient versions, all of which give 'Ebron, with the single exception of B, which unaccountably has Ἐλβών. From the order in which the towns are mentioned, we should seek for E. somewhere north of Cabûl, and south of Rehob, Hammôn, and Ḳanah. No certain identification has yet been made: in position the ruin of *'Abdeh* answers well enough the condition indicated. Twelve miles north of Cabûl, about 10 miles N.N.E. of Acre, and 3 miles east of Achzib,—the modern Ez-Zîb,—it occupies a slight eminence on the northern edge of the Plain of Acre, the mountains rising like grim guardians behind. If we accept the identification of 'Ebron with 'Abdon, this seems to be the most probable site. W. EWING.

ECBATANA.—See ACHMETHA.

ECCLESIASTES (קֹהֶלֶת *Ḳoheleth*, LXX Ἐκκλησιαστής, Aq. Κωλέθ).—1. THE TITLE.—This presents some difficulties, which have scarcely as yet been satisfactorily explained. The word is a fem. part. of the Qal conj. The verb is not found elsewhere in this conj. In the Hiph. the word means 'to call an assembly together.' It is commonly held that here the Qal is used with the force of the Hiph., and that *Ḳoheleth* means 'one who convenes an assembly.' There have been other interpretations, such as 'a collector of sayings,' or 'one who gathers wisdom from various quarters.' But since the verb is always used with ref. to persons and never with ref. to things, these are untenable. Tyler urges that the causative force cannot be put into the word, and he explains it to mean 'one who *is* an assembly.' *Koheleth* would thus be a personification of 'an ideal assembly of those Jewish philosophers, Stoic, Epicurean, and others, whose opinions were influential at the time when the book was composed' (Tyler, *Ec.* 59). But this is too artificial to be probable, and it seems best to fall back on the common view, that *Ḳ.* means 'the convener of an assembly.' A greater difficulty is caused by the fem. form. This has been explained on the hypothesis that the speaker is Wisdom, impersonated in Solomon, and *Ḳ.* is fem. as agreeing with the fem. word for Wisdom. This view has been taken by Ewald, Hitzig, Ginsburg, and others. Against this, however, serious objections may be urged. It is strange that Wisdom should be nowhere mentioned as the speaker. Further, it is barely conceivable that Wisdom should have used some of the language put into the mouth of *Ḳ.* ($1^{17. 18}$ 7^{23} etc.), or that Solomon should be regarded as her impersonation, considering the experiences through which the speaker says that he has passed. Again, the tone of the discourses is so different from what we find in those passages where Wisdom is actually represented as speaking, that if the writer had intended to make Solomon the spokesman of Wisdom he would have felt it necessary, in view of this striking difference, to say so explicitly. It is also to be observed that the verb used with *Ḳ.* is masc., and on the view we are discussing it is explained by the theory that the fem. Wisdom speaks through the masc. Solomon. The objections already urged against the identification of *Ḳ.* with Wisdom have led to the view that we are to find in the fem. form, not a distinction of sex, but a variation in meaning. In other words, the Preacher is a male, but the fem. termination conveys a special shade of meaning. This gives a better account of the use of the masc. verb. The word may then mean 'one who holds the office of a teacher or preacher' (Delitzsch, Nowack, Cheyne), or, if the fem. has an intensive force, 'the great orator' (W. Wright, RVm). Kuenen feels himself unable to decide between the view that *Ḳ.* is Wisdom and that the fem. does not express distinction of sex. The arguments for the latter view seem to be stronger, and we should probably interpret *Ḳ.* to mean 'one who holds the office of teacher.' The title *Ecclesiastes* comes from the LXX.

That by *Ḳ.* the author means Solomon has been subject to dispute, but should admit of none. He is identified with 'the son of David, king in Jerus.' (1^{1}), and says of himself, 'I, *Ḳ.*, was king over Israel in Jerusalem.' The son of David who was king is best explained strictly and not loosely to mean descendant. After the division of the kingdom a king could not have spoken of himself as reigning over Israel in Jerusalem. It is also clear that Solomon is the king whose varied experiences of wisdom and luxury are referred to in chs. 1 and 2.

2. AUTHORSHIP AND DATE.—The book was, till the period of critical investigation, almost universally ascribed to Solomon. Some writers still support this view, though it is abandoned by all critics of eminence. The main reason is that *Ḳoheleth* speaks in the first person, and therefore if the author was not Solomon he would be deceiving his readers. This does not follow. The author of Job uses the literary vehicle of a debate to reach the solution of his problem. Here the writer has chosen an autobiographical sketch of Solomon as his literary vehicle. And he has done so for reasons which are quite obvious. Solomon was the typical representative of Wisdom, and the author wished to set forth his conclusions as those of a man who had brought the deepest and sanest reflection to bear upon life. But it was also important that his experience should be wide, and his opportunities of testing the value of life in its

various forms of the fullest. Here Solomon admirably served his purpose. Not only was he the wise man, but he was a king whose magnificence has passed into a proverb, and who was able to gratify every wish. He was thus able to wring the most out of life, and from him the sentence 'All is vanity' would come with greater force than from any other. This is no proof that he is not the author, but it removes any antecedent prejudice against the denial of the Solomonic authorship, based on the statements of the book.

The objections to the Solomonic authorship are overwhelming. The very language quoted to prove it is seen on examination to be unfavourable to it. Solomon can hardly have said 'I was king,' as if he had ceased to be so, for he reigned till his death. The words 'over Israel in Jerus.' are most naturally explained by the writer's knowledge of kings of Israel who did not reign in Jerusalem. And since it was his own father who had made Jerus. the royal city, and Solomon had not been preceded by a long line of kings, he could scarcely have spoken of 'all that were before me in Jerus.' (1^{16} $2^{7.9}$). There are also many passages which do not suit the Solomon of history. The writer speaks with bitterness of the oppression of the weak and the perversion of judgment. Solomon would not have tolerated such abuses if he had felt them so keenly as the author. Certainly, so far from feeling any keen distress at oppression, his government was systematically oppressive. The words of the author do not impress us as those of a king who stands above his subjects, but as those of a subject sympathizing with the misery of his fellow-subjects. Instead of judgment and righteousness he sees wickedness, and bids his readers not to wonder at oppression and violence. The State is not well-ordered and prosperous as in the time of Solomon. 'Folly is set in great dignity, and the rich sit in low places.' This is an error which proceeds from the ruler. Servants ride on horses, and princes walk on the earth. Nor can the reference to the king's system of spies, and the writer's bitter advice based upon it, be seriously regarded as from a king (10^{20}). Other references to kings (4^{13-16} $10^{16.17}$) are equally inconceivable in Solomon's mouth. Nor has the popular view, that Solomon wrote the book in his old age after repenting of his idolatry, any support in the book itself. From beginning to end there is no confession of wrong-doing, no ref. to idolatry, no hint of repentance. It dwells on the unsatisfying nature of life, but penitent confession is quite alien to its whole spirit and purpose. The author is certainly not a satisfactory or edifying penitent.

But the same conclusion that Solomon cannot be the author is shown by the language. The linguistic evidence is so decisive that Delitzsch has said, in words that have been quoted with approval by many critics since: 'If the Book of *K.* be of old-Solomonic origin, then there is no history of the Heb. language.' And Driver, whose opinion on such a matter is of exceptional value, says: 'Linguistically, *K.* stands by itself in OT. The Heb. in which it is written has numerous features in common with the latest parts of OT, Ezr, Neh, Ch, Est, but it has in addition many not met with in these books, but found first in the fragments of Ben-Sira (*c.* B.C. 200) or in the Mishnah (*c.* A.D. 200). The characteristic of the Hebrew in which these latest parts of OT are written is, that while many of the old classical words and expressions still continue in use, and, in fact, still preponderate, the syntax is deteriorated, the structure of sentences is cumbrous and inelegant, and there is a very decided admixture of words and idioms not found before, having usually affinities with the Aramaic, or being such as are in constant and regular use in the Heb. of post-Christian times (the Mishnah, etc.). And this latter element is decidedly larger and more prominent in Ec than in either Est or Ezr-Neh-Ch' (*LOT*, 444). The phenomena, in fact, are consistent only with the post-exilic date, and the Solomonic authorship is therefore out of the question. The detailed evidence may be found in Delitzsch's *Com.* (Germ. ed.), or in Wright's *Ecclesiastes*, Excursus iv. (see also Driver, *LOT* as above).

Critics who deny the Solomonic authorship, *i.e.* all critics who need be taken into account, are unanimous in assigning the book to the post-ex. period. There are two main theories—one that it belongs to the later years of the Pers. period, which came to a close B.C. 332; the other, that it comes from the Gr. period, and should be dated about B.C. 200. The former is the view of Ewald, Delitzsch, Ginsburg, and Cheyne in his *Job and Solomon*. In favour of the latter are Nöldeke, Kuenen, Hitzig, Tyler, Plumptre, Cornill, and Toy; while Cheyne in his *Founders* thinks it is probably correct. Nowack and Driver think the language points to the later date, but is not decisive; and so much is undoubtedly correct, if we ought not to accept the later date on the ground of the linguistic evidence alone. There are other criteria of importance. The political conditions implied yield valuable data. Cornill says: 'The general picture of the circumstances makes us fix on a period of complete anarchy, in which well-ordered political life cannot be spoken of, worthless revolutionaries seize the government and exhaust the country, and political wisdom is recognized to consist in a dull, listless submission to despotism and tyranny' (*Einleit.* 251). The justice of this description is clear from these passages, 4^{1-3} 5^9 $10^{5-7.20}$. This compels us to place it at the earliest in the later years of the Pers. period, and precludes a date in the earlier part of that period. But it will suit equally well the date in the Gr. period, about B.C. 200. Hitzig thinks on account of 10^{16} that its date is B.C. 204, when Ptolemy Epiphanes ascended the throne at the age of five. He takes 9^{13-16} to be an allusion to the siege of Dora in B.C. 218. But this did not succeed owing to the strength of the place, not because a poor wise man delivered it. He explains 4^{13-16} of the high priest Onias ('the old and foolish king') and his nephew Joseph ('the poor and wise youth'), but the statements of the passage are not true of them. The political circumstances admit of either date. Kuenen thinks that the cosmopolitan tone of the book speaks for its origin in the Gr. period; but, as Nowack points out, this is characteristic of Heb. Wisdom generally. In its attitude to the doctrine of a future life Kuenen regards it as a forerunner of Sadduceeism. The writer's views, it is true, are those of the older Heb. theology, but they are put forth in opposition to the newer doctrine. Nowack thinks that these arguments would tell rather in favour of a Maccabæan date, when the two tendencies of Pharisaism and Sadduceeism became explicit. This does not follow, since, as Kuenen points out, while he is a forerunner of the Sadducees, he is so little a Sadducee that Graetz could regard him as a disciple of Hillel. This is most naturally explained by the view that he wrote before the rise of these distinct parties.

The most plausible argument in favour of the later date is derived from the supposed influence of Gr. philosophy. Tyler was the first to work out in detail the supposed influences of post-Aristotelian philosophy, and he was followed by Plumptre in his Commentary. A full and apparently conclusive refutation may be found in Cheyne's *Job and Sol.* (see also Nowack). Tyler's view is that the signs of acquaintance with Stoicism and Epicureanism are unmistakable. The author, however, he takes to be neither Stoic nor Epicurean, but one who leaves the doctrines of the two schools side by side in order to warn his readers against studies which could conduct to no certain goal, but led to opinions so opposed. The following points of contact with Stoicism are adduced. The doctrine that man should live according to nature is set forth in the catalogue of Times and Seasons ($3^{1\text{-}8}$). The doctrine of cycles, according to which history presents no progress, but only movement in a circle, is found in the description of the endless round in which the affairs of men move, so that all effort secures no progress but only return to a former condition ($1^{2\text{-}10}$). Fatalism is present in both; both regard the weaknesses of men as a kind of insanity, and both dwell on the nothingness of life. But no weight can be attached to these. The dreary repetition which characterizes life is not put forward as a philosophical doctrine, but as something taught by observation and experience. The sense of the emptiness of life is due to disillusion, and was not learnt in a school of philosophy, but in the hard school of life. Fatalism is only a coincidence, the Semite has a natural tendency to it. The view that the weaknesses of men are a kind of insanity is a genuine idea of Heb. Wisdom, which treats wisdom and folly as moral rather than intellectual. And the catalogue of Times and Seasons contains in its main idea nothing that cannot be well derived from Heb. thought. The traces of Epicureanism are equally unsatisfactory. Men are as beasts, coming from the dust and returning to it; pleasure is the highest good, esp. in the form of undisturbed tranquillity. The rivers run into the sea, yet the sea does not fill, the body is dissolved into its elements. The parallels are commonplace, and no distinctively Epicurean doctrine is to be found. It needed no acquaintance with Gr. philosophy to learn that man returned to dust, or that the sea was not filled by the rivers that fed it, or that pleasure was good if enjoyed in moderation. The comparison of man to the beasts that perish might occur to a Hebrew who did not accept the newer view of the future life. For traces of either Epicureanism or Stoicism the appeal is often to late authorities. And the coincidences are either unreal or insignificant, or readily explained from Heb. as well as Gr. ideas. We can therefore hardly rely on this alleged influence of Gr. philosophy as a criterion of date. Kuenen thinks that the proofs break down, and that the philosophical element in the stricter sense is absent. But a general influence, he thinks, may be detected. And if the date in the Gr. period is accepted, we may believe that the writer was susceptible to the influence of the atmosphere of Gr. thought, rather than of any special view.

So far, then, as the arguments for the two dates go, they cannot be said to be decisive. The linguistic argument pleads strongly for the later date, and there is no argument to set against it on the other side. The balance of probability, therefore, dips towards a date *c.* B.C. 200, though the book may possibly belong to the Persian period. Renan has put forward the view that the date is B.C. 125. But it was probably quoted as scripture shortly afterwards, which implies a longer previous history than Renan assigns to it. And after the Maccabæan struggle we should expect greater religious fervour. Graetz' view, that it belongs to the reign of Herod the Great (whom he identifies with *K.*), is probably excluded by the fact that it seems to have been quoted as scripture before that time; and apart from this it is questionable if the history of the Canon will permit of its composition so late.

3. THE INTEGRITY OF THE BOOK.—Certain passages have been suspected by several critics as later interpolations. The Epilogue ($12^{9\text{-}14}$) was the first to be suspected, but later the authenticity of the following has also been denied, 3^{17} 7^{5} $8^{12.\,13}$ 11^{9c} $12^{1a.\,7b}$. The whole of $12^{9\text{-}14}$, however, does not stand or fall together, since vv.$^{9\text{-}12}$ are denied on other grounds than vv.$^{13.\,14}$. It will be most convenient to take $12^{9\text{-}12}$ first. The substance of the book evidently ends at 12^{8}. *K.* ends on the same note as that on which he began, 'Vanity of vanities, all is vanity.' In itself, however, this does not mark these verses as due to another hand. To the end of 12^{8} Solomon is represented as speaking, and in $12^{9\text{-}12}$ the real author may be regarded as speaking in his own person, and commending the book as the work of one of 'the wise.' Nor is it any serious argument against this that the author is represented in the body of the book as a king, but here as a wise man, for Solomon was the chief representative of 'the wise.' It is true that there are difficulties in the passage, and some uncommon expressions, but in themselves they do not warrant the view that the verses are the work of another writer. Those who think so regard them as a recommendation affixed to the work by a later hand. But the writer speaks of the author as if he were another than himself, in order to keep up the assumption of Solomonic authorship.

The other alleged interpolations raise a much more difficult question. $12^{13.\,14}$ are suspected partly on account of their general tenor, partly from their reference to the judgment. It seems strange to announce as the conclusion of the matter, that the teaching of the book may be summed up in the injunctions to 'fear God and keep his commandments.' Its teaching is rather that 'all is vanity and striving after wind,' and that man's wisest course is to recognize this and extract as much pleasure from life as he can. It is not denied that the fear of God is advised in the book, but that it is its main theme, or the chief lesson to be drawn from it. Kuenen, who gives a very long and elaborate defence of the authenticity of the entire Epilogue, admits that if this were interpreted in the highest sense as the one thing about which man had to concern himself, we should be compelled to deny $12^{13.\,14}$ to the author of the rest of the book. He argues, however, that the writer simply means that the fear of God and keeping of His commandments is the indispensable condition of enjoying life. But it is questionable whether the explicit words, 'for this is the whole duty of man,' do not compel us to interpret the command in the larger sense which Kuenen denies. This passage has been also suspected because of its ref. to a judgment. And the same objection lies against 3^{17} and 11^{9c} ('but know thou that for all these things God will bring thee into judgment'). If the reference is to a judgment after death, it seems improbable that they can be harmonized with other passages in the book (cf. $3^{19\text{-}21}$ $9^{5.\,6.\,10}$). But it is possible that a judgment in this life is referred to. This requires a change of reading in 3^{17}, when instead of 'there' (שָׁם *shām*), 'he hath appointed' (שָׂם *sām*) would be read. It is not clear, however, that this yields so good a sense, and it is not improbable that in all the passages a judgment after death is spoken of. In 12^{1a} the difficulty arises partly from the idea, which is thought to be alien to the general tenor of the book, partly from its incongruity with the context. The counsel, 'Remember thy Creator in the days of thy youth,' is not what we expect from the author of such a book. Nor do the preceding counsels lead up to this. The young man is bidden to rejoice in all the days of his life, esp. in the days of his youth, remembering the dark days that await him in Sheol. But remembering not only these, but all the failure of manly vigour and his physical powers, and of the zest for pleasure that will come upon him with old age, he would do well to make the most of his prime of life. This gives a connected sense, and one in harmony with the rest of the book, and we obtain it by deleting 12^{1a} and connecting 12^{1b} with 11^{10}. The meaning in that case will be—make the best of your youth in the enjoyment of pleasures before the evil days of old age come, when you will say, I have no delight in them. It is true that the connexion of 12^{1b} with 11^{10} is a little awkward if 12^{1a} is omitted, but the connexion in the text is even more awkward. Graetz proposes to retain the words with a slight alteration of the Hebrew, and to read, 'Remember also thy fountain (*i.e.* thy wife) in the days of thy youth.' This is not grotesque, though it has been criticized as such; nor even unworthy, for it is an exhortation to a life of conjugal purity (in opposition to illicit amours), such as we have also in 9^{9}. But it is scarcely a happy suggestion. Bickell not only adopts the correction of the text, but attempts to improve the connexion by transposition. 12^{7b} ('and the spirit return unto God who gave it') may be retained on the ground that it simply implies the dissolution of the personality into its original sources, the body will return to dust, the spirit to God. The 'spirit' probably means nothing more than the breath of life (cf. Ps 104^{29}). No very serious objection need be felt to 7^{5} or $8^{12.13}$.

While Kuenen retains these passages (except 12^{1a}, which he regards as altered on dogmatic grounds) by denying that they contain anything of a higher point of view than we generally find in the book, several critics defend the genuineness of the whole, with the obvious interpretation. Sanday in his *Bampton Lectures* argues that they must have been included, for otherwise a scribe would have passed it by, and it would have been simply left out of the Canon. This, however, is questionable. A book professing Solomonic authorship would not be lightly rejected; it would be assumed that it must really teach true religion, and a few interpolations would bring this out more clearly. He also urges that it is psychologically more probable that an Isr. would 'have this reserve in the bottom of his soul, than that he should give way to blank and unrelieved pessimism.' It is more remarkable to find so radical a critic as Cornill defending their authenticity. He maintains that the same thoughts run through the whole book; the fear of God and God the Judge are cardinal conceptions. In his very striking passage on the contents of the book he says: 'OT piety has never achieved a greater triumph than in the Bk of Ḳ.' (*Einleit.* 251). While the author sees the misery of the world as clearly as our modern pessimists, he is so penetrated by the piety of OT that he does not hit on the simplest and most obvious solution, that the world is the plaything of blind chance. He returns to the faith of his childhood in a personal God and a moral order of the world.

These views, and they are shared by other critics, are of weight. Yet it is doubtful if they do justice to the phenomena on the other side. It is very significant that the author's meditations end as they began—'Vanity of vanities, all is vanity.' Would this have been so if he had really fought his way back to the faith of his childhood? Cornill seems to overstate the case when he says that similar passages run through the book, and that the fear of God and God the Judge are cardinal conceptions. The theism of the book is not very pronounced. Cheyne says with justice: 'To me, Ḳ. is not a theist in any vital sense in his philosophic meditations. . . . He certainly never lost his theism, though pale and cheerless it was indeed, and utterly unable to stand against the assaults of doubt and despondency.' Looking at his speculations from a somewhat different viewpoint, it might even be alleged that Ḳ.'s theism is the source of all his perplexities. To every Hebrew, God and Providence were convertible notions, and this God, which to Job was an immorality, might be to Ḳ. a puzzle. Upon this theory it may, of course, be urged that rigid consistency is not to be expected in a man of the writer's temperament, who would speak according to his mood. Yet we may surely think that a man of his intellectual power and close observation of life would have some fixed principles; and we find them running through most of his meditations. When we find a few sayings that seem to run contrary to these, we may either try to explain them in harmony with the general view of the author, or regard them as interpolations due to a working over in the interests of orthodoxy. Either course seems preferable to that of leaving them as unreconciled contradictions. It seems on the whole most probable that at least $12^{1a.13.14}$ are later interpolations (assuming that 'thy Creator' is correctly read in 12^{1a}), and possibly also 3^{17} and 11^{9c}. On the other hand, 12^{7b} can be explained so as to avoid any conflict with the author's views.

The view of Krochmal with reference to the Epilogue must not be passed over in silence. He regarded $12^{11.12}$ or 12^{11-14} (it is not clear which) as appended to the whole of the third division of the Canon (the Kethubim or Hagiographa), and not simply to Ec. Graetz adopted the view that 12^{11-14} was added as the conclusion of the Kethubim, but thought also that the collectors of the third Canon added $12^{9.10}$ as an apology for Ec. Renan accepts $12^{9.10}$ as by the author of Ec, and agrees with Krochmal as to $12^{11.12}$, and also considers $12^{13.14}$ as unauthentic. It is unnecessary to discuss this view, which rests on pure hypothesis, and has been almost universally rejected.

Before leaving this part of the subject, it remains only to speak of the bold and original theory of Bickell. Eng. readers may find it presented in Dillon's *Sceptics of OT*, with a tr. of the book as rearranged, and in Cheyne's *Job and Solomon* (p. 273 ff.), where it is criticized. It is that the Heb. MS. from which our text is descended met with an accident. The sheets became disconnected, and, in replacing them, owing to a turning of the 2nd and 3rd sheets inside out, the text was completely dislocated, and passages were brought into juxtaposition which had originally no connexion with each other. Two sets of interpolations were then made. One series was designed to connect the verses which had been thus brought together. The other interpolations were intended to give the book an orthodox tone. The detailed working-out, which is very brilliant and ingenious, cannot be exhibited here. We may, however, give his results as to the original book and its order. He makes the orig. Ḳ. to consist of the following passages in the order given:—1^{2}–2^{12} 5^{9}–6^{7} 3^{9}–4^{8} 2^{12}–3^{8} 8^{6}–9^{3} 8^{15} 7^{11}–10^{1} 6^{8}–$7^{22.20}$ 4^{9}–5^{8} 10^{16}–$11^{6.5}$ 7^{23}–8^{5a} $10^{2-15.14b}$ 9^{3-10} 11^{7}–12^{8}. The theory is open to very serious objections. It is questionable whether it will stand the test of exegesis; and to quote Cheyne's words: 'Apart from other difficulties in the way of the theory, the number and arbitrariness of the transpositions, additions, and alterations are reason enough to make one hesitate to accept it.' Kuenen also says that it is as good as unthinkable that all the accidents assumed should have taken place together, and combined to produce our Bk of Ec. Euringer has urged an objection, which if valid is fatal to the supposition that such an accident could have occurred. It is that, at so early a period, the codex form would not be used, but the roll form, and therefore there would be no sheets to be dislocated by such accidents as are postulated by the theory.

4. CONTENTS AND THOUGHT.—It is very difficult to give an account of the contents of Ec which shall be at once clear, brief, and adequate. There is very little strict development of the thought, and the endless repetition which the writer sees in nature and life has its partial counterpart in his book. The difficulty is increased by the uncertainty as to interpolations and the exegesis of particular passages. The following outline may be given. Vanity of vanities, all is vanity. No profit comes to man from all his toil. Nature and man go ceaselessly round and round in the same course with utterly wearisome monotony, and there is no new thing under the sun (1^{2-11}). Ḳ. being king over Jerus. uses his wisdom to understand the life of men, and finds that all is vanity (1^{12-15}). He finds, too, that the search to know wisdom and folly is vanity, and that wisdom brings sorrow (1^{16-18}). He tries to find happiness in pleasure, and exhausts every source of enjoyment, but finds it is all vanity (2^{1-11}). Wisdom far excels folly, yet wise and fool perish and are forgotten alike (2^{12-17}). The accumulation of wealth is vanity, for the man who has gathered it by toil and wisdom must die and leave it to another, it may be to a fool (2^{18-23}). The best thing in life is to eat and drink, as God permits. Yet even this is vanity (2^{24-26}). A time is allotted for everything. This is the doing of God, who has set the world [or eternity] in man's heart, yet so that His plan cannot be understood. Since man cannot understand the plan by which the season for everything is appointed, he will do well to enjoy life as much as he can. All is fixed unalterably by God, that men should fear Him (3^{1-15}). The sight of oppression makes him think that God will judge the righteous and the wicked. But man dies like the beasts, and should enjoy life while he may, for he cannot return to it after he is dead (3^{16-22}). The oppression of the helpless convinces him that the dead are in better case than the living, and best of all is not to have been born at all (4^{1-3}). Successful labour is vanity, for it only causes a man to be envied (4^{4-6}). The efforts of the lonely man to attain wealth are vanity; and there is safety and comfort in the possession of a friend (4^{7-12}). A

poor wise youth succeeded an old and foolish king, yet the bright expectations of his rejoicing subjects were disappointed (4$^{13-16}$). Be very circumspect in your service of God and the vows you make to Him, or it will be worse for you (5$^{1-7}$). Do not be surprised at oppression, for the oppressors themselves are under tyranny. Far better the state which depends for prosperity on the pursuit of agriculture [*or* men are much more on a level than they seem; the king himself depends like all his subjects on the products of the earth] (5$^{8, 9}$). Accumulation of wealth is vanity, for it brings little pleasure and much anxiety (5$^{10-12}$). Sometimes wealth is accumulated by labour and lost by misfortune, so that the possessor has no enjoyment out of it (5$^{13-17}$). It is best to eat and drink and enjoy life, so far as God gives one the power, and thus make life pass without too much reflexion (5$^{18-20}$). God sometimes gives the means of enjoying life, but withholds the power of enjoyment (6$^{1-6}$). Toil is for the appetite which is insatiable, the wise is no better off than the fool; possession is better than inordinate desire, but this too is vanity (6$^{7-9}$). The destiny of man has been determined for him, he cannot struggle against it, nor does he know what is good for him (6$^{10-12}$). A good name is better than ointment, death than birth, sorrow than mirth (7$^{1-6}$). The end is better than the beginning, patience than vexation, wisdom than property. Whether prosperity or adversity be your lot, consider that both come from God, and cannot be altered (7$^{7-14}$). Do not go to extremes in virtue or vice, in wisdom or folly (7$^{15-18}$). Yet wisdom is strength, since all sin and may need it. Gossip should not be listened to, for a man is sure to hear something unpleasant about himself (7$^{19-22}$). K. sought wisdom, but could not fully attain it. But he found this, that woman was more bitter than death, and only the man who pleased God would escape her snares. A good man was as one in a thousand, but a good woman he had not found at all. This was not the fault of God, but of man, who had sought out many inventions (7$^{23-29}$). Wisdom is the best. Be obedient to the king, and in time of oppression do not be tempted to rebel, for judgment will come on the tyrant (8$^{1-9}$). The wicked sometimes fare as the righteous, and the righteous as the wicked, yet it is better with the righteous than with the wicked; but since all is vanity, it is best to eat, drink, and be merry, for that, at any rate, will last as long as life (8$^{10-15}$). However wise a man may be, he cannot understand the work of God. All men are in His hand, and cannot escape the universal lot. Life is bad, but it has hope; death comes to all, and with it the loss of consciousness, feeling, and activity (8^{16}–9^{6}). Enjoy life to the full, unvexed by scruple as to the approval of God (?); get the most out of this life, for there is nothing to be looked for beyond it (9$^{7-10}$). In the conflict of life merit does not ensure success, but it is matter of chance and circumstance. Men are snared by misfortune as fish are caught in a net. Wisdom is better than strength, yet, as in the case of the poor man who delivered the city, it meets with ingratitude and forgetfulness (9$^{11-16}$). Wisdom is far better than folly, it will guide man aright in his relations with princes, save him from danger by putting him on his guard, and guide him in practical life. Yet a capricious ruler may exalt folly (9^{17}–10^{11}). A fool's talk is worthless, and his labour wearisome (10$^{12-15}$). Unhappy is the land whose king is a child and whose princes are slothful and gluttonous; while that country is blessed whose king is of noble character and whose princes are temperate. But if the king be bad, it is prudent not to curse him even in secrecy, for his spies are everywhere, and will tell him of it (10$^{16-20}$). Be benevolent [or prudent], so that you may be safe in time of calamity. Do the work you have to do without waiting for the exact circumstances you would like. The laws of nature are above you, and the attempt to attain too close conformity with them is likely to paralyze industry (11$^{1-6}$). Life is sweet, but let man remember also the days of darkness that await him after death. And, remembering these, let him enjoy life to the full in his youth, before the evil days of old age come on him, when all his physical powers will fail, and all appetite for pleasure be gone; before his life be shattered, and he pass away. Vanity of vanities, all is vanity (11^{7}–12^{8}).

So end the meditations of Ḳ.; for the Epilogue, whether in whole or part authentic or not, lies outside the work itself. There can be little question as to the fundamental thought of the book. All is vanity, life yields no real satisfaction. If we had unlimited means at our disposal to secure happiness, it is quite unattainable. The best thing is to seek for enjoyment, to eat, drink, and be merry. Yet we should do the author an injustice if we regarded him as a mere sensualist. From gross indulgence he would have turned with disgust. It was madness, and no man who valued his peace of mind would be enticed by it (cf. his words on 'the woman whose heart is snares and nets,' 7^{26}). He urges rather a moderate enjoyment of the good things of life: 'Eat thy bread with joy, and drink thy wine with a merry heart; . . . Let thy garments always be white; and let not thy head lack ointment. Live joyfully with the wife whom thou lovest all the days of the life of thy vanity.' Life is a bad business at the best, but it lies within our power to palliate its misery by prudence and the due enjoyment of what little pleasure we can get. And we should be all the more eager to make the most of our opportunities for pleasure that in the dreary darkness of Sheol no possibility of enjoyment will be found. His motto is *Carpe diem*; and if in the abstract it be not a high motto, we must remember the misery of his time, and the absence of any hope of improvement in this world or immortality in the next. If we ask the cause of this misery, and of the general vanity of life and uselessness of all endeavour, it lies in the conditions of human life. God has a plan of the world, everything has its time and season. But man cannot find out what this plan is, and hence rarely orders his life in accordance with it. He may think that a certain line of conduct will produce a certain result; but it may be quite different, so that life may seem ruled by chance, not by law. And he is not master of his own fate. God has ordained this, and he helplessly struggles against it. He is caught in an evil snare and cannot escape. But when Ḳ. speaks of God, we may easily read more into his language than he meant. J″, the national name of the God of Israel, nowhere occurs. Ḳ. is certainly a theist, and the name of God frequently occurs. But God is withdrawn from the life of men ('God is in heaven, and thou upon earth,' 5^{2}). God is to be regarded with fear, and man must be very circumspect in his approaches to Him (5$^{1, 2}$). Man should be very careful in his utterances, and especially avoid a hasty vow. If he vows he should not defer to pay, for God 'hath no pleasure in fools,' and if provoked to anger may destroy the work of his hands (5$^{2-6}$). Ḳ.'s conception of God has nothing attractive or winning, He is rather set before us as the omnipotent Ruler who has ordained all the course of history, which man vainly seeks to comprehend, and as the austere Deity on whose favour or forbearance none may venture to presume. Such enjoyment as may be gained from life in harmony with His laws is legitimate, hence the gratification of appetite in a legitimate manner has His approval, it is His gift (2^{24} 3^{13} 5$^{18, 19}$ 9^{7} etc.).

His view of the future is equally gloomy, but in this he stands upon the old ways of thought. Men are beasts. 'For that which befalleth the sons of men befalleth beasts; even one thing befalleth them: as the one dieth, so dieth the other; yea they have all one spirit; and man hath no pre-eminence above the beasts: for all is vanity. All go unto one place; all are of the dust, and all turn to dust again' (3^{19-20}). On this follows the question: 'Who knoweth the spirit of man whether it goeth upward, and the spirit of the beast whether it goeth downward to the earth?' (3^{21}). This has been interpreted as if the writer meant to say that such a distinction really existed. But in face of the plain statements just quoted, it is hard to see how such a view can be maintained. The state of the dead is described in the most cheerless language. 'The dead know not anything, neither have they any more a reward; for the memory of them is forgotten. As well their love as their hatred and envy is now perished; neither have they any more a portion for ever in anything that is done under the sun' ($9^{5.6}$). 'There is no work, nor device, nor knowledge, nor wisdom in Sheol, whither thou goest' (9^{10}). 'Let him remember the days of darkness, for they shall be many' (11^{8}). Sometimes he speaks as though life were worse than death, and as if it had been best never to have been born at all ($4^{2.3}$ 7^{1}); sometimes as if death were worse than life ($9^{4.5}$), though for the grim reason that 'the living know that they shall die; but the dead know not anything.' There is no fundamental inconsistency; both life and death were so evil, that there was little to choose between them, and now one, now the other, might according to his mood be esteemed the worse. It would be different if we could assume, as some do, that he reached a higher point of view. Some of the passages already discussed under the head of the *Integrity of the Book* might be so interpreted. But it seems quite decisive against this that he *ends* his work with the words, 'Vanity of vanities, saith Ḳ., all is vanity.' Another passage which has been variously interpreted, is 3^{11} 'Also He hath set the world [or eternity] in their heart.' The word tr. 'world' is עֹלָם, and it is found in this sense in later Heb., but nowhere else in OT. It is true that this pleads for the sense 'eternity' adopted by Delitzsch, Wright, and others. And this would point to belief in a future life in the higher sense. Man has the longing for immortality placed in his heart by God. But the context speaks rather for the other rendering. God has a plan for the course of history, and has given men their labour in which they toil. He has set the world in their heart; in other words, He has implanted in men the instinct which causes them to busy themselves with the things of the world.

5. CANONICITY OF THE BOOK.—It does not fall within the province of this article to discuss whether Ec is or is not rightly included in the Canon. But the question of its canonicity is of considerable historical interest. It is well known that in the 2nd cent. A.D. there was dispute about it in the Jewish schools. The evidence may be conveniently seen in Wildeboer's *Origin of Can. of OT*. The question which is disputed by scholars is whether it was regarded as canonical in the 1st cent. B.C., and whether the later discussions concerned the question of its right to retain the position it had already attained, or whether it was first admitted into the Canon in consequence of these discussions. The question hardly admits of examination in our space, but the evidence seems to us to favour the latter view. The reader may consult the art. OLD TESTAMENT CANON, and the works of Ryle, Buhl, and Wildeboer, especially the last.

LITERATURE.—The *Comm.* of Ewald, Hitzig, Ginsburg, Graetz, Delitzsch, Tyler, Nowack, Plumptre, C. H. H. Wright. The *Introductions to OT* by Kuenen, Driver, Cornill, Wildeboer; A. B. Davidson in *Book by Book*; W. T. Davison, *Wis. Lit. of OT*; Cheyne, *Job and Sol.*; Renan, *L'ecclésiaste trad. de l'héb.* etc.; Bickell, *Der Prediger über d. Wert d. Daseins* (1884), and *Koheleth Untersuch. über d. Wert d. Daseins* (1886); Dillon, *Sceptics of OT*; C. Taylor, *Dirge of Koh. in Ec.* 12; Salmond, *Christ. Doct. of Immortality*, 165 ff., 267 ff.; and the literature in Strong, *Student's Comm.* pp. 31-38. A. S. PEAKE.

ECCLESIASTICUS.—See SIRACH.

ECLIPSE.—See ASTRONOMY AND ASTROLOGY.

ED.—In the Hebrew (and also in the Greek) text of Jos 22^{34} the name given by the two and a half tribes to the altar erected by them on the east bank[*] of the Jordan has dropped out. Our English translators have filled the gap by inserting *Ed* as the name of the altar in question. For this they have the authority of a few MSS (see de Rossi, *Variæ Lectiones Vet. Test.*, *in loc.*).

The Syriac (Peshiṭta) reads מרבחא רשהרותא 'altar of witness.' The suggestion of Dillmann in his commentary, *Die Bücher Num. Deut. u. Josua* (1886), that the original text had גַּלְעֵד *Gal'ed* (as Gn 31^{47}, EV Galeed), 'Mound of witness,' has been very favourably received (Oettli, Kautzsch, Bennett. See footnote). This name was probably dropped by some later copyist or editor who detected therein a possible inconsistency with the earlier narrative in Gn 31. The MT in its present form can only mean that the name of the altar was the whole sentence: It-is-a-witness-between-us-that-J″-is-God! A. R. S. KENNEDY.

EDDINUS ('Εδδεινοῦς B, 'Εδδινοῦς A), one of the 'holy singers' at Josiah's passover, 1 Es 1^{15}. In the parallel passage 2 Ch 35^{15} the corresponding name is Jeduthun, which is read also, contrary to MS authority, by AV in 1 Es. The text of the latter is probably corrupt. 'Εδδεινοῦς may have arisen from one or other of the numerous Gr. equivalents (perhaps 'Εδειθοῦν) of the name Jeduthun, but a more difficult question is the substitution in the same verse of Zacharias (wh. see) for Heman. J. A. SELBIE.

EDEN (עֵדֶן).—A Levite in the time of Hezekiah (2 Ch 29^{12} 31^{15}).

EDEN (עֶדֶן).—1. 'The children of E. which are (not *were* as in EV) in Telassar' are enumerated in 2 K 19^{12} (=Is 37^{12}) amongst the peoples conquered by Sennacherib's predecessors. Telassar, if Schrader is right in identifying it with *Til-Ašurri* of the inscriptions, lay on the east of the Tigris, and must have been the district to which the conquered had been deported, in accordance with the custom introduced by Tiglath-pileser III. From their being mentioned along with Gozan, Haran, and Rezeph, we naturally seek for the original home of the Bĕnê-Eden in Mesopotamia. They are doubtless the *Bit-'Adini* of the inscriptions, an Aramæan principality in the far west of Mesopotamia, some 200 miles N.N.E. of Damascus, which we know to have offered a stubborn resistance to Assur-naẓir-pal, and to have been conquered by Shalmaneser II., B.C. 856 (see ASSYRIA, pp. 183^{b}, 184^{b}). In Ezk 27^{23} Eden is mentioned amongst the traders with Tyre. The name here also occurs in connexion with Haran, and is therefore probably *Bit-'Adini*, although the conjecture of Margoliouth (see ARABIA, p. 131^b), that it may be the modern Aden in S. Arabia, is not without plausibility.

---

[*] This location is required by the whole tenor of the narrative. The west bank is suggested by v.^{10} in its present form, and maintained also by RV in v.^{11}, by a translation of doubtful admissibility, 'in the forefront of the land of Canaan, *on the side that pertaineth to the children of Israel.*' See further the Comm. *in loc.*, and Bennett's edition of Joshua in Haupt's polychrome OT.

LITERATURE.—Schrader, *KAT*^{2}, 327; Delitzsch on Is 37^{12}; Davidson on Ezk 27^{23}; Frd. Delitzsch, *Paradies*, 4, 98, 184.

2. 'The house of Eden' (AVm and RVm **Beth-eden**) is mentioned in Am 1^5. The context has led to the inference that it was in the neighbourhood of Damascus, 'some royal paradise in that region which is still the Paradise of the Arab world' (G. A. Smith, *Twelve Proph.* 125). Ewald (*Prophets*, i. 159, Eng. tr.) identifies it with the *Paradise* of Strabo, xvi. 2-19; and Farrar (*Minor Prophets*, 53) thinks it may be *Beit el-janne* 'House of Paradise' (see, however, Driver's note on Am 1^5), about eight miles from Damascus, referring in support of this view to Porter (*Five Years in Damascus*, i. 313). Driver considers the most probable identifications to be (1) the modern *Ehden*, 20 miles N.W. of Baalbek; or (2) *Bit-'Adini*, described above. Wellhausen (*Kl. Proph.* 68) considers it improbable that Beth-eden is to be sought *near* Damascus, and is sceptical also about identifying Aven of the same passage with Baalbek. (See, further, G. Hoffmann in *ZAW*, 1883, p. 97; Schrader, *KAT*^{2} p. 442; and esp. Driver, *Joel and Amos*, 132 f., 228 f.) J. A. SELBIE.

EDEN (עֵדֶן, Ἔδεμ).—We read that 'the LORD God planted a garden in Eden, eastward, and there put the man whom he had formed' (Gn 2^8). 'And a river went out of Eden to water the garden; and from thence it was parted, and became four heads' (v.^{10}). Two of these were the Tigris and Euphrates; a third was the Pison, which compassed the land of Havilah; the fourth being the Gihon, which compassed Cush. After Adam had been expelled from the Paradise, his firstborn, Cain, 'dwelt in the land of Nod, on the east of Eden,' and there built the city of Enoch (Gn $4^{16f.}$).

Eden means 'delight' in Hebrew, and the position of its garden has been assigned to various parts of the world. Even the North Pole and Australia have found advocates. Josephus (*Ant.* I. i. 3), the Book of Enoch (xxxii.), and Cosmas Indicopleustes place it in the extreme north-east, towards the Altai mountains of Mongolia. Sanson, Reland, Calmet, Bunsen, Keil, and von Raumer locate it in Armenia, between the sources of the Tigris and Euphrates, the Araxes and the Phasis. Calvin, Bochart, Huet, Rask, and the modern Assyriologists assign it to Chaldæa. Le Clercq places it in the neighbourhood of Damascus, between the Chrysorrhoas and the Orontes; while Heidegger seeks for it in Palestine, near the sources of the Jordan; and Hardouin and Halévy in southern Arabia. Renan identifies Eden with Udyâna, 'the garden,' near Kashmir; Bertheau, Lassen, Obry, Spiegel, and Lenormant, with the Meru of the Hindu Puranas, and the Airyana-Vaêja and Harâ-Berezaiti of the Zoroastrian Vendidâd and Avesta. Meru seems primarily to have denoted the mountains above the Pamir, Airyana-Vaêja being the country between the sources of the Oxus and Jaxartes, and Harâ-Berezaiti the Belur-dagh. Ezk 28^{14} is appealed to in behalf of the theory that the garden of Eden was on a mountain, though the text may be differently explained.

The rivers Pison and Gihon have been the subject of a similar variety of identifications. Josephus, Eusebius, Augustine, Ambrose, and Jerome make the Pison the Ganges, Cosmas Indicopleustes identifies it with the Indus, while the Jewish commentators, Sa'adya and Rashi, as well as the Samaritans, declare it to be the Nile. The Nile, on the other hand, is identified with the Gihon by Josephus (*Ant.* I. i. 3), most of the Fathers, Kalisch, Gesenius, Lengerke, and Bertheau, as well as in Sir 24^{25}. The Sept. also, in Jer 2^{18}, substitutes Gihon (Γηών) for Sihor, the Nile. Cosmas makes Gihon the Ganges; the Samaritan version calls it the Askôph, which seems to be the Cho-aspes. Mohammedan writers identified the Gihon and Pison with the Oxus and Jaxartes, whence their modern names of Jihûn and Sihûn, which were transferred by the Seljuk Turks to the Pyramus and Sarus in Cilicia. St. Martin identifies the Pison with the waterless Wady er-Ruma in Arabia.

The cuneiform inscriptions have, however, cleared up the geography of the garden of Eden. The Sumerian name of the 'plain' of Babylonia was Edin, which was adopted by the Semites under the form of Edinu. Its Assyr. equivalent was *Zeru*, corresponding to the Arab. Zor, the name still applied to the 'depression' between the Tigris and Euphrates. These rivers formerly flowed immediately into the Persian Gulf, though, owing to the silt annually deposited by them, their ancient mouths are now more than eighty miles distant from the sea. The seaport of primitive Chaldæa was Eridu, 'the good city,' now Abu-Shahrein, which stood near the mouth of the Euphrates. In its neighbourhood was a garden, 'a holy place,' wherein grew the sacred palm-tree—the tree of life—whose roots of bright lapis lazuli were planted in the cosmic abyss, whose position marked the centre of the world, and whose foliage was the couch of the goddess Bahu, while the god Tammuz dwelt in the shrine under the shadow of its branches, within which no mortal had ever entered. An oracle was attached to 'the holy tree of Eridu,' and Eri-Aku (Arioch) calls himself its 'executor.' This tree of life is frequently represented in the Assyr. sculptures, where it is depicted with two guardian spirits or cherubs, kneeling or standing on either side of it. They are winged, with the heads sometimes of eagles, sometimes of men. Lenormant states that on an Assyrian talisman in the collection of M. de Clercq he found the word *Kirubu* in place of the ordinary *sedu* or 'protecting genius' (*Les Origines de l'Histoire*, i. p. 118). The flaming sword of the cherubim has its counterpart in the sword of Merodach 'with fifty heads,' 'whose light gleams forth like the day'; and Sumerian texts speak of 'the wicked serpent,' 'the serpent of darkness.' See further, art. CHERUBIM.

The statement of Genesis, that the river which went out of Eden was parted into four heads, is explained by the fact that the Persian Gulf was held to be a river by the Babylonians, and was accordingly called by them *nar marratum*, 'the bitter river.' In the second millennium B.C., not only the Tigris and Euphrates, but other rivers besides flowed into it; but the tide, which carried the salt water a long way up their channels, made it possible to speak of their mouths as 'heads.' The Tigris was called Idigla and Idigna, 'the encircling,' in Sumerian, and *id* signified 'a river.' The **Pison** and **Gihon** were identified by Sir Henry Rawlinson with the Uknu and Surappu, which Tiglath-pileser III. couples with the Tigris in southern Babylonia (*Report of Fortieth Meeting of British Assoc.* p. 173). Subsequently he held the Pison to be the Arakhtu or canal on which Babylon was built; and the Gihon the modern Jûkhâ, which flows westward from the Euphrates towards Abu-Shahrein. Friedrich Delitzsch also identifies the Gihon with the Arakhtu, which he believes to be the Shatt-en-Nîl of to-day; but the Pison with the Pallukat, the Pallacopas of classical geography.

The names of the two rivers are, however, still unidentified in the inscriptions. But the land of Havilah encompassed by the Pison was the 'sandy' region of northern Arabia, which extended westward towards the frontier of Egypt (Gn 25^{18}, 1 S 15^{7}). The 'bdellium' that came from it may be the *budilkhati* of the cuneiform inscriptions, which is preceded by the determinative of vegetable; the 'onyx-stone' or *shoham* is the Assyr. *sâmtu*, which we are told was brought from the desert which lay to the east of Egypt.

The Gihon is perhaps the Kerkha, which rises east of the Tigris among the mountains of Luristan, formerly inhabited by the Kossæans, called Kassi in the cuneiform texts. The whole of Susiana was termed Kissia or Kyssia by the classical writers, and its two chief rivers were the Eulæus or Choaspes, the modern Kerkha, and the Pasi-tigris, the modern Karûn. In a cuneiform text the Ulai or Eulæus is described as entering 'the sea.' The land of Nod or the 'Nomads,' to the east of Edom, would correspond with the country of the nomad Sute and Manda in the Babylonian inscriptions.

Pinches has found the name of Pardêsu or 'Paradise' as that of a country, apparently mythological, in some Babylonian cuneiform tablets (*PSBA*, Dec. 1896). It is coupled with the 'land of Bit-Napsanu,' and in one passage, by a punning etymology, is derived from the name of 'the god Esu.'

LITERATURE.—Friedr. Delitzsch, *Wo lag das Paradies?* (1881); Sayce, *HCM* 95 ff.; Hommel, *Anc. Heb. Tradition*, p. 314.

A. H. SAYCE.

EDER (עֵדֶר).—1. Gn 35^{21} 'And Israel journeyed, and spread his tent beyond the tower of Eder' (AV Edar). '*Eder* means 'a flock'; and the phrase **Migdal-eder** ('flock-tower,' cf. Mic 4^{8}) would have been the appellation given to a tower occupied by shepherds for the protection of their flocks against robbers (cf. 2 K 18^{8}, 2 Ch 26^{10}). The tower here mentioned lay between Bethlehem and Hebron cf. vv.$^{19.\ 27}$). Jerome mentions a Jewish tradition that this Eder was the site of the temple, 'hunc locum Hebræi esse volunt, ubi postea templum ædificatum est: et *turrim Ader*, turrim gregis significare, hoc est, *congregationis* et *coetus*: quod et Michæas Propheta testatur, dicens; Et tu turris gregis nebulosa, filia Sion.' Jerome himself, however, prefers to think that it was the spot on which the shepherds received the angels' message, 'pastorum juxta Bethleem locus est, ubi vel Angelorum rex in ortu Domini cecinit' (*Quæst. in Gen.*). The tradition that the locality was near Jerusalem probably accounts for the verse (^{21}) appearing in the LXX before v.^{16}. This transposition would favour any identification which placed '*Migdal-Eder*' between Bethel and Bethlehem. The LXX transliterates עֵדֶר as Γάδερ. 2. Jos 15^{21}. The name of one of the towns of Judah 'in the south,' close to the Edomite frontier. For Eder, the LXX (B) gives Ἄρα; and (A) Ἐδραί. Conder (*PEF Mem.* iii. 236) identifies with Kh. el-'Adâr, 5 miles S. of Gaza. 3. 1 Ch 23^{23} 24^{30}. The name of one of the Levites in the days of David, of the house of Merari, and the son of Muhi. For Eder we find in the LXX (B) of 1 Ch 23^{23} Αἶδαθ, and of 1 Ch 24^{30} Ἡλά, where (A) has Ἔδερ in both instances. 4. A Benjamite, 1 Ch 8^{15} (AV Ader), where LXX (B) gives Ὠδηδ and (A) Ὧδερ.

H. E. RYLE.

EDIFICATION, EDIFY, EDIFYING.—These words are always used in AV in the sense of building up *spiritually*, either (*a*) the Church, or (*b*) the individual Christian.

The Gr. vb. οἰκοδομέω and subst. οἰκοδομή are used in NT, as in class. Greek and in the LXX, in the lit. sense of building—a house (Ac 7^{47}), tombs (Mt 23^{29}), etc. But our Lord having employed the figure of building His *Church*, which is expressed in St. Matthew's report (Mt 16^{18}) by the verb οἰκοδομέω, the metaphor was taken up, and gradually both verb and subst. were used with more and more freedom in this spiritual sense, esp. by St. Paul, to whom the metaphor may almost be said to belong. The Vulg. renders οἰκοδομεῖν by *ædificare*, and οἰκοδομή by *ædificatio*; and Wyclif, and all VSS following, render *ædificare* by 'edify,' *ædificatio* by 'edification,' or 'edifying.' See *Ecce Homo*, ch. xviii.

The word 'edification' seems to have been introduced into Eng. direct from the Lat. *ædificatio*, but 'edify' more probably through the Fr. *édifier*. They were used early, and probably first of all in a literal sense. Thus Paston, *Lett.* (1462), 'A plase late be the said Sir John edified at Caster'; Thomas, *Hist. Ital.* (1549), 'About 700 yeres after the edification of Rome.' The spiritual sense was due perhaps entirely to the influence of the Vulg., which sometimes was the cause of the literal use, as Wyclif's tr. of Gn 2^{22} 'and the Lord God edified the rib, the whiche he toke of Adam, into a woman,' after Vulg. 'ædificavit.' Trench (*Eng. Past and Pres.* p. 161) states that the mod. use of 'edify' and 'edification' began with the Puritans; it is more correct to say that by them the words were first used freely and extensively in the spiritual sense, whence Oldham's complaint—

'The graver sort dislike all poetry,
Which does not, as they call it, edify.'

J. HASTINGS.

EDNA (Ἔδνα = עֶדְנָה 'delight,' but Fagius עֲרָנָה) was wife of Raguel of Ecbatana, and mother of Sarah, who became wife of Tobias. She gave a cordial welcome to Tobias and his attendant Raphael in disguise, and questioned them as to their kindred (To 7^{3}), weeping over the recital of Tobit's adversities (7^{8}). She prepared once more the ill-fated bridal chamber (7^{14}), and led Sarah thither. Her maternal blessing (om. in Vulg.) was given on the departure of the bridal pair (10^{12}); and (B only) she received the blessing of Tobias in return (11^{1}). Vulg. and Itala call her Anna.

J. T. MARSHALL.

EDOM, EDOMITES (אֱדוֹם, Ἐδώμ, *Idumæa*).—Edom, the 'Red' Land, so called from the red colour of its sandstone cliffs, embraced the ranges of Mount Seir on either side of the 'Arabah, or depression which runs southward from the Dead Sea to the head of the Gulf of Aḳabah. The name corresponds with that of Deser or 'Red,' applied by the Egyptians to the desert to the east of their country which was inhabited by the Shasu or Bedawin, and included Mount Seir. In the time of the Twelfth Dynasty, as we learn from the story of Sinuhit, the country in which Edom was situated went by the name of Tonu (or Tennu), the portion to the north-east of it being called Ḳadûmâ, the Ḳedem of the OT, whence the Kadmonites of Gn 15^{19} (see also 1 K 4^{30}). Sinuhit received in it the district of Aia. In one of the Tel el-Amarna tablets (*The Tel el-Amarna Tablets in the British Museum*, No. 64) the city of Udumu or Edom is mentioned as hostile to the Egyptian king, and as being in a foreign land, together with the cities of Aduri (Addar), Magdalim (Migdol), and Khini-anabi (En-ha(n)-nabi). Udumu is sometimes called a 'city' in the later Assyr. inscriptions, though it is also spoken of in them as a 'country.' We may conclude, therefore, that the country took its name from its capital. In the Leyden Papyrus (i. 343, 7) the wife of the Semitic fire-god Reshpu is said to be 'Edom' (*Etum*), and at Karnak both Amenophis II. and Thothmes III. mention the city of Shemesh-Edom (*Shemshu-Edum*), which is coupled with Anukhertu, the Anaharath in Issachar of Jos 19^{19}. Rethpana, the Egyptian name of the Dead Sea, may be a derivative from Reshpu (cf. Job 5^{7}, where 'sparks' are called 'the sons of Resheph'). The name Obed-edom, 'servant of Edom,' occurs in the OT (2 S 6^{10}). Edom, therefore, was probably (but not certainly [see Driver, *Text of Sam.* 205]) the name of a deity; and since both Udum and Etum correspond to the same Hebrew word, it would seem that the local and divine names were connected with one another.

The original inhabitants of Mount Seir were Horites (which see), who were 'destroyed' by the children of Esau (Dt 2^{22}). The genealogies in Gn 36, however, show that the destruction was not complete, and that the two races intermarried. Esau himself married a descendant of 'Seir the Horite' (36^{2}, where $36^{20.\ 21}$ show that we must read 'Horite' for 'Hivite'). When the campaign of Chedorlaomer and his Babylonian allies took place the Horites had not yet been dispossessed (Gn 14^{6}). The Horites were governed by *'allûphîm* or 'dukes,' and both the office and name were handed on to their Edomite successors (Gn 36$^{29.\ 40-43}$). As the '*'allûphîm* of Edom' are alone referred to in the song of Moses (Ex 15) after the overthrow of the Egyptians, we may perhaps infer that at the time of the Exodus a king had not been established in Edom; at any rate the reference is an indication of the antiquity of the passage in which it occurs. Before the Israelites had quitted the desert, however, there was a king in Edom. Moses sent messengers from Kadesh-barnea to the king of Edom asking him to permit his 'brother Israel' to pass through his territories, promising that they would march along the highway and do no injury to the country. But the Edomites refused permission, and came out with an army, so that the Israelites were obliged to 'compass the land of Edom' (Nu 20$^{14-21}$ 21^{4}).

The kings of Edom who reigned 'before there reigned any king over the children of Israel' are enumerated in Gn 36$^{31-39}$. The first, Bela the son of Beor, seems to be identical with Balaam the son of Beor, the seer of Pethor. If so, this would account for his having been slain in the war with the Midianites (Nu 31^{8}). 'Rehoboth by the river,' from which Shaul came (Gn 36^{37}), must have stood on the Euphrates, as that is 'the river' of the OT; consequently it cannot be the Rehoboth or 'Suburbs' of Nineveh (Assyr. *Ribit*), which were on the Tigris. The list of Edomite kings must have been extracted from the royal annals, and, as it breaks off in the reign of Hadar (Gn 36^{39}) (or Hadad, 1 Ch 1^{50}), may have been composed at that time. It will be noticed that the monarchy was elective, not hereditary.

The children of Israel were ordered not to 'contend' with their 'brethren the children of Esau, which dwell in Seir,' for God had 'given Mount Seir unto Esau for a possession'; and accordingly they turned eastward after passing the Edomite ports of Elath and Eziongeber (now 'Aḳabah and Ḳala'at el-'Aḳabah), at the head of the Gulf of Aḳabah, and made their way to Moab along the eastern edge of Mount Seir (Dt 2$^{4-8}$). Similarly, the Edomite, like the Egyptian, was allowed to 'enter into the congregation of the Lord in the third generation' (Dt 23$^{7.\ 8}$), in contrast to the Ammonite and Moabite, who could not do so till the tenth generation.

Ramses III. of the Twentieth Egyptian Dynasty, after defeating the northern hordes who had attacked Egypt, and overrunning the south of Palestine, 'smote the people of Seir who belong to the Shasu (Bedawin), and plundered their tents.' Among the pictures of his prisoners at Medînet Habu is that of the Edomite 'chief,' who, it must be observed, is not called 'king.' So far as we know, it was the only campaign ever undertaken by a Pharaoh against Mount Seir. Its date was about B.C. 1230-1200, some thirty years after the Exodus, so that the Israelites might have been in the neighbourhood of Edom at the time (cf. Nu 21^{14}).

Edomite tribes settled in the south of Judah, and even Othniel the brother of Caleb, and the first judge, was a Kenizzite (Nu 32^{12}, Jos 15^{17}, Gn 36$^{11.\ 15}$). Saul warred with Edom (1 S 14^{47}); and David conquered the country, putting garrisons throughout it, and occupying its ports in the Gulf of Aḳabah (2 S 8$^{13.\ 14}$, where we must read 'Edom' for 'Aram,' AV 'Syrians'). It was in these ports that Solomon with the help of the Tyrians constructed the merchant vessels which traded to Ophir for gold (1 K 9$^{26-28}$). Throughout his reign, however, Edom was in a state of revolt under Hadad, 'of the king's seed,' who had escaped to Midian when Joab was for six months cutting 'off every male in Edom' after David's conquest of the country. From Midian he and his companions went to Paran, and from thence to the court of Egypt, where the Pharaoh gave him his sister-in-law as a wife, and his son Genubath was brought up as an Egyptian prince. But on the death of David and Joab, Hadad obtained leave to return to Edom, and became 'an adversary unto Solomon' (1 K 11$^{14-22}$). He does not seem to have succeeded in making himself independent, however, as we find Edom still subject to Judah after the revolt of the Ten Tribes. Jehoshaphat still held Ezion-geber, where he built ships to trade to Ophir; and it is stated that 'there was then no king in Edom: a deputy was king' (1 K 22^{47}). This means that there was no independent king there, since, in the war against Moab, when Edom had to follow its suzerain, its ruler is called 'king' (2 K 3$^{9.\ 10.\ 12.\ 26}$). In the reign of Jehoram, Jehoshaphat's successor, Edom revolted, 'and made a king over themselves.' The revolt spread to the south of Judah, where Libnah was the centre of disaffection; and though Jehoram defeated the Edomites at Zair, he was unable to reduce them to obedience (2 K 8$^{20-22}$). About fifty years later Amaziah invaded Edom, slaying 10,000 of the enemy in the Valley of Salt, and taking Sela (or Petra), which he named Joktheel (2 K 14^{7}). Edom seems to have been crushed by this defeat, as Amaziah's successor, Uzziah, 'restored' Elath to Judah, and rebuilt it (2 K 14^{22}). It remained in Jewish hands till it was captured by Rezin of Damascus, who colonized it with Syrians * (2 K 16^{6}). This was in the reign of Ahaz, when 'the Edomites had come and smitten Judah, and carried away captives' (2 Ch 28^{17}). Rezin, however, was conquered and put to death in B.C. 732 by Tiglath-pileser III. of Assyria, who thereupon held a court at Damascus, where he received the homage and tribute of numerous princes, among them being 'Jehoahaz (Ahaz) of the land of the Jews,' and 'Ḳaus-malaka (Ḳaus-melech) of the land of the Edomites.' Schrader has pointed out that Ḳaus is the name of a god which appears as Kos in Greek inscriptions, with which Halévy compares the name of the early Arab. deity Ḳais (Heb. Kish, Kishon). In B.C. 711, Edom joined the league against Sargon along with Judah, Philistia, Moab, Egypt, and Merodach-baladan of Babylon; but Ashdod, the Syrian centre of the league, was taken by the Assyrians, and Edom, like Moab and Judah, paid tribute to the conqueror. Edom again joined the revolt against Assyria in B.C. 701, of which Hezekiah was the head; but when Sennacherib marched into Palestine, A-rammu of Edom submitted like the kings of Moab and Ammon. Esar-haddon caused Ḳaus-gabri, 'king of the city of Edom,' together with the other vassal kings of the west, including Manasseh of 'the city of Judah' and the king of 'the city of Moab,' to convey to Nineveh timber from Lebanon and various stones for the construction of his palace. When Jerusalem was destroyed by Nebuchadrezzar, the Edomites took part with the enemy, and rejoiced over the calamities of Judah,—conduct which aroused bitter feelings against them on the part of the Jews (La 4$^{21.\ 22}$, Ezk 35$^{3-15}$, Ob $^{10-16}$). These feelings were not diminished by their occupation of southern Judah, with Hebron as their capital, and their attacks upon the Jews during the Maccabæan war. Judas Maccabæus, however, drove them from the south of Judah (B.C. 164); and John Hyrcanus, in B.C. 109, conquered their country, and compelled them to adopt Judaism. Mount Seir, as far north as Petra, had already fallen into the hands of the Nabatæans, who spoke an Aramaic dialect. Hyrcanus II., the grandson of John Hyrcanus, on being driven out of Jerusalem, was induced by the Idumæan Antipater to seek the help of Aretas, the king of Petra. Pompey, however, intervened, and after sacking Jerusalem, made Hyrcanus high priest (B.C. 63), while Antipater was subsequently (B.C. 47) appointed by Julius Cæsar procurator of Judæa, Samaria, and Galilee on account of his services against Pompey. His son was Herod the Great.

---

* So the Kethibh ארומים. The Kerê, however, reads אֲדוֹמִים (Edomites); and this, which has the support of the LXX Ἰδουμαῖοι, is adopted by Siegfried-Stade and *Oxf. Heb. Lexicon.*

Edomite proper names show that the language of Edom was practically identical with Hebrew. Of Edomite deities we know only the names of Hadad (also Dad), Ḳaus, Kozé, Edom, and Â. The name of Esau's son Jeush (Gn 36^{5}), however, corresponds phonetically with that of Yaghûth, a pre-Mohammedan deity of Arabia.

EDREI (אֶדְרֶעִי, Ἐδράειν, *Edrai*).—1. Edrei was a city of Bashan (now the Haurân, eastward of Lake Tiberias), where the Amorite king Og was defeated and slain by the Israelites (Nu 21^{33}, Dt 3^{1}, Jos 13^{12}). It was then given to Machir, the son of Manasseh (Jos 13^{31}, see Jg 5^{14}), the district in which it was situated being known as Gilead (Nu 32^{39}). The Amorites do not seem to have been long in possession of it, as one of the letters of Tel el-Amarna, about a century and a half before the Exodus, is from Artama-Samas,[*] the governor of Ziri-Basana, 'the field of Bashan.' Edrei is the Adraha of classical geography, and in Christian times was the seat of a bishop. It has been identified with the modern Der'ât or Der'a, where there is a large reservoir, as well as an aqueduct and mausoleum. About 10 miles to the north of it is Tell 'Ashtera, the supposed site of Ashtaroth, which is associated with Edrei, and in the time of Abraham was inhabited by the Rephaim (Gn 14^{5}). In one of the Tel el-Amarna letters (B. M. 43. 10) it is called Astartu, and the writer of the despatch accuses a certain Biridasyi of taking the chariots out of it and giving them to the Bedawin. The neighbouring city of Buzruna (Bostra) was at the time under a king of its own. W. Max Müller identifies the city of Autarâ in the Karnak List of Thothmes III. (No. 91) with Edrei. Philologically the names would correspond, but the identification is impossible, as Autarâ is enumerated among the towns of southern Palestine. Astartu or Ashtaroth is in an earlier part of the list (No. 28).

2. EDREI is mentioned in Jos 19^{37} between Kadesh and En-hazor, in the tribe of Naphtali. The site of it is unknown.

EDUCATION.—Every student of the history of education will endorse the judgment of the Alexandrian scholar (Prol. to Sirach), that Israel must needs be commended for its zeal in the cause of moral and intellectual culture (παιδεία καὶ σοφία), since the canonical Books of Deuteronomy and Proverbs, the deutero-canonical Wisdom of Jesus ben-Sira, and the Mishna treatise commonly called the *Sayings of the Fathers* (פִּרְקֵי אָבוֹת *Pirḳê 'Abôth*), provide a catena of pedagogic principles without a parallel in ancient literature. Two sentences only may be selected for quotation at this stage. The one is the motto prefixed to the Book of Proverbs: 'The fear of the Lord is the beginning of knowledge' (Pr 1^{7}, cf. 9^{10}); the other is attributed to Simeon, the son of the famous Gamaliel: 'Not learning but doing is the chief thing' (*Ab.* i. 17).[*] In these maxims we find the two distinguishing notes of Hebrew education, which from first to last was at once religious and practical—an education which sought to combine instruction in the positive truths of the ancestral faith[†] with preparation for the practical duties of life. It was this successful combination which led Josephus in his treatise *Against Apion* to contrast the education of his countrymen with that of the Lacedæmonians and Cretans on the one hand, and with that of the Athenians on the other—the former being too severely practical, the latter too exclusively theoretical. 'But our lawgiver with great care combined these two methods, for he neither left the practice of right habits without oral instruction (lit. 'dumb,' κωφήν), nor did he permit the rules thus taught to remain unpractised.'

We propose here to study the educational methods of the Israelites historically. For this purpose it will be convenient to group the material at our disposal under three historical periods, as follows:—

i. HEBREW EDUCATION FROM THE CONQUEST TO THE EXILE.—When the Hebrews came to settle in the valleys west of the Jordan, they found themselves among a race or races immensely their superiors in all the arts of civilization and culture. Of this there can be no reasonable doubt, though we *may* doubt whether the country was so thickly studded with schools, teachers, and libraries as has recently been maintained.[‡] In any case the troublous times of the conquest were not the most suitable for assimilating the higher civilization of the Canaanites. Reading and still more writing (Jg 8^{14}) must rather have been the accomplishment of the few than the custom of the many. However that may be, one fact of Hebrew history remains indisputable, namely, that throughout the long period closing with the exile, education was exclusively domestic and private. It is true that the late Jewish writings, Talmud, Targum, and Midrash—those storehouses of magnificent anachronisms—represent even the patriarchs as attending school and college, but such statements are merely harmless flights of fancy. In the whole range of pre-exilic literature there is no trace of any provision by public authority for either elementary or higher education. The word 'school' occurs neither in the OT nor in the Apocrypha, and in the NT only of the lecture-room of a Greek rhetorician at Ephesus (Ac 19^{9}). The explanation is that the home was the school, and the parents, in all but the highest ranks of society, were the only teachers. The duty of reverence for and obedience to parents imposed on children by the oldest legislation (Ex 20^{12}), had its counterpart in the duty incumbent on the parents (and in particular on the father) to instruct their children in religion and morals. This aspect of parental responsibility is repeatedly emphasized in the Book of Deuteronomy (4^{9} 6^{7}), 'Thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up' (6^{20-25} 11^{19} 32^{46}). The special provision of Dt 31^{10-13}, requiring the presence of the children at the reading of the law in 'the year of release,' *i.e.* every seventh year, can have had only a very limited application before the great calamity of the exile (cf. Dt 31^{10} with Neh 8^{17}). In the families of the aristocracy the place of the parents, the child's natural teachers, was taken by tutors (אֹמְנִים 2 K $10^{1.5}$). The infant Solomon, according to the simplest rendering of 2 S 12^{25}, was entrusted to the care of the prophet Nathan.

[*] Now read Artama-Ya or Artama-anya by Winckler.

[*] Quotations from *Aboth* will be made from 'The Authorized Daily Prayer-Book of the United Hebrew Congregations of the British Empire' (ed. Singer), as providing the most easily accessible text and translation. References to other treatises of the Mishna are given acc. to the sections of Jost's edition.

[†] Contrast this with the statement of Iwan Müller: 'Special instruction in religion was not known to either the Greeks or the Romans of antiquity' (*Handb. d. klass. Alterthumswissenschaft*, iv. p. 451 *b*).

[‡] Esp. by Sayce in *Patriarchal Palestine* (*passim*), and elsewhere.

It is now impossible to form an exact estimate of the extent to which education, as tested by the ability to read and write, was common among the people. The standard of learning would naturally be higher in the cities than in the country districts, highest of all in the neighbourhood of the court. Yet such facts as that Amos and Micah among the literary prophets belonged to the ranks of the people; that Mesha, king of Moab, could count on readers for the stele commemorating his victories; that the workmen who excavated the tunnel from the Virgin's spring to the pool of Siloam carved in the rock the manner of their work,—these facts, taken along with more than one passage of Isaiah (8^{1} 10^{19} 'a child may write them'; cf. $29^{11.12}$ the distinction between the literate and the illiterate), should make us pause before drawing the line of illiteracy too high in the social scale.

A single word must suffice for the **schools of the prophets** (an expression with no scriptural authority), of which so much was made by scholars of former days. All that the Scripture narrative warrants us in holding is that in a few centres, such as Bethel (2 K 2^{3}), Jericho (2^{5}), and Gilgal (4^{38}), men of prophetic spirit formed associations or brotherhoods (hence the name 'sons of the prophets') for the purpose of stimulating their devotion to J" through the common life of the brotherhood. Edification, not education, was the main purpose of these so-called 'schools.'

ii. FROM THE EXILE TO SIMON BEN-SHETACH, *c.* B.C. 75.—The arrival in Jerusalem of Ezra the 'ready scribe' (סֹפֵר) in the law of Moses (Ezr 7^{6}) was an event of epoch-making importance in the educational not less than in the religious history of the Jews. For Ezra had set his heart to *study* (לִדְרשׁ) the law (*Torah*) of J" and to do it, and to *teach* (לְלַמֵּד) in Israel statutes and judgments (Ezr 7^{10}). The story of Ezra's activity belongs to the general history of the period. For our present purpose it is enough to recall the fact that the culmination of that activity was the acceptance by the Jewish community of the Torah, in its written form, as the regulating norm in every relation of life. From this time onwards the Jews were preeminently 'the people of the book.' But in order that the moral precepts of a book may be obeyed, and its ritual requirements duly observed, the book must be circulated, must be read and studied. The first step in this direction was the great assembly of which we read in Neh 8 ff. The centre of interest throughout is not the living word of a prophet, but the book of the law and the exposition of its contents by accredited teachers (note Neh $8^{7.8}$ מְבִינִים, the same word as is rendered 'teacher' in 1 Ch 25^{8} and in Ezr 8^{16} RV). We would gladly know what measures were taken by Ezra and his associates for the continuance of the public instruction so auspiciously begun. Unfortunately, we have no information on this point from contemporary records, and what a late age has to tell of the work of the so-called 'Great Synagogue' belongs to the world of fable.* There can be little doubt, however, that one of the oldest institutions of Judaism, the synagogue, goes back to the time of Ezra, if not indeed to the days of the exile. The synagogue, it is important to remember, was not originally a place of worship but a place of religious instruction, and indeed it is so named by a writer so late as Philo of Alexandria (*Vita Mosis*, iii. 27, *τὰ προσευκτήρια τί ἑτερόν ἐστιν ἢ διδασκαλεῖα, κ.τ.λ.*). With this agrees the fact that in NT times *διδάσκειν*, to teach, is still used to express the function of the preacher in the synagogue (Mt 4^{23}, Mk 1^{21}, Lk 4^{15} and often).* But whether we regard Ezra as the immediate founder of the synagogue or not, there can be no doubt of the fact that, by securing the recognition by the public authorities of the need of organized religious instruction, he accomplished a work of supreme importance in the educational history of the Jews. 'The Bible became the spelling-book, the community a school, religion an affair of teaching and learning. Piety and education were inseparable; whoever could not read was no true Jew. We may say that in this way were created the beginnings of popular education. In what way this took place is, it is true, wrapped in mystery; in the synagogue men did not learn to write and read, and the scribes were not elementary teachers. But the ideal of education for religion's sake was set up and awoke emulation, even though the goal was not reached all at once' (Wellhausen, *Isr. u. jüd. Gesch.*^{1} p. 159).

During the whole of the period under review the early education of the Jewish child continued, even more than before, to be the business of his parents. Elementary schools were still unknown. Now, as in much later times, it was 'the duty of the father to instruct his son in the Torah (*Kiddushin*, 29*a*),' a duty in which the mother took her share (Pr 6^{20} 31^{1}, Sus ^{3}). The obligation extended even to 'children's children' (Dt 4^{9}). A noteworthy feature of the pentateuchal precepts, from the view-point of pedagogic method, is the extent to which certain religious rites are to be used as object-lessons to the children [Ex $12^{26f.}$ 13^{8} (passover) 13^{14} (first-fruits), cf. Jos 4^{6}]. Their interest and attention are first to be aroused, and only after question asked is the explanation of the rite to be given. In the case of the passover the question, 'What mean ye by this service?' (Ex 12^{26})—now expanded to four—has remained as part of the ceremony to the present day.

The leading feature of the educational history of this period is the rise of a body of men as professional teachers. These are the *Sōphĕrîm* (סֹפְרִים, literally 'book men'), or scribes. For the circumstances which led during the exile to a species of literary renaissance, or rather to a new interest in the literature of the past, and thereby to the growth of a body of *literati* (*γραμματεῖς*),—students, copyists, and teachers,—we must refer to the article SCRIBES. We have seen, however, under what circumstances the study and the exposition of the Torah, in particular, were begun among 'the children of the captivity' in the new community at Jerusalem. From that time to the end of the Jewish state and beyond it, the office of the scribe was one of ever-increasing importance. But to identify, as is too often done, the scribes of the Persian and early Greek period with those whose character and aims are familiar to us from the Gospels, is to do the former great injustice. For these ancient scribes have shared in the rehabilitation of the late Persian and early Greek periods of Jewish history, which is so remarkable a feature of the critical scholarship of the day.† Here we are concerned with them only in so far as they continued the work of instruction committed to them by Ezra. Unfortunately, from the lack of historical material, it is now impossible to trace the development of education under their guidance. We know, however, that by the time of the Chronicler (1 Ch 2^{55}) they had been 'organized in regular "families," or as we should now say "guilds," an institution quite in accordance with the whole spirit of the East, which forms a guild or trades-union of every class possessing special technical knowledge' (W. R. Smith, *OTJC*² p. 44). From the proverbial form of 1 Ch 25^{8b}—'as well the small as the great, the teacher as the scholar'—we may further infer that the relation of master and pupil was by this time (*c.* B.C. 300) a familiar one; which, of course, implies facilities for education other than the Levitical music schools to which the proverb is here applied.

† See, *inter alios*, Wellhausen, *Israelitische u. jüdische Geschichte*^{1}, p. 154.

Here we are met by one of the most interesting but difficult problems in the history of Hebrew education. Not the least important of the critical results above referred to, is the bringing down of the compilation of our present Book of Proverbs, and so of the Golden Age of the Wisdom Literature, to the Persian period. In this case, who are the 'Wise' (חֲכָמִים), the sages of whom this department of Hebrew literature is the characteristic and enduring memorial? May we identify them with the older race of Sopherim, the book-men or *literati* of the period?* The temptation is great. Thus the scribes were the accredited teachers of the people (see above), and the most venerable of the traditions preserved by the fraternity from the 'men of the Great Synagogue' was the obligation to 'raise up many disciples' (*Ab.* i. 1). But the sages were also teachers (מוֹרִים, מְלַמְּדִים Pr 5^{13}), who address a pupil as 'my son,' and whose teaching is known as 'the words of the wise' (Pr 1^{6} 22^{17}, Ec 9^{17} 12^{11}; see also the *Oxf. Heb. Lex. sub* חָכָם). Again, the scribes formed, as we have seen, a guild or corporation. But we have abundant evidence that the sages are also to be regarded as forming a distinct fraternity (Pr 1^{6} 13^{14} 22^{17} 24^{23}, Ec 12^{11}. Cf. Cheyne, *Job and Solomon*, p. 123 and *passim*; Riehm, *Handwört. d. Bibl. Alt.*² *sub* 'Weise'†; Kautzsch, *Abriss d. Gesch. d. AT Schrifttums*², 1897, p. 135 ff.). Wellhausen in his recent history, while maintaining their original independence, admits that by the time of Jesus ben-Sira (B.C. 200–180) the scribes 'were scarcely any longer to be distinguished from the sages' (*Gesch.* p. 154, note 1). This admission is due to the fact—and here perhaps we have the strongest argument for the identity of the two classes—that Ben-Sira, the last of the sages, was himself a scribe. Of this there can be no doubt; one has but to read his glowing panegyric on 'the wisdom of the scribe,' and the glory of his calling (Sir 38^{24}–39^{11}). It is therefore but natural that 'the best, and almost the only data regarding the earlier scribes, are to be found in the Book of Ecclesiasticus, $6^{33ff.}$ $9^{14ff.}$ $14^{20ff.}$ $38^{24ff.}$' (Wellhausen, *loc. cit.*).

For our present purpose the final answer to our query regarding the *personnel* of the sages is immaterial; for whether we hold that they are identical with the Sopherim or book-men, or regard them as forming a distinct but allied class in the pre-Maccabæan community, the fact remains that the sages represent a great educational force in the period under review. The Book of Proverbs is the repository of their pedagogic experience (see esp. 1^{2-6}), and so the oldest handbook of education. Life is here conceived as a discipline (מוּסָר, a word occurring 30 times in the book acc. to Driver, *LOT*¹ 380). This is its central thought. 'The whole of life is considered from the view-point of a pedagogic institution. God educates men, and men educate each other' (O. Holtzmann in Stade's *GVI*² ii. 296–97). Father and mother are the child's natural instructors (1^{8} 4^{1-4} 6^{20} 13^{1} 30^{17}); from them he shall first learn that 'fear of the Lord which is the beginning—or it may be the chief part—of wisdom' (9^{10}). Their duty in this respect is emphasized; they are to study their child, since his character is known by his conduct (20^{11}). To them is addressed the golden maxim, 'train up a child in the way he should go, and even when he is old he will not depart from it' (22^{6} RV). The child is by nature foolish, and needs the 'rod of correction' (22^{15}). Corporal punishment is repeatedly advocated ('he that spareth his rod hateth his son,' 13^{24}, cf. 19^{18} $23^{13.\,14}$ $29^{15.\,17}$, also La 3^{27}), yet with the intelligent child reproof is better than 'a hundred stripes' (17^{10}). From the parents' care the child—of the upper classes only, in all probability, cf. 17^{16} 4^{7} (RV) with Sir 51^{28}—if he would attain to 'wisdom,' passes into the hands of professional teachers (5^{13}), the sages, whose words 'spoken in quiet' (Ec 9^{17} RV) 'are as goads' (Ec 12^{11}), and whose direction (תּוֹרָה) is 'a fountain of life' (Pr 13^{14}). The pupil's progress in religion and morality is the teacher's highest joy ($23^{15.\,16}$), but not all are capable of receiving this higher instruction (27^{22}). Prudence and forethought (24^{27}), temperance (21^{17} $23^{20.\,21.\,29-35}$) and chastity ($7^{6ff.}$ 29^{3} and oft.), diligence (6^{6-11}) and truthfulness (17^{7}), consideration for the poor (14^{21} 19^{17} 22^{9}), and a truly noble charity towards enemies ($25^{21.\,22}$ = Ro 12^{20}), the value of true friendship (17^{17} 18^{24} 27^{10}), and the dignity of womanhood (31^{10-31}),—these are some of the moral lessons to be learned in 'the house of discipline' (*οἴκῳ παιδείας*, Sir 51^{23}) from 'the lips of the wise' (Pr 15^{7}).*

The founding of Alexandria was an event the importance of which for the history of Jewish life and thought even in Palestine it is impossible to overestimate. What would we not give to be able to trace the working of the subtle influences on the religious thought of the time, in particular, of those forces of Hellenism by which the little Jewish state was girt about on every side (cf. 1 Mac 1^{11})! For something like a century Alexandria, with its great library and university, its brilliant array of scholars and *littérateurs*, was the capital of Southern Syria as well as of Egypt. How was popular education affected by this close connexion of Alexandria and Jerusalem? A solitary notice, so far as we have been able to discover, from the period in question, almost warrants us in believing that the Greek educational methods had penetrated to Jerusalem. The infamous tax-farmer Joseph (*c.* B.C. 220),† we are told, sent his sons 'severally to those that had the best reputation for instructing youth' (Josephus, *Ant.* XII. iv. 6). The education required was certainly of the Greek type, and this fact, taken in connexion with the rapid progress of Hellenism at this particular epoch, even under the shadow of the temple (see 1 Mac 1, 2 Mac 2–4), makes it very probable that schools on the Greek model were then established in Jerusalem. When the author of Ps 119 says, 'I have more understanding than all my teachers,' etc. (vv.$^{99.\,100}$), there is good reason for thinking that he wishes to exalt the study of Holy Scripture above the secular learning of the Greek schools. However this may be, Ben-Sira was still true to Jewish traditions and uninfluenced by Hellenistic culture. He had travelled in other countries, and studied perhaps in other literatures, but he remained 'a true "scribe," and gloried in the name' (38^{24}). The object his translator had in view, as we learn from his preface to his grandfather's work, 'was to correct the inequalities of moral and religious culture (*παιδεία*) among the Jews of Egypt by setting before them a standard and a lesson book of true religious wisdom' (Cheyne, *Job and Solomon*). 'The Wisdom of Jesus the son of Sirach,' or 'Ecclesiasticus,' is therefore avowedly a manual of ethics, and as such deserves more space than we can give it in this review of Jewish educational history. 'Draw near unto me, ye unlearned,' we read in the epilogue, 'and lodge in the house of instruction. Say, wherefore are ye lacking in these things, and your souls are very thirsty?' (Sir $51^{23ff.}$). His religious standpoint is essentially that of the Book of Proverbs, on which his own is modelled. Thus the fear of the Lord is not only 'the beginning of wisdom' (1^{14}), but also wisdom's fulness (1^{16}) and crown (1^{18}). Yet the author's ethical tone is distinctly lower than that of his model. As a disciplinarian he is severe even to excess (30^{1-13} $7^{23.24}$). The principles of humane conduct are exhibited in many lights, including even the 'manners' of the dinner table (31^{16-21}). The notable passage (38^{24}–39^{11}) in which he sketches his ideal of the scribe has been already adverted to. One point, however, must be further emphasized, viz. the assertion that learning is the monopoly of the wealthy: 'The wisdom of the scribe cometh by opportunity of leisure. How shall he become wise that holdeth the plough,' etc.? ($38^{24ff.}$) Education is costly (51^{28}), but he himself offers the means of culture 'without money and without price' (cf. 51^{25}).

---

* This identification was first proposed by A. T. Hartmann (*Die enge Verbindung d. AT. mit d. Neuem*, 1831), and more recently and independently by Smend in his *Alttest. Religionsgeschichte*, 1893, p. 512 ff. Cf. Montefiore, *Hibb. Lect.* 396 f.

† 'They (the sages) occupy in the everyday life of ancient Israel a position precisely similar to that of the scribes in later Judaism.' Riehm is, of course, assuming the *pre-exilic* date of Proverbs.

* How much, one wonders, of what is best in our Scottish character to-day is due to the use till almost the other day of this great book (*ἡ πανάρετος σοφία*) as the reading-book of our parish schools?

† For this corrected date see Wellhausen, *op. cit.* pp. 197–98.

Many questions regarding the practical aspects of education in this period suggest themselves, to which only tentative answers can be given. Where, for example, did the teachers of whom we read (Pr 5^{13}, Ps 119^{99}, perhaps Dn 12^{3})—be they sages or scribes—meet their pupils? What were their methods of instruction? The synagogues first occur to one as the scene of those expositions of Scripture to which the name of *Midrash* was already applied (2 Ch 13^{22} 24^{27}). There the people were instructed on Sabbaths and feast-days by competent expounders of the Scriptures, as a rule, no doubt, by the scribes, although these never had a monopoly of the synagogue teaching. As early as the beginning of the 3rd cent. the scribes had apparently facilities for teaching within the temple precincts: such, at least, seems the legitimate inference from their description as 'scribes of the temple' in the edict of Antiochus III. (Jos. *Ant.* XII. iii. 3). 'Within the massive city gates or in the adjacent squares or "broad places" on which the streets converged (Pr $1^{20.21}$, cf. Job 29^{7}) the "wise men" awaited their disciples' (Cheyne, *op. cit.* p. 124). Most of the instruction, however, was doubtless given by sage and scribe alike in private houses, their own or those of wealthy disciples. 'My son,' says Ben-Sira, 'if thou seest a man of understanding, get thee betimes unto him, and let thy foot wear out the steps of his house' (Sir 6^{36} RV). With this advice we compare that of José ben-Joezer of Zeredah, in the early Maccabæan days: 'Let thy house be a meeting-place (בֵּית וַעַד) for the wise; sit amidst the dust of their feet, and drink their words with thirst' (*Ab.* i. 4).*

Here was found the opportunity for those 'words spoken in quiet' that were 'like nails fastened by the masters of assemblies' (Ec 12^{11}).

As to methods, we have still less information. To judge from the practice of a later age, the pupils would learn by frequent repetition the proverbs of the wise (cf. Cheyne, *loc. cit.*). The alphabet was already used in ways calculated to assist the memory, as in the 119th Psalm. To this period may be assigned the invention of the mnemonic device known as *Athbash* (אתבש׳), of which the present text of Jer 25^{26} 51^{1} affords the classical examples (see Giesebrecht's *Comm. in loc.*), as also the introduction of the 'numerical' proverbs, so much in vogue in later times (cf. Pr 30^{11-31} with *Aboth*, v.).

Finally, we may assume that, at least from the beginning of the Greek period, a fairly high standard of general culture prevailed. It was now that the editor, if not the author, of Ecclesiastes could write: 'Of making many books there is no end; and much study is a weariness of the flesh' (Ec 12^{12}). At the beginning of the Maccabæan revolt, also, the possession of copies of the 'book of the covenant' was certainly not the exclusive privilege of priest and scribe (1 Mac 1^{57}).

III. FROM SIMON BEN-SHETACH (*c.* B.C. 75) TO THE END OF THE JEWISH STATE (A.D. 70).—Just as the synagogue was the novel feature of the preceding period from the educational point of view, so is the elementary school the feature of this third period. Such, at least, is the tradition preserved in the so-called Talmud of Jerusalem. In a passage commemorating the merits of the famous scribe and leader of the Pharisees, Simon ben-Shetach (or Shātach),* brother of queen Alexandra, we read that three additions were made by him to the statute-book, so to say, the second of which runs thus—

שיהיו התינוקות הולכין לבית הספר 'that the children shall attend the elementary school' (Talm. Jer. *Kethuboth*, viii. 11, p. 32*b*; see the whole passage in Derenbourg, *op. cit.* p. 108). The words quoted, it will be seen, are not altogether free from ambiguity. They may also be interpreted to mean that attendance on schools *already existing* was henceforth to be compulsory. In view of what was said above regarding the spread of Greek ideas in pre-Maccabæan days, it is difficult to believe that schools preparatory to the more advanced instruction in the scribal college (see below) were not to be found—at least in Jerusalem. One can hardly escape the conviction that the erection of the Greek gymnasium at Jerusalem (1 Mac 1^{14}, cf. 2 Mac $4^{9ff.}$) was not the first step, but the last, in the assimilation of Jewish and Greek education. Be this as it may, there is no good reason for rejecting the tradition regarding Simon ben-Shetach's efforts on behalf of popular education. All that we know regarding the predominant influence of the scribes in the reign of Alexandra (B.C. 78–69) prepares us for more aggressive measures for the extension of their principles among the people. According to unanimous tradition, the elementary school (בֵּית הַסֵּפֶר 'house of the book,' see below) was always in intimate connexion with the synagogue. Either the synagogue proper—in this period to be found in every considerable village in the land—was used for this purpose (Löw, *Die Lebensalter in jüd. Literatur*, p. 287, where the reff. are to *Berachoth*, 17*a*, *Taanith*, 23*b*, *Kiddushin*, 30*a*), or a room in the same building. The school might also be held in the teacher's house (Hamburger).

By all writers on Jewish education it is stated

---

* The אַשְׁכּוֹלוֹת which, according to *Sota*, ix. 9, ceased since José's time, cannot, as some have thought, mean schools (*σχολή*—in late Heb. אַסְכּוֹלִי); see Derenbourg, *Hist. de la Palestine*, p. 456 ff

* See Schürer, *HJP*, index; Derenbourg, *Essai sur l'histoire de la Palestine*, pp. 96–111, and the Jewish historians Grätz, Herzfeld, etc.

Life in the Days of Christ (esp. chs. vii. viii.), and *Life and Times of Jesus the Messiah*; L. Löw, *Die Lebensalter in d. jüd. Literatur*, 1875, *passim* (esp. p. 130 ff.: 'Education in Bible Times,' and relative notes); S. Schechter, *Studies in Judaism*, 1896 (p. 343 ff.: 'The Child in Jewish Literature'). The standard authorities for Jewish education in the Middle Ages (which may be added for completeness' sake) are the works of M. Güdemann, *Geschichte d. Erziehungswesen u. d. Kultur d. Juden*, etc., France and Germany, 1880; Italy, 1884; Spain, 1888. See also I. Abrahams, *Jewish Life in the Middle Ages*, 1896 (esp. chs. xix. xx.). A. R. S. KENNEDY.

EFFECT.—In 2 Es 9^{6} 'effect' is used in the obsolete sense of 'deed,' 'the times also of the Highest have . . . endings in effects and signs' (consummatio in actu et in signis); cf. Shaks. *Lear*, II. iv. 182—

> 'Thou better know'st
> The offices of nature, bond of childhood,
> Effects of courtesy, dues of gratitude.'

In Ezk 12^{23} the sense is *purport, significance*. 'The days are at hand, and the effect of every vision' (דָּבָר 'word,' as RVm). So Chaucer, *Merch. Tale*, 153—

> 'And for his freendes on a day he sente,
> To tellen hem th' effect of his entente.'

With those exceptions, the use of 'effect' is much as in mod. English, though the phrase in Ro 9^{6} may be noticed, 'as though the word of God hath taken none effect' (ἐκπέπτωκεν, lit. 'has fallen out,' RV 'hath come to nought'). The usual phrase is 'to make of none effect,' always a single vb. in the original, of which the most interesting is καταργέω (Ro 4^{14}, Gal 3^{17}; tr^{d} 'make without effect' Ro 3^{3}), a characteristically Pauline word. Its opposite is ἐνεργέω, a word always in NT of some principle or power at work, esp. in the soul (see Mayor on Ja 5^{16}). Wherever 'effectual' and 'effectually' occur in NT they translate either ἐνεργεῖν, as Gal 2^{8}, 1 Th 2^{13} 'work effectually'; 2 Co 1^{6} 'be effectual'; Ja 5^{16} 'the *effectual fervent* prayer of a righteous man availeth much' (RV 'the supplication of a righteous man availeth much *in its working*,' Rendel Harris, 'the *energized* prayer of a righteous man is of great force'*); its adj. ἐνεργής, as 1 Co 16^{9}, Philem ^{6}; or its subst. ἐνέργεια, whence Eng. 'energy,' as Eph 3^{7} 4^{16} 'effectual working,' RV 'working.' In all these places we should now use 'effective,' 'effectively.'
J. HASTINGS.

EGGS.—See FOWL.

EGLAH (עֶגְלָה 'a heifer').—One of the wives of David, and mother of Ithream (2 S 3^{5}). Both here and in 1 Ch 3^{3} she is distinguished by the title 'David's wife.' Jewish tradition (cf. Jer. *Quest. Heb. in libros Regum*) identified E. with Michal, since the latter was his first and best-loved wife. More probably the name of E.'s first husband is concealed in the word 'David.' J. F. STENNING.

EGLAIM (אֶגְלַיִם), Is 15^{8}.—Noticed with Moab. The name has not been recovered. In the *Onomasticon* (*s.v.* Agallim) it is placed 8 Roman miles south of Areopolis. C. R. CONDER.

EGLATH-SHELISHIYAH (עֶגְלַת שְׁלִשִׁיָּה) occurs in an ancient oracle against Moab, which is quoted in Is 15^{5} and Jer 48^{34}. In both these passages RV takes the word to be a proper name, giving in margin the alternative tr^{n} '[as] an heifer of three years old,' which is AV in Jer 48^{34} and AVm in Is 15^{5}. In the latter passage, AV text omits '[as].' It is still somewhat uncertain whether the word is an appellative or a proper name, although the latter view has commended itself to the majority of modern scholars (Ewald, Reuss, Graf, Rothstein in Kautzsch's *A.T.* etc.). Delitzsch (*Isaiah, ad loc.*) defends the rendering of AV and Luther, laying stress upon the fact that both in Is and Jer 'עֶגְ' שְׁלִ' occurs asyndetically. He points out that it might be an appellative of Moab (cf. Jer 46^{20} 50^{11}, Hos 4^{16} 10^{11}, in all of which 'heifer' is similarly used), but thinks it more probable that the reference is to Zoar (Is) or Horonaim (Jer) as beautiful, strong, and hitherto unsubdued cities. In Is 15^{5} after Σήγωρ (Zoar) LXX has δάμαλις γάρ ἐστιν τριετής, referring to Moab. In Jer 48 [Gr. 31]^{34} the MSS show a perplexing variety of readings (see Swete). B has, after Horonaim, καὶ ἀγγελίαν Σαλασειά. Aq. and Symm., however, had δάμαλις τριετής (see Field).

J. A. SELBIE.

EGLON (עֶגְלוֹן).—A king of Moab who, upon the relapse of the children of Israel into idolatry after the death of Othniel, was the divine instrument for punishing them. He is represented as forming a confederation with Amalek and Ammon,* and in conjunction with them taking possession of Jericho ('the city of palm trees,' Jg 3^{13}).† For eighteen years he ruled over them, till a deliverer arose in the person of Ehud, of the clan of Gera, of the tribe of Benjamin. With the excuse of taking Eglon his tribute (or, perhaps, a present), Ehud with a retinue of servants went to the king's court. The king, we are told, in order that we may understand what is coming, was a very fat man. The present was offered, and the whole party started on their way home again. When they reached the graven images (LXX, Vulg. AVm, RVm), or perhaps graven stones (by some connected with the twelve stones of Jos 4^{20}), or the quarries (AV, RV, following Targ. Syr.),‡ Ehud went back to the king by himself, and, by giving him to believe that he had a secret to communicate to him, obtained an interview with him by himself alone. He was sitting in his cool upper-chamber. Now that he has the king by himself, Ehud claims that his message for the king is from God, upon which Eglon rises out of respect to the source of the message. Ehud then draws his two-edged dagger, taking advantage of his left-handedness, which would enable him to do so without much notice being taken of his act, and stabs E. with such force that the dagger, haft and all, goes into him, while the fat closes upon the blade.§ It is some little time before the murder of E. is discovered, and meanwhile Ehud has escaped and summoned his countrymen to the destruction of the Moabites on the W. of Jordan with such success, that 'the land had rest fourscore years.'

Jos. (*Ant.* V. iv.) makes several additions to, and variations in, the story told in the Book of Judges; that E. built a palace at Jericho; that Ehud also dwelt there, and became familiar with E. by means of his presents, and was beloved by E.'s courtiers. Ehud gathers the Israelites together to destroy Moab almost before his murder of E. is known.

LITERATURE.—For the latest description of the history of Eglon, see Moore, *Judges*, 89 ff. H. A. REDPATH.

EGLON (עֶגְלוֹן).—An ancient town in the Shephelah, close to Lachish. Its king, Debir, joined in the alliance formed by the king of Jerus. against the Isr. under Joshua, and after the battle of Aijalon it was captured and destroyed (Jos 10$^{1-37}$ 12^{12}). It is not again named in Scripture, so that it was prob. utterly destroyed. In LXX, cf. Jos 10, Adullam takes its place by some (prob.) early mistake, they are in consequence identified in the *Onomasticon.* The name remains in ʿAjlân, some 15 miles N.E. from Gaza and 2 miles N. of Tell Hesy, now conclusively identified with the ancient Lachish. But Flinders Petrie (*PEFSt*, 1890, pp. 161–163) points out *Tell Nejîleh* as probably the true site. *Khŭrbet ʿAjlân* his practised eye pronounced unlikely to be the site of an ancient town. On the other hand, 'it is certain,' he says, 'that Tell Hesy and subordinately *Tell Nejîleh* must have been positions of first-rate importance from the time of the earliest settlements; they would then agree to the character of Lachish and Eglon. The history of *Tell Hesy* begins about B.C. 1500, and ends about B.C. 500; while Tell Nejîleh, as far as can be seen on the surface, is of the same age, or ruined even earlier.' 'There are no sites in the country around so suited to the importance of Lachish and Eglon as these two Tells.' To this may be added, that the course of Joshua (ch. 10) brought him first to Lachish—Eglon lying between Lachish and Hebron; and the position of Tell Nejîleh suits this account better than that of ʿAjlân. See LACHISH.

---

* Having given 'earnest' as one meaning of 'effectual' when used of prayers, the *Oxf. Eng. Dict.* (*s.v.*) adds: 'Cf. Anglo-Lat. *effectuose supplicantes* "earnestly entreating," A.D. 1229 in Rymer, I. 308. Perhaps this use was originally due to confusion with *affectual*; but the translators of AV ingeniously availed themselves of it in Ja 5^{16} to render Gr. ἐνεργουμένη.' It is to be observed, however, that AV uses two words, 'effectual fervent,' for this one Gr. word. Tindale's tr. is 'if it be fervent.'

* This is held to be an exaggeration of D by those who distinguish various hands in this book; see, however, Ps 83$^{6.7}$, which seems to refer to the period of the Judges.

† The fortifications, at any rate, of Jericho must have been in ruins (cf. Jos 6^{26} with 1 K 16^{34}), but we are never told that the ruins left from the burning of Jericho were pulled down.

‡ The notion that they were boundary stones or images scarcely deserves mention.

§ For the meaning of the last clause of verse ^{22} see Moore, pp. 97, 98.

EGYPT.—

i. Name.
ii. Physical character.
iii. Fauna.
iv. Flora.
v. Ethnology.
vi. Language.
vii. Chronology.
viii. History.
ix. Relations with Asia.
x. Religion.

i. NAME.—The name by which the Egyptians at all times designated their country was Kîmet (Copt. ⲕⲏⲙⲉ, ϫⲏⲙⲓ), a word of which the probable etymology—root *km* 'black'—would confirm the statements of Herodotus and Plutarch, who connect it with the dark colour of the soil. The contrasting redness of the neighbouring desert sand gave to that the name of 'the Red Land.' It is phonetically impossible to connect Kîmet with the name Ham (חָם). To the Semites the country was known as Mizraim (מִצְרַיִם, seldom מָצוֹר, *Μεστραίμ*, *Μεσαραίμ*), the termination here being no doubt locative and not a dual. The older cuneiform texts vocalize Muṣr, the later Miṣr; the Amarna letters have generally Miṣrî, *pl.** For this word a favourite though undemonstrable derivation is that from מָצוֹר 'fort.' The Greek name Αἴγυπτος (Arab. *Ḳibt*, Eth. *Gebṣ*, and European *Copt*) is of equally obscure origin. It cannot be satisfactorily derived from any Egyptian or Semitic word or combination of words. In the earliest Greek writers (*Odyssey* generally) it is the name of the river, for which Νεῖλος (cf. נַחַל, נְהָר ?) is first found in Hesiod. In the later epochs and in poetical texts we meet with many other names for Egypt. Of such *t' mri* is among the most frequent, and seems connected specially with Lower Egypt and the inundation. 'The Land of the Sycamore,' 'of the Olive,' 'of the Sacred Eye,' are names which require for their explanation a greater knowledge of the geographical myths than we possess.

ii. PHYSICAL CHARACTER.—The geological constitution of Egypt is simple; its elements are three—the bed of rock (limestone for the most part, with sandstone and granite in the S.), which stretches across the N.E. corner of Africa; then the sand which lies upon this, and extends from the Arabian desert hills on the E. to the Libyan range on the W.; lastly, the black Nile mud, resting upon the sand in the centre of the valley, and forming the highroad for the great stream on which the prosperity of the country depends. The number and dimensions of the buildings erected at all periods gave a high importance to the geological elements of the country. The limestone obtained near Memphis (Turrah) furnished the material for the principal works of the early periods. The great temples higher up the valley, especially those of Thebes, are built of sandstone, conveniently obtainable at Silsileh. Red granite for statues, sarcophagi, etc., was worked at the first Cataract (Aswân); black granite and diorite for similar purposes came from the eastern desert (Hammâmât). Alabaster, a favourite material, usually for smaller objects, was quarried opposite Dahshûr, or (a better quality) at *Ḥtnb*, near Beni-Hasan, whence it was extracted under the earliest Dynasties. In metals the Nile valley itself is poor; those most valued come from abroad,—gold in plenty from Nubia or the eastern desert; silver, which was rarer, probably from Cilicia; copper from Sinai, later also from Cyprus; malachite and lapis lazuli from Sinai and Mesopotamia. Bronze, familiar during all later epochs, was made with tin, the provenance of which is uncertain, but which was already used under the 6th Dynasty. Nor can we tell whence iron, well known at any rate from about 800 B.C., was obtained, though a limited amount could be got from the western desert.

The course of the Nile through Nubia is hindered by a succession of rocky barriers, the last or northernmost of which—the first Cataract—has often been the political as it is the natural frontier of Egypt. Between the Cataracts and the Delta the country is of a very uniform character. The valley is extensive or narrow as the two hill-ranges recede from or approach the stream. Its breadth varies from about nine to four miles. As the river progresses northward, the hills gradually fall back and the valley expands into the plain of the Delta, across which the river makes its way by various channels to the Mediterranean. Although the surface-denudation recognizable at certain points of the river's course and the petrified forests still extant testify to very different climatic conditions at a remote geological period, it is unlikely that during the five or six thousand years of historic Egypt there has been much change in the aspect of the country. By the opening of that period the valley had been dried, the river-bed raised, and the stream's course fixed practically to its actual extent, though the number of its mouths was greater than it is to-day.

History is concerned during the earlier periods almost exclusively with the upper valley; the Delta was evidently still but partially reclaimed, though certain towns there are already met with in the myths and in the earliest history. Physical contrasts are coincident with that division into Upper and Lower Egypt which we find an established fact of the remotest historic times; already the two kingdoms—for such undoubtedly they once had been—are united, each, however, retaining its own tutelary deity, and its independent capital, *Nḫb* (El-Kab) and Buto.

Beyond this twofold partition, Egypt appears from the earliest times subdivided into a number (about 22 in south and north respectively) of smaller districts (nomes, from *νομός*), which become later the basis of an administrative system, but which originated probably in the vaguely defined settlements of different tribes. The lists of the nomes are our chief source of topographical knowledge; but no full lists are preserved from early periods, although several most ancient documents (tomb of *Mtn*, Pyramid texts) mention a few of the nomes. In the later lists each nome is personified by its guardian deity, fetish, or emblem, which serves as a kind of coat-of-arms. A nome was held to be composed of four elements: (1) the metropolis, the seat of the tribal religion and residence of the chief; (2) the cultivated land; (3) the canals by which the fields were fed with river-water; (4) the marshes which, rarely cultivable, served as a hunting-ground for the local nobles. The hieroglyphic , which expressed one of the words for 'nome,' is a testimony to some primitive irrigation system, representing as it does a canal-divided field, and the founder of the 1st Dynasty is credited with the construction of the great dyke which still protects the province of Gizeh from a too extensive inundation, while his successors had all to occupy themselves with the regulation of the water, the cutting of canals, and the satisfaction of local claims upon the benefits of proximity to the river itself. Variations in the annual height of the inundation were no doubt carefully observed in the remotest ages; we know that they were recorded in the Cataract district by the kings of the 12th Dynasty, and at Karnak in later times.

---

* According to W. Max Müller (*Z. Ass.* viii. 209), Muṣru, whence Shalmaneser II. received presents, was Egypt, not a N. Syrian or Armenian district (Winckler, Hommel, etc.). Winckler has suggested (*Alt. For.* 24 ff.) that another Muṣri, which he locates in Edom or Sinai, may have been the real origin of the Exodus tradition, reminiscences of wanderings in that district having got confused with the name of Egypt. In S. Arabian inscriptions this Muṣri and Egypt are distinguished as מצרן and מצר (Hommel in *Festschrift f. Ebers*, 27).

The Nile is not only the great fertilizer; it is also, now as formerly, the main highway. We hear relatively little of journeys by road; locomotion was normally by water, either upon the river or upon the subsidiary canals. The commonest words for journeying implied the idea of sailing up or down stream. The dead were drawn to their rock-cut tombs on boat-formed cars; the solar gods were thought to traverse the sky in a divine bark. Such roads as we do hear of are chiefly those leading from the Nile across the desert—eastwards (from Coptos) to the Red Sea, westwards to the Natron Lakes, or southwards into the Soudan.

iii. FAUNA.—The bones of sacrificial animals from various periods, and countless animal mummies from the base epochs, might, if carefully preserved and located, teach much as to the ultimate homes of several species, while an extensive knowledge of both the domesticated and wild animals might be had from the frescoes of the tombs—especially those of the Middle Kingdom. Each animal is there accompanied by its name, though it is often difficult to find for these their modern equivalents. For the earliest times the hieroglyphic signs themselves would supply a considerable list, giving evidence that the species then known have since changed little. The lion is frequently depicted, though probably seldom met with until the desert had been reached. The lion hunts recorded in the New Kingdom refer mainly to Syria or Nubia, though Thutmosis IV. hunted lions in the neighbourhood of Memphis. Leopards (or panthers?) seem to have been seen in the south; elephants and giraffes were not unknown to those who traded on the Upper Nile; jackals, then as now, were very familiar; desert wolves and hyænas somewhat less so; many kinds of antelopes were well known. The hippopotamus, once commonly met in the river and hunted in the swamps, has by now been driven far up the Nile. Of oxen various breeds were kept; the familiar long-horned species existed until the plague in the middle of the present century. Oxen are often represented ploughing or threshing. Certain varieties, or rather individual members of certain varieties, distinguished by peculiar, carefully sought markings, were held sacred from the earliest times—Apis at Memphis, Mnevis at Heliopolis, Bacis at Hermonthis. Sheep were no doubt kept, but occur rarely on the monuments. Varieties of the long- and the spiral-horned ram were sacred. The ass was the usual beast of burden, and was not rivalled by the camel till a very late date. It will be remembered that in Gn 12^{16} (Abraham and Pharaoh) and Ex 9^3 (Moses) camels are nevertheless mentioned—both by J—as if known in Egypt. The horse is likewise unknown in the older epochs; as it appears first after the Hyksos period, it is assumed to have been introduced by those invaders. The reference to Egyptian horse-breeding in 1 K 10^{28} should more probably be applied to some Asiatic country (Winckler, *Altt. Unt.* 173 A). The Egyptian name for the horse meant properly 'a pair,' and was due probably to its first employment in the war-chariot. Foreign names, among them Semit. סוס, once borrowed, became even more usual. The horse appears to have been seldom ridden. Several breeds of dogs were known; some were valued for the chase. The names of some breeds are preserved, and show that certain Libyan (or Nubian?) varieties were popular. The cat, sacred to the goddess *B'stt*, was larger in ancient than in modern Egypt. It figures in a very ancient solar myth (*Book of the Dead*, ch. 17). The pig, except for its mention in the sacred books, is not met with until late times. Of birds a great number are depicted—geese, ducks, herons of many sorts; migratory birds, *e.g.* swallows, plovers, quails. Eagle, vulture, hawk, and owl are among the most constantly recurring hieroglyphics, while the vulture, hawk, and ibis were sacred to prominent divinities, and were embalmed in numbers (in the base epochs) in the localities of which those divinities were the patrons. It is remarkable that, though hen-breeding is universal in Egypt to-day, that bird was apparently unknown to the ancients. Of the larger reptiles the most important was the crocodile, now no longer to be met with below the Cataracts. There is a variety of snakes, the best known being the *uræus*, emblem of the patron-goddess of Lower Egypt and hence of the king, and the horned viper. From the importance and frequency in the earliest religious literature of charms against large snakes, it may be inferred that their numbers and dimensions were once greater than they are at present.

The texts show us several insects, notably the *scarabæus*-beetle, regarded, especially in later times, as a symbol of eternity and of the sun-god, and the bee, associated in writing from the remotest times with royalty in Lower Egypt.

Fish are often represented. The most peculiar is the *oxyrrhynchus*, the badge of the 19th nome of Upper Egypt. Fish were much eaten; some of the oldest frescoes depict them speared in the marshes, landed in drag-nets, and then split for drying; while texts equally ancient tell of the construction of fish-ponds.

iv. FLORA.—Egypt is remarkably poor in variety of vegetation. Many of the cultivated plants most common now—cotton, sugar, rice—are modern importations.

In prehistoric ages the valley was no doubt considerably wooded; but to-day, with the exception of the various palm species, trees occur only singly or in small groups. The representations of the flora—of trees especially—in the frescoes, carvings, or hieroglyphics are generally too far conventionalized to be instructive. More can be learned from extant remains of edible grains or funerary floral wreaths (from the New Kingdom onwards), or of woodwork (from all periods). From these it is clear that the native vegetation has altered very little during the course of history. The Egyptians were at all times ill off for workable woods, and were compelled—where the stalks of river plants would not serve—to make the best of their own sycomore or acacia (the latter especially in the older epochs), or to import yew from Cilicia (?) and ebony from Nubia. More than one Pharaoh of the New Kingdom brought specimens of trees and vegetables from Syria or the Red Sea coasts, either as curiosities or with a view to their propagation. From the nature of the soil, agriculture must always have been the main occupation of the population, and we learn from the monuments the names of several cereals, of which wheat and barley were the commonest, dhurah being well known since the New Kingdom. Gardens were laid out, and much interest was shown in them since the 4th Dynasty. Many vegetables are represented in the frescoes and as hieroglyphic signs, especially the bulbous sorts—onions, leeks, etc. (cf. Nu xi. 5). The vine was always largely cultivated, and from the Delta came several famous wines of Greek and Roman times. The fig, too, is early represented. Many plants were valued medicinally, as can be shown from the numbers occurring in the medical works, notably in the Papyrus Ebers; others were used for dyeing. The most important of all plants to the Egyptians was the **papyrus**, which, unknown now in the Delta, grew there once in vast thickets where the nobles hunted, and whence was obtained the material, not only for writing, but also for numerous other purposes, decorative and useful. As the papyrus became one of the pictorial emblems of Lower Egypt, so the lotus was often that of the southern country, although a sort of water-reed seems also to have been so employed.

v. ETHNOLOGY.—The problem of the origin and relationships of the Egyptian race is still unsolved. Its solution is to be sought in the evidence of (1) philology; (2) mythology; (3) physical anthropology; and (4) material culture. Investigations in these various fields have hitherto given results partially discordant. (1) The most ancient linguistic documents point to an undeniable though already very remote relationship with the Semitic languages (see below). (2) The divinities and myths familiar to the earliest texts were, until recently, accepted as growths of the Egyptian soil, the inclination being to recognize in extraneous elements, if any, the influence of neighbouring African races. Hommel indeed invites us to take other considerations into account by pointing out certain coincidences between the ancient religions of Egypt and Babylonia. (3) Racial types, as depicted on the monuments, and the measurements, etc., of mummies, have led to no uniform results. Formerly, anthropologists saw in the sculptures and paintings one race, identical with the Copts of to-day; now they generally discern various types among the most ancient portraits, and seek on such evidence to distinguish at least two races. Few mummies remain from the oldest epochs—one of the most ancient is that from Medûm, at present in the Royal College of Surgeons, London,—and those from later times point apparently to a short-skulled, while the modern Egyptian is of a long-skulled type. Probably the oldest group of remains (from Abydos, 1895–96) seems to point to a long-skulled, orthognathous, smooth-haired race; but the type there is not homogeneous, neither is that of the Medûm mummies, and their relationship to the race of historic Egypt is not yet clear. (4) There is certainly evidence of African elements, whether due to primitive kinship or to mere proximity, in some branches of the material civilization, such as dress, weapons, possibly circumcision. On the other hand, Hommel seeks to show that a very early form of religious or sepulchral architecture (pyramid) is derived from Babylonia. It must be owned that the oldest remains of Mesopotamian civilization appear to exceed in antiquity any hitherto brought to light in Egypt.

Most are agreed that, whatever be the case with their forerunners, the Egyptians from the 3rd or 4th Dynasty onwards were not a negroid race; that they came, on the contrary, from Asia. But the questions of their previous home there and the route by which they reached the Nile,—whether by Bab el-Mandeb and Abyssinia or the Wady Hammâmât and Coptos, or by the Syrian desert and the Isthmus,—are as yet unanswered. The route S. Arabia-Hammâmât-Coptos has for it the evidence (*a*) of prehistoric remains at Coptos, pointing to a people coming direct from the Red Sea; (*b*) of certain facts—physical resemblance, peaceful relations, and the apparently reverential attitude of the Egyptians—which have been held to point to *Pwnt*, *i.e.* the country about the southern end of the Red Sea, as a former home of the race. To this may be added the tradition that the founders of the monarchy came from Thinis, a town not far distant from Coptos—a tradition which has been confirmed by the recent discovery of the First Dynasty tombs in the same neighbourhood (Abydos). No reminiscence has been discerned in the literature of a prehistoric immigration. The people apparently considered themselves aborigenes, and called themselves merely *Rôme*(*t*), 'men' *par excellence*. Traces of a stone age, undeniable though complicated by the long historic survival of flint-working, show that the country has been inhabited since the Pliocene period. Palæolithic remains are rare, but some half-dozen stations are said to have been recognized. Considerable evidence has been adduced (though contested) to demonstrate a New Stone age. That a Hebrew writer of the 6th or 7th cent. speaks (Gn 10^{6}) of Mizraim as related to Cush (Ethiopia), Put (S. Arabia, *Pwnt*), and Canaan, is not a fact of much ethnological importance. By the earlier annalist (*ib.*$^{13f.}$) eight names—mostly unidentifiable—are given which may preserve a then current Hebrew view of Egypt's ethnological relationships.

vi. LANGUAGE.—The relative position of the Egyptian language among its neighbours is a question closely associated with that as to the racial connexions of the people. Our means of comparison with the surrounding idioms are not of equal value. For the Semitic languages—for the Mesopotamian dialects at least—we have documents perhaps as ancient as any from Egypt. For the Berber and Cushite languages of Africa we can but infer from quite modern evidence the linguistic conditions of earlier ages; and in this important field, therefore, little has as yet been attempted.

The Egyptian language, together with certain languages of Barbary, Nubia, and Abyssinia, used to be regarded as forming one of the distinct main divisions of human speech; now it is clear that this isolating classification cannot be justified. The group is not independent. Since Benfey's attempt to demonstrate the affinity of the Egyptian and Semitic languages, his main contention has received increasing confirmation, until it is no longer possible to deny an originally very close relationship—collateral rather than filial—between the proto-Hamitic and proto-Semitic groups. The affinity is specially prominent in grammatical features common to both. Of these the principal are—(1) the same gender-endings, masc. *w*, fem. *t*; (2) an all but identical series of pronominal suffixes; (3) the use in both of a peculiar adjectival termination, 'nisbeh'; (4) identity in four or five of the numerals; (5) analogous treatment of the weak verb and derivatives; (6) the identity of an old form of Egyp. verbal flection and the Sem. perfect; (7) verbal nouns with prefixed *m*; (8) the importance of a single accent-vowel in each word or syntactical group, and the resultant 'construct' state of the remaining vowels. There is, moreover, to be noted the correspondence between the Sem. and Egyp. consonants, extending to some fifteen undoubted equations (which embrace the important series א, ו, ', ע); also two or three more which are almost certain.* Further, the same lack of any written representatives of the vowels. In the vocabulary the case for Sem. affinity is less strong. The number of Egyp. roots for which correspondents can reasonably be claimed in any Sem. dialect is small; the large Sem. element in the language of the New Kingdom owes its presence, not to any primitive relationship, but merely to the political circumstances of the time. The bulk of Egyp. roots is of a decidedly non-Sem. type. One of the most distinctive features of the Sem. languages—the preponderance of triliteral roots—is, at any rate, not paralleled, even in the oldest Egyptian documents, though it has been suggested that the divergence here is due to early phonetic degeneration. Hommel offers another explanation of the facts. By the aid of certain very potent phonetic laws he institutes comparisons between a number of Egyp. and Sumerian words, the latter being, in his view, an import dating from the prehistoric (Semitic) immigration from Mesopotamia. It is a question of at least equal difficulty how large a proportion of the roots should be regarded as of African, *i.e.* negroid, origin, and so as vestiges of a still remoter, pre-Semitic period, during which the valley was peopled by an African race, part of whose linguistic stock was subsequently amalgamated with that of the invading Asiatics.

If it were possible to trace with certainty the genealogy of the hieroglyphic script, we might expect to find ourselves nearer the birthplace of the language. Hommel's theories do not ignore this problem; the hieroglyphics came, he holds, like the rest of the intellectual equipment of the Egyptians, from Mesopotamia. If this were true of the script as a whole, it would nevertheless be obvious that many of the signs had their origin in Africa; they represent natural objects, to be met with only there. Be this as it may, it is evident that the Babylonian and Egyptian systems had, for ages before we first meet with them, followed widely divergent lines of development. The former, influenced by the nature of its writing materials, had lost almost entirely the pictorial character which the latter, on the contrary, retained from the beginning to the end of historic times. A conventionalizing, abbreviating tendency was, of course, inevitable if a script so ponderous was to be put to any but occasional decorative uses. But the abbreviated forms—first the 'hieratic,' later the 'demotic' script—grew and found employment side by side with their prototypes, the hieroglyphics, which to the end were alone held suitable for sacred literature or ornamental inscriptions.

The signs in general employment during the classical period—the Middle and earlier New Kingdoms—are estimated at about 500; some from the older epochs had then fallen into disuse, many employed later had not yet appeared.

The signs are pictures of material objects—natural and artificial,—or of parts of such objects. Primarily, each sign must have had for its phonetic value merely the name of the object depicted. But since no provision was thus made for expressing abstract ideas or the grammatical needs of the language, a secondary use of the signs had been developed, and abstractions were expressed by the same signs as those material objects of which the names contained the identical consonants. For example, is the picture of a 'rib,' written by the consonants *s p r*; the verb 'reach' is also spelt *s p r*; it, too, is therefore written with the sign . Besides such signs as these, capable unassisted of expressing complete words, there are many with only the value of single syllables (*i.e.* consonant + vowel + consonant). These are, no doubt, primitive word-signs which have lost their original function, and so become available as pure phonetics for the writing of longer words. A still remoter stage of the language is recalled by the 24 signs called by us the 'alphabet,' and reduced from the representation of 24 monosyllabic words (? consonant + vowel) to that of 24 consonants, the initials of those forgotten words. To these three phonetic elements is to be added one purely ideographic and complementary. To avoid ambiguities certain signs, 'determinatives,' are added, as in Babylonian and Chinese, to phonetically written words in order to indicate the class of ideas to which such words refer. Thus, dignity or age would be followed by the figure of an old man, strength or power by that of an armed hand, literature or learning by that of a papyrus roll. The absence of written vowels leaves us ignorant of the correct pronunciation of Egyptian words; our only guides are the transcriptions in vocalized foreign languages—cuneiform or Greek,—or in Coptic, which is but the youngest stage of Egyptian, expressed in the Greek alphabet. Yet by these aids we merely approximate to the vocalization of the later epochs; for that of the Old Kingdom we have no guide. The Egyptians themselves did indeed, during the period of their intimacy with Asia (18th and following Dynasties), feel the need of some system of vowel-transcription, and they naturally took as their model the cuneiform syllabary, already in common use in Syria. The vowels which under this influence they aimed at representing were *a*, *i*, and *u*, and for their hieroglyphic representation the signs for three approximate weak consonants were selected. Similar necessities were met at later periods (the Persian, Ptolemaic, and Roman supremacies) by similar means, though during these the elements of the ancient hieroglyphic system were speedily losing their original values, and complete irregularity already reigned in the transcription of foreign consonants as well as vowels.

vii. CHRONOLOGY.—Many of the problems involved in this subject still await satisfactory solution. Astronomical calculations combined with the monumental evidence have doubtless done much already to fix the dates of later epochs; but beyond the age of the New Kingdom it seems impossible to find unanimous acceptance for more than approximate dates. Much obscurity still prevails as to the eras and methods employed by the Egyptians in their calculations.

A. The available Egyptian documents are—(1) The lists of kings inscribed in temples or private tombs. The three most important (at Abydos, Karnak, Sakkara) date from Dynasties 18 and 19, and give the names of 76, 61, and 47 kings respectively. Tombs and MSS of the same period have preserved shorter lists. In such lists the sequence of names is not always correct, nor is more than a selection (political or ritualistic?) from the full series of past kings given. They supply no data as to length of reign. (2) The lists in a dilapidated papyrus of the Ramesside period at Turin, which probably enumerated when complete all kings from the 1st to the Hyksos Dynasty. (3) Dates are found in, or can be reckoned from, the annals inscribed in the temples by certain kings, or incidentally in the tombs of private persons. This is the most reliable class of document, and the records in private tombs are the sole contemporary source for a chronology of the early Dynasties.

---

* The following are the conventional transcriptions used in this article (see *Æg. Zeitschr.* xxxiv. 61 and *ZDMG* xlvi. 727).

1. Ascertained equations: א ʾ, ב *b*, ה *h*, ו *w*, ח *ḥ*, خ *ḫ*, י *i*, כ *k*, ל *l*, ר *r*, מ *m*, נ *n*, ע ʿ, פ *p*, ק *ḳ*, ת *t*; 2. doubtful: ג ج *g*, ז *ṯ*, ט *d*, ס *s*, *ṯ*, צ ظ *ḏ*, שׁ *s* (the values of the sibilants, of course, particularly uncertain). The Egyp. *f* and a form of *ẖ* are without Semitic equivalents. Y and ï represent secondary forms of י *i*.

B. Of Greek writers, by far the most important is Manetho, a native priest, *c.* B.C. 250, whose works are known only by the excerpts preserved by Josephus, Africanus, and Eusebius, or by the medium of still later chronologists. We are ignorant of the sources upon which his Αἰγυπτιακά was based; presumably, he had at his disposal documents far fuller and more reliable than any now available, though his chronology of the remoter periods can be proved much at fault. Nor can we judge how far he manipulated his authorities to suit his own views; and it is, moreover, probable that his Jewish and Christian abbreviators had their own systems to harmonize with his statements. The misfortunes inevitable in the long transmission of such writings must also be considered in estimating their present value. The lists appended to Manetho's history divided the Egyptian kings into 31 Dynasties. The grounds for such divisions are often difficult to appreciate; they do not always coincide with the divisions in the Turin papyrus. The lists compiled by Eratosthenes, B.C. 275–194, in which pretended Greek interpretations of the royal names are given, contain in reality many words which are but inaccurate transcriptions of titles, formulæ, etc., which accompanied the names.

Many scholars have occupied themselves with these Greek chronologists. Böckh sought to demonstrate an astronomical era as the basis of Manetho's calculations. Lepsius appealed to the 'Sothis' book, — a Christian forgery, — which ascribed 3555 years as total duration to the Egyptian monarchy; while, according to Unger, Manetho's system gave 5613 as the date of its foundation. Brugsch has attempted reckoning from the basis of average length of generations and reigns, and thus arrives at 4400 for the same event. Ed. Meyer lays stress chiefly on data as to length of reigns actually recorded on the monuments, and has thus constructed a series of 'minimum dates,' *i.e.* dates *below* which, at any rate, the various periods could not be brought down; but C. Torr has since re-examined the monuments with the result of a possible further reduction of Meyer's figures.

The most important assistance towards the establishment of indisputable dates is derived from astronomical calculations, based on the following ascertained facts as to the Egyptian calendar. The Egyptians did not use a leap year. Consequently in every four years a day was lost, and in 1460 years these losses had resulted in a complete shift of all the nominal months throughout the seasonal year. An absolute method of reckoning could, however, be obtained by observing the variation in the sun's position. This variation was gauged by the first visible (heliacal) rising of Sothis (Sirius), an event which coincided with the beginning of the Inundation. When the 'natural' years, reckoned from this point, amount to 1460, that total is therefore called a Sothis period. The natural or Sothic year was probably of importance to the Egyptians only for agricultural and ritualistic calculations; but to us it is of great value. For the known fact that a Sothis period began in A.D. 139 enables us to fix its previous occurrences in B.C. 1322, 2784, 4242, etc. With these points for a basis, and taking into consideration the recorded Sothis risings under kings *Mrnpth* (Merenptah) and Amenophis I., Ed. Mahler fixes the reign of Thutmosis III. at 1503–1449. He has, indeed, also calculated exact dates for the remainder of the 18th and 19th Dynasties; but results drawn from documents still often disputable cannot be relied on. To such astronomical dates Flinders Petrie has contributed 3410 as the probable commencement of the 6th Dynasty. The following are selected dates, from those provisionally adopted by Petrie,* Ed. Meyer, Mahler, and Steindorff (in 'Baedeker,' 1897):—

Dynasty.	Petrie. B.C.	Meyer. B.C.	
I.	4777	3180	
IV.	3998	2830	
VI.	3410	2530	
XI.	2985		
XII.	2778	2130	
XIII.	2565	1930	Mahler.
XVIII.	1587	1530	1575
XIX.	1327	1320	
XX.			1240
XXI.	1089	1060	
XXII.		930	
XXV.		728	
XXVI.		663	
XXVII.		525	Steindorff.
XXX.			382
Macedonians.			332
Romans.			30

viii. HISTORY.—Modern historians conveniently partition Manetho's series of 31 Dynasties into the following groups: (*a*) *the Old Kingdom*, Dyns. i.–vi.; (*b*) *the Middle Kingdom*, Dyns. xi.–xiii.; (*c*) *the New Kingdom*, Dyns. xviii.–xx.; (*d*) *the Foreign Dominion*, Dyns. xxii.–xxv.; (*e*) *the Restoration*, Dyn. xxvi.; (*f*) *the Persian Supremacy*, Dyn. xxxi. Between these lie obscure, disturbed periods, not assignable to any of the more distinctly defined groups.

(*a*) *The Old Kingdom.*—Although nothing is known of the history of the earliest Pharaohs, the tombs of the 1st and 2nd Dynasties have lately been discovered at Abydos (Om el-Ja'ab), the legendary cradle, it will be remembered, of the monarchy. Unfamiliar royal names of the same remote age have come to light somewhat farther south (Negadeh);† while the so-called 'New Race' cemetery—the remains of a very rude stage of culture—in the latter locality, is regarded as dating from at least as distant a period. In Greek times legends could still be collected, attributing to some of these early kings notable achievements, such as the first damming of the river, the establishment of a certain divine cult, or the regulation of succession to the throne; to others, some memorable experience—a devastating plague, or an earthquake.

It is to be remembered that, while the first historic Dynasty and that of demigods which preceded it are said to be native to Upper Egypt, the legends of the still remoter Dynasty of gods are localized in the North; the great gods were at home first in Heliopolis and the Delta. This may point, it is said, to a racial contrast which, however strong at first, was early obliterated. One of the prehistoric races had occupied districts about the river's mouth; another—that, perhaps, to which the rude monuments at Coptos are due—had arrived in the upper valley, and one of its chiefs, attaining, we may suppose, at Abydos, or more properly Thinis, to a position of supremacy, had been able to extend thence his power down the river, settling near the later Memphis, subduing or absorbing the Delta tribes, and finally identifying himself with the religion of the district which became thenceforth the state religion of the nation. Relics of a possibly pre-dynastic monarchy can be traced in archaic survivals in the titles, functions, dress, etc., of the later kings; but of the people ruled by these primitive Pharaohs, or of the limits of their domains, little can as yet be said. Interments, flints, pottery, regarded by some as prehistoric, are by others assigned to far later ages.

---

* So far as yet published; see *History*, vols. i. ii.; Meyer's are the minimum dates referred to above.

† See *Æg. Zeitschr.* xxxv. 1 ff.

History properly so called opens with Dyn. 3. Yet here still we have knowledge of only one or two out of half a dozen kings. Some fragments on which the name of *Nbk'* (Nebka) occurs are held to belong to his time; *Ḏsr* (Zezer), his successor, in all probability built (possibly usurped) the step-pyramid of Sakkara. He was a monarch of some power, for he extended his activity to the mines of Sinai, where his name is found, and his cult was revived at quite a late epoch. The Dynasty closes (or the next begins) with a better known king, *Snfrw*-Soris, whose name survives on numerous monuments, the most important being his pyramid-tomb at Medûm. He, too, exploited the Sinaitic copper, not, however, as his inscriptions there show, until he had crushed the hostile nomads of the neighbourhood. The tombs of several of his nobles are extant in the cemeteries of Abusir, Dahshur, and Medûm. The 4th Dynasty has left a memorial more indelible than that of any that followed it; for the successors of Soris built as their tombs the three great pyramids of Gizeh. Their relationships to Soris and to one another are uncertain. Some close blood connexion can be argued from genealogies in contemporary tombs and from later tradition. *Ḫwfw*-Cheops, *Ḫfr‘*-Chephren, and *Mnk’wr‘*-Mykerinus appear to have spent their energies chiefly on the construction of their pyramids. With this object they brought granite from Aswân and alabaster from quarries near Tel el-Amarna. Cheops, however, continued the work in Sinai, and built in the Delta (Tideh and Bubastis). Indeed we learn from the inscriptions of *Mṭn* (Methen), a magnate of the time, that the Delta was already, at any rate in part, reclaimed and worked for the crown by great functionaries. Of the remaining three or four kings of the Dynasty, one at least is known to have built a pyramid. The great Sphinx is usually attributed to this period, though it possibly belongs to a considerably later age. The relative scarcity of remains of the 4th Dynasty probably points to the small development of the custom of building monumental tombs.

Tradition regarded the 5th Dynasty as a new family, possibly as one of usurpers. One legend—probably not without interested motives—ascribes to it an origin half-priestly, half-divine, and places its home in the neighbourhood of Heliopolis; elsewhere it is called native to Elephantine. The Dynasty consisted of some nine kings, mostly little more now than names; for we know of no achievements more remarkable than work in the mines of Sinai or Hammâmât and a trading expedition down the coasts of the Red Sea. The pyramids of all but one of the kings are identified—mostly at Abusir. That of *Wnis*-Onnos, the last of the Dynasty, is at Sakkara, and, though smaller than most tombs of its class, is to us of much greater importance than the gigantic but barren erections of earlier reigns; for in it are inscribed the most ancient texts of all Egyptian literature (see below).

The 6th Dynasty, in its widespread activity abroad and at home, is a strong contrast to its forerunner. Inscriptions of its kings meet us in all parts of Upper and Lower Egypt, as well as in Sinai and the desert quarries. And now, moreover, we may read in the earliest of narrative inscriptions—those of *Wni* (Una) and *Ḥrḫwf* (Herkhuf), the generals and ambassadors of kings *Ppy* (Pepy) I. and *Mrnr‘* (Merenera)—of expeditions against both the Syrian and Nubian barbarians. These resulted, indeed, in little but booty and conciliatory presents from the tribes over whom a temporary victory could probably be achieved with little trouble, by the (at least partially) disciplined troops of Egypt. One of the latter kings of this Dynasty, *Ppy* II., sat longer on the throne than any monarch in the world's history; native and Greek documents assign him a reign of over 90 years.

We know not under what circumstances the 6th Dynasty had reached the throne,—whether through some blood claim or by violence,—nor do we know amidst what events its rule closed. Evidently, however, it had no peaceful end. The last of its kings are but empty names, and indeed in the latter years of *Ppy* II. complete obscurity surrounds the political and social existence of Egypt. When, some two or three centuries later, that obscurity is dissipated, the country has assumed a new face, the capital is no longer at Memphis, the centre of gravity is several hundred miles farther south.

The outward characteristics of the Egyptian polity show little change under the 3rd, 4th, and 5th Dynasties. The southern and northern kingdoms, bound together, it has been said, in a sort of personal union, each retains to some extent its separate organization, although important offices, once proper to one or other of them, are often found united in the hands of a single functionary, just as the official nomenclature of the Pharaoh combined the royal titles of both South and North. The king is omnipotent; his ministers—a mere bureaucracy—are members of the royal house or of the great territorial families. The ancient division of the country into nomes forms the basis of an elaborate financial and judicial administration, yet controlled by the court through officials dependent on the central government, by whom the royal dues are collected and legal questions settled independently of the local authorities. But as time goes on, and (as we may infer) weak rulers succeed the strong, the old provincial independence reasserts itself, and the nomarchs begin to move beneath the weight of central despotism. One of the first signs of this decentralizing tendency is the growth of the custom of burial, now no longer at Memphis, beside the king, but at home, in the cemeteries of the provincial capitals, at Akhmîm, Abydos, Thebes, Elephantine, and elsewhere. The court of the nomarch was modelled upon that of the king; its officials grew in number, its militia in strength. The kings of the 6th Dynasty are left surrounded only by courtiers and placemen; the magnates seem to have withdrawn, and to be ready, when opportunity offers, to reassert the primitive independence of their position.

The period between the 6th and the 11th Dynasties is one of the most obscure in Egypt's history; yet the complete dearth of monuments can scarcely be fortuitous. Manetho localizes the 7th and 8th Dynasties still at Memphis, and we may indeed suppose that there was no sudden break with the past. The provincial nobles could only gradually assert their strength, and the Pharaohs still reigned, at least nominally, in their ancient capital. But of these kings we know nothing, scarcely their names. Possibly they were, in later times, regarded as usurpers. Genealogies in certain tombs (El-Bersheh) appear to reach back to their times, and show how the nomarchs already flourished. The succeeding Dynasties, the 9th and 10th, would be equally unknown were it not for the inscriptions of Siut, whose princes record their participation in the struggle of the petty Dynasty of Heracleopolis (Ahnas) against 'the South.' The 9th and 10th Dynasties are indeed currently ascribed to Heracleopolis, while subsequent events make it evident that by 'the South' is here meant the principality of Thebes. That town had been the seat of a noble family under the 6th Dynasty; and while the royal power had grown weak, the Theban nomarchs had nursed their strength, till at length, having overcome the Heracleopolites, they by degrees re-established unity and order.

(*b*) *The Middle Kingdom.*—The claims of these first Theban Pharaohs—the 11th Dynasty—to be the legitimate successors of the Memphite kings were recognized in their own and future generations. Their number and sequence is not clear. They bear alternately the names *Mntwḥtp* (Mentuhotep) and *Intf* (Intef), though it is pretty certain this does not imply the undisturbed succession of one family. The royal honours were not attained by the first member of the series, who bears merely the title of nomarch; the kingly titles are assumed by his successors. One at least of them—*Mntwḥtp* III.—had a long reign, and left evidence of his power from the Cataracts to the Delta. Another records a trading expedition on the Red Sea as well as quarrying work in the eastern desert.

Whether the 12th Dynasty succeeded the 11th without disturbance is not certain. It gave to Egypt seven of the most active, powerful, and long-lived of her kings, and seems in every sense to have been worthy of the admiration bestowed on it in after ages. To *Imnmḥ't*-Amenemes I. fell the task of completing the work of union and pacification initiated by his predecessors. The magnates of Middle Egypt (Beni-Hasan) have recorded his intervention to settle local disputes as to territory on the basis of former arrangements, and to confirm his faithful vassals in their possessions. Elsewhere we read of revolts suppressed and of conquests abroad. Indeed, Egypt had now for the first time a royal house whose aspiration it was to extend the frontiers of their dominions. It is true that booty or tribute were still the chief inducements to war; but the campaigns were now upon a larger scale, the enemies attacked more distant, and the results of victory more lasting. The energies of the kings were turned chiefly southward, towards the gold mines of Nubia. That country, once subdued,—mainly by the exertions of *Wsrṭsn* (Usertesen) III.,—was to be held by means of fortresses, of which two can still be traced beyond the second Cataract. All Egypt contains scattered remains of the building activity of the 12th Dynasty, whose kings resided in various capitals—the earlier in Thebes, where the nucleus of the Amon temple dates from their time, and possibly at Memphis; the later, in the Fayyûm, where Amenemes III. built the most colossal of Egyptian funerary temples, known in later ages as the Labyrinth, and where he utilized an extensive natural lake (L. Moeris) to fertilize the whole district. The custom of burial in pyramids, maintained on a modest scale by the 11th Dynasty at Thebes, was carried on by their successors, who built large tombs of this class near Memphis (Lisht, Turrah, Dahshur) or in the Fayyûm (Illahun, Hawarah). There are grounds for supposing the later kings of the Dynasty to have had foreign blood in their veins; their portraits show features singularly different from the accustomed type of the age. The internal history of the middle kingdom is the history of the development of the decentralizing tendencies which had their rise in the conditions of the 6th Dynasty. The development can be traced in the inscribed tombs of the noble families buried at Beni-Hasan, El-Bersheh, Siut, and Aswân. The nomes of Middle and Upper Egypt are the centres of interest, each of them in the hands of a family of which the genealogy can, in some cases, be traced back to the Old Kingdom. The nomarchs were still, however, under certain obligations to the central power. But the crown was no longer in the position of irresponsible despotism which it had enjoyed in former times. Its powers were restricted on all sides by the growth of the provincial resources. The nomarchs, some of whom by judicious marriages had become lords of several provinces at once, had their own courts, officials, and levies, though the latter were apparently at the king's disposal for external wars. So far, however, as we can judge, the country suffered little as yet from these conditions. The age of the Middle Kingdom, though differing rather in degree than in kind from that of the Memphite Dynasties, was one of probably greater material, artistic, and literary wealth, and appeared, not undeservedly, to succeeding generations as a golden age.

The obscurity which gradually follows the extinction of the 12th Dynasty is no less impenetrable than that which follows on the Dynasties of the Old Kingdom. On some sides, indeed, the decline is scarcely perceptible; the outward aspect of the kingdom is little changed; the southern conquests are maintained, commerce on the Red Sea continues, and the art of the period does not fall far short of the high standard lately set. But of the individual Pharaohs of the 13th Dynasty we know scarcely anything; of those of the 14th, absolutely nothing. The former series, with the names (among others) of *Sbkḥtp* (Sebekhotep) and *Sbkms'f* (Sebekemsef), is localized in Thebes; the latter in Chois, an obscure Delta town, though it is quite possible that the Theban tradition was being upheld by a contemporary Dynasty in the south. The whole interval, indeed, between the 12th and 17th Dynasties may have been occupied by the struggles of rival houses, each claiming legitimate rights to the throne, yet none strong enough to vindicate its claims permanently.

We do not know at what point in this dark period of some 150 years the internal troubles were first complicated by foreign invasion. The name of one of the kings assigned to this time is regarded as evidence for an Ethiopic supremacy; on the other hand, there is perhaps ground for placing here one of the frequent Libyan invasions. Of trustworthy contemporary documents there is a complete dearth; the Turin papyrus and the Manethonian fragments are our sole authorities. In Manetho's arrangement these two obscure Dynasties are followed by two more of which still less is known; yet they are of greater interest, for they are drawn from those foreign invaders who by this time had subdued at least a part of northern Egypt, and whom Manetho names Hyksos (Ὑκσώς, ? pl. Ὑκουσσώς). The racial position of this people is still unknown. Their Greek (=Egyptian) name means merely 'Sheikhs of the (south Syrian) Bedawin,'* and it has been supposed that they consisted of mixed hordes, partly Semite, partly of some other race. Another hypothesis, based on the fact that the worship of *Swtḫ* (Set) was common to Hyksos and Hittites, and on the occurrence in cuneiform documents of *Ḫyʿn* (Khyan) as a Hittite king's name, while his namesake in Egypt is regarded as a Hyksos king, would make of Hyksos and Hittites one race. From the language we can draw no arguments, for we know nothing of it save a few Greek transcriptions of the royal names. Nor can we appeal to the portraits of the kings; for the Sphinxes, etc., formerly regarded as such, are now held by many to belong rather to the latter kings of the 12th Dynasty.

---

* The gloss 'shepherd' for *Š'sw* is demonstrable only at a far later period of the language.

Asiatics had undoubtedly been crossing the frontier for ages past; but only in small numbers. Now they appear to have made a much more formidable onslaught upon the eastern Delta, and, after slaying, plundering, and burning, to have established themselves there in a dominant position. The events which had produced this southward migration from Asia are quite unknown; possibly, the contemporary attack of Elam on Mesopotamia gave the immediate impetus.

Egypt was weak, and the earlier at least of the Hyksos princes were strong rulers; and though resistance was persistent farther south, northern Egypt remained in their hands for two or three centuries, possibly longer. They resided in the eastern Delta, in the fortress of *Ḥtwʿrt*-Avaris or at *Ḍʿnt*-Tanis (Zoan), where they soon so far assimilated Egyptian civilization that the remains of their work is indistinguishable from that of the native kings.

(*c*) *The New Kingdom.*—Just as the disorders of a former period had been ended by the energy or fortunate position of the Theban nomarchs, so now resistance to the Hyksos oppression centred at Thebes, which may even itself have suffered at their hands, since traces of them have come to light still farther south. Their expulsion necessitated a long struggle, and they probably only finally quitted the Delta many years after being driven from Upper Egypt. The 17th Dynasty, which began the war of liberation, seems for some time to have been contemporary with the Hyksos kings. It is, however, only of its later members that we have any knowledge. There is preserved from this period the autobiography of an Egyptian officer, *Iʿḥms*-Amosis, who took part in the war, and from it we learn that, Avaris having been captured, the foreigners were not merely expelled from Egypt, but pursued into S. Palestine and their stronghold (or, perhaps, place of temporary retreat) Sharuhen (Jos 19^{6}) taken.

The military expeditions here described are the first-fruits of a new tendency in the history of the nation. The art, language, and social organization of the early period of the New Kingdom bear a close resemblance to those of the age that had sunk in the obscurity of the Hyksos invasion. Indeed, that the change had been so slight may be an argument for the relatively short duration of the foreign occupation. But the political history of Egypt, with the rise of the new Theban Dynasty, begins to follow a new course. Instead of a nation content with victories over the wild tribes of Nubia and the Soudan, both kings and people appear now to be eager for conquest among races of quite other attainments, in the arts both of peace and war. The nations of Syria had not, so far as we know, seen an Egyptian invasion since that conducted by *Wni* (6th Dynasty). The Pharaohs of the New Kingdom, however, initiated into Asiatic warfare by the circumstances of the Hyksos expulsion, soon came to regard such campaigns—aggressive now—as their most important occupation. But first they set about the reconquest of Nubia, and before long carried their southern frontier as far as Dongola.

The decisive strokes in the war of liberation were fought under the first king of the 18th Dynasty, *Iʿḥms*-Amosis, who seems to have been the lineal descendant of his predecessors. The relationships and sequence of the kings and queens—the latter, heiresses in their own right—who followed him are much disputed. His son and successor, *Imnḥtp*-Amenophis I., was a king of no great political importance, though popularly revered, as we see from his special deification in later times. His chief occupation was the reorganization of the Nubian dependencies. He was followed by his son, *Dḥwtïms*-Thutmosis I., though this prince's succession was only legitimized by marriage with a half-sister, the direct heiress. Whether he was the father of his three successors Th. II., Th. III., and queen *Ḥʿtšpswt* (Hatasu) or only of Th. II. and the queen, Th. III. being a generation farther off, it is difficult to decide. The queen, though certainly daughter and heiress to Th. I. and wife of her brother Th. II., may have been either half-sister or aunt (and step-mother) to Th. III. She was, at any rate, a princess of strong character, and a very important factor in the politics of the time, acting at least once as co-regent and, during the minority of Th. III., ruling on his behalf. We have evidence, however, in the successive erasure of these royal names upon the monuments, that, whatever was the sequence of the changes of rule among them, such changes were not made in any spirit of friendly acquiescence. Queen *Ḥʿtšpswt* never really reigned alone, though for years, whether owing to the insignificance or youth of the king, the fortunes of the country were in her hands. Beyond the proofs of her activity recorded at Deir el-Bahri (Thebes), we know little of the direction her energies took. The Hyksos were no doubt not yet completely expelled, and there is again mention of a Nubian campaign. The event of which we know most, however, is her expedition to *Pwnt*, *i.e.* the Somali coast. Her fleet had, like its predecessors from the 6th Dynasty onwards, solely a commercial object. *Pwnt* (Punt), the 'Land of the Gods,' the home of the 'bearded' people,* was rich in frankincense, and a market for ebony, ivory, and panther skins. Beyond the vast temple, on whose walls the expedition is depicted, the queen found opportunity to build also in other quarters of Thebes, and erected at Karnak the loftiest (with one exception) of extant Egyptian obelisks.

Left free by the death or final retirement of *Ḥʿtšpswt*, Thutmosis III., who had already reached the age of thirty, at once set about a campaign in Syria which culminated in a great defeat at Megiddo of the confederated Syrian princes, who forthwith recognized the Pharaoh as overlord, and professed themselves, with more or less sincerity, the vassals of Egypt. Not, however, that one campaign sufficed to ensure this condition of things. During twenty years Thutmosis III. himself led some fifteen expeditions into Syria, where the withdrawal of his armies was repeatedly the signal for a rising among the subjugated states. His most distant vassals at the time of his death were in the neighbourhood of Mt. Amanus and the upper Euphrates; he was suzerain of the Canaanite plain and coasts and of the Amorite hill-country, while Egypt's 'sphere of influence' embraced, moreover, 'the isles of the Great Sea,' *i.e.* the Ægean islands, as well as Cyprus, the nearer parts of Asia Minor, and the Hittite territory around Kadesh (on the Orontes). 'Tribute' is recorded from Assyria, though here, as often elsewhere, the annalist probably refers but to propitiatory gifts, which indicated a desire to stand well with the powerful invader. The Nubian dependencies were also extended in this reign as far south as Gebel Barkal and probably far across the Soudan, while we hear, too, of campaigns against the Libyan nomads. Thutmosis III. was not less active as a builder than as a warrior; his architecture meets us on all hands. In every considerable town he built or enlarged a temple, as at Thebes, where he surrounded the central shrine of Amon with extensive halls and corridors. His name, engraved on scarabs, etc., is more frequent than that of any other king, and seems, in later ages, to have been regarded as a talisman.

---

* So W. Max Müller, *Z. Ass.* xi. 82, and not حبسى Abyssinians.

He was succeeded peacefully by his son, Amenophis II., whose long reign is not remarkable. His father's energy had secured, for the time, the Syrian conquests. Nubia seems to have occupied him somewhat more, and from his reign date the most southerly of Egyptian monuments (Ben-Naga). The reign of the next king, Thutmosis IV., was short and still less remarkable. There were occasional demonstrations of supremacy to be made in Syria and Nubia, and tributes of respect to be paid to the gods by some additions to their temples. That the contact with Asia was already of influence is shown by this king's marriage with a princess of *Mṭn*-Mitanni, the then leading power beyond the Euphrates.

Amenophis III. sat for thirty-five years on his father's throne. He seems to have been still able without much exertion to maintain abroad the position he inherited, for we hear nothing of Asiatic and but once of Nubian campaigns. Extensive building and much observance of religious ceremonies are—for us, at least—the characteristics of the reign. At this period of the 18th Dynasty the royal marriages are among the most significant and influential in Egyptian history. Amenophis III., himself possibly the son of his father's foreign wife, took into his harem *Kïrgïp'* (cuneif. Giluḫipa), another daughter of the house of Mitanni, while we know that among his wives was also a Babylonian princess. He had, moreover, already married a lady named *Tyï*, who may or may not have been of foreign parentage, but who, at any rate, took a prominent share in the public life both of her husband and son. It is thought, indeed, that Amenophis IV. was influenced by his mother towards those reforms in the state religion, initiated a few years after his accession, which have left to his name a peculiar interest. (See below.)

The marriages, domestic relations, and foreign history of this period can be followed in exceptional detail owing to the records deposited at el-Amarna, where a portion of the correspondence between the Egyptian court and its allies, envoys, and vassals in Syria lay stored until its discovery in 1887. The correspondence was almost wholly in the Babylonian language,—clearly the diplomatic medium of the age,—though the writers were not, with one or two exceptions, Babylonians. Some of the letters are from the kings of Mitanni, but most are from the Syrians entrusted with the government of the subjugated provinces. Those letters which belong to the reign of Amenophis III. show a condition still of peaceful allegiance to Egypt and respect for its king. Those, however, dating from his son's reign bear witness to the defection of the vassals and speedy loss of the Asiatic empire, which resulted from the neglect and incapacity of the suzerain power. Amenophis IV. was too fully engrossed at home to spend time or money upon external affairs.

Although this king reigned for some seventeen years, there is nothing recorded of him beyond his religious activity. The religious revolution was accompanied by an ephemeral, though for the time complete, revolution in art, traceable throughout the remains of the great palace and temple which Amenophis, no longer content to reside at Thebes, had built at el-Amarna in Middle Egypt. Place and personal names were changed, in accordance with the reformed cult; the new residence was called 'Horizon of the Sun,' the king took the name *Iḫnitn* (Khuenaten), 'Spirit of the Sun,' the names of his wife—another princess of Mitanni and his own cousin—and daughters being likewise altered. There has been much speculation as to the king's personality, owing to the wide divergence between his youthful and mature portraits. The peculiar, almost deformed, type of the latter has been thought in some way connected with the religious change. It is scarcely likely that the very similar portraits of his courtiers are due to more than imitative flattery.

On the death of the reformer-king, he was presumably interred in the great tomb hewn for him at el-Amarna. His courtiers had planned to lie around him there; but only some of them were destined to complete their tombs. For in a short time it was clear that the schism had depended on the energies of its originator; with him dead, the ancient religion quickly reasserted itself. His two sons-in-law, who succeeded him, were not the men to resist the reaction which, within twenty years of Amenophis' death, was complete, and left the 18th Dynasty to end its course where it had begun it, at Thebes.

The most conspicuous results of the intercourse with Asia of which the 18th Dynasty had witnessed the growth, are naturally seen in the military character of the age, the new basis on which the army was levied,—dependent no longer on the feudal nomarchs, but immediately on the king,—and the new methods of warfare taught by the introduction of the hitherto unknown horse and chariot into Egypt. The gradual extinction of the nomarchs—an effect perhaps of civil war—implied a corresponding exaltation of the crown; their lands seem mostly to have passed into the king's hands. Conquest gave to the new monarchy a prestige and resources (treasure and slave-labour) which placed it in a position of hitherto unattained magnificence. The country became, as under the early Dynasties, filled with royal officials and favourites, who soon rose to form a new nobility; a royal tax was levied upon all land, and royal justice administered by mixed courts of officials and priests. The Asiatic vassal-provinces were governed chiefly by native viceroys, whom the Egyptian court controlled by means of envoys. Nubia and part of S. Egypt were entrusted to an official known as the 'Prince of Kush.' The evils of the irresponsible security attained by the capacity and fortune of the earlier Pharaohs of the New Kingdom and those resulting from their close alliance with the all-powerful priesthood, become visible first under the following Dynasty.

Whether *Ḥrmḥb*-Armais be reckoned the last king of the 18th or the first of the 19th Dynasty, it is he who really initiates the new epoch. The disturbance for which Amenophis IV. had been responsible could not be quieted without vigorous reorganization, and this was the main work of Armais, a strong ruler, and probably already acting regent when called by his patrons, the priests of Thebes, to the throne. Beyond reconstructive work at home, we hear of one Asiatic war in which the principal enemy is the Hittite power, now advanced southward (probably from the Armenian highlands) and making havoc among Egypt's allies and vassals in N. Syria. It is uncertain whether this reign saw a treaty between them and Egypt. Armais was followed by the first of the famous Ramesside Pharaohs who ruled Egypt during the following 200 years. But

Ramses I. died after a short and uneventful reign, and his son *Sty*-Sethôs was the first whose hands were free enough at home to allow of any real attempt to regain abroad the ground of late lost. Yet now even Sethôs was unable to do more than assure his hold upon such districts as the Hittites had not already annexed. A march through Palestine to the Orontes and back by the Phœnician coast overawed Bedawins and Canaanites; but he made no fresh conquests, and finally came to terms with the Hittite king, who was to be suzerain from the Lebanon northwards, while Palestine remained in allegiance to Egypt. Nubia, Libya, and, with the last, the Mediterranean pirate hordes who now begin to appear on the N. and W. for the first time, were likewise chastised or repelled; but most of the reign must have been spent peacefully, as the king's colossal monuments at Thebes and Abydos testify.

His son, Ramses II.—the best known of Egyptian Pharaohs, because the most industrious in recording his own glory,—succeeded young, and reigned for 67 years. Of these the first score were occupied in the war with the Hittites, till it became evident that a peace, similar to that of the last reign, could alone end a struggle in which neither side was strong enough to retain the mastery. An alliance, offensive and defensive, was at the same time concluded and cemented, some years later, by a marriage. The war had been signalized by at least one great battle—that at Kadesh,—in which prodigies of valour are ascribed to the king. But the position of Egypt in Asia, as defined by the peace of the king's 21st year, was far inferior to that attained two centuries earlier by Thutmosis III. Instead of the frontier at the Euphrates and Mt. Amanus, Ramses II. had to be content with one which crossed the Lebanon about Beirût. As a means of controlling Phœnicia and Palestine, he erected a series of forts across the desert, while strengthening various Delta towns (cf. the Hebrew tradition of 'Pithom and Raamses,' Ex 1^{11}), and choosing for his favourite residence Tanis (Zoan), a much more apt centre than Thebes for the direction of operations in Syria.

After the Hittite peace, Ramses II. appears to have devoted himself principally to architecture. Not only did he build endless temples to the gods (and some even to himself) throughout the country, but he did not scruple, while restoring, to appropriate the work of his predecessors, whose names he frequently replaced on their buildings and statues by his own. He had more than 150 children. His successor was his fourteenth son, *Mrnptḥ* (Merenptah), whose reign is as yet the only one in which reference has been found to the Israelites (see below). As well as his famous Libyan war, *Mrnptḥ* boasts of a campaign in Syria, where he still claimed the allegiance of the southern half of the country. The great Libyan host, defeated in his 5th year, had come allied again with those pirate hordes which had appeared in the Delta under Sethôs, and whose homes it is impossible to localize, owing to the difficulty in exactly identifying their names. They came, at any rate, from the Mediterranean coasts; but whether Asia Minor, the Ægean islands, and the Italic countries all sent contingents, cannot be decided. The name of *Mrnptḥ* is found on numerous monuments, but we know little of his doings.

The long reign of Ramses II., and perhaps apathy and self-indulgence in his latter years, had enfeebled the royal power, and by the time of *Mrnptḥ's* death the country was ready for revolution. Power fell into the hands of the magnates and great officials, and only after half a century of disturbance did *Stnḫt* succeed in re-establishing order. This prince, who presumably had claimed legitimate Ramesside descent, left the throne to his son, Ramses III., whose reign lasted over 30 years. During its first decade, three formidable attacks from without had to be repelled—two by Libyan coalitions, and one by a host of the northern maritime invaders, whom the wealth of Egypt had more than once attracted under former kings. This time, however, they approached the eastern Delta by land through Syria as well as by sea, and it was only after a destructive battle at the frontier fortress of Magdolos that they were repulsed. The hold of each successive Pharaoh upon the Asiatic provinces was growing weaker, and it is doubtful how far the authority of Ramses III. was effective there, even though the Hittite empire had long been dissipated. At home the king's tranquillity was broken by a widespread and mysterious conspiracy, originating in the palace, and suppressed with great severity. Otherwise, the reign appears to have been peaceful. The king's chief ambition was the imitation in all points of his ancestor, Ramses II. The wealth of the country was enormous. The king lived the life of a self-indulgent despot, while the real power was with the Theban priests and the foreign mercenaries—mainly Libyans and *Š'rdïn'*, *i.e.* Sardinians, of whom the latter had already served the Pharaohs of the preceding Dynasty.

Ramses III. was followed by a series of his sons and grandsons, who each bore the name of Ramses. Under their weak rule Egypt finally lost her Syrian dependencies, and left them open to the conquests of Assyria. Each king seems to have been principally occupied with the preparation of a vast rock-tomb (Bîbân el-Mulûk), and meanwhile the ascendency of the priests of Amon grew always greater, until *Ḥrḥr* (Herhor), who had already added to the office of chief priest the principal political and military titles, felt strong enough to mount the throne and thus put an end to the Ramesside rule. The Ramesside Pharaohs had, with even greater resources at their command, rarely displayed the capacity or vigour of the 18th Dynasty, and the nation had readily relapsed into the unwarlike apathy and distaste for foreign intercourse which had marked its earlier history. Mercenary troops became therefore the only means of retaining a hold on the foreign provinces, and the king grew more and more completely the tool of the military leaders. On the other hand, the recent triumph of orthodoxy had further strengthened the position of the priesthood, on whom royal piety heaped untold quantities of treasure, the product of the foreign tributaries. The great offices of state in the hands of a mere bureaucracy were effective only in filling the royal treasury, while the population at large was starving and discontented.

(*d*) *The Foreign Dominion.*—But the 21st Dynasty does not, according to Manetho, consist of the priestly successors of *Ḥrḥr*. The legitimate Pharaohs he held to be the Tanite princes (*S'mnṭw*-Smendes, *P'sbḫ'nnt*-Psousennes, etc.) who rebelled against this usurpation, and were acknowledged first in the North, then also in the Thebaid. Before long the rival families intermarried and so restored unity; but their relationships and sequence are not clearly ascertained. On the monuments little more than their names occur, though mummies (of the priestly family) and much genealogical evidence were found in the famous *cachette* at Deir el-Bahri.

The next Dynasty, the 22nd, owed its rise to the political conditions of the period. The captains of the Libyan mercenaries had by this time attained a position, territorial as well as military, which made usurpation easy, and, when the opportunity offered, their chief *Š'šnḳ*-Sousakim-Shishak was able without serious opposition to assume the royal titles. He was ambitious, and had pretensions to a reconquest of Syria. His inscription records a raid against both the Hebrew kingdoms—not against Judah only (1 K $14^{25\text{ff.}}$). The Dynasty resided at Bubastis, and built extensively upon the ancient temple of the goddess *B'stt* (Bast); but we know little of its kings beyond their names, *Š'š'nḳ*, *W's'rkn*-Osorkon, *Ṯkrṭ*-Takelothis. The Dynasty by which they were (presumably) overthrown shows likewise Libyan names, but ruled from Tanis. The times may well have been too disturbed by dynastic rivalries to leave leisure for building; at any rate, the history of the 23rd Dynasty is as yet totally obscure.

During the period of weakness and dissension through which Egypt had been passing, the Nubian princes of Napata (Gebel Barkal) had been growing in strength, and were able now to shake off the Pharaoh's sovereignty, and even to contemplate the invasion of Egypt. This adventure was not difficult to carry out in the southern country, where there was no leader to withstand them; but as they advanced northward, the Ethiopians found an obstinate opponent in *Tfnḫt*-Tnephachthos, the powerful prince of Sais (W. Delta), whose supremacy was recognized as far south as Hermopolis (Eshmunein). To this town the Ethiopian king, *P'nḫy* (Piankhi) (775) laid siege. The Saites capitulated, and Tnephachthos fled, while the victors advanced to Memphis. A treaty was, however, soon arranged, neither party being strong enough to suppress the other. The Ethiopians retired up the river, nominally in possession of the whole valley; but the Delta remained in the hands of Tnephachthos and his son *Bknrnf*-Bocchoris, who seems to have finally extinguished the old legitimist families, extended his authority up to Thebes, and reigned for some time in comparative tranquillity. The Ethiopians, however, had not abandoned their ambitions, and, strengthened by a marriage with a Tanite princess, and favoured by the still powerful Theban priesthood, they again marched northward and put an end to the rule of Bocchoris. This time their conquest was more complete. Their family, whose relationships and history are as yet far from clear, constitutes Manetho's 25th Dynasty, and its most conspicuous member is its first king, *Š'b'k'*-Sabakon (707–695). His successors were not, however, strong enough, at such a distance from home, to maintain a dominant position in the North, though the petty princes of the Delta towns accepted for the moment the Ethiopian suzerainty. One of the latter—and probably not Sabakon himself, as was formerly assumed—was the So (סוא = Sewe[*]) of 2 K 17^4, who ventured, in alliance with Gaza and Israel, to withstand the threatening growth of the Assyrian power in Palestine. Sargon, however, defeated the coalition at Raphia, though he seems afterwards to have made a treaty with Egypt.

Throughout this period the hopes of the small Syrian states were placed on Egypt, whence, however, in the confusion of party strife, no effectual help could come. Yet it was toward Syria that the ambitions of Sabakon's son, *Thrḳ*-Tharaka-Tirhakah (690–664), were directed. He was there brought, however, into speedy collision with Sargon's successor, Sennacherib, who, at Eltekeh, defeated the combined troops of several Egyptian princes. Attempts at interference in Asia were thus for a time checked, and Tirhakah had leisure for considerable building, both at Napata and at Thebes. But the Syrians still counted on an Egyptian alliance, and it was clear that, if the Assyrian rule was ever to be peacefully accepted by them, Egypt must once and for all be rendered powerless. An Assyrian army proceeded therefore southwards, and, while Tirhakah fled to Ethiopia and the minor princes submitted, Esarhaddon advanced as far as Thebes and subsequently organized a government under twenty local regents, of whom the most notable was *Nk'w*-Necho of Sais. Yet still Tirhakah had hopes, and his advances from the south, abetted by some of the local princes on whom Assyria relied, resulted at length in the expulsion of the invaders from Memphis. Assurbanipal, the son of Esarhaddon, thereupon hastened to Egypt, and, with small trouble, re-established the Assyrian supremacy, while Necho, who had joined Tirhakah, became a temporary captive in Nineveh. At length Tirhakah died, and his successor, *Tnwtimn* (cuneif. Tandamanie), having failed to recover the lost position, the Ethiopians finally retired homeward, while Assurbanipal requited the sympathy his opponent had received in Upper Egypt by devastating Thebes. For two or three years Assurbanipal was undisputed master of Egypt. Then came an Elamite war and simultaneous revolts in Babylon, Arabia, and Lydia.

(*e*) *The Restoration.*—Incited by Gyges, king of the last country, *Psmtk*-Psammitichus of Sais (663–610), son of Necho, whom the Assyrians had reinstated, seized this opportunity to raise a fresh insurrection. He was himself of either Libyan or Nubian descent, and the success of his policy depended wholly on the foreign troops he employed. With the help of Lydia and of Ionian and Carian mercenaries (the χάλκεοι ἄνδρες of the prophecy, Herod. ii. 152), Psammitichus overthrew the Dodecarchy, *i.e.* the Assyrian regents, and, by marriage with a niece of Sabakon's, gained the approval of the Theban priests and so of Upper Egypt. He pursued the Assyrians into Palestine, and captured after a long siege the town of Ashdod. The misfortunes of Assyria favoured the attempts of the Saite Pharaohs to re-establish their dominance in Asia, and during this and the following reign (Necho II.) Syria was again brought under Egypt's sovereignty. But the rise of Babylon under Nebuchadrezzar put a check on this revival, and Necho II. (610–594), after defeating Josiah of Judah at Megiddo,[*] was himself routed by Nebuchadrezzar at Carchemish, and expelled from Syria.

The energies of the 26th Dynasty were directed before all things to taking advantage of Egypt's geographical situation and bringing her, by the help of hired Phœnician ships, within the sphere of Mediterranean commerce. Relations were opened with Periander of Corinth and with other Greek states. Greek traders were assigned special quarters in Memphis, where a Tyrian colony had already been settled; indeed, *I'ḥms*-Amasis, a later king of the Dynasty, allowed them to found a separate town on the Greek model—Naucratis in the W. Delta—to which their operations were to be restricted, and which only waned in importance before the rise of Alexandria. Amasis had been the general of *W'ḥibr'*-Apries-Hophra (588–569), whom the troops had driven from the throne in his favour. About this time Nebuchadrezzar appears to have invaded Egypt, though the history of the campaign is not known. His object was presumably vengeance for the part which Apries had recently played in Syria, where Judah, again trusting to Egyptian support, had begun the hostilities which ended in the fall of Jerusalem (586) and the flight of many of the inhabitants—among them Jeremiah—to Egypt, where they were settled in Tahpanhes (Tell Defeneh), a frontier fort in the E. Delta.

---

[*] Greek Σηγώρ, Σώα. The Lucianic text has the inexplicable variant Ἀδαρμέλεχ.

[*] Presumably S. of Carmel, though this identification is disputed.

The characteristics of the Saite period are, in all but commercial aspects, those of an archaizing renaissance. To judge by art, literature, names, titles, etc., we might imagine ourselves again in the age of the Pyramid builders, though on closer inspection the resemblance is seen to be but superficial.

(*f*) *The Persian Supremacy.*—This prosperous and uneventful period was suddenly terminated by an invasion by the great power which was now overturning the political balance of W. Asia. Cyrus had seen the formation of a hostile league between Lydia, Babylon, and Egypt; but his death had delayed chastisement, and the expedition against Egypt was left for his son, Cambyses (525), who appears not to have acted with the customary clemency of Persian conquerors; for his memory was execrated throughout Egypt. The Saites had grown weak, and the country lay an easy prey to the invaders. The conquest was turned to full advantage by his successor Darius (521–486), who set about the reorganization of the country on its former lines, and won the acquiescence of priests and people by assuming the ancient titles and functions of the native kings. The check suffered by the Persians at Marathon, however, gave courage to the patriotic party in Egypt, and under the leadership of a Libyan, *Ḫbbš* (Chabash), the Persians were for a time expelled. But a fresh expedition was undertaken by Xerxes (486–465), and the insurrection suppressed with severity, Egypt being constituted a satrapy under the king's brother Achæmenes. Some years of quiet followed, and then, in the W. Delta, came a fresh revolt led by Inaros—possibly a Saite prince—and aided by the Athenians (463). This in turn was suppressed by Megabyzus, the general of Artaxerxes, while the leadership of the party fell to Amyrtæus, for whose support Cimon, on his Cyprian expedition, sent a fleet (449).

The history of this period is fragmentary and obscure; of native records we have none. The chronology of events cannot be accurately settled. We gather that, throughout the time of Persia's decline, various revolts of the national party took place in northern Egypt—the upper valley plays by this time no historical part. Manetho introduces, in the midst of the Persian supremacy, two more native Dynasties, the 28th and 29th, of which we know very little, and then another, the 30th, to which belong two kings, *Nḫthrḥbt*-Nektanebes (382–364) and *Nḫtnbf*-Nektanebo (361–343), the former of whom succeeded in suppressing his rivals, while the latter, during a long reign, was active as a builder throughout the country (Philæ, Edfu, Thebes, Heliopolis, the Delta). Persia, however, by a final effort, was able to reinstate herself (343), and Nektanebo, the last of the Pharaohs, abandoned his Greek allies and fled to Ethiopia.

But the Persian domination, too, was at an end. In a few years Alexander of Macedon had dismembered the empire of the Achæmenides, and in 332 he led his armies into Egypt, which submitted without resistance.

The Macedonians.—The rule of Alexander's successors, the Ptolemies, brought Egypt again into the advantageous position attained for her in some degree by the 26th Dynasty. Now, however, the Greek element became the dominant factor in her prosperity; the ancient native culture gradually faded and retreated from the North, where Alexandria, the new capital, had become the centre of the Hellenic world. But the wide dominions of the Ptolemies were not to be retained by a series of rulers so degenerate as those of the house of Lagus soon became. After a century of good government and unequalled prosperity (323–222), the political fortunes of Egypt began again to decline and anarchy to spread throughout the country. Insurrections followed each other in constant succession, while treachery and murder shortened the reigns of many of the kings. At length the Romans, under whose toleration the Lagides had for a century and a half existed, were able, by the victory of Octavius over Anthony and Cleopatra (30), to assume the actual government of the country, which remained thenceforth a part of the empire, either of Rome or of Byzantium, until conquered by the Saracens A.D. 642.

ix. EGYPT'S RELATIONS WITH ASIA.—Our sources of knowledge are (1) for the primitive periods, chiefly inferences from the foreign words already in use in the ancient (religious) texts, especially the names of cereals, woods, oils, etc., known to have been not native; (2) under the Dynasties of the Old Kingdom we have early evidence from the mines of Sinai,* where the troublesome nomad tribes were known as *Šs* (cf. ? שָׁסָה), from a 5th (?) Dynasty fresco depicting the capture of a Syrian fortress, and from at least one biographical narrative—that of *Wni*, Dyn. 6—recounting several military and commercial expeditions to Syria, the land of the *''mw* (root probably *''m*, 'boomerang,' not עַם). We here read of the fruitfulness of the land through which the Egyptian army marched, and it is evident the description is that of S. Palestine. The same text tells, too, of a journey by sea to the Phœnician coast; (3) under the Middle Kingdom Dynasties we can see that a considerable intercourse is arising. Embassies come with presents from Semitic chiefs and are received by the king or the nobles (Beni-Hasan), and no doubt many groups of nomads had by this time crossed the frontier and got leave, as they did later (*Æg. Zeitschr.* xxvii. 125), to settle in the Delta. Journeys into Palestine became so frequent that they formed the subject for a story—founded, no doubt, upon fact, and popular for many centuries—whence many details of Syrian desert life at the time may be learned (*S'nht*). The tribes among which the hero of this story passes many years are called by the general term *stï*, 'archers' (cf. Babyl. *sutī*). Egyptian traders visited them, and the conditions of life appear very similar to those of the modern Bedawin. (4) But the relations of Egypt with her northern neighbours were revolutionized by the Hyksos invasion and the long series of military expeditions which followed. The language receives a very strong admixture of foreign (not exclusively Semitic) loan-words, and is forced even to evolve a new system of orthography for their reproduction. Syrian slaves—females, at least, *''mt*—met with in the households of the Middle Kingdom, are now employed in great numbers. Asiatic textile work, weapons, vases (pottery and metal), musical instruments, besides various wines, beers, oils, breads, etc., are imported from Syria, Asia Minor, and possibly even lands farther west, and preferred to the native products. The native names even of many objects are discarded and replaced by corresponding foreign terms. Syrian deities—Baal, Astarte, Anat, Resheph—are gradually admitted to places beside the Egyptian gods, and the Pharaohs appear now and then under their special protection.

The countries whence these new influences emanate, bear in the Egyptian texts of different epochs different names, many of which are confusing and elude exact definition. All Syria, as far as the Euphrates, is divided into the countries of Upper (Southern) and Lower (Northern) *Rṭnw* (cf. the more ancient *Tnw* and the cuneif. *Tidnu*). Palestine proper bears also the name *Ḫ'rw*, originally only the designation of the southern (later

---

* See *Æg. Zeitschr.* xxxv. 7 ff.

Philistine) coast. Phœnicia, on the other hand, was known by the name *Ḍ'hi̇̈*, and, together with the still more northerly coast, by the vaguer term *Ḳdï*, 'the Circular (land),' perhaps from the form of the Gulf of Issus. *Kft* was the name, perhaps, of Cilicia, perhaps of the N. Syrian coasts. Certain peoples whom we find, under the 19th Dynasty, among the allies of the Hittites, have been localized in W. Asia Minor; the *Rwk'* Lycians, *D'rdny* Dardanians, *Ywnn'* Ionians, *Iḳ'yw'š'* Achæans,[*] and others. The difficult designation *Ḥ'wnbw*, found in the oldest literature, appears to embrace the peoples of the North in the vaguest way; only in late epochs was it used for the Hellenic race. Cyprus, whence much copper was imported, is *'sy*, a part of it *Irs'*-Alasia. Mesopotamia was, until the New Kingdom, practically unknown to Egypt; then we begin to read of presents passing between the court of Egypt and those of *Bbr*-Babylon, called in the Amarna letters Shankhar (*S'ng'r* שִׁנְעָר) or Karduniash, and *Isswr*-Assyria. Asia east of these was always unknown to Egypt.

The votive inscriptions, in which the 18th and 19th Dynasties recorded their conquests, have preserved the names of many towns, etc., in Syria, of which, however, the majority are still unidentified. The campaigns of Thutmosis III. furnish the best of such material; the lists of his successors are often mere copies of his, and of relatively small value. The Amarna tablets show several of these same names in a cuneiform transcription. Of the localities identified the following are among the best known: Aleppo, Carchemish, Kadesh (on Orontes), Damascus, Hamath, Byblos, Simyra, Beirût, Sidon, Tyre, Megiddo, Akko, Joppa, Gaza, Ashkelon, Janoah, Taanak. In one group of the Amarna letters Jerusalem is often mentioned, but in hieroglyphic texts it has not been found. Certain names, though not yet identified, are compounded of interesting elements: for example, *H'rir* הראל, *B'ty'* ביתיה, in which the divine names appear—the second already (Dyn. 18) abbreviated; or *Y'ḳbi'r*, *Yš'pir*, in which have been recognized the names יַעֲקֹב and יֹשֵׁף combined with אֵל (as in Israel, Ishmael). These much-discussed names are more likely to have then had local than ethnic significance.[†] A connexion between them and the names of the patriarchs, Jacob and Joseph, cannot of course be proved; indeed the equation *Yš'p*=יוֹסֵף has considerable phonetic difficulties. It may here be noted that certain scarabs, probably of the Hyksos period, appear to bear royal (?) names compounded of *Y'ḳb* and *hr* (? אֵל), which might point, at any rate, to the Semitic name Jacob at an unexpectedly early period. The whole tradition of Israel's early connexion with Egypt—the sojourn there of the patriarchs and the exodus of their descendants—is still obscure, and the recent discovery for the first time of 'Israel' in a hieroglyphic text seems but further to complicate the problem.

The facts as to this document are the following: In 1896 an immense stele was discovered, one text of which commemorates the victory of *Mrnptḥ*, son and successor of Ramses II., over the Libyans in his 5th year.[‡] In the latter part of the text where other triumphs are enumerated, the localities subjugated occur in the following order: the Hittite land, Canaan (? land or town), Ashkelon, Gezer, Janoah (?), *Ysïri'r*-Israel, S. Palestine, 'all lands.' There is no corroborative evidence for an Asiatic campaign of *Mrnptḥ*; possibly, in the fashion of the age, he is here merely assuming to himself the conquests of his predecessors. The name Israel is written so as unmistakably to indicate a people, not, like the other names, a locality. Further, the words used of its condition imply devastation and the destruction of crops. The obvious and only safe conclusions to be drawn from these facts are that Israel, or a part of that people, was already in some part of Syria, and had been in hostile contact with Egypt. On the assumption that 'Pithom and Raamses' were built for Ramses II., whose long reign answered the requirements of Ex ii. 23, the Pharaoh of the Exodus has been identified as *Mrnptḥ*;[*] though, owing to the supposed more appropriate political conditions, others would place the Exodus 30 or 40 years later, about the time of *Stnḫt*.

If we assume that by the reign of *Mrnptḥ* the Exodus had already been accomplished,—the name *Isrw* is found in the previous reigns in the territory of the tribe of Asher,—we have an argument for the proposed identification of the Hebrews with the Khabiri, of whose invasion of Palestine, some 150 years earlier, the Amarna letters say so much, and whom it is proposed to identify with the *Š'sw* chastised by Sethos I.[†] The story of the priest Osarsiph (?=Osiris+*x*) and the impious lepers, whose revolt he led, converted by Josephus into a history of Moses and the Hebrew struggle for freedom, has been with some probability referred rather to a reminiscence of the expulsion of the heretics of Amenophis IV.[‡] The name Hebrews has not been met with in Egyptian texts. That of the foreign tribe of *'prw*, found variously employed throughout the 19th Dynasty, is rarely now held to represent it, and may be merely a form of a familiar Egyptian term for 'workmen.' The Egyptian names given to Joseph, his wife, and father-in-law in Gn xli. 45 have received various inadmissible interpretations. The only transcriptions which conform to Egyptian grammar and usage are (1) *Jephnoute'fônch*, 'God speaks (and) he lives'; (2) [*N*]*asneith*, 'devoted to (the goddess) Neith'; (3) *Pedephrê*, 'he whom the sun-god gives.' All three names are cast in forms increasingly frequent from the time of the 22nd Dynasty onwards, but practically unknown earlier—except, indeed, the second; and this fact agrees with the date (8th cent.) to which the document E is assigned.[§] For a difficult word used in the story of Joseph, אַבְרֵךְ Gn xli. 43, a parallel expression has been noticed in a text of the 21st Dynasty, where the words *ib rk* seem to form an interjection, '*Give heed!*' or the like.[‖]

x. RELIGION.—Our sources of information on this subject are very numerous, but at the same time very inadequate. Egyptian texts not bearing, even indirectly, upon some aspect of the religion are in an extremely small minority; yet some primary questions remain unsolved for lack of explanatory documents. Since it is wholly owing to the supreme importance attached to the preparation for a future life that Egyptian antiquity has come again within our reach, it is natural that the side of religious life upon which we are best informed should be that dealing with the dead. Of the everyday religion of the people we know practically nothing. We have the names of many deities, and can enumerate their functions, attributes, and temples; but we are quite ignorant as to the way in which they were worshipped. It has been mentioned that Hommel is eager to demonstrate a Babylonian origin for the civilization of Egypt. One of his chief contentions is that some of the principal Egyptian deities can be proved identical with those of Babylon, from the identity of their attributes, distinctive animals, legends, etc. It is, however, as yet in many cases impossible to recognize what were the original rôles and functions of the Egyptian gods, and it seems more probable that, should a prehistoric immigration from Mesopotamia ever be demonstrated, the invaders will be found to have at most adopted certain of the native divinities and combined them with corresponding figures from their own Pantheon.

No religious document of the earlier ages compares in importance with the great body of texts —some 4000 lines—collected and copied on the interiors of the 5th and 6th Dynasty Pyramids, but in partial use, too, in all succeeding ages. Some of the documents thus brought together belong undoubtedly to a far earlier period, and give evidence that the official religion was even then completely developed, many of the gods having already the rôles by which they are characterized throughout history, and several of the most popular myths—notably that of Osiris — being referred to as already current. Certain of the gods are conspicuously absent from the Pyramid texts; Amon, for example, who being originally but the local god of Thebes, remained obscure until his city rose (Dyn. 11) to political importance.

Indeed the local divinities as such play a remarkably small part in these texts. Yet the local cults were the real basis of the popular religion, which did not, so far as we can see, recognize any single unifying element before the various tribal districts had been united under the first historic Dynasties. The nomes (see above) corresponded to independent cults, each centred in the shrine of the local god, who revealed himself to his worshippers in an animal, tree, or other material object — perhaps once the tribal totem. One aspect of the advance from this primitive stage of fetish worship can be seen in the semi-human and finally completely human representations of certain of the gods in art. Yet the sacred animal was revered side by side with the anthropomorphic god, receiving, as we know, much honour even in Greek and Roman times.

Beyond the famous story of Osiris and many otherwise unknown legends, the Pyramids contain countless allusions to that cycle of myths which subsequently produced the doctrines of the other great school of theology. For as Abydos appears very early—though probably not originally—as the home of the Osirian legend and of the all-important views of future life and retribution attached to it, so does Heliopolis (Ὦν, אֹן) become the centre of the solar theology represented by the myth of Re‘, the sun-god, and his daily contest with the dragon of darkness.

A number of the gods—many merely local deities once—had been gradually drawn within the cycles of Osiris or of Re‘. The chief actors in the former story are, besides Osiris himself (whose original locality and character are very obscure), his brother Sêt-Typhon, regarded now as the impersonation of darkness (when Osiris is a solar god), now as the god of the barren desert (when Osiris is the fruitful river-valley); Isis, wife of Osiris, a goddess (from the Delta or Philæ) of merely mythological importance until the base epochs; Horus, his son and avenger, a puzzling figure owing to the variety of his local forms; and Thouth, the god of Hermopolis, the ally of Horus.

The myths of the sun-god are concerned either with the phases of the sun's daily and also supposed nightly, invisible journeys, or with cosmic phenomena. In the former, Horus again plays a part, now as the son of Re‘; in the latter, local divinities such as *Itm* (Tum) of Heliopolis, or elemental gods, as *Ḳb*, *Nwt*, *Šw*, *Tfnwt*, are introduced. Cosmic speculations produced a variety of myths. In one heaven and earth are female and male; in another the sky is a cow with spotted hide (the stars); another held the earth to be a box, with the sky for its raised lid, supported on the encircling hills or on four tree-stems. The gods and goddesses associated with Re‘ are 9 in number (Ennead), and are regarded as a related family, just as later theology grouped several of the local deities into family 'triads.'

Not all cosmic doctrines, however, were concerned with the Heliopolitan gods; various local gods had once been regarded as creators, *e.g.* *Ḫnmw*-Chnoubis who, in the clay districts near the Cataracts, had formed the world upon a potter's wheel; and Ptah of Memphis was a similar artisan god.

Other and very ancient divinities were the local earth and harvest gods, *e.g.* Mîn of Coptos and (perhaps) Amon of Thebes. Others, again, were water deities, *e.g.* *Sbk*-Souchos of the Fayyûm and Ombos—for the same god is frequently met with in several localities, though originally proper, no doubt, to but one of them. Several were guardians of the local cemeteries, *e.g.* Sokaris at Memphis, Anubis at Siut, 'The Lord of those in the West' at Abydos.

The doctrines and practices of which the Osirian legend was at once the pattern and consequence are chiefly to be studied—beyond very numerous passages in the Pyramid texts — in the great heterogeneous collection of incantations known to us as the 'Book of the Dead,' but to the Egyptians probably as ('the Book of) coming out from (*i.e.* departing from) the Day and from the Necropolis.' The work is composed of texts ('chapters'), some as ancient as those of the Pyramids, others much later, and was intended as a guide through the various difficulties, and a magical protection against the enemies to be encountered by the dead, with whom a copy of it was buried. Some of the texts seem to be remnants of primitive rituals, but all had been by the time of their definite collection (beginning of the New Kingdom) edited for the use of the dead himself. It is this more than once repeated editing which has rendered the Book for the most part unintelligible to us. It may be asserted that none of the older chapters are now available in their first simplicity. The oldest MSS (Dyn. 12, 13) already show the glosses of more than one redactor, and each successive gloss seems but to obscure the original text.

Several totally divergent views, Solar and Osirian, as to the future life are represented in the work. The soul is, according to some chapters, to take the form of a bird and quit the tomb, and may accompany the sun bark on its heavenly journey; elsewhere it is regarded as appearing before Osiris, and, after the famous 'negative confession,' receiving merited justice. If judged 'of true voice,' *i.e.* correctly pronouncing the potent magic formulæ, the deceased proceeds to the 'Fields of *I'rw*,' and spends eternity in a very materialistic paradise, conceived upon the model of rural life in Egypt.

The elements in man which survived death were four: *b'* soul, *iḫw* spirit (?), *ḫ'ybt* shadow, and *k'* double. What were intended by the first three of these it is difficult to say; the fourth is that of which we hear most; for its maintenance was the object of all the funerary rites which from the earliest times occupied so much attention among all classes. The double, in appearance the exact counterpart of the man, after accompanying him through life, lived on in the tomb so long as the corpse remained intact, and the piety of the survivors provided sufficient nourishment. Hence the processes of mummification, the inscriptions whose magic could, if supplies failed, call up food, the portrait-statues into which the double could enter.

Certain of the Pyramid texts and recent excavations do indeed recall an age in which funerary practices differed much from those of historic times — an age in which cannibalism and human sacrifice were not extinct, and in which all but the most rudimentary embalmment was unknown.

Confusion of doctrines is not characteristic of the funerary literature alone; it is common to all aspects of the Egyptian religion. The priestly tendency, discernible from the first Theban supremacy onwards, to assimilate all secondary deities to those at the head of the Pantheon, and, finally, to teach that all were but manifestations of the supreme deity (*i.e.* the sun-god), introduced, indeed, a kind of order, though for us the course of the foregoing development is thereby but obscured. The supremacy of the Theban Amon, assimilated in the first place to the sun-god, led to his identification with such a host of other deities, while the wealth and power of his priests became so threatening a danger to the state, that Amenophis IV., urged perhaps by the ancient hierarchy of Heliopolis, was tempted to a reform which should replace as the state religion the worship of Amon and his associated divinities by that of the sun's orb, *itn*, alone. This is the only conscious movement towards monotheism recorded in the religious history of Egypt. It is not necessary to seek in it the reflexion of some of the foreign influences of the time; the *itn* was a recognized aspect of the sun-god in Egypt in previous periods. The reformed doctrine contained conceptions far more lofty and enlightened than those of the ancient religion; yet it had but an ephemeral success, and became extinct shortly after the reforming king's death.

LITERATURE.—(*A*) GENERAL:—*Descript. de l'Égypte*, a colossal publication, the result of the Napoleonic expedition, containing monographs upon many branches of Egyptology, ancient and modern (1809 and 1817); Wilkinson, *Mann. and Cust.*, ed. Birch (1878); Erman, *Ægypten u. Ægypt. Leben* (1885 ff.), supersedes in most respects the foregoing work; Ebers, *Cicerone* (1886); *Baedeker*, by Steindorff (1897). (*B*) LAND:—On Geology, Zittel, in *Baedeker, Unterägypten*^{2} by Ebers (1885); first part of De Morgan, *Rechs. s. les Origines de l'Ég.* (1896); chaps. in Fl. Petrie, *Ten Years' Digging*, *History I.* and in *Ninth Or. Congr.* (1893). On Metals, Lepsius, *Die Metalle* (1872), and articles by Montelius, M. Berthelot, etc. (*C*) FAUNA AND FLORA:—The respective chapters in *Baedeker* (1885 and 1897); articles by V. Loret in *Rec. de Trav.* (Paris); chapters of the works under *A* (above).—(*D*) ETHNOLOGY:—J. de Morgan, *Rechs. s. les Origines* (1896); Sergi, *Anthrop. de la Stirpe Camitica* (1897); R. Hartmann, *Völker Afrikas* (1879); Amélineau, *Nouv. fouil. d'Abydos* (1896); articles by Virchow; chapters by Schweinfurth in *Baedeker*; chapters in the works of Erman, Maspero, Ed. Meyer, Petrie. (*E*) LANGUAGE:—Erman, *Ægypt. Gram.* (1894), esp. for classical periods; do. *Neuäg. Gram.* (1880), for the New Kingdom; Brugsch, *Gram. démotique* (1855), works and articles by Revillout, Krall, W. Max Müller, J. J. Hess, for language of Saite and following epochs; G. Steindorff, *Kopt. Gram.* (1894), for language of Christian epoch; Dictionary, Brugsch, *Dict. hiérogl.* (1867 ff.). For Semitic affinities, Erman in *ZDMG* xlvi.; Bondi, *Dem Hebr. Sprachzw. angeh. Lehnwörter* (1886); Hommel in *Beitr. z. Assyr.* ii., and in *Ninth Or. Congr.* (1893, cf. Brünnow in *Z. Ass.* viii.). For African affinities, Prætorius *Beitr. z. Assyr.* ii. (*F*) PROFANE LITERATURE:—Chapters in the works of Erman, Maspero; Maspero, *Contes pops.* (1889); Petrie, *Egyp. Tales* (1895); Amélineau, *Contes de l'Eg. chrét.* (1888). (*G*) CHRONOLOGY:—Lepsius, *Königsbuch* (1858); Brugsch-Bouriant, *Livre des Rois* (1887); Wislicenus, *Astron. Chronol.* (1895); articles by Mahler in *Æg. Z.* xxvii. xxviii. xxxii., and *Der Pharao d. Exod.* (1896); articles by Petrie and chapters in his *History*; C. Torr, *Memphis and Mycenæ* (1896, cf. Myres in *Class. Rev.* 1897); for Manetho, Unger, *Chronol. d. Man.* (1867). (*H*) HISTORY:—Maspero, *Hist. anc. d. peup. de l'Or. class.* (2 vols. 1895–96, transl. *SPCK*); Ed. Meyer, *Gesch. d. Altert.* i. ii. (1884, 1893); do. *Gesch. d. Alt. Æg.* (1887); Erman, *Ægypten* (*passim*); Petrie, *Hist. of Eg.* i. ii. (1894, 1896); Wiedemann, *Ægypt. Gesch.* (1884 ff.); do. *Gesch. v. Altäg.* (1891), with special ref. to OT; Mahaffy, *Emp. of Ptols.* (1895). For Herodotus, Wiedemann, *Herod.'s 2. Buch* (1890). Hist. Geography, Dümichen, *Geogr. d. Alt. Æg.* (1878). (*J*) RELATIONS WITH ASIA:—W. Max Müller, *Asien u. Europa* (1893, cf. Jensen in *Z. Ass.* x.). For relations with OT, Ebers, *Æg. u. Büch. Mose's* (1868); do. *Durch Gosen z. Sinai* (1872); C. Niebuhr, *Gesch. d. Ebr. Zeitalters* (1894); Sayce, *Patr. Palestine* (1895); Ed. Meyer in *Festschr. f. Ebers* (1897). (*K*) RELIGION:—Erman's *Ægypten*; Maspero's and Meyer's Histories (*passim*); Maspero, *Éts. de Mythol.* (1893), the most important work on the subject; do. *Pyramides de Saqqarah* (1894 = *Rec. de Trav.* iii.–xiv.), with transl.; Le P. Renouf, *The Book of the Dead*, transl. (*PSBA* xiv. ff.); Lange in C. de la Saussaye, *Lehrb.*^{2} (1897), an excellent summary. (*L*) ART:—Perrot-Chipiez, *Hist. de l'Art*, i. (1882); Maspero, *L'Archéologie ég.* (1887); chapters in Erman's *Ægypten*, Maspero's *Histoire*. (*M*) PUBLISHED MONUMENTS, ETC.:—The chief collections are those of Champollion, Rosellini, Lepsius, Sharpe, Prisse, de Rougé, Mariette, the *Mission franç. au Caire*, *Eg. Explor. Fund*, the Leyden Museum. Catalogues of the museums of Gizeh-Boulak (Maspero), Berlin (Erman), Louvre (de Rougé, Pierret, Devéria), Florence (Schiaparelli), Turin (Rossi, Lanzone), St. Petersburg (Golénischeff). Further, the works of Fl. Petrie; de Morgan, etc., *Catal. de Mons. et Inscrs.* (1894 ff.); do. *Dahshour* (1895); Translations in *Records of the Past* (first and second series). (*N*) PERIODICALS:—*Zeitschr. f. äg. Spr.* (Leipz.); *Rec. de trav. rel. à la phil. ég. et ass.* (Paris); *PSBA* (Lond.); *Sphinx* (Upsala, Leipz.).

W. E. CRUM.

EGYPT, RIVER OF, occurs repeatedly in AV (Nu 34^5, Jos $15^{4.47}$, 1 K 8^{65}, 2 K 24^7, 2 Ch 7^8, Is 27^{12}) as tr^n of נַחַל מִצְרַיִם (ποταμὸς Αἰγύπτου, Jth 1^9). The term is used to designate not the Nile, whose common title is יְאֹר, and which cd. never be called נַחַל, the latter word being the exact equivalent of the modern *wady*. (See BROOK.) In all the above OT passages (cf. also Ezk 47^{19} 48^{28}) RV substitutes 'brook' for 'river,' but inconsistently retains 'river' in Jth 1^9. The stream referred to is the *Wady el-'Arîsh*, which flows through the northern portion of the Sinaitic peninsula, draining into itself the waters of many other wadies, and flows into the Mediterranean midway between Pelusium and Gaza (Maspero, *Dawn of Civilization*, 348). It derives its name from the village *el-'Arîsh* (the ancient *Rhinocolura*, Diodor. i. 60), situated near its mouth. The 'river of Egypt' is repeatedly specified in OT as the S.W. boundary of Canaan. The same stream is called *naḥal Muẓur* by the Assyrian king Esarhaddon, who apparently means to distinguish it from the Nile by adding *ashar naru lâ ishu*, 'where no river is,' *i.e.* no continuous stream (Hommel, *Anc. Heb. Trad.* 257).

Once in OT (Gn 15^{18}) the 'river of Egypt' (נְהַר מִצְ׳, not נַחַל) means the Nile if MT is correct, but we shd. probably emend to נַחַל (so Lagarde, followed by Ball in Haupt's *OT*). *Shiḥôr*, which elsewhere (Is 23^3, Jer 2^{18}) is applied to the Nile, appears to be a designation of the *Wady el-'Arîsh* in Jos 13^3, 'Shihor (RV 'the Shihor') which is before Egypt,' and 1 Ch 13^5 (cf. 1 K 8^{65}), 'from Shihor of Egypt (RV 'Shihor *the brook* of Egypt') even unto the entering in of Hamath.' (So Del. on Gn 15^{18} and Hommel, *Anc. Heb. Trad.* 242 f., although Frd. Delitzsch and Dillmann prefer to understand it of the most easterly arm of the Nile.)

J. A. SELBIE.

EGYPTIAN, THE (ὁ Αἰγύπτιος).—In Ac 21^{38} Claudius Lysias the chief captain (Chiliarch) is represented as saying to St. Paul, 'Art thou not then the Egyptian, which before these days stirred up to sedition and led out into the wilderness the four thousand men of the Assassins?'

This E. is mentioned by Josephus in both his works. While describing the procuratorship of Felix, he mentions the Sicarii or ASSASSINS, then in distinction to these the religious impostors, then a certain Egyptian. The latter professed to be a prophet, and collected together a body of 30,000 persons, whom he led to the Mount of Olives, asserting that the wall of Jerus. would fall down before him, and that he could capture the city. Felix attacked him with a considerable force, and dispersed his followers, slaying 400, and taking prisoner 200. The Egyptian himself escaped.

Krenkel, following Holtzmann, Hausrath, Keim, and the author of *Supernatural Religion*, attempts to show that the author of the Acts is indebted to Josephus for his knowledge of this event. He is quite unsuccessful. There are no signs of literary obligation, and very definite discrepancies. Josephus gives different numbers; he does not definitely connect the Egyptian with the Sicarii, but rather contrasts him; and he does not represent the wilderness as the place to which the people were led, but the Mount of Olives. It may be quite possible to explain these discrepancies so as to save the historical accuracy of both writers, but they are fatal to our regarding Josephus as the source of information. The only reasonable opinion that can be held is that we have two independent and contemporary accounts of the same event, and that the resemblances arise from this fact.

LITERATURE.—Jos. *Ant.* xx. viii. 6; *BJ* II. xiii. 5; Schürer, *HJP* I. ii. 180; Krenkel, *Josephus und Lucas*, p. 240.

A. C. HEADLAM.

EGYPTIAN VERSIONS.—The various Egyptian dialects and the Versions contained in them are a subject of so much confusion that it will be well for the sake of distinctness to deal in this article first with the Dialects and their proximate dates, and then with the extant remains of the Versions and their proximate dates. We will conclude with a short study of the Greek Text implied by the Versions, and the history of the criticism of them.

1. DIALECTS OF COPTIC.—The latest stage of the Egyptian language, and that which was spoken in Christian times, is now known by the name of Coptic. The word itself comes from a corruption of the Greek Αἴγυπτος. Coptic was written in Greek characters, with the addition of some extra letters representing sounds which could only imperfectly be expressed by the Greek alphabet. These letters were modifications of characters found in Demotic—the popular form of the old Egyptian language spoken in the centuries immediately before the Christian era. Although it is still used in the services of the Church, Coptic is now practically a dead language. Our knowledge, therefore, of it must be derived from manuscripts and inscriptions. When these began to be studied by European scholars, it soon became evident that the language as spoken in different parts of the country presented certain dialectical peculiarities. Not only was it early recognized that the dialect used in the North differed considerably from that used in the South, but a third dialect was also detected, which, as a general rule, resembled the southern: it had, however, many northern forms, and sometimes showed peculiarities of its own. A long controversy, lasting for more than a century, was waged over the district to which this third dialect was to be assigned. The attention of Coptic scholars was early directed to a noteworthy passage from Athanasius, a bishop of Kos in the Thebaid, who flourished in the 11th century. In his Arabic-Coptic Grammar, Athanasius says: 'Know that the Coptic language is divided into three branches. One of them is the Coptic of Misr, which is the Sahidic; and another is the Bohairic Coptic, which gets its name from El-Bohaira;[α] and the other is the Bushmuric Coptic, which is used in the country of El-Bushmur, as thou knowest. But those now in use are only the Bohairic Coptic and the Sahidic. And the origin of them is one language.'[β] Here we have a mention of three dialects — Sahidic, Bohairic, and Bushmuric. The first two are, as Quatremère pointed out,[α] clearly the same as those sometimes called Thebaic and Memphitic. But what was the last? Was it to be identified with the third dialect known to us? Or was it the name of a still unknown dialect? Before this question could be answered, the position of Bushmur had to be determined. Quatremère proved that it could not be placed in the South of Egypt, nor in the Oasis and neighbouring deserts, but that it must be situated in the North.[β] It is the country in the east of the Delta bordering on the sea.[γ] Quatremère was of opinion that our third dialect had no connexion with Bushmuric, of which we had only a single word preserved to us.[δ] But if it was not Bushmuric, how came it not to be mentioned by Athanasius? Quatremère answered the question by supposing that it was in use not exactly in Egypt, but in a country close by—the great and little Oases, 'which, situated at a little distance from Egypt, stretch from north to south, from the parallel of Assouan as far as the frontier of the Fayûm.'[ε] Since Quatremère's time a large number of fragments have come to light which prove that he was right in refusing to call the dialect Bushmuric. Whether or not it was spoken in the southern Oasis, we now know for certain that it was used in the neighbourhood of the Fayûm and Memphis; and a study of Middle Egyptian shows us that the reason why Athanasius did not mention it may have been that he did not regard it as a separate dialect. This third dialect, lying as it does geographically and linguistically between Sahidic and Bohairic,[ζ] may conveniently be termed Middle Egyptian. When we come to examine it more carefully, we are confronted with fresh difficulties. Whilst Sahidic and Bohairic are for the most part clearly defined and regular dialects, Middle Egyptian presents us with an almost bewildering number of alternative forms. When spoken in the Nile Valley the dialect is a kind of mixture between Sahidic and Bohairic. But in some of the fragments which come from the Fayûm—a district some distance to the west—the dialect has developed more decided peculiarities of its own. It is dangerous, however, to draw any hard-and-fast distinction between the forms of the language current in the two places; for at a later date the dialect used in the Fayûm bore a considerable resemblance to that used at one time in Memphis.[η] Many of the other varieties are no doubt due to ignorance or indifference on the part of scribes, some of whom in the Fayûm belonged to the peasant and artisan class.[θ] Such an explanation does not, however, cover the case of some fragments recently found in Akhmîm and in the Fayûm, which present further dialectical peculiarities unknown to us before. Stern has carefully examined the dialect of these fragments, and has shown good reason to believe that it presents us with an earlier form of Middle Egyptian, closely allied to the dialect found in fragments written at Memphis.[ι]

We may sum up these results as follows:—

Sahidic=Dialect of Southern (or Upper) Egypt: sometimes called 'Thebaic.'

[α] *I.e.* the district south of Alexandria.

[β] The original of the passage is given in Quatremère, *Recherches sur la Langue et la Littérature de l'Égypte* (Paris, 1808), p. 21.

[α] Quatremère, *op. cit.* p. 22.

[β] *Ib.* p. 147 ff.

[δ] Quatremère, *op. cit.* p. 214.

[ε] *Ib.* p. 217.

[ζ] Sometimes it very closely resembles Bohairic. See the dialect of the Fragment of the Song of Moses given by Crum, *Coptic MSS brought from the Fayyum*, p. 12 ff.

[η] Cf. the dialect of the Fayûm fragment published by Quatremère, *op. cit.* p. 248 ff., with the dialect of those edited by Revillout, *Papyrus Coptes* (Paris, 1876), p. 101 ff.

[θ] See Krall, *Mittheilungen aus der Sammlung der Papyrus Erzherzog Rainer* (Vienna, 1887), i. p. 65.

[ι] *Zeitschrift für Ägyptische Sprache*, 1886, p. 129 ff.

Middle Egyptian = Dialect of (*a*) Memphis and neighbourhood, and (*b*) the Fayûm.

Bohairic = Dialect of district south of Alexandria: sometimes called 'Memphitic' (or 'Coptic').

2. Relative Dates of Dialects.—The Arabic historian Macrizi, who flourished at the beginning of the 15th century, speaks of Sahidic as 'the primitive source of the Coptic language, and that from which is derived the Bohairic dialect.'[α] Such evidence as there is confirms his statement as to the late date of Bohairic. Bohairic (which was originally confined to the district south of Alexandria) is the most literary and artificial of Coptic dialects. The form of many of its words, when compared with the corresponding Sahidic, points to a later stage of development. Its frequent use of connecting particles, reminding us of Greek rather than Egyptian, seems also to point in the same direction. It was most probably developed from Middle Egyptian, which at one time may possibly have been spoken in the neighbourhood of Alexandria itself.[β] To what extent it was used for other than ecclesiastical purposes we have at present no means of ascertaining.[γ] But if it was in the main a literary rather than a popular language, this fact would explain why it died out, except for ecclesiastical purposes, earlier than Middle Egyptian and Sahidic.[δ] There is, on the contrary, no doubt that the last-named dialects were the language of the people. We have numerous fragments of letters in Middle Egyptian and remains of school-books in Sahidic.[ε] The line of demarcation between the two dialects was not sharp, and sometimes pieces of writing are found in which single sentences are almost entirely written in Sahidic, whilst others are almost entirely in Middle Egyptian.[ζ] Thus, whilst we find Sahidic forms in use in documents written in the neighbourhood of Hermopolis Magna and Antinoe,[η] we have evidence that as far south as Thebes pure Sahidic was not always written.[θ] When Middle Egyptian and Sahidic began to be written we do not know. As far as the evidence of documents is concerned, we have fragments in Middle Egyptian (earlier and later) and Sahidic, some of which take us back to the 4th or 5th centuries.[α] But as early as the 2nd century efforts were made to write Egyptian in characters not unlike our present Coptic ones.[β]

3. Extant Remains of Versions.—We have remains of biblical versions in all three dialects; but a considerable portion of the Sahidic has disappeared, whilst only very short fragments of the Middle Egyptian are extant. A useful list of MSS containing portions of the Coptic Bible has been given by M. Hyvernat in the *Revue Biblique Internationale* for 1896, No. 4, p. 540 ff. We shall here confine ourselves to editions of the versions.

(*a*) *Sahidic.*—The fullest collections of extant fragments of the version of the NT are those published by Woide[γ] and Amélineau.[δ] Some fragments of the Apocalypse have recently been brought together by Goussen.[ε] A complete collection, together with a translation, is urgently needed. The best collections of the remains of the OT have been made by Ciasca,[ζ] Maspero,[η] and Lagarde.[θ] Quotations from the Sahidic Bible are found in the 'Pistis Sophia,'[ι] and other Sahidic books. The Psalms quoted in the former work resemble the Sahidic version. In fact, as a general rule citations in either the Bohairic or Sahidic dialect agree with the version of the Bible current in that dialect.[κ] Other collections of fragments of the Sahidic Bible are described in the *Revue Biblique Internationale*, 1897, No. 1, pp. 55–62.

(*b*) *Middle Egyptian.*—That there was a separate Middle Egyptian recension of part, at least, of the Bible is proved by the text of some of the NT fragments published by Zoega[λ] and Maspero.[μ] These are written in the dialect as spoken in the Fayûm, and sometimes in text and translation differ considerably from the corresponding Sahidic and Bohairic. How far all the biblical fragments extant in Middle Egyptian really constitute a separate version, we shall be able to judge with greater certainty when more fragments have been discovered, and when the Sahidic NT has been edited. Meanwhile, it is unsafe to conclude that a fragment written in this dialect necessarily presents a distinct recension. It may give, with merely dialectical changes, exactly the same version as the Sahidic.[ν] We shall here simply state where specimens of the Bible written in Middle Egyptian may be found, without venturing to determine whether they are parts of a single version. Besides the fragments already alluded to,[ξ] Bouriant has published two Gospel fragments, together with a

---

[α] Quatremère, *op. cit.* p. 42.

[β] See the interesting fragment published by Krall, at the end of an art. "über die Anfänge der Koptischen Schrift," *op. cit.* i. p. 112, where an Alexandrian in signing his name makes use of the Fayûmic dialect. Too much stress, however, must not be laid on this passage; for, as Mommsen points out, 'the belonging to' an Egyptian district 'was independent of dwelling-place, and hereditary. The Egyptian from the Chemmitic nome belonged to it with his dependents, just as much when he had his abode in Alexandria as the Alexandrian dwelling in Chemmis belonged to the burgess-body of Alexandria' (Mommsen, *The Provinces of the Roman Empire*, c. xii. Eng. trans. p. 235). The arguments put forward in that article in favour of an early date for the Bohairic dialect (see also Headlam in Scrivener's *Introduction to NT*^{4}, ii. 126 f., and Hyvernat, *Revue Biblique*, 1897, No. 1, p. 67) are valueless. (1) The abbreviations found in Coptic MSS for 'God' and 'Lord' need not have originated in Bohairic. If they occurred (and they never do, as far as I know) in MSS written in pure Sahidic, they might as easily have been taken from M.E. as from Bohairic. Indeed an abbreviation of 'Lord,' which is almost exactly the same as the one in common use in Bohairic, is found in a M.E. MS, which 'in its writing,' says Krall (p. 110 f.), 'reminds us of the Codex Sinaiticus.' (2) Even if Krall's hypothesis of the origin of the last letter of the Coptic alphabet were satisfactory, it does not prove his point. The contraction might have arisen in M.E. as easily as in Bohairic. But most probably his hypothesis is wrong, and the letter is derived from Demotic (see Steindorff, *Koptische Grammatik*, § 4).

[γ] Attempts to use Bohairic for letter-writing, using throughout Greek characters, are given by Krall, *op. cit.* ii.–iii. p. 56, v. 41; Crum, *op. cit.* p. 59 f. Unfortunately, as Krall says, 'the geographical and climatic conditions of the Delta are not favourable to the preservation of papyrus.' We cannot therefore be certain of the exact dialect which the hermits near Lake Menzaleh spoke, when Cassian visited them at the end of the 4th century. It may have been a form of M.E. or Bohairic. We gather from Cassian (*Coll.* xi. 3, xvi. 1; Migne, *P.L.* xlix. 850, 1011) that some of them did not know Greek.

[μ] *Recueil de Travaux relatifs à la Phil. et à l'Arch. Égypt. et Assyr.* (1889), xi. p. 116.

[ν] Cf. the translation in old M.E. of Jude 17·19 with the corresponding Sahidic. See Crum, *op. cit.* p. 4.

[ξ] Zoega publishes the first half of 1 Th and part of the following chapters: Is 1. 5, Jn 4, 1 Co 6–9. 14. 15, Eph 6, Ph 1. 2, He 5–10 (Engelbreth gives the same). 1 Co 9. 10–15 had already been edited by Giorgi (*Fragmentum Evangelii S. Johannis*, etc., Rome, 1789, p. 55 ff.), and Münter (*Commentatio* small portion of Isaiah, the end of 2 Co and the beginning of Hebrews.[α] A single verse from Jon 2 will be found in Tuki;[β] the last part of La and most of the Epistle of Jer. (with Latin translations) in Quatremère.[γ] Crum has given a few verses from Mt 11. 12,[δ] and Krall some verses of Ro 11. 12.[ε] Besides these, Von Lemm has made another short collection of fragments in this dialect.[ζ] To this list must be added some interesting biblical remains written in Old Middle Egyptian.[η] Small portions of Exodus, Sirach, and 2 Mac are published by Bouriant.[θ] We have an incomplete MS of the Minor Prophets, from which Krall has published specimen verses,[ι] briefly enumerating the contents of the rest, which he will shortly publish.[κ] Part of the same MS has recently been edited by Bouriant.[λ] The NT fragments published by Crum[μ] are unfortunately very minute. Jude$^{17-20}$ and part of Ja 4$^{12.13}$ alone survive.

(c) *Bohairic.*—The best edition of the Gospels is that of Schwartze,[ν] and of the Acts and Epistles, that of Lagarde.[ξ] The NT as a whole has never been satisfactorily edited. A serviceable edition was made by Wilkins, but the Latin translation which it contains is unsatisfactory.[ο] A new edition of the Gospels is being prepared for the Clarendon Press by G. Horner. The Pentateuch was first published by Wilkins (with a translation),[π] and then more carefully by Lagarde.[ρ] Tattam has edited and translated (but uncritically) the Major and Minor Prophets and the Book of Job.[σ] The best editions of the Psalms have been made by Schwartze[τ] and Lagarde,[υ] the latter edition being unfortunately printed in Latin characters. F. Rossi has lately edited a MS containing part of the Psalter.[φ] Only small portions of the rest of the OT have been printed. For a list of these portions and of editions not mentioned here, see Hyvernat, *op. cit.* 1897, No 1, p. 48 ff.

4. DATE OF VERSIONS.—The earliest evidence for the existence of a Coptic version is usually said to be afforded by the Life of St. Antony, commonly attributed to St. Athanasius. We are there told that he was an Egyptian, that his parents were Christians, and that as a child he went with them to church, and 'gave attendance to the readings' (*i.e.* from the Scriptures).[α] When about 20 years of age 'he went into the church, and it happened that the Gospel was then being read.'[β] He heard a text which influenced him profoundly. On other occasions, also, he heard passages read, and 'he gave such attendance to the reading that none of those things which were written fell from him to the ground, but he retained all, and thereafter his memory served him for books.'[γ] From these passages it has been argued that, since we further know that St. Antony as a boy refused to learn letters,[δ] and was unable throughout life to speak Greek,[ε] there must have been in his boyhood a translation of the Scriptures in the Egyptian tongue. This, it is maintained, is confirmed by other passages in his Life, especially by the discourse which begins at c. xvi. We are there told that he spoke to the monks in the Egyptian tongue, saying, 'The Scriptures are sufficient for teaching; but it is good for us to exhort one another in the faith, and encourage with words.'[ζ] In the discourse which follows there are quotations from, or allusions to, texts from various parts of the Bible. Since Antony, shortly before his death in A.D. 356, said, 'I am well-nigh one hundred and five years old,'[η] he must have been born about A.D. 250. Therefore there must have been a translation of the Bible into Egyptian about the middle of the 3rd century. But such reasoning is not conclusive. This Life never speaks of Antony as reading the Bible. He only hears it read. The Coptic translation which he heard might well have been made at the time by an interpreter. The need of a written translation in the services of the Church would not at once be felt.[θ] The Gospel would first be read in Greek, and then the Greek would be rendered into Coptic,[ι] as at a later date the Coptic was rendered into Arabic by 'anyone who had the gift of speaking, so that he could interpret aright.'[κ] In so far as Antony was in the habit of repeating texts in his discourses, he was enabled to do so by his remarkable memory. For we have no reason to suppose that he had a Bible of his own. But the speeches put into the mouth of the hermit cannot be used as evidence in such a case. For, even if we admit the historical character of the biography, it does not in the least follow that the discourses are verbatim reports.[λ] On the authority, therefore, of this Life alone it is unsafe to base any conclusion as to the existence of a Coptic version of the Bible in the 3rd century.

There is, however, good ground for believing that a version existed in the 4th cent. It was at the beginning of this century that St. Pachomius first gathered solitary ascetics together in the south of Egypt under a common rule. If we may trust the

[λ] *E.g.* the discourse in chapter 74. Robertson, who believes in the genuineness of the Life, admits that 'even an Athanasius would not so entirely rise out of the biographical habits of his day as to mingle nothing of his own with the speeches of his hero' ('Athanasius' in *Nicene and Post-Nicene Fathers*, p. 191).

accounts given in his Life, he himself spoke Egyptian, and only acquired Greek in later years.[α] His monks as a rule were common Egyptian peasants, who knew no language but their own. The Greeks and Romans of his settlement were in a separate house, presided over by Theodore of Alexandria.[β] Yet throughout his Life great stress is laid on the study of the Bible, and there are frequent allusions to learning passages by heart.[γ] Pachomius himself was in the habit of speaking from the Scriptures to his monks.[δ] When a novice first came, according to the rules of the monastery extant in Greek, he began by receiving 'the Prayer of the Gospel' (τὴν εὐχὴν τοῦ εὐαγγελίου) and learning certain Psalms.[ε] Unless our accounts of Pachomius' life and work are most misleading, we can scarcely doubt that there was, early in the 4th cent., a Coptic version of the Bible. The attempt to trace the translation further back is beset with difficulties. We know very little concerning Christianity in Upper Egypt before the time of Pachomius. Eusebius indeed tells us that in the persecution under Severus (A.D. 202), which was especially felt at Alexandria, martyrs were brought to that city from 'Egypt and all the Thebaid.'[ζ] But no such tradition survives in Coptic literature. We have no evidence that in early days the Alexandrian Church seriously attempted missionary work. If the Alexandrians had wished to do so, it would have been no easy task. For they were regarded as foreigners by the rest of Egypt;[η] and their position was not unlike that which Englishmen occupy in India to-day.[θ] Besides the difficulty of the language,[ι] they found it, as Origen says, no easy task to persuade an Egyptian to give up idolatry and 'despise those things which he had received from his fathers.'[κ] Heathen worship down to a late time 'retained its firmest stronghold in the pious land of Egypt.'[λ] The increase of the Episcopate under Demetrius (*c.* 189–232 A.D.), and more especially under his successor Heraclas (*c.* 233–248 A.D.), must indeed be regarded as an indication of missionary activity.[μ] If Christianity in the time of Demetrius had spread as far south as Antinoe,[ν] the Church was evidently becoming too large for the personal supervision of a single bishop at Alexandria.

The bishop who succeeded Heraclas—Dionysius the Great—has given in his letters a vivid picture of the Alexandrian Church of his time, but has told us little of the rest of Egypt. In his day no imperial edict was needed to start a persecution of Christians (A.D. 249). A large part of the population of Alexandria was still pagan, and only needed a leader to revive 'their native superstition' (τὴν ἐπιχώριον δεισιδαιμονίαν). When the Decian persecution (A.D. 250) broke out, he specially mentions four 'Egyptians' as among the sufferers.[α] The persecution was not confined to Alexandria, but many others 'in cities and villages' were martyred, and the bishop of Nilus (in Middle Egypt) fled from his see.[β] Coptic traditions of this persecution are scanty,[γ] and we do not precisely know how far it extended. We find the same bishop writing letters to the brethren in Egypt[δ] and to Egyptian bishops.[ε] He also went to the Fayûm district. Here the teaching of Nepos, an Egyptian bishop (ἐπίσκοπος τῶν κατ' Αἴγυπτον), had for a long time prevailed, so that 'schisms and defections of whole churches had taken place.' Dionysius therefore called together 'the presbyters and teachers of the brethren in the villages,' and discussed their difficulties with them for three successive days.[ζ] We cannot gather, from any letters of his which have come down to us, information regarding Christianity farther south. We have to wait for such information till the beginning of the next cent. In the latter part of the Diocletian persecution Eusebius in person visited the Thebaid. He was an eye-witness of the massacres, and of the fanatical enthusiasm of many of the martyrs. The persecution continued, 'not for a few days or for a short time, but for a long period of whole years' (ἐπὶ μακρὸν ὅλων ἐτῶν διάστημα). Most of the sufferers apparently belonged to the lower classes of society, but there were some of high birth and distinction.[η] Many bishops suffered for the faith,[θ] but Eusebius does not say whether any of them came from the south. He has described the sufferings of the rest of the Egyptian Church in Egypt itself[ι] and elsewhere;[κ] and has preserved an account by an eye-witness of the persecution in Alexandria.[λ] But when we bring together all the historian's statements, it is singularly difficult to determine how far they imply the existence of a widespread native Christianity. We can only conjecture that amongst the numerous martyrs some of those in a lower station of life were natives. A century had passed since the bishop of Jerusalem wrote to the Greek-speaking population of the capital of the Thebaid.[μ] In the meantime the Christians in that town may have done good work amongst the 'barbarians,' even if they had not attempted such work at first.

[θ] *HE*, viii. 9, 13, ix. 6; *De Mart. Pal.* 13. We gather from Epiphanius, *Hær.* lxviii. 8 (*PG*, xlii. 197), that Potamo of Heraclea lost an eye in the persecution.

[ι] *HE*, viii. 6, 8, 13, ix. 11; *De Mart. Pal.* 8, 13.

[κ] *HE*, viii. 6 f.; *De Mart. Pal.* 8, 10, 13.

[λ] Phileas, ap. Eus. *HE*, viii. 10. The account of Phileas' own trial is given by Ruinart, *Act. Sinc.* 2nd ed. p. 494 ff.

[μ] Eus. *HE*, vi. 11.

The Coptic accounts of this persecution were written at a later date, and are disfigured by legendary additions. Yet the traditions of martyrdoms having taken place in the towns lying between Antinoe and Latopolis [α] must have some historical foundation. They point to the fact that the persecution was particularly severe in the south. Many of the martyrs bear Greek names, and are connected with the army.[β] Comparatively few bishops are mentioned.[γ] Diocletian is hated with a wild, unreasoning hatred, due no doubt in part to political considerations. A religion must have gained in popularity among the fanatical, disorderly natives of Upper Egypt, simply because Diocletian and the Government were opposed to it. In fact we find, as we study these Coptic traditions, that however much the new religion had already appealed to the natives, a fresh era began with Diocletian,[δ] and Christianity became, in a fuller sense than ever before, the religion of the people. Hatred of Diocletian, the faith of the martyrs, the sufferings which they endured, all contributed to this result. The consequence was that, when the persecution was over, 'the repentance of the heathen (τῶν ἐθνῶν) was multiplied in the Church, the bishops leading the way unto God, according to the teaching of the apostles.'[ε]

It will be evident from this brief study of the subject, that but little is known of Egyptian Christianity outside of Alexandria before the time of Pachomius. The state of the Church in his time—the history and legends of the Diocletian persecution—the increase of the Egyptian episcopate under Demetrius and Heraclas—suggest, but do not prove, that some time before the end of the 3rd cent. there was a considerable number of native Christians. They would soon feel the need of a translation of the Bible. Historical evidence, then, on the whole, points to the 3rd cent. as the period when the first Coptic translation was made.[ζ] But this view can only be regarded as tentative. In the light of future discoveries it may have to be modified. This translation was most probably made, not in the neighbourhood of Alexandria, but in Middle or Upper Egypt. Here the native element was stronger than in the north; and, as Greek was less spoken, the need for a translation would be more keenly felt. All the evidence that we possess at present goes to prove that Coptic literature, whether orthodox or heretical, took its rise in the south; its development being assisted by the hatred felt towards the foreign or Greek element.[η]

5. GREEK TEXT IMPLIED BY VERSIONS.—All three versions of the NT must be more carefully edited before we can determine with certainty the underlying Greek text. The Sahidic NT contains some remarkable interpolations, usually classed as Western. Two striking ones are found in Lk. The parable of Dives and Lazarus begins thus in the Sahidic Bible: 'Now there was a certain rich man, whose name was (*lit.* is) Nineveh' (16^{19}).[α] When Joseph had laid the body of Jesus in the tomb (23^{53}), the Sahidic adds: 'Now when he had laid him, he placed (*or* laid) a stone at the door of the sepulchre, which twenty men could not have rolled'[β] (cf. Dc). Several interesting 'Western' interpolations are found in the Acts. Three examples may be quoted.[γ] After the words 'ye shall be baptized with the Holy Ghost not many days hence,' the Sahidic has a strange gloss, 'but (ἀλλά) until Pentecost' (1^5, cf. D). The negative form of the 'Golden Rule' is placed at the end of the apostolic injunctions to Gentile converts ($15^{20. 29}$, cf. D). After the vision of the man of Macedonia to St. Paul, the tenth verse of Ac 16 runs thus: 'And when he had risen, he told us the vision. Straightway we sought to go forth into Macedonia, telling (*or* showing) them that the Lord had called us for to preach unto them' (cf. D). On the other hand, several 'Western' interpolations, which we might have expected to find, are absent from the Sahidic.

The text of the Bohairic version, as is well known, corresponds in general with that of Codex Vaticanus. Whether it is yet more closely allied to the text used by Cyril of Alexandria is a matter which still remains to be determined. There can be but little doubt that in their original form both the Bohairic and Sahidic were free from 'Antiochian' interpolations. A collation of the versions in those parts of the NT, where all three are extant together, proves that the Middle Egyptian is often closely related to the Sahidic. This is most clearly seen in the Pauline Epistles. Thus an examination of the three versions in 1 Co proves that the Sahidic and Middle Egyptian are not entirely independent translations. Sometimes they are based on a different Greek text from that which underlies the Bohairic. But, even when they are translating the same original, their rendering is often strikingly different from that of the Northern version. We may take 1 Co 15^{12-14} as an example. Here the Sah. and M.E. translations are practically identical: 'But[δ] if Christ is preached that he rose from the dead, in what manner do some among you say that the dead do not rise? If the dead do not rise, then Christ did not rise. If Christ did not rise, then is our preaching vain, and vain is our[ε] faith also.'[ζ] The Boh. translation is not so free: 'But if Christ is preached that he was raised from the dead, how (πῶς) do some among you say that there is no resurrection (ἀνάστασις) of the dead? But if there is no resurrection (ἀνάστασις) of the dead, then not even (οὐδὲ) was Christ raised. But if Christ was not raised, then (ἄρα) vain is our preaching, vain also is your faith.'[η] This instance—and it is one among many—shows us that the Sah. and M.E. must in some way be related to one another. A cursory examination might suggest that they are practically the same version,

---

[α] Amél. *Actes des M.* p. 30 ff.

[β] *Ib.* pp. 26, 30, 103, 219.

[γ] Zoega (*Cat.* pp. 237, 239) and Amélineau (*op. cit.* pp. 39, 53 f.) speak of the martyrdom of the bishops of Ptolemais and Hermopolis Magna. Amélineau (*op. cit.* p. 47 ff.) tells of the martyrdom of the bishop of Latopolis. Pisura and three other bishops (Zoega, *Cat.* p. 52; Hyvernat, *Actes des M.* i. p. 114 ff.), and the bishop of Prosopis in Lower Egypt (Zoega, *Cat.* pp. 62, 133; Hyvernat, *Actes des M.* i. p. 225 ff.), were also martyred. The bishop of Akmîm fled (Amélineau, *Actes des M.* p. 32). The bishop of Lycopolis used the persecution as a means of self-aggrandisement (Hyvernat, *Actes des M.* i. 260), and, according to Athanasius (*Apol. c. Arianos*, 59) and Socrates (*HE*, i. 6), actually sacrificed.

[δ] The era of the martyrs, on which Coptic chronology is usually based, begins with A.D. 284, the year of the accession of Diocletian.

[ε] See Amél. *Vie de Pakhôme*, *Annales du MG*, xvii. pp. 2, 339; Acta SS. Mai. xiv. *Vit. Pach.* Prolog.; cf. also Migne, *PL*, lxxiii. 231.

[ζ] The evidence of MSS does not help us much. Our oldest MSS are fragmentary, and their date a matter of uncertainty. But a Sahidic MS of part of 2 Th 3 (Kenyon, *op. cit.* plate xviii), and fragments in Old Middle Egyptian of Jude (Crum, *op. cit.* plate 1, No. 2), and of the Minor Prophets (Krall, *Führer*, p. 33, Tafel iii.) take us back to the 4th or 5th cents. Cf. also Stern, *ZAS*, 1886, p. 135.

[η] Cf. Guidi, *Nachrichten von der K. G. d. W. zu Göttingen*, 1889, No. 3, p. 50 f.

[α] Cf. Harnack, *Texte u. Unters.* xiii. 1, 75 ff.

[β] In the bilingual MS described by Amélineau (*Notice des MSS Coptes de la Bibl. Nationale*, Paris, 1895) the Gr. runs thus: και θεντοσ αυτου επεθηκαν τω μνημιω λιθον μεγαν ον μογισ εικοσι ανδρεσ εκυλιον. The corresponding Sahidic is not published.

[γ] Other interpolations will be found in Ac 1^2 2^{33} 3^{22} 5^{35} 6^8 8^1 9^{40} 12^7 14^{10} $15^{1. 23. 34}$ $18^{12. 19}$ $19^{6. 25}$ 20^{24} 21^1.

[δ] M.E. omits 'but.'

[ε] So Engelbreth's Sah. Amélineau has 'your.'

[ζ] Sah. omits 'also.'

[η] A Coptic word for 'faith' is used. B. and M.E. employ the Greek πίστις.

and that the differences between them are purely dialectical. But when we inquire more closely into the passages where all three are extant, we find that such an explanation is not satisfactory. Sometimes each version is apparently an independent translation. Occasionally the Sahidic and Bohairic agree in rendering or in underlying text as against the Middle Egyptian. In other places—and this is especially the case in the Gospels[α]—the Bohairic and Middle Egyptian are opposed to the Sahidic. Thus, in St. Matthew's account of the Lord's Prayer the difficult word ἐπιούσιος is represented in Sahidic by *that which is coming*, in the other two versions by *of to-morrow*.[β] When we have recovered a larger portion of the Middle Egyptian version, and when the fragments already known have been collected and edited, we shall be able to speak with greater security. Meanwhile we may provisionally state our view as follows. The New Testament was first translated into Sahidic from a text containing a considerable 'Western' element. The translation was idiomatic and in some cases inexact. The Middle Egyptian,[γ] probably made very soon afterwards, was largely influenced by the Sahidic. The Bohairic, made last of all, though in places influenced by the two previous translations, represented an effort to translate with more literal exactness what was felt to be a superior Greek text.

The Coptic versions of the Old Testament are based upon the LXX. The study of them is of great interest, because it may help us to reconstruct the edition of the LXX made by Hesychius, which, as we learn from Jerome, was well known in Alexandria and Egypt.[δ] Whether any of the versions of the Coptic Old Testament are free from the influence of Origen's revision is doubtful. Some Sahidic MSS give the Book of Job in a shortened form. The claim has been put forward[ε] that we have in these MSS a witness to the original text of the LXX, before Origen made his copious additions from Theodotion's version.[ζ] But the last word on this subject has not been said. (Cf. Burkitt, *Texts and Studies*, iv. 3, p. 8.) The relation of the Middle Egyp. of OT to the Sah. has yet to be worked out.[η]

5. History of Criticism of Versions.—A careful study of the Coptic versions of the New Testament is given by Lightfoot in Scrivener's *Introd. to the New Test.*[θ] Lightfoot, as many distinguished scholars before him,[ι] believed that 'we should probably not be exaggerating, if we placed one or both of the principal Egyptian versions,' *i.e.* the Bohairic and the Sahidic, 'or at least parts of them, before the close of the 2nd cent.'[α] This view has been followed by Westcott and Hort, who maintain that 'the greater part of the' Bohairic 'version cannot well be later than the 2nd cent.,' whilst 'the Version of Upper Egypt . . . was probably little if at all inferior in antiquity.'[β] Headlam, who, in the last edition (1894) of Scrivener's *Introduction*, has given a summary of the history of the criticism of the Coptic NT from the point where Lightfoot stopped, considers that 'it has been sufficiently proved that translations into Coptic existed in the 3rd cent., very probably in the 2nd.'[γ] Ciasca, in the introd. to his edition of the Sahidic OT (where references will be found to the work of former editors[δ]), discusses the text and date of the Book of Job.[ε] His examination of the book confirms him in the belief that Lightfoot was right in assigning part at least of the Coptic versions to the 2nd cent.[ζ] It is with the greatest diffidence that we have ventured to suggest that this early date (even if it is right) has not been proved. Our belief in the historical evidence for such a date was shaken by an article[η] published by Prof. Guidi, to which reference has already been made; and subsequent study has confirmed us in the view that there is, as yet, no adequate evidence of the existence of a Coptic version at such an early date as is often maintained.

Forbes Robinson.

EHI (אֵחִי).—The eponym of a Benjamite family, Gn 46^{21}, where, however, אֵחִי וְרֹאשׁ מֻפִּים must be corrected after Nu $26^{38f.}$ to אֲחִירָם וְשׁוּפָם. 'The corruption was perhaps prior to the adoption of the square character; ם and ש in the old script being similar and liable to confusion. It may, however, be due to mere transposition of the two letters' (Ball in Haupt's *Genesis, ad loc.*). See further Ahiram, and cf. Gray, *Heb. Prop. Names*, 35.

J. A. Selbie.

EHUD (אֵהוּד), son of Gera, a left-handed Benjamite, delivered his people by a bold exploit from Eglon, king of Moab, who had captured Jericho and oppressed Israel for eighteen years. This history is given in Jg 3^{12-30}. The compiler has furnished an introduction and conclusion in his usual manner (vv.$^{12-15a,\ 30b}$); the narrative itself (vv.$^{15b-30a}$) is one of the most ancient in the book, and a characteristic specimen of the best style of Heb. story-telling. Doubts have been cast upon the name of the hero, because Ehud and Gera elsewhere are names of Benjamite clans. Gera is a son (Gn 46^{21}) or grandson (1 Ch 8^3), Ehud is a great-grandson (1 Ch 7^{10}), of Benjamin (Nöldeke, *Untersuch.* p. 179 f.; Stade, *Gesch.* i. 68). But E. may well have been the name of the hero before it was the name of the clan called after him (Budde, *Richt. u. Sam.* 100). Wellhausen (*Gott. Nachrichten*, 1893, p. 480) suggests that אהוד may be an abbreviation of אביהוד in 1 Ch 8^3.

G. A. Cooke.

EITHER.—1. Now alternative, *one or the other*; in older Eng. 'either' was comprehensive, *each of*

[α] An examination of Mt 6^{5-15} and Jn 4^{28-30} will prove the truth of this assertion.

[β] This translation in the Bohairic of Mt is probably the result of a deliberate revision. The older rendering (cf. Lat. Vulg.) still remains in Lk, where the Boh. has *that which is coming* (M.E. is wanting in Lk 11). At the end of the prayer the Doxology is wanting in Boh. The Sah. has, 'For thine is the power and the dominion for ever and ever, Amen.' The M.E. has, 'For thine is the power and the glory for ever, Amen' (cf. Didache viii. ὅτι σοῦ ἐστιν ἡ δύναμις καὶ ἡ δόξα εἰς τοὺς αἰῶνας).

[γ] The fragments of the NT written in Old M.E. are too minute for classification. The little that remains shows the same text as the Sahidic. But when we recover more, we may find that it differs only dialectically from the ordinary M.E. version.

[ζ] *Op. cit.* vol. ii. p. xxxvi f.

[η] *Nachrichten von der K.G. d. W. zu Göttingen*, 1889, No. 3, p. 49 ff. Steindorff (*op. cit.* § 2) suggests the end of the 3rd cent. as the date of the Coptic translation of the Bible. Stern in his *Critische Anmerkungen zu der boheirischen Übersetzung der Proverbia Salomonis* (*ZAS*, 1882, p. 191 ff.) conjectures that the Boh. Version may be much later than the Sah., which, in part at least, was made in the 3rd cent. (p. 202). He thinks it possible that the Boh. and Sah. Versions may prove to be based on some form of the M.E. (*ZAS*, 1886, p. 135).

two, like its German equivalent 'jeder.' Thus Lv 10^{1} 'Nadab and Abihu, the sons of Aaron, took either of them his censer'; 1 K 7^{15}; Jn 19^{18} 'on either side one,' and Rev 22^{2} 'on either side of the river was there the tree of life.' Cf. Ridley, *Brefe Declaration* (1555), p. 102 (Moule's ed.), 'as some of them do odiously call either other'—changed in the Oxf. ed. 1688 into 'each other.' **2.** 'Either' was formerly used to introduce the second or any later alternative, as well as the first; so Ja 3^{12} and Ph 3^{12} 'Not as though I had already attained, either were already perfect' (RV 'or'); and so Lk 6^{42} 'Either how canst thou say to thy brother' (RV 'Or'). In this sense 'either else' is also found, as Stubbes, *Anat. Abus.* ii. 10, 'Either else they would never be so desirous of revenge.'

J. HASTINGS.

EKER (עֵקֶר).—A Jerahmeelite (1 Ch 2^{27}). See GENEALOGY.

EKREBEL ('Εκρεβήλ), Jth 7^{18}.—Apparently the town of *'Akrabeh*, E. of Shechem, the capital of Akrabattine (*SWP* ii. sh. 12).

EKRON (עֶקְרוֹן, 'Ακκαρών), one of the five principal cities of the Philistines, the one farthest to the N. (Jos 13^{3}). It was a centre, having towns and villages dependent upon it (Jos 15^{45}). In the first division of the land W. of the Jordan it was assigned to Judah, being on the N. boundary of that tribe (Jos $15^{45.\,46.\,11}$), but in the later division the boundaries were so rectified as to give it to Dan (Jos 19^{43}). It is mentioned as among the cities not captured under Joshua (Jos 13^{3}). After his death it was taken by Judah (Jg 1^{18}); but the possession was not permanent, for we afterwards find it in the hands of the Philistines till the time of David. It is prominently mentioned in the history of the time when the ark was in the land of the Philistines (1 S 5. 6), and in connexion with later events (1 S 7^{14} 17^{52}). Like the rest of the Phil. cities, it became practically independent soon after the disruption. It is mentioned in history in the time of Jehoshaphat (2 K $1^{2.\,3.\,6.\,16}$), in the time of Amos (Am 1^{8}, Zec $9^{5.\,7}$), and in the time of Jeremiah (Jer 25^{20}). The records of Sennacherib, king of Assyria, mention a revolt of E. from the Assyrians to Hezekiah, and the condign punishment inflicted (see, *e.g.*, Smith's *Assyr. Disc.* pp. 304–306). It is found in the Apocrypha (1 Mac 10^{89}, AV **Accaron**) as a place given by Alexander Balas to Jonathan Maccabæus in reward for his services. It is spoken of in connexion with a march of king Baldwin the crusader, A.D. 1100 (Robinson, *BRP* ii. 228). It is apparently identified with *'Akîr*, 4 miles E. of *Yebna*, and is now a station on the railway from Jaffa to Jerusalem. (See PHILISTINES. See also Smith, *HGHL* 193, 218). **Ekronite.**—A citizen of Ekron. The word is used in the singular in Jos 13^{3}, where 'the Ekronite' is spoken of, meaning the people of Ekron collectively, and in the plural in 1 S 5^{10}, where the citizens are spoken of individually.

W. J. BEECHER.

EL.—See GOD.

ELA ('Ηλά). **1.** 1 Es 9^{27}=ELAM, Ezr 10^{26}. **2.** (1 K 4^{18} אֵלָא, AV Elah) Father of Shimei, who was Solomon's commissariat officer in Benjamin.

ELAH (אֵלָה 'terebinth').—**1.** (Gn 36^{41}, 1 Ch 1^{52}) The fifth 'duke of Edom.' These names prob. indicate districts called after certain chieftains. Comp. the use of Mamre, Caleb, etc. **2.** (1 K 16^{6-14}) King of Israel, son of Baasha. His reign can scarcely have lasted two years, since he came to the throne in the 26th year of Asa, and was killed in the 27th. The story of Elah's death suggests that he was a worthless sot ('drinking himself drunk in the house of Arza his steward,' 1 K 16^{9}). Jos. (*Ant.* VIII. xii. 4) says that Zimri took advantage of the absence of the army at Gibbethon (1 K 16^{15}) to kill Elah while unprotected. His death was followed by the extirpation of his family, in fulfilment of the prophecy of Jehu (1 K $16^{3.\,4}$); but the sacred narrative reminds us that the fact of a man's being the rod of God's anger does not exempt him from punishment for the crimes he commits in accomplishing the design of Providence (1 K 16^{7}), cf. Hos 1^{4}, Am 1^{4}. The office which Arza held was a very high one, see 1 K $4^{2.\,6}$. **3.** Father of Hoshea, last king of Israel (2 K 15^{30} 17^{1} $18^{1.\,9}$). **4.** (1 Ch 4^{15}) Second son of Caleb. Rawlinson suggests that the last words of the verse should be: 'and the sons of Elah, Jehallelel and Kenaz.' (So Keil.) Similar omissions occur in 6^{28} 8^{29} 9^{41}. **5.** (1 Ch 9^{8}) A Benjamite who dwelt in Jerus. in the time of Neh. He is not mentioned in the parallel list, Neh 11.

N. J. D. WHITE.

ELAH, THE VALLEY OF (עֵמֶק הָאֵלָה; ἡ κοιλὰς 'Ηλα, A τῆς δρυὸς 'the valley of the terebinth').—The scene of the defeat of the Phil. champion Goliath at the hands of David (1 S $17^{2.\,19}$ 21^{9}). The valley of E. is probably the modern Wady es-Sunt (=terebinth), the third and most southerly of the valleys which cut through the Shephelah, and so lead up from the Phil. plain into the heart of Judæa. 'An hour's ride from Tell es-Safi' (at the entrance to the Phil. plain) 'up the winding vale of E. brings us through the Shephelah to the spot where the Wady es-Sur turns S. towards Hebron, and the narrow Wady el-Jindy strikes up towards Bethlehem. At the junction of the three there is a level plain, a quarter of a mile broad, cut by two streams, which combine to form the stream down Wady es-Sunt. This plain is probably the scene of David's encounter with Goliath' (G. A. Smith, *Hist. Geogr.* p. 227).

The Philistines had pitched their camp between Socoh and Azekah, *i.e.* on a ridge separated from the rest of the low hills, and facing the Israelites across the valley. The 'gai' (גַּיְא) or ravine, which separated the two armies, is the deep trench formed by the combination of the two streams; this, in fact, formed a valley within the valley. The Israelites had taken up their position on the farther or eastern side of the vale, somewhere on the slopes of the Wady el-Jindy, thus securing their line of retreat up the Wady. The natural strength of both positions was thus very great, since, if either army attacked, they must not only cross the ravine, but also climb the opposite slopes, and so place themselves at a great disadvantage; the long delay of the two armies, in face of each other, was probably due to this fact.

J. F. STENNING.

ELAM (עֵילָם).—**1.** A son of Shem (Gn 10^{22}=1 Ch 1^{17}), the eponymous ancestor of the Elamites (see following article). **2.** A Korahite (1 Ch 26^{3}). **3.** A Benjamite (1 Ch 8^{24}). **4.** The eponym of a family of which 1254 returned with Zerub. (Ezr 2^{7}, Neh 7^{12}, 1 Es 5^{12}) and 71 with Ezra (Ezr 8^{7}, 1 Es 8^{33}). It was one of the Benê-Elam that urged Ezra to take action against mixed marriages (Ezr 10^{2}), and six of the same family are reported to have put away their foreign wives (Ezr 10^{26}). Elam acc. to Neh 10^{14} 'sealed the covenant.' **5.** In the parallel lists Ezr 2^{31}, Neh 7^{34} 'the other Elam' has also 1254 descendants who return with Zerubbabel. It appears certain that there is some confusion here (cf. Berth.-Ryssel, *ad loc.*, and Smend, *Listen*, p. 19). **6.** A priest who took part in the dedication of the walls (Neh 12^{42}).

J. A. SELBIE.

ELAM, ELAMITES (עֵילָם, 'Ελάμ, *Elymais*).—The Heb. Elam is the Assyr. Elamtu, 'the Highlands' (a name also applied to the Amorite 'Highlands' in the west), Elamû, 'an Elamite.' Elamtu is the Semitic translation of the Sumerian Numma or Nimma, which has the same signification, and was the name applied by the Proto-chaldæans to the mountainous land to the east of them. Elam possessed two ruling cities, Susa or Shushan, called Susun ('the old') in the native texts (now Shuster), on the Ulai or Eulæus, and Anzan or Ansan, nearer Babylonia in the south-west. The two cities gave their names to the districts in which they were situated, an inhabitant of Susiana being called Susunḳa, the 'Susanchite' of Ezr 4^{9}. The district of Anzan was more extensive than that of Susa, and at one time was equivalent to 'the land of Elam' among the Babylonians (*W. A. I.* ii. 47. 18). Cyrus and his immediate predecessors were kings of Anzan, the country having apparently been conquered by the Persian Teispes during the decline of the Assyr. empire. Sir H. Rawlinson notices that an early Arab. writer, Ibn en-Nadîm, states that writing was invented by Jemshîd, who lived at Assan, one of the districts of Shuster. The kings of Susa, however, eventually got possession of Anzan, and so founded the kingdom of Elam. They call themselves lords 'of the kingdom of Anzan'; and as this title is found on their bricks at Bushire, the kingdom must have extended as far as the sea.

To the east is the plain of Mal-Amir, where there are sculptures and cuneiform inscriptions, from which we learn that here was another kingdom called Apirti, the 'Apharsites' of Ezr 4^{9}. In the agglutinative language of the second transcript of the Achæmenian texts the name is written Khapirti, and it has there taken the place of Anzan or Susa as the equivalent of the Bab. Elamtu. The equivalent in the Persian transcript is Uwaja, whence the modern Khuzistan.

The dialects of Mal-Amir, of Susa, and of the second Achæmenian transcripts differ but slightly from one another. They are agglutinative, and, so far as can be judged, unrelated to any other known language. The statement in Gn 10^{22}, that Elam was the son of Shem, does not imply any racial or linguistic connexion, the object of the chapter being purely geographical.

According to Nearchus, as reported by Strabo (xi. 13. 3, 6), 'four bandit nations' inhabited the mountainous region east of the Euphrates, the Amardians or Mardians who bordered on the Persians, the Uxians and Elymeans on the frontiers of Persia and Susa, and the Kossæans contiguous to the Medes. The Amardians may be the people of Khapirti, the Uxians belonged to Uwaja, Elymais (1 Mac 6^{1}) is Elam, and the Kossæans are the Kassi of the Assyr. inscriptions of whose language many words are preserved, which, however, seem to have no connexion with the dialects of Elam.

'Ansan, in the land of Numma' or Elam, was conquered by Gudea, an early viceroy of southern Babylonia (in B.C. 2700), whose monuments have been found at Telloh; and Mutabil, another early viceroy (of Dur-ilu on the eastern frontier), 'broke the head of the armies of Ansan.' Kudur-Mabug, the prince of Iamutbal, a district of Elam immediately eastward of Chaldæa, was the father of Eri-Aku or Arioch (which see), and 'father of the land of the Amorites' or Syria. At the same period Chedorlaomer (Kudur-Lagamar) was suzerain of Babylonia and Palestine (Gn 14^{1-16}), and the notices in the Bab. astrological tablets which refer to 'the king of Anzan and Subarti' or Mesopotamia probably belong to the same date. The defeat of the Elamites by Khammurabi, king of Babylon, enabled him to overcome Eri-Aku, and make Babylonia a united monarchy (B.C. 2330). In B.C. 2280 the Elamite king Kudur-Nankhundi made a raid into Babylonia, and carried away the image of the goddess Nanæa (see 2 Mac 1^{13}), which Assur-bani-pal recovered 1635 years afterwards. Nearly a thousand years later we find Khurba-tila of Elam going to war with Kuri-galzu II. of Babylonia (B.C. 1340); but his own men revolted from him, and he was defeated and captured at Dur-Dungi by Kuri-galzu. About a century afterwards (*c.* B.C. 1230) Kidin-Khutru invaded Babylonia, and, after taking Dur-ilu, put an end to the Kassite dynasty at Babylon. A second invasion by the same king was not so successful. In B.C. 1115 (?) Babylonia seems to have been conquered by the Elamites, as a dynasty of two Elamite kings then began to rule it. In B.C. 742 Umman-nigas or Khumba-nigas became king of Elam, and in 721 assisted Merodach-baladan against Sargon of Assyria, whom he repulsed at Dur-ilu. He died in 718, and was succeeded by his sister's son, Sutruk-Nankhundi, who in 711 again assisted Merodach-baladan, but this time to no purpose. Sargon defeated and captured his general Singusibu, and added the Elamite districts of Iatbur, Lakhiru, and Rasi to Assyria. After a reign of eighteen years Sutruk-Nankhundi was imprisoned by his brother Khalludus, who seized the crown. He captured Babylon in the rear of Sennacherib, who had gone by sea to Nagitu, on the Elamite coast, in order to destroy a settlement made there by the fugitive Merodach-baladan, and the Bab. king, who was a son of Sennacherib, was carried captive to Elam. A year and a half afterwards (B.C. 693) the Elamite nominee at Babylon was captured by the Assyrians, and in the following September Khalludus was murdered. Kudur-Nankhundi succeeded him, and Sennacherib ravaged Elam, capturing even Madaktu north of Susa, until driven back by the winter. The following July, Kudur-Nankh. was killed in an insurrection, and Umman-menanu put on the throne. In B.C. 690 came the great battle of Khalulê, when Sennacherib met the combined forces of Elam and Babylonia, and both sides claimed the victory. The king of Elam had under him the troops of Parsuas (Persia), Anzan, Pasiru, and Ellipi (where Ecbatana afterwards stood), besides the Aramæans and Kaldi or Chaldæans of southern Babylonia. On the 15th of Nisan, B.C. 689, he was paralyzed, and died the following November. Umman-Khaldas I., his successor, reigned eight years, when he was burnt to death on the 3rd of Tisri, and Umman-Khaldas II. ascended the throne. He was murdered in 675 by his two brothers, Urtaki and Te-Umman, the elder of whom took the crown, and about ten years later made an unprovoked raid into Babylonia. The result was the conquest of Elam by the Assyr. king Assurbanipal, who placed Umman-igas the son of Urtaki on the throne as a tributary prince. He joined the great revolt against Assyria, which was headed by the viceroy of Babylonia; but he had hardly sent his army into that country when his son Tammaritu conspired against him, and, cutting off his head, sent it to Assurbanipal. Tammaritu then joined the Babylonians, and, during his absence, one of his servants, Inda-bigas, usurped the throne. Thereupon Tammaritu surrendered to the Assyrians. Shortly afterwards Inda-bigas was murdered by another military adventurer, Umman-Khaldas III., and the Assyr. army again entered Elam, took Madaktu, and restored Tammaritu to the throne. He was soon found to be plotting against his masters; and as Umman-Khaldas once more possessed himself of the country, the Assyr. general wasted it with fire and sword. Susa and the other cities were levelled with the ground, the temples and palaces destroyed, and the sacred groves cut down. Thirty-two statues of the kings were carried to Assyria, as well as the images of all the Elamite deities—Susinak, the god who delivered oracles, and whose image was concealed from the sight of the laity, Sumudu, Lagamar, Partikira, Amman-Kasimas, Uduran, Sapak, Ragiba, Sungursara, Karsa and Kirsamas, Sudanu, Apak-sina, Bilala, Panintimri, Silagara, Napsa, Nabritu, and Kindakarbu (to whom we have to add also Laguda, Nakhkhunte or Nankhundi, and Khumba). The kingdom of Elam perished, and a desolated province was added to the Assyr. empire. But the empire was already on the decline, and in a few years Elam ceased to belong to it. In B.C. 606, the year probably of the destruction of Nineveh, Jeremiah refers to 'the kings of Elam' (Jer 25^{25}), and eight years later he declares that Elam is about to be consumed by its enemies, its king and princes destroyed, and its people scattered (49$^{35-39}$). This would fit in with the conquest of Anzan by Teispes the Persian, the ancestor of Cyrus (which see). When Elam and Media are called upon to besiege Babylon in Is 21^{2}, Cyrus, king of Anzan, must be meant, as Anzan was synonymous with Elam among the Babylonians. It would appear from Ac 2^{9} that the old language of Elam was still spoken there in the first century of our era.

LITERATURE.—Billerbeck, *Susa* (1893); Dieulafoy, *L'Acropole de Suse* (1890); Sayce, 'The Inscriptions of Mal-Amir,' in the *Transactions of the Leyden Oriental Congress* (1885); Loftus, *Chaldæa and Susiana* (1857). A. H. SAYCE.

ELASA ('Αλασά), 1 Mac 9^{5}.—The site may be at the ruin *Il'asa*, near Bethhoron (*SWP* iii. sh. 17).

ELASAH (אֶלְעָשָׂה 'God hath made').—1. One of those who had married a foreign wife (Ezr 10^{22}). 2. The son of Shaphan, who along with Gemariah, the son of Hilkiah, carried a message from king Zedekiah to Babylon (Jer 29^{3}). For no apparent reason, RV retains the AV spelling Elasah in both the above passages, although both AV and RV give for the same Heb. the form **Eleasah** (wh. see) elsewhere. J. A. SELBIE.

ELATH or **ELOTH** (אֵילַת, אֵילוֹת).—A seaport in the extreme S. of Edom, at the head of the Gulf of Akabah. It is mentioned in Dt 2^{8} in connexion with Ezion-geber, one of the 'stations' of the Israelites. Elath, Eloth, and Elim may possibly be various names of one and the same place, the 'palm-grove' which was the second halting-place after the passage of the Red Sea. (See Sayce, *HCM* p. 268). E. is probably identical with **El-paran** of Gn 14^{6} and **Elah** of Gn 36^{41}. It has also been suggested that it is referred to in 1 Ch 4^{15}, where for 'Iru, Elah' (עִירוּ, אֵלָה) we might read 'Ir and Elah' (עִיר וְאֵלָה). See further Dillmann on Gn 36^{41}. The history of E. was a chequered one. Coming into the possession of Israel when Edom was subdued by David (2 S 8^{14}), it was an important naval station during the reign of Solomon (1 K 9^{26}). When the disruption of the kingdom took place, Edom continued to be a vassal of the house of David, until it recovered its independence in the time of Jehoram the son of Jehoshaphat (2 K 8^{20}). The port of E. passed once more into the possession of Judah, when Amaziah and Uzziah had inflicted a succession of defeats upon Edom (2 K 14^{22}). It was wrested permanently from Judah during the operations undertaken against Ahaz by Pekah and Rezin (2 K 16^{6}), and either the Syrians (*Kethîbh*) or the Edomites (*Ḳerê*) became its possessors. With this event (*c.* B.C. 734) ends its history as far as OT is concerned. E. is the modern *'Aḳabah.* J. A. SELBIE.

EL-BERITH (Jg 9^{46}).—See BAAL-BERITH, and cf. Moore, *Judges*, 242, 265; W. R. Smith, *RS* 93 n.; Baudissin in *PRE*^{3} ii. p. 334.

EL-BETHEL (אֵל בֵּית־אֵל).—The name which Jacob is said to have given to the scene of his vision on his way back from Paddan-aram, Gn 35^{7} (P ?). The LXX (Βαιθήλ), Vulg. (*Domus Dei*), Pesh. and Arab. VSS omit 'El,' which Ball (in Haupt's *OT*) suggests may have been corrupted from הַהוּא 'that,' which would naturally be attached to לַמָּקוֹם (so in Pesh. and Vulg.). Ball justly adds that *God of Bethel* is an extraordinary name for a *place.* See, however, the note (*) on p. 278^{a} of the present volume. J. A. SELBIE.

ELDAAH (אֶלְדָּעָה, perhaps 'God hath called').—A son of Midian (Gn 25^{4}, 1 Ch 1^{33}). See GENEALOGY.

ELDAD (אֶלְדָּד).—One of the seventy elders appointed to assist Moses in the government of the people. On a memorable occasion in the wilderness journey, he and another named Medad were not present with Moses and the rest of the elders at the door of the tabernacle to hear God's message and receive His spirit. But the spirit of the Lord came upon them where they were, and they prophesied in the camp. Joshua regarded this as an irregularity, and appealed to Moses to forbid them. But he received the reply, 'Art thou jealous for my sake? would God that all the Lord's people were prophets, that the Lord would put his spirit upon them!' (Nu 11$^{26-29}$). R. M. BOYD.

ELDAD AND MODAD, BOOK OF.—The fact that the prophecies of these men are unrecorded in Nu 11$^{26-29}$ furnished an inviting theme for imagination to some unknown seer and author. His book is quoted in Hermas, *Vis.* ii. 3: 'Thou shalt say to Maximus. Behold the tribulation cometh . . . "The Lord is near to them that turn to Him," as it is written in the (book) of Eldad and Modad.' The Pal. Targums (*Jerus.* i. and *Jerus.* ii.) both supply us with the subject of E. and M.'s prophecy, filling in, as is their wont, the supposed hiatus in the Heb. Bible. They agree with Hermas that it had reference to pre-Messianic tribulation, which is described under the coming of Magog against Israel at the end of days. *Jerus.* ii. says that Gog and Magog shall both fall by the hand of King Messiah. *Jerus.* i. omits this; but adds, 'The Lord (see Levy, *s.v.* קירים) is near to them that are in the hour of tribulation.' The close resemblance thus pointed out between Hermas and the two Targums seems certainly to indicate that all three authors were acquainted with the same Bk of E. and M.; and renders the hesitancy of Schürer and Zöckler no longer necessary. In 1 Clem. xxiii. 3. 4 and 2 Clem. xi. 2. 3 is a long quotation, called in the one case γραφή, in the other προφητικὸς λόγος, but not in OT, which Lightfoot and Holtzmann conjecture to have been taken from our book. In both cases, as well as in Hermas, the quotation is designed to refute one who is sceptical about the approaching tribulations 'at the end of the days.' Our book is found in the Stichometry of Nicephorus (400 στίχοι), and in the Synopsis Athanasii (see ABRAHAM, BOOK OF).

LITERATURE.—Fabricius, *Codex pseudep. V.T.* i. 801-804; Schürer, *HJP* II. iii. 29; Zöckler, *Apoc. des A.T.* 439; Weber, *Lehren des Talm.* 1886, p. 370 (who, however, mistranslates the Targ. *Jerus.* i. in the line cited); Holtzmann, *Einleitung*, 553. J. T. MARSHALL.

ELDER (IN OT).—In ancient days the institution of Elders was not peculiar to the Jewish people, and the word *elder* did not suggest those purely ecclesiastical and religious functions with which it is now associated. The origin of the office is easily traced. Under the primitive conditions of society that prevail in the early history of all nations, *age* is an indispensable condition of investment with authority. [Cf. the γέροντες so frequently mentioned by Homer (*e.g.* *Il.* xviii. 503), the γερουσία of the Dorian states, the *Patres* and *Senatus* of the Romans, the πρεσβύς at Sparta, and the *Sheikh*, *i.e.* elder, in Arabia]. Hence from the beginning of Israel's history downwards we hear of elders (זְקֵנִים, πρεσβύτεροι) as an official class. The title, which at first is inseparably associated with the idea of age, came afterwards to designate merely the dignity to which age was formerly the necessary passport.* In the narratives of the Hex. both J and E are acquainted with the institution of elders (Ex 3^{16} 19^{7} 24^{1}, Nu $11^{16ff.}$, etc.), and that not only in Israel but amongst the Egyptians (Gn 50^{7}) and the Moabites and Midianites (Nu 22^{7}). Their position and functions in early times are thus described by Wellhausen (*Hist. of Isr. and Jud.* 15), 'What there was of permanent official authority lay in the hands of the elders and heads of houses; in time of war they commanded each his own household, and in peace they dispensed justice each within his own circle.' They are frequently referred to in Deut. as discharging the functions of local authorities (Dt 19^{12} 21^{2} 22^{15} 25^{7}, cf. also Jos 20^{4}, Jg 8^{14}, Ru 4^{2}). Their number varied with the locality, it must sometimes have been considerable; *e.g.* the elders of Succoth who came into collision with Gideon (Jg 8^{14}) numbered seventy-seven. At a later period they appear in connexion with the adoption of the kingly form of government (1 S 8^{4}), with the intrigues of David and Abner about the succession to the throne (1 S 30^{26}, 2 S 3^{17}), while the part they played in the judicial murder of Naboth is well known (1 K 21^{8-11}). It was from amongst the previously existing body of elders that Moses, according to Nu $11^{16ff.}$ (JE), chose an inner circle of seventy 'to bear with him the burden of the people.' (The important part played by this incident in late Jewish traditions will be referred to under SANHEDRIN).

The elders of the city (זִקְנֵי הָעִיר) acted as judges (Dt 22^{15}), just as the village *Ḳādi* and his assistants do in an Arab community at the present day (Driver, *Deut.* 199). It is true that in Dt 16^{18} 'judges' (שֹׁפְטִים) and 'officers' (שֹׁטְרִים) appear to be distinguished from elders; but Schürer is prob. right in his suggestion, that both these classes were selected from the general body of elders, the 'judges' being entrusted with the administration of justice, while the 'officers' took charge of the executive department. Elders reappear in the Persian and Greek periods (Ezr $5^{5.9}$ $6^{7.14}$ 10^{8}, Jth 6^{16} 7^{23} 8^{10} 10^{6} 13^{12}, 1 Mac 12^{35}, and in the story of Susanna), while the πρεσβύτεροι τοῦ λαοῦ during the Rom. period are often mentioned by Josephus and NT. The authority which the elders of any community possessed as the municipal council in civil affairs extended also to religious matters, particularly after the synagogue (see SYNAGOGUE) had become a flourishing institution. 'In purely Jewish localities the elders of the place would be also the elders of the synagogue' (Schürer). As a general rule, at least, they had absolute jurisdiction, and had not to take the sense of the congregation or the community. In Nu $35^{24f.}$, Jg 20. 21, Ezr 10, we have rare exceptions to this rule (see CONGREGATION). The right of exercising religious discipline was in their hands, and in particular it lay with them to pass the sentence of exclusion from the synagogue, to which allusion is frequently made in NT (*e.g.* Lk 6^{22}, Jn 9^{22} 12^{42} 16^{2}).

In addition to what is contained on the NT Elder in art. BISHOP, various details regarding this office, esp. in the later periods of Jewish history, will be found under artt. SANHEDRIN and SYNAGOGUE.

LITERATURE.—Schürer, *HJP* II. i. 150, 165 f., 174 f., ii. 58 f.; Cremer, *Bib.-Theol. Lex.*, and Thayer, *NT Lex.*, *s.* πρεσβύτερος; Driver, *Deut.* 233; Hartmann, *Die enge Verbind. d. AT mit d. J. A. SELBIE.

ELDER IN NT.—See BISHOP.

ELEAD (אֶלְעָד 'God hath testified').—An Ephraimite (1 Ch 7^{21}). See GENEALOGY.

ELEADAH (אֶלְעָדָה 'God hath adorned,' AV Eladah).—An Ephraimite (1 Ch 7^{20}). See GENEALOGY.

ELEALEH (אֶלְעָלֵה in Nu 32^{37} א ‥'), Nu $32^{3.37}$, Is 15^{4} 16^{9}, Jer 48^{34}.—A town of the Moabite plateau, conquered by Gad and Reuben, and rebuilt by the latter tribe. The expression (v.^{38}), 'their names being changed,' referring to this and other towns, is rendered by Knobel (following the LXX), 'enclosing them with walls'; but this is very improbable (שׁוּר 'wall' is only poetic). See Dillm. *ad loc.* Elealeh is noticed with Heshbon, and in the 4th cent. A.D. was known (*Onomasticon, s.v.*) as being a Roman mile from Heshbon. It is now the ruined mound of *El-'Al*, about a mile N. of Heshbon. See *SEP* vol. i. under the Arab. name.

C. R. CONDER.

ELEASAH (אֶלְעָשָׂה 'God hath made').—1. A Judahite (1 Ch $2^{39.40}$). 2. A descendant of Saul (1 Ch 8^{37} 9^{43}). See ELASAH.

ELEAZAR (אֶלְעָזָר 'God has helped.'—Cf. Azarel, 1 Ch 12^{6}, and the Phœn. names Eshmunazar = 'Eshmun has helped,' *CIS* I. i. 3, l. 1; Baalazar = 'Baal has helped,' *CIS* I. i. 256, l. 2).

Ten or eleven persons bearing this name are mentioned in the canonical and apocryphal books. 1. The third son of Aaron by Elisheba (Ex 6^{23}, Nu 3^{2}), who, with his father and three brothers, was admitted to the priestly office (Ex 28^{1}). After the death of Nadab and Abihu by fire, E. and Ithamar were the chief assistants of Aaron (Lv $10^{12.16}$). The former is represented as the chief of the Levites in the time of Moses (Nu 3^{32}). When Aaron died, E. succeeded him in his functions (Nu $20^{25.28}$, Dt 10^{6}). He is spoken of as taking part with Moses in the numbering of the people (Nu $26^{1.63}$); and after the death of Moses he aided Joshua in the work of partitioning the newly conquered land of Canaan amongst the twelve tribes (Jos 14^{1} 17^{4} 19^{51} 21^{1}). His burial-place is mentioned in Jos 24^{33}. From Eleazar and his wife, a daughter of Putiel (Ex 6^{25}), were descended all succeeding high priests down to the Maccabæan period; the only exceptions being the high priests who lived in the period between Eli and Solomon, when, for some unexplained reason, the office was held by members of the family of Ithamar. 2. A son of Abinadab, who was sanctified to take charge of the ark at Kiriath-jearim, after its return from the country of the Philistines (1 S 7^{1}). 3. Son of Dodo, one of David's three principal mighty men (2 S 23^{9}, 1 Ch $11^{12.13}$). The name should probably be inserted in 1 Ch 27^{4}. 4. A Levite, son of Mahli, and grandson of Merari (1 Ch $23^{21.22}$ 24^{28}). 5. A priest of the time of Ezra (Ezr 8^{33}, Neh 12^{42}). (There may be here two distinct persons.) 6. One of the family of Parosh, who had married a 'strange woman,' *i.e.* one of non-Israelitish descent, in the time of Ezra (Ezr 10^{25}). 7. The fourth son of Mattathias, and brother of Judas Maccabæus, surnamed Avaran (1 Mac 2^{5}). He fell in the battle fought at Bethzacharias against Antiochus V. Eupator, B.C. 163 (1 Mac 6$^{43-46}$). His name occurs also in 2 Mac 8^{23}. **8.** 'One of the principal scribes' martyred during the persecution of Antiochus Epiphanes, B.C. 168 (2 Mac 6$^{18-31}$). **9.** The father of that Jason who was sent on an embassy to Rome by Judas Maccabæus in B.C. 161 (1 Mac 8^{17}). **10.** An E. is mentioned in the genealogy of our Lord given by St. Matthew (1^{15}).

---

* The AV tr. of זְקֵנִים sometimes by 'elders' and sometimes by 'ancients' (*e.g.* Is 3^{14}, Jer 19^{1}) is unfortunate and misleading. See ANCIENT.

W. C. ALLEN.

ELECTION [*ἐκλογή*. The subst. is rare, not found in LXX (yet Aq. Is 22^{7}, Symm. Th. Is 37^{24}, cf. Ps.-Sol 9^{7} 18^{6}). In NT, Ac 9^{15}, Ro 9^{11} 11$^{5.7.28}$, 1 Th 1^{4}, 2 P 1^{10}. Cf. *ἐκλέγομαι* (in LXX generally for בחר) = to 'choose,' implying (see Cremer's *Lex.*) (1) a special relation between the chooser and the object of his choice, and (2) the selection of one object out of many: *ἐκλεκτός* (in LXX for בָּחוּר or בָּחִיר, also fairly often for var. forms of ברר, besides being used occasionally, sometimes by a misreading of the Heb. text, for 17 other Heb. roots = 'chosen' or 'choice' (adj.)]. The word is common in Dt and II Is. It is not in Hos, Am (but *idea* in 3^{2}), or Is (yet cf. LXX Is 28^{16}, which is the source of 1 P 2^{6}). It is used chiefly to describe God's choice of Israel out of all the nations of the world to be His own people, Dt 4^{37} 7^{7} etc., and of Jerus. to be the covenant home of worship, Dt 12^{5} etc. It is used also of God's choice of individuals to the chief offices in the nation, *e.g.* His choice of Aaron and his family for the service of the sanctuary, His choice of the king, and especially of David. It is once used of Abraham; and in Is 40–66 it passes naturally from its use in connexion with Israel to the 'Servant of the Lord.'

It is rare in the Apocrypha; yet cf. Wis 3^{9}, Sir 46^{1} etc. It is constant in Enoch. Cf. Ps-Sol 9^{7} 18^{6}.

In NT it is used once of God's choice of OT Israel (Ac 13^{17}), but for the most part it passes over with other theocratic titles to the 'Israel of God,' and describes either the Church as a whole, or individual members of it, sometimes merely in virtue of their membership, sometimes as chosen to some special office or work, *e.g.* the Twelve, St. Peter, St. Paul. It is twice used as part of the title of our Lord (Lk 9^{35} [*var. lect.*] 23^{35}, Jn 1^{34}). The word appears constantly in the Apostolic Fathers, especially in 1 Clement and Hermas.

The thought of 'election' has formed so prominent a feature in all the most important attempts that have been made in Western Christendom for the last 1500 years to provide a complete and formulated scheme of Christian doctrine, that it is peculiarly hard for us to approach the consideration of the original meaning of the term in Holy Scripture without distracting associations. And yet the effort is worth making. The only hope of any further progress in the elucidation of the problem, the only prospect of extricating its discussion from the deadlock at which it has arrived, lies in a careful reconsideration of the scriptural premisses on which the whole argument has been based.

The questions that require examination fall naturally into three divisions. i. The questions touching the author of election—who chooses the elect? What can we know of His character? What are the grounds of His choice so far as He has vouchsafed to reveal them? ii. The questions touching the persons of the elect—who are they? and for what end are they chosen? iii. The question belonging to the effect of election—what influence does the fact that they have been chosen by God exert over the elect?

i. On the first part of this question there is no difference of opinion. Every theory of election is based on the fact, constantly emphasized in Holy Scripture, that election is the immediate work of God. It is His act as directly as creation is. In fact, God's purpose in creation, His eternal purpose (*ἡ πρόθεσις τῶν αἰώνων*, Eph 3^{11}), is revealed in Holy Scripture as working to its end by the method of election. It is in St. Paul's language *κατ' ἐκλογὴν πρόθεσις*, Ro 9^{11}. The two thoughts are in reality inseparable. We can understand, therefore, how it is that St. Paul should say that God chose His elect before the foundation of the world in His Son (Eph 1^{4}). He is only expressing the truth that underlies our Lord's words when He says, 'To sit on my right hand and on my left hand is not mine to give, but it is for them for whom it hath been prepared of my Father' (Mt 20^{23}). Our first conclusion then, the one fixed point in the whole discussion, is this: God is the author of election. He Himself chooses His own elect.

When we go on to ask on what grounds His election is based, by what considerations, in accordance with what law His choice is determined, we find ourselves at once on debatable ground. To some minds, indeed, the question put in this form seems foolish, not to say irreverent. It involves in their judgment a pitiable blindness in regard to the inexorable limits of human knowledge. In the spirit, sometimes in the very words of Zophar the Naamathite (Job 11^{7}), they ask, 'Canst thou by searching find out God? canst thou find out the Almighty to perfection?' 'The main facts of the divine government may, indeed, be known, but the reasons which underlie them, the motives which prompt them, are unfathomable; only an unchastened curiosity can seek to intrude into such secrets.' To some minds, again, the question involves an assumption inconsistent with one of their primary philosophical or theological postulates. It seems to them inconsistent with the reality of the divine freedom, which in this connexion is only another name for the divine omnipotence, to suppose that God should acknowledge any law as regulating His choice.

If either of these objections is well grounded, further discussion of the question is, of course, precluded. We must therefore begin by defining the position we are prepared to take up with regard to them. Let us consider the second objection first. No doubt, if in its ultimate analysis our conception of God resolves itself into a conception of abstract omnipotence, or of an absolutely sovereign will, and if omnipotence means the power to do *anything*, and if no will can be absolutely sovereign which is not as free to do wrong as to do right, it is meaningless if not profane to inquire into the laws which regulate the choice of God. An abstract omnipotence must be inscrutable. We cannot even begin to understand the action of a will in this sense 'absolute.' But if goodness, and not power, lies at the heart of our conception of God, then we shall not be ashamed to confess that for us, in Westcott's magnificent phrase, 'Truth and justice define omnipotence.' And we shall not shrink from pressing to the full the human analogy which is present, though latent, every time we use the word 'will' in relation to God. We shall contend that the action of the divine will, like the action of the human will, of which it is the archetype, must be at once determined by, and reveal, the character which lies behind it. We shall maintain the paradox, if paradox it be, that the will of God is free, only because, by the blessed necessity of His being, He cannot will anything but that which is perfectly holy and righteous and good. And we shall claim every revelation that He has given us of His character as a revelation of the principles which regulate His choice, the laws of His election.

And if we are met at this point by the warning, that as men our powers of apprehending and expressing truth are limited, and that there must be infinite depths of mystery in the divine nature which we are powerless to fathom, we shall hope to learn humility and patience from the caution. But we shall not desist from pushing our inquiries to the utmost limit of the power that is given to us. We believe that, in spite of all our limitations, we yet were created to know God. And it is a matter of life and death for us that we should be able to bring this revealed method of His working into harmony with the rest of the revelation that He has given us of His character. Nor can we doubt that He will justify us as He justified Job for refusing to be satisfied with any explanation of the facts of the divine government which cannot be reconciled with the sense of justice which He has Himself implanted in us. He has revealed election to us as the method of His working. There can be no presumption in asking whether in making this revelation He has given us any help to enable us to understand His purpose and enter into His plan.

When in this spirit we approach the examination of the scriptural evidence, the result may well, at first sight, seem disappointing. Great pains are taken to negative what we are naturally inclined to regard as the simplest and most obvious solution. The ground of a man's choice lies not so much in himself as in the object that he chooses. It is, of course, true that his own character determines what qualities in an object will, and what qualities will not, prove attractive to him. But, for all that, it is the real or supposed loveliness of the object that rules his choice. It would be natural, therefore, to assume that the choice of God is in like manner determined by the loveliness of its object. But it is just at this point that the analogy of the human will is necessarily imperfect. It is not, indeed, that we are required to believe that God can love that which is, in itself, neither lovely nor capable of developing loveliness; but that since the root of all loveliness is in God, and since there can be no goodness apart from Him, we cannot argue as if it were possible for man to possess or develop any goodness or loveliness independent of, and so constituting a claim on, the choice of God. We ought not, therefore, to be surprised when we find Israel expressly warned in Holy Scripture to reject the flattering assumption that they had been chosen on the ground of their own inherent attractiveness. They were not as a nation either more numerous or more amenable to the divine discipline than other nations (Dt 7[7] 9[6]). We can understand why St. Paul declares that the election of Christians does not depend on the will or the energy of men (Ro 9[16]). It is not of works but of grace (Ro 11[6], cf. Jn 1[13]).

It must therefore be a mistake to try to discover the ultimate ground of God's choice in any consideration drawn from outside Himself, even though it be in His foreknowledge of the faith and obedience of His chosen; for the goodness in which He takes delight is, after all, from first to last His own creation. The testimony of Scripture is not, however, really limited to this negative result. The choice which is not determined from without is all the more certainly determined from within. And the ground of the choice which we are forbidden to look for in ourselves or in human nature is expressly declared to lie in the love (Dt 7[8]) and the faithfulness (Dt 9[5], Ro 11[29]) and the mercy of our God (Ro 9[16]).

ii. We pass on now to consider the second group of questions connected with our subject. Who are the elect? and for what end are they chosen? In OT the term 'elect' is most often applied to the nation of Israel, regarded as a whole. They are at all periods of their history taught to regard themselves as the 'chosen people.' At the same time special divisions of the nation, *e.g.* the tribe of Levi and the house of Aaron, are chosen to perform certain functions on behalf of the whole body; and certain prominent individuals, *e.g.* Abraham and David, are regarded as the objects of a special election. In Is 40–66 the term is applied to the nation generally and to the 'servant of J″' in all the different connotations of that many-sided title,—so little is the prophet conscious of any fundamental contradiction between the thought of a national and an individual election. In NT the universal Church takes the place of Israel as the 'chosen race,' and not only her head and her most prominent ministers, but also all her individual members, sometimes by name, sometimes by an inclusive form of address, which it is impossible to narrow down, are described as 'elect,' just as they are described in similar connexions as 'called' and 'holy' and 'faithful' and 'beloved.'* It does not seem possible to determine on NT evidence whether the individuals are regarded as owing their membership in the Church to their election, or as becoming elect by virtue of their membership. Three points are clear—(1) that they were chosen before the foundation of the world; (2) that they were chosen 'in Christ'; (3) that membership in the Church is treated as an objective assurance to each individual of his personal interest in this eternal election.

Such in outline are the different classes described as 'elect' in Holy Scripture. We must consider next what can be learnt with regard to the purpose for which they were chosen. We must not, of course, assume that the purpose is the same, or even in all points analogous in the different cases. Still it is not unnatural to suppose that we shall gain some help towards understanding the application of the method in any one case by a careful study of its application to the rest.

The selection of the family of Aaron and the tribe of Levi need not detain us long. It is a simple case of the choice of certain individuals to fill an office of trust, a position at once of privilege and responsibility on behalf of their fellow-countrymen.

The choice of Israel presents a more complicated problem. The choice in the first instance involved a call to occupy a special position in relation to J″—to be, and to be acknowledged before the world as, His peculiar people. 'Ye are my witnesses,' saith the Lord, 'my servant whom I have chosen; that ye may know and believe me, and understand that I am he' (Is 43[10]). And this position of privilege involved a special responsibility towards God and towards the rest of mankind. On the one side, they were the trustees of God's glory in the world, 'his witnesses,' 'the people which he formed for himself, to show forth his praise.' On the other, they were the heirs of the promise made at the call of the Father of the elect, that 'in him and in his seed should all the families of the earth be blessed' (cf. Gn 18[19]). And this work for others is the characteristic function of the ideal 'servant of the Lord,' who embodies in himself all that is most characteristic of the chosen Israel.

In NT comparatively little is told us of the purpose of election. 'The poor in this world,' St. James writes, 'God chose (to be) rich in faith and heirs of the kingdom which he promised to them that love him.' 'God chose you,' writes St. Paul to the Thessalonians, 'from the beginning (*or* "as a firstfruit," ἀπαρχήν for ἀπ' ἀρχῆς) unto salvation.' 'He chose us,' he writes again (Eph 1[4]) 'in him (*i.e.* in Christ) that we should be holy and without blemish before him in love.' The Christian, therefore, stands as the Israelite stood before him in a special relation of intimacy with God, receiving from Him the spiritual gifts and graces, together with the responsibility for appropriating them (Col 3^{12}), which such an intimacy presupposes, and the assurance of eternal salvation, of which that intimacy is at once the foretaste and the pledge.

---

* There is, indeed, one passage in the Gospels, which will call for notice later on, in which a distinction is drawn between the many 'called' and the few 'chosen.' But the existence of this one passage does not invalidate the statement in the text, which merely asserts that there are other passages in which this narrow signification for 'elect' is excluded.

The indications of a wider purpose in the election of the Christian are not, indeed, as definite as in the case of OT Israel. It would, however, be a mistake to regard them as altogether wanting. Our Lord (Jn 15) Himself told His apostles that He had chosen them that they might bear much fruit. The chosen race exists, as St. Peter reminds us (1 P 2^{9}), appropriating the words of Is 43, 'to show forth the excellencies of him who called them out of darkness into his glorious light.' And St. Paul, in the same sentence (Eph 1^{4-14}) in which he speaks of our election in Christ 'to the praise of the glory of his grace,' reveals as the final goal of the eternal purpose, 'the summing up of all things in Christ, the things in heaven and the things upon the earth'; a goal towards the attainment of which our election cannot be regarded as more than a preparatory stage.

We conclude, therefore, that according to the predominant use of the term in Holy Scripture, election is an attribute of the visible Church, and finds its true goal, not simply in the salvation of certain elect individuals, but in the evangelization of the race. There is indeed good scriptural analogy for a concurrent use of the term in a narrower sense, to describe as it were an election within the elect. For St. Paul uses it (Ro 11^{7}) to describe the inner circle in Israel who accepted the gospel when it came to them—'the remnant' to which alone an immediate salvation had been promised by Isaiah (Ro 9^{27}, Is 10^{23}). And our Lord again and again warns us in His parables that the members of His Church will be subjected to a searching judgment—as the result of which the unworthy will be cast into the outer darkness. It is in this connexion that He uses the warning words about the many called and the few chosen to which allusion has already been made. But there seems no authority for restricting the use of the term, as some theological systems do to this narrower sense—refusing to recognize as elect in any real sense, either those Israelites who in St. Paul's day were disobedient to the gospel, or those members of the visible Church who fail to stand in the judgment. Still less justification is there for assuming that the object of the election of this restricted circle has no end beyond the personal salvation of the individuals who compose it.

iii. We pass on now to the last stage in our inquiry, the consideration of the effect of election. We ask what influence does the fact that they have been chosen by God exert over the elect? May we assume that the divine purpose working through election must of necessity attain its goal? Can we, granting this assumption, find a place in our system for any self-determining power in the human will?

The theological systems, which adopt the restricted sense of the term election, and limit the scope of its operation to its effect on this limited circle, find no difficulty in supplying a logically coherent set of answers to these questions. It is inconsistent with any real faith in the divine Omnipotence to suppose that any deliberate purpose of God can finally fail of its accomplishment. The elect, therefore, being chosen for salvation, cannot fail to attain salvation. No power from without or from within can prevent this result. The fact that they have been chosen for this end carries with it the divine determination to provide all the means required to ensure its attainment. The elect, therefore, receive first a gift of 'irresistible grace' to raise them out of their naturally depraved state, and then a gift of 'final perseverance,' as the result of which they are assured, whatever their intervening lapses may have been, of being found at the moment of death in a state of grace.

These systems do not seem to find room, at least in the all-important moment of conversion, for any true act of self-determination on the part of the human will. A doctrine of reprobation forms an inevitable, however unwelcome, complement to the doctrine of election so defined.

It is impossible not to regard with the deepest respect systems which embody the conclusions of the most strenuous thinkers on this subject, from St. Augustine to Calvin and Jonathan Edwards. At the same time it is a remarkable fact that these conclusions have never been able to secure general acceptance. Unassailable as they may be in logic, it is felt that somehow they fail to fit the facts of life. There are elements in human experience and elements in the divine revelation for which they fail to account. And the general result is one from which the Christian consciousness seems instinctively to shrink in horror. It can only be accepted, if it is accepted at all, as a dark enigma, which our present faculties have no power to solve.

What, then, we seem forced to ask, are the foundations on which these conclusions rest? Can it be that the results of the argument are vitiated by any unsuspected flaw in the premisses?

The premisses are these—(1) God is omnipotent. (2) Because God is omnipotent, the final goal of creation must correspond at all points to His original purpose. (3) The final goal of creation, as far as it affects the human race, involves the division of mankind at the day of judgment into two sharply defined classes, the saved and the lost. (4) The position of any individual man in one or other of these two classes must be traced back in the last resort to the original purpose of God with regard to him.

It seems impossible to take exception to either of the first two of these premisses. It is part of the idea of God, that He must be able to effect what He purposes. To speak in human language, there may be enormous difficulties to overcome in the tasks to which He sets Himself. We have therefore no right to assume that at any moment before the end all things are as He would have them to be. But the end must be a perfect embodiment of His original design.

Again, if the third of these premisses is sound, the fourth seems to follow from it by an inevitable deduction. Everything, therefore, depends on the validity of the third premiss. Is it, or is it not, a true and complete statement of the end towards which 'the whole creation moves'? Now, there can be no doubt that it expresses accurately one side of the scriptural teaching on the subject. It is, however, very far from expressing the whole. On this point, as is well known,* the evidence of Holy Scripture seems divided against itself. It speaks of eternal punishment (Mt 25^{46}). It speaks also of the divine will that all men should be saved (1 Ti 2^{4}). It speaks of those who shall be cast into the outer darkness on their Lord's return (Mt 24^{51} etc.). It speaks also of an end, when God shall be all in all (1 Co 15^{28}). It seems clear that to our apprehension these two sets of statements must be mutually exclusive, unless we may regard the judgment as being not the end, but only a means towards the end. If we reject this solution of the difficulty, we must remain content with an unreconciled antinomy. But, in any case, it is important to remember which side of the antinomy was dominant in St. Paul's mind in the chapters (Ro 9–11) which contain his most explicit teaching on the subject of election.

---

* Westcott, *Historic Faith*, p. 50 ff.

These chapters are devoted to a consideration of the problems raised by the failure of Israel to accept the offer of salvation made to them in the gospel. The first line of solution is suggested by the thought, to which attention has already been called, of an election within the chosen people (Ro 9^{6} 11^{7}). Such an election has parallels in the history of the patriarchal family (9$^{8\text{-}13}$). It is in accordance with express utterances of prophecy (9^{27}). It is therefore no evidence of a final defeat of the divine plan that Israel, as a whole, should for a time be shut out from salvation, and only the election should attain it. St. Paul, however, expressly and indignantly refuses to accept this as a complete solution (11^{11}). It is very far from the perfect triumph, the vision of which has been opened before him. He finds in the salvation of the part a sure pledge of the ultimate deliverance of the whole. 'If the first-fruit be holy, the lump is holy too' (11^{16}). However much the nation as a whole had incurred the divine wrath by their opposition to the gospel, they were yet dear to God for their fathers' sake (11^{28}). The power of their original election was by no means exhausted. The gifts and the calling of God are without repentance (11^{29}). In the end all Israel shall be saved (11^{26}). And lest we should think that in this respect Israel stands on a different footing from the rest of the world, he adds—'God hath shut up *all men* unto disobedience, that he may have mercy upon all' (11^{32}).

In the face of these utterances no scheme of election which assumes the doctrine of everlasting punishment as one of its fundamental postulates, can claim to rest on the authority of St. Paul.

Leaving, then, on one side the attempt to consider the effect of election in its relation to the elect in the narrower sense of the term, what are we to say of its influence in the case of the wider circle? St. Paul's argument in relation to Israel (11$^{28\text{ff.}}$) is sufficient to show that in his view, even in the wider sense, the fact of God's election carries with it an unalterable declaration of the divine purpose for good towards those to whom His call came. He believed also that the will of each man was in its natural state so utterly enslaved to evil that nothing but the divine power could set it free (Ro 7$^{14\text{-}25}$). At the same time, the action of the divine will on the human was not to overwhelm it, but to restore its power of action. He exhorts men to work out their own salvation, just because it is God who is working in them both to will and to do of His good pleasure (Ph 2^{13}). The love of Christ is indeed a constraining motive (2 Co 5^{14}). Without faith in that love as its abiding source and spring the Christian life is impossible (Gal 2^{20}, cf. 1 Jn 4^{19}).* And surrender to that love is the last act for which a man could dream of claiming any credit to himself. It is the gift of God (Eph 2^{8}). Yet the refusal to surrender is not due to defect of grace. It is possible to receive the grace of God in vain (2 Co 6^{1}).

Again, the presence of the divine grace does not supersede the necessity for constant watchfulness (cf. Mk 13^{37} etc.). Even the 'chosen vessel' (Ac 9^{15}) contemplates the possibility of becoming himself a castaway (1 Co 9^{27}). Branches have been cut out of the good olive tree before now—and what has been done once may be done again (Ro 11^{22}). While, however, his language does not leave us room to believe that he regarded himself, at least at this part of his career, as possessing any inalienable gift of 'final perseverance,' or as absolved from the necessity for strenuous effort on his own part 'to make his own calling and election sure' (2 P 1^{10}), it is clear that he had an unfaltering faith in the perseverance of God. He knows whom he has trusted (2 Ti 1^{12}), and is convinced that He is able to keep what has been entrusted to Him. He can trust God to bring to perfection any good work in a man when He has once set His hand to it (Ph 1^{6}). Even the human potter, whom the prophet watched at his work (Jer 18^{4}), when the vessel that he made of clay was marred in his hand, made it again another vessel, as seemed good to the potter to make it.

If anything like this is the truth about the doctrine of election, we need no longer shrink from the contemplation of it as if it were 'a portion of eternity too great for the eye of man.' The favoured few are not chosen, while the rest of their race are left to their doom in hopeless misery. The existence of the Church, however much it may, nay must, witness to a coming judgment, has in it a promise of hope, not a message of despair for the world. As Israel of old was chosen to keep alive in the hearts of men the hope of a coming Saviour of the world, so the Church is chosen to bear abroad into all the world the gospel of a universal redemption, forbidden to leave out one single soul from the vast circle of her intercessions and her giving of thanks, because she is called to live in the light of a revelation which bids her believe and act in the belief that God will have all men to be saved and come to the knowledge of the truth (1 Ti 2$^{1\text{-}4}$). We can enter with full hearts into the spirit of the marvellous doxology with which St. Paul concludes his study of the subject, and cry with him in exultant adoration, 'Oh, the depth of the riches, both of the wisdom and knowledge of God! how unsearchable are his judgments and his ways past finding out. . . . For of him and through him and to him are all things; to whom be glory for ever.'

LITERATURE.—The history of the various controversies connected with Election is given in outline in various treatises on the history of Christian Doctrine as a whole, *e.g.* Hagenbach, Shedd, and G. P. Fisher. The Pelagian controversy is treated at length, in Latin, by G. T. Vossius, 1618; and, in German, by Wiggers, 1821, 1833; Part I. tr. by R. Emerson, Andover, U.S., 1840. *The Anti-Pelagian Treatises of St. Augustine* have been edited for the Oxford University Press by W. Bright, D.D. (1880), and for D. Nutt by Woods and Johnston (1888): cf. J. B. Mozley on *The Augustinian Doctrine of Predestination* (3rd ed. 1883); Cassian's *Conferences*, tr. by E. C. Gibson in Library of Nicene and Post-Nicene Fathers, 1894. A full collection of documents connected with the Gottschalk controversy in 9th cent. in Mauguin, Paris, 1650, 2 vols. 4to; cf. Archbp. Ussher, *Works*, vol. iii. The Scholastic Theories are discussed in chs. ix. and x. of J. B. Mozley. Special treatises by St. Anselm, *De conc. Præsc. et Præd.* etc. (1100), and Thomas of Bradwardine, *De causa Dei c. Pelag.* etc. 1325. For Reformation and Post-Reformation controversies see esp. the various collections of Confessions and Doctrinal Standards, esp. Winer, *Confessions of Christendom*; Niemeyer, *Coll. conff. eccl. reform.* in Latin; cf. Melanchthon's *Loci Communes*, 1521; Luther, *De servo arbitrio*, with Erasmus' reply, 1525; Calvin, *Christianæ Religionis Institutio*, 1536; Arminius, *Disputationes*, xxiv., 1609. For the Jansenist controversy see Molina, *Conc. lib. arb.* etc. 1588, and Jansenius, 'Augustinus,' 1640. The most important treatise of 18th cent. is J. Edwards on *Free Will.* In 19th cent. note esp. Whately, *Essays on some difficulties in the writings of St. Paul*, 1828; G. S. Faber, *The Primitive Doctrine of Election*, 1835; T. Erskine, *The Doctrine of Election*, 1837; T. Chalmers, *Five Lect. on Predestination*, 1837; W. Channing, *The Moral Argument against Calvinism*; Müller, *The Christian Doctrine of Sin*, 1839; M'Cosh, *The Method of the Divine Government*, 1850; Copinger, *A Treatise on Predestination, Election, and Grace*, 1889, including a full bibliography, pp. ccxvi. The relevant sections in Martensen's *Christian Dogmatics* and Cunningham's *Historical Theology* repay careful study; cf. also Sanday-Headlam on *Romans* ix.-xi.

ELECT LADY.—See JOHN (EPISTLES).

EL-ELOHE-ISRAEL (אֵל אֱלֹהֵי יִשְׂרָאֵל).—Upon the 'parcel of ground' which he had bought from the Bĕnê-Hamor, Jacob erected a *maẓẓēbāh* (so Well.,

---

* Cf. Council of Orange, A.D. 529, Canon xxv, *Donum Dei est diligere Deum. Ipse ut diligeretur dedit qui non dilectus diligit.*

Kautzsch-Socin, Ball, Dillm., etc.), and built an altar, giving to the latter the name *El-elohe-Israel*, 'El, the god of Israel,' Gn 33^{20} (E). This appears a strange name for an *altar*, hence Delitzsch (*ad loc.*) supposes it to be meant, as it were, of its inscription. The LXX reads *ἐπεκαλέσατο τὸν θέον* Ἰσραήλ, 'he called upon the God of Israel'; and it is just possible that this is correct, and that we should emend the MT וַיִּקְרָא לוֹ אֵל to וַיִּקְרָא לְאֵל. See God. J. A. Selbie.

EL ELYON (אֵל עֶלְיוֹן) occurs in RVm of Gn 14$^{18.19.20.22}$ where RV (text) has 'God most High,' and AV 'the most high God.' It is probably a proper name, the appellation of a Canaanite deity. In v.^{22} 'I have lift up mine hand unto J", God most High,' there can be little doubt that the introduction of the word 'J"' and the identification of the latter with El Elyon are due to a redactor (so Ball, Kautzsch-Socin, Hommel, etc.). The word J" is wanting in the LXX (*θεὸν τὸν ὕψιστον*), and the collocation of names reminds one of 'Jahweh-Elohim' of Gn 2^{4}–3. See further under God.

It has been proposed by Sayce to identify El Elyon with the 'mighty king' referred to in the letters of Ebed-tob (or, as Hommel writes the name, Abdi-khiba) to the Pharaoh Amenôphis (*c.* B.C. 1400). This 'mighty king' is indeed generally supposed to be the king of Egypt; but Hommel, while agreeing with Driver, against Sayce, that an *earthly* potentate is meant, argues, from the use of the term in the letter of Rib-Adda of Gebal, that it cannot be intended to designate the Pharaoh, but was more probably the king of the Hittites. He suggests, further, that the title 'mighty king' had *originally* a religious significance. He remarks that the thrice-repeated asseveration of Abdi-khiba, that he owed his exalted position not to his father or his mother, but to the 'arm of the mighty king,' sounds like the echo of some ancient sacred formula. 'To the Pharaoh, of course, the "mighty king" meant nothing more than his rival the king of the Hittites; but in Jerusalem the original significance of the words "not my father and not my mother, but the arm of the mighty king" (*i.e.* of El Elyon), must still have been perfectly familiar.' It is well, however, to remember that this is pure conjecture. There is no reason why a title like the 'mighty king' should not have been applied to more monarchs than one. In the letters of Abdi-khiba it may refer to the Hittite king, as elsewhere it may designate the king of Egypt or the king of Babylon, but that it has ever anything to do with El Elyon remains to be proved.

Literature.—Dillm. and Del. on Gn 14; Kittel, *Hist. of Hebrews*, i. 179 f.; Hommel, *Anc. Heb. Tradition* (1897), 151 ff., 156 ff., 226; a series of papers in the *Expository Times*, vols. vii.-viii. (1896–97), on 'Melchizedek,' by Sayce, Driver, and Hommel. J. A. Selbie.

ELEMENT.—A word, with its original *στοιχεῖον* (always in pl.) and its derivative *στοιχείωσις*, entirely confined in sacred literature to the Apocr. and NT. AV renders the Greek variously: six times as 'elements' (Wis 7^{17} 19^{18}, Gal 4$^{3.9}$, 2 P 3$^{10.12}$), twice as 'rudiments' (Col 2$^{8.20}$), once as 'principles' (He 5^{12}), once (*στοιχείωσις*) as 'members' (2 Mac 7^{22}). RV gives 'elements' in Wis, 2 Mac, and 2 P; elsewhere (St. Paul and He) 'rudiments.' In the untranslated (LXX) Apocr. it occurs once, 4 Mac 12^{13}, plainly meaning *elements*. In Wis, as in 2 P, it means unmistakably the physical elements of which the cosmos is composed; in 2 and 4 Mac those of which the human body is composed; in Hebrews its defining genitives show that it stands with them for the elements of Christian knowledge. All these significations march with the usage of the word in secular Greek and follow from its original signification—that which stands in a *στοῖχος*, 'row,' 'series'; then (1) in pl. the letters of the alphabet, not as written signs, but as the primary elements of words (Plat., Aristot.); (2) the primary elements of the universe (from Plat. downwards); (3) as suggested by the usage in Xenoph. (*Mem.* II. i. 1) and Aristot. (see Bonitz, *Index Arist.* p. 702),—where it occurs as the simplest elements of an argument or demonstration,—but definitely only in later Greek from Cornutus (1st cent. A.D.), Plut., Diog. L., downwards, the primary elements, the first principles, of knowledge, almost always with a defining genitive or a guide from the context determining what the knowledge is.

The passages in St. Paul alone remain, Gal 4$^{3.9}$, Col 2$^{8.20}$. In each of these there is the defining genitive *τοῦ κόσμου*, except in Gal 4^{9}, where, however, the *τοῦ κόσμου* of v.^{3} clearly fixes the context. The first natural impression, therefore, is that the *στοιχεῖα* in all these places should be interpreted in the same way; and the second is that, as *τοῦ κόσμου* is not a branch of instruction, like *λογίων* in He, or *ἀρετῆς* in Plut. (*De puer. educ.* 16), the basis of the interpretation should be physical, as with the other instances in biblical literature (cf. for the influence of Wis upon St. Paul, Sanday-Headlam, *Romans*, p. 51), rather than ethical; 'elements of the material world' (cf. Philo, *De Vita Contempl.* ii. 472), rather than 'elements [of religious knowledge] furnished by the material world' (Lightfoot), or 'elements [of religious knowledge] characteristic of the non-Christian world,' *i.e.* elements of religious truth belonging to mankind in general (Meyer). The 'religious knowledge' and 'religious truth,' with their alleged relation to *τοῦ κόσμου*, seem to be imported to help interpreters out of a difficulty.

The impression in favour of the physical interpretation (the interpretation of the word in Clem. *Hom.* x. 9) is confirmed by the context of the passages. In Col 2^{8} what is referred to is not an elementary knowledge from which a moral and spiritual advance could be made, not a circumcision and a ceremonial law with which the heathen cultus would in its ritual have something in common, but a 'philosophy' and a 'deceit,' a delusive speculation offered as superior to the ordinary belief in Christ, and spoken of later (v.^{18}) as characterized by a false humility and a worship of angels. In Gal 4$^{3.9}$ the 'elements of the world,' 'the weak and beggarly elements,' to whose service Jew and heathen Christians were set on returning, are put parallel to 'them that by nature are not gods,' and such service is exemplified in the keeping of days and months and seasons and years. This context at once suggests the worship of the heavenly bodies, which were called especially *στοιχεῖα* as elements of the universe (Just. Mart. *Dial.* 23; Polycrates in Euseb. *HE* iii. 31; Epiphanius, *adv. Hær.* i. *in hær. Pharisæorum*, 2), and whose movements regulated the calendar (Just. Mart. *Apol.* ii. 5; *Letter to Diognetus*, 4); the Colossian worship of angels finding its explanation in the fact that the heavenly bodies were supposed by Jew and heathen to be animated heavenly beings; cf. Philo, *Mundi op.* i. 34; *Enoch* 41. 43; Clem. Alex. *Strom.* vi. 5; Orig. on *Jn* 4^{22}; and, within the Scriptures themselves, Job 38^{7} (*morning stars=sons of God*), 1 Co 15^{40} (*bodies* clothing spirits), Ja 1^{17} (*Father of the lights*). Cf. also Holtzmann, *Neutest. Theol.* 52 f., and Meyer-Haupt on Col 2^{8}.

But a philosophy of astral spirits (which reminds us of modern theosophical speculation) is not quite homogeneous, after all, with the reference to food and drink in Col 2^{16}, though, no doubt, food and drink were 'features of the world's life,' which, for its times and seasons, was under the governance of the heavenly στοιχεῖα. And, further, κόσμος, as predominantly used in biblical Greek, seems to lead us away from rather than towards οὐρανός, and must, at any rate, emphatically include the world inhabited by men. Hence, apparently, we must seek a consistent interpretation for the Pauline passages in a meaning of στοιχεῖα clearly sanctioned by usage at a later date, and also in harmony with ideas prevalent in St. Paul's day. It may be called an extension of the meaning we have just been considering, for it maintained that not only the heavenly bodies, but *all things*, in the heavens and in the earth alike, had their angels, and were under the governance of spirits. This view reveals itself not only in the later Jewish literature, but also in OT and NT.

In the former region we find, for example, in the *Book of Jubilees*, a Jewish composition belonging to the century immediately preceding the Christian era (see Charles, *Eth. Version of the Heb. Book of Jubilees*, Oxford, 1895), the following passage (c. 2): 'On the first day created he the heavens which are above and the earth and the waters and all the spirits that serve before him, and the angels of the face (or presence), and the angels that cry "holy," and the angels of the spirit of fire, and the angels of the spirit of wind, and the angels of the spirit of the clouds of darkness and of hail and of hoarfrost, and the angels of the depths and of thunder and of lightning, and the angels of the spirits of cold and of heat, of winter and of spring, of autumn and of summer, and of all the spirits of his works in the heavens and on the earth and in all depths, and of darkness and of light, and of dawn and of evening, which he has prepared according to the discernment of his understanding.' Everling (see appended literature) quotes also *Enoch* 82^{10-14} (angels of the stars, with names of leaders), $60^{11\text{ff.}}$ (angels appointed over the various phenomena of nature); *Ascensio Isaiæ* (2nd cent. A.D., according to Harnack) 4^{18} (angel of the sun, etc.), 2 Es (81–96 A.D., acc. to Schürer) $8^{21\text{f.}}$ (army of angels . . . in wind and fire), and *Sibyll. Orac.* (2nd cent.) 7^{33-35} (angels of fire, rivers, cities, winds).

The same view is found in the region of OT and NT. In Ps 104^{4} (according to the LXX, as quoted also in He 1^{7}) angels take the shape of winds and fire; in Rev 7^{2} there are the four angels of the four winds, in 14^{18} there is an angel of the fire, in 16^{5} an angel of the waters (cf. the angel of the pool of Bethesda in the spurious passage Jn 5^{4}). In Dn $10^{13.\,20}$ we have angels as princes of Persia and Greece, and in 12^{1} Michael as the great prince 'standing' for Israel, just as he stands for the Church as a whole (Rev 12^{7}), and as each of the seven Churches has its angel (Rev 2. 3), and perhaps also each individual human being (Mt 18^{10}). Everything that happens is wrought by angels: 'there are no secondary causes.' Angel powers are the invisible background of human life and of nature. Such angels are sometimes called 'gods,' as in Ps $82^{1.\,6}$, being 'sons of the Most High' (the Peshiṭta actually gives *angels* in both clauses of the first verse), and God Himself is the 'God of gods' and 'Lord of lords' Dt 10^{17}, Ps $136^{2.\,3}$; cf. *Apoc. of Zephaniah*. 'In the fifth heaven . . . angels called lords,' quoted by Clem. Alex. *Strom.* v. xi. 77. Hence St. Paul's expression 1 Co 8^{5} 'are called gods, whether in heaven or on earth, just as there are gods many and lords many,' yet (Gal 4^{8}) 'by nature not gods' like the 'one God' and the 'one Lord' (1 Co 8^{6}). Thus there was common ground for heathen nature-worship and for Jewish legalism, for the law had been 'administered by angels' Gal 3^{19}, He 2^{2}, Ac $7^{38.\,53}$ (cf. Jos. *Ant.* XV. v. 3; II. i. 3), and was thus on a level lower than the new dispensation; He 2^{5} 'For not to *angels* did he subject the world to come, whereof we speak.' Angels were the media of God's government; and, having 'a certain independence in the discharge of their functions, could stand (to use Ritschl's phrase) in "relative opposition to God," so that, in some cases, their service was an imperfect representation of God, in other cases an actual misrepresentation of Him, and consequently a veiling rather than an unveiling of Him. In this light we can more easily understand how St. Paul can attribute to angels the imperfect and transitory dispensation of the law; and the perplexing passage Col 2^{15}, where Christ is said to have "stripped off from himself the principalities and the powers, and made a show of them openly, triumphing over them in [his cross],"—or, as it may be otherwise worded, "exhibited them in their real nature, leading them in his triumphal train,"—may possibly find its elucidation in the idea that these ἀρχαὶ and ἐξουσίαι (cf. ἐξουσίαν ἐπὶ τῶν ὑδάτων Rev 11^{6}) had hidden His personal activity, and even attracted worship to themselves.'* This relative opposition may become absolute, the relative independence may become absolute insubordination, as in the case of the Prince of Persia (Dn 10^{13}), and Satan and his angels (2 P 2^{4}, Jude ^{6}), yet never in the dualistic sense. Accordingly, Christ can speak of 'the prince of this world' (Jn 12^{31}), and St. Paul of the 'god of this age' (2 Co 4^{4}): both can attribute evils and hindrances to Satan (Lk 13^{16}, Mk 8^{33}, 2 Co 12^{7}, 1 Th 2^{18}), and St. Paul can see the δαιμόνια in the dark background of idolatry (1 Co $10^{20\text{f.}}$). Over all these powers Christ is to triumph (1 Co 15^{24}), either by crushing insubordination and destroying the insubordinate (Rev $19^{20\text{f.}}$), or by displaying His real headship, which by the 'tradition of men' has been concealed (Ph 2^{10}, Eph $1^{20\text{f.}}$, Col $2^{15.\,19}$), and delivering the 'heirs' from the tutelage of the ἐπίτροποι, the 'governors,' the στοιχεῖα τοῦ κόσμου, under whom they had been enslaved (Gal 4^{1-4}) (cf. Everling, *Angelologie*, 74 n., for Michael as called ἐπίτροπος of Israel in later Jewish literature, the word being transliterated into Hebrew).

The suggestion by St. Paul in his τοῖς φύσει μὴ οὖσι θεοῖς (Gal 4^{8}), that by his στοιχεῖα he means angelic powers, is not illustrated by any actual use of the word in this sense in the extant literature of the 1st cent.; but Everling (p. 70) quotes the following passage from the *Testament of Solomon* (date uncertain, probably not very early; Harnack, *Gesch. Alt. Christ. Lit.* i. 2, 858), where the spirits that appear to Solomon say, 'We are the so-called στοιχεῖα, the world rulers of this world.'

For the 'Stoicheiolatry' of the modern Greeks and their belief that there is a στοιχεῖον everywhere to be propitiated, see Kean in *Expos. Times*, viii. (1897) 514.

LITERATURE.—Klöpper, *Brief an die Kol.* 1882; Spitta, *Zweite Brief des Petrus*, 1885; Meyer-Haupt, *Die Gefangenschaftsbriefe*, 1897; Everling, *Die Paulinische Angelologie und Dämonologie*, 1888; Hincks, *Journal of Bib. Lit.*, Boston, 1896, pp. 183–192; and Kean, as above quoted.

J. MASSIE.

ELEPH (הָאֶלֶף), Jos 18^{28} only.—A town of Benjamin, probably the present village *Lifta* W. of Jerus., which has often been wrongly identified with Nephtoah. See *SWP* vol. iii. sheet xvii.

C. R. CONDER.

ELEPHANT ('Ελέφας, *elephas*).—This animal is mentioned in 1 and 2 Mac as employed in war. It is not found in AV of OT, except in the marg. for *behemoth* (Job 40^{15}), and *elephants' teeth* for *ivory* (1 K 10^{22}, 2 Ch 9^{21}). The word is שֶׁנְהַבִּים *shen-*

---

* Quoted from an article by the present writer in the *Thinker*, May 1895, on 'St. Paul's view of the Greek gods.'

ḥabbîm. The word *shēn* is the ordinary word for ivory in OT, and *ḥabbîm* seems to be the same as the modern vernacular word for *elephant* in the languages of Malabar and Ceylon. See IVORY.

G. E. POST.

ELEUTHERUS (Ἐλεύθερος), 1 Mac 11^{7} 12^{30}.—A river which separated Syria and Phœnicia (Strabo, xvi.), and appears to be the mod. *Nahr el-Kebîr* or 'Great River,' which divides the Lebanon in two north of Tripoli.

C. R. CONDER.

ELHANAN (אֶלְחָנָן).—1. In 2 S 21^{19} we read: 'and Elhanan the son of Jaare-oregim the Bethlehemite slew Goliath the Gittite, the staff of whose spear was like a weaver's beam'; in the parallel passage, 1 Ch 20^{5}, by a slight change in the Heb. this becomes 'and Elhanan the son of Jair slew Lahmi the brother of Goliath the Gittite, etc.' The *ductus litterarum* in each case is so similar that most moderns agree that the two passages represent but one original text. It is evident that the superfluous 'oregim' in 2 S has merely crept into the text from the following line (''oregim'= weavers); for the rest, it can hardly be disputed that 'Lahmi the brother of' (אֶת־לַחְמִי אֲחִי, 1 Ch) is a corruption or harmonistic correction of 'the Bethlehemite' (בֵּית הַלַּחְמִי אֵת, 2 S), whilst 'Jaare' (יַעְרֵי, 2 S) is merely a transposition of the letters of 'Jair' (יָעִיר, 1 Ch). It is impossible that any one who had a similar text to that of 1 Ch before him, and who knew the story of 1 S 17, should have altered it into direct contradiction with the earlier narrative, whilst the correction of 2 S by the Chronicler is clearly due to harmonistic motives. It is admitted by most modern critics that the story of David and Goliath in 1 S 17^{1}–18^{5} embodies a later tradition as to the introduction of David to Saul (as opposed to the earlier account, 16^{14-23}), in which the exploit of the warrior Elhanan was transferred to his royal master. The reading of 1 Ch, then, is merely an attempt to harmonize the two independent narratives. 2. Son of Dodo the Bethlehemite, one of David's 'Thirty' (2 S 23^{24}=1 Ch 11^{26}). See DODO (2).

J. F. STENNING.

ELI (עֵלִי) belonged to the house of Ithamar, the fourth son of Aaron, and was apparently the first high priest of that line; cf. 1 Ch 24^{3}, where Ahimelech the son of Abiathar (2 S 8^{17}), who escaped from the massacre at Nob (1 S 22^{20}), is expressly stated to be one 'of the sons of Ithamar.' It is owing to this fact that neither E. nor his immediate successors in the high priestly office, up to and including Abiathar, are mentioned in the genealogy of the high priests from Aaron and Eleazar down to the destruction of the temple (1 Ch 6^{3-15}). The last high priest mentioned before E., Phinehas, belonged to the house of Eleazar (Jg 20^{28}); but no account is given of how or when this change in the priestly succession took place, though it would seem to have had the divine sanction (1 S 2^{28}). The high priesthood returned to the descendants of the house of Eleazar in the reign of Solomon, when Abiathar was deprived of his office and banished from Jerus. because of his participation in the revolt of Adonijah; his place was filled by Zadok, of the house of Eleazar (1 K $2^{26ff.}$), 'the faithful priest' of 1 S 2^{35}.

In the person of E. were united for the first time in the history of Israel the two offices of high priest and judge. He is stated to have judged Israel 40 years (1 S 4^{18} LXX εἴκοσι ἔτη); but this chronological notice, as also the statement of his age (4^{15}), is prob. due to a later deuteronomic redactor. We learn little of the life and character of E. from 1 S, the first eight chapters of which are mainly concerned with the history of Samuel. We gather, however, that he was a man of kindly disposition, and, setting aside the treatment of his sons, sincere and upright in the performance of his twofold office; while his ready submission to the divine sentence pronounced against his house, proves the reality of his belief in the God of Israel. Thus while officiating, by virtue of his priestly office, at Shiloh, he first reproves Hannah, and then, on discovering his error, gives her his blessing; whilst the kindliness of his disposition shows itself in his treatment of the youthful Samuel. It was, however, the kindliness, not of a strong but of a weak character, and as such was destined to come into conflict with the stern dictates of duty. His two sons, Hophni and Phinehas, were, in the language of Scripture, 'men of Belial' (or worthlessness); they 'knew not the Lord,' and profaned their sacred calling by their greed and licentiousness. Nevertheless, their father shrank from the distasteful task of punishing their conduct in the way that it deserved, and contented himself with administering a mild rebuke. Their punishment, therefore, must be left to a higher tribunal, and on two occasions was the aged priest warned of the fate that would befall his sons in consequence of their neglect of duty. At the first an anonymous prophet is sent to show him his sin in honouring his sons above God, and to announce the downfall of his house (' there shall not be an old man in thy house for ever'). In token of the certainty of this impending doom, E. is given a sign, viz. the death of his two sons in one day (1 S 2^{27-36}). The text of this section is apparently in disorder, and would seem to have been expanded by a later deuteronomic author. On the second occasion, the Lord Himself appears to the child Samuel and confirms the sentence which had previously been announced. His faith unshaken, E. submits without a murmur to the divine decree (1 S $3^{1ff.}$). The end is not far off; the Philistines once more swarm across the Shephelah, and at the first attack defeat the Israelites. In vain is the ark of the covenant brought from Shiloh by Hophni and Phinehas. The Philistines renew the battle, and inflict a further crushing defeat on the Israelites; the ark is captured, and Eli's two sons are slain. Overcome by the terrible news, the aged E. fell from his seat by the gate of the city; 'his neck brake, and he died' (1 S 4^{18}).

J. F. STENNING.

ELI, ELI, LAMA SABACHTHANI and **ELOI, ELOI, LAMA SABACHTHANI.**—Slightly different forms of the exclamation uttered by Jesus, according to the evangelists Matt. (27^{46}) and Mark (15^{34}) respectively, shortly before his death. Both evangelists follow it with the translation, in slightly varying terms: 'My God, my God (in Gospel of St. Peter ἡ δύναμίς μου 'my power') why hast thou forsaken me' (*or* 'why didst thou forsake me')—which shows the cry to be a reminiscence of Ps 22^{1}. But the Heb. of the psalm (אֵלִי אֵלִי לָמָה עֲזַבְתָּנִי, *i.e.* eli, eli, lama azabhtani) agrees with neither form of the saying as given by the evangelists. Indeed the MSS of the Gospels exhibit considerable variety of spelling in the case of nearly every word (see Tischendorf, *Nov. Test. Gr. ed. octava crit. maior, ll.cc.*). These variations start interesting inquiries, which this is not the place to follow out. Suffice it to say, that there is in the words a singular and somewhat perplexing combination of Heb. and Aramaic. Whether, for instance, the *Eloi* (Ἐλωί) represents a provincial (Galilean?) pronunciation of the Heb. *Eli* (ἠλί), or the (poetic) sing. *Eloah* (even the reading ἐλωείμ occurs; cf. too, ἐλωεί, Jg 5^{5} Sept.), or is intended for a transliteration of the Aram. *alohi* (*elahi*), has been questioned. Either form, we must suppose, could be so perverted as to serve the mocking pretence that the sufferer was invoking Elijah. For the form *lama* or *lamma* (so in Mark the Geneva version of 1557, and Rheims), representing the Heb. (?), even some modern translators read *lema*, after the Aramaic. The Aram. *shebaḳtani* reappears in *σαβακτανεί* or *σαβακθανί* (so Lachmann in Matt.):—the substitution in the majority of texts of χ for κ being due, perhaps, simply to the ordinary law of Greek euphony; or, should the spelling with χ be equally ancient, it may indicate a variant pronunciation; for the Heb. ק is transliterated by χ in other words also (as *ἀχελδαμάχ* Tdf. Treg., *ῥαχά* Tdf.; see Dalman, *Gram. d. jüdisch-pal. Aramäisch*, p. 304). The curious readings *ζαφθανεί* and *ζαβαφθανεί* (see Tischendorf, *u.s.*) show the influence of the Hebrew. This mixture of tongues points, perhaps, to independent traditions; see the ed. of the Vulg. by Wordsworth and White, esp. the note on Matt. *l.c.* It seems, however, to afford but equivocal support to the theory that an Aram. version was current in our Lord's day, as the ecclesiastical or popular Bible [cf. Gesenius, *Gesch. d. Hebr. Sprache u. Schrift.*, Leip. 1815, p. 73; De Wette, *Einl. ins A.T.* § 57 (ed. Schrader, 1869, § 68); E. Böhl, *Forsch. nach ein. Volksbibel zur Zeit Jesu*, Wien, 1873]. J. H. THAYER.

ELIAB (אֱלִיאָב 'God is father,' A Ἐλιάβ, except in 1 Ch 15^{18}, B א^1 Ἐλιαβά, א* Ἐλιβά, 2 Ch 11^{18} B Ἐλιάν, Jth 8^1 B Ἐλειάβ, א Ἐνάβ).—**1.** According to P, son of Helon, and prince of Zebulun, who represented his tribe at the census and on certain other occasions, Nu 1^9 2^7 $7^{24.29}$ 10^{16} (P). **2.** A Reubenite, father of Dathan and Abiram, Nu $16^{1b.12}$ (JE), Dt 11^6. P gives, as further details, Eliab's father's name, Pallu, and the name of another son, Nemuel (Nu $26^{8f.}$). The father's name, Pallu, probably stood in the original text of Nu 16^{1b}. See Dillmann, *ad loc.*, and art. KORAH. **3.** Eldest son of Jesse, and brother of David. His appearance led Samuel to suppose that he must be the chosen of J″ to succeed Saul. With his two brothers, Abinadab and Shammah, he joined Saul's army at the time that Goliath was insulting Israel; during this time David visited his brother in the camp, and was addressed by E. in insulting terms. E. had a daughter named Abihail (see art.), 1 S $16^{6f.}$ 17^{13-28}, 1 Ch 2^{13}, 2 Ch 11^{18}: on 1 Ch 27^{18} see ELIHU. **4.** According to the reading of 1 Ch 6^{27} (Heb. ^{12}) the name of an ancestor of Samuel—an Ephraimite. Variants are Eliel, 1 Ch 6^{34} (Heb. ^{19}), and Elihu, 1 S 1^1. See ELIHU. **5.** One of the Gadite warriors who joined David during his wanderings, 1 Ch 12^9. These warriors and their doings are described in 1 Ch $12^{8.14f.}$. **6.** A Levite who, according to the Chronicler, was a musician appointed in the time of David to play the psaltery (נֵבֶל), in the first instance in connexion with the bringing up of the ark to Jerus., 1 Ch $15^{20ff.}$. Perhaps the name was that of a (post-exilic) family of singers. Cf. references in AMMIEL (No. 3). **7.** According to the genealogy in Jth 8^1, a remote ancestor of Judith, and consequently a Simeonite, cf. 9^2; and with 'Salamiel, the son of Salasadai' (8^1), cf. Nu 1^6 (Heb. and LXX). G. B. GRAY.

ELIADA (אֶלְיָדָע 'whom God takes notice of,' *or* 'cares for'; *lit.* 'knows.' For this *nuance* of the verb, cf. Gn 18^{19}, Ex 2^{25}, Ps 1^6 RV).—**1.** Ἐπιδαέ, repeated as Βααλειμάθ B, Ἐλιδαέ A, Βααλιλάθ Luc. A son of David (2 S 5^{16}), called בְּעֶלְיָדָע Beeliada (which see) in 1 Ch 14^7. **2.** (Ἐλιαδαέ A, om. B Luc.) Father of Rezon, a Syrian, captain of a marauding band which resisted Solomon's authority (1 K 11^{23}). **3.** (Ἐλειδά B, Ἐλιαδά A Luc.) A warrior of Benjamin (2 Ch 17^{17}). C. F. BURNEY.

ELIADAS (Ἐλιαδᾶς), 1 Es 9^{28}.—In Ezr 10^{27} ELIOENAI.

ELIAHBA (אֶלְיַחְבָּא 'God hideth'), one of David's 'Thirty,' 2 S 23^{32}, 1 Ch 11^{33}; הַשַּׁעַלְבֹנִי 'the Shaalbonite' of the Heb. text, should be more correctly pointed הַשַּׁעֲלַבִּנִי 'the Shaalabbinnite' (cf. Jos 19^{42}). J. F. STENNING.

ELIAKIM (אֶלְיָקִים 'whom God sets up'; cf. Sabæan הקמאל, יקמאל; Ἐλιακείμ (Ἐλιακίμ א Q^a in Is 22^{20})).—**1.** Son of Hilkiah, and prefect of the palace in succession to Shebna during the latter or middle portion of Hezekiah's reign (Is $22^{20ff.}$, 2 K $18^{18ff.}$ = Is $36^{3ff.}$). This prefecture, described as עַל־הַבַּיִת 'over the household,' seems to have embraced the discharge of all the domestic affairs of the king, and was a position of the highest rank, being held by Jotham the heir to the throne, after his father king Azariah had been smitten with leprosy (2 K 15^5). First mention of the office occurs during Solomon's reign (1 K 4^6), and it existed, apparently with similar powers and dignity, in the kingdom of Israel as in Judah (1 K 16^9 18^3, 2 K 10^5). Delitzsch and others compare the Merovingian office of *major domus* (*maire du palais*). The prefect appears to have also been known as סֹכֵן *ṣōkēn*, rendered by RV 'treasurer,' m 'steward.' This title is connected by Cheyne (*Is.* ii. 153) with the Assyr. *šaknu* 'a high officer,' from *šakin* 'to set up, place'; but the fact that the fem. סֹכֶנֶת *ṣōkéneth* is used of Abishag in 1 K 1^2 seems rather to connect the word with the verb הִסְכִּין *hiṣkīn*, 'deal familiarly with,' from which was derived the general meaning of *caretaker* or *attendant* (see the writer's note on 1 K 1^2). The title occurs in a Phœn. inscription from Lebanon belonging probably to the 8th cent. B.C.: 'Sōkēn of the New City, servant of Hiram, king of the Sidonians' (*CIS* I. i. 5).

E. appears to have been a disciple or political ally of the prophet Isaiah, who predicts in glowing terms his succession to the office of prefect in place of his unworthy predecessor (Is $22^{20ff.}$). At his institution he is to be invested with long tunic and girdle, the insignia proper to his office, and is to receive as prime minister the title of 'Father' of the kingdom (v.^{21}, cf. Gn 45^8, 1 Mac 11^{32}). In figure, if not literally, as part of the ceremony of institution, the key of the house of David is said to be laid on his back, *i.e.* he is to act with full powers as the king's vizier or representative (v.^{22}, quoted as a Messianic type Rev 3^7; cf. Mt 16^{19}). At Sennacherib's invasion of Judæa, B.C. 701, Isaiah's prediction has come to fulfilment, and E. appears as prefect, while Shebna holds merely the lower office of scribe.

The last two vv. of the prophecy (Is $22^{24.25}$) are involved in considerable obscurity.

(*a*) Most obviously 'the nail that was fastened in a sure place,' v.^{25}, must refer, as in v.^{23}, to E., whose fall will result from the abuse of his high position by the undue exercise of nepotism (v.^{24}, the vessels large and small denote the various members of his family of greater or less importance. כֹּל כָּבוֹד, RV 'all the glory,' is rendered by Delitzsch '*the whole heavy lot*'). Such a prediction, however, is scarcely consistent with the enthusiasm of vv.$^{20-23}$, supposing the whole prophecy to have been written down by Isaiah at one sitting, either prior to E.'s elevation (Orelli), or 'after the fate of both dignitaries, revealed to him at two different times, had found its fulfilment' (Delitzsch). If, therefore, vv.$^{24.25}$ refer to E., we must conclude (Hitzig, Cheyne) that they were penned subsequently to the former part of the prophecy, whether by Isaiah himself, or by some other hand.

(*b*) Gesenius, Ewald, Driver, Dillmann consider the 'nail' of v.^{25} to be different from that of v.^{23}, and to refer back to Shebna, whose fall is to take place 'in that day,' *i.e.* simultaneously with the rise of E.

2. The orig. name of Jehoiakim, king of Judah, which see (2 K 23^{34}=2 Ch 36^{4}). **3.** A priest who took part in the dedication of the wall of Jerus. under Nehemiah (Neh 12^{41}). **4. 5.** In Mt 1^{13} and in Lk 3$^{30.\,31}$; ancestors of our Lord (see GENEALOGY). C. F. BURNEY.

ELIALI (A Ἐλιαλεί, B Ἐδιαλείς), 1 Es 9^{34}.—The name either corresponds to Binnui in Ezr 10^{38} or is unrepresented there.

ELIAM (אֱלִיעָם 'God is kinsman'; Ἐλιάβ, BA in 2 S 11^{3}, and B in 2 S 23^{34}, where A has Οὐελιαφ).*—**1.** Father of Bath-sheba, whose first husband was a Hittite, 1 S 11^{3} (=1 Ch 3^{5}, where Eliam is called Ammiel; see below). Eliam himself, therefore, may have been a foreigner. **2.** Son of Ahithophel the Gilonite, and one of David's heroes. It is not impossible that this Eliam is the same as the preceding, but there is no evidence that such was the case (2 S 23^{34}). The omission of the name from the parallel list in 1 Ch 11 is probably due to textual corruption. See Driver, *Samuel*, note on 2 S 23^{34}. G. B. GRAY.

ELIAONIAS (A Ἐλιαωνίας, B Ἐλιαλωνίας), 1 Es 8^{31}.—A descendant of Phaath-moab, who returned from Babylon with Esdras. In Ezr 8^{4} ELIEHOENAI.

ELIAS.—See ELIJAH.

ELIASAPH (אֶלְיָסָף 'God has added,' Ἐλισάφ).—**1.** Son of Deuel, and prince of Gad at the first census (Nu 1^{14} 2^{14} 7$^{42.\,47}$ 10^{20} P). **2.** Son of Lael, and prince of the Gershonites (Nu 3^{24} P).

ELIASHIB [אֶלְיָשִׁיב 'God will (or, does) bring back (or, restore).' In LXX the most frequent forms are Ἐλεισούβ (B), Ἐλισούβ (א A), Ἐλειασείβ (א B), Ἐλιασείβ (AB)].—A popular name after the Exile; perhaps, in spite of 1 Ch 24^{12}, it was not in use in pre-exilic times. The persons of this name mentioned in OT are—**1.** The high priest who was contemporary with Nehemiah. He was son of Joiakim, grandson of Jeshua the son of Jozadak, the contemporary of Zerubbabel (Neh 12^{10}, Ezr 3^{1}), and father of Joiada (Neh 12^{10} 13^{28}). He assisted in the rebuilding of the walls of Jerus. during Nehemiah's governorship (Neh 3^{1}). He can have had no sympathy with the exclusive policy of Ezra and Nehemiah, for both he himself and members of his family allied themselves with the leading foreign opponents of Nehemiah (Neh 2^{10}). The exact nature of Eliashib's own alliance with Tobiah the Ammonite is not stated (Neh 13^{4}), but a son of his son Joiada, during the period of Nehemiah's recall to the Pers. court, married a daughter of Sanballat the Horonite, and was in consequence driven away by Nehemiah on his return (Neh 13^{28}). This, combined with the expulsion of Tobiah from the temple-chamber provided for him by E. (Neh 13$^{4\text{ff.}}$), must have created, even if it had not existed before, an open schism between E. and Nehemiah. Cf. further below (No. 7), and Ryle's notes on the passages cited above in the Cam. Bible ed. of Ezr-Neh. **2.** A singer of the time of Ezra, who had married a foreign wife (Ezr 10^{24}), called in 1 Es 9^{24} Eliasibus. **3.** An Isr. of the family of Zattu (Ezr 10^{27}, in 1 Es 9^{28} Eliasimus); and **4.** another of the family of Bani (Ezr 10^{36}), who had married foreign wives. **5.** A son of Elioenai and descendant of David. From the position of the name in the genealogy this E. must have lived after the Exile, and possibly as late as the middle of the 4th cent. (1 Ch 3^{24}). **6.** According to the Chronicler (1 Ch 24^{12}), E. was the name of a priestly house in the time of David. But see the references and the literature cited in AMMIEL 3. **7.** Father of Jehohanan, to whose chamber in the temple Ezra resorted (Ezr 10^{6}). But the suggestion (see, *e.g.*, Ryle on Ezr 10^{6}) that this E. is identical with No. 1 is not improbable. See art. JOHANAN. G. B. GRAY.

ELIASIB (A Ἐλιάσιβος, B Νάσειβος), 1 Es 9^{1}.—A high priest in the time of Neh. Ezr 10^{6}, ELIASHIB.

ELIASIBUS (A Ἐλιάσιβος, B -σεβος, AV Eleazurus, perhaps from the Aldine Ἐλιάζουφος, ρ being read for φ), 1 Es 9^{24}.—One of the 'holy singers,' who put away his strange wife. In Ezr 10^{24} ELIASHIB.

ELIASIMUS (A Ἐλιάσιμος, B -ει-ει-, AV Elisimus), 1 Es 9^{28}.—In Ezr 10^{27} ELIASHIB.

ELIASIS (Ἐλιασείς), 1 Es 9^{34}.—This name and Enasibus may be duplicate forms answering to Eliashib in Ezr 10^{36} (Speaker's *Comm.*).

ELIATHAH (אֱלִיאָתָה or אֱלִיָּתָה 'God hath come').—A Hemanite, whose family formed the twentieth division of the temple service (1 Ch 25$^{4.\,27}$).

ELIDAD (אֱלִידָד 'God has loved,' Ἐλδάδ).—Son of Chislon, and Benjamin's representative for dividing the land, Nu 34^{21} P (perh.=Eldad, one of the elders, Nu 11$^{26\text{f.}}$ E).

ELIEHOENAI (אֶלְיְהוֹעֵינַי 'to J" are mine eyes').—**1.** A Korahite (1 Ch 26^{3}, AV Elioenai). **2.** The head of a family of exiles that returned (Ezr 8^{4}, AV Elihoenai), called in 1 Es 8^{31} Eliaonias.

ELIEL (אֱלִיאֵל, prob. 'El is God').—**1.** A Korahite (1 Ch 6^{34}), prob.=Eliab of v.^{27} and Elihu of 1 S 1^{1}. **2. 3. 4.** Mighty men in the service of David (1 Ch 11$^{46.\,47}$ 12^{11}. **5.** A chief of eastern Manasseh (1 Ch 5^{24}). **6. 7.** Two Benjamite chiefs (1 Ch 8$^{20.\,22}$). **8.** A Levite mentioned in connexion with the removal of the ark from the house of Obed-edom (1 Ch 15$^{9.\,11}$). **9.** A Levite in time of Hezekiah (2 Ch 31^{13}).

ELIENAI (אֱלִיעֵינַי, textual error for אֶלְיוֹעֵינַי Elioenai).—A Benjamite (1 Ch 8^{20}). See GENEALOGY.

ELIEZER (אֱלִיעֶזֶר 'God is help').—See ELEAZAR. **1.** Abraham's chief servant, a Damascene (Gn 15^{2}, AV, RVm). (The construction here is difficult, but the words can hardly be rendered as a double proper name as RV, 'Dammesek Eliezer.' Whatever the exact construction, the words, unless there is a corruption in the text, must be intended to suggest that E. was in some way connected with Damascus. See Delitzsch, *New Com. on Gen.* ii. 4). This same E. is prob. the servant referred to in Gn 24. **2.** A son of Moses by Zipporah; so named to commemorate the deliverance of Moses from Pharaoh (Ex 18^{4}, 1 Ch 23$^{15.\,17}$). **3.** The son of Becher a Benjamite (1 Ch 7^{8}). **4.** The son of Zichri, captain of the tribe of Reuben in David's reign (1 Ch 27^{16}). **5.** The son of Dodavahu of Mareshah, who prophesied the destruction of the fleet of ships which Jehoshaphat built in co-operation with Ahaziah (2 Ch 20^{37}). **6.** An E. is mentioned among the 'chief men' whom Ezra sent from Ahava to Casiphia to find Levites and Nethinim willing to join the expedition to Jerusalem (Ezr $8^{16f.}$). **7. 8. 9.** A priest, a Levite, and a son of Harim, who had married 'strange women,' *i.e.* wives of non-Israelitish descent, in the time of Ezra (Ezr $10^{18. 23. 31}$). **10.** One of the priests appointed to blow with the trumpets before the ark of God when David brought it from the house of Obed-edom to Jerus. (1 Ch 15^{24}). **11.** A Levite mentioned in 1 Ch 26^{25}. **12.** An E. is mentioned in the genealogy of our Lord given by St. Luke (3^{29}).

---

* *Note on the genuineness of the name.*—The name occurs but twice in MT; in one case (2 S 11^{3}) all VSS except the Vulg., and in the other the LXX, show a different name. In spite of this a close comparison of the VSS confirms the correctness of the Massoretic tradition of the rare name Eliam, which certainly occurs in Phœn. (*CIS* 147, אלעם, on a Sardinian inscription) as against the commoner names which appear in the VSS. Ammiel (1 Ch 3^{5}) may be an actual alternative name of the same man (cf. Jehoiachin and Coniah), or may be the alteration of an offensive, because misunderstood, name (Eliam being regarded as='God of the people') into a less exceptional form (Ammiel regarded as='People of God'); see further, Gray, *Stud. in Heb. Proper Names*, p. 45.

W. C. ALLEN.

ELIHOREPH (אֱלִיחֹרֶף, possibly 'God of autumn,' *or* 'of ripe age'; cf. Job 29^4 RV. Ἐλιάφ B, Ἐναρέφ A, Ἐλιάβ Luc.).—One of Solomon's scribes (1 K 4^3).

ELIHU (אֱלִיהוּ).—**1.** An ancestor of Samuel, 1 S 1^1, called in 1 Ch 6^{34} Eliel and in 1 Ch 6^{27} Eliab (wh. see). **2.** A variation in 1 Ch 27^{18} for Eliab, David's eldest son, 1 S 16^6. Kittel (in Haupt's *OT*) emends the text of Ch to אֱלִיאָב. **3.** A Manassite who joined David at Ziklag, 1 Ch 12^{20}. **4.** A Korahite porter, 1 Ch 26^7. **5.** See next article. **6.** (Ἠλειού) an ancestor of Judith, Jth 8^1.

ELIHU (אֱלִיהוּא, LXX Ἐλιοῦς, 'my God is He,' cf. Elijah, 'my God is J″').—Described in Job 32^2 as 'son of Barachel the Buzite, of the family of Ram'; he would therefore be descended from Nahor, brother of Abraham (Gn 22^{21}, J). E. is introduced as an interlocutor in the Book of Job, speaking after the three friends Eliphaz, Bildad, and Zophar have failed to convince Job by their arguments. He is described as younger than the three; he undertakes, however, to act as moderator between the disputants, and speaks at length in chs. 32–37. But the fact that E. is mentioned neither in the prologue nor in the epilogue of the book; that his arguments do not add substantially to the discussion; that the transition from ch. 38 to ch. 39 is abrupt and awkward; together with certain features of style in the speeches assigned to E.,—have led most critics to the conclusion that chs. 32–37 represent a later addition to the book. Lightfoot, Rosenmüller, Derenbourg, and others support the strange conjecture that E. is the name of the author himself (see JOB, BOOK OF).

W. T. DAVISON.

ELIJAH (אֵלִיָּהוּ; אֵלִיָּה in 2 K $1^{3. 8. 12}$, Mal 3^{23} [Eng. 4^5] 'J″ is God'; LXX Ἠλειού; NT Ἠλείας, AV Elias).—**1.** The loftiest prophet of the OT, raised up by J″ at a crisis in the history of Israel to save the nation from lapsing into heathenism. His public life is sketched in a few narratives wonderful for their vivid representations and graphic details. His personal history is full of human interest, and presents lessons of the highest ethical and spiritual value. His first appearance is surrounded with an element of mystery which is in keeping with his whole history. There is but a single brief reference (1 K 17^1) to his origin, and even that is not without ambiguity. The words are tr. by AV, in accordance with the MT, 'E. the Tishbite, who was of the inhabitants of Gilead.' If this rendering is correct, it signifies that a certain place called Tishbeh or Tishbi of Gilead, not named elsewhere, had the distinction of giving birth to the prophet. Some have sought to identify it with Thisbe of Naphtali, mentioned in To 1^2. They point out that the correct rendering of מתשבי (on the assumption that it is a common, not a proper name) is not 'of the inhabitants,' but 'of the sojourners' (so RV), which would imply that E. came from another or foreign district. But the LXX makes the disputed word a proper name, and reads 'E. the Tishbite from Thesbon of Gilead.' This reading seems to be followed by Josephus (*Ant.* VIII. xiii. 2). It is supported by the fact that, whenever the word is a common noun, it is written תּוֹשָׁב. There seems therefore little reason to doubt that E. was a native of the wild but beautiful mountain district of Gilead, the highlands of Palestine, on the eastern side of the Jordan, bordering on the great desert. There he had a prophet's nurture in solitude. He always loved the wild defiles and rushing torrents of his native land. Lonely mountains and bleak deserts were congenial to his spirit. He learned to dwell familiarly on the sterner aspects of religion and morality. He had the austere, ascetic, monotheistic spirit of the desert. He learned the fear of J″ which knew no other fear.

Nothing is said of his parentage, and the omission is in striking contrast to the wealth of detail with which the descent of some other prophets is stated. E. occupied from the first a unique and exalted position in the goodly fellowship. He seemed to be like Melchizedek 'without father, without mother, without genealogy, having neither beginning of days nor end of life.' Strange traditions arose in later times among the Rabbis, as that he was Phinehas, the grandson of Aaron, returned to life, or an angel in human form.

E.'s whole manner of life is meant to be a protest against a corrupt civilisation. He has some of the habits of the ancient Nazirite, and not a few of the characteristics of the modern Bedawin. His unshorn locks streaming down his shoulders and his rough mantle of camel's hair (2 K 1^8) alone make him a remarkable figure in Israel. He has the fleet foot of a true son of the desert (1 K 18^{46}), and an iron frame which enables him to endure a forty days' fast (19^8). He dwells in the clefts of the Cherith (17^3), sleeps under a desert broom (19^5), lodges in the cave of Horeb (19^9), and haunts the slopes of Carmel. If he enters a city, it is only to deliver the message of J″ and be gone. His startling appearances, abrupt speeches, and sudden disappearances create around his personality a profound air of mystery. He is believed to be borne hither and thither by the Spirit of J″ (1 K 18^{12}, 2 K 2^{16}). He comes down from the hills of Gilead as the champion and prophet of J″ in the dark days of Israel's apostasy. He comes to bear witness to truths which ought never to have been denied in Israel. Like every true reformer, he takes his stand upon old principles. He is the personified conscience of the nation. He comes, a prophet of heroic mould, to witness by deeds rather than by words.

The spiritual danger which E. was called to avert arose out of a political alliance formed between Israel and Phœnicia, and cemented by the marriage of Ahab and Jezebel, the son and the daughter of the allied kings. A covenant between two Semitic peoples was always supposed to imply a friendship between their gods. Its natural sequel was a syncretism of faith and worship. That Ahab did not at first think of denying J″ is proved by the names he gave his sons—Ahaziah (J″ holds) and Jehoram (J″ is high). But his religious instincts were as dull as his political instincts were keen. Brave enough in battle, and on the whole a successful ruler, he was morally weak, and came completely under the baneful influence of his strong-minded Tyrian wife, a fanatic in her own faith. It was to please her that he not only erected a temple to Baal at Samaria (1 K 16^{32}) and introduced a multitude of foreign priests (18^{19}), but allowed a religious persecution, in which many of the prophets of J″ are said to have been slain ($18^{4. 13}$). The effect of these events on the religious life of Israel could not be small. The people had hitherto been ensnared only by the gods of the hostile tribes of Canaan whom they had subdued. They were now tempted to adopt the cultus of a great allied nation, and the temptation proved too strong to be resisted. Baal-worship became the court religion, and, if its progress had not been effectually checked, would soon have become the national religion.

To prevent this disastrous consummation is E.'s life-task. His fiery zeal against the Tyrian cultus springs from moral at least as much as religious considerations. That superstition had such accompaniments as would soon sap the moral vigour of any nation. A patriot as well as a prophet, E. comes to save his country. His ruling passion is jealousy for the Lord God of hosts (1 K 19^{10}). He knows the God of Israel as a moral and spiritual being, and all his demands on behalf of J″ are moral and spiritual. The details of ritual do not trammel a man of his spiritual force. He knows nothing of the Deuteronomic law which condemns local altars (1 K 18^{32}). It is not recorded that he ever visits Jerusalem. But Gilgal, Bethel, Carmel, and other ancient sanctuaries of the true religion, are dear to him. Sinai is, from its associations, the holiest ground. He believes in a covenant in virtue of which J″ became the God of Israel, and Israel the people of J″. And the conviction is burned into his mind that there can be no alliance between the God of Israel and any other divinity. His jealousy for J″ is the counterpart of J″'s jealousy for Israel. It is to E. an intuitive truth that J″ can brook no rival in His kingdom, and he is amazed that any can doubt it: his spirit blazes with contempt against all 'weak-kneed' persons (1 K 18^{21}) who halt between two opinions.

It is contended by some critics (Wellhausen, Stade, etc.) that E. was not a monotheist, like Amos, Hosea, and the other literary prophets: that he was like the mass of the people of his time in regarding J″ as only the God of Israel—a local god—and believing that every other nation had its own deity. It is affirmed that E. was a 'henotheist.' Now, it is sufficiently clear that the faith of many of his contemporaries is of this rudimentary order: the contest between J″ and Baal is to them a real struggle between rival deities. But E.'s lofty conception of J″ virtually excludes all other objects of worship—makes all the gods idols. It is difficult to believe that the Baal whom he treats with such irony and contempt (1 K 18^{27}) has to his mind any reality. At any rate, it is but a short step from E.'s 'henotheism' to absolute monotheism.

The memoirs of E. seem to be derived from several sources. The narratives in 1 K 17–19. 21, 2 K 2, form a unity. They took shape in Northern Israel, as is indicated by the remark that Beersheba 'belongeth to Judah' (1 K 19^{3}). They were probably written under the influence of the literary prophets of the Northern Kingdom, about the beginning of the 7th cent. B.C. These narratives are composed in the highest style of literary art. Their distinctly popular character is apparent, and it has been noted by W. R. Smith that they read like a transcript of a vivid oral tradition (*Prophets of Israel*, 116). Like other historical parts of the OT, they may have lived in the mouths of the people for generations, forming a powerful means of religious education, before they were committed to writing.

E. comes on the stage of history with the same startling abruptness with which he makes his first appearance before Ahab. He is sent to announce that J″ is about to avenge the apostasy of Israel by bringing a long drought on the land. This message delivered, he vanishes into solitude. He is guided by the Spirit of J″ to the brook Cherith 'that is before,' *i.e.* to the east of, 'Jordan' (1 K 17^{3}), probably in his native Gilead. See CHERITH. There his life is miraculously sustained by ravens, which bring him flesh every morning and evening (vv.$^{4-6}$). Prosaic critics have tried to eliminate the marvellous element from the story. They call attention to the fact that the word ערבים, which is so pointed in the MT as to mean 'ravens,' signifies with another set of vowel-points 'Arabs,' with another 'merchants,' or 'inhabitants of Oreb.' But, not to emphasize the fact that ravens eat flesh, which Arabs generally avoid, it is to be noted that the marvellous element is quite in keeping with other parts of E.'s story. In the oral tradition the prophet's friends were doubtless 'ravens': the narrative would not have been thought worth preserving but for the miraculous feature, which is reproduced in all the ancient versions.

When the brook Cherith dries up in the long drought, the prophet goes, under divine direction, to Zarephath, a city of heathen Tyre (17^{8}), where he is hospitably received by a poor widow whom the famine has reduced to her last meal (v.^{12}). The prophet finds a well-spring of kindness in the heart of a heathen country. He learns to sympathize with one of another race and a strange religion, and his stern nature is in some degree softened by contact with human suffering. He rewards the widow's charity first by miraculously increasing her small store of meal and oil, and later by restoring her child to life (vv.$^{14-24}$). His experience begins to prepare him for a higher revelation, which he is in due time to receive.

Meanwhile the king, in his rage against the prophet of evil, sends messengers into all nations (1 K 18^{10}) to search for E., but they report that their quest has been fruitless. For three years there falls no rain or dew in Israel. The famine is so severe that the king and his chamberlain, Obadiah, have to scour the country in search of provender for the royal stables (v.$^{5f.}$). While they are engaged in this quest, E. suddenly appears before Obadiah and bids him summon his master (v.$^{7ff.}$). The meeting of the prophet and the king is very dramatic. Ahab has never been able to stifle the conscience of an Israelite, and cannot withhold his respect from the prophet of J″. He bitterly accuses E. of being the troubler of Israel; but when the prophet flings back the charge, the king is silenced (v.$^{17ff.}$). E. challenges, or rather commands, him to summon the prophets of Baal to a contest between J″ and Baal on Mount Carmel. The worshippers of Baal shall sacrifice to their God; E. himself will sacrifice to J″: the god who answers by fire, he shall be the God. The king consents (v.$^{19f.}$). The narrative of the contest (1 K $18^{21ff.}$) is one of the grandest in the OT. Apart from its historical value, it is precious as an ideal representation of the conflict which is always being waged between true and false religion, and of combatants who are always meeting. On the appointed day the king and the 400 prophets of Baal, E. and 'all the people,' assemble on Carmel. The prophets of Baal, having built an altar and laid their sacrifice, pray to their god from morning till evening, and are excited to a frenzy by their fruitless efforts and the biting sarcasm of E. In the evening E. rebuilds the ancient altar of J″—thrown down in these times of persecution—and utters a few calm words of prayer to J″. The lightning falls and consumes not only the sacrifice, but the altar and the water poured into trenches around it. The people fall on their faces, and with loud voices acknowledge that J″ is God. Then, in an access of irrepressible zeal, they fall upon the 400 prophets who have deceived the nation, and put them all to the sword. E. prays that the drought may cease, and before nightfall there is a tempest of rain, in the midst of which the strange prophet, seized by a sudden impulse, carried away by the emotion of triumph, rolls his mantle together and runs like an *avant-courier* in front of the royal chariot all the sixteen miles from Carmel to the gates of Jezreel (vv.$^{42-46}$).

E. imagines that the battle for truth has been fought and won, and that his task is virtually accomplished. But his triumph is brief. When he receives a message that Jezebel has sworn to have his life (19^{2}), his sanguine hope for the restoration of the true religion is changed in a moment into blank despair. He feels with a sinking heart that he has laboured for naught and in vain. God Himself has contended in vain with human folly. Nothing can be made of a king whom miracles will not convince, but who is turned round the finger of a woman. The apostate nation will remain apostate. Seeing all this (the LXX and other ancient versions, instead of 'and he saw it,' read 'and he was afraid,' 19^{3}), E. flees for his life to Judæa, and, leaving his servant at Beersheba, plunges into the desert, where he is alone with J″. Weary, famished, and heavy of heart, he lies down under a desert broom [so RVm; see JUNIPER], and is willing to die. He feels that his life has been a failure. He has been worsted in the battle of life, and something tells him that he has deserved to be. He is no better than his fathers. He has now nothing more to live for. It is vain to continue the unequal struggle. All men have forsaken him. He has no friend but J″, and he prays that He would release him from his fruitless task (vv.$^{3.\,4}$).

God is very kind to his servant, first satisfying his bodily wants, and then giving him a new revelation such as his soul needs. As the prophet sleeps under the desert bush, he is awakened by the touch of an angel, who sets meat and drink before him, and on the strength of that food he goes a forty days' journey (forty being, as usual, a round number) to Horeb (vv.$^{5-9}$). It is not difficult to understand what the prophet seeks at that mountain sanctuary. He desires to meet J″. Men have failed him: he wants to make sure of God. He goes to Horeb to stand where Moses stood. His heart cries out for the vindication of the moral law. Finding a cave, he lodges there (v.^{9}). (In the Heb. it is *the* cave, either as already a place to which pilgrims resorted, or from the fame of this single visit: the traditional cave is in a secluded plain under the highest peak of Jebel Mûsa; see SINAI.) The narrative which follows (vv.$^{11-18}$) is spiritually one of the profoundest in the OT. J″ represents to E., by a magnificent acted parable, the contrast between law and grace, judgment and mercy. As the prophet of J″, E. has been using the weapon of force. He has never conceived it possible to defeat the enemies of God by any other weapon. He has magnified God's strictness with a zeal He will not own. And he has failed. Force has left men hard and indifferent. J″ here makes experiment upon E. with his own weapon. He visits the mountain with a hurricane, with an earthquake, and with a fire. The prophet's wounded spirit is not moved by any of these. J″ is not in them. But in the calm which follows the tumult he hears a still small voice (RVm 'a sound of gentle stillness') which thrills his inmost being; he feels that God is there; self-abased, he wraps his face in his mantle and waits to receive the divine communications. He is thus taught the meaning of his failure. He is shown in a parable 'a more excellent way.' In the heart of Sinai he learns the gentleness of God. Others like himself may be won by grace, whom might and wrath have failed to move. The kingdom of God comes not so much by startling miracles, but through quiet human agencies and in the slow movements of history. E. is therefore shown that J″ has still a great work for him to do: he must shape the destinies of two great nations, and provide for the continuance of the prophetic succession. Three commands are laid upon him: to anoint Hazael to be king over Syria, Jehu to be king over Israel, and Elisha to be his own successor. And he is comforted with the assurance that the work in which he has been engaged has not been a failure: J″ reserves for Himself seven thousand who have not bowed the knee to Baal.

With faith restored E. returns to his task (vv.$^{19-21}$). On his way to Damascus he finds Elisha at the plough, and throws his mantle over him—a symbolic action by which he claims him as his son and invests him with the prophetic office. Elisha leaves all, and ministers unto him. From this time E. is never alone: he has a companion to whom he becomes a true spiritual father (2 K 2^{12}), winning his filial affection as well as profound veneration.

Here there is a break in the narrative. It is nowhere stated by what means E. sought to fulfil the other two parts of the commission which he received at Horeb. The account of the actual completion of his task by Elisha in 2 K 9. 10 is apparently by another narrator. Nor is it directly recorded what means E. afterwards used for the advancement of the true religion. But there are deeply interesting hints in the memoirs. Cheyne's singular statements (*Hallowing of Criticism*, p. 143), that E. was weak in spiritual intuition, and that the lesson of Horeb was lost upon him, do not seem to be warranted. On the contrary, there are not wanting indications that from the day on which E. heard the still small voice there was another spirit in him. He does not again attempt to suppress Ahab's idolatry by force. He leaves the apostate king alone, and waits the course of events. If he does not entirely abandon his lonely desert life, he at least becomes a familiar figure in the schools of the prophets at Gilgal, Bethel, and Jericho (2 K 2^{1-4}). His personality, and probably his teaching, make a profound impression upon the young prophets. He kindles in their minds his own zeal for J″; he transfuses his spirit into them; the homage which they pay to Elisha (2 K 2^{15}) is entirely due to the fact that they perceive in him the spirit of the greater prophet.

When E.'s moral indignation once more flashes out against the house of Ahab (1 K 21), it is not now for the destruction of idolatry but in the cause of justice and humanity that he appears. He has become the champion of the civil and moral rights of the people. Ahab violates the ancient laws of property, which are the charter of the people's liberties, by forcibly alienating the vineyard of Naboth. He deepens his guilt by allowing his wife to compass the innocent man's ruin by peculiarly nefarious means (1 K 21^{8}). This crime is the signal for E.'s reappearance at Jezreel. On the day after Naboth's murder, the king is proceeding in state to take possession of the coveted gardens, when he is confronted by the prophet, and quails once more before his moral indignation. His enemy has found him (v.^{20}). His own sin finds him out. His conscience condemns him. He stands speechless while the prophet's words of doom smite him like thunderbolts: Ahab's house shall fall; dogs shall eat the carcase of Jezebel; the king's whole posterity shall perish, and their bodies be given to the dogs of the city or the fowls of the air (so D^{2} in vv.$^{20b-26}$). In the chariot behind Ahab on that memorable day was an officer named Jehu, on whose mind the words of E. left an indelible impression (2 K 9^{25}); and though the execution of the sentence was deferred in consideration of the king's penitence, this man was the instrument chosen by J″ for the overthrow of the house of Ahab.

The episode of Naboth's vineyard produced a great change in the popular sentiment. It revealed the true character of the issues in E.'s conflict against idolatry. It showed the people, that while idolatry went hand in hand with injustice and crime, the religion of J″ was the bulwark of righteousness and liberty. At the same time, it opened their eyes to the real grandeur of the prophet in their midst, and doubtless we are to date from this event a great increase in his power as the prophet of J″.

It is impossible to determine the extent and duration of E.'s subsequent labours. There are two other narratives, one of which brings him into contact with Ahaziah, son of Ahab (B.C. *c.* 853), while the other implies that he lived on till the reign of Jehoram of Judah (*c.* 849–844). It is difficult to harmonize this chronology with that of 2 K 3, which makes it clear that E.'s career ended and Elisha's began before the death of Jehoshaphat (*c.* 874–849). It is possible, however, that Jehoram reigned for a time during the life of his father Jehoshaphat (2 K 8^{16}; the text is doubtful).

According to the narrative in 2 K 1, Ahaziah, son of Ahab, having injured himself by falling from a balcony of his palace, sends messengers to the shrine of Baal-zebub, god of Ekron, to inquire if he shall recover. On their way they are intercepted by Elijah, who indignantly asks them if there is not a God in Israel of whom they might inquire, and commands them to go back and tell the king that his injuries will certainly prove fatal. When the messengers describe to the king the person who waylaid them, he immediately recognizes in him the old enemy of his house, and in the true spirit of Jezebel, his mother, sends out a band of fifty men to capture him. They find the prophet seated 'on the top of the hill' (name not given: Carmel, say some critics, but it is not on the way to Ekron). At his word, fire comes down from heaven and consumes them all. Another band of the same number meet the same fate. A third company is sent out, but their leader takes warning, adopts a humble tone, and he and his men are spared. E. then goes in person to the king, and repeats the declaration that his doom is sealed.

This narrative differs widely in language, style, and spirit from those of the preceding group. The prophet's personal appearance has altered (1^{8}); his name has changed from אליהו to the later form אליה; and instead of being directly inspired and guided by J″ as hitherto, he receives the word of prophecy from an angel ($1^{3.15}$). 'The representation of the prophet assumes gigantic proportions, but at the same time becomes rigid and lifeless: it ceases to be available as a pattern of human action' (Ewald). The narrator tells the story, without apology, for the glorification of his hero; but no narrative in the OT presents greater moral difficulties. If it is regarded as literal history, one's moral sense is shocked at the destruction of a great number of men whose only fault is obedience to the orders of their captain and their king. One cannot conceive the story to have been penned by the historian who related the parable of the still small voice at Horeb. The best comment on the story was supplied by Christ. He condemned with unmistakable plainness the vindictive spirit which His disciples, by citing the example of Elijah, sought to justify (Lk $9^{51\text{ff.}}$). Others besides the disciples have used the story as an argument for persecution. E. was the patron of the Inquisitors. Even Calvin and Beza argued from this narrative that fire was the proper instrument of punishment for heretics. But the story itself can hardly be regarded as history. It is rather one of those imaginative apologues—abundant in the schools of the scribes—which borrowed the names of ancient heroes to lend vividness and concreteness to abstract doctrines.

The other narrative (2 Ch $21^{12\text{ff.}}$) is given only by the Chronicler, and bears distinct marks of lateness. Jehoram, king of Judah, son-in-law of Ahab and Jezebel, having fallen under the spell of sensuous Baal-worship, E. is represented as sending him a letter warning him that J″ will bring a plague upon Judah, by which all the king's house will be afflicted, and to which the king himself will early fall a victim. This is the only narrative which brings E. into connexion with the kingdom of Judah, and the only one which represents him as carrying on his work by means of writing. The style and language of the letter correspond very closely with those of the Chronicler.

The narrative of E.'s translation (2 K 2^{1-18}) returns to the lofty style of the writer of 1 K 17–19. 21. Ewald, indeed, regarded it as the work of the same great narrator; more recent critics consider that from a literary point of view it is more closely connected with the history of Elisha (2 K $2^{19\text{ff.}}$). E.'s end is still more mysterious than his beginning. He alone shares with Enoch the glory of being 'translated,' so that he should not taste death (He 11^{5}). Of him alone is it recorded, as of Christ (Lk 24^{51}), that he was carried up into heaven. He is residing at the ancient sanctuary of Gilgal (now Jiljilia, between Shechem and Bethel, not the town of the same name on the Jordan), where a prophetic guild is established, when he is warned that the time of his departure is come. His invisible Guide calls him for the last time into solitude. The appointed place is beyond Jordan, not now in the ravines of his native Gilead, but southward in the wild region of Nebo, where his greatest forerunner fell asleep. As he went to Horeb for inspiration in his time of spiritual storm and stress, so he is drawn in the final crisis of his life to the mountain region in which Moses was summoned to die, away from the face of man. But he begins his last journey by visiting the prophetic guilds at Bethel and Jericho, probably for the purpose of confirming the young prophets in the faith. Wishing to spare Elisha the pain of witnessing the last fiery ordeal, he tenderly entreats him to remain at Gilgal. His faithful companion cannot brook the idea of separation: he solemnly vows that he will never leave his master. At Bethel the sons of the prophets, foreboding E.'s coming removal, ask Elisha if he knows that his master is to be taken away from him. He knows it well, but is too straitened in spirit to speak of it, and entreats them to hold their peace. From Bethel E. proceeds to Jericho, where he again endeavours to persuade his disciple to let him go on this journey alone; but Elisha repeats his vow. At Jericho some of the prophetic guild wish to question Elisha about the impending event, but he begs them to be silent. Fifty sons of the prophets ascend the heights above the city to watch the prophet as he descends with his disciple to the Jordan. They see him strike the river with his mantle; the waters part; the two men cross by the bed of the river and pass out of sight. As they approach their destination, E. asks his disciple if he has any last request to make. Elisha seeks 'a double portion' of his master's spirit—not twice E.'s inspiration, but the portion of an eldest son, who received twice as much as the younger sons (Dt 21^{17}). E. replies that it is a hard request. Spiritual gifts are the most difficult of all to transmit. Nevertheless, he assures his follower that if he prove his fitness for prophetic gifts by remaining with his master to the end, and looking without fear on the dread messengers of the invisible world, his request will not be denied. They now enter the dark mountains of Moab. Somewhere here J″ Himself laid His servant Moses to rest. No man knew the exact place. 'The whole region is a sepulchre.' As they still advance and talk together, black clouds gather, a tempest descends, the air is filled with fire, and, 'behold, there appear chariots of fire and horses of fire, and E. is taken up to heaven in a whirlwind.' Elisha sees him no more. He rends his clothes, and mourns for his master as one mourns for the dead. He is bereft of the prophet who has been to him a father, and to Israel a power as great as its chariots and horsemen. But he has stood the severe test imposed upon him, and receives the reward—the spirit of E. rests upon him. Taking up the mantle which has fallen from his master, he returns from the scene of the translation to the Jordan, and puts his new power to the proof by striking the waters with the mantle and calling upon the God of Elijah. The waters divide as before, and he passes over on dry land. When the sons of the prophets at Jericho hear of what has happened, and perceive that the spirit of E. rests upon his disciple, they bow themselves to the earth and acknowledge Elisha as their new master. But the story of the translation awakens their scepticism, and they send out fifty strong men to make search for the missing prophet, Elisha trying in vain to dissuade them. For three days they prosecute the search among the mountains of Moab, expecting to find E. on some lonely peak or in some dark valley, cast away as at other times by the Spirit of J″. When they return and confess that the search has been vain, Elisha gently chides their unbelief (2 K 2^{18}).

E. is thus removed from the scene of his labours before the whole task laid upon him (1 K 19^{15}) is finished. But Elisha and others enter into his labours, sons of the prophets animated by his spirit are raised up in hundreds, his teaching spreads, his spirit penetrates the nation. Then the harvest is reaped. After two short reigns the idolatrous house of Ahab falls (2 K 9). The enemies of J″ and of E. perish. Superstition dies hard, but there is never again any question of rivalry between J″ and Baal. There is no more danger of Baal-worship becoming the national religion. It sinks into the superstition of a sect, known to later prophets as the *remnant* of Baal (Zeph 1^4).

The weapons by which this reformation was accomplished were mainly spiritual. It cannot be denied that some of E.'s own actions may have furnished an excuse for certain deeds of violence. It is like a Nemesis that the finishing touch has to be given to the work by a man of blood like Jehu. Yet it was not the fire and sword of Carmel, but the still small voice speaking in the schools of the prophets and the hearts of the faithful that again made Israel a people prepared for J″.

E.'s moral power lies in the simplicity of his faith. He realizes the belief in J″ intensely, and lives a heroic life in the strength of it. 'J″ before whom I stand' is his favourite formula (1 K 17^1 18^{15}). He stands erect and haughty before kings; but in the presence of J″ he wraps his head in his mantle, or crouches to the ground with his face between his knees (1 K 18^{42} 19^{13}). Stern and rugged by nature, a prophet moulded for heroic work in evil days, he is led through an experience which awakens in him the tenderness that is only to be found in union with strength. His personal history, especially the narrative of the breakdown and restoration of his faith, brings him into touch with human beings in all ages. He is so great that readers of his story are not unthankful for his failings. 'E. was a man of like passions with us' (Ja 5^{17}).

Critics differ widely in their estimates of the historical importance of E. Wellhausen thinks that his influence is appraised too highly in the biblical narratives. His struggle with Baal cannot have possessed the importance attributed to it from the point of view of a later time. Israel was never torn asunder by such a religious commotion as that described in 1 K 18. It was not Baal that brought about the fall of the house of Ahab, but common treason on the part of Jehu (*Proleg.* 291). Wellhausen is given to depreciating the part played by prophecy in the history of Israel. 'In the eyes of their contemporaries,' he says, 'the prophets were completely overshadowed by the kings; only to later times did they become the principal personages.' E. must hide his diminished head before Ahab. 'He effected nothing against the king, and quite failed to draw the people over to his side.' Wellhausen states no convincing reasons for this interesting view. There is probably more truth in the opinion of those who say that the history of Israel is essentially the history of prophecy. And Kuenen's estimate of E. appears much fairer: 'The consequences of the struggle with the Syrian Baal and the victory of Jahvism were most important. Had the issue of the conflict been different, the existence of J″-worship would have been at stake; the averting of this danger was an important result. From this period onward the belief in "J″ the God of Israel" is assailed no longer. The prophets of the eighth century are able to start from it as a universal conviction. For this foundation for their preaching they have to thank Elijah and his school' (*Religion of Israel*, i. 360).

No OT hero fills a larger place in Jewish tradition than Elijah. How he impressed the minds of his own people in after-ages is shown by the striking eulogium pronounced upon him by the son of Sirach (Sir $48^{1ff.}$). It became a fixed belief that E. would appear again for the deliverance and restoration of Israel. This is expressed in the very last words of the OT (Mal 4^{5-6}). Jesus teaches that this expectation was fulfilled by the appearance of John the Baptist (Mt 17^{11-12}). Jesus' cry on the cross, 'Eli, Eli,' was mistaken for a call to Elijah to come for His deliverance (Mt 27^{47}, Mk 15^{35}). No prophet is mentioned so frequently in the NT as Elijah. The priests and Levites (Jn 1^{25}) cannot understand John's right to baptize, if he is neither the Christ, nor Elijah, nor that prophet (like unto Moses, Dt 18^{15}). As E. was with Moses in spirit at Sinai and Nebo, so these two prophets appear together conversing with Jesus on the Mount of the Transfiguration (Mt 17^3, Mk 9^4, Lk 9^{30}).

It only remains to be said that E. occupies a conspicuous place in the legends and rites of many peoples. Among the Jews he is the expected guest at every passover, for whom a vacant seat is reserved. Among the Greeks he is the patron saint of mountains, and many summits in Greece are now called by his name. In the Roman Catholic Church he is revered as the founder of the Order of the Barefooted Carmelites. By the Mohammedans he is often confounded with the great and mysterious El-Khudr, the Eternal Wanderer, who having drunk the water of life retains everlasting youth, and appears ever and anon to right the wrongs of men. E. is canonized both in the Greek and the Latin Church, his festival being on the 20th July.

2. (אֵלִיָּה, AV Eliah) A Benjamite chief, 1 Ch 8^{27}. **3. 4.** A priest and a layman who had married foreign wives, Ezr $10^{21.26}$. J. STRACHAN.

ELIJAH, APOCALYPSE OF.—This is the title of a lost pseudepigr. work which stands eighth in the stichometrical list of Nicephorus and tenth in an anonymous early list. In the first of these it is called Ἡλία προφήτου, and said to consist of 316 verses. In the other its title is Ἡλίου ἀποκάλυψις. The *Constitut. Apost.* vi. 16 also contain a reference to a writing bearing the name of Elijah. Origen (*Comm.* Mt 27^9) informs us that this work was the source of the quotation in 1 Co 2^9 'Things which eye saw not, and ear heard not,' etc. Similar testimony is borne by Euthalius and others, and it is probable that the statement is correct, although Jerome (*Comm.* Is 64^3, *Ep.* 57 *ad Pamm.*) denies it for apologetic reasons. On the other hand, there seems to be less probability in the statement of Epiphanius (*Hær.* ch. 43), that Eph 5^{14} 'Awake thou that sleepest,' etc., was quoted from the same Apoc. of Elijah. Origen makes no mention of this where he might be expected to do so, and Euthalius alleges that the words of Eph 5^{14} are derived from a lost apocryphon which bore the name of *Jeremiah*. For further information and for the patristic quotations in full, see Fabricius, *Cod. Pseud. V.T.* i. 1070-1086; Schürer, *HJP* II. iii. 129 ff. J. A. SELBIE.

ELIKA (אֱלִיקָא), the Harodite, one of David's 'Thirty' (2 S 23^{25}).—The name is omitted in B, and in the parallel passage 1 Ch 11, possibly owing to the repetition of the gentilic 'the Harodite.' J. F. STENNING.

ELIM (אֵילִם).—One of the stations in the wanderings of the children of Israel (Ex 15^{27}, Nu 33^9); apparently the fourth station after the passage of the Red Sea, and the first place where the Israelites met with fresh water. It was also marked by an abundant growth of palm trees (cf. Ex 15^{27}, twelve wells and seventy palms).

If the traditional site of Mt. Sinai be correct, the likeliest place for Elim is the Wady Ghurundel, where there is a good deal of vegetation, especially stunted palms, and a number of water-holes in the sand; but some travellers have pushed the site of Elim farther on, and placed it almost a day's journey nearer to Sinai, in the Wady Tayibeh, where there are again palm trees and a scanty supply of brackish water. The Greek monks who have located Elim at *Tôr* were probably guided thereto by the luxuriant palms and a special taste for the extravagant in miracle. The biblical account takes the Israelites from Elim to a camp by the sea; and this accords very well with the experience of travellers who go to Mt. Sinai by the southern route, camping one night in the Wady Ghurundel, and the next night by the shore of the Red Sea.

It should be remembered, however, that grave doubts have been cast upon the popular identification of Mt. Sinai (see SINAI); and as these doubts turn, in part, upon the identification of Elim and of the encampment by the sea, we must be careful not to fall into a topographical reasoning in a circle, so as to identify Sinai by means of Elim, and then Elim by means of Sinai.

It has been suggested that the Elim of Ex 15, Nu 33, is only a variant form of the plural name Eloth which we find in 1 K 9^{26}, 2 Ch 8^{17}, a place which was certainly situated near the head of the gulf of Akabah, and whose name still survives in the Arabic *Aileh* (cf. the suggestive doublet of Hazeroth, Nu 11^{35}, and Hazerim, Dt 2^{23}). If this be so, then the camp by the sea is to be sought for in the neighbourhood of Akabah, the position of Mt. Sinai is unknown, and the earlier stages of the journey of the children of Israel are to be sought in the line of the present *Haj* route from Egypt to Mecca. See Beke, *Origines Biblicæ*, 1839; Baker Greene, *The Hebrew Migration from Egypt*, 1879; Sayce, *HCM*, 1894; and the art. EXODUS (ROUTE). J. RENDEL HARRIS.

ELIMELECH (אֱלִימֶלֶךְ 'God is king,'* so the name Malchiel).—The husband of Naomi and father of Mahlon and Chilion, Ephrathites of Beth-lehem-judah (cf. 1 S 17^{12}). He was driven by a famine into the country of Moab, where, after a residence of undefined length, he died. He is spoken of as if he were the head of a clan in the tribe of Judah (cf. Ru $2^{1.3}$). This would be the Hezronites (1 Ch 2^9, cf. Gn 46^{12}).

H. A. REDPATH.

ELIOENAI (אֶלְיוֹעֵינַי 'to J" are mine eyes').—**1.** A Simeonite chief (1 Ch 4^{36}). **2.** A Benjamite (1 Ch 7^8). **3.** A descendant of David who lived after the Exile (1 Ch $3^{23.24}$). **4.** A son of Pashhur who had married a foreign wife (Ezr 10^{22}), called in 1 Es 9^{22} Elionas. **5.** A son of Zattu who had committed the same offence (Ezr 10^{27}), called in 1 Es 9^{28} Eliadas. **6.** A priest (Neh 12^{41}).

ELIONAS.—**1.** (A Ἐλιωνάς, B Ἐλιωναίς), 1 Es 9^{22}.—In Ezr 10^{22}, ELIOENAI. **2.** (A Ἐλιωνάς, B -δᾶς), 1 Es 9^{32} = Ezr 10^{31} ELIEZER.

ELIPHAL (אֱלִיפַל 'God hath judged').—One of David's mighty men (1 Ch 11^{35}), called in 2 S 23^{34} **Eliphelet** (wh. see).

ELIPHALAT.—**1.** (A Ἐλιφάλατος, B Ἐλειφάλα, AV **Eliphalet**), 1 Es 8^{39}.—In Ezr 8^{13} ELIPHELET. **2.** (Ἐλειφαλάτ), 1 Es 9^{33} = Ezr 10^{33} ELIPHELET.

ELIPHAZ [אֱלִיפַז, possibly 'God is fine gold'; but in the absence of analogous meanings this must be considered very doubtful. LXX generally Ἐλιφάς (so A in Gn) or Ἐλειφάς (so B in Ch and Job, except 2^{11}) or Ἐλιφάζ (so A in Ch and Job, and D in Gn 36^{15})] is the name of two foreigners (Arabs) mentioned in OT. **1.** E. appears in the Edomite genealogy of Gn 36 (and hence 1 Ch $1^{35f.}$) as son of Esau by Adah (vv.$^{4.10}$), and father of Amalek by his Horite concubine Timnah (vv.$^{12.22}$). In v.$^{15f.}$ various other sons are mentioned, as 'the dukes that came of E. in the land of Edom,' noticeable among them being 'Duke Teman,' and another is the well-known *tribal* name Kenaz. See further, art. EDOM. **2.** See next article. G. B. GRAY.

ELIPHAZ (אֱלִיפַז, LXX Ἐλιφάς, an Idumæan name, transposed = Phasael?).—Described as the first, and apparently the oldest and most important, friend of Job. He is called 'the Temanite.' Teman was a son of Eliphaz, the eldest son of Esau (Gn $36^{10.15}$); and תֵּימָן was a district of Idumæa, proverbially known for its wisdom (Jer 49^7). It is mentioned in close connexion with Edom in Jer 49^{20}. E. speaks at greater length than either Bildad or Zophar; his speeches are recorded in Job 4. 5. 15. and 22. He is also more moderate in tone than the others; his first speech, especially, is gravely tender towards what he holds to be Job's errors. Many of his utterances, taken by themselves, contain important truth; but his orthodox statements and maxims fail to cover the facts of Job's case. In his later speeches E. speaks more directly and sharply, but he never becomes violent or cruel. For an outline of his arguments, see JOB, BOOK OF. W. T. DAVISON.

---

* Or acc. to others, 'My god is Melek' (the god-king).

ELIPHELEHU (אֱלִיפְלֵהוּ 'may God distinguish him,' AV Elipheleh).—A doorkeeper (1 Ch $15^{18.\,21}$).

ELIPHELET (אֱלִיפָלֶט 'God is deliverance').—**1.** One of David's sons (2 S 5^{16}, 1 Ch 14^{7} (AV **Eliphalet**), 1 Ch $3^{6.\,8}$=**Elpelet** of 1 Ch 14^{5}). The double occurrence of the name in Chronicles, as if David had had two sons named E., is probably due to a scribal error. **2.** One of David's mighty men (2 S 23^{34}=**Eliphal** of 1 Ch 11^{35}). **3.** A descendant of Jonathan (1 Ch 8^{39}). **4.** One of the sons of Adonikam who returned from exile (Ezr 8^{13}=**Eliphalat** of 1 Es 8^{39}). **5.** A son of Hashum who had married a foreign wife (Ezr 10^{33}=**Eliphalat** of 1 Es 9^{33}).

ELISABETH (Ἐλισάβετ [WH Ἐλει.]; Heb. אֱלִישֶׁבַע 'God is an oath,' Ex 6^{23}).—The wife of Zacharias, and the mother of John the Baptist (Lk $1^{5\text{ff.}}$). E. herself belonged to the priestly family of Aaron, and was a kinswoman (*συγγενίς*) of the Virgin Mary, though we do not know what the actual relationship was. She is described, along with Zacharias, as 'righteous before God, walking in all the commandments and ordinances of the Lord blameless.' Upon her, however, had fallen what to a Jewish woman was the heaviest of misfortunes, the reproach of barrenness. And not till she and her husband were 'well stricken in years' was the promise of a son given them. Five months later Elisabeth was visited in her home in the hill-country of Judah by her kinswoman Mary, and the degree of illumination which she had reached is proved by her addressing Mary as 'the mother of my Lord' (Lk 1^{43}). See ZACHARIAS. G. MILLIGAN.

ELISEUS.—See ELISHA.

ELISHA (אֱלִישָׁע 'God is salvation'; LXX Ἐλεισαῖε; NT Ἐλισαῖος, AV Eliseus).—The son of Shaphat, of the tribe of Issachar, the disciple and successor of the prophet Elijah. He is first mentioned in the threefold commission with which Elijah is charged by J″ at Horeb (1 K 19^{16}). Obeying the divine voice, Elijah goes to Abel-meholah ('meadow of the dance,' probably *'Ain Ḥelweh*) in the N. part of the Jordan Valley, not far from his native Gilead, where he finds E. ploughing with twelve yoke of oxen in one of the rich level fields of his father's heritage, eleven yoke being with his servants, and he last with the twelfth (19^{19}). Leaving the highway, Elijah passes over to him, and throws his mantle over his shoulders—a symbolic act of double significance: he adopts E. as his son, and invests him with the prophetic office. No word is spoken, but the symbol is understood. Elijah, probably resuming his mantle, strides on, leaving E. amazed at the sudden call, and bewildered by the necessity of making so tremendous a decision. But the young man's natural shrinking from so high a calling—a hesitation similar to that of Moses, Isaiah, Jeremiah—is quickly overcome by the consciousness that this is a call from God. Running after Elijah, he declares his readiness to follow him, only begging permission to return and give the kiss of farewell to his father and mother. The mention of domestic ties opens Elijah's eyes to the greatness of the sacrifice he is calling E. to make: perhaps it is too great for the youth; at any rate his choice must be voluntary and deliberate; the casting of the mantle over him was in itself nothing. There is no accent of rebuke, but tender consideration for E.'s natural feelings, in the austere prophet's testing words: 'Go back again, for what have I done unto thee?' E. however, has made his choice. He is ready to leave father and mother, and houses and lands, and marks his act of self-renunciation by a sacrifice which has sacramental significance. Unyoking the oxen from his plough, he slays them, and taking the plough, the goad and the yokes for fuel, roasts the flesh of the oxen, and invites his people to a farewell feast. Then, having kissed his parents, he follows Elijah, and ministers unto him. One graphic touch indicates his relation to the greater prophet: he is referred to as 'E. the son of Shaphat, who poured water on the hands of Elijah' (2 K 3^{11}). They seem to have been together some six or seven years (1 K 22^{1}, 2 K 1^{17}). How and where this time was spent is not definitely stated. There is no evidence that Elijah ever called E. to be a dweller in desert solitudes. There are rather indications that during these years they lived in familiar intercourse with the sons of the prophets (2 K 2). The narrative of Elijah's last journey shows the deep filial affection, as well as reverence, which he had awakened in his disciple. See ELIJAH. From the scene of the translation, Elisha returns bearing Elijah's mantle, and endued with a 'double portion' of his spirit. Thus began a prophetic career in N. Israel which lasted for more than half a century, during the reigns of Jehoram, Jehu, Jehoahaz, and Joash.

E. is Elijah's spiritual successor, but he presents in many respects a striking contrast to his teacher. Only metaphorically does he wear Elijah's mantle: after its first display it appears no more. He wears the common garments (בְּגָדִים 2 K 2^{12}), and carries the walking-staff of 'ordinary grave citizens,' sometimes using it for working miracles (2 K 4^{29}). With his bald head, he does not escape unfavourable comparison with the prophet of the flowing locks (2 K 2^{23}). E. is no son of the desert. Brought up at a peaceful farm in the Jordan Valley, amid the sweet charities of home (1 K 19^{20}), he always prefers human companionship. He is generally found in cities, sojourning at Jericho among the sons of the prophets, or dwelling in his own house at Samaria or at Dothan (2 K $6^{14.\,32}$). A prophet's chamber is built for him by a lady of Shunem (4^{10}). Elijah's power was derived from communion with J″ in lonely mountains and valleys; E. is helped by the strains of music—'the hand of J″' is upon him when the minstrel plays (2 K 3^{15}).

Elijah's short career was memorable for a few grand and impressive scenes, E.'s long career is marked by innumerable deeds of mercy. Both in public and in private life his activity is incessant. He enters palaces not as an enemy, but as a friend and counsellor. Kings reverently address him as 'father' (2 K 6^{21} 13^{14}). The kings of Israel, Judah, and Moab come to seek his advice in war ($3^{11\text{-}19}$). The king of Syria consults him in sickness, and offers him costly presents ($8^{7.\,8}$). The king of Israel comes to receive his parting counsels ($13^{14\text{-}19}$). His influence at court and in the army would immediately secure a boon for a friend from the king or the captain of the host (4^{13}). He is expert in camp-life, ambush, and scouting, and more than once is the means of saving the life of the king (6^{10}). Even more than in palaces is he welcome in the homes of the people. He is 'the holy man of God who passeth by us continually' (4^{9}). Most of his miracles are deeds of gracious and homely beneficence. Elijah began his career by predicting a famine in the land; E. begins his by healing a spring, that there might not be 'from thence any more death or barren land' (2^{21}).

Several of E.'s recorded words and deeds seem to show how much he profited by the chastening experience—and it may be by the direct teaching—of Elijah. He has learned the lesson of toleration: when Naaman inquires if it is possible to reconcile the homage due to Rimmon with loyalty to J″, E. sends him away with a word of peace (5^{18}). He knows how to temper justice with mercy; he forgives his own and his country's fierce enemies when he has them entirely in his hands (6^{22}). Yet he has his master's sternness when it is needed. He refuses to speak to Jehoram king of Israel, that 'son of a murderer' (3^{13} 6^{32}). Not in vain was it prophesied at Horeb, 'him that escapeth from the sword of Jehu shall E. slay.' It is E. who devises the plot that leads to the overthrow of the house of Ahab (9^{1-3}). And though he weeps for his country when he foresees the evil which the ferocious Hazael will bring upon Israel, yet he does not shrink from anointing him king of Syria ($8^{12.13}$).

As a prophet E. had no new truth to proclaim. But he exercised a wide and lasting influence as the head of the prophetic guilds for more than half a century. The sons of the prophets regard him with profound reverence (2^{15}), and obey him implicitly (9^{1}). E.'s single aim is to complete the reforms begun by Elijah—to re-establish the ancient truth, and repel heathen superstition. He is a statesman as well as a prophet. Among all the prophets, none intervene in the highest national affairs more boldly than E., and none so successfully. For many years he eagerly watches every turn of events. When the nation is ripe for revolution, he summons the destined man at an opportune moment, puts an end to the Tyrian domination, and extirpates the base Tyrian superstition. After the fall of the Omrite dynasty, he is the trusted friend and sagacious adviser of the house of Jehu, and the strength and inspiration of Israel in all its trials. Even to old age his zeal burns unquenchable: in the closing scene of his life the patriot is as evident as the seer; and his bequest to Israel is hope (13^{15-19}). E. has no stormy spiritual experience like his master, and does not hold such immediate converse with J″, yet he too has visions. He sees Elijah borne away to heaven by chariots and horses of fire; and at Dothan, when the town is surrounded by enemies, and his servant cries out to him in fear, he bids the young man look to the mountains, and see that they are full of chariots and horses of fire round about Elisha (6^{17}).

It is impossible to arrange the events of E.'s life in chronological sequence. While the topography of the narrative is often precise, there is a singular want of definiteness as to personal names and dates. The only indication of time afforded by several of the anecdotes is the mention of the 'king of Israel'; but as no name is specified, the reader is left to conjecture which of the four kings who were the prophet's contemporaries may be referred to. It is impossible to say in whose reign the cure of Naaman, or the attempt of the Syrians to capture E., took place. In some cases occurrences are obviously grouped together, according to the connexion of their contents (2 K 2. 4). In others no principle of arrangement is apparent, and the loose connexion of the narratives becomes very awkward. For instance, the siege of Samaria by the Syrians is described immediately after it has been stated that 'the bands of Syria came no more into the land of Israel' ($6^{23f.}$). Gehazi appears in familiar intercourse with 'the king of Israel' after the account of his punishment with leprosy (5^{27} 8^{4}); and the visit of Joash to E. during the prophet's last illness is related just after the mention of the death of Joash ($13^{13f.}$). Most of E.'s deeds and experiences are set down before the account of Jehu's revolution; but the prophet lived 45 years after that event, and his influence in the nation was certainly greater, and his deeds of beneficence probably more numerous, after than before the overthrow of his enemies.

The narratives are for the most part a record of E.'s activity as a seer, diviner, and worker of miracles, rather than as a prophet in the usual sense of the word. The ordinary prophet is a revealer of spiritual truth, and a preacher of righteousness. If he is represented as working miracles at all, they are entirely subsidiary to his teaching functions. But the reminiscences and traditions of E. represent him chiefly as a wonder-worker. He suspends the laws of nature (6^{6}), foresees future events (8^{12}), divines the secret thoughts of men (5^{26} 6^{12}), and knows what events are happening out of sight or at a distance (6^{32}).

It will be convenient (A) to group together E.'s deeds in his more private capacity, and afterwards (B) refer to his achievements as the friend and adviser of kings.

A. (1) Recrossing the Jordan after Elijah's translation, E. either dwells or sojourns (ישׁב) at Jericho, lately rebuilt (1 K 16^{34}) in a 'pleasant situation' (2 K 2^{19}), the fertility of whose groves and gardens was due then, as always, to its perennial springs. At the time of E.'s visit one of these springs has noxious properties, which make it unfit for drinking, and injurious to the land (2^{19}). The citizens represent the facts to E., who, taking salt in a new vessel, casts it into the spring, and in the name of J″ declares the water healed (2^{21}). (2) From Jericho E. goes to Bethel, which he had lately visited with Elijah ($2^{23ff.}$). Passing through the wooded gorge (now called the Wady Suweinit), which leads up to the town, he is met by a noisy troop of boys, who, though they were probably very respectful to the great and awful Elijah, stand in no fear of his youthful successor, and rudely greet him with shouts of 'Go up, thou bald head!' E. turns and curses them in the name of J″, and two she-bears come out of the wood and rend forty-two of them in pieces. One naturally asks if this narrative is literal history. The extreme severity of the punishment is evidently out of all proportion to the offence. The deed is strikingly in contrast to E.'s conduct on other occasions (see especially 2 K 6^{20-22}). One MS of the Sept. inserts the word ἐλίθαζον ('they pelted him with stones'), the transcriber evidently feeling the moral difficulty. Some of the Rabbis say that E. was punished with sickness for the deed. The story probably had some basis in fact, but in its present form it reads like a folklore tale, of the kind familiar in all lands, intended for the admonition of rude and naughty children. (3) The widow of one of the sons of the prophets—the name and place are wanting—is in debt, and her sons are about to be taken away by her creditor and sold as slaves. She has nothing left in her house but a pot of oil, but E. causes the oil to multiply till it fills all the vessels she can borrow from her neighbours. Having sold the oil, she pays her debt, and lives with her sons on the surplus (2 K 4^{1-7}). (4) The next reminiscence (2 K 4^{8-37}) gives a charming picture of private life in Israel. As E. chances to pass the village of Shunem (now Sôlam, three miles from Jezreel, on the slopes of little Hermon), he is pressed to accept hospitality by a lady of substance. Whenever he passes that way again, he turns in to eat bread. The lady is so impressed by the character of the man of God that she persuades her husband to build a chamber on the roof of the house, to which the prophet may have free access at all times. As a recompense for her kindness, E. grants her fondest wish: a child is born to her. After some years—

the narrative goes on without break—her son dies of sunstroke. The lady rides to Carmel, and summons E., who comes and restores the boy to life. (5) E. is next found residing at Gilgal, with the sons of the prophets, during a famine (4^{38-41}). People are subsisting on any roots that can be found. One of the young prophets brings home some wild gourds (פַּקֻּעֹת, Vulg. *colocynthidas agri*), and shreds them into the caldron. But when they begin to eat, the taste reveals the presence of poison, and they cry out, 'O man of God, there is death in the pot.' 'Bring meal,' answers the wonder-worker, and forthwith the dish is rendered harmless and wholesome. (6) Apparently during the same famine, while E. is still living at Gilgal, he is visited by a farmer from Baal-shalishah ($4^{42\text{ff.}}$), who brings him a present of first-fruits—twenty loaves of new barley and a sack full of fresh ears of corn (Lv 2^{14} 23^{14}). E. bids his servant set them before a hundred men. The servant hesitates, but the small supply is miraculously rendered sufficient for the whole company. (7) The next narrative (2 K 5) gives an account of the healing of Naaman—the only miracle of E. which is referred to in the NT (Lk 4^{27}). Naaman, commander-in-chief of the army of Syria, being afflicted with the most malignant kind of leprosy (the white variety, v.^{25}), hears of the prophet in Samaria through a Hebrew maid, kidnapped in a border foray and taken into his household. He resolves to visit the great healer. When he arrives at the prophet's door, attended by his train of horses and chariots, E. sends a servant to direct him to go and bathe seven times in the Jordan. Naaman, who has expected a deferential reception and a striking ceremonial, is enraged by the seeming want of courtesy, and even more by the nature of the prescription. But his servants calm his ruffled temper; and when he obeys the prophet's command, his flesh comes again as the flesh of a little child. He returns to thank and reward his benefactor, but E. refuses to touch any of the presents which are pressed on his acceptance. Naaman, made to feel by E.'s self-denial that the glory is due to E.'s God, resolves to become a worshipper of J″. He asks permission to take earth from Israel, that he may erect an altar to the God of Israel; his idea being the popular one, that J″ was a local deity, and could only be worshipped on his own soil. E. does not seek to correct his mistake. He even gives the proselyte permission to continue to pay outward homage to Rimmon, the god worshipped by the king of Syria ($5^{18.\,19}$). Naaman having departed in peace, E.'s servant Gehazi follows him, and by dint of lying obtains the treasure which E. refused. But E. divines his dishonesty, and dooms him and his house to be afflicted with the leprosy of Naaman for ever (5^{27}). (8) The sons of the prophets, who are increasing in numbers, resolve to build a larger dwelling-place by the Jordan. While they are engaged in felling trees, the head of a borrowed axe flies off and falls into the water. It would be vain to search for it in the deep and turbid river. But a cry brings the man of God to the spot. He breaks off a stick and casts it into the stream, and forthwith the iron comes to the surface, and is restored to its possessor.

B. The remaining narratives exhibit E. in his relation to kings and rulers, and recount some of his services to his country as an inspired seer and wise counsellor. (1) E. is with the confederate armies of Israel, Judah, and Edom, in a campaign against Mesha, king of Moab (2 K 3^{11-20}). His presence is not discovered till the armies are perishing for lack of water. When the three kings, in their extremity, come to him for counsel, he refuses to have anything to do with the king of Israel, bidding him go to the prophets of his father Ahab and his mother Jezebel. But out of respect for Jehoshaphat, king of Judah, he consents to give his advice. When a minstrel plays before him and the hand of J″ is upon him, he commands that deep trenches be dug, and prophesies that though they shall see no rain, yet the valley will be filled with water. His orders are obeyed, and next morning, owing to a plentiful fall of rain high among the mountains of Moab, the torrents swell, and all the country is filled with water. (2) The next narrative (2 K 6^{8-23}) presents the prophet in a very pleasing light, fearless though an host encamps against him, confident though war rises against him, and magnanimous in his treatment of his baffled enemies. Marauding bands of Syrians have made numerous incursions into the north country, but all their movements have been mysteriously checkmated. Whenever they have laid an ambush in 'such and such a place,' E. has warned the king of Israel to avoid the spot, thereby saving the king's life 'not once nor twice.' Benhadad, finding all his designs frustrated, begins to suspect treachery in his camp. When he hears the true explanation, he sends a strong force of horses and chariots to Dothan to capture Elisha. After comforting his alarmed servant with a vision of the spiritual hosts that always surround the dwellings of the just, the prophet goes down to meet the Syrians, and in answer to his prayer they are struck with blindness (סַנְוֵרִים, a word found only here and in Gn 19^{11}, probably meaning illusion, ἀβλεψία). Then telling them, evidently not without a relish of the ludicrous aspect of the situation, that they have lost their way and come to the wrong city, he offers to conduct them to the person whom they are seeking. He leads them into the heart of Samaria. When their eyes are opened in answer to E.'s prayer, they find themselves at the mercy of the enemy. The king would have destroyed them, but E. enjoins him to set food before them, and send them back to their master. An enemy at once so powerful and so merciful makes such an impression upon the Syrians that their marauding expeditions entirely cease. (3) The next incident ($6^{24\text{ff.}}$), though introduced without remark immediately after the last, evidently occurred at a different time. The king of Syria gathers a great army to besiege Samaria. E. encourages the men of Israel to defend their city to the last. When the besieged are reduced to famine, he still counsels no surrender, and heartens the people with the prophecy of coming deliverance. The king of Israel—who is not named—wishes to capitulate. He vents his helpless rage upon E., and vows to take his life, because the prophet will not swerve from his purpose even when the people of the city are eating the flesh of their own children. While E. is in his house giving counsel to the elders of Israel, he divines that a messenger of the king is on his way to take his life, and that the king is following close behind. When the king enters, the prophet declares that on the morrow there will be abundance of food at the gate of the city. One of the king's officers sneers at the sanguine prediction: 'Yes, no doubt, J″ will open windows in heaven! And yet can this thing be?' E. retorts that the officer will see the abundance, but shall not eat of it. During the night there is a panic in the Syrian host, the camp is deserted, and every part of the prophecy fulfilled. (4) We next find E. at Damascus. Having heard of the mortal sickness of Benhadad, he realizes that the time has come to execute the commission which Elijah received at Sinai, by anointing Hazael to be king of Syria. No sooner does E., whose fame as a prophet has now spread far beyond Israel, enter the city of Damascus, than the tidings are carried to the palace. King Benhadad immediately sends Hazael, his commander-in-chief, laden with presents, to inquire of the seer if he may recover of his sickness. E.'s reply is uncertain: according to one reading, he bids Hazael return and tell the king that he shall surely recover; according to another reading (the *kĕthîbh*, and therefore probably authentic), Hazael is to reply that Benhadad shall surely die. At any rate, E. leaves Hazael in no doubt that the king is not to recover, and that his successor is none other than Hazael himself. But it is a hard task which J″ has laid upon E.—to anoint the man whom he knows as the destined scourge of Israel. E., as he looks steadfastly in the fierce captain's face and foresees the coming evil, bursts into tears. When Hazael inquires what this weeping means, E. shows him his future. The Syrian, who has no ear for the tale of Israel's sufferings, and thinks only of the promise of personal distinction, replies ironically that the task is too great for a dog like him. But E. assures him in plain words that J″ has chosen him to be king of Syria. (5) The chief business of E.'s life is to avenge the crimes and apostasy of the house of Ahab. The mission to anoint Jehu king over Israel, which Elijah did not live to fulfil, must be carried out by his successor. During a war between Israel and Syria for the possession of Ramoth-gilead, Ahab's son Jehoram is wounded, and goes home to Samaria to be cured. His ally the king of Judah leaves the army, and goes to visit him ($8^{28f.}$). During their absence E. calls one of the sons of the prophets, and sends him to Ramoth-gilead, with instructions to seek out Jehu, and secretly anoint him king. As soon as Jehu divulges the secret to his brother officers, they proclaim him king, and the whole army at once espouses his cause. The nation has long been ready for a change, and the house of Omri falls without being able to strike a blow in self-defence ($9^{1ff.}$). (6) E. lives to extreme old age, and his last thoughts are given to his country. It is sad to reflect that, in spite of all his labours, Israel has become feeble and dependent. During the reigns of the pusillanimous sons of Jehu, the Syrians have done to Israel according to their will, and the nation has more than once been brought to the verge of extinction. But Jehu's grandson Joash is a youth of great promise, and E. sees in him one capable of making Israel once more independent and prosperous. The young king comes down to visit the aged prophet as he lies on his peaceful death-bed ($13^{14ff.}$). The king is moved to tears. No words could be more appropriate than those in which he addresses the prophet: 'My father, my father, the chariots of Israel and the horsemen thereof.' E. has still the spirit of the master to whom he first applied these words (2 K 2^{12}). To impress on the young king's mind a sense of his duty, he uses a fine piece of symbolism. The window is opened eastward, toward the country of the enemy, the king's bow is pointed in that direction, the prophet's consecrating hand is laid on the king's right hand, and 'the arrow of J″'s deliverance, of deliverance from Syria,' is discharged. The king is then commanded to take up a sheaf of arrows and smite the ground. He smites only three times, and halts. This does not please the zealous old prophet: before closing his eyes he would fain have foreseen that the enemies of the people of J″ would be defeated five or six times; as it is, the king has only energy enough to smite them thrice.

There is one other tradition regarding E., and that the most marvellous of all. His wonder-working power does not terminate with his life. In the spring of the year after his decease a burial is taking place in the cemetery which contains his sepulchre, when it chances that a band of marauding Moabites comes in sight. The mourners, in their eagerness either to attack or to escape from the invaders, hastily place the corpse in the tomb of Elisha. No sooner does the body touch the bones of the prophet than the dead man revives and stands upon his feet ($13^{20f.}$)

The foundation of E.'s character is laid in the strong affections of his home-life (1 K 19^{20}). He learns to call the great ascetic prophet his 'father,' but he never ceases to be attached to his fellow-men. While his career is less impressive than that of Elijah, his achievement is to make a common life illustrious. It cannot be said that all the narratives show him in an equally favourable light, but on the whole he is represented as humane, large-minded, tender-hearted, a prophet called to comfort, heal, and reconcile. Interesting side-lights are thrown on his character. His quick perception of the fitness of things is evidenced by his choice of beasts for a burnt-offering and fuel for his sacrifice (1 K 19^{21}), his sense of humour by his treatment of the Syrian emissaries (2 K 6^{19}), and his tenderness of heart by his tears over Israel's coming misfortunes (2 K 8^{11}). He is constantly (29 times in all) called the man of God, and he proves his love of God by loving men. His religion is to visit the fatherless and widows in their affliction (2 K 4^{1}). And amid all the seductions of court favour he retains the true prophetic simplicity of character and contempt for worldly wealth (5^{16}). Like his great master Elijah, he is eulogized by the son of Sirach (Sir 48^{12-14}).

Some of E.'s miracles—the dividing of the Jordan, the increase of the widow's oil, the restoration of the Shunammite's son—are almost identical with the recorded miracles of Elijah. The healing of the leper and the multiplying of the barley loaves bring to mind some of the miracles of Jesus. But it has often been remarked that to find parallels to the miracles of the iron axe-head made to swim, the noxious well healed with salt, the poisoned pot rendered harmless with meal, and the dead man quickened by the touch of the prophet's bones, we must go outside the Scriptures. Stanley says that 'E.'s works stand alone in their likeness to the acts of the mediæval saints. There alone in the sacred history the gulf between biblical and ecclesiastical miracles almost disappears.' And Farrar compares the stories of E. to 'other Jewish haggadoth, written for edification in the schools of the prophets, but no more intended for perfectly literal acceptance in all their details than the life of St. Anthony or St. Francis.'

Elisha is canonized in the Greek Church, his festival being on the 14th of June.

J. STRACHAN.

ELISHAH (אֱלִישָׁה, 'Ελισά, 'Ελεισαί, *Elisa*).—The eldest son of Javan according to Gn 10^{4}. In Ezk 27^{7} the Tyrians are said to have procured their purple dye from the 'isles' or 'coastlands' of E., which shows that we must look for the locality in the Greek seas. Josephus (*Ant.* I. vi. 1) identified E. with the Æolians; phonetically, however, this is impossible; moreover, Greek ethnology made Æolus the brother, and not the son, of Ion, the Heb. Javan. Many modern writers have seen Elis in E.; but the name of Elis properly began with digamma, and is probably the same as the Lat. *vallis.* Dillmann proposed to identify E. with Southern Italy, and Movers with Carthage; both identifications, however, are inconsistent with the statement that it was the source of the purple dye, and it is difficult to find any name on either the Italian or the African coast which can be compared with that of Elishah.

The Tel el-Amarna tablets have thrown a new light on the question. Several of them are letters to the Pharaoh from 'the king of Alasia,' a country which a hieratic docket attached to one of them identifies with the Egyptian Alsa. Alsa, sometimes read Arosa, was overrun by Thothmes III., and is mentioned in the list of his Syrian conquests engraved on the walls of Karnak (Nos. 213 and 236). Maspero (*Recueil de Travaux*, x. p. 210) makes Alsa or Alasia the northern part of Cœle-Syria. An unpublished hieratic papyrus, however, now in the Hermitage of St. Petersburg, which describes an embassy sent by sea to the king of Gebal in the time of the high priest Hir-Hor, states that the Egyptian envoys were wrecked on the coast of Alsa, where they were afterwards hospitably entertained by the queen of the country. Alsa or Alasia therefore must have adjoined the Mediterranean, and Winckler and W. Max Müller accordingly propose to see in it the island of Cyprus. Conder had already suggested that Alasia and E. are one and the same. The two chief objections to the identification with Cyprus are that the ordinary Egyptian name of that island was Asi, and that Thothmes III. includes the country among his Syrian conquests.

It is tempting to identify E., on the phonetic side, with the Greek Hellas. We might assume that the Egyptian form of the name, Alsa, was taken from the cuneiform Alasia, in which the initial aspirate of the Greek would not be expressed. But the Homeric poems seem to show that the name of Hellas could not have migrated from its original home in northern Greece to the eastern basin of the Mediterranean so early as the age of the Tel el-Amarna tablets. Moreover, as late as the reign of the Assyrian Sargon, Cyprus was still known to the inhabitants of Asia as 'the country of the Ionians,' not of the Hellenes, while a *Yivana* or 'Ionian' is mentioned in two of the Tel el-Amarna letters. The termination of Alasia implies a Greek adjective in *-σιος*, and it is possible that Crete, rather than Cyprus, is intended by the name.

LITERATURE.—Sayce, *HCM* 130; Conder, *Bible and the East*.

A. H. SAYCE.

ELISHAMA (אֱלִישָׁמָע 'God has heard').—1. A prince of the tribe of Ephraim at the census in the wilderness, son of Ammihud, and grandfather of Joshua (Nu 1^{10} 2^{18}, 1 Ch 7^{26}). 2. One of David's sons, born in Jerusalem (2 S 5^{16}, 1 Ch 3^{8} 14^{7}). 3. In 1 Ch 3^{6} by mistake for Elishua (which see) of 2 S 5^{15}, 1 Ch 14^{5}. 4. A descendant of Judah, son of Jekamiah (1 Ch 2^{41}). 5. The father of Nethaniah, and grandfather of Ishmael, 'of the seed royal,' who killed Gedaliah at the time of the Exile (2 K 25^{25}, Jer 41^{1}). Jerome, following Jewish tradition, identifies him with No. 4. See Sayce *HCM* 380 f. 6. A scribe or secretary to Jehoiakim (Jer $36^{12.20.21}$). 7. A priest sent by Jehoshaphat to teach the law in the cities of Judah (2 Ch 17^{8}). R. M. BOYD.

ELISHAPHAT (אֱלִישָׁפָט 'God hath judged').—One of the captains who helped Jehoiada to instal king Joash (2 Ch 23^{1}).

ELISHEBA (אֱלִישֶׁבַע 'God is an oath'), LXX, Ἐλεισάβεθ B, Ἐλισάβετ A[1] (cf. Lk 1^{7}), daughter of Amminadab, sister of Nahshon, a prince of the tribe of Judah, and wife of Aaron. The name occurs only in Ex 6^{23} (P). W. C. ALLEN.

ELISHUA (אֱלִישׁוּעַ, 2 S 5^{15}, 1 Ch 14^{5}).—A son of David born at Jerusalem. The variant in 1 Ch 3^{6}, אֱלִישָׁמָע, is due to the similar name occurring in the next line. J. F. STENNING.

ELIUD (Ἐλιούδ).—An ancestor of Jesus (Mt 1^{15}). See GENEALOGY.

ELIZAPHAN (אֱלִיצָפָן 'God has protected'; cf. Phœn. צפנבעל, Ἐλεισαφάν).—1. Prince of the Kohathites, son of Uzziel, Nu 3^{30}, 1 Ch 15^{8} (Ἐλισαφάτ), 2 Ch 29^{13} = **Elzaphan** (אֶלְצָפָן, Ἐλεισαφάν), Ex 6^{22}, Lv 10^{4} P. 2. Zebulun's representative for dividing the land (Nu 34^{25} P). G. H. BATTERSBY.

ELIZUR (אֱלִיצוּר 'God is a Rock,' cf. ZURIEL, Ἐλεισούρ).—Prince of Reuben at the first census (Nu 1^{5} 2^{10} $7^{30.35}$ 10^{18} P). A similar name occurs in the Zinjerli inscriptions (8th cent. B.C.), Bir-tsûr, 'the god Bir is a rock' (Hommel, *Anc. Heb. Trad.*, 320), or Bar-tsûr, 'son of a rock' (D. H. Müller).

G. H. BATTERSBY.

ELKANAH (אֶלְקָנָה 'God has possessed').—1. The second son of Korah, brother to Assir and Abiasaph, one of the clans of the Korahites (Ex 6^{24}). We are told that 'the children of Korah died not' in the overthrow of Korah, Dathan, and Abiram (Nu 26^{11}). 2. The son of Jeroham, the son of Elihu, the son of Tohu, the son of Zuph, an Ephraimite of Ramathaim-zophim,* of the hill country of Ephraim, the husband of Hannah, his favourite wife, and Peninnah. Hannah felt her childlessness very much, especially as Peninnah mocked her for it; but E. endeavoured to comfort her. At length, after several yearly visits to the temple at Shiloh, Hannah was promised a son. This son was called Samuel, and Hannah and her husband offered him to the Lord when he was but an infant, and left him with Eli on their return to Ramah (1 S 1^{1}–2^{11}). 3. The son of Assir, the son of Korah (1 Ch 6^{23}), apparently identical with (1), and an ancestor of (2). 4. The father of Zuph or Zophai (1 Ch $6^{26.35}$). 5. An ancestor of Berechiah, the son of Asa, 'that dwelt in the villages of the Netophathites' (1 Ch 9^{16}). 6. One of David's mighty men, a Korahite (1 Ch 12^{6}). 7. One of the two doorkeepers for the ark (1 Ch 15^{23}), perhaps identical with (6). 8. 'That was next to the king,' slain in the reign of Ahaz with 'Maaseiah the king's son, and Azrikam the ruler of the house,' by Zichri, 'a mighty man of Ephraim' (2 Ch 28^{7}).

H. A. REDPATH.

ELKIAH (Ἐλκειά).—An ancestor of Judith, Jth 8^{1}.

ELKOSHITE (הָאֶלְקֹשִׁי, LXX Ἐλκεσαῖος).—A gentilic adjective employed to describe the prophet Nahum (1^{1}), implying that a place named Elkosh was his birthplace. Three identifications have been proposed for the latter. (1) Jerome (in his *Comm.*) locates Elkosh at a village in Galilee named *Elcesi* (cf. also Capernaum = כְּפַר נַחוּם (?), 'village of Nahum'). (2) In a work ascribed to Epiphanius, *On the Prophets, how they died and where they were buried*, we are told that 'Nahum was of Elkosh, beyond Bêt Gabrê, of the tribe of Simeon.' This Bêt Gabrê is *Beit Jibrin*, the ancient Eleutheropolis, N.E. of Lachish. (3) Mediæval tradition connected Nahum with *Elkush* on a tributary of the Tigris, 2 days' journey N. of Mosul (Nineveh). We must be content to leave the prophet's birthplace uncertain, although weighty considerations plead in favour of the second of the above identifications.

---

* For this name see art. RAMATHAIM-ZOPHIM. In 1 Ch 6^{26-28} and $^{33-35}$ Samuel is represented as a Levite, and the three names, Elihu, Tohu, Zuph, appear as Eliab, Nahath, Zophai (6^{26-28}); Eliel, Toah, Zuph (*Kethibh* Ziph) (6^{33-35}). It is noticeable that in the first of these places there is no connecting link between the Elkanah mentioned and Samuel. The usual explanation given of this apparent discrepancy is that the Levites in any particular city were counted as part of the tribe amongst whom they were dwelling; but this does not seem very satisfactory.

ELLASAR (אֶלָּסָר, Ἐλλασάρ, *Pontus*).—Arioch, king of Ellasar, was one of the vassal Babylonian kings who took part along with their suzerain, Chedor-laomer of Elam, in his campaign against Canaan (Gn 14^1). In the early days of Assyriology (see F. Lenormant, *La Langue primitive de la Chaldée* (1875), pp. 377–379) he was already identified by the decipherers of the cuneiform inscriptions with Eri-Aku, king of Larsa, who was called Rim-Sin (or Rim-Agu) by his Semitic subjects. The identification has now been verified by further discoveries, which have shown that Eri-Aku was a contemporary of Kudur-Lagamar (Chedor-laomer) of Elam, Tudghula or Tid'al, and Khammurabi or Ammi-rabi, whom recent research has proved to be the Am-raphel of Genesis. Larsa is now represented by the mounds of Senkereh, in Lower Babylonia, on the east bank of the Euphrates and about midway between the sites of Erech (*Warka*) and Ur (*Muḳayyar*). One of its early names was Ararma, and it was celebrated for its temple and worship of the Sun-god (see Sayce, *Religion of the Ancient Babylonians*, pp. 166, 167). The temple, called Bil-Uri by the Semites, was of very ancient date, and had been restored by Ur-Bau (?), B.C. 2700, by Khammurabi, by Nebuchadrezzar, and by Nabonidus. Among the ruins of its library and tombs Loftus found fragments of a mathematical work (*Chaldæa and Susiana*, pp. 255, 256). The biblical form of the name probably represents *âl Larsa*, 'the city of Larsa' (but see Ball's note on Gn 14^1 in Haupt's *OT*).

A. H. Sayce.

ELM.—A mistranslation of AV for *terebinth* (Hos 4^{13}).

ELMADAM (Ἐλμαδάμ, AV **Elmodam**, perh. = אַלְמוֹדָד Gn 10^{26}).—An ancestor of Jesus (Lk 3^{28}). See Genealogy.

ELNAAM (אֶלְנַעַם 'God is pleasantness').—The father of two of David's mighty men (1 Ch 11^{46}).

ELNATHAN (אֶלְנָתָן 'God has given'; cf. יוֹנָתָן), 2 K 24^8, Jer 26^{22} 36$^{12.25}$, Ezr 8^{16}.—**1.** The father of Nehushta, the mother of Jehoiachin. **2.** The son of Achbor. A person of influence in Jehoiakim's court. He was the chief of those sent to Egypt to fetch Uriah, who had offended Jehoiakim by his prophecy, and one of those who had entreated Jehoiakim not to burn the roll. It is possible that (1) and (2) are the same person, but by no means certain when we consider the commonness of the name. **3.** The name occurs no fewer than three times in the list of those sent for by Ezra when he encamped near Ahava in the course of his journey to Jerus., twice among the chief men, and also as one of the teachers. But it is extremely probable that the second occurrence of the name is a corrupt reading, arising out of the following name Nathan.

F. H. Woods.

ELOHIM.—See God. **ELOHIST.**—See Hexateuch.

ELOI.—See Eli.

ELON (אֵלֹן 'a terebinth').—**1.** Of the tribe of Zebulun, one of the minor judges (Jg 12$^{11.12}$). All that is told of him is simply that he judged Israel for ten years, that he died, and was buried in Elon (אילן) in Zebulun. The MT points אַיָּלוֹן Aijalon; but the distinction thus made between the name of the judge and his burying-place is quite arbitrary. Baer, *Libri Jos. et Jud.* p. 98, reads אֵלֹן Elon, in both verses. **2.** A son of Zebulun (Gn 46^{14}, Nu 26^{26}, where gentilic name **Elonites** occurs). **3.** A Hittite, the father-in-law of Esau (Gn 26^{34} 36^2).

G. A. Cooke.

ELON (אֵילוֹן), Jos 19^{43}.—A town of Dan, perhaps the same as **Elon-beth-hanan** (1 K 4^9), which was in Solomon's province corresponding to the territory of Dan. The site of Ananiah seems too far E., being in Benjamin. In some MSS Elon and Beth-hanan are made distinct places, in which case the latter may be Ananiah, and the former is unknown unless Aijalon was the original reading.

C. R. Conder.

ELON-BETH-HANAN.—See Elon. **ELOTH.**—See Elath.

ELPAAL (אֶלְפַּעַל 'God of doing' (?)).—The head of a Benjamite family (1 Ch 8$^{11.12.18}$). See Genealogy.

ELPARAN (Gn 14^6).—See Paran.

ELPELET (אֶלְפָּלֶט, AV **Elpalet**).—One of David's sons = Eliphelet No. 1.

EL-SHADDAI.—See God.

ELTEKEH (Jos 19^{44} אֶלְתְּקֵה, 21^{23} אֶלְתְּקֵא).—A town of the territory of Dan, mentioned in connexion with Ekron and Gibbethon. It is probably the same as Altaḳu (Al-ta-ḳu-u), a town mentioned in the Prism Inscription of Sennacherib as the scene of the defeat of the Philistines and their Egyp. allies by the Assyrians in the days of Hezekiah. G. A. Smith (*Hist. Geog.* p. 236) urges that Altaḳu (Eltekeh) cannot have been situated up the valley of Aijalon, where it is marked on the *PEF* map, for such a site is unsuitable as the meeting-place of the main Assyr. and Egyp. armies. The *PEF* identification may, however, be correct, and the fight may have been between detachments. Yet a site near Ekron suits Sennacherib's narrative, for after taking Altaḳu he tells us next that he took Ekron (Am-ḳar-ru-na). In any case it is improbable that the retreat of Sennacherib was the result of the encounter.

W. E. Barnes.

ELTEKON (אֶלְתְּקֹן), Jos 15^{59}.—A town of Judah, noticed with Maarath and Beth-anoth. It was in the mountains. The site is unknown. Possibly Tekoa.

ELTOLAD (אֶלְתּוֹלַד), Jos 15^{30}.—A town in the extreme S. of Judah, given to Simeon (19^4); probably **Tolad** (1 Ch 4^{29}). The site is unknown.

ELUL (אֱלוּל, Ἐλούλ, *Elul*, Neh 6^{15}, 1 Mac 14^{27}).—See Time.

ELUZAI (אֶלְעוּזַי 'God is my strength').—One of the mighty men who joined David at Ziklag (1 Ch 12^5).

ELYMAEANS.—See Elamites.

ELYMAIS (Ἐλύμαις).—This name, which represents the OT Elam, was given to a district of Persia, lying, according to Strabo (xvi. p. 744), along the southern spurs of Mt. Zagros, S of Media and N of Susiana. In 1 Mac 6^1, according to the common reading, which is adopted by the AV, Elymais is named as a rich city in Persia. No such city, however, is mentioned elsewhere, except by Josephus (*Ant.* XII. ix. 1), who is simply following 1 Mac. There can be no doubt, therefore, that we should correct the text with A (*ἐν Ἐλύμες*), ℵ (*ἐν Αὐμαις*), and most cursives, and read 'in Elymais in Persia there was a city'; so Fritzsche and RV. In the year B.C. 164 Antiochus Epiphanes made an unsuccessful attack upon the rich treasures of a temple of Artemis in this province, but the name of the place is unknown. Polybius (xxxi. 11), like 1 Mac, merely speaks of the temple as being in Elymais; while Persepolis, which is mentioned by the later account in 2 Mac 9^{2}, was not situated in this district. Comp. Rawlinson (*Speaker's Comment.*), and Strack and Zöckler on 1 Mac 6^{1}. H. A. WHITE.

ELYMAS.—See BARJESUS.

ELYON.—See EL ELYON, GOD.

ELZABAD (אֶלְזָבָד 'God hath given').—**1.** A Gadite chief who joined David (1 Ch 12^{12}). **2.** A Korahite doorkeeper (1 Ch 26^{7}).

EMADABUN (Ἠμαδαβούν, AV Madiabun, after the Aldine text Μαδιαβοῦν), 1 Es 5^{58} (^{56} LXX).—E., of the sons of Jesus (AV 'the sons of Madiabun'), is mentioned among the Levites who superintended the restoration of the temple. There is no corresponding name in the parallel Ezr 3^{9}, and it is omitted in the Vulg.: it is probably due to a repetition of the name which follows, Εἰλιαδούν. H. ST. J. THACKERAY.

EMATHEIS (B Ἐμαθθίς, A Ἐμαθείς, AV Amatheis), 1 Es 9^{29}.—Called ATHLAI, Ezr 10^{28}.

EMBALMING.—See MEDICINE.

EMBROIDERY was the ornamentation of cloth, usually linen, by means of variegated colour and artistic design.

(1) תַּשְׁבֵּץ *tashbēẓ* (the verb in *Pi.* and *Pu.* occurs Ex 28$^{20. 39}$ [all], the noun מִשְׁבְּצוֹת 8 times in Ex 28. 39, and in Ps 45^{13}) is used (only) of the high priest's coat (כְּתֹנֶת). AV has 'broidered,' RV 'chequer-work,' Ex 28^{4}. This was simply a surface device of lustre upon one colour giving an effect of broken light, like the sparkle of jet-bead ornament. Work of this kind is still done by hand by the Jewish women of Damascus, and by the people around Iconium. The coat is cut in two kinds of material, the outer one often of silk or of shining linen, the inner of white or coloured cotton. Then threads of cotton-twist are inserted between the two, and are carefully and patiently stitched in according to pattern. This has been copied in modern manufacture in such articles as the white honeycomb bedcover, except that the hand-wrought article is the same on both sides. This ornamental effect of light upon a uniform surface seems to be the origin of damask in all its beautiful varieties. The 'coat' of the high priest would be of this description, either sewn by hand or woven in squares and lines, so as to give the effect of chequer and lustre.

(2) רִקְמָה *riḳmâh*, needle-work, broidered-work, Jg 5^{30}, Ezk 16$^{10. 13. 18}$ 26^{16} 27$^{7. 16. 24}$ (cf. Ex 26^{36} 35^{35}, Ps 45^{14}). The same word is used in 1 Ch 29^{2} of stones, and in Ezk 17^{3} of feathers. In both instances AV and RV tr. 'of divers colours.' מַעֲשֵׂה רֹקֵם 'work of the variegator' (*QPB* uses this term consistently) occurs 6 times in Ex, and רֹקֵם 'the variegator' by itself twice (cf. Ps 139^{15} רֻקַּמְתִּי 'I was curiously wrought,' AV, RV).

(3) מַעֲשֵׂה חֹשֵׁב 'work of the designer' (of artistic designs in weaving; *QPB* 'pattern weaver'), Ex 26$^{1. 31}$ 28$^{6. 15}$ 36$^{8. 35}$ 39$^{3. 8}$, cf. חֹשֵׁב Ex 38^{23} and (somewhat more generally) חֹשֵׁב מַחֲשָׁבָה Ex 31^{4} ('to devise designs') 35$^{32. 35}$, 2 Ch 2^{13}, cf. Ex 35^{33} ('designed work').

Where the process was that of needlework, the cloth was stretched and held in a frame, and the sewn work in coloured thread was added; or it might be introduced during the weaving.

Anything in nature or art that was variegated by spots, lines, squares, etc., was *riḳmâh*, something embroidered. Where a principal part of the charm was due to originality of decorative design, or successful drawing of resemblances, the intellectual distinction would give it the name *cunning-work* ('work of the designer').

Oriental broidered cloth, whether hand-wrought or woven, is usually the same on both sides. In Damascus, prayer-cloths are made in stripes of crimson, sky-blue, white, purple, etc., with gold thread interwoven, after the manner of the tabernacle fabrics.

LITERATURE.—Wilkinson, *Anc. Egyp.* ii. 81; Moore on Jg 5^{30}; Hartmann, *Hebräerin*, i. 401 ff., iii. 138 ff.; Schroeder, *De vestitu mulierum*, 221 f.; Braun, *De vestitu sacerdotum*, 301 ff.; Knob.-Dillm. on Ex 26$^{1. 31}$ 28^{11}. G. M. MACKIE.

EMEK-KEZIZ (עֵמֶק קְצִיץ), Jos 18^{21}, AV 'Valley of Keziz,' mentioned among the towns of Benjamin.—A place apparently in the Jordan Valley near Jericho. The site is unknown. See Dillmann, *ad loc.* C. R. CONDER.

EMERALD.—See STONES (PRECIOUS).

EMERODS (that is, hæmorrhoids).—The word used in AV to denote the disease brought upon the Philistines when they had captured the ark (1 S 5). Two Heb. words are used for this disease. One of these is *'ōphel* (עֹפֶל). It is supposed to mean something swollen. It is the name of a portion of the fortifications of Jerus. (2 Ch 27^{3} 33^{14}, Neh 3$^{26. 27}$ 11^{21}). The verb of the stem is used twice, in the sense of being puffed up, presumptuous (Hab 2^{4}, Nu 14^{44}). This exhausts the use of the stem, except in the six places where *'ōphel*, in the plural, is used for the disease in question (Dt 28^{27}, 1 S 5$^{6. 9. 12}$ 6$^{4. 5}$). So far, the disease seems to be something tumid, a swelling of some sort.

The other word, *ṭěḥōrîm* (טְחוֹרִים), is the only word of its stem in the language. It is used in the six places last mentioned, as the *ḳerê*, or marginal reading, to be substituted for *'ōphel*, and is also used in 1 S 6$^{11. 17}$. Cognate words in Syr. and Arab. convey the idea of breathing hard, of easing the belly with violent effort, of tenesmus with flow of blood. It is said that the Massoretes directed this word to be substituted for the other as being a less indelicate term.

As to the nature of the disease, not much can be inferred from 1 S 5^{9}, where AV tr. 'They had emerods in their secret parts,' and RV 'tumours brake out upon them,' for the verb there used appears nowhere else. That the disease was externally loathsome is evident from Dt 28^{27}, where it is classed with the boil of Egypt, the scurvy and the itch. That it was terribly fatal seems to be implied in 1 S 5$^{10-12}$. That it had some particularly noteworthy symptom appears from the fact that they made golden images of it.

The traditions handed down in Josephus, and in the added specifications in the Sept. and Vulg., are sufficiently specific and horrible. According to the Vulg. 'computrescebant prominentes extales eorum.' Josephus says, 'They died of the dysentery, a sore distemper that brought death upon them very suddenly; for . . . they brought up their entrails, which were eaten through, and vomited them up entirely rotted away by the disease' (*Ant.* VI. i. 1). Josephus is imaginative, but the evidence indicates some form of dysenteric or typhoid disease, in which a loathsome rectal protrusion was a prominent symptom. See MEDICINE.

LITERATURE.—Driver and Dillm. on Dt 28^{27}; Thenius, Wellhausen, and Driver on 1 S $5^{6.9}$ 6^{4}; Hitzig, *Urgesch. d. Philistäer* (1845), p. 201; Geiger, *Urschrift*, 408 f.; *Oxf. Heb. Lex.* and Siegfried-Stade, *s.vv.* W. J. BEECHER.

EMIM (אֵימִים, Ὀμμαεὶν, Ὀομεὶν; AV **Emims**).—The name is that of a body of Rephaim or giant people, living E. of the Jordan, in the S. half of the territory between Bashan and Seir (Dt $2^{10.11}$). The name signifies 'formidable ones,' and we are told that it was given them by the Moabites. The Emim were in this region in Abraham's time, and were attacked by the four invading kings during their march S. (Gn 14^{5}). They are said to have been 'a people great and numerous, and tall as the Anakim.' We are not told what became of them, but the natural suggestions of the narrative are to the effect that the Moabites destroyed and superseded them. See GIANT. W. J. BEECHER.

EMINENT is now only metaphorical, 'exalted,' but in AV it is always literal: an 'eminent place,' Ezk $16^{24.31.39}$ (גַּב, RVm 'a vaulted chamber,' see Davidson on Ezk 16^{24}), 2 Es 15^{40} (*locus eminens*); 'an high mountain and eminent,' Ezk 17^{22} (תָּלוּל). Cf. Elyot, *The Governour*, i. 4, 'he made not only herbes to garnisshe the erthe, but also trees of a more eminent stature than herbes.' Eminence occurs in AV only in the compound 'pre-eminence' (Ec 3^{19}, Sir 33^{22}, 1 Mac 11^{27}, Col 1^{18}, 3 Jn ^{9}). RV gives 'eminency' in Ezk 7^{11} 'neither shall there be eminency among them' (וְלֹא־נֹהַּ בָּהֶם, AV 'wailing for them,' so RVm), using the word in its modern sense, and following the Arab. for the translation. See Davidson, *ad loc.* J. HASTINGS.

EMMANUEL.—See IMMANUEL.

EMMAUS (Ἐμμαούς).—**1.** Lk 24^{13} only. This place was 60 furlongs from Jerusalem. Some MSS follow ℵ in reading 'an hundred and sixty'; but this is probably a corruption, to suit the views held as to the site in the 4th cent. A.D.; for a journey of 320 furlongs, or 40 miles, in one day (see vv.$^{13.28.29.33}$), would have been improbable. In the *Onomasticon* (*s.v.*) it is placed at Emmaus Nicopolis—now *'Amwâs*, 20 miles from Jerus., near Aijalon. Josephus, however, speaks of an Emmaus 60 furlongs from Jerusalem (*Wars*, VII. vi. 6), the habitation of a colony of Titus' soldiers. The direction is unknown. The name *Kulônieh* or 'Colony,' and the distance from Jerus. (which, however, is not exact), have suggested the village so named in the valley W. of the Holy City. In the twelfth cent. Emmaus was shown at another village, *Kubeibeh*, to the N.W., at about the required distance. To the S.W. of Jerus., near the main road to the plain, is a ruin called *Khamasah*, which recalls the name of Emmaus. The distance is more than 60 furlongs, but perhaps not too great for a rough estimate. The site, however, remains uncertain. See *SWP* vol. iii. sheet xvii.

2. Emmaus Nicopolis is not mentioned in OT, but appears as a place of importance in the time of the Maccabees. It was in the neighbouring plain that the Syrian army was defeated by Judas (1 Mac $3^{40.57}$ 4^{3-25}). Emmaus was one of the towns fortified by Bacchides in order to 'vex' Israel (1 Mac $9^{50f.}$, Jos. *Ant.* XIII. i. 3).

LITERATURE.—Robinson, *BRP* iii. 147 f.; Guérin, *Judée*, i. 29 f., 301 f.; Reland, *Pal.* 427, 758; Thomson, *Land and Book*, i. 116, 123 ff., 132, ii. 59; Schwarz, *Das heil. Land*, p. 98; Neubauer, *Géog. du Talmud*, 101 f., 152 f.; Baedeker-Socin, *Hdbk. to Pal.* 141; Sepp, *Das heil. Land*, i. 42; *PEFSt*, 1876, 172, 174; 1879, 105; 1881, 46, 237, 274; 1882, 24, 59; 1883, 53, 55; 1884, 83, 189, 243; 1885, 116, 156; 1886, 17; Smith, *HGHL* 214; Schürer, *HJP* I. i. 215, 236, ii. 231, 253, 386 ff., II. i. 157 ff.; Conder, *Tent Work in Pal.* 8, 140; *Bible Places*, 73, 103; Keim, *Jesus of Nazara*, vi. 306; Caspari, *Chronol.-Geog. Leben Jesu*; Andrews, *Life of our Lord*, 617–619. C. R. CONDER.

EMMER (A Ἐμμήρ, B Ἐμήρ), 1 Es 9^{21}.—In Ezr 10^{20} IMMER.

EMMERUTH (A Ἐμμηρούθ, B Ἔρμηρος, AV **Meruth**), 1 Es 5^{24}.—A corruption of Immer in Ezr 2^{37}. Probably Ἔμμηρ was first Grecized into Ἔμμηρος, and the form in A arose from mistaking Ἐμμήρου for a nominative. The AV is due to the Aldine text, which has υἱοὶ ἐκ Μηρούθ for υ. Ἐμμ. H. ST. J. THACKERAY.

EMULATION is now used only in a good sense, healthy rivalry. But about 1611 it wavered between that and a distinctly bad meaning, 'ambitious strife,' or 'malicious envy.' Shakespeare uses it in both ways, and of the three occurrences in AV, two are bad (1 Mac 8^{16}, Gal 5^{20}, both ζῆλος) and one good (Ro 11^{14} 'If by any means I may provoke to e.', εἴ πως παραζηλώσω, RV 'to jealousy'). The Douay Bible uses 'emulation' of God, after Vulg. *æmulatio*, in Ps 78^{58} 'in their grauens they provoked him to emulation,' where AV has 'jealousy' ('moved him to jealousy with their graven images'). For the sense of 'malicious envy' take the Rheims tr. of Ac 7^{9} 'the Patriarches through emulation, sold Joseph into Ægypt.' Emulation and envy are distinguished and discussed by Trench, *NT Synonyms*, p. 83 ff., in his article on the Gr. words ζῆλος and φθόνος. J. HASTINGS.

ENABLE occurs only 1 Ti 1^{12}, and it is used, without an infinitive following, in the obsolete or at least archaic sense of 'strengthen.' Cf. Mulcaster (1581), *Positions*, xli. 232, 'Exercise to enable the body'; and Melvill, *Diary* (Wodrow, p. 280), 'obteining of God's mercie that night's repose, quhilk I luiked nocht for, to inable me for the morne's action.' J. HASTINGS.

ENAIM (עֵינַיִם), probably the same as **Enam** (עֵינָם) which is mentioned among the towns of lowland Judah in Jos 15^{34}. From the reference to Enaim in Gn $38^{14.21}$ we gather that it was the name of a village on the road to Timnah; and, as the incident recorded in this chapter is prefaced by the mention of the sojourn of Judah with his friend Hirah the Adullamite, the village possibly stood on the road between Timnah and Adullam. In Jos 15^{34} Enam stands in the same group of towns with Tappuah and Adullam and Azekah.

The AV in its rendering Gn 38^{14} 'in an open place' (RV 'in the gate of Enaim'), and Gn 38^{21} 'openly by the way side' (RV 'at Enaim by the way side'), has followed the explanation adopted by the Targums, the Pesh. Syriac, and the Latin Vulgate (*in bivio itineris*), on the supposition that *'ēnayim* had its usual meaning 'eyes,' and was not a proper name. Cf. Jerome, who, commenting on the words 'Et sedit ad portam Enam,' remarks 'Sermo Hebraicus Enaim transfertur in oculos. Non est igitur nomen loci; sed est sensus: sedit in bivio, sive in compito, ubi diligentius debet viator aspicere, quod iter gradiendi capiat.' The Old Latin (Lyons Pent.) and the LXX (Αἰνάν) rightly rendered the word as a proper name. The double form Enaim and Enam may be compared with Dothain and Dothan (Gn 37^{17} and 2 K 6^{13}). The meaning of the name was presumably 'the two springs.' Conder has identified it with *Kh. Wady Alin*, which is close to Beth-shemesh and En-gannim. H. E. RYLE.

ENAN (עֵינָן 'having fountains,' or 'eyes' *i.e.* 'keen-eyed,' Αἰνάν).—Prince of Naphtali at the first census (Nu 1^{15} 2^{29} $7^{78.83}$ 10^{27} P).

ENASIBUS (A Ἐνάσιβος, B -ει-), 1 Es 9^{34}.—In Ezr 10^{36} ELIASHIB. The form is probably due to reading ΑΙ as Ν.

ENCAMPMENT BY THE SEA.—One of the stations in the itinerary of the children of Israel, where they encamp after leaving Elim, Nu 33^{10} [see ELIM]. If the position of Elim be in the Wady Ghurundel, then the camp by the sea is on the shore of the Gulf of Suez, somewhere south of the point where the Wady Tayibeh opens to the coast. The curious return of the line of march to the seashore is a phenomenon that has always arrested the attention of travellers to Mt. Sinai: and if Mt. Sinai be really in the so-called Sinaitic peninsula, the camp can be located within a half-mile. [But it is within the bounds of a reasonable probability that the 'Encampment by the Sea' may mean the Gulf of 'Aḳabah, and Sinai be out of the peninsula.] St. Silvia of Aquitaine [? in the year 388] returned from the traditional Sinai, and especially notices the approach of the line of march to the seashore ('pervenimus ad mansionem, quæ erat jam super mare, id est in eo loco, ubi iam de inter montes exitur, et incipitur denuo totum iam iuxta mare ambulari; sic tamen iuxta mare, ut subito fluctus animalibus pedes cedat'). Her identification is that of an accepted tradition which must be many years older than herself. It is very valuable evidence for a Christian tradition which is sensibly constant in her time, and shows no signs of having undergone any revision at the hands of ecclesiastics.

J. RENDEL HARRIS.

ENCHANTMENT.—See DIVINATION.

END.—The uses of this word are not so often obsolete as *biblical*, and demand attention from their very familiarity.

1. The end as opposed to the beginning. To the Heb. mind, especially in the later and more rigorous days of the history of Israel, the most perplexing problem was the prosperity of the wicked; and the conclusion which gave the most satisfying shelter, was the thought of the *end*. Ps 37$^{37.38}$ 'Mark the perfect man, and behold the upright: for the end (RV 'latter end') of that man is peace. But the transgressors shall be destroyed together; the end (RV 'latter end') of the wicked shall be cut off.' So even the author of Ps 73, who, though a true worshipper, felt the perplexity so keenly that he said, 'Surely in vain have I cleansed my heart' (v.^{13}), found rest when he went into the sanctuary of God and 'considered their latter end' (v.^{17}). Moreover, this is the solution of the Book of Job, if (apart from the Elihu chapters) that book may be accepted as a unity. It is Bildad who utters the prophecy (Job 8^{7}), unconsciously as Caiaphas; but it is fulfilled to the letter (42^{12}), for the word used of Job's 'latter end' is the same in both places. And it is a truly religious solution, since it is God that declares the end from the beginning (Is 46^{10}). Nor was it so precarious as we may suppose, for the word (*'aḥărîth*) had a certain elasticity of meaning, and did not absolutely restrict the thought to the end of this present life. Its sense varied with the context, but it was capable of standing for even the great Messianic future. Still, we must observe that this source of encouragement, while frequent in the Apocr. (Wis 2^{16} 5^{4}, Sir 1^{13} 7^{36} 9^{11} 11^{27} [16^{22}] 18^{12} 21$^{9.10}$), is scarcely found in NT; cf. (doubtfully) He 13^{7} 'considering the end of their conversation' (τὴν ἔκβασιν τῆς ἀναστροφῆς, Wyc. 'the goynge out of lyuynge'; but Rendall takes it in another sense, 'the issue, *sc.* of the word which they had preached, presented to the observer by their daily course of life'); and 2 P 2^{20} 'the latter end is worse with them than the beginning' (τὰ ἔσχατα, RV 'the last state').

2. The 'end' is used to denote the extremity. The Heb. words are (1) *gabhlûth*, only Ex 28^{22} 39^{15} (AV 'at the ends,' RV 'like cords,' fr. [*gâbhal*] to twist). (2) *peh*, lit. 'mouth,' 2 K 10^{21} 21^{16}, Ezr 9^{11} 'full from one end to another' (AVm 'full from mouth to mouth,' but Ryle thinks the metaphor has been taken from a drinking vessel). (3) *pê'âh*, Ezk 41^{12} (usually 'side,' as RV here). (4) *rō'sh*, 'head,' 1 K 8^{8}=2 Ch 5^{9} 'the ends of the staves' of the ark. (5) *sôph* (a late word, 2 Ch 20^{16}, Ec 3^{11} 7^{2} 12^{13}, Jl 2^{20}, and in Dn). But the most freq. is (6) *'ephes*, only in the phrase *'aphsê 'erez*, 'ends of the earth'; which is also the tr. of (7) *kanĕphôth hâ'ârez*, lit. 'wings of the earth' in Job 37^{3} 38^{13}. On the last passage Davidson says, 'The figure is beautiful; the dawn as it pours forth along the whole horizon, on both sides of the beholder, lays hold of the borders of the earth, over which night lay like a covering; and seizing this covering by its extremities it shakes the wicked out of it. The wicked flee from the light. The dawn is not a physical phenomenon merely, it is a moral agent.' In NT cf. Mt 24^{31} 'from one end of heaven to the other' (ἀπ' ἄκρων οὐρανῶν ἕως ἄκρων αὐτῶν), Ro 10^{18} 'the ends of the world' (τὰ πέρατα τῆς οἰκουμένης). See EARTH, WORLD.

3. The end may also be the *conclusion*, as Is 24^{8} 'the noise of them that rejoice endeth' (*ḥâdhal*). The Heb. is nearly always *ḳâẓâh* and its derivatives; but once we find *yâẓâh*, 'to go out,' Ex 23^{16} 'in the end of the year'; and twice the subst. *tĕḳûphâh*, 'the circuit' (of the sun, Ps 19^{6}), used of the year, Ex 34^{22}, 2 Ch 24^{23} (AVm and RVm 'revolution'). In NT the chief word is τέλος, but the more precise συντέλεια is found in Mt (13$^{39.40.49}$ 24^{3} 28^{20}, always followed by τοῦ αἰῶνος, EV 'end of the world,' RVm 'consummation of the age') and in He 9^{26} (σ. τῶν αἰώνων, AV 'end of the world,' RV 'end of the ages,' RVm 'consummation of the ages'). See ESCHATOLOGY; also MILLENNIUM, PAROUSIA, WORLD, and B. W. Bacon in *Old and New Test. Student*, xiii. 225–233. 'End' in the sense of conclusion is common in Apocr., as 1 Es 9^{17} 'their cause . . . was brought to an end' (ἤχθη ἐπὶ πέρας); with which cf. He 6^{16} 'an oath for confirmation is to them an end of all strife' (πέρας εἰς βεβαίωσιν, RV 'is final for confirmation'). 'In the end of the Sabbath' (Mt 28^{1}) is lit. 'late of the Sabbath' (ὀψὲ σαββάτων).

4. A work may be ended, not merely because it is concluded or terminated, but because it is *completed* or *perfected*. In this sense 'end' occurs both as vb. and subst. The Heb. is mostly either *kâlâh* or *tâmam* in some of their parts; and the meaning is either completeness, as of the end of sin (Dn 9^{24}), or perfection, as of the end of God's creative work (Gn 2^{2}). The subst. *kâlâh* is tr. 'a full end' in Jer 4^{27} 5$^{10.18}$ 30^{11} *bis* 46^{28} *bis*, Ezk 11^{13}, and 'an utter end' in Nah 1$^{8.9}$ (RV 'a full end'). The phrase εἰς τέλος carries the sense both of termination and of completeness, so that in Jn 13^{1} it is difficult to decide between 'he loved them to the end' and 'he loved them to the uttermost.' In 1 Th 2^{16} 'to the uttermost' is clear; in Lk 18^{5} 'to the end' is most natural. In 1 P 1^{13} the adv. τελείως, which occurs in bibl. Gr. only here, is tr^{d} in AV 'to the end,' in RV more probably 'perfectly.' These meanings easily pass into that of *perpetuity*, which is manifest in Ps 119$^{33.112}$, EV 'unto the end' (Heb. *'ēḳebh*); Job 34^{36} (*'adh-neẓaḥ*); Jer 3^{5} (*lâneẓaḥ*); and 'world without end' Is 45^{17} (עַד־עוֹלְמֵי עַד), Eph 3^{21} (τοῦ αἰῶνος τῶν αἰώνων, RV 'for ever and ever').

Like Lat. *finis* (and probably owing to it), 'end' is used in Eng. for the *purpose*, as in Tomson's NT (1576) Heading of Ep. to He, 'The drift and end of this Epistle is.' In AV this meaning is found only in the phrase 'to the end . . .' or 'to this end . . .,' and once 'to what end'? (Am 5^{18}). In old Eng. this phrase is sometimes followed by the infin., as Bacon's *Essays*, p. 201, 'Some undertake Sutes . . . to the end to gratify the adverse partie.' But in AV it is followed by 'that,' or the conj. is omitted. The constructions in the orig. are: 1. לְמַעַן 'in order that,' Ex 8^{22} 'to the end thou mayest know'; Lv 17^{5}, Dt 17$^{16.20}$, Ps 30^{12}, Ezk 20^{26} 31^{14}, Ob ^{9}. 2. עַל־דִּבְרַת 'for the sake of' (see Ec 3^{18} 8^{2}), Ec 7^{14} 'to the end that man should find nothing after him.' 3. τοῦ with infin., 1 Mac 13^{34} 14^{23}. 4. ὅπως, 1 Mac 14^{49}. 5. εἰς τό with infin., Ac 7^{19}, Ro 1^{11} 4^{16}, 1 Th 3^{13}. 6. εἰς τοῦτο, 'to this end,' Jn 18^{37}, Ro 14^{9}, 2 Co 2^{9}. 7. πρὸς τό, Lk 18^{1} 'to this end that men ought always to pray' (RV 'to the end that'). RV has shown much fondness for this phrase, introducing 'to the end that' in place of the simple 'that' of AV, for לְמַעַן in Gn 18^{19} *bis*, Ex 33^{13}, Nu 16^{40}; for εἰς τό with infin. (on which see Votaw, *The Use of the Infin. in Bibl. Gr.*, 1896, p. 21) in Ro 4^{18}, Eph 1^{12}, 2 Th 1^{5} 2$^{2.6}$, 1 P 3^{7}; and for ἵνα in Eph 3^{17}, 2 Th 3^{14}, Tit 3^{8}. RV also introduces 'to this end' for εἰς τοῦτο in Mk 1^{38}, 1 Ti 4^{10} (AV 'therefore'), Ac 26^{16}, 1 Jn 3^{8} (AV 'for this purpose'), and Jn 18^{37} (AV 'for this cause'); 'unto this end' in 1 P 4^{6} (Gr. εἰς τοῦτο, AV 'for this cause'); and 'to which end' in 2 Th 1^{11} (Gr. εἰς ὅ, AV 'wherefore').

J. HASTINGS.

ENDAMAGE.—Ezr 4^{13} 'thou shalt e. the revenue of the kings' (תְּהַנְזִק), and 1 Es 6^{33} 'that stretcheth out his hand to hinder or e. that house of the Lord in Jerusalem' (κακοποιῆσαι). The word is still used, but is somewhat old-fashioned. Cf. Quarles, *Emblems*, I. xi. 47, 'The Devil smileth that he may endamage'; and H. Vaughan, *Silex*, i. Pref., 'No loss is so doleful as that gain that will endamage the soul.'

J. HASTINGS.

ENDEAVOUR.—'Endeavour' seems a very inadequate tr. of *σπουδάζω*, which in 2 Ti $4^{9.21}$ is rendered 'do thy diligence,' in Tit 3^{12} 'be diligent,' (RV 'give diligence'), and in Gal 2^{10} 'was forward' (RV 'was zealous'). But 'endeavour once denoted all possible tension, the highest energy that could be directed to an object. With us it means the last feeble hopeless attempt of a person who knows that he cannot accomplish his aim, but makes a conscience of going through some formalities for the purpose of showing that the failure is not his fault' (Maurice, *Lincoln's Inn Ser.* quoted by Trench, *On the AV*, p. 43). One of the places where in AV *σπουδάζω* is tr. 'endeavour' is Eph 4^3 'endeavouring to keep the unity of the Spirit in the bond of peace,' and in his comment on that passage, Abp. Laud (*Sermons*, i. 155) shows the force of 'endeavour' in his day: 'If you will keep it you must endeavour to keep it. For it is not so easy a thing to keep unity in great bodies as it is thought; there goes much labour and endeavour to it.' Cf. also Act 7, Henry VII. c. 22, 'Endevoir youre self and put to your hand and spare no cost.' The subst. occurs only Ps 28^4 'according to the wickedness of their endeavours' (מַעַלְלֵיהֶם, RV 'doings'). The vb. is found for Gr. *ζητέω* Ad. Est 16^3, Ac 16^{10} (RV 'seek'); for *πειράζω* 2 Mac 11^{19}; for *σπουδάζω* Eph 4^3 (RV 'give diligence'), 1 Th 2^{17}, 2 P 1^{15} (RV 'give diligence').

To 'endeavour' is 'to do one's *devoir*' or duty: *en* having a verbal and active force as in 'encumber,' 'enforce,' etc., it is the expression in one word of Chaucer's 'Doth now your devoir' (*Cant. Tales*, 1600). 'Devoir' is the Fr. form of Lat. *debere*, to owe, and 'en' is the Fr. form of Lat. *in*. The spelling in AV 1611 is always 'endeuour' (except 2 Th 2^{17}, by accident 'endeuor'). But about this time it was customary to affect the Latin form, so in Pref. we find 'that hath bene our indeauour, that our marke.' J. HASTINGS.

ENDIRONS.—Ezk 40^{43m} (text 'hooks' [which see] m. 'or endirons, or the two hearth-stones').

The spelling of 1611 is 'andirons.' The change into 'endirons' was first made in 1638, under the impression, no doubt, as Wright says, that being the *iron* standards, one at each *end* of the fireplace, to support the log of wood that was burning, this was the derivation, and should be the spelling. But this is not the derivation. It cannot be traced farther back than old Fr. *andier* and late Lat. *anderia*; and the form *-iron* is an Eng. corruption as much as *end-*. Another false spelling is 'handiron,' as Florio (1591), *Sec. Frutes*, 159, 'Set that firebrand upon the handiron.' J. HASTINGS.

EN-DOR (עֵין דֹּר Jos 17^{11}, ע׳ דּוֹר 1 S 28^7, ע׳ דּאֹר Ps 83^{10}.—A town in Issachar belonging to Manasseh, mentioned with Dor as one of 'three countries' (AV; the text נָפֶת is undoubtedly corrupt) which appear to have been in the Jordan Valley (Beth-shean and Ibleam), in the Esdraelon plateau (Dor and En-dor), and in the low hills to the W. (Taanach); but for 'countries' we may read 'heights' (RV), as referring only to Dor, En-dor, and Taanach. It was not far from Shunem and Gilboa, and near the Kishon and Tabor, where Sisera is said in the last passage (Ps 83^{10}) to have perished. In the fourth cent. A.D. it was known as a large village 4 Roman miles south of Tabor—now the hamlet *Endûr* in this position, on the N. slope of the conical hill of *Nebi Dhahy*. Possibly the site of Dor should be placed near En-dor, which means the 'spring of Dor'; but it may be objected that both are noticed in a single passage (cf., however, Sheba and Beersheba in Jos 19^2).* En-dor was one of the places conquered by Tahutmes III. about 1600 B.C. See *SWP* vol. ii. sheet viii. See DOR.

LITERATURE.—Lagarde, *Onom.* 96, 121, 226; Robinson, *BRP* iii. 460, 468 f.; Baedeker-Socin, *Pal.*² 460 f.; Van de Velde, ii. 383; Tristram, *Land of Israel*, p. 127; Conder, *Tent-Work in Pal.* 63; Porter, *Giant Cities of Bashan*, 247, 250.

C. R. CONDER.

ENDOW, ENDUE.—These words are distinct in origin. Endow is fr. Lat. *in-dotere* (fr. *dotem*, a dowry), through the Fr. *en-douer*. Its proper meaning is, therefore, to provide with a dowry. Endue is fr. Lat. *inducere*, through the old Fr. *induire*, and properly means 'to lead on,' 'introduce.' But a supposed derivation from Lat. *induere*, 'to put on (clothing),' helped to give the word its meanings of 'clothe,' and then 'invest' with some quality or spiritual gift. Then this was so close to the meaning of 'endow,' and the spelling was so uncertain, that the two words were often confounded. When the spelling is 'endow' the meaning is rarely wrong; but 'endue' (often spelt 'indue' from the influence of Lat. *induere*) took on all the meanings of both words.

In AV they occur Gn 30^{20} 'God hath endued me with a good dowry' (זָבַד, RV 'endowed'); Ex 22^{16} 'he shall surely endow her to be his wife' (מָהֹר יִמְהָרֶנָּה, RV 'pay a dowry for her'); 2 Ch $2^{12.13}$ 'endued (1611 'indued') with prudence . . . understanding' (יוֹדֵעַ); Sir 17^3 'he endued them with strength' (*ἐνέδυσεν*); Lk 24^{49} 'till ye be endued (1611 'indued') with power from on high' (*εώς οὗ ἐνδύσησθε*, RV 'be clothed'); and Ja 3^{13} 'endued (1611 'indued') with knowledge' (*ἐπιστήμων*, RV 'understanding'). That the distinction between the words was not always forgotten about 1611 is shown by this quot. from Hieron (1616), *Works*, ii. 37, 'Was it with what religion is the woman endewed, or with what portion is shee endowed?'

J. HASTINGS.

EN-EGLAIM (עֵין־עֶגְלַיִם).—A locality on the Dead Sea, mentioned along with En-gedi, Ezk 47^{10}. It has not been identified, but is not improbably *'Ain Feshkah* (Robinson, *BRP* ii. 489). Tristram (*Bible Places*, 93) would make it *'Ain Hajlah* (Beth-hoglah). In any case, it probably lay to the N. towards the mouth of the Jordan. Eglaim of Is 15^8 is a different place, its initial letter being א, not ע, and its situation apparently to the *south* of the Dead Sea (cf. Davidson on Ezk 47^{10}).

J. A. SELBIE.

ENEMESSAR (Ἐνεμεσσάρ).—The name of a king of Assyria, found in Gr. codd. of To 1^2, where Heb., Aram., and Lat. codd. all read Shalmaneser. Shalmaneser is explained by recent Assyriologists to mean 'Salman (the god) is chief'; but, in accounting for the form Enemessar, it is possible that the Hebrews interpreted the name to mean 'Esar (or Assur) is peaceful' (cf. Esarhaddon); then the Gr. translator capriciously altered שלמן אסר 'Esar is peaceful' to חנן אסר 'Esar is gracious,' toning down the final ן to ם as in Hanamel (Jer 32^7) for חנן אל 'El is gracious.'

Other explanations are: 1. That Enemessar is for Senemessar (*sh* changed to *s*, and then to the light breathing, as in Arkeanos for Sargon), *l* being dropped, and the *m* and *n* transposed (so Pinches). 2. That Shalmaneser drops the של (which was possibly mistaken for the genitive) and then transposes *m* and *n* (so Rawlinson). 3. It is an unrecorded private name of Sargon, for Anumasir = 'the god Anu is gracious' (so Oppert). 4. It is a corruption of Sarru-kinu = Sargon reversed (so Bickell). J. T. MARSHALL.

ENENEUS (Ἐνήνιος, AV Enenius), 1 Es 5^8.—One of the twelve leaders of the return from Babylon under Zerubbabel. The name is omitted in the parallel list in Ezr 2, which gives only eleven leaders; but answers to NAHAMANI, Neh 7^7.

ENFLAME.—This is the spelling of mod. edd. of AV in Is 57^5, though that of 1611 was 'inflame.'

---

* W. H. Bennett in Haupt's *OT* remarks on Jos 17^{11} 'As the Endor clause does not occur in Jg 1^{27}, and Endor is about 25 miles E. of Dor, the clause is probably due to accidental repetition of the Dor clause.' In Jos 19^2 in like manner Sheba, which is wanting in 1 Ch 4^{28} and in some Heb. MSS, may be an accidental repetition of the שבע in באר שבע.

In Is 5^{11} 1611 had 'enflame,' mod. edd. 'inflame.' The word also occurs Sir 28^{10}, Sus ^{8}, 1 Mac 2^{24} (1611 and mod. edd. 'inflame'). The meaning is always 'excite,' and the ref. is to lust in Is 57^{5}, Sus ^{8}; to wine Is 5^{11}; to anger Sir 28^{10}; while the sense is good in 1 Mac 2^{24} 'Mattathias . . . was inflamed with zeal' (ἐζήλωσε). Wyclif uses the word in Ja 3^{6} of the tongue, 'it is enflawmed of helle, and enflawmeth the wheel of oure birthe.' J. HASTINGS.

ENGAGE.—Jer 30^{21} only, 'who is this that engageth his heart to approach unto me?' (עָרַב אֶת־לִבּוֹ; Vulg: 'applicet cor suum'). Engage is used in the sense of 'pledge,' though to 'engage one's heart' seems to be a unique expression. Shaks. has 'I do engage my life,' and 'I will engage my words,' where the meaning is nearly the same. The older VSS vary: Cov. 'what is he, that geveth over his herte'; Gen. 'that directeth his heart'; Dou. 'that applieth his hart.' RV tr. 'that hath had boldness to approach unto them,' with marg. 'Heb. *hath been surety for his heart.*'
J. HASTINGS.

EN-GANNIM (עֵין גַּנִּים).—Two places so named are noticed in the Book of Joshua, the name signifying 'the spring of gardens.' **1.** Jos 15^{34}. A town of Judah noticed with Zanoah and Eshtaol. It is supposed by Clermont-Ganneau to be the ruin *Umm Jina* in the valley near Zanoah—a suitable site. See *SWP* vol. iii. sheet xvii. **2.** Jos 19^{21} 21^{29} (in 1 Ch 6^{58} Anem). A town of Issachar given to the Levites, now *Jenîn*, a town on the S. border of Esdraelon, with a fine spring, gardens and palms. It marked the S. limit of Galilee, and appears to have been always a flourishing town. The 'garden house,' *Beth-hag-gan*, in 2 K 9^{27} has been thought to be En-gannim, but it is more probably *Beit Jenn* E. of Tabor. See IBLEAM. See *SWP* vol. ii. sheet viii.

LITERATURE.—Guérin, *Samarie*, i. 327; Robinson, *BRP* iii. 116, 337; Baedeker-Socin, *Pal.*^{2} 237; Van de Velde, p. 359; Tristram, *Land of Israel*, 65, 130; Conder, *Tent-Work in Pal.* 58; *Bible Places* (ed. 1897), 67, 180, 265.
C. R. CONDER.

EN-GEDI (עֵין גֶּדִי, Arab. *'Ain Jidi*, 'fountain of the kid'), the name of a spring of warm water which bursts forth from the cliffs overlooking the W. shore of the Dead Sea near its centre, and 2 miles S. of Râs Mersed. The ancient name of the spot was Hazazon-tamar (2 Ch 20^{2}), by which it was known in the days of Abraham (Gn 14^{7}); and it has been suggested by Tristram that a group of ruins below the cascade near the shore of the Dead Sea may mark the site of a town through which marched the Assyrian host of Chedorlaomer (Gn 14^{7}). The place was included in the wide skirts of the tribe of Judah (Jos 15^{62}), and is associated with the City of Salt, which probably lay a few miles farther S. on the shore of the lake near Khashm Usdum (the Salt-mountain). The name 'Wilderness of En-gedi' applies to the wild rocky district forming the E. part of the Wilderness of Judah; and here amongst the deep ravines, rocky gorges, and the caves, which nature or art have hewn out in their sides, David found a safe hiding-place from the vengeance of Saul (1 S 24^{1}). At a later period it was the scene of the slaughter of the hordes of Ammon, Moab, and Edom, who had invaded the kingdom of Judah in the reign of Jehoshaphat (2 Ch 20^{2}). The limestone cliffs of En-gedi are deeply intersected by numerous river channels which descend from the table-land of Judah towards the Dead Sea. At the place itself two streams, the Wady Sudeir and Wady el-'Areyeh, enclose a small plateau, nearly 2000 ft. above the waters and bounded by nearly vertical walls of rock. Terraces of shingle and white calcareous marl envelop their bases to a height of several hundred feet, and mark the level at which the waters of the lake formerly stood. Only a few bushes of acacia, tamarisk, *Solanum*, and *Calotropis procera* (Apple of Sodom) decorate the spot where palms and vines were formerly cultivated (Ca 1^{14}). The district is tenanted by a few Arabs of the Jâhalîn and Rashâybeh tribes, and is the safe retreat of the *Ibex* ('wild goat,' 1 S 24^{2}), the coney (*Hyrax syriacus*), and numerous birds of prey. The spot is amongst the wildest and most desolate in the whole of Palestine.

LITERATURE.—Lagarde, *Onom.* 119, 254; Seetzen, *Reisen*, ii. 227 ff.; Robinson, *BRP* ii. 439 ff.; Baedeker-Socin, *Pal.*^{2} 175; Tristram, *Land of Israel*, 280 ff., 296; Schürer, *HJP* II. i. 160; Neubauer, *Géog. du Talmud*, 160; G. A. Smith, *Hist. Geog.* 269 ff.; Conder, *Tent-Work in Pal.* 266; *Bible Places* (1897), 8, 113; Sayce, *Patriarchal Pal.* 40. E. HULL.

ENGINE.—Besides the battering-ram, 'forts' *dāyēk*, דָּיֵק (LXX προμαχῶνες, *Oxf. Heb. Lex.* 'bulwark,' 'siege-wall'), are mentioned as used in sieges in the Chaldæan era (2 K 25^{1} = Jer 52^{4}, Ezk 4^{2} 17^{17} $21^{22\,(27)}$ 26^{8} [all]). These forts were prob. towers on wheels manned with archers, and pushed forward by degrees against the wall to be attacked (cf. 1 Mac 13^{43-45}). Such a tower might be combined with a battering-ram, or at least used to cover the attack of the ram. See BATTERING-RAM.

In 1 Ch 26^{15} Uzziah is said to have 'made in Jerusalem engines invented by cunning men (lit. 'contrivances, the invention of inventive men,' חִשְּׁבֹנוֹת מַחֲשֶׁבֶת חוֹשֵׁב, see *Oxf. Heb. Lex. s.* חִשָּׁבוֹן) to be on the towers and upon the battlements, to shoot arrows and great stones withal.' These 'engines' were probably similar to the Roman *catapulta* and *balista*. The only other occurrence of the word חִשָּׁבוֹן is in Ec 7^{29} 'God made man upright, but they have sought out many *inventions.*'

In Maccabæan times several different kinds of engines were in use. 'He encamped,' writes the author of 1 Mac, 'against the sanctuary many days, and set there artillery, and engines, and instruments to cast fire (*or* 'fiery darts'), and others to cast stones, and *tormenta* (σκορπίδια) to cast darts, and slings' (6^{51}). W. E. BARNES.

ENGRAFTED.—Ja 1^{21} only, 'the e. word.' This trⁿ may be traced from Tind. 'grafted' (which would be the mod. form), through Gen. 'graffed,' Rhem. 'engraffed.'* J. HASTINGS.

ENGRAVING.—**1.** חֲרֹשֶׁת *hărôsheth*, Ex 31^{5} $35^{33.\,35}$ [חָרוּת in Ex 32^{16} is prob. text. error for חָרוּשׁ, cf. Jer 17^{1}]. **2.** פִּתּוּחַ *pittûaḥ*, Ex $28^{11.\,21.\,36}$ $39^{14.\,30}$, Zec 3^{9} (cf. 2 Ch $2^{6.\,13}$), 1 K 6^{29}, Ps 74^{6}. **3.** מִקְלַעַת *miḳla'ath*, 1 K $6^{18.\,29.\,32}$ 7^{31}. **4.** מְחֻקָּה *mĕḥuḳḳeh*, 1 K 6^{35} (cf. Is 49^{16}, Ezk 8^{10} 23^{14}, Job 13^{27}). **5.** χάραγμα, Ac 17^{29}.

Of these terms, the first possibly refers to the artistic skill of the worker, and the others to indicate the process or result of etching, punching, gouging, relief, etc. The material used was stone, wood (2 S 5^{11} = 1 Ch 14^{1}), metal (1 S 13^{19}), and jewels (Ex 28^{11}). The effect sought was either that of engraving into the surface, as in the signet-ring, and the jewels of the high priest's dress, or that of relief by the removal of the surrounding material, as in the cherubim carvings on the temple doors.

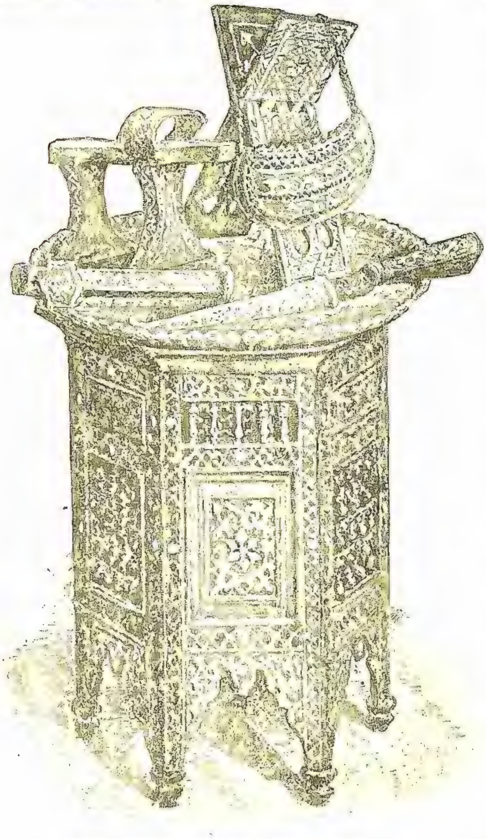
The incisions made by the graving-tool (חֶרֶט, Ex 32^{4}) gradually led to ornamental inlaying in metal, and to mosaic of marble, ivory, and mother-of-pearl in palaces (Ps 45^{8}).

---

* The Gr. (ἔμφυτος), which occurs only here in NT, gave the late Lat. *impotus*, whence our Eng. word 'imp.' An 'imp' is orig. a graft, as *Piers Plowman*, v. 137—

> 'I was sum-tyme a frere,
> And the Couentes [Convent's] Gardyner, for to graffe ympes.'

So 'an imp of Satan' is a graft, scion, child of the devil.



WOOD, IVORY, AND METAL 'ENGRAVING.'

The final form of engraving, amounting to complete separation, was that of the פֶּסֶל (Arab. *faṣl*) graven image (see CARVING).

LITERATURE.—Benzinger, *Heb. Arch.* 255 ff.; Wilkinson, *Anc. Egyp.* ii. 337; Herod. vii. 69; Müller, *Hdb. d. Archäol. der Kunst*, § 311. G. M. MACKIE.

EN-HADDAH (עֵין חַדָּה), Jos 19^{21}. — A city of Issachar noticed with En-gannim and Remeth. It is perhaps the present village *Kefr Adhân* on the edge of the Dothan plain, W. of En-gannim. See *SWP* vol. ii. sheet viii. C. R. CONDER.

EN-HAKKORE (עֵין הַקּוֹרֵא 'spring of the partridge'; cf. 1 S 26^{20}, Jer 17^{11}). — The name of a fountain at Lehi (Jg 15^{19}). The narrator (J (?)) of the story characteristically connects *haḳḳōrē* with the word *yiḳrā* ('he called') of v.^{18}, and evidently interprets *'En-haḳḳōrē* as 'the spring of him that called.' The whole narrative is rather obscure, and the tr. in some instances doubtful, but probably the story is something to the following effect. After his exertions in slaughtering the Philistines, Samson was very thirsty, and, finding no water, he cried to J", who clave the *maktēsh* ('mortar' or 'hollow place') which is in Lehi, and from a cleft in one of its sides water flowed (so Moore). This certainly seems preferable to the interpretation represented by AV, which understands the water to have sprung from a hollow place in the jaw (*leḥi*).

There is much difference of opinion regarding the situation of 'En-haḳḳōrē. In Jerome's time it was shown at Eleutheropolis; Conder identifies it with 'Ayūn Ḳāra, N.W. of Zorah; Van de Velde with a large spring between Tell el-Lekîyeh (4 miles N. of Beersheba) and Khuweilfeh.

LITERATURE.—Conder, *Tent-Work*, i. 277, *Bible Places*, 67; Guérin, *Judée*, ii. 318 f., 396 ff.; Van de Velde, *Memoir*, 343; Moore, *Judges*, 346 ff.; Reuss, *AT* i. 158; *PEFSt*, 1869, 182. J. A. SELBIE.

EN-HAZOR (עֵין חָצוֹר), 'spring of Hazor,' Jos 19^{37}. —A town of Naphtali, noticed between Kedesh, Edrei, and Iron. There were three Hazors in Upper Galilee, and the site is uncertain; but the most probable place for En-hazor seems to be *Hazîreh*, on the W. slopes of the mountains of Upper Galilee, W. of Kedesh. See *SWP* vol. i. sheet iii. C. R. CONDER.

ENJOIN.—To enjoin is first to 'join together' (Lat. *in-jungere*), as Mt 19^{6} Wyc. (1380), 'therefore a man departe nat that thing that God enjoyngde, or knytte to gidre.' But it early came to mean to 'impose' something on some one. Generally it is a duty or penalty; but in Job 36^{23} it is used in the rare sense of commanding or directing one's way, 'Who hath enjoyned him his way?' (פָּקַד). The later and mod. sense of 'command' is found in Est 9^{31}, He 9^{20} ('enjoined unto you'; RV 'commanded to you-ward'), and Philem ^{8} 'I might be much bold in Christ to enjoin thee.' J. HASTINGS.

ENLARGE, ENLARGEMENT.—To 'enlarge' is to 'cause to be large' that which is narrow or confined. It also signifies 'to make larger' that which may be considered large already, as Mt 23^{5} 'they make broad their phylacteries, and enlarge the borders of their garments' (μεγαλύνω); but the prefix *en-* (=Lat. *in*) has properly a strong causative force, as in 'enable,' 'enfeeble,' 'enrich.' Hence arises the meaning of 'set at large,' 'liberate,' as in Sidney, *Arcadia* (1622), 329, 'Like a Lionesse lately enlarged.' This is undoubtedly the meaning of **enlargement** in its only occurrence Est 4^{14} 'For if thou altogether holdest thy peace at this time, then shall there e. and deliverance arise to the Jews from another place' (רֶוַח, AVm 'respiration,' RV 'relief'). Cf. Act 32, Henry VIII. c. 2, § 9 (1540), 'After his enlargement and commyng out of prison.' And that 'enlarge' is used in this sense in AV is evident, as Ps 4^{1} 'thou hast enlarged me when I was in distress' (RV 'hast set me at large'); prob. also 2 S 22^{37}=Ps 18^{36} 'thou hast enlarged my steps under me.' So when applied to the heart, Ps 119^{32} (הִרְחִיב), Is 60^{5} (רָחַב), 2 Co 6^{11} (πλατύνω), the sense is first of all freedom, and then the joy that flows from it (cf. 2 Co 6^{13} πλατύνω, and 10^{15} μεγαλύνω), the opp. being 'to be straitened,' as in La 1^{20} (cf. Jer 4^{19} 'I am pained at my very heart,' lit., as RVm 'the walls of my heart!'), and 2 Co 6^{12}. J. HASTINGS.

EN-MISHPAT (עֵין מִשְׁפָּט), 'spring of judgment,' or 'decision' (by oracle), Gn 14^{7}.—A name for Kadesh—probably Kadesh-barnea. See KADESH.

ENNATAN (Ἐνναταν, AV **Eunatan**), 1 Es 8^{44} (^{43} LXX).—See ELNATHAN.

ENOCH (חֲנוֹךְ).—**1.** The eldest son of Cain (Gn 4$^{17.\,18}$). His father is said to have built a city and called it after his son's name. Its identity is quite uncertain (cf. Dillm. and Del. *ad loc.*, also Budde, *Urgesch.* 120 ff.). **2.** The son of Jared, and father of Methuselah, seventh in descent from Adam in the line of Seth. His life is described by the remarkable expression, 'Enoch walked with God' (Gn 5^{24}). Not less remarkable is the brief account given of his death. After 365 years 'he was not, for God took him.' This is understood by the writer to the Hebrews to mean, 'By faith Enoch was translated that he should not see death; and he was not found, because God translated him' (He 11^5). In Jewish tradition many fabulous legends gathered around Enoch. He was represented as the inventor of letters, arithmetic, and astronomy, and as the first author. A book containing his visions and prophecies was said to have been preserved by Noah in the ark, and handed down through successive generations. (See Ryle in *Expos. Times*, iii. (1892), 355, and *Early Narratives of Genesis*, p. 90 f.; and the next three articles.) R. M. BOYD.

ENOCH IN NT.—Enoch, the son of Jared (Gn $5^{18ff.}$), is mentioned in three passages of the NT; traditional exegesis has found an allusion to him in a fourth.

1. In Lk 3^{37} he has a place among the ancestors of our Lord.

2. In He 11^5 it is said that 'by faith Enoch was translated.' His faith is inferred (v.^{6}) from the LXX word *εὐηρέστησεν* (Gn $5^{22.\ 24}$; this verb is used in translating the Heb. 'to walk with [before]' in Genesis *ll.cc.* 6^9 17^1 24^{40} 48^{15}, Ps 114^9, Sir 44^{16}, cf. Ps 25^3 34^{14}). Nothing is added in He 11^5 to the record of Gen. *l.c.* (LXX), except the explanatory phrase *τοῦ μὴ ἰδεῖν θάνατον.* With this exposition in the Alexandrian Epistle to the Hebrews it is interesting to compare the allegorical interpretation of Philo *de Abr.* §§ 3, 4. The name Ἑνώχ is explained by him as meaning (*ὡς ἂν Ἕλληνες εἴποιεν*) *κεχαρισμένος* (*i.e.* חֲנוֹךְ is connected with חֵן). The *μετάθεσις* is explained as *πρὸς τὸ βέλτιον μεταβολή*; the *οὐχ ηὑρίσκετο* as signifying *either* that after repentance the old evil life is blotted out as though it had never been, *or* that the good man (*ὁ ἀστεῖος*) *ὑποχωρεῖ καὶ μόνωσιν ἀγαπᾷ.* Though in the original Hebrew of Sir 44^{16} Enoch is described as 'an example (*lit.* sign) of knowledge' (cf. *σύνεσιν αὐτοῦ*, Wis 4^{11}), yet in the Greek and Old Latin (Cod. Am. 'ut det gentibus pænitentiam'), as in Philo, he is represented as 'an example of repentance.' In Sir 49^{14} (*ἀνελήμφθη ἀπὸ τῆς γῆς*; cf. Cod. Am. in 44^{16} 'translatus est in paradiso') his translation is interpreted literally. Josephus (*Ant.* I. iii. 4) uses an ambiguous classical phrase, 'He went unto the Deity (*ἀνεχώρησεν πρὸς τὸ θεῖον*); hence neither is his death recorded.' For Jewish and Christian legends about Enoch, see the references in Schürer, *HJP* II. i. 342, II. iii. 70.

3. In Jude ^{14} the description *ἕβδομος ἀπὸ Ἀδάμ* is taken from the Book of Enoch (60^8 93^3), and a passage from that book ($1^{1.\ 9}$) is quoted as a warning actually uttered by the patriarch, dealing prophetically (*ἐπροφ. καὶ τούτοις*) with the false teachers of the apostolic age. The text of the passage in Enoch comes to us in three forms. (*a*) The Akhmîm fragment: *ὅτι ἔρχεται σὺν τοῖς [sic] μυριάσιν αὐτοῦ καὶ τοῖς ἁγίοις αὐτοῦ ποιῆσαι κρίσιν κατὰ πάντων, καὶ ἀπολέσει πάντας τοὺς ἀσεβεῖς καὶ ἐλέγξει* (MS *λένξει*) *πᾶσαν σάρκα περὶ πάντων ἔργων τῆς ἀσεβείας αὐτῶν ὧν ἠσέβησαν καὶ σκληρῶν ὧν ἐλάλησαν λόγων καὶ περὶ πάντων ὧν κατελάλησαν κατ' αὐτοῦ ἁμαρτωλοὶ ἀσεβεῖς.* (*b*) *Ad Novatianum* 16 (Hartel, *Cyprian*, iii. p. 67; Harnack, *Texte u. Untersuch.* xiii. 1, assigns the treatise to Sixtus II. of Rome, cf. Benson, *Cyprian*, p. 557 ff.): 'Sicut scriptum est: Ecce venit cum multis milibus nuntiorum suorum facere judicium de omnibus et perdere omnes impios et arguere omnem carnem de omnibus factis impiorum quæ fecerunt impie et de omnibus verbis impiis quæ de Deo locuti sunt peccatores.' (*c*) The Ethiopic version (ed. Charles, p. 59): 'And lo! He comes with ten thousands of (His) holy ones to execute judgment upon them, and He will destroy the ungodly, and will convict all flesh of all that the sinners and ungodly have wrought and ungodly committed against Him.' It is clear that Jude * quotes loosely and abbreviates, but it will be noticed that (1) in *ἰδού* Jude agrees with *Novat.* Eth. against Gr.; (2) in *ἐλέγξαι* he coincides with *Novat.* alone, as possibly (for the tense of *venit* is ambiguous) in *ἦλθε*. On the importance of the citation in *ad Novat.* and its independence of Jude (contrast Westcott, *Canon*, p. 374), see Harnack, *op. cit.* p. 57, and especially Zahn, *Gesch. des Neut. Kanons*, ii. p. 797 ff. It may be added that Jude's quotation from Enoch was regarded (*α*) by Tertullian, *De Cult. Fem.* i. 3, as upholding Enoch; (*β*) by some referred to by Jerome, *De Vir. Illust.* 4, as condemning Jude.

4. A very common Patristic opinion, found as early as Tert. *De Anima*, 50; Hippol. *De Antichr.* 43 (cf. Bonwetsch, *Texte u. Untersuch.* xvi. 2, p. 48), identified 'the two witnesses' of Rev 11 with Enoch and Elijah (see the references in *Speaker's Commentary*, p. 651). F. H. CHASE.

ENOCH, (ETHIOPIC) BOOK OF—

I. SHORT ACCOUNT OF THE BOOK.—In Gn 5^{24} it is said of Enoch that he walked with God. This expression was taken in later times to mean that he enjoyed superhuman privileges, by means of which he received special revelations as to the origin of evil, the relations of men and angels in the past, their future destinies, and particularly the ultimate triumph of righteousness. It was not unnatural, therefore, that an apocalyptic literature began to circulate under his name in the centuries when such literature became current. In the *Book of Enoch*, translated from the Ethiopic, we have large fragments of such a literature proceeding from a variety of Pharisaic writers in Palestine, and in the *Book of the Secrets of Enoch* (see next art.), translated from the Slavonic, we have additional portions of this literature. The latter book was written for the most part by Hellenistic Jews in Egypt.

The Ethiopic Book of Enoch was written in the second and first centuries B.C. It was well known to the writers of NT, and to some extent influenced alike their thought and diction. Thus it is quoted as a genuine work of Enoch by Jude ($^{14f.}$). Phrases, and at times entire clauses, belonging to it are reproduced in NT, but without acknowledgment of their source. Barnabas (*Ep.* iv. 3, xvi. 5) quotes it as Scripture. It was much used by the Jewish authors of the *Book of the Secrets of E.* and of the *Book of Jubilees*; in the *Testaments of the XII Patriarchs* its citations are treated as Scripture, and in the later apocalypses of Baruch and 4 Ezra there are many tokens of its influence. Thus during the 1st cent. of the Christian era it possessed, alike with Jew and Christian, the authority of a deuterocanonical book. In the 2nd cent. of our era it was rejected by the Jews, as were also many other Jewish Messianic writings that had been tr^d into Greek and well received in the Christian Church. But with the earlier Fathers and apologists of Christianity it preserved its high position till about the close of the 3rd cent. Henceforth it gradually fell into discredit, and finally was banned by the chief teachers of the Church. Thus the book ceased to circulate in all but the Church of Abyssinia, where it was rediscovered in 1773 by Bruce. This traveller brought home two MSS of this book, and from one of these Lawrence made the first modern translation of Enoch in 1821.

II. ORIGINAL LANGUAGE.—Apocalyptic scholars are now practically agreed that E. was derived from a Sem. original. The only question at issue now is: Was the original in Heb. or Aramaic? Halévy, in the *Journal Asiatique*, 1867, pp. 352–395, decides in favour of the former; and, so far as our present materials go, this view may be regarded as valid. Some Dutch and German scholars, it is true, think that it is possible to prove an Aram. original by means of the Aram. forms preserved in the Gizeh Greek fragment, *i.e.* φουκα in 18^{8}, μανδοβαρα in 28^{1}, and βαβδηρα in 29^{1}. The first is undoubtedly an Aram. form of פּוּק, and the two latter of מִדְבָּר. But it is over-hasty to conclude from the presence of these two Aramaisms upon an Aram. original; for exactly on the same grounds we should be obliged to conclude to an Aram. original of Neh 2^{14}, where the Aram. form Αἰνά is found in the LXX as a transliteration of עַיִן. In the Eth. VS also of Jos 5^{6}, 1 K 5^{25} [Eng. ^{11}], and Ezk 1^{14} there are transliterations of Heb. words in Aram. forms.

---

* In the text of Jude there are some important variants, the chief being these: (1) in v.^{14} ℵ cur.^{3} sah. arm. read *ἐν μυριάσιν ἁγίων ἀγγέλων* (cf. *Novat.*); (2) in v.^{15} ℵ sah. for *π. τοὺς ἀσεβεῖς* read *πᾶσαν ψυχήν*.

III. VERSIONS.—*Greek, Latin, and Ethiopic.*—The Heb. original was translated into Greek, and the Greek in turn into Ethiopic and Latin. Of the Gr. VS chs. 6–9^{4} 8^{4}–10^{14} 15–16^{1} have been preserved in the Chronography of George Syncellus (*c.* A.D. 800); 89^{42-49} in a Vatican MS published by Mai in the *Patrum Nova Bibliotheca*, vol. ii.; and 1–32 in the Gizeh MS discovered only a few years ago, and published in 1892. A critical edition of this last fragment by M. Lods appeared shortly afterwards, and in 1893 it was edited by the present writer with an exhaustive comparison of the Eth. and Gr. VSS of 1–32 as an appendix to his work on Enoch. This study led to the following conclusions:—'The Eth. VS preserves a more ancient and trustworthy form of text than the Gizeh Greek MS; it has fewer additions, fewer omissions, and fewer and less serious corruptions of the text' (Charles, *Book of Enoch*, p. 324). The other two Gr. fragments will be found in the same work.

The Lat. VS is wholly lost with the exception of two small fragments: of these the first is 1^{9}, and is found in the pseudo-Cyprian treatise, *Ad Novatianum* (see Zahn's *Gesch. des Neutest. Kanons*, ii. 797–801). The second, which embraces 106^{1-18}, was found by James in an 8th cent. MS in the British Museum, and published in his *Apocrypha Anecdota*, vol. i. A critical ed. of its text will be found in Charles, *Book of Enoch*, pp. 372–375. To these we might also add Tertullian's *De Cult. Fem.* i. 2, and *De Idol.* iv., which may point to a Latin text of 8^{1} and 99^{7}.

The Eth. VS alone preserves the entire text, and that in a most trustworthy condition. (*a*) *The Ethiopic MSS.*—There are twenty or more of these in the different libraries of Europe. Of these about half are in the British Museum alone, which happily also possesses the most valuable of all the MSS—that designated Orient. 485 in its catalogue of Eth. MSS. (*b*) *Editions of the Eth. Text.*—Only two edd. have appeared—that of Lawrence in 1838 from one MS, and that of Dillmann in 1851 from five MSS. Unhappily, these MSS were late and corrupt. The present writer hopes to issue later a text based on the incomparably better MSS now accessible to scholars. Such a text is actually presupposed in his translation and commentary of 1893. (*c*) *Translations and Commentaries.*—Translations accompanied by commentaries have been edited by Lawrence (1821), Hofmann (1833–1838), Dillmann (1853), Schodde (1882), and Charles (1893). Of Dillmann's and Schodde's translations the reader will find a short review in Charles (pp. 6–9). (*d*) *Critical Inquiries.*—Some account of these will be found in Schürer, *HJP* II. iii. 70–73, and in Charles, *Book of Enoch*, 9–21, 309–311.

Of the many scholars who have written on this book, the works of the following deserve special mention here:—Lücke, *Einleit. in d. Offenb. d. Johannes*², 1852; Ewald, *Abhandl. über d. äthiop. B. Henokh Entsteh., Sinn, und Zusammensetzung*, 1855; Köstlin, 'Ueber d. Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856, pp. 240–279, 370–386); Hilgenfeld, *Die Jüd. Apokalyptik*, 1857, pp. 91–184; Gebhardt, *Die 70 Hirten d. B. Henoch u. ihre Deutungen* (Merx' *Archiv*, 1872, vol. ii. Heft ii. pp. 163–246); Drummond, *Jewish Messiah*, 1887, 17–73; Lipsius in Smith and Wace's *Dict. Chr. Biogr.* 1880, ii. 124–128; Schürer, *HJP* II. iii. 54–73; Lawlor in *Journ. of Philology*, xxv. (1897) 164–225.

IV. THE DIFFERENT ELEMENTS IN THE BOOK, WITH THEIR RESPECTIVE CHARACTERISTICS AND DATES.—The Bk. of E. is a fragmentary survival of an entire literature that once circulated under his name. To this fact the plurality of books assigned to E. from the first may in some degree point; as, for instance, the expression 'books' in 104^{12}; *Test. XII Patriarch. Jud.* 18; Origen, *c. Celsum*, v. 54, *In Num. Homil.* xxviii. 2, and elsewhere. Of this literature five distinct fragments have been preserved in the five books into which the Bk. of E. is divided (*i.e.* 1–37. 37–71. 72–82. 83–90. 91–108). These books were originally separate treatises; in later times they were collected and edited, but were much mutilated in the course of redaction and incorporation into a single work. In addition to this E. literature, the final editor of the book made use of a lost Apocalypse, the Bk. of Noah, from which, as well as from other sources, he drew 6^{3}–8^{3} 9^{7} $10^{1-3.\,11}$ 17–20 $39^{1.\,2a}$ 41^{3-8} 43–44. 50. 54^{7}–55^{2} 56^{5}–57^{3a} 59–60. 65–69^{25} 71. 80–81. 105–107. This Bk. of Noah is mentioned in the Bk. of Jubilees 10^{13} 21^{10}. Another large fragment of the Bk. of Noah is to be found in the latter.

We have already remarked that in the five books into which the whole work is divided we have the writings of five different authors. Before we proceed to give some of the grounds for this statement, we shall give in merest outline the different constituents which the chief scholars on this subject have found in this work. Lücke in his *Einl. in die Offenb. d. Johannes* regards the book as consisting of two parts. The first part embraces 1–36. 72–105, written at the beg. of the Maccab. revolt, or, according to his later view, in the reign of John Hyrcanus; the second consists of the Similitudes, 36–71, and was written in the early days of Herod the Great. In the latter, however, there are some interpolations. Hofmann (J. Chr. K.) ascribes the entire work to a Christian author of the 2nd cent. In this view he was followed later by Weisse and Philippi. Hofmann deserves mention in this connexion on the ground of his having been the first to give the correct interpretation of the seventy shepherds in 89–90. Ewald (*Abhandl.* 1855) gives the following scheme:—Bk. I. 37–71, *c.* B.C. 144; Bk. II. 1–16. 81^{1-4} 84. 91–105, *c.* B.C. 135; Bk. III. 20–36. 72–90. 106–107, *c.* B.C. 128; 108 later. Bk. IV., the Bk. of Noah, 6^{3-8} 8^{1-3} 9^{7} $10^{1-3.\,11.\,22b}$ 17–19. 54^{7}–55^{2} $60^{1-10.\,24.\,25}$ 64–69^{16}, somewhat later than the preceding. Köstlin in his essay, 'Ueber d. Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856), a contribution of great worth, arrives at the following analysis:—The groundwork, 1–16. 21–34. 72–105, *c.* B.C. 110. The Similitudes, 37–71 and 17–19, before B.C. 64. Noachic fragments, 54^{7}–55^{2} 60. 65–69^{25}, possibly also 20. 82^{9-20} 106–107. 108 is an Essene addition. Hilgenfeld (*Jüd. Apok.* 1857) regards the groundwork, consisting of 1–16. 20–36. 72–105, as written before B.C. 98; and the remaining chapters as coming from the hand of a Christian Gnostic after the time of Saturninus. We should mention also the interesting studies of Tideman, *ThT.* 1875, pp. 261–296; Lipsius, art. 'Enoch' in Smith's *Dict. Chr. Biog.*; Schürer, *HJP* II. iii. 54–73; Drummond, *The Jewish Messiah*, 1877, pp. 17–23; and Schodde, *The Book of Enoch*, 1882. As Dillmann changed his mind three times, and in each instance for the better, it will be enough to give his final analysis. The groundwork, 1–36. 72–105, in the time of John Hyrcanus; the Similitudes and 17–19, before B.C. 64; the Noachic fragments, 6^{3-8} 8^{1-3} 9^{7} $10^{1.\,11}$ 20. $39^{1.\,2a}$ 54^{7}–55^{2} 60. 65–69^{25} 106–107. 108, from a later hand.

We shall now proceed to discuss this question directly, and try to carry the criticism of the book one stage further towards finality. Disregarding the interpolations from the Bk. of Noah already mentioned, as well as the closing chapter, we shall adduce a few of the grounds on which the compositeness of the rest of the book is determined.

First of all, critics are agreed in ascribing the Similitudes (37–71) to a different authorship from the rest. This is done on the following grounds:—(*a*) Certain names of God are found frequently in 37–71, but not elsewhere in the book. (*b*) The angelology differs. (*c*) The demonology differs. (*d*) The Messianic doctrine not only differs from that of the rest of the book, but is unique in apocalyptic literature.

As for the remaining chs. 1–36, 72–104, all critics but Ewald and Lipsius have regarded them as the work of one and the same author. But these scholars have differed much from each other on the determination of the different elements present in these chapters, and have failed to gain the suffrage of other scholars as to the justness of their views. In one respect they are undoubtedly right. These chapters are of a composite nature; the more closely they are examined, the more clearly they exhibit conflicting characteristics. When submitted to a searching criticism they fall naturally into four distinct parts, *i.e.* 1–36. 72–82, 83–90, 91–104, differing from each other in authorship, system of thought, and date.

For the grounds for these conclusions the reader must refer to Charles' *Book of Enoch*, pp. 55–56, 187–189, 220–221, 260–263. It will be sufficient here to give some of the reasons for differentiating 83–90 and 91–104, as an illustration of the method there pursued in the criticism of the earlier sections. (*a*) The Messianic kingdom in 91–104 is finite in duration, whereas in 83–90 it is eternal. (*b*) In the former the Messianic judgment takes place at the close of the Messianic kingdom, in the latter at its beginning. (*c*) In the former there is a resurrection of the righteous only, in the latter a resurrection of apostate Jews also. (*d*) In the former the building of the temple precedes the final judgment, in the latter it is subsequent to the final judgment. (*e*) In the former the scene of the Messianic kingdom is apparently heaven, in the latter a purified earth. Now, our conclusion as to the distinct authorship of these two sections on the grounds just given is strikingly confirmed when we observe the forcible dislocations that 91–104 have undergone at the hands of the final editor in order to adapt them to the chapters that precede. Former critics have remarked that 93 must originally have preceded 91^{12-17}, because we have in 93 an account of the first seven weeks of the ten into which the world's history is divided, and in 91^{12-17} the account of the remaining three weeks. They failed, however, to observe that 92^{1}, 'Written by Enoch the scribe, this complete doctrine of wisdom,' etc., formed originally the real beginning of this section. Next, on 92 follows 91^{1-10} as a natural sequel, where E. summons his children to receive his parting words. Then comes the short Apocalypse of ten weeks, 93^{1-10} 91^{12-17}, while $91^{18.\ 19}$ form a natural transition to 94. This section underwent these derangements in the process of its incorporation into a larger work.

As our space does not admit dealing further with the actual criticism of the book, we shall confine ourselves to the statement of results, and to a brief sketch of the various independent writings contained in the entire work, with their probable dates.

Part I., consisting of chs. 1–36 (for the Noachic interpolations see above), was written at latest B.C. 170, and mainly from the prophetic standpoint of such chs. as Is 65–66. This is, undoubtedly, the oldest part of the book, being anterior to 72–82. 83–90. 91–104, as it is used by the writers of these sections. As 83–90 was written not later than B.C. 161, 1–36 must be some years earlier; and as there is no allusion to the massacres of Antiochus Epiphanes, the above date (170) is the latest reasonable limit for its composition. This book, *i.e.* 1–36, is the oldest piece of Jewish literature that teaches the general resurrection of Israel, that describes Sheol according to the conception that prevails in NT as opposed to that of OT, and that represents Gehenna as a final place of punishment. The problem of the author is to justify the ways of God to men. The righteous will not always suffer (1^{1}). Sin is the cause of this suffering, and the sin of man is due, not to Adam, but to the lust of the angels—the watchers ($9^{6.\ 9.\ 10}$ 10^{8}). Hence the watchers, their companions, and their children will be destroyed ($10^{4-10.\ 12}$), and their destruction will form the prelude to the first world-judgment, of which the Deluge will form the completion (10^{1-3}). But sin still prevails after the Deluge, through the influence of the evil spirits that go forth from the slaughtered children of the watchers and the daughters of men (16^{1}). These act with impunity till the final judgment. In the meantime, character finds its recompense, in some measure, immediately after death (22). In the last judgment the watchers, the demons, and all classes of Isr., with one exception, will receive their final award (1^{9} 22^{13}). This judgment is preceded by a general resur. of Israel (22). The wicked are cast into Gehenna (27^{2}), the earth is cleansed from sin (10^{20-22}), the Mess. kingdom is established with Jerus. as its centre (25^{5}), and God abides with men (25^{3}). The Gentiles become righteous and worship God (10^{21}). The righteous eat of the tree of life (25^{4-6}), and thereby enjoy patriarchal lives (5^{9}). As to what befalls the righteous after the second death, there is no hint in this fragmentary section.

Part II., consisting of 83–90, was written between B.C. 166–161 by a Ḥasid in support of the Maccab. movement, and mainly from the same standpoint as Daniel. On a variety of grounds we are obliged to discriminate this section from the preceding. It will be enough to mention that, whereas there is a Messiah in the latter, there is none in the former; in the latter the life of the righteous is apparently unending, in the former it is finite; in the latter the scene of the kingdom is the New Jerus. set up by God Himself, in the former it is Jerus. and the entire earth unchanged though purified. Finally, the picture in 83–90 is developed and spiritual, while that in 1–36 is naïve, primitive, and sensuous.

The date assigned above is not difficult to fix. The Ḥasidim, symbolized by the lambs that are born to the white sheep (90^{6}), are already an organized party in the Maccab. revolt. The lambs that become horned are the Maccab. family, and the great horn who is still warring while the author of the section is writing, is Judas the Maccabee (90^{9}), who died B.C. 161. Chs. 83–90 recount two visions, 83–84 deal with the first world-judgment, 85–90 with the entire history of the world till the final judgment. In the second vision the interest centres mainly in the calamities that befall Isr. from the exile onwards. Why has Isr. become a byword among the nations, and the servant of one Gentile power after another? Is there no recompense for the righteous nation and the righteous individual? Isr. has indeed sinned, but the punishment immeasurably transcends the guilt. But these undue severities, according to the author, have not come upon Isr. from God's hand, but from the seventy shepherds into whose care God committed Isr. (89^{59}). These shepherds or angels have proved faithless to their trust, but not with impunity. An account has been taken of all their deeds and of all whom they have wickedly destroyed (89^{61-64}). Moreover, when the outlook is darkest, a righteous league will be established in Isr. (90^{6}), and from a family belonging to it will come forth the deliverer, *i.e.* Judas Maccabæus (90^{9-16}). Every effort of the Gentiles to destroy him will prove vain, and God's intervention personally will be the signal for their destruction (90^{19}). The wicked shepherds and fallen watchers will be cast into the abyss of fire (Tartarus), and the apostates into Gehenna (90^{20-25}). Then God Himself will set up the New Jerus. ($90^{28.\ 29}$), the dispersion will be brought back to Jerus., the righteous dead raised to take part in the kingdom, and the surviving Gentiles will be converted and serve Isr. (90^{30}). Finally, the Messiah will appear amongst them (90^{37}), and His kingdom will endure for ever. It should be observed that we have here the earliest appearance of the Messiah in non-canonical literature.

Part III., consisting of 91–104, was written between B.C. 134–95. The clearly defined opposition between the righteous and their Sadducean opponents which appears so frequently in this section cannot have been earlier than the breach between John Hyrcanus and the Pharisees, hence not earlier than B.C. 134, and not subsequent to B.C. 95; for it is not reasonable to suppose that the savage cruelties that won for Jannæus the title 'slayer of the pious' could have been referred to only once, and that incidentally, in the general terms of 103^{15}. On the derangements which this section has sustained at the hands of the final editor we have already touched above.

The internal difference that subsists between this section and Part II. is very remarkable. As we pass from 83–90 to 91–104 we feel we are entering into a world of new conceptions. In all previous apocalyptic writings the resur. and the final judgment have been the prelude to an everlasting Mess. kingdom, and not till then, in fact, do the righteous enter on their reward. But the Mess. kingdom to which this writer looks forward is only of temporary duration (91^{12-15}). In this kingdom no place is found for a Messiah; the righteous, with God's help, vindicate their just cause and destroy their oppressors. On the close of this kingdom follow the final judgment and the risen spiritual life of blessedness in a new heaven (91^{10} 92^{3}). From such a view of the future it is obvious that, for the writer, the centre of interest has passed from the material world to the spiritual, and the Mess. kingdom is no longer the goal of the hopes of the righteous. Their faith finds its satisfaction only in a blessed immortality in heaven itself. The righteous, it is true, who are living on the advent of the Mess. kingdom will indeed be recompensed with all good things, but the departed righteous will not rise thereto, but to the everlasting spiritual life which will follow the final judgment. This blessed immortality after the final judgment is an immortality of the soul only ($103^{3.\ 4}$), a view that is implied also in the later books, the Ps-Sol and the Book of Jubilees. As for the wicked, they shall descend into the Sheol of darkness and flame, and abide there everlastingly ($98^{3.\ 10}$ $104^{7.\ 8}$). In this section Sheol appears as hell, possibly for the first time in literature (103^{7}).

Part IV. The Similitudes, consisting of 37–70, were written between B.C. 94–79 or B.C. 70–64. With some of the characteristics which distinguish these chapters from the rest of the book we have already dealt above. We are here concerned mainly with the determination of the date. 'The kings and the mighty,' so often denounced in the Similitudes, are the *later* Maccab. princes and their Sadducean supporters; for the blood of the righteous was not shed, as the writer complains, before B.C. 95:—the later *Maccab.* princes and not the Herods; for the Sadducees were not allies of the latter, and Rome was not as yet known to the writer as one of the great world-powers. This last fact necessitates an earlier date than B.C. 64, when Rome interposed authoritatively in the affairs of Judæa. If the reader will turn to the list of Noachic interpolations he will find that many of them are to be found in this section. These have, as a rule, been drawn from an already existing Apoc. of Noah and adapted by their editor to their adjoining contexts in Enoch. This he does by borrowing characteristic terms, such as 'Lord of Spirits,' 'Head of Days,' 'Son of Man,' to which, either through ignorance or of set intention, he generally gives a new connotation.

In his attempt to solve the problem of the suffering of the righteous, this author has no interest save in the moral and spiritual worlds. His view, too, is strongly apocalyptic, and follows closely in the wake of Daniel. The origin of sin is traced one stage farther back than in 1–36. The first authors of sin were the Satans (40^{7}). The watchers fell through becoming subject to these, and leading mankind astray (54^{6}). Though the watchers were forthwith confined in a deep abyss, sin still flourishes in the world, and sinners deny the name of the Lord of spirits (38^{2}) and of His Anointed (48^{10}), and the kings and the mighty oppress the children of God (62^{11}). But suddenly there will appear the Head of Days, and with Him the Son of Man ($46^{2.3.4}$ 48^{2}), to execute judgment upon all alike. And to this end there will be a resur. of all Isr. (51^{1} 61^{5}), and all judgment will be committed to the Son of Man (41^{9}, 69^{27}), who will judge all according to their deeds (41^{1}). Sin and wrong-doing will be banished from the earth (49^{2}), and heaven and earth will be transformed ($45^{4.5}$), and the righteous will have their mansions therein (39^{6} 41^{2}). The Elect One will dwell amongst them (45^{4}); they will be clad in garments of life ($62^{15.16}$), and become angels in heaven (51^{4}), and continue to grow in knowledge and righteousness (58^{5}).

It will be observed that the Messianic doctrine in this section is unique, not only as regards the other sections of E., but also in Jewish literature as a whole. The Messiah pre-exists from the beginning (48^{2}); He sits on the throne of God (45^{3} 47^{3}), and possesses universal dominion (62^{6}), and all judgment is committed unto Him (69^{27}). If we turn to the other sections we find that in 1–36 and 91–104 there is no Messiah at all, while in 83–90 the Messiah is evidently human, and has no real rôle to play in the doctrine of the last things.

Before we pass to Part V. it will be advantageous to observe that the varying relations in which the Maccabees stood to the Hasid or Pharisaic party are faithfully reflected in the Books of E., *i.e.* Parts II., III., and IV. In Part II., *i.e.* 83–90, the Maccabees are the leaders of the righteous, and their efforts form the prelude to the Mess. kingdom. In Part III., *i.e.* 91–104, they are no longer at the head of the Ḥasids, but as yet they have not become their declared foes: they are the secret abettors of their Sadducean oppressors. But when we come to Part IV., *i.e.* the Similitudes, the Maccab. princes have ceased to disguise their enmity, and now take the lead in every act of oppression and murder practised on the Pharisees.

Part V. The Book of Celestial Physics consists of 72–78. 82. 79. Here, as in Part III., the order of the chapters has been changed by the final editor; 79, which forms the true conclusion of this work, has been placed immediately after 78, and two chapters, 80–81, which are quite alien in spirit and statement, have been interpolated.

The chronological system of this book, which is most perplexing, constitutes an attempt to establish an essentially Heb. calendar over-against the heathen calendars in vogue around. Though quite valueless in itself, it gives us some knowledge of the chronological systems that were known to Pal. Jews. Thus the writer is acquainted with the signs of the zodiac, the spring and autumn equinoxes, the summer and winter solstices, and the synodic months. He is familiar also with the Gr. eight-year cycle, and the seventy-six years' cycle of Calippus.

Part VI. The interpolations from the Book of Noah. These have been enumerated above. By means of these fragments, and of the large section of this lost book preserved in the Book of Jubilees, and of others still surviving in later Heb. literature, it would be possible to restore the Book of Noah in some of its main outlines.

V. INFLUENCE ON LATER LITERATURE.—The influence of E. on Jewish literature, to exclude for the moment the NT, is seen in the Bk. of Jubilees (written about the beginning of the Christian era), the Slavonic Enoch (A.D. 1–50), the Testaments of the XII Patriarchs, the Apocalypse of Baruch, and 4 Ezra. It is important to observe that, in the last two books just enumerated, E. is not mentioned by name, although their writers laid the Enochic books not infrequently under contribution. This silence, however, was intentional. E.'s acceptance among Christians as a Messianic prophet was the ground of his rejection among the Jews; and although, prior to A.D. 40, he was the chief figure, next to Daniel, in Jewish apocalyptic, in subsequent Jewish literature his functions and achievements are assigned to others, such as Moses, Ezra, Baruch. This opposition to E. is unswervingly pursued in the Talm., and his name and works are always studiously ignored (see Charles, *Apocalypse of Baruch*, pp. 21–22, 101). On these facts we might found an Enochic canon. *No early Jewish book which extols E. could have been written after* A.D. 50, *and the attribution of E.'s words and achievements in early Jewish works to some other OT hero is a sign that they were written subsequent to the Pauline preaching of Christianity.*

In Patristic literature Enoch is twice cited as Scripture in the Ep. of Barnabas (4^{3} 16^{5}). It is also quoted with approval, though not always by name, by Justin Martyr, Irenæus, Athenagoras, Tertullian, Clement Alex., Origen, Anatolius. Thenceforward it is mentioned with disapproval by Hilary, Chrysostom, Jerome, Augustine, and finally condemned in explicit terms in the *Const. Ap.* vi. 16.

Far surpassing in importance the preceding was its influence on NT (*a*) diction and (*b*) doctrine.

(*a*) We shall here draw attention only to the indubitable instances. It is quoted directly in Jude$^{14.15}$. Phrases, clauses, or thoughts derived from it are found also in Jude^{4}, Rev 2^{7} 3^{10} 4^{6} 6^{10} 9^{1} 14^{20} 20^{13}, Ro 8^{38} 9^{5}, Eph 1^{21}, He 11^{5}, Ac 3^{14}, Jn $5^{22.27}$, Lk 9^{35} 16^{9} 23^{35}, Mt 19^{28} 25^{41} 26^{24}.

(*b*) The doctrines in E. that had a share in moulding the corresponding NT doctrines, or formed a necessary link in the development of doctrine from OT to NT, are those concerning the Messianic kingdom and the Messiah, Sheol and the Resurrection, and demonology. As we cannot here enter into a discussion of these questions, we shall confine our remarks to the doctrine of the Messiah in Enoch. First, we should observe that four titles, applied, for the first time in literature, to the personal Messiah in the Similitudes, are afterwards reproduced in NT. These are 'Christ' (or 'the Anointed One'), 'the Righteous One,' 'the Elect One,' and 'the Son of Man.' The first title, found repeatedly in earlier writings, but always in reference to actual contemporary kings or priests, is now for the first time (48^{10} 52^{4}) applied to the Messianic king that is to come. It is here associated with supernatural attributes. In Ps-Sol, written a few years later, it is applied to a merely human Messiah. The second and third titles, 'the Righteous One,' 'the Elect One,' which are found first in E., have passed over into NT, the former occurring in Ac 3^{14} 7^{52} 22^{14}, the latter in Lk 9^{35} 23^{35}. The last title, 'the Son of Man,' appears for the first time in Jewish literature in E., and is historically the source of the NT designation. To the latter it contributes some of its most characteristic contents, particularly those relating to judgment and universal authority. Thus statements in E. respecting the Son of Man are quoted by the evangelists respecting the NT Son of Man. Jn $5^{22.27}$ 'He hath committed all judgment unto the Son . . . because he is the Son of Man,' is a quotation from Enoch 69^{27} 'The sum of judgment was committed unto him, the Son of Man.' It should be here observed that in E. the Messiah is represented for the first time as Judge of mankind. Again, Mt 19^{28} 'When the Son of Man shall sit on the throne of his glory' is from Enoch 62^{3} 'When they see the Son of Man sitting on the throne of his glory.' It is well known that the use of this phrase as a Mess. title is confined in NT, with two exceptions, to the Gospels, and in them it is used only by our Lord in speaking of Himself. Its survival, however, as a Mess. designation among the Jews, is attested by a passage in the Talm. Jer., *Taanith* ii. 1: 'Abbahu said: "If a man says to thee—I am God, he lies; I am the Son of Man—he will at last repent it: I ascend to heaven—if he said it, he will not prove it."' See further, ESCHAT. OF APOCR.

R. H. CHARLES.

ENOCH, BOOK OF THE SECRETS OF.—In Origen's *de Princip.* i. 3. 2 we find the following statement in reference to the Bk. of Enoch:—'Nam et in eo libello . . . quem Hermas conscripsit, ita refertur: Primo omnium crede, quia unus est Deus, qui . . . esse fecit omnia . . . sed et in Enoch libro his similia describuntur.' Now, as a matter of fact, this statement cannot be justified from the Ethiopic Enoch. Accordingly, till the discovery of the present book it was necessary to assume either that we had here a mistake of Origen, or else that he had before him a portion of the Enoch literature unknown to later generations. That the latter assumption was the true one we are now able to see; for in the 'The Book of the Secrets of Enoch' we have an elaborate account of the creation, 24–29^3, and an insistence on the unity of God, 33^8 36^1. Further, in the *Testaments of the XII Patriarchs* there are several direct references to the Bk. of Enoch. Some of them have clearly to do with the Ethiopic Enoch, but others have as clearly no connexion with it. Now, the bulk of the latter may be traced to the book with which we are at present dealing. This book, as it has been preserved only in Slavonic, it will be convenient to call 'the Slavonic Enoch' in contradistinction to the older book, which we may fitly designate 'the Ethiopic Enoch,' seeing that it has come down to us in its entirety only in that language.

This new fragment of the Enoch literature has only recently come to light through certain MSS which were found in Russia and Servia. Although the very knowledge that such a book ever existed was lost for probably 1200 years, it was nevertheless much used both by Christian and heretic in the early centuries. Thus citations appear from it, though without acknowledgment, in the Book of Adam and Eve, the Apocalypses of Moses and Paul (A.D. 400–500), the Sibylline Oracles, the Ascension of Isaiah, and the Ep. of Barnabas (A.D. 70–90). It is quoted by name in the apocalyptic portions of the *Testaments of the XII Patriarchs* (*c.* A.D. 1). It was referred to by Origen, and probably by Clement of Alexandria, and was used by Irenæus. Some phrases of NT may be derived from it.

The Slavonic MSS.—There are five Slav. MSS. The first (*i.e.* A) belongs to the 17th cent., and contains the complete text. It was edited by Popov in 1880, and forms the basis of the text which appears in the Morfill-Charles ed. of 1896. The second MS—a 16th cent. one—was discovered by Sokolov in 1886. This also preserves the complete text. The remaining three MSS are very incomplete. The most important of these (*i.e.* B) is preserved in the Public Library of Belgrade.

Editions and Translations.—The present writer, learning through a German review in 1892 of the existence of a Slav. VS of the Ethiopic Bk. of Enoch, at once proceeded by Mr. Morfill's help to make himself acquainted with two distinct recensions of this work. This speedily led to the discovery that it was not a Slav. VS of the Ethiopic Enoch, but of a hitherto unknown and extremely valuable pseudepigraph. By means of Mr. Morfill's tr. of the MSS A and B and of Sokolov's texts, an Eng. VS and ed. of this book was issued in the beginning of 1896. Six months later Bonwetsch's *Das Slav. Henochbuch* appeared, in which German tr^s. of the MSS A and B are given side by side, preceded by a short introduction, founded professedly in the main on Charles' edition. This is a serviceable work.

II. LANGUAGE AND PLACE OF WRITING.—The main part of this book was written at the first in Greek. This is clear from such statements as (1) 30^{13} 'And I gave him a name (*i.e.* Adam) from the four substances: the East, the West, the North, and the South.' Adam's name is thus derived from the initial letters of the Gr. names of the four quarters, *i.e.* ἀνατολή, δύσις, ἄρκτος, μεσημβρία. This fanciful derivation was first elaborated in Greek, as it is impossible in the Sem. languages; but the idea that Adam was created from dust belonging to the four quarters of the earth is Jewish. (2) The writer follows the chronology of the LXX. (3) In 50^4 he reproduces the LXX text of Dt 32^{35} against the Hebrew. (4) He constantly uses Sir, which was chiefly current in Egypt. But though the main part of the book was written originally in Greek, certain portions of it were based on Heb. originals. Such an hypothesis is necessary to account for the quotations from or references to it which appear in the *Testaments of the XII Patriarchs.* The fact that the latter work was written in Hebrew obliges us to conclude that its authors drew upon Heb. originals in their references to and quotations from the Slavonic Enoch.

The book was written in Egypt. This is deducible from the following facts:—(1) From the variety of speculations which it holds in common with Philo and other Hellenistic writers: thus souls were created before the foundation of the world, 23^5; cf. Philo, *de Somno*, i. 22; Wis 8$^{19.20}$. Again, man has seven natures, 30^9; cf. Philo, *de Mundi Op.* 40. (2) The whole Messianic teaching of OT finds not a single echo in the work of this Hellenized Israelite of Egypt, although he shows familiarity with most of its books. (3) The Phœnixes and Chalkydries of ch. 12 are natural products of the Egyp. imagination. (4) The syncretistic character of the creation narrative in 25–26 betrays Egyp. elements.

III. RELATION TO JEWISH AND CHRISTIAN LITERATURE.

Materials originally derived from this book are discoverable in Cedrenus and Joel (A.D. 1050–1200), though in these authors these materials are assigned to other names. Two passages of the Book of Adam and Eve in I. vi. and viii. are all but quotations from 29$^{4.5}$ and 31^2 of our book. Again, in the Apoc. of Moses (ed. Tisch. 1866), p. 19, we have a further development of 14$^{2\text{-}4}$ of our text, just as in the Apoc. of Paul, p. 64, *οὗτός ἐστιν ὁ παράδεισος, ἔνθα . . . δένδρον . . . ἐν ᾧ ἐπανεπαύετο τὸ πνεῦμα τὸ ἅγιον*, is a Christian adaptation of 8^3 'And in the midst (of Paradise is) the tree of life . . . on which God rests when he comes unto Paradise.' Again, the words, p. 64, *ἐκ τῆς ῥίζης αὐτοῦ ἐξήρχετο . . . ὕδωρ, μεριζόμενον εἰς τέσσαρα ὀρύγματα*, and p. 52, *ποταμοὶ τέσσαρες . . . ῥέοντες μέλι καὶ γάλα καὶ ἔλαιον καὶ οἶνον*, are verbal reproductions of 8^5 'From its root in the garden there go forth four streams which pour honey and milk, oil and wine, and are separated in four directions.' The passage in the anonymous *De Montibus Sina et Sion*, 4, is ultimately derived from 30^{13}, and Augustine's peculiar speculation on the eighth eternal day (*De Civ.* xxii. 30. 5) from 33^2.

Still earlier we find almost a verbal reproduction of 50^5–51^1 in the Sibylline Oracles, ii. 75. In Irenæus, *Contra Hær.* v. 28. 3, the Jewish speculation of 33$^{1\text{-}2}$ is reproduced, and possibly in Origen (see Lommatzsch, ed. xxi. 59). However this may be, there is no doubt as to the direct reference to 24–30. 33^8, in the *De Princip.* i. 3. 2, as we have already shown above. In a still earlier period, A.D. 50–100, the writer of the Ascension of Isaiah 8^{16} was most probably acquainted with 19^1, and the writer of the Apoc. Bar 59$^{5.8.10.11}$ with various passages of this book. In the Ep. of Barnabas 15$^{5\text{-}8}$, and probably in 18^1, the thought and diction are dependent on 32^2–33 and 30^{15}.

In NT the similarity of matter and language is sufficiently great to establish a close connexion, if not a literary dependence. With Mt 5^9 'Blessed are the peacemakers,' cf. 52^{11} 'Blessed is he who establishes peace'; with Mt 5$^{34.35.37}$ 'Swear not at all,' etc., cf. 49^1 'I will not swear by a single oath, neither by heaven, nor by earth, nor by any other creature which God made. . . . If there is no truth in man, let them swear by a word, yea, yea, or nay, nay.' Again, with Mt 7^{20} and 25^{34} cf. 42^{14} and 9^1; with Jn 14^2 cf. 61^2; with Eph 4^{25} cf. 42^{12}; with Rev 9^1 and 10$^{5\text{-}6}$ cf. 42^1 and 65^7.

Still earlier we find this book not only used, but quoted by name in the *Test. Dan.* 5, where the statement, *τῶν πνευμάτων τῆς πλάνης· ἀνέγνων γὰρ ἐν βίβλῳ* Ἐνὼχ *τοῦ δικαίου, ὅτι ὁ ἄρχων ὑμῶν ἐστὶν ὁ Σατανᾶς*, is drawn from 18^3 'These are the Grigori (*i.e.* Ἐγρήγοροι) who with their prince Satanail rejected the holy Lord.' Finally, the references to Enoch in *Test. Naph.* 4, *ἀνέγνων ἐν γραφῇ ἁγίᾳ* Ἐνώχ, *ὅτι καίγε καὶ ὑμεῖς ἀποστήσεσθε ἀπὸ* Κυρίου, *πορευόμενοι κατὰ πᾶσαν πονηρίαν ἐθνῶν, καὶ ποιήσετε κατὰ πᾶσαν ἀνομίαν Σοδόμων· καὶ ἐπάξει ὑμῖν* Κύριος *αἰχμαλωσίαν . . . ἕως ἂν ἀναλώσῃ* Κύριος *πάντας ὑμᾶς*, are an adaptation of 34$^{1\text{-}3}$ 'I know the wickedness of men . . . that they will cast off my yoke . . . and fill all the world with . . . sodomy and all other impure practices . . . and on this account I will bring a deluge upon the earth, and I will destroy all.' In the *Test. Sim.* 5, *Test. Benj.* 9, we find additional references to this prophecy, in which Enoch foretold the impure practices of men. *Test. Jud.* 18 may be derived from the same source.

IV. DATE AND AUTHORSHIP.—The question of the date has to a large extent been determined already. The portions which have a Heb. background are at latest pre-Christian. This follows from the fact of their quotation in the *Testaments of the XII Patriarchs.* Turning to the rest of the book, the *terminus a quo* is determined by the fact that it frequently uses Sir, cf. 43$^{2\text{-}3}$ 47^5 52^8 61$^{2.4}$ etc. The Ethiopic Enoch, further, is continually presupposed in the background. Its phraseology and conceptions are reproduced, $7^{4.\,5}$ $33^{4.\,9\text{-}10}$ 35^2 etc. At times its views are put forward in a developed form, $8^{1.\,5\text{-}6}$ 40^{13} 64^5; and occasionally divergent conceptions are enunciated, 16^7 18^4. Finally, explanations are claimed to have been given by this writer which, as a matter of fact, are not to be found in his writings, but in the Ethiopic Enoch, see $40^{5.\,6.\,8.\,9}$. It is possible that Wis was also used by our author, see 65^4. Since, therefore, Sir, Eth. Enoch, and Wis (?) were used by this author, his work cannot have been earlier than B.C. 30.

The *terminus ad quem* must be set down as earlier than 70 A.D. For (1) the temple is still standing. (2) This book was known and used by the writers of the Ep. of Barnabas and the Ascension of Isaiah, and probably by some of the writers of NT. We may therefore with reasonable certainty assign the composition of this book in Greek to the period A.D. 1–50, to an author who is thus a contemporary of Philo, and who holds many speculations in common with him.

The author was an orthodox Hellenistic Jew who lived in Egypt. He believed in the value of sacrifices, 42^6 $59^{1.\,2}$ 66^2 (but he is careful to enforce enlightened views with regard to them, $45^{3.\,4}$ $61^{4.\,5}$), in the law, $52^{8.\,9}$, and in a blessed immortality, 50^2 $65^{6.\,8\text{-}10}$, in which the righteous will wear 'the raiment of God's glory,' 22^8. In questions affecting the origin of the earth, sin, death, he allows himself the most unrestricted freedom, and borrows from every quarter. Thus Platonic 30^{16}, Egyptian 25^2, and Zend $58^{4\text{-}6}$ elements are incorporated in this system. The result is highly syncretistic.

V. Analysis of Contents.—The book opens with a short account of Enoch as 'a very wise man' whom 'God loved and received, so that he should see the heavenly abodes, the kingdoms of the wise, great, and never-changing God.' In ch. 1 two angels appear to E., and bid him to make ready to ascend with them unto heaven. In ch. 2 E. admonishes his sons 'not to worship vain gods; not to turn aside from God, but to walk before the face of the Lord and keep his judgments,' and directs them not to seek for him till he is brought back to them. Thereupon (3–6) the angels carry E. aloft through the air to the first heaven, where he sees a very great sea, greater than the earthly sea; likewise the elders and the rulers of the stars, and the treasuries of the snow and ice and the dread angels that guard them, and the treasuries of the clouds and of the dew and their guardian angels. Thence (7) he is carried to the second heaven, where he sees 'the prisoners suspended, reserved for, and awaiting the eternal judgment.' And these angels, who together with their prince had rebelled against God, besought E. (just as in Eth. Enoch 13^4) to intercede for them. And E. answered, 'Who am I, a mortal man, that I should pray for angels? Who knows whither I go, or what awaits me?' Next E. is carried up to the third heaven (8), and placed 'in the midst of a garden.' And he sees there 'all the trees of beautiful colours, and their fruits ripe and fragrant . . . and the tree of life . . . on which God rests when he comes into Paradise,' and the four streams which go forth from its root, 'pouring honey and milk, oil and wine. . . . And these go down to the Paradise of Eden, between corruptibility and incorruptibility. . . .' And the angels inform E. that 'this place is prepared as an eternal inheritance' for those 'who turn their eyes from unrighteousness and accomplish a righteous judgment, and give bread to the hungry, and clothe the naked, and raise the fallen, . . . and walk without blame before the face of the Lord.' E. is then taken to the northern region of this heaven (10), and shown 'a very terrible place' of 'savage darkness and impenetrable gloom,' with 'fire on all sides, and on all sides cold and ice.' He is then told that 'this place is prepared as an eternal inheritance' for those 'who commit evil deeds on earth, sodomy, witchcraft,' . . . who oppress the poor, who are guilty of 'stealing, lying, calumnies, envy, evil thoughts, fornication, murder,' who 'worship gods without life.' Thence E. is conducted to the fourth heaven, where he is shown the courses of the sun and moon (11), and the phœnixes and the chalkadri (12), 'with the feet and tails of lions and the heads of crocodiles; their appearance was of purple colour like the rainbow; their size nine hundred measures. Their wings were like those of angels, each with twelve, and they attend the chariot of the sun.' And the angels show him also the eastern and western gates of the sun (13–16), and 'an armed host serving the Lord with cymbals and organs' (17). In 18 E. is taken up to the fifth heaven, where he sees the watchers who had rebelled, and whose brethren were already confined in torment in the second heaven. Then he passes to the sixth heaven (19), where are the angels who regulate all the powers of nature and the courses of the stars, and write down the deeds of men. Finally, E. is raised to the seventh heaven (20–21), where he sees God sitting on His throne, and the heavenly hosts in their ten orders on the steps of the throne, and the seraphim singing the trisagion. And E. (22) fell down and worshipped; and Michael, at God's command, took from him his earthly robe and anointed him with the holy oil from the *arbor misericordiæ*, the olive tree that stood in the garden, and clothed him with the 'raiment of God's glory.' And thus E. became like one of the glorious ones. And E. (23), under the instruction of Vretil, wrote 366 books in thirty days and thirty nights about things in heaven and earth, and about the souls of men created from eternity, and their future dwelling-places. In 24–26 God makes known to E. how He created the invisible out of the visible: how He commanded Adoil (possibly a corruption of Uriel=light of God) and Arkhas to come forth and burst asunder, and so the light on high and the world below were produced. And God divided the light and the darkness (27), and made the seven heavens. And God caused the waters which are under the heavens to be gathered into one place, and out of the waters He made the earth and an abyss in its midst (28). Such was the work of the first day. And on the second day God 'fashioned for all the heavenly hosts a nature like that of fire' ($29^{1\text{-}3}$), and one of the archangels, Satanail, rebelled, and God cast him down from the heights ($29^{4.\,5}$). And on the third day God ($30^{1.\,2}$) caused the earth to produce trees and herbs and every seed that is sown, and planted Paradise. And on the fourth ($30^{3\text{-}6}$) God ordered great lights to be in the various circles of the heavens, *i.e.* Kruno, Aphrodite, Ares, the Sun, Zeus, Hermes, the Moon. And God appointed the sun and moon to give light to the earth, and to proceed through the twelve signs of the zodiac. And on the fifth ($30^{7\text{-}18}$) God created the fish of the sea and the fowl of heaven, and everything that moveth on the earth. And on the sixth He made man from seven substances, and called him Adam, from the four quarters of the world, and showed to him the two ways of light and darkness. And while Adam was in Paradise the heavens were open so that he could see the angels in heaven (31); but Satan envied him, and deceived Eve. And God established the eighth day ($33^{1.\,2}$), at the beginning of which time should be no more. And God announced Himself to E. as 'the eternal One, and the One not made with hands.' 'My wisdom is my counsellor, and my word is reality.' The corruption of the earth and the Deluge are then foretold, and the preservation of Noah, ch. 35. God bids E. to return to the earth for thirty days and teach his sons during that time (36–38). E. admonishes and instructs his sons, and tells them what he has seen, the courses of the sun and moon, the seasons, the winds, the thunder and lightning, Hades and hell and Paradise, and gives utterance to nine beatitudes (39–42). He impresses on them the incomparable dignity of goodness—'none is greater than he who fears God' (43). They are not to revile the person of man, for he who reviles man in reality reviles God: they are to make their offerings, and yet not to value them unduly, but consider the motive rather from which they spring (44–46). E. gives his books to his sons (47); instructs them not to swear, neither by heaven nor by earth nor by any other creature which God made (49); bids them in meekness to accomplish the number of their days, to refrain from avenging themselves, and to be open-handed to those in need (50–51). Again he enunciates seven beatitudes and their corresponding woes (52). The departed saints do not intercede for the living (53). At the close of the appointed time (55–59) E. again addresses his sons. He announces to them his coming departure to the highest heavens. He declares that no soul shall perish till the final judgment, and that the souls of beasts will then bring charges against the men who ill-treated them. He gives further instruction as to sacrifice, and their duty to the needy, and warns against unnatural sins, contempt and lying (60–63). The people assemble in Achuzan to take leave of E. He addresses them on various topics, and exhorts them to faithfulness. He announces the great judgment, after which 'the times shall perish, and there shall be no year, nor month, nor day, and there shall be no hours.' 'Moreover, there shall be no labour, nor sickness, nor sorrow, anxiety, nor need, nor night, nor darkness, but a great light.' He is then carried off to the highest heaven. And his sons thereupon build an altar in Achuzan and hold high festival, rejoicing and praising God (64–68).

VI. The Author's Views on Anthropology.—All the souls of men were created before the foundation of the world, 23^5, and also a future place of abode in heaven or hell for every individual soul, 49^2 58^5 61^2. Man's body was made of seven substances, 30^8, and his name, as we have already seen, was given to him by God from the four quarters. Man was created originally good; free will was bestowed upon him, with the knowledge of good and evil. He was instructed in the two ways of light and darkness, and then permitted to mould his own destiny, 30^{15}. But his connexion with the body biassed his preferences in the direction of evil, and death ensued as the wages of sin, 30^{16}. All men will be judged finally, $40^{12.\,13}$; the righteous will escape the last judgment, 65^8 66^7, and be gathered to eternal life; but hell will be the eternal abode of the wicked, $10^{4.\,6}$, and there is no place of repentance after death, 42^2.

VII. Value of the Book in elucidating contemporary and subsequent Thought.—Fresh evidence on the following beliefs is contributed by this book. i. *The millennium.*—This Jewish conception is first found in 32^2–33^2. From this its origin is clear. The account in Gn of the first week of creation came in pre-Christian times to be regarded, not only as a history of the past, but as a forecast of the future history of the world so created. Thus, as the world was created in six days, its history was to last 6000; for 1000 years with God are as one day (Ps 90^4, *Jub.* 4^{30}, 2 P 3^8); and as God rested on the seventh day, so at the close of 6000 years there should be a rest of 1000 years, *i.e.* the millennium. Thereupon followed the future world of eternal bliss, designated as the *eighth eternal day.* ii. *The seven heavens.*—The detailed account of the seven heavens in this book has served to explain difficulties in OT conceptions of the heavens, and has shown beyond the reach of controversy that the sevenfold division of the heavens was accepted by St. Paul and the author of Hebrews, and probably in Rev. From this book, further, it is clear that a feature impossible in modern conceptions of heaven shows itself from time to time in pre-Christian and also in early Christian conceptions, *i.e.* the belief in the presence of evil, or in the possibility of its appearance in the heavens. For a discussion of this question the reader should consult *Expository Times* (art. 'The Seven Heavens'), Nov. and Dec. 1895, and Charles, *The Book of the Secrets of Enoch*, pp. xxx–xlvii.

R. H. Charles.

ENOCH (City).—See Enoch 1 (p. 704^b).

ENOS (so RV in Lk 3^{38}), the same as **Enosh** (אֱנוֹשׁ), the name of the son of Seth (Gn 4^{26}). He was the father of Kenan; and the length of his life is stated as 905 years (Gn 5^9). It is said in connexion with the mention of his birth, 'then began men to call upon the name of J″' (4^{26}). 'Enosh' denotes 'man in his frailty and weakness.' The fact of prayer being made to J″ first when Enosh was born, perhaps indicates allegorically the belief that men were then first driven by sickness, and by a sense of frailty and dependence, to cry for help to the invisible Creator. The LXX, which translates the second clause of 4^{26} *οὗτος ἤλπισεν ἐπικαλεῖσθαι κ.τ.λ.*, associates Enosh himself with this step in the spiritual life of the human race (cf. parallels 4^{20} and 10^8). The advance thus made by the generation of Enosh the son of Seth is evidently intended to stand as the counterpart to the advance in another aspect of life represented by Enoch—the parallel generation in the line of Cain (4^{17}). It has been suggested that this mention of Enosh and of the first recourse to prayer to J″ must have been derived from a source of J tradition distinct from that which records the sacrifices of Cain and Abel, inasmuch as sacrifice would imply supplication to the Deity.

H. E. Ryle.

EN-RIMMON (עֵין רִמּוֹן 'spring of [the] pomegranate').—One of the settlements of Judahites after the return from the Exile, Neh 11^{29}. In Jos 15^{32} amongst the towns assigned to Judah we find 'Ain and Rimmon,' and in 19^7 (cf. 1 Ch 4^{32}) amongst those assigned to Simon are 'Ain, Rimmon.' In all these instances there can be little doubt that we ought to read neither עַיִן וְרִמּוֹן nor עַיִן רִמּוֹן, but עֵין רִמּוֹן (En-rimmon). This reading is accepted by Bennett and Kittel in *Joshua* and *Chronicles* in Haupt's *OT*. En-rimmon is probably to be identified with the modern *Umm-er-Rumâmîn*, about 9 miles N. of Beersheba.

Literature.—Lagardo, *Onom.* 120, 256; Robinson, *BRP* iii. 233; Van de Velde, *Memoir*, 344; *PEF Mem.* iii. 392, 398.

J. A. Selbie.

EN-ROGEL (עֵין רֹגֵל 'spring of the fuller'), a spring in the immediate vicinity of Jerus., on the boundary between Judah and Benjamin (Jos 15^7 18^{16}). Owing to its position close to but yet out of view of the city, Jonathan and Ahimaaz, the sons of the priests, were stationed there during the rebellion of Absalom, in order that they might secretly receive and carry news from Hushai in Jerus. to David in his camp by the Jordan (2 S 17^{17}). At a later period of history it was the scene of a great feast given by Adonijah, the eldest son of David, presumably with a view to forcibly seizing the crown (1 K 1^9 'by the stone of Zoheleth, which is beside E.'). Jos. (*Ant.* vii. xiv. 4) describes it as being 'without the city, in the royal gardens'; and again (*Ant.* ix. x. 4) speaks of a place called Eroge (clearly, as Mr. Grove has pointed out, a mistake for En-rogel), at which the earthquake consequent on the sacrilegious act of Uzziah dislodged a portion of the eastern hill, 'so as to obstruct the roads and the royal gardens.' Modern authorities are somewhat divided as to the exact site of the spring; but the bulk of the evidence is certainly in favour of the identification of E. with 'the Fountain of the Virgin.' This spring, now called *'Ain Umm ed-Deraj*='the spring of the steps,' lies in the Kidron valley, close to the village of Siloam, and is, in fact, the source from which the Upper Pool of Siloam derives its supply of water; the latter flows through a rock-hewn tunnel 'dating from the time of the Kings' (Sir C. Wilson). The latter authority further considers that originally this supply of water was carried as far as the Lower Pool (*Birket el-Hamra*), and that it was stored there for irrigating the king's gardens. The arguments brought forward in support of this identification are, briefly, as follows:—(1) The 'Fountain of the Virgin' is the only real spring near to Jerusalem. (2) Immediately fronting it, on the farther side of the valley, there is a rude flight of steps, cut out of the precipitous face of the cliff, which leads to the village of Siloam; this place is called at the present time *ez-Zehweleh*, and is identified by M. Clermont-Ganneau (*PEFSt*, 1869–70, p. 253) with the stone of Zoheleth. (3) The spring must have always been well known, and so would naturally form a landmark on the boundary-line between Judah and Benjamin. (4) In the account of St. James' martyrdom, he is said to have been cast from the temple wall into the valley of Kidron, and finally slain by a fuller with his stick. From this it has been inferred that St. James was cast down near the spot where the fullers were working. (5) This spring is still the great resort of the women of Jerus. for washing and treading their clothes.

Others, however, identify E. with *Bîr Eyûb*='the well of Job,' or 'the well of Nehemiah' (acc. to a later tradition). Three points are urged in favour of this view: (1) that in the Arab. VS of Jos 15^7 E. is translated by 'Ain Eyûb; (2) that in an early Jewish itinerary (Uri of Biel in Hottinger's *Cippi Hebraici*) it is called 'the well of Joab,' as if referring to Joab's connexion with Adonijah; and (3) that its situation agrees better with the common boundary of Judah and Benjamin. But these arguments are not sufficiently weighty to counterbalance the following objections: (1) The *Bîr Eyûb* is a well, not a spring, its waters, as a rule, being 70 to 80 ft. below the level of the ground. (2) Its situation does not suit the narrative of 2 S 17. Lying below the junction of the valleys of Kidron and Hinnom, it is at once too far from the city and from the direct road over the Mt. of Olives to the Jordan; and if *ez-Zehweleh* is the same as Zoheleth, it would also be too far from this latter spot. (3) Its date is uncertain; but it is hardly probable that it goes back to the time of Joshua.

Arch.* 42; W. R. Smith, *RS*^{2} 172, 489; *PEFSt*, 1874, 70; 1884, 185; 1885, 20, 184, 228; 1886, 56; 1889, 45 ff.; 1890, 125.
J. F. STENNING.

ENROLMENT.—See QUIRINIUS.

ENSAMPLE.—This is the tr. in AV of *τύπος*, 1 Co 10^{11}, Ph 3^{17}, 1 Th 1^{7}, 2 Th 3^{9}, 1 P 5^{3}; and of *ὑπόδειγμα*, 2 P 2^{6}; while 'example' is the tr. of *τύπος*, 1 Co 10^{6}, 1 Ti 4^{12}; of *ὑπόδειγμα*, Jn 13^{15}, He 4^{11} 8^{5}, Ja 5^{10}; of *δεῖγμα*, Jude ^{7}; of the vb. *παραδειγματίζω* ('make a publick example'), Mt 1^{19}; and of *ὑπογραμμός*, 1 P 2^{21}. Both forms have the same meaning, and in AV they are always synonymous with 'pattern' or 'model.' Thus in He 8^{5} *ὑπόδειγμα* is tr^{d} 'example,' and *τύπος* 'pattern,' after Tindale's 'ensample' and 'patrone,' though in both places Wyclif has 'saumpler,' Gen. (1560) 'paterne,' Rhem. 'exampler.' But the pattern may be either for imitation or avoidance. In mod. Eng. wherever 'ensample' is used, it has a biblical flavour, and suggests a *good* example. Hence RV retains 'ensample' in Ph 3^{17}, 1 Th 1^{7}, 2 Th 3^{9}, 1 P 5^{3}, but gives 'example' in 1 Co 10^{11}, 2 P 2^{6}.

'Ensample' seems to be an Eng. spelling. The Lat. *exemplum* appears in old Fr. as *essample*; this becomes in Eng. 'asaumple,' of which *Oxf. Eng. Dict.* quotes a single instance (but it may be noticed that Wyc. has the *u* always, 'ensaumple'). Then 'asaumple' becomes 'ensample.' Skeat quotes an old Fr. tr. of Ru 4^{11} 'que ele soit ensample de vertu,' evidently after Vulg. 'ut sit exemplum virtutis' (cf. Cov. 'that she maye be an ensample of vertue'). But *Oxf. Eng. Dict.* rejects this French spelling, and reckons 'ensample' only English. The earliest instance of 'example' that has been found is dated 1447 (though there is a various reading 'exsaumple' in the Wyclifite version of 1382 at Jude ^{7}), while 'ensample' is found as early as 1250. And 'ensample' is most common by far till it began to be fashionable to spell Eng. words after their Lat. originals. Tindale has 'ensample' (though he spells it thrice 'insample') in all the passages given above; and he is followed by all the Eng. VSS till the Rhemish.
J. HASTINGS.

EN-SHEMESH (עֵין שֶׁמֶשׁ), 'sun-spring,' Jos 15^{7} 18^{17}.—A spring E. of En-rogel, on the way to Jericho. It is believed to be the spring on the Jericho road, E. of Olivet, generally known as the 'apostles' fountain' (*'Ain Hōd*). See *SWP* vol. iii. sheet xvii.; also Tristram, *Land of Israel*, 196; *PEFSt*, 1874, 70; and Dillmann on Jos 15^{7}.
C. R. CONDER.

ENSIGN.—See BANNER.

ENSUE.—Coverdale's tr. of Ps 34^{14} is 'Let him seke peace and ensue it'; and this was retained in the Bishops' Bible, and is now read in the Pr. Bk. But AV adopted the Douay word 'pursue.' In 1 P 3^{11}, however, which is a quot. of Ps 34^{14}, AV accepted 'ensue,' which had come from Tindale, the Rhemish having here 'follow.' 'Ensue' is thus used with the unusual force of 'strive after' or 'pursue' (Gr. *διωξάτω*), as Caxton, *Cato*, 2*b*, 'Eschewe alle vyces and ensiewe vertue.' RV gives 'pursue.' As intrans. vb. 'ensue' is found in Jth 9^{5} 'the things . . . which ensued after' (so RV; Gr. *τὰ μετέπειτα*). We still use the word in dates, as 'the ensuing year.' J. HASTINGS.

EN-TAPPUAH (עֵין־תַּפּוּחַ 'the spring of citron or apple').—A place on the boundary of Manasseh (Jos 17^{7}). It is mentioned between 'Michmethath, which is before (east of) Shechem,' and the 'brook of Ḳanah.' Michmethath is generally (but see Dillm. *ad loc.*) identified with *Mukhna*, E. of *Nâblus*, and the brook Ḳanah is *Wâdy Ḳânah*. Conder's identification of En-tappuah with a spring, near *Yâsûf*, in a valley to the S. of Mukhna, which drains into Wâdy Ḳânah, is accepted by most authorities. The place is probably the Tappuah (which see) of Jos 16^{8} 17^{8}. C. W. WILSON.

ENTREAT.—See INTREAT.

ENVY is a feeling of uneasiness or displeasure occasioned by beholding the prosperity or advantages enjoyed by others. Butler, in a note to the first of his *Sermons on Human Nature*, indicates it as the vice of that quality of soul of which Emulation is the corresponding virtue. The latter is that 'desire and hope of equality with, or superiority over, others, with whom we compare ourselves,' which not only may be free from any unworthy feeling towards them, but is obviously the very spring of human progress. The characteristic of Envy, on the other hand, is 'to desire the attainment of this equality or superiority by the particular means of others being brought down to our own level or below it.'

The scriptural use of the term is quite in accordance with this description of it, and of its relation to the emotion of which it is a perversion. Of the three words, one in OT and two in NT, of which it appears as a translation, only one, *φθόνος* (with its cognate verb *φθονέω*), has uniformly the evil signification. The difficult verse Ja 4^{5} 'Do you think that the Scripture saith in vain, The spirit that dwelleth in us lusteth to envy?' is scarcely an exception. If, as seems probable, having regard to the context, the rendering of the second clause given in RVm is correct—'That spirit which he made to dwell in us yearneth for us even unto jealous envy'—the phrase must be held as merely illustrating the intensity of the divine affection, which requires the exclusive devotion of its object, by a reference to the human passion of jealousy or envy. (See *Expos. Times*, viii. [1896] p. 76 f.)

The other two words, of which mention has been made, are קָנָא (noun קִנְאָה) in OT, and *ζῆλος* (verb *ζηλόω*) in NT; and of each of these words both meanings, the worthy and the unworthy, often appear. קָנָא, the original force of which is, apparently, *burning*, *glowing*, naturally denotes, in the first instance, intense emotion. It is used to express the indignation of Joshua (Nu 11^{29}), the zeal of Phinehas (Nu 25^{13}), and the jealousy of Elijah (1 K $19^{10.\,14}$), as well as the envy of Rachel for her sister (Gn 30^{1}), of his brethren for Joseph (Gn 37^{11}), of the people for Moses (Ps 106^{16}), or the mutual envy of Judah and Ephraim (Is 11^{13}). In the Book of Proverbs the evil sense alone appears. Contrasted with 'a sound heart,' which is 'the life of the flesh,' Envy is 'the rottenness of the bones' (Pr 14^{30}); it is more formidable than wrath or anger, for 'who is able to stand before envy?'

The corresponding NT term is *ζῆλος*, in which the same variation of sense is found. In 1 Co 14^{1} (RV) we read 'Desire earnestly spiritual gifts'; in Gal 4^{18} 'it is good to be zealously affected (RV 'sought') always in a good thing'; and in Rev 3^{19} the command 'Be zealous' is coupled with an admonition to repent. In like manner the 'zeal' of Jn 2^{17}, Ro 10^{2}, 2 Co 7^{11} 9^{2}, Ph 3^{6}, Col 4^{13}, the 'fervent mind' of 2 Co 7^{7}, and the 'jealousy' of 2 Co 11^{2}, illustrate the commendable aspect of the emotion indicated. In lists of vices, on the other hand, such as those in Ro 1^{29}, 1 Ti 6^{4}, envy has a conspicuous place. Trench, in *New Testament Synonyms*, points out that in the list given in Mk $7^{21.\,22}$ the place of *φθόνος* is taken by the circumlocution *ὀφθαλμὸς πονηρός*, 'an evil eye' (compare Mt 20^{15}, also 1 S 18^{9} 'Saul *eyed* David'), which reminds us of the derivation of the Lat. *invidia*, Eng. 'envy,' from *invideo* 'to look closely at,' so 'to look maliciously.'

It may be noted that in the following passages, Job 5^{2}, Pr 27^{4}, Ac 7^{9} 13^{45} 17^{5}, Ro 13^{13}, 1 Co 3^{3}, 2 Co

12^{20}, Ja $3^{14.16}$ RV substitutes ‘jealousy,’ or its cognates, for ‘envy.’

For the difference between ζῆλος and φθόνος see Trench, *Synon. of NT*, p. 83 ff., and art. ZEAL.

A. STEWART.

EPAENETUS (Ἐπαίνετος).—One of the Christians greeted by St. Paul at the end of the Ep. to the Romans (16^{5}). He is mentioned at the beginning of the list immediately after Prisca and Aquila, is described as ‘my beloved’ (τὸν ἀγαπητόν μου), and as the ‘first fruits (ἀπαρχή) of Asia unto Christ’ (the reading Achaia of TR is clearly wrong, being derived from 1 Co 16^{15}). The name, which is Greek, is not uncommon, occurring in inscriptions both of Rome and Asia. One from the former place mentions an E. who was a native of Ephesus (*CIL* vi. 17171).

The mention of Prisca, Aquila, and E. forms the basis of the theory that Ro 16^{3-16} was addressed to the Church at Ephesus; but three names—two of them belonging to persons originally resident at Rome—out of a total of more than twenty, are not sufficient evidence for it. It was natural that the Christian body in the capital should consist largely at first of foreigners; and even one hundred years later, in the time of Justin Martyr, out of a body of seven Christians condemned to death in Rome, three are foreigners (*Acta Justini*, § 4).

LITERATURE.—Renan, *St. Paul*, p. lxv; Lightfoot, *Biblical Essays*, p. 301; Sanday and Headlam, *Romans*, p. 421.

A. C. HEADLAM.

EPAPHRAS (Ἐπαφρᾶς, a shortened form of Ἐπαφρόδιτος; see EPAPHRODITUS) was a native of Colossæ (ὁ ἐξ ὑμῶν Col 4^{12}), and as we learn from the correct reading of Col 1^{7} the founder of the Col. Church (καθὼς ἐμάθετε ἀπὸ Ἐπαφρᾶ, ‘even as ye learned of Epaphras,’ where the omission of καί (also) of TR makes Epaphras more than an accessory teacher). It is prob. that he was also the evangelist of the neighbouring towns of Laodicea and Hierapolis (Col $4^{12.13}$). He visited St. Paul during his first Rom. imprisonment, bringing him an encouraging report of the state of the Colossian Church (Col 1^{4-8}), and for his zeal would seem to have been condemned to share the apostle's imprisonment (ὁ συναιχμάλωτός μου Philem ^{23}), though the reference may be to spiritual rather than physical captivity (cf. Ro 16^{7}, Col 4^{10}). To him alone (except once Timothy, Ph 1^{1}) does St. Paul apply the designation he uses several times of himself, ‘a bond-servant of Jesus Christ’ (δοῦλος Χριστοῦ Ἰησοῦ Col 4^{12}); while the extent of his services is further proved by the description ‘a faithful minister of Christ’ (πιστὸς διάκονος τοῦ Χριστοῦ, Col 1^{7}).

G. MILLIGAN.

EPAPHRODITUS (Ἐπαφρόδιτος ‘handsome’ = Lat. ‘venustus,’ a common name in the Rom. period; see, *e.g.* Tacit. *Ann.* xv. 55; Suet. *Domit.* 14; Jos. *Life*, § 76), to be distinguished from Epaphras [which see], and known to us only from one or two allusions in the Ep. to the Philippians. From these we learn that he visited St. Paul during his first Roman imprisonment, bringing pecuniary aid to him from the Church at Philippi, and that instead of at once returning home he remained with the apostle in Rome, devoting himself to the ministry under his guidance (Ph 2^{25-30} 4^{10-18}). The strain, however, was too great for him. He lost his health, and ‘was sick nigh unto death’; but the danger passed. ‘God had mercy on him,’ says St. Paul, ‘and not on him only, but on me also, that I might not have sorrow upon sorrow’ (Ph 2^{27}). On his recovery E. was anxious to return to Philippi to quiet his friends' alarm on his behalf (Ph 2^{26}); and this St. Paul approved, making him at the same time the bearer of the Ep. to the Philippians. St. Paul's sense of E.'s services is marked by his description of him as ‘my brother and fellow-worker and fellow-soldier,’ the three words being arranged in an ascending scale to denote ‘common sympathy, common work, common danger and toil and suffering’ (Lightfoot on Ph 2^{25}).

LITERATURE.—The *Comm.* on Ph 2^{25}, esp. Lightfoot, p. 61 ff., 122; Ellicott, p. 60; Moule, p. 79; and Vincent, pp. xxiii, 75. Also Thayer, *NT Lex. s.* Ἐπαφρᾶς; Winer, *RWB*, *s.* ‘Epaphras’; and Beet in *Expositor*, 3rd Ser. ix. (1889) 64–75, ‘Epaphroditus and the gift from Philippi.’

G. MILLIGAN.

EPHAH (עֵיפָה).—**1.** A son of Midian, descended from Abraham and Keturah (Gn 25^{4}=1 Ch 1^{33}), the eponymous ancestor of an Arabian tribe whose identity is uncertain. This tribe appears in Is 60^{6} as engaged in the transport of gold and frankincense from Sheba. According to Frd. Delitzsch (*Paradies*, 304), and Schrader (*KAT*² 146 f., 613), followed by Hommel (*Anc. Heb. Trad.* 238 n.), ‘*Ephah* is properly ‘*Ayappa*, the Khayappa Arabs of the time of Tiglath-pileser III. and Sargon (see further, Dillmann on Gn 25^{4}). **2.** A concubine of Caleb, 1 Ch 2^{46}. **3.** A Judahite, son of Jahdai, 1 Ch 2^{47}. See GENEALOGY.

J. A. SELBIE.

EPHAH.—See WEIGHTS AND MEASURES.

EPHAI, עֵיפַי (*Ḳerê*), but **Ophai**, עוֹפַי (*Kethîbh*), Sept. Ἰωφέ, Ὠφή, described in Jer 40 (Gr. $47)^{8}$ as ‘the Netophatite,’ whose sons were amongst the ‘captains of the forces’ who joined Gedaliah at Mizpah, and were murdered along with him by Ishmael (Jer 41^{3}).

J. A. SELBIE.

EPHER (עֵפֶר ‘a [deer] calf’).—**1.** The name of the second of the sons of Midian mentioned in Gn 25^{4}, 1 Ch 1^{33}, and recorded as one of the descendants of Abraham by his wife Keturah (Gn 25^{1}). For precarious attempts to identify this Epher with ‘Ofr in Arabia (Wetzstein), with Appar-u mentioned in Assurbanipal's Inscriptions (Glaser), see the references in Dillmann. **2.** The name of one of the sons of Ezrah, a branch of the family of Judah (1 Ch 4^{17}). **3.** The first of a group of five heads of fathers' houses belonging to the half tribe of Manasseh, who dwelt in the land between Bashan and Mt. Hermon (1 Ch 5^{24}).

H. E. RYLE.

EPHES-DAMMIM (אֶפֶס דַּמִּים, Ἐφερμέν, Ἀφεσδομμείν).—The place in Judah where the Philistines were encamped at the time when David slew Goliath (1 S 17^{1}). The same name appears in 1 Ch 11^{13} as Pas-Dammim. The form אֶפֶס דַּמִּים is strange and probably corrupt (see Driver, *Sam.* 292).

W. J. BEECHER.

EPHESIAN (Ἐφέσιος), an inhabitant of the city of Ephesus (which see), is a term used in Ac $19^{28.34.35}$ 21^{29}. The usage of St. Luke is more correct than that of Stephanus Byzant.; the latter gives Ἐφεσεύς as the ethnic; but the coins and inscriptions show that in the local and universal usage Ἐφέσιος meant an inhabitant of the city, while Ἐφεσεύς denoted a member of the tribe Ἐφεσεῖς, the first of the six tribes into which the E. population was divided (the other five were called Σεβαστή, Τήϊοι, Καρηναῖοι, Εὐώνυμοι, Βεμβιναῖοι, of which Σεβαστή was added in compliment to Augustus, the total number having previously been five). The term Ἐφέσιοι is also applied in the Bezan and Philoxenian Syr. texts of Ac 20^{4} to Tychicus and Trophimus, where the true reading is ‘Asians’ (Ἀσιανοί, men of the province Asia). Trophimus was an E. (Ac 21^{29}); but we may fairly understand that St. Luke refrained from using that term about both Tychicus and Trophimus, on the ground that it was not strictly applicable to the former. The reason can hardly be that Tychicus belonged to some other city of Asia, for the usage in this verse leads the writer to state the city where each delegate was a citizen; and we should expect that he would have mentioned Tychicus by the ethnic of his own city. Moreover, Tychicus probably inhabited Ephesus.* We may, then, perhaps conclude that Tychicus, though a resident (*incola*), did not possess the citizenship of Ephesus; and hence Ἐφέσιος, which strictly is restricted to citizens of Ephesus, could not properly be used about him. There were many families of residents who, for various reasons, were not enrolled in any of the tribes, and were therefore not entitled to be called citizens of Ephesus. The entry Ἀσία ἡ Ἔφεσος in a late Byzantine list of cities which had changed their names (published by Parthey, *Hieroclis Synecd. et Notitiæ*, p. 316; Burckhardt, *Hieroclis Synecd.* p. 68) cannot be relied on to justify the taking of Ἀσιανός in 20^{4} as a mere synonym for Ἐφέσιος: the document is not earlier than the 12th cent. (cf. the entries Κιλικία, Κολωνία, etc.), and affords no trustworthy evidence for the usage of the time of St. Luke. W. M. Ramsay.

EPHESIANS, EPISTLE TO—

- i. Substance and purpose, as gathered
  - (*a*) From internal evidence.
  - (*b*) From a comparison with Colossians.
- ii. Authorship and Date, as gathered from
  - (*a*) Internal evidence.
  - (*b*) External tradition.
- iii. Destination.
- iv. Place of Composition.
- v. Doctrinal Importance.
- vi. Literature.

i. Substance and Purpose.—The questions of the authorship, date, and destination of this Epistle have been, and are still, so much disputed that it will be well to deal first with the subject-matter and the purpose which reveals itself on a close examination of that. The Ep. might be summed up in the words of the Angelic song (Lk 2^{14})—

> *δόξα ἐν ὑψίστοις Θεῷ καὶ ἐπὶ γῆς·*
> *εἰρήνη ἐν ἀνθρώποις εὐδοκίας.*

Or, again, it might be described as an expression of thanksgiving that the Lord's prayer for His Church as embodied in Jn 17 was in process of fulfilment. For the writer's tone is eucharistic and his main theme is unity: he does not argue, he makes dogmatic statements; he blesses God for the great truths revealed in the Gospel; and calls upon his readers to rise to the high dignity of their calling; and, as he does so, there emerges a picture of the Church as the body predestined before the ages to unite Jew and Gentile together, which through ages yet to come has to exhibit before the universe the fulness of the Divine life, living the life of God, imitating God's character, wearing God's panoply, fighting God's battles, forgiving as God forgives, educating as God educates; and all this that it may fulfil the wider work whereby Christ is to be the centre of the universe. Two dangers seem to threaten it when the writer writes,—the danger lest it should slip back into the lower moral standard of the surrounding heathendom, and the danger of a want of unity between the Jewish and Gentile Christians. To meet these, the writer presents the ideal of a body predestined before all ages and to last to all ages, whose aim it is to make men holy and without blemish, and to unite all mankind in peace and love.

A fuller analysis will bear out these outlines.

1–3 Doctrinal.

$1^{1.2}$ greeting.

(*a*) $1^{3\text{-}14}$. Thanksgiving to God for the blessings given to the whole Chr. Church. These blessings are represented as corresponding in spiritual form to the material blessings granted to the Jewish nation, especially as summed up in the year of Jubilee, and they are described in what may be called a hymn of three stanzas, ending with the same refrain; the three stanzas expressing the work of Father, Son, and Holy Spirit. For these blessings were (1) predestined by the Father, who chose us to be sons, holy and without blemish, before the foundation of the world, *for the praise of the glory of His grace* ($1^{4.5}$).

(2) Communicated in Christ at the right moment, conveying redemption, forgiveness, knowledge of God's universal purpose for all creation, and inheritance among the saints—*to the praise of His glory* ($1^{6\text{-}11}$).

(3) Sealed first to the Jews (ἡμᾶς), then to the Gentiles (καὶ ὑμεῖς), by the Holy Spirit, as an earnest of the complete redemption which lies in the future—*for the praise of His glory* ($1^{12.13}$).

(*b*) $1^{15\text{-}19}$. Thanksgiving to God for the spiritual state of the readers, and a prayer to the Father of this glory that they may have a yet fuller knowledge of their privileges and of the power of God.

(*c*) 1^{20}–2^{22}. A dogmatic statement of this power of God, which has shown itself in a threefold way.

(1) As exerted upon Christ Himself, granting Him
  Resurrection from death (^{20}).
  Ascension to God's right hand (^{21}).
  Supremacy over the whole universe and Headship over the Church (${}^{22.23}$).

(2) As exerted upon individuals, whether Gentile ($2^{1.2}$) or Jew (2^{3}), granting them a similar threefold gift, viz. Resurrection from spiritual death (2^{4}).
  Ascension with Christ to a spiritual sphere above the world (2^{5}).
  The power to do good works and manifest God's grace through the coming ages ($2^{6\text{-}10}$).

(3) As exerted upon the whole of Humanity.

The Gentiles who formerly were alienated from God have been brought nigh by the Cross; so that both Gentile and Jew have peace with God and peace with each other: they form one city, one family, one temple, built on the foundation of apostles and prophets, and the Gentiles are now being built into that ($2^{11\text{-}22}$).

(*d*) $3^{1\text{-}19}$. Personal relations between the writer and his readers.

The writer, who emphasizes his authority to preach this great truth of God's choice of a universal Church intended to exhibit his richly-variegated wisdom to the universe ($3^{1\text{-}12}$), begs his readers not to be faint-hearted owing to his imprisonment (3^{13}), and once more prays for them to the Father, that they may have spiritual strength so that Christ may dwell in them in love and knowledge to understand the greatness of their privileges, so that the fulness of the Divine life may be exhibited through them ($3^{14\text{-}19}$).

(*e*) $3^{20.21}$. This section of the Ep. ends with a doxology, emphasizing the power of God manifested in man, and the eternal duty of praise to Him both in heaven and on earth.

4–6 Hortatory.

A. An appeal to the whole Church

(1) To live a life worthy of the members of a Society whose essential characteristic is unity ($4^{1\text{-}16}$). (This is based on $1^{12.13}$ $2^{11\text{-}22}$; cf. also 4^{25}–5^{2}.)

An appeal for the moral qualities which preserve unity ($4^{1\text{-}3}$)

is followed by a fuller description of the unity, as one of both form and spirit, and resting upon the unity of God ($4^{4\text{-}6}$);

and a recognition of the variety of gifts, especially the ministry, given to the Church by the Risen Christ, the Lord of the whole universe, in order to produce unity and spiritual perfection and steadfastness in truth; so that the body may ever grow into closer union with its Head ($4^{7\text{-}16}$).

(2) To live a life different from the old evil Gentile life ($4^{17\text{-}24}$). (This is based on $1^{7\text{-}9}$ $2^{1\text{-}10}$, cf. $5^{3\text{-}21}$.)

A description of the old Gentile life as one of aimlessness, ignorance, impurity ($4^{17\text{-}19}$) is contrasted with

A description of the Christian life as implying renewal of intellect, righteousness, and holiness in conformity with God's standard ($4^{20\text{-}24}$).

(3) To cultivate certain particular virtues and avoid particular vices (4^{25}–5^{21}). The choice of these rises out of the two preceding paragraphs; they are either such virtues as make for unity and such vices as destroy it (so mainly 4^{25}–5^{2}, cf. the motives appealed to in ${}^{25.27.28.29.32}$), *or* such virtues as form the antithesis to the old Gentile life, either on the side of morality or of knowledge (so mainly $5^{3\text{-}22}$; cf. the motives in 4^{30} 5^{3} καθὼς πρέπει ἁγίοις, ${}^{5.6.15.16.18}$).

These virtues are—1. Truthfulness: based upon our close union with each other (4^{25}).

2. A right use of anger: based upon the harm which the devil may do (4^{26}).

3. Honest toil: based on the duty of helping others (4^{27}).

4. Pure conversation: based on the duty of helping those who hear (4^{28}), and the danger of grieving the indwelling Spirit (4^{29}).

5. Gentleness and forgiveness: based on God's forgiveness of us ($4^{31\text{-}32}$).

6. Love: based on Christ's love and self-sacrifice ($5^{1.2}$).

7. Avoidance of all impurity and covetousness as unworthy of our consecration (5^{3}), and of all foolish jesting and talk, as excluding from the kingdom of Christ and of God ($5^{4\text{-}6}$), as sure to incur God's wrath (5^{7}), as inconsistent with the Christian life, which is one of light ($5^{8\text{-}14}$).

8. Wise use of opportunities: based upon the evil of the time ($5^{15.16}$).

---

* We regard the Bezan and Syr. reading as founded on a good tradition (cf. 2 Ti 4^{12}; Ramsay, *Church in Rom. Emp.* p. 154); while Blass and others consider it to originate from St. Luke himself.

9. An intelligent understanding of God's will (5^{17}).

10. Temperance in wine—perhaps especially at the Love-feasts (5^{18}).

11. Fulness of spiritual joy and thankful praise of God—perhaps especially at the meetings for common worship (5^{19-21}).

This leads back through the thought of the common worship of the Church to the ideal of unity and subjection, and so forms a transition to

B. 5^{23}–6^{9}. An appeal to various classes in the Church.

Wives exhorted to submission to their husbands (5^{22})
  Because of the relation of man to woman (5^{23}),
  And the analogy of the Church's submission to Christ (5^{24}).
Husbands exhorted to love their wives (5^{25})
  Because of the analogy of Christ's love for His Church ($5^{25-27\ 30-33}$),
  And the closeness of the union between man and wife ($5^{28.\ 29}$).
Children exhorted to obey their parents
  Because of the natural sense of right (6^{1})
  And God's commandment and promise (6^{2-4}).
Parents exhorted to train their children patiently
  Because of the analogy of God's training of His sons (6^{4}).
Slaves exhorted to loyal obedience to their masters (6^{5-7})
  Because of the impartiality of God's judgment (6^{8}).
Masters to avoid threatening
  Because of the thought of their own Master in heaven (6^{9}).

(*N.B.*—This is no accidental digression, nor is it merely an attempt to lay down a new decalogue or moral code for Gentile Christians (Ewald), which should draw them nearer to the Jewish Christians by removing one of the great stumbling-blocks (Ac 15^{20}); but the writer takes a Christian household with all its members, and treats it as a type of the Church, in which the duties of subjection, love, obedience, forbearance, which are needed for the unity of the Church, may be first learned. Cf. $5^{24.\ 25-27}$ $6^{1.\ 4.\ 7.\ 9}$, 1 Ti 3^{5}. The thought of 3^{15} *πᾶσα πατριά* is the link between the two.

C. Addressed to the whole Church.

An exhortation to be true soldiers, to put on the full armour of God, that they may realize His strength and fight His battles ($6^{10.\ 11}$, cf. 1^{19} 2^{2}).

Description of the seriousness of the conflict (6^{12}).

Description of the armour, as complete (^{13}), as consisting of truth and righteousness (cf. 4^{24}), of peace (cf. 2^{15}), and faith (cf. 1^{13}), of God's saving grace (cf. 1^{13} 2^{8}), of God's word of truth (cf. 4^{21} 5^{26}), of prayer and watchfulness (6^{13-18}). The choice of the weapons is partly motived by the description of J"'s armour in Isaiah (59, etc.), partly by the virtues already emphasized in this Epistle, partly perhaps by the armour of the soldier to whom the writer is chained (^{20}).

A request for their prayer for himself ($6^{19.\ 20}$).

An account of the purpose of the mission of Titus ($6^{21.\ 22}$).

Final salutation, with prayer for peace, love, and faith, to those who have love for the Lord ($6^{23.\ 24}$).

The Ep. is thus marked by extraordinary unity of structure and interlacing of paragraph with paragraph, and the analysis shows that there is no sense of controversy on the surface of it; 2^{11} hints at the controversial nicknames of the Jewish and Gentile struggle (*οἱ λεγόμενοι ἀκροβυστία ὑπὸ τῆς λεγομένης περιτομῆς*); 4^{14} and perhaps 4^{21} point to the danger of false teaching, but the allusions are vague. The purpose is to emphasize the moral and spiritual fulness of the Christian life (cf. *πληροῦν* and *πλήρωμα*, $1^{10.\ 23}$ 3^{19} $4^{10.\ 13}$ 5^{18}), and the closeness of the union which binds Christians to Christ and to each other: cf. *ἐν Κυρίῳ* or *ἐν Χριστῷ* (Eph 30 times, Col 11); *ἑνότης* ($4^{3.\ 13}$ here only); *ἀγάπη* and *ἀγαπᾶν* (19 times in Eph as compared with 16 in Ro and 1 Co); *εἰρήνη* (8 times Eph, 11 Ro, in no other Ep. oftener than 3); and the many compounds of *σύν*, emphasizing the 'with'-ness of Christians with Christ *συγκαθίζειν* (2^{6} only), *συζωοποιεῖν* (2^{5} and Col 2^{13}), *συνεγείρειν* (2^{6}, Col 2^{12} 3^{1}); or with each other, *συγκληρόνομος* (3^{6}, Ro 7^{9}), *συμβιβάζειν* (4^{16}, Col $2^{2.\ 19}$), *συμμέτοχος* (3^{6} 5^{7} only), *συμπολίτης* (2^{19} only), *συναρμολογεῖν* (2^{21} 4^{16} only), *σύνδεσμος* (4^{3}, Col 2^{19} 3^{14}), *συνοικοδομεῖν* (2^{22} only), *σύσσωμος* (3^{6} only). The purpose of all this, too, lies beyond itself. The Church must be one, because a great conflict lies before it; the spiritual forces of evil are gathering, and it must be on its guard.

A comparison with Colossians will partly confirm, partly supplement this result. Whoever may be the author of this Ep., it is clear that there is a close relation between it and that. The salutations are almost identical: the structure of the Epistles is the same: the subjects are mainly the same, the need of knowledge is emphasized, and the relation of Christ to the universe and to the Church: the same moral virtues are inculcated; the laws of family life are laid down in each; the same phrases and words recur; they are both conveyed by Tychicus (cf. Holtzmann, *Einleitung*^{2} p. 291, for exact details). But there are important differences; the personal element is strongly marked in Col (2^{1-4} 4^{10-17}) and almost absent here; the controversial tone (Col 2^{4-23}) is dropped; the stress there was on Christ's relation to the universe, here on His relation to the Church; there Christ was spoken of as the *πλήρωμα* of God, here the Church as the *πλήρωμα* of Christ and of God. Again, there are new points emphasized in this Ep.; the sense of the continuity of the Church throughout the ages (Eph 1^{3-14}), the work of the Holy Spirit (12 times in Eph, 1 in Col), the unity of the Church (2^{11-22} 4^{4-6}), the analogy between family life and the Church (5^{22}–6^{9}), the simile of the Christian armour (6^{10-18}), are all additions in this Ep., or at best are expansions of very slight references there.

The points of similarity justify us in finding below the surface allusions to the Col. controversy. That arose from teaching which either grew simply out of Jewish soil, or perhaps was influenced by extraneous Oriental speculation (cf. Lightfoot, *Colossians*: 'The Colossian Heresy'; and Hort, *Judaistic Christianity*, pp. 116–129), laying great stress on a system of elaborate rules, termed a philosophy, and separating God from the material world by the introduction of the worship of angels. In answer to this the Ep. to the Col emphasized the cosmic work of Christ, and the need of a truer and higher wisdom, and of faith as the means of approach to God. This controversy is now in the background; but it is justifiable to fill out the vague allusions in such passages as $1^{9.\ 10.\ 21}$ $2^{2.\ 8}$ $3^{10.\ 15.\ 19}$ $4^{10.\ 14.\ 21}$ 6^{12}, by the more detailed parallels in Col (cf. esp. Findlay in *Expositor's Bible*).

On the other hand, the points of dissimilarity which cover the larger part of the Ep. show that the stress of that controversy is absent here, and that other motives are prominent.

The purpose, then, is *primarily* to stir up the readers to a higher activity and a closer unity by reminding them of the ideal of the Church in God's eternal purposes; *secondarily*, to guard them against false teaching that was current at the time, tending to take a low view of the created world.

ii. AUTHORSHIP AND DATE.—Three possible alternatives are open to us: either the author is St. Paul, or some friend writing for him and with his knowledge, or some later writer assuming after St. Paul's death that he is justified in writing in his name. The second of these alternatives may be put aside; it is only another form of the first, as the Ep. would practically be St. Paul's and have all his authority. Now, as the third alternative is possible, we must eliminate at first from the discussion all that speaks of the exact situation in St. Paul's life; for on that alternative, that will be part of an imaginary situation. But, apart from this, we have a few indications of date and writer.

Date.—The *terminus a quo* is A.D. 58 or 59, the earliest date at which St. Paul could be described as having suffered a long imprisonment (3^{1-13} 4^{1}) as the champion of the Gentiles.

The *terminus ad quem* is more doubtful. The Church organization implied is very slight; there is a ministry, both of apostles and prophets for the first foundation of Churches (2^{20} 3^{5} 4^{11}), and of evangelists, shepherds and teachers for the building up of Churches once founded (4^{11}). There is stress laid on Baptism, perhaps an allusion to the profession at Baptism of faith in God, the Lord, and the Spirit (4^{1-6} 5^{26}), perhaps also an allusion to a formula or hymn used at Baptism (5^{14}). There is evidence of the growth of Christian hymnody ($5^{14.\ 19}$ 3^{20} ?), and apparently of its use in the Love-feasts (cf. $5^{18.19}$ with 1 Co 10^{21}. Tert. *Apol.* 39). But this evidence is indeterminate; it might all be illustrated from 1 Co (6^{11} $12^{4-7.28}$ 14^{26}); while the absence of mention of *ἐπίσκοποι, πρεσβύτεροι*, and *διάκονοι* is against a late date. The absence of the freer *χαρίσματα* of 1 Co 12 is no objection, as they were esp. characteristic of the Corinthian Church, and as, even there, St. Paul discouraged them in comparison with the more fixed ministry.

The controversies referred to are again undecisive. The attempt to see allusions to a developed 2nd cent. Gnosticism are now abandoned, for its technical words *αἰῶνες, πλήρωμα, γενεαί* are clearly used here in a less technical sense; again, possible allusions to a false Docetism in 4^{9} 5^{21} are too uncertain to build upon. On the doctrinal side there is nothing which may not be explained as falling within the 1st century. So with the struggle of parties within the Church. There is still a certain friction between the Jewish and Gentile Christians, and the danger is that the Gentiles may despise the Jewish Christians; they need reminding that they have been brought into a commonwealth which existed before (1^{12} 2^{11}). Such a condition would have been possible even in the 2nd cent. (cf. Justin Martyr, *Trypho*, ch. 47); but it would also have been possible at any date after St. Paul's missionary work (cf. Ro 11^{13-24}), and the language used seems to imply that the readers belonged to the first generation of converts, who had themselves come over from paganism to Christianity (1^{13} $2^{2.12}$ 4^{20}).

Again, the absence of any mention of the destruction of Jerus. possibly points to a date earlier than A.D. 70, and the absence of any clear allusion to any danger of persecution by the state (though that may be included in the dangers against which the Christian has to arm himself, 6^{12}) is, when compared with 1 P, a strong indication of a date before A.D. 70 if St. Peter refers to the Neronian, before A.D. 80 if to the Flavian persecution. On internal grounds, therefore, A.D. 70 forms the most probable limit, though a date even in the 2nd cent. would be conceivable.

The use of the letter in other Christian literature supports an early date. By A.D. 150 it was known widely by Catholics and heretics, and treated by both as Scripture; for it was included in the Lat. and Syr. versions; its destination was discussed by Marcion (see below); it was used by the Ophites, Valentinians, and Basilideans, prob. by Basilides and Valentinus themselves, perhaps even commented upon by them (Westcott, *Canon*, 291, 295). It was included with the title 'to the Laodiceans' in Marcion's Canon (*c.* 140): a canon the existence of which implies a Church Canon, to which it was placed in opposition (Sanday, *BL* p. 19). In the years 95–150 we have probable reminiscences of its language in Clement, cf. xxxvi. with Eph 1^{18}, xxxviii., *σωζέσθω οὖν ὅλον τὸ σῶμα ἐν Χριστῷ Ἰησοῦ καὶ ὑποτασσέσθω ἕκαστος τῷ πλήσιον αὐτοῦ*, with 5^{21-23}, xlvi. with 4^{4-6}, lxiv. with 1^{4}(?); in Ignatius, *ad Ephes.* i. 1 with Eph 1^{3} ff.; ix. and xv. with Eph 2^{21}; xii. with 3^{4}, *Παύλου συμμύσται . . . ὃς ἐν πάσῃ ἐπιστόλῃ μνημονεύει ὑμῶν*, possibly a direct reference to the letter (Smith, *DB*^{2} p. 952 n; but see Lightfoot, *ad loc.*, and Hort, *Ro and Eph*, p. 113); *ad Polyc.* v. with 5^{25}.

In *The Two Ways*—the document which underlies the Didaché (iv. 10) and Ep. Barnabas (xix.) there seems a reminiscence of Eph 6^{9}.

In Polycarp, *ad Phil.* ch. i. may be compared with Eph $2^{5.8.9}$, and xii. with Eph 4^{26}. In Hermas, cf. *Mand.* iii. 4 and x. 2–5 with 4^{30}, and v. and xii. 5 with 4^{26}; *Similitude* ix. 13 with $4^{4.5}$.

Moreover, in nearly all these sub-apost. writings there is an advance in thought or church life. The stress on episcopacy, the development of Docetism, the elaboration of the metaphor of the Church as a temple in the Ignatian letters; the stress on the threefold ministry and the more marked use of liturgical language in Clement of Rome; above all, the fuller working out into detail of the many similes in this Ep. in the Shepherd of Hermas, all seem to imply a later date. In this latter treatise, the phrase 'giving place to the devil' is elaborately drawn out in *Mand.* v. and xii. 5. The conception of the Church as existing through all ages is expanded in *Vis.* ii. 4; of the Church as a bride without spot or wrinkle in *Vis.* iii. 10–13; as a building in *Vis.* iii. 2, *Sim.* ix. 9; as resting upon the apostles as foundation in *Sim.* ix. 15. In each case the simile is at a later stage of development.

'It is all but certain on this evidence that the Epistle was in existence by A.D. 95, quite certain that it was in existence by about 15 years later, or conceivably a little more' (Hort, p. 118). But there is possibly other evidence to be drawn from NT. The points of comparison with the Synoptic Gospels (*e.g.* Lk 21^{36} with Eph 6^{18}, Mk 4^{11} with Eph 3^{4}, Mk 12^{10} with Eph 2^{20}, Mt 16^{18} with Eph 2^{20} 4^{9}), or with the Acts (2^{39} with Eph 2^{13}, 2^{33} with Eph 4^{8}, 10^{36} with Eph 2^{17}), do not prove literary dependence nor go beyond parallels found in the earlier Epistles. [For details cf. Holtzmann, *Kritik*, pp. 248–255, but his analogies are often fanciful. For possible allusions to Agrapha of our Lord in $2^{16.17}$ 3^{15} $4^{26.27.36}$ cf. Resch, *Agrapha*, p. 109.] There are striking similarities between the Ep. and the Fourth Gospel; *e.g.* the stress on *χάρις*, the use of *πλήρωμα*, the contrast between light and darkness, the continuity of the work of the Logos, the predestination of the disciples, the activities of the Holy Spirit, the purifying power of baptism and of the word. The most striking similarity in thought is with Jn 17, where almost every verse offers a parallel to this Ep.; *e.g.* [1] the stress on God's fatherhood, [2] the power over all flesh, [3] life identified with knowledge, [5] the pre-existent glory of Christ, [6] the revelation to a few, [10] Christ glorified in His disciples, [11] the prayer for unity based on God's unity, [12] Christ's joy fulfilled in His disciples, [14] the antagonism of the world, [15] the protection from the evil one, [17] sanctification by truth, [21] the unity of Christians as a means of promoting Christ's work, [23] God's love for Christians like His love for Christ, [24] God's love for Christ before the foundation of the world. So again between the Ep. and the Apoc. [*e.g.* the city with foundations, which are the twelve apostles (21^{14}), the Church as a bride (21^{2}), the prominence of the prophets (10^{7} 11^{18} 18^{20})]: even more frequent are the points of contact with 1 P; *e.g.* 1 P 1^{2} with Eph 1^{3-14}, 1^{12} with Eph 3^{10}, 2^{4} with Eph 2^{20}, 2^{18}–3^{7} with Eph 5^{22}–6^{9}, 3^{19} with Eph 4^{9}, 3^{22} with Eph 1^{20}.

It is doubtful whether in any case the amount of similarity is sufficient to prove literary dependence. The similarity with St. John is one mainly of thought. It is possible that the language of St. John was influenced by this Ep., but it is more probable that this Ep. was written by one who had heard of that great prayer of our Lord. May not St. Paul have heard it direct from St. John's lips, possibly at Jerus., when they met to discuss the terms of unity between Jew and Gentile in the one Church; or possibly at Rome, if, as Renan suggests, St. John had been there, or even was there when St. Paul was writing? In the case of 1 Peter there is a stronger probability of literary dependence; if so, and if we assume the priority of 1 Peter (but see Weiss, *Introd.* i. p. 355), we should have indication that our Ep. was in existence before A.D. 70 or 80—at least it proves that the tone of thought and phraseology is such as was possible and natural before that date.

Author.—The author must have been a Jewish Christian, proud of his Jewish privileges, steeped in OT symbolism (1^{3-14} 6^{14-18}). Further, he must have been an original thinker, able to trace out a philosophy of history through the ages, able to move in the mystical sphere of heavenly places, and yet able to pass thence into the lower region of simple daily duties and of family life. Lastly, he was one who cared that his writing should appear under the name and with all the authority of St. Paul. There is, then, a *primà facie* probability that it was St. Paul himself; and a detailed examination will bear this out.

(*a*) The structure of the Ep. is clearly Pauline. The commencement with words of thanksgiving (cf. Ro 1^8, 1 Co 1^4, 2 Co 1^3); the great statement of doctrine as the basis for moral exhortation (cf. Ro 1^{18}–8); the moral exhortation, introduced by οὖν (cf. Ro 12^1, Gal 5^1), and passing from the general to the particular (cf. Ro 12–15); the apparent digression on family life, which really proves to be an important illustration of the whole subject (cf. 1 Co 7^{17-24} 9^1–10^{13}, Ro 9–11), all find parallels in St. Paul.

(*b*) The main thoughts often show an advance on the earlier Epp., but it is an advance on a line already marked out. Thus the continuity of the Christian Church with the Jewish, as a part of God's eternal plan (1^{3-14}), finds parallels in Ro 9–11. 16^{25-27}, Gal 4^{1-4}; the conception of Christ as the original source of creation and the restorer of its unity (1^{10}), in 1 Co 8^6, 2 Co $5^{18.19}$, Ro 8^{18-23}; the conception of the Church as the body of Christ, which receives His life and shows it forth to the universe, is an expansion of the germs in 1 Co 4^9 12^{27}; the unity of the Church is presupposed in the whole argument of 1 Co, where St. Paul is anxious to keep the customs and doctrines of the Corinthian Church in a line with those of all the Churches of the Saints (1 Co 1^2 4^{17} 7^{17} 11^{16} 15^{3-11})—even the use of ἐκκλησία for the Church universal is probable in 1 Co 1^2 10^{32}(?) 12^{28}; the stress laid on the Holy Spirit as the inspirer of the Church's life is analogous to 1 Co 12; the identification of the events of Christ's death and resurrection with those of the life of each Christian (2^{1-10}), to Ro 6 and 1 Co 15; the residence of sin in the σάρξ (2^3), and its effect on intellect as well as will, to Ro 7; the universal sinfulness of Jew and Gentile alike as the basis of a universal redemption (2^{1-4}) is a summary of Ro 1^{18}–2^{29}, cf. Gal 2^{15-21}; the destruction of the barrier between Jew and Gentile (2^{11-22}) is St. Paul's most favourite doctrine.

But it is urged that here the parts are changed: elsewhere St. Paul is the champion of the Gentile against Jewish narrowness; here he reminds Gentiles of the privileges of the Jews, and appears as the champion of Jewish Christians against Gentile exclusiveness. This is true, but the balance between the preponderance of Jew and Gentile might differ in each Church, or even at different moments in the history of one Church; and St. Paul was bent always, not on upholding one side, but on securing the rights of both within the Church. Further, this attitude on his part towards the Gentile Christians finds an exact parallel in Ro 11^{17-24}. Indeed the strongest argument for the Pauline authorship lies in the undesigned coincidences between Eph and the Ep. to the Romans. Both are of the nature of a general treatise; both are an attempt to show that Jew and Gentile are united by the work of Christ; both base this on the sinfulness of Jew and Gentile alike; both emphasize the privileges of the Jews; both build up a new morality, centring in love and made possible by the gift of the Spirit; both hint at the extension of Christ's work beyond man to the whole creation; both emphasize the eternal plan of God, hidden for ages, hinted at in prophetic writings and revealed at the due moment; both express the writer's amazement at the depths of the wisdom of God, and in each case the style rises into the beauty and cadence of a poem (Ro 8^{31-39}).

There are two points indeed which present a rather striking difference from the earlier Epistles. The thought of the quick return of the Lord is absent, and in its stead we have a vista of generations yet to come, through which the Church is to glorify God (3^{21}). But it is conceivable that these generations are thought of by the writer as following the Lord's return; it is conceivable, in accord with this, that the struggle which lies before the Church (6^{12}) is that which is to precede the coming of the Lord (cf. 2 Th 2^{8-12}); and further, it is clear that St. Paul, when he wrote the Ep. to the Romans, had contemplated the possibility of some long period of Church history before the Lord's coming (Ro 11^{25}).

Once more, the high conception of family life is at first sight inconsistent with the preference for celibacy and discouragement of marriage in 1 Co 7. But that was written in the presence of a pressing necessity: even there St. Paul recognizes that both the celibate and the married have a gift from God; and as time went on and the Lord did not return, it became necessary to build up a true conception of marriage in the face of heathen laxity. It is as likely that St. Paul should organize family life as that he should organize church order, and this he had done from the first.

(*c*) The style is again admittedly Pauline up to a point. There are some twenty words peculiar to St. Paul in his earlier Epp.; others common to Eph with the Pastoral Epp. (cf. Holtzmann, *Kritik*, p. 257); there is the love of paradoxical antithesis (cf. $6^{15.20}$); the play upon cognate words (4^{8-10} $5^{13.14}$); the same free paraphrasing of OT (4^{8-11}, cf. Ro 10^{6-8}); the same unacknowledged adaptation of OT language (1^{22} 2^{13-17} $4^{25.26}$ 5^2 6^{1-4} 6^{14-18}, cf. 1 Co 3^{10-15}, 2 Co 3^{12-18}). On the other hand the sentences are less broken, rather more elaborate and complicated by parentheses;* but this applies mainly to the earlier part of the Ep., where we have great statements of doctrine rather than controversial arguments, so that it may be adequately explained as due to the quieter tone in which St. Paul was writing. So, too, of verbal differences; there is a large number of ἅπαξ λεγόμενα (76), but not proportionately larger than in the other Epp. (for details cf. Von Soden, p. 87; Holtzmann, *Einleitung*, p. 289). Some of them occur in quotations; the majority of them rise naturally out of the subject-matter of the Ep.; even where the application is different from that in the earlier Epp., *e.g.* in οἰκονομία, πλήρωμα, κεφάλη, θεμέλιον, this, too, grows naturally out of the change of subject; and certainly there is no one word which St. Paul could not have used. The two that have been most objected to are the use of ὁ διάβολος (4^{27} 6^{11}) and οἱ ἅγιοι ἀπόστολοι (3^5). To the first it is objected that St. Paul elsewhere uses ὁ σατανᾶς or ὁ πειράζων; but St. Mt, St. Lk, St. Jn (Gosp. and Apoc.), the writer of 1 Ti, and St. Paul himself as reported by St. Luke in the Acts (13^{10} 26^{18}), use both ὁ διάβολος and ὁ σατανᾶς; and the stress on unity in this Ep. makes the use of διάβολος, *i.e.* the slanderer, more appropriate than σατανᾶς. Possibly, too, the word means here 'any human slanderer' (Zahn, *Einl.* 367). Again, the phrase 'the holy apostles' sounds like the ecclesiastical formula of a later generation looking back on its canonized founders; but, apart from the consideration that the reading is a little doubtful (cf. Smith, *DB*^{2} pp. 956 and 964), the context shows that ἅγιοι refers to special consecration of the apostles and prophets as recipients of the new revelation, in contrast to the sons of men (cf. Rev 21^{14} and Lk 1^{70}).

(*d*) The relation of the Ep. to that to the Col adds to the complexity of the problem. The extent of this has been brought out already, and the fuller details may be seen in Holtzmann, *Kritik der Epheser- und Kolosser-briefe*, cap. ii., or in Von Soden, pp. 94, 95. There is nothing exactly like the problem elsewhere in NT. The nearest parallels are the relation of the Synoptic Gospels to each other, or the relation of 2 Peter and Jude: in those cases the similarity is due partly to the use of common documents, partly to the deliberate use of the earlier writer by the later. In this case a somewhat similar theory has been propounded by Holtzmann; he holds that St. Paul himself wrote a short letter to the Col., that some later writer elaborated this into the Ep. to the Eph, and that the same writer, or another, subsequently composed our present Ep. to the Col, based upon the two preceding letters. Such a theory rests upon the fact that in some resemblances priority seems to be on the side of Eph, in others on the side of Col; but such an argument is very subjective and precarious; it has not met with any acceptance, and may safely be set aside as too artificial (see Smith, *DB*^{2} pp. 959, 960, for a fuller examination of it).

The more probable theory, then, is that of simultaneous authorship by one writer; and that such a similarity is not unworthy of St. Paul may be seen by comparing instances of similar though less marked resemblance between Ro and Gal (cf. Lightfoot, *Galatians*, Introd. cap. iii.), and between 1 Ti and Titus.

(*e*) The indications of the personal character of the writer are naturally few in so general an Ep.; yet such as they are, they are quite true to the character of St. Paul as revealed in the earlier letters. The spirit of thankfulness bursting out into doxologies (1^3 3^{21}), the courteous recognition of good in his converts (1^{15}), the prayerfulness for them (1^{16} $3^{13.14}$), the longing for their intercession (6^{18}), the fondness for applying great principles to the details of daily life ($5^{23\text{ff.}}$), the sense of his own personal unworthiness (a sense which has grown stronger with advancing years, but yet was destined to grow stronger still, 3^8, cf. 1 Co 15^9, 1 Ti 1^{15}), combined with the bold appeal to his authority as based upon revelation and upon his sufferings for the truth (3^1 4^1),—all these may indeed be the accidental outcome of borrowing from the early letters, but far more probably are they the natural outcome of the work of the same man.

There can, then, be little doubt that the writer is St. Paul. The alternative is a Jewish-Christian Paulinist, steeped in St. Paul's language, doctrine, and character, composing 'a mosaic out of the material of the Pauline Epistles' (Von Soden), giving a slightly wider scope to his conceptions of Christ and of the Church, emphasizing the universal character of the Church as a part of God's eternal purpose, 'in the spirit of the Fourth Gospel' (Hort, p. 126). It would be a tenable view that the writer was the author of the Fourth Gospel, writing in the name of St. Paul. But if our alternatives are limited so narrowly as this, the witness of the early Church may be regarded as absolutely decisive. We have seen how early the evidence is of the existence of the Ep., and evidence of existence is in this case evidence of belief in the Pauline authorship. The work is not anonymous (like the Fourth Gospel or the Ep. to the Hebrews); it has not merely a salutation easily separable from the Ep.; the claim to Pauline authorship is knit into the very fabric of the letter, and some of the earliest reminiscences of its language are of the parts which imply the authorship. It was, then, written by St. Paul himself.

---

* There are scarcely any interrogatory sentences; one only in Eph, as compared with 88 in Ro 1–11, and 4 in Ro 12–16. (Sanday and Headlam, *International Commentary on the Romans*, the best discussion in English of the difference of style between Ro and Eph.)

iii. DESTINATION.—The readers to whom the letter was addressed were mainly Gentiles (1^{13} 2^{13} 3^{1} 4^{17} 5^{8}); but this does not, any more than Ro 11^{13}, exclude the presence of some Jewish Christians. Indeed, 2^{13} seems to require the presence of Jewish Christians as forming a minority in the Church. St. Paul is laying down guidance to the Gentiles in their treatment of the Jewish Christians. Hence some commentators have treated the Ep. as a general encyclical to all Gentile converts throughout the world.

But there are personal bonds between him and them; he has had recent news of their faith and love (1^{15}); they have heard of his imprisonment and are sad at heart about it (3^{13}), and are anxious as to the issue of it (6^{21}); they seem acquainted with Tychicus ($6^{21.\,22}$); and they are distinguished from other Christians (1^{15} 3^{18} 6^{18}). There is little doubt, then, that the destination must be localized. But in 1^{1} the words *ἐν Ἐφέσῳ* are of very doubtful authority. They are absent in the first hand of ℵ and B, and are marked as an interpolation in 67; but found in all other MSS. Further, Basil (*c. Eunom.* ii. 19) says that there was a tradition of their absence, and that he found them omitted in the *old* copies known to him. Again, the interpretation of *τοῖς οὖσι* as 'those who have true life,' 'those who really are,'—an interpretation which presupposes the omission of the words,—is quoted by Basil as a traditional interpretation, and is found in Origen (Cramer, *Cat. ad loc.*), and is repeated by Victorinus Afer, Jerome, and Hilary. Further, Tertullian, in arguing against Marcion that the Ep. was addressed to the Eph., does not appeal to the salutation. It is, then, a fair inference that the words were absent from some copies in the 2nd cent., as it is a certainty that they were absent from many in the 3rd and 4th centuries.

The title *πρὸς Ἐφεσίους* gives us surer ground, and yet not quite sure. It is universally found in all MSS and versions, and all Church tradition has connected the Epistle with Ephesus. But Tertullian tells us that some heretics, and notably Marcion (*adv. Marc.* v. 11 and 17, cf. Epiphanius, *Hær.* 42), had a different title 'ad Laodicenos': now this may have been a mere critical conjecture by Marcion, based upon the obvious likeness of this Ep. with the Col, and the indication of Col 4^{16} that there was a letter written to Laodicea at this time. If so, this at least implies the absence of *ἐν Ἐφέσῳ* from the copies: but it is equally probable that the alternative title is a real fact, and that the Ep. was originally sent to Laodicea.

Tradition, then, points to two Churches of Proconsular Asia, Ephesus and Laodicea, and internal evidence is consistent with this. As long as it was regarded as addressed only to Ephesus, the language of 1^{15} 3^{2} 4^{21} and the absence of any special ref. to the circumstances of a Church in which St. Paul had spent three years, and on which he had been on the intimate terms implied in Ac 20, was a stumbling-block; but this difficulty entirely disappears on the theory that the letter was intended for several Churches.

That Ephesus was one of these Churches is practically certain; the unanimity of Church tradition in its favour is conclusive itself; but besides this the points of similarity with the speech to the elders of Ephesus (Ac 20^{19} *ταπεινοφροσύνη* ($=4^{2}$), 24^{33} the stress on *χάρις*; 27 *δεσμά* (cf. 3^{1}), 27 *βουλήν* (cf. 1^{11}), 28 *περιεποιήσατο* (cf. 1^{14}), *ποιμαίνειν* (cf. *ποιμένας* 4^{11}), *κληρονομίαν* (cf. $1^{14.\,18}$)); with the Gospel of St. John and esp. with the Prologue (see above), with the letter of Ignatius to the Eph. (see above); in a less marked degree with 1 Ti (*e.g.* 2^{5-7} 4^{4} the stress on the universality of creation and redemption; 3^{16} 5^{21} the appeal to the angels as witnessing the Christian life; 3^{5} the treatment of the family as a type of the Church),—all strongly confirm the tradition.

It may be added that the mention of Tychicus (cf. Ac 20^{4}, 2 Ti 4^{12}), the ref. to the power of the spirits of evil (cf Ac 20^{13-19}), the stress on the unity of Baptism (cf. Ac 20^{1-7}), all fall in with the same tradition, though too indeterminate in themselves to prove the destination.

The address to Laodicea is borne out by Col 2^{1} 4^{13-16}, which witness to St. Paul's anxiety for Laodicea at this moment, and show that he was writing at the same time a general letter—not necessarily addressed to Laodicea only, but one which could be obtained from Laodicea (*τὴν ἐκ Λαοδικείας*), and is quite consistent with Rev 3^{14-22}, where the Church at Laodicea is rebuked for lukewarmness.

Nor is there any reason why the destination should be limited to these two Churches. Col 4^{13} suggests that it may also have been sent to Hierapolis, while the analogy of Rev 1–3 and 1 P 1^{1} might lead us to infer that it was intended for all the Gentile converts of Proconsular Asia (cf. Ac 19^{10}).

iv. PLACE OF COMPOSITION.—St. Paul was at the time a prisoner, suffering imprisonment on behalf of the Gentiles (3^{1} 4^{1}), and an imprisonment lasting long enough to have caused anxiety to his converts (3^{13} 6^{22}). Hence the place must be either Cæsarea (Ac 24^{27}) or Rome (*ib.* 28^{30}). As between these two places this Ep. gives no guidance, save that the points of similarity with the Pastoral Epp. (cf. Salmon, *Introd.* cap. xx.) indicate the later date, and the tone of imperialism (see below) suits Rome better. But owing to the great similarity with Col we may certainly use any indications of date found there; and this is linked on by the personal allusions in it to the Ep. to Philemon (Col $4^{9.\,17}$ with Philem ^{22}), so that indications there too may be used; again, the allusions to the imprisonment in Ph $1^{12\text{ff.}}$ make it probable that that too was written at the same place. Some commentators would place Ph at Cæsarea, the other three at Rome, but more probably all are to be placed at Rome; for the phrase *ἐν ὅλῳ τῷ πραιτωρίῳ* (Ph 1^{13}), though applicable to Herod's prætorium at Cæsarea (Ac 23^{35}), is equally applicable to the prætorian soldiers or the Supreme Court at Rome; the phrase *οἱ ἐκ τῆς Καίσαρος οἰκίας* (Ph 4^{22}) is more applicable to Rome; the state of feeling between Jewish and Gentile Christians as reflected in Ph 1^{15-20} corresponds well with that implied in the Ep. to the Romans: the freedom for preaching which St. Paul enjoys, and the importance which he attaches to it (Ph 1^{12}, Eph 6^{23}), are more natural at Rome: the expectation of a speedy release (Philem ^{22}) points the same way; and, although Cæsarea was nearer for a runaway slave from Colossæ, yet there were more frequent opportunities of communication with Rome, a greater chance of hiding, and an easier access there to St. Paul. Finally, the points of contact between all four Epp. and the Pastoral Epp. in phraseology, in stress on organized church and family life, and in Christology, all favour the later date. We place, then, all four Epp. at Rome. Of their relative order it is again impossible to speak with certainty; but most probably (so Lightfoot, *Phil.*; Hort, *Rom. and Eph.* p. 102; but see on the other side, Ramsay, *St. Paul the*

Traveller, p. 357) the Ep. to the Phil. stands by itself comparatively early in the Rom. imprisonment; for it offers more points of comparison in phraseology and doctrinal discussion with the earlier group; there is more discussion of the doctrine of justification by faith, more protest against the Judaizing Christians. On the other hand, Eph Col Philem form a group by themselves, written comparatively late in the imprisonment—with fewer points of contact with the earlier group, and with more agreement with the Pastoral Epistles. They may, then, be all placed about A.D. 63 at Rome.*

By that time St. Paul had been in prison for three or four years. That imprisonment had been incurred at Jerus. just at the moment when he had taken up the alms of the Gentile Churches to the Churches of Judæa; his anxiety about his reception by the brethren there (Ro 15^{32}) had been removed; he had been welcomed, misunderstandings had been smoothed over, he had shown his willingness to work with them (Ac 21^{17-26}). The unity between Jewish and Gentile Christians was assured. But an outburst of Jewish fanaticism, on the false charge that he had taken a Gentile Christian, *an Ephesian*, within the centre wall of partition in the temple precincts (cf. Eph 2^{14} *τὸ μεσότοιχον*), had led to his arrest; he had been kept two years at Cæsarea, thence on his own appeal had been transferred to Rome; on his way he had been marvellously protected from danger of shipwreck; he had been welcomed once more by the brethren at Rome on his arrival (Ac 28^{15}), and since he had been in prison he had had freedom to preach and wonderful success in preaching. Naturally, then, one of his main thoughts was of God's overruling power, which could bring good out of apparent evil, and turn even imprisonment into the means of furthering His work (Ph 1^{12}, Eph 3^{13}).

Further, he was now in Rome, the great centre of the empire, which he had for many years longed to see. He would look, with the eyes of a provincial, upon the centre of the world's administration; he would see a power, small at first, confined to one Italian town, growing by steady growth till it launched itself forth on the whole world, brought all nations under its subjection, opened its franchise freely to all, and allowed them to enjoy its privileges, yet still requiring its prætorian soldiers ready to defend its emperor or to move out against any enemies that might attack its borders; while as ultimate source of authority stood the one man, the Emperor, the head, the ruler, the court of appeal for the oppressed, set forward more and more even as an object of worship. At the same time St. Paul would hear more of the teaching of Seneca and of the great Stoic conception of a universal city, of which all men were citizens, and in which each true citizen rose above the limitations of place and of environment, and became independent, self-centred (*αὐτάρκης*), the master and not the slave of circumstances (cf. Lightfoot, *Phil.*, 'St. Paul and Seneca').

Naturally, then, his thoughts would dwell upon the new brotherhood of the Church, 'the kingdom of Christ and of God' (Eph 5^{5}), 'the citizenship in the heavens' (Ph 1^{27} 3^{20}, Eph 2^{19}). That, too, had grown out of a small centre, and by a longer growth, for it had begun before the foundation of the world; that, too, had at the right moment launched itself on the world, and all divisions of race had been broken down in it; that, too, centred in its king, who had won his triumphs and given gifts to his followers (4^{8}, cf. 2 Co 2^{14}), who himself was the source of peace (Eph 2^{14}), who was the head of the body; that, too, had its enemies to conquer, and therefore needed its soldiers ever prepared to fight (Eph 2^{2} 6^{10-17}); but its citizenship was in heaven, its enemies were spiritual, the scene of battle was in the heavenly places; its aim was wider, for it had once more to bring to a unity (*ἀνακεφαλαιώσασθαι*, 'recapitulare,' Iren. *adv. Hær*. iii. 18; 'instaurare,' Vulg.; 'ad initium reciprocare, Tertul. *Monog*. c. 5) the whole universe; as it was founded on all past history, so its rule was to embrace all future time (Eph 3^{21}). Dead as well as living were its subjects (4^{9} (?)).

Such thoughts might of themselves almost account for the genesis of this Ep.; but a new turn was given to them by the arrival of Epaphras from Colossæ. He brought news of the development of teaching there tending to degrade the dignity of Christ, to substitute the worship of angels, to take low views of the material world, to lay an undue stress upon knowledge as the one method of access to Christ. At the same time he brought news of the neighbouring Churches of Proconsular Asia; their faith was sound, their love strong; but they were disheartened by the apostle's imprisonment, and, as in all Churches in Gentile cities, there was the danger lest the surrounding heathenism should draw them back, lest 'empty arguments' (*κένοι λόγοι*, Eph 5^{6}) should lead them to treat immorality lightly and indifferently; and, as in all mixed Churches of Jews and Gentiles, there was the danger lest racial jealousy should destroy unity. With the special danger at Colossæ, St. Paul dealt in the Ep. to the Col; then he turned to the wider condition of the Asiatic Churches, with his thoughts perhaps mainly fixed on Ephesus, his favourite abode, the centre of Gentile Christendom in that neighbourhood. No longer associating Timothy with him (contrast Col 1^{1}, Ph 1^{1}), but speaking only in his own name, he writes what is rather an encyclical treatise, a Cath. Ep., than a mere letter (cf. Ro and 1 P). Dropping all tone of controversy, and with only side allusions to false teaching, he tries to win them to a higher standard by a picture of the ideal Church which had been growing in his mind. He had done something of the kind to the Romans before; but that was an elaborate argument trying to convince them that all needed redemption, and that it had been brought to all by the power of Christ. This is a statement that the redemption has come, and that it has come—for here he is writing to Orientals—as part of a divine wisdom, and leading men to a fuller knowledge (*ἐπίγνωσις*, cf. 1 Co 1^{24} *αὐτοῖς δὲ τοῖς κλητοῖς, Ἰουδαίοις τε καὶ Ἕλλησι, Χριστὸν Θεοῦ δύναμιν* [the theme of Romans] *καὶ Θεοῦ σοφίαν* [the theme of Ephesians]). He is anxious that they too (*καὶ ὑμεῖς*, 'you in the recesses of Provincial Asia as well as the brethren at Rome,' Hort) should know what is happening in his imprisonment, that it is bringing fresh glory to the Gentile Christians (3^{13}); they need not be out of heart, for God is watching his fortunes with that same overruling power which has ordered all history. He it was—thanks be to Him—who eternally planned our redemption; who chose the Jews for special privileges and promises; who at the right moment revealed His Son and broke down the division between Jew and Gentile; who has now drawn both Jew and Gentile into one body; who raised Christ and made Him Head of the Church; who enabled individuals to do good works; who is now building up His Church and watching over His apostle. Therefore, you must lift up your hearts and minds; you must keep the unity which He has given; you must not be drawn back into the old impure aimless life; you must build up family life; and you must remember that round about you, as about the Jews of old or about the Rom. Empire now, there are enemies, spiritual enemies; you must be ready both for defence and for attack, for you have to fight God's battles, and to represent His cause and to illustrate His wisdom in the eyes of the angels. Peace, Love, and Faith: these are the graces which I ask for you.

---

* Von Soden, while rejecting the Pauline authorship of Eph, hesitates between Rome and Asia Minor as the place of its composition.

Such was the substance of the letter: whether St. Paul inserted any address must be uncertain. Either he inserted ἐν Ἐφέσῳ, but as Tychicus was intended to leave it at other Churches too, other names were inserted by these Churches in their own copies, or more probably a blank was left from the first that Tychicus might fill it up with the name of each Church to which he read the letter; possibly, again, several copies may have been made at Rome for the different Churches, and carried by Tychicus. It is a legacy of peace left to the Church by Paul the aged, 'das Testament des greisen Apostels' (Jülicher); 'one of the divinest compositions of man' (Coleridge, *Table Talk*); *νοημάτων μεστὴ ἡ ἐπιστολὴ ὑψηλῶν καὶ δογμάτων* (S. Chrys. *Comm.*); truth expressed 'sub specie gratiarum actionis' (Theod. Mops. on 1^{2}). 'Though the vehement moods of the earlier contests have subsided, many parts of the Ep. glow with a steady white heat' (Hort, p. 153). It is a letter rising at times to the level of a poem, 'the Christian's 68th Psalm'* (Dr. Kay); 'ipso verborum tenore et quasi rhythmo canticum imitatur' (Bengel on 2^{14-18}); 'der ganze erste Hauptheil (1–3) hat liturgischen Charakter und erscheint in seinen Höhepunkten wie einer jener *ὕμνοι* durch welche nach Col 3^{16}, Eph 5^{19}, die Christen sie belehren sollen' (Von Soden). When St. Paul wrote this letter, he was, as at Philippi, singing hymns in prison.

v. Doctrinal Importance.—The doctrines implied in the whole group of the Epp. of the Captivity are well analyzed, and their relation to that of the previous Epp. drawn out, in B. Weiss, *Bibl. Theol.* part iii. § iii. Those which are most prominent in this particular Ep. are—

(*a*) *The Universal Fatherhood of God* (*πατήρ* applied to God eight times; in Ro only four times). While the unity of God's nature is the starting-point of the whole argument (4^{5}), yet He is represented as the Father of the Lord Jesus Christ (1^{3}), *i.e.* there is within the Godhead a relationship of Father and Son, there is a giving forth of life and love (1^{6} *τῷ ἠγαπημένῳ*), there is a social bond, so that every community, whether of angels or of men, is named after and reflects the fatherhood of God (3^{15} *πατριά* here only in St. Paul). He is in the widest and most absolute sense 'the Father' (2^{18} 3^{14} 5^{20} 6^{23}); the Father of the glory manifested in men (1^{17}); the Father of all (4^{6}); the Father of us Christians (1^{2}).

(*b*) *The Pre-existence of Christ*—and this not merely in relation to God, as elsewhere, but in relation to man, so that before the foundation of the world He contains within Himself ideal Humanity (1^{4}), and men have only to grow up into that which He already is ($4^{15.\,16}$): and also in relation to the whole universe which centred originally in Him, and is re-centred in Him by the Incarnation (1^{10} *ἀνακεφαλαιώσασθαι*, 2^{12} 4^{18} *ἀπηλλοτριωμένοι*).

(*c*) *The Dignity of Human Nature*, as redeemed within the Church, lifted above this earthly sphere into the heavenlies, showing forth the attributes of God Himself to the world, and becoming a link for the whole creation (1^{23} 2^{5} $3^{18.\,19}$ 4^{8} [*τῆς ζώης τοῦ Θεοῦ*] 4^{32} 5^{1} *μιμηταὶ τοῦ Θεοῦ*, 6^{4} 6^{13}).

(*d*) *The Continuity of all History* in the past and in the future. Each *καιρός* is regarded as contributing its quota to the whole, until the whole complement of *καιροί* shall be complete (1^{10} *τὸ πλήρωμα τῶν καιρῶν* [cf. Mk 1^{15}, Lk 21^{24}] and 3^{11}).

(*e*) *The Essential Unity of the Church*, as based upon the unity of God, as an ideal already realized, yet needing to be secured (4^{3}), and in a sense still future (4^{15}); as practically begun by baptism (4^{5}), and as secured by the gift of an organized ministry, whose purpose is to fit all Christians for the work of service (*πρὸς καταρτισμὸν τῶν ἁγίων εἰς ἔργον διακονίας*), to build up Church life until the complete unity is secured ($4^{12.\,13}$).

(*f*) *The Insistence on Wisdom and Knowledge*, as an integral and necessary part of the true religious life. This truth, which St. Paul had first proclaimed in the centre of Gr. philosophy at Athens (Ac 17^{23}, cf. Hort, *Hulsean Lect.* p. 62), is here more explicitly laid down in an epistle to Gentiles. The value of this insistence is all the more striking as addressed to converts who were inclined to give an apparently undue value to knowledge. The remedy for a little knowledge is more knowledge.

(*g*) *The Consecration of Family Life.* Family life is regulated in Col (3^{18}–4^{1}): it is dignified in 1 P (2^{18}–3^{7}) as a means whereby Christians may hope to attract heathens to the faith; but here it is lifted to a higher level still, as a type and nursery of Church life.

(*h*) *The Picture of the Christian as a Soldier*, and his life as a warfare, which finds its fullest expression here, has had a wonderful influence both on Christian history and on Christian literature, enriching the latter with poems and allegories such as the *Psychomachia* of Prudentius, and the *Pilgrim's Progress* and the *Taking of Mansoul* by Bunyan, and nerving many a Christian hero and martyr for his task.

vi. Literature.—If we may see a literary dependence of 1 P and of the Apoc. upon our Ep., its importance must have been recognized at once, and it must have been at once known in Rome; the reminiscences found in the sub-apos. writers show a knowledge of it at least in Asia Minor and Italy. There is some evidence that it was commented upon by the Gnostics in the 2nd cent. Origen wrote three books upon it, large fragments of which are preserved in Cramer's *Catena*, vol. vi.; probably a much larger part is embodied in Jerome's *Commentary.* In the next cent. Ephraem the Syrian, Victorinus the African, Ambrosiaster, St. Chrysostom, and Severianus, and rather later Theodore of Mopsuestia, Theodoret, and Jerome, treated it in their general comm. on St. Paul's Epp. For an account of these comm. see Lightfoot, *Gal.* (pp. 217 ff.), and Swete's ed. of Theodore of Mopsuestia (vol. i. pp. lix–lxxix). For later comm. cf. Meyer's *Comm.* (Introd.), or Macpherson, pp. 96–106.

St. Chrysostom remains still the best comm. for his combination of exegetical, doctrinal, and spiritual power, and for sympathy with the writer's mind and character. He wants exact treatment of exegetical difficulties, and is at times fanciful; but he seizes well the whole drift of a passage; he never avoids discussing a difficulty; he has a firm hold on doctrine, and is especially strong in the spiritual application of truth, dwelling on the contrast between virtue and vice; on the strength of the will, on the beauty of the Christian character in contrast to the unnaturalness and impotence of sin. Theodore of Mopsuestia is acute as an exegete, but has less spiritual insight; *e.g.* he explains all the blessings spoken of in the Ep. as referring to a future life.

Of mod. comm. Macpherson (Edinr. 1892) is full and useful, but not very stimulating; Ellicott, Alford, Moule (Camb. Bible), Beet, are all good; Bishop Lightfoot's notes on $1^{1\text{-}12}$ have been published posthumously (*Notes on the Epp. of St. Paul*, 1895). W. Schmidt in Meyer's *Comm. on NT*, and Von Soden in the *Handkommentar zum NT* (Freiburg, 1891), are excellent in exegesis.

For the doctrinal treatment of the Ep., Dale, *Lectures on Eph.*, and Findlay in *The Expos. Bible*, are equally good, though both fail to rise to the writer's conception of the Church. For devotional use, Bernardine of Picquigny, in Lat. or in Eng. (tr. by A. H. Pritchard, 1888), is most useful. The introductory questions are best dealt with by Pfleiderer, *Paulinism*, ii. pp. 162–193; Von Soden, *ubi supra*; and Holtzmann, *Kritik der Epheser- und Kolosser-briefe*, Leipzig, 1882, as against the Pauline authorship: on behalf of it, by Lightfoot, *Bibl. Essays*; Hort, *Prolegomena to the Ro. and Eph.* 1895; A. Robertson in Smith's *DB*^{2}; Weiss, *Introd. to NT*; Zahn, *Einl.* i.

EPHESUS (Ἔφεσος) was the metropolis of the

---

* Ps 68^{18} is quoted in 4^{8}; there are other possible reminiscences of it; *e.g.* cf. Ps ^{5} with 5^{19}; ^{10} with $^{1\text{-}18}$; ^{17} with 2^{22}; ^{20} and ^{36} with 1^{3}; ^{27} and ^{35} with $3^{21.\,22}$; ^{28} and ^{36} with 3^{16} 6^{10}.

Roman province of Asia (wh. see), and one of the three great cities of the East Mediterranean lands (along with Antioch in Syria and Alexandria in Egypt), a rank to which geographical and historical causes conspired to raise it. It was situated within 3 miles of the sea, on the river Cayster, which was navigable as far up as the city in the Rom. period. It stood at the entrance to one of the four river valleys that extend upwards and eastwards like long narrow clefts in the high plateau forming the main mass of Asia Minor; these valleys are separated by chains of mountains, which are really prolongations, like fingers, stretching out towards the W. from the main plateau. The roads connecting the western sea, the Ægean, with the central and eastern lands, must necessarily follow the lines of these four valleys; and near the mouth of each of them stood a Gr. city, in which the importance of the valley was centred. The four valleys are those of the river Caicus with the city Pergamus, of the Hermus with Smyrna, of the Cayster with E., and of the Mæander with Miletus. The four cities played a prominent part in the early history of Christianity in Asia Minor. The shorter courses of the Caicus and Cayster make their valleys unsuited for routes of communication with the far East; and natural circumstances make the road that leads up from the Hermus valley to the plateau too difficult. Hence the route up the Mæander to its junction with the Lycus, and thence up the Lycus by Laodicea (wh. see) towards Apamea, has been the great road of history, and was one of the chief avenues of intercourse, of commerce, and of advancing civilization and thought under the Rom. Empire. Now E., from the beginning, competed with Miletus as the seaport towards which the trade of that great road was attracted; for, owing to the configuration of the coast and of the valley, the line from the Lycus down the Mæander, and across the mountains by a pass only about 600 ft. high to E., is shorter by many miles than the line down the Mæander to Miletus. The superior energy and more thoroughly Gr. character of the people of Miletus, combined with their more advantageous harbour, gave them the advantage in earlier times; but under the later Gr. kings, and still more decisively under the Roman rule, E. had established itself in undisputed supremacy as the sea-end of the great eastern highway, while the silting up of the Mæander seems to have been permitted to interfere with the excellence of the harbour of Miletus. Thus E. became the great commercial centre for the whole country within, *i.e.* on the Roman side of, Mt. Taurus, as Strabo mentions (p. 641, cf. pp. 540, 663).

On the great line of communication between Rome and the East in general, E. was one of the knots where many side roads converged to feed the main route. From the N. and the S. coasting ships and land roads (Ac 19^{21} $20^{1.17}$, 1 Ti 1^{3}, 2 Ti 4^{12}) brought travellers to the city on their way to Rome, or carried away travellers and officials who were going from Rome to other parts of the province. Thus it was a regulation that the Rom. governors under the empire must land at E.; and the system of roads was such as to make the city the most easily accessible from all quarters of Asia. Hence it was naturally marked out as the centre where St. Paul should station himself in order to affect that great province; and from thence the new religion radiated over the whole of the province (Ac 19^{10}), partly through the fact that great numbers of the provincials came to E. for various purposes (*e.g.* to trade, to see the great Rom. festivals and shows, to worship the great goddess, etc.), and heard the word, and carried it back to their homes, partly through special missions on which, doubtless, St. Paul's helpers, like Timothy and others, were sent by him. Corinth was the next great knot on the way to Rome, and communication between E. and Corinth must have been very frequent. The ship that conveyed St. Paul to Jerus. from Corinth, doubtless a pilgrim ship carrying Jews to Jerus. expressly for the Passover, crossed first to E. (Ac 18^{19}), and thence coasted round Asia Minor, and crossed, doubtless by the W. side of Cyprus, to the Syrian coast (as in Ac 21^{3}). The same character, as a pilgrim ship, doubtless belonged to the ship by which St. Paul intended to sail from Corinth for the Passover four years later (Ac 20^{3}); on board of such a ship Jewish fanaticism would have been specially strong, and the conspiracy which was dreaded by St. Paul's friends would have had every chance of being successful.

After St. Paul's work in Asia was ended, Timothy seems to have been stationed in E. for a time (1 Ti 1^{3}), with general authority, extending probably over the whole province, as is implied throughout the first Epistle; and he was summoned thence by St. Paul to join him in Rome during his second imprisonment (2 Ti 4^{9}); and John Mark must have been in Asia, perhaps in or at least near E., at that time, as Timothy was charged (4^{11}) to bring Mark with him to Rome. A wide acquaintance of Mark with the Asian Churches is implied in Col 4^{10}, 1 P 5^{13}; and on each of the journeys between Rome and Asia which are implied in these passages, he must have passed through Ephesus. The rank of the Ephesian Church in the province is attested further by its being named first in Rev 1^{11} 2^{1}. It became the home of St. John in the latter part of the century; and a few incidents of his residence in E. are preserved by Eusebius. According to tradition, not merely Timothy and John, but also the Virgin Mary, were buried at Ephesus.*

The connexion of the Ephesian city harbour with the sea depended on the proper maintenance of the channel of the Cayster; but this was difficult, for the river, which drains a valley of fertile alluvial soil, carried much silt in its water, and deposited this toward its mouth, as the current became weak. According to Strabo (p. 641), an ill-advised engineering scheme under the Pergamenian king Attalus Philadelphus (B.C. 159–138), when a breakwater was built to narrow the entrance from the river, increased the tendency to silt up the mouth of the city harbour; and in A.D. 65 measures had to be taken by the governor of Asia to improve the connexion between the harbour and the sea (Tacit. *Ann.* xvi. 23). Either then or at some other time, an embankment, which can still be seen as one rides down from E. to the sea (see Weber, p. 52), was built along the lower course of the river, to help the action of the stream in sweeping the silt out towards the sea. The harbour of E. was maintained, apparently, under the Rom. Empire; but in later centuries the care and energy needed for so great a task failed, the harbour became a mere marsh, and with it E. necessarily decayed, as its qualifications for being the sea-end of the great highway had ceased. Even in the time of St. Paul, it was somewhat troublesome to ascend the channel to the harbour; and ships which were trading between the N. Ægean ports and Syria, avoided E., unless the exigencies of loading or discharging freight required them to enter the harbour (Ac 20^{16}).

---

* As to the supposed connexion of St. Luke with E., no ancient evidence for it exists (but rather only contrary evidence); in Ac there is nothing to suggest personal knowledge of the city on the part of the author; and the so-called 'Tomb of St. Luke' is the creation of a mere error on the part of Mr. J. T. Wood, who mistook a rude cross, incised in later times on the marble door of an old Gr. *polyandrion* or family tomb, for a proof of the Christian origin of the monument, imagining that the figure of a bull (a Gr. ornament) which was sculptured on it was the symbol of St. Luke, and completing his delusion by the false belief that the modern name Ayassaluk (on which see below) was derived from Ἅγιος Λουκᾶς. Yet from his idea there has been developed a modern legend; and in recent years there has been some attempt to institute a ceremonial at this false 'tomb of St. Luke.'

While the road up the Cayster valley towards the East was too difficult to be a commercial route, it afforded decidedly the shorter path from E. to Pisidian Antioch and the East in general; and naturally foot-passengers, to whom precipitous descents caused no difficulty, would prefer that road to the longer but more level route by Apamea and Laodicea. The Cayster route leads over higher ground than the other, and does not descend into the low coast valley till it comes nearer E.; and this also would make it preferable in the summer. Hence St. Paul, journeying from Pisidian Antioch to E., preferred the Cayster route, and traversed the higher-lying districts (*τὰ ἀνωτερικὰ μέρη*, Ac 19^{1});* and the statement of Ac on this point is confirmed by Col 2^{1}, which shows that the apostle had never visited Colossæ or Laodicea (which were situated on the great highway). He had doubtless entered on the same path in his second journey, when, after revisiting Derbe, Lystra, Iconium, and Antioch, he advanced into Asia, but found himself 'forbidden of the Holy Ghost to preach the word in Asia' (Ac 16^{6}).

The lower end of the Cayster valley is divided from the middle valley (called the Caystrian plain) by the projection of the bounding mountain ranges, for Mt. Gallesus on the N. stretches down towards the S., as if trying to reach across the valley to Mt. Messogis (the part of which overlooking E. was called Pactyas), and forces the Cayster to wind southward, when it is coming near the sea-level. Below this narrow pass, the valley opens again to form a low marshy plain, raised very little above the sea, from which the hills spring very sharply, as Mt. Coressus, the outermost peak of Pactyas, overhanging the site of E., extends in a long sharp ridge westward towards the sea; and the Cayster turns again sharply to the W. through this 13 miles long plain to the sea. In the open plain, about 5 miles from the sea, on the S. side of the river, stands a little hill, close on the W., above the modern railway station; this hill has always been the religious centre of the valley; below its S.W. slope stood the sacred precinct of the Asian goddess, who was identified by the Greeks with their own Artemis (see DIANA); on the hill Justinian built one of his greatest ecclesiastical foundations,† the church (whose ruins, projecting out of the hill, can still be traced) dedicated to St. John the Evangelist (*ὁ ἅγιος θεολόγος*, from whom the hill and the little village beside is still called Ayo-solúk or Ayas-salúk, *i.e.* Ayo-thológ); and between the two was built a fine mosque, formerly one of the most exquisite monuments of late Arab.-Pers. art, now seriously dilapidated (founded probably by one of the Seljuk princes, who reigned and coined money with Lat. inscription ‡ at Ayo-solúk). Round this religious centre the earliest and the latest inhabitants have congregated; whereas, in opposition to the religious foundation, the Gr. colonists built the city of E., at a distance of 1 to 2 miles S.-W., partly on the slope of Coressus, partly on the low ground at its foot, and partly on a low isolated hill, called Pion or Prion (about 500 ft.), which rises in the plain.

The history of E. turns, to a great extent, on the opposition between the Greeks, the party of progress and freedom and maritime enterprise, and the non-Gr. population, centred at the temple, and championed by the priesthood, the party of stagnation and ignorance and Asiatic submission. The Lydian conquest by Crœsus for a time enslaved the city to the temple; the new foundation of E. by Lysimachus in B.C. 295 again redressed the balance;* but the proximity of the temple gave it always an immense power in the city. The city owed its pre-eminence in the province in part to the temple, for the temple was the greatest and most influential in Asia, and the city boasted of the title 'warden of the temple of Artemis' *νεωκόρος τῆς 'Αρτέμιδος*, Ac 19^{35}, lit. 'temple-sweeper,' in RV 'temple-keeper,' in AV 'worshipper.' The title 'Temple-Warden' is more commonly applied to E., and to many other Asian cities, as warden of a temple of the imperial cultus; in the time of St. Paul, E. was warden of one such temple, and later she became warden of two temples, and finally of three temples of the imperial religion (*δὶς, τρὶς, νεωκόρος*); and when the Eph. Neocorate simply is mentioned, that is the sense in which it is ordinarily to be understood.† But the ref. to the Eph. Neocorate of Artemis in Ac 19^{35} is justified by an inscription of the 2nd cent., in which E. is said to be 'doubly temple-warden of the Emperors, and warden of Artemis' (*δὶς νεωκόρος τῶν Σεβαστῶν καὶ νεωκόρος τῆς 'Αρτέμιδος*, Wood, *Appendix Inscr.* vi. 6, p. 50); and coins of the 3rd cent. have the legend *'Εφεσίων τρὶς νεωκόρων καὶ τῆς 'Αρτέμιδος*, *i.e.* 'triply temple-warden (of the emperors), and (temple-warden) ‡ of Artemis.' The festivals of the goddess were thronged by pilgrims and devotees from the Cayster valley and from the whole of Asia. The crowds which attended these festivals contributed greatly to the wealth of the city; many trades were mainly dependent on the pilgrims, who required entertainment, food, amusement, victims to sacrifice, offerings to dedicate, curiosities and images for worship to carry home.§ The order of events during St. Paul's long residence in E. of 2 years and 3 months (Ac $19^{8.\,10}$, called 3 years by the apostle himself, Ac 20^{31}, in the usual ancient style of reckoning an intermediate period by the superior round number) illustrates in a striking way the relation of the priestly centre to the preaching of Christianity. At first there was no opposition; for new religions, which were often brought in from the east, had never been found prejudicial to the influence of Artemis and her priests. Then the missionaries were brought into collision with the practisers and votaries of magic; E. was one of the great centres of magical art, and a kind of magic formulæ, called Ephesian Letters (Ἐφέσια γράμματα), became famous;[*] the magicians were naturally soon arrayed in opposition to the religion which freed the human mind from such superstitions; but their discomfiture (Ac 19^{13-19}) would not directly and immediately affect the priests and the temple. As time passed and the new religion became more powerful, it began to affect the worshippers, who did not need so many articles for dedication (ἀναθήματα), and ceased to purchase the small representations of the goddess in her shrine, which were produced in vast numbers and in various materials—silver, marble, and terra-cotta (see DIANA). Thus several trades were seriously affected, and the associated trades (τοὺς περὶ τὰ τοιαῦτα ἐργάτας, Ac 19^{25}), under the leadership of one of their wealthy merchants (who dealt in silver 'shrines,' and therefore needed more capital for his business in the precious metal), Demetrius, probably master of the guild for the year,[†] eager to defend their interests, raised a demonstration against the Christian preachers. It is clear that in the riot the Christians ran serious risk (19^{31}), and that, even after (and also before) the riot, the passions and superstitions of the vulgar mob, having once been roused against the puritanic tendencies of the Christians, continued to be a serious danger to St. Paul (1 Co 15^{32} 16^{9}, 2 Co 1^{8-10}).

---

* In this sentence we speak only on the 'South Galatian' theory (Ramsay, *Church in Rom. Emp.* p. 93 f., esp. ed. 2 or later editions); those who hold the 'North Galatian' view may omit this one sentence.

† It is briefly described by Procopius, *Ædific.* v. 1, as equalling in size and magnificence Justinian's great foundation in Constantinople, the Church of the Holy Apostles. Justinian built it in place of an earlier church on the same site, dedicated to St. John.

‡ *Moneta quæ fit in theologo.* Several of these coins were among a find made in the soil, a little to the north of the temple, by Mr. Wood. The coins had been buried about 1370.

* Even under the Delian confederacy it seems clear that the Eph. contribution of 6 to 7½ talents was paid only under compulsion (Head, p. 18), and the Gr. spirit was nearly dead. Lysimachus called his new city Arsinoe, after his wife, but this name lasted only a few years.

† The Eph. Neocorate in the imperial cultus is first mentioned on coins of Nero; probably the ref. is to the *Augusteum*, a temple built in the precinct of Artemis to Rome and Augustus by the city E. (not by the *Commune Asiæ*, see ASIA, ASIARCH) before B.C. 6 (Wood, *Appendix*, i. 1); Buchner, *de Neocoria*, p. 38, indeed considers that the reference is to a temple of Claudius, which he supposes to have been dedicated by the *Commune Asiæ*, on account of aid given to the city by the emperor, Malalas, p. 246, ed. Bonn; but there is no evidence that such a temple ever existed. The second imperial neocorate was granted under Hadrian, and the third under Caracalla. A decree of the Senate was required to grant this distinction (as Asia was a senatorial province).

‡ The phrase *τετράκις νεωκόρος* on the later coins refers to this same fact.

§ Artemis Ephesia was worshipped more widely by private persons than any other deity known to Pausanias (iv. 31. 8; cf. also Xen. *Anab.* v. 3. 4).

The early stages of the riot involve some reference to the topography of Ephesus. It is obvious that the inflammatory speech of Demetrius was delivered at a meeting of the associated trades, doubtless held in a building belonging to the guild (19^{25}). The text of the Bezan Codex explicitly states (what obviously must have occurred) that the assembled tradesmen and craftsmen then rushed out into the street (εἰς τὸ ἄμφοδον), and at last congregated in the theatre. The ruins of the theatre are on a large scale; and it has been calculated that the building could hold 24,000 people. It was situated on the western slope of Mount Pion, overlooking the city harbour (which is now a marsh).

It is an interesting and important point that the Asiarchs were friendly to St. Paul, and intervened to save him from adventuring himself in the crowd. They doubtless pointed out to him that his presence would still further enrage the excited crowd; that if the mob once proceeded to violence, they were more likely to extend their violence to his companions; and that the best course therefore was for St. Paul not to show himself at the moment. The attitude of the Asiarchs may be taken as a fair indication of the feeling entertained towards St. Paul by the educated and influential class in the city, and also of the attitude of the imperial administration, for they were officials of the province, not of the city; they were part of the Rom. imperial machinery. It is perhaps implied in Ac 19^{31} that they were present as a body or council in the city: this may be accounted for either by a festival which was in progress about the same time, or by the natural appropriateness of a provincial body or council meeting in the capital of the province. A council of the Asiarchs is probably referred to in an Apamean inscription (Ramsay, *Cities and Bishoprics of Phrygia*, ii. No. 299).

In the narrative (Ac 19^{23-41}) allusions occur to the government of E., and also of the whole province of Asia. The **Town-Clerk**, or 'Secretary of the City' (γραμματεύς), appears as an official of great authority; the assembly of the citizens (ἐκκλησία) is mentioned as the highest municipal authority; and the Roman courts (*conventus*, αἱ ἀγοραῖοι, *i.e.* ἀγοραὶ δικῶν) and proconsuls are declared to be the final judicial authority in case of any complaint against individuals. The government of the municipality of E., like that of the other great Asian cities, was lodged in the hands of two deliberative bodies, the **Senate** (βουλή) and the **Assembly** (ἐκκλησία), and of certain boards of magistrates, notably the Strategoi (στρατηγοί). All power ultimately resided in the Assembly of the citizens; and in the old free Gr. city-constitution the Assembly had really held the reins of power, and exercised the final control over all the other departments of the government. But its meetings under the Rom. system tended to become mere formalities, at which the Bills sent to it by the Senate were merely approved; for the imperial government, which had abolished the powers of the popular assembly in Rome, naturally discouraged popular assemblies in the cities of the empire; when St. Paul, however, was at E., the Assembly was still, in name at least, the supreme and final authority in the city (Ac 19^{39}), where the last decision lay on matters that did not properly fall within the cognizance of the Rom. courts and officers; and it is also regularly mentioned in the preamble to decrees, along with the Senate, as giving validity and authority to decrees which had been prepared by the Senate and submitted to it for its approval.[*] The Senate (βουλή) in the Asian cities was transformed by gradual steps from the old Gr. form of a body elected annually by the citizens, to the Rom. form of a body filled up by distinguished citizens (esp. all who had held any of the higher magistracies), retaining their seats for life. Concurrently with this change in its constitution, it encroached more and more on the powers of the Assembly. But at the same time another transforming process went on simultaneously, as the Rom. imperial authority encroached on the municipal privilege of self-administration; and in this transformation the Senate was made by slow steps a mere instrument of the Rom. imperial government.

The Secretary of the city (γραμματεὺς τῆς πόλεως, called also ὁ Ἐφεσίων γραμματεύς, or γραμματεὺς τοῦ δήμου) was perhaps the most influential individual in the city. Mr. Hicks well says that 'as the real vigour of the Assembly declined in the atmosphere of imperial rule, it was more and more left to the Secretary to arrange the business of the Assembly. Together with the Strategoi he drafted the decrees to be proposed.[†] He had the decrees engraved. He took charge of money left to the people of Ephesus.' Further, it is clear that he acted as a channel of communication between the Rom. provincial administration and the municipality (*e.g.* in the inscription, Hicks, p. 154); and thus, as the Rom. central authority encroached on the municipality, the Secretary became more and more important. These facts explain the part played by this official in Ac 19^{35-41}, an incident which throws a clear light on this obscure subject, and is in perfect accord with all that we learn about it from other sources. He came forward as the agent of the municipal government, and calmed the mob by a skilful speech; he spoke of the close relation between the city and the temple, and the sacredness of the goddess, as universally acknowledged; he mentioned, as an obvious and familiar fact, that Paul and his associates had not been guilty of acts or words disrespectful to the goddess (see CHURCHES, ROBBERS OF); he pointed out that there was an established method of legal procedure, whereby they should seek redress for any injury of which they complained, but that persistence in their riotous conduct was criminal, and likely to call down severe punishment; and then he dismissed the assembly. His recognition of the meeting as an ἐκκλησία was important: he did so in order to shield it, so far as he could, from Roman censure.

The Secretary advised the concourse to disperse, and wait until the lawful Ecclesia (so AV, regular assembly RV) should meet, and settle anything further which they wished to bring before it. The old Gr. distinction between regular ordinary meetings on days agreed beforehand (νόμιμοι ἐκκλησίαι, Hicks, No. 481, l. 340) and extraordinary meetings, specially summoned, had been modified by the Rom. government in such a way that permission of the Rom. officials was required before a meeting of the Ecclesia could be legally held; and from this it resulted that no extraordinary Assembly could be summoned except by the Rom. officials themselves, who had the right to call the people together at any time.[‡] Hence this suddenly convened meeting was not legal, and could not carry any business through; and, moreover, it might provoke inquiry from the Romans (who were always jealous of the right of free meeting), and even result in punishment (such as the prohibition for a time of all right of holding the Ecclesia); for, as the Secretary pointed out, the city could not justify it by pleading any cause for it.

In the city of E., then, there were three distinct powers, which were brought into contact or conflict in the 1st and 2nd cent.: the hierarchy of the temple, the government of the city, and the new religion preached by St. Paul. At first it is clear that there was no opposition on the part of the municipal government to Christianity. The Secretary of the city speaks for the government, and points out that the Christians have not been guilty of disrespect in act or word towards the established system, while the rioters have brought the city into danger of reprimand and punishment from the imperial rule. The whole tone is one of superiority to, and almost of contempt for, the superstitious vulgar, together with recognition of the right of St. Paul to preach, so long as he showed proper respect to the laws and institutions of the city. A convinced Christian, who was at the same time a man of affairs, could not have taken a line that was better calculated to put St. Paul in the right and the rioters in the wrong; and we shall probably not err in believing that the general tone of the educated officials and the priests of high rank at this time was one of perfect equanimity and general philosophic interest in the preaching of St. Paul, whereas the superstitious and vulgar mob were strongly opposed to him. This state of opinion lasted till near the end of the 1st century. But the violent feelings roused during the persecution of Domitian, combined with the realization on the part of the officials and the higher priesthood that the growing power of Christianity threatened the existing order of things, and would, if successful, sweep it away, led to a union among all the classes which were not opposed to the existing order, *i.e.* among all who were not Christians. We may confidently assume, also, that at first Christianity spread with great rapidity, and produced a neglect of the Eph. ritual similar to that which Pliny describes as having existed in Bithynia, until the measures carried out by him in A.D. 112 caused a revival of the pagan worship (*Epist. ad Trajan.* 95). A similar revival of paganism in E. about the same period is attested by ancient documents, as Canon Hicks was the first to recognize clearly. A great inscription, dating A.D. 104 (Hicks, No. 481, p. 135), contains a series of decrees honouring C. Vibius Salutaris, a Rom. citizen resident in E., who had presented to the goddess and the city government a number of statues, images, and moneys, and arranging for the acceptance and use of the gifts and for the institution of a new festival and procession which should unite and bind more closely together the sanctuary and the city of Artemis. From this time onwards the city began to boast more than before of its title of 'temple-guardian of Artemis' (νεωκόρος Ἀρτέμιδος); and the imperial government also allied itself with the religion of Artemis, for under Hadrian imperial silver coins bear the type and legend of DIANA EPHESIA, showing that the vindication of the goddess was accepted as a duty by the emperor as Pontifex Maximus (for Rom. coins could not bear the effigy and title of any but a Rom. deity). This agreement of the imperial government, the municipal authorities, the temple-hierarchy, and the superstitious mob of the city, lasted unbroken until Christianity triumphed. It is true that the text of a decree, passed by the Senate and Assembly of E. in A.D. 161, is commonly quoted 'as an involuntary confession of the decline of the Artemis-worship under the growing influence of the new faith,' and as an indication that the reaction visible in A.D. 104 had ceased. The text (Hicks, No. 482, p. 145), according to the usually accepted interpretation, states that 'the Eph. goddess, whose worship had hitherto been universally recognized, was now being dishonoured, not only in her own city (ἐν τῇ ἑαυτῆς πατρίδι ἀτιμᾶται), but also among Greeks and barbarians.' But, as has been urged in *Classical Rev.* 1893, p. 100, it is impossible to accept the idea that a decree in honour of the goddess had such an ill-omened introduction (for to ancient feeling it was profane and impious and dangerous to use such words); and probably there has been a slight error of the engraver, who wrote δι once instead of twice, thus reversing the meaning; the true text, then, states that Artemis is honoured in her own city and everywhere (πατρίδι διατιμᾶται).*

---

[*] Perhaps an example of these *Ephesia Grammata* occurs on a coin of the imperial time, as Mr. Head suggests in his *Cat. Brit. Mus.* (*Ionia*), p. 70.

[†] At E. the guilds of the Woolworkers (λανάριοι), the Surveyors (προμέτραι), and the Workmen before the Gate (ἐργάται προπυλεῖται πρὸς τῷ Ποσειδῶνι) are mentioned in inscriptions. A list of trade-guilds in the Asian cities is given by Oehler in *Eranos Vindobonensis*, p. 276 f.; cf. Liebenam, *Römisches Vereinswesen*, p. 157.

[*] It is best described by M. Lévy, *Revue des Études Grecques*, 1895, p. 203 ff.

[†] This implies that he sat on the board of the Strategoi as an assessor (or perhaps as a chairman).

[‡] Lévy in *Revue des Études Grecques*, 1895, p 216.

The temple of Artemis at E. was one of the greatest and most famous architectural works known to the ancient world. The building which existed when St. Paul lived in E. was not the oldest temple. An earlier temple, containing columns dedicated by Crœsus, king of Lydia, B.C. 560–539 (fragments of which are now exhibited in the Brit. Mus. containing parts of the king's dedicatory inscriptions—Hicks, p. 173, No. 518), but not finally completed until about B.C. 400, was burnt to the ground in B.C. 356, on the same night that Alexander the Great was born; and a vast temple, measuring, according to Pliny, 425 ft. by 220,* was built in its place with the help of contributions from the whole of Asia (*tota Asia exstruente*, Pliny, *Nat. Hist.* xvi. 40, 213; cf. Hicks, p. 174)—a fact which attests the veneration paid to the goddess by the whole province (Ac 19^{27}, see also *CIG*, No. 2954, and Hicks, p. 144, No. 482, on the reading of which see above). Owing to the marshy soil on which it stood, it required much care and contrivance to lay the foundations firmly (Pliny, *Nat. Hist.* xxxvi. 95). Possibly, the impressiveness of this great temple suggested to St. Paul the allegory in 1 Co 3$^{10-17}$ (written from E.), and gave point to his words addressed to the Ephesians (2$^{20-22}$); but it is unnecessary to suppose that on each occasion, when he refers to the ideas of foundation or building, as in 1 Ti 3^{15} 6^{19}, 2 Ti 2$^{19-20}$, Ac 20^{32}, he was thinking of this temple. The site of this temple was discovered by Mr. J. T. Wood in 1870, after many years' patient and laborious search; but, unfortunately, he has given no sufficient indications as to what remains of the building he found actually *in situ*, and has left no plan of the site as it was when he uncovered it. He merely gives his own restorations, and his own theories as to what the temple must have been when it was perfect; but his knowledge of Gr. architecture was not so thorough as to make his views trustworthy; and it is hardly possible now to acquire sufficient knowledge of the facts to form a clear conception of the building. Officials called νεωποῖαι or νεοποιοί were charged 'to take care of the fabric and repairs of the temple, and to superintend any additions such as the setting up of inscriptions' (Hicks, p. 80).

There can be no doubt that the Temple of Ephesian Artemis was used as a place of deposit for treasure both by the city and by private individuals (as, *e.g.*, by Xenophon, *Anab.* v. 3. 4). This function strengthened the bonds that united the city and the temple. It is uncertain how the treasure deposited in the temple by the city was managed, but, as Canon Hicks says (p. 82), 'it is remarkable how little is said in the Ephesian inscriptions about any financial officers.' The temple and its precinct were inviolable: no arms might be borne within the sacred precinct (implying that in primitive times, when arms were commonly carried, the goddess provided that her worship should be a peaceful influence). The Rom. government, in A.D. 22, recognized the right of asylum that belonged to the soil of Artemis (Tacit. *Ann.* iii. 63); but the local limits of asylum varied widely at different periods.

The twelve disciples of the baptism of John whom St. Paul found at E. (Ac 19^{3}) had possibly been converted by Apollos during his recent visit; though it is more probable that a small sect of Jews had emigrated to E., as a great centre of commerce and intercourse, soon after the coming of St. John. St. Paul, on his first brief visit, seems to have found the Jews in E. very well disposed towards the new teaching; and, though a rupture between him and them is recorded (Ac 19^{9}), it is hardly described in such terms as to suggest that it was so serious as those that occurred in Corinth or Thessalonica. The existence of a Jewish colony at E. in B.C. 44 is vouched for by Jos. *Ant.* XIV. x. 12 (cf. XIV. x. 25, XVI. vi. 2 and 7), when Dolabella granted them religious freedom (esp. from engagements inconsistent with proper observance of the Sabbath) and exemption from military service. When Augustus afterwards confirmed the privileges of the Asian Jews, esp. guaranteeing them safe-conduct for transmission of their offerings to Jerus., he doubtless had E. prominent in his mind (Jos. *Ant.* XVI. vi. 2, cf. Ac. 2^{9} 6^{9}). Jewish inscriptions at Eph. are published, Hicks, Nos. 676, 677. Some of these Jews appear to have made a practice of exorcism and magic, Ac 19$^{14-16}$, like Bar-jesus at Paphos, Ac 13^{6} (see SCEVA). Similar practices were engaged in by the Jewish settlers at Thyatira (wh. see).

---

* In his *addenda*, Canon Hicks also is disposed to recognize an engraver's blunder.

* According to Mr. Wood's measurements the temple itself measured 343 ft. by 164, and the stylobate or basement 418 ft. by 239.

When St. Paul broke with the Jews, he passed forth beyond the narrower circle which had come within the influence of the synagogue, and addressed the entire Eph. population. He was understood by the Ephesians to be the teacher of a new school of philosophy; and, agreeably to this view, he lectured daily in the school of Tyrannus (wh. see), just as other philosophers gave public lectures. In the Bezan Text there is added the statement that he taught from the 5th to the 10th hour. It is probable that this is correct, showing that St. Paul employed the hours when the building would no longer be in use; for the business in the Asian cities seems to have ended at the 5th hour (one hour before midday).[*] We may, then, picture Paul's life in Eph. as spent thus: he wrought 'night and day' with his hands, *i.e.* he started his craft before sunrise and continued at work through the earlier hours of the day (Ac 20^{34}, 1 Co 4^{12},[†] 1 Th 2^{9}); then, after the ordinary day's work was finished, he began to teach publicly in this building, and expounded his philosophy to all comers freely. These public lectures were, as we might naturally expect, supplemented by teaching in private houses (Ac 20^{20}).

The name *St. Paul's Prison*, which is applied to a Gr. tower forming part of the line of fortification along the ridge of Coressus, near its W. end, is purely fanciful. There is no record that St. Paul was imprisoned in E.; and, if he had been imprisoned, this tower is not the kind of place where he would have been immured. 'It is a two-storeyed fort with eight chambers, and the upper storey is reached by an external staircase' (Wilson, *Handbook*, p. 99). There are some important Christian remains in the city, notably the double church near the gymnasium adjoining the theatre. This church is older than the great Basilica of St. John the Evangelist on the hill at Ayo-Solúk; and may well be the very church where the Council was held in A.D. 431.[‡] On the E. side of Mount Pion, overhanging the road that leads from the temple of Diana to the Magnesian Gate of the city, is a rock-hewn church, close to a cave in which the 'Seven Sleepers of E.' were, according to the legend, saved from the Rom. persecution by a slumber of some centuries' duration.

The actual foundation of a Christian community in E. may be ascribed to Priscilla and Aquila (wh. see), whom St. Paul left there at his first hurried visit (Ac 18^{19}), and whom he found there on his return.

LITERATURE.—The vast mass of lit. about E. is to a great extent antiquated by recent works. The inscriptions, with the commentaries of Boeckh and Hicks, must form the foundation of all methodical study. On the topography, see esp. Weber, *Guide du Voyageur à Ephèse*, Smyrne, 1891 (excellent maps); also Sir C. Wilson, *Handbook to Asia Minor*, etc. (Murray) 1895: on the antiquities, Hicks, *Gr. Inscrip. of the Brit. Mus.* iii. p. 67 ff.; Menadier, *Qua condicione Ephesii usi sint*; Zimmermann, *Eph. im erst. christl. Jahrh.*; Lévy, in *Revue des Études Grecques*, 1895, p. 203 f., and subsequent artt., gives a careful and admirable study of the constitution of the Asian cities; and Ramsay, *Cities and Bishoprics of Phrygia*, ch. ii., gives a brief sketch of the same subject. Guhl's *Ephesiaca* is not wholly antiquated, and Falkener's *E. and the Temple of Diana* contains some things to reward study. Wood's *Discoveries at E.* is almost purely a popular book (except for the appendix of inscriptions, most of which are republished by Hicks, *l.c.*); and the scientific account of his discoveries, which doubtless he contemplated, was never published. The sketch of the history, esp. the early history, given by E. Curtius in 'Beiträge z. Ges. u. Topog. Kleinasiens' in *Abhandl. Akad.* Berlin, 1872 (repub. in his *Gesam. Abhandl.* i. 233–265), is singularly charming and instructive. Lightfoot's 'Discoveries illustrating the Acts of the Apostles' in *Contemp. Rev.* May 1878 (repub. as app. to his *Essays on Supernat. Rel.* p. 291 ff.), is useful: see also Ramsay, *Church in Rom. Emp.* pp. 112–156, and *St. Paul the Traveller*, pp. 267–282. On the coinage, see Head's excellent *Hist. of the Coinage of E.* (which unfortunately ends with the Christian era, but may be completed from his 'Catalogue of the Gr. Coins in the Brit. Mus.' *Ionia*, pp. 70-115. On the great highway between E. and the East see G. Hirschfeld, 'Kelainai-Apameia-Kibotos,' in *Abhandl. Akad.*, Berlin, 1875; Ramsay, *Hist. Geog. of As. Min.* pp. 35–51. On the supposed 'tomb of St. Luke,' see Weber, Rylands, and Falkener, in *Trans. Soc. Bib. Arch.* vii. 1881, and Simpson, *ibid.* vi. p. 323.

W. M. RAMSAY.

EPHLAL (אֶפְלָל).—A descendant of Judah (1 Ch 2^{37}). See GENEALOGY.

EPHOD (אֵפוֹד, אֵפֹד; ἐπωμίς Ex, Lv, but ἐφώδ, ἐφούδ, Jg and 1 S).—In treating of this term, which is apparently used in different meanings, it will be convenient to consider first the passages in which there is least doubt about the signification of the word.

1. The 'ephod' was a priestly garment made of white linen (בַּד), and attached to the body by a girdle (חֲגוֹר). An ephod such as this was worn by Samuel as a temple-servant (1 S 2^{18}), by the 85 priests belonging to the sanctuary at Nob, who were slain by Doeg (1 S 22^{18}), and by David when he danced before the ark (2 S 6^{14b}; cf. 1 Ch 15^{27b}). The nature of this priestly garment is not further described; but it may be assumed to have been a simpler form of the more ornate garment of the same name described in P (Ex $28^{6-8.\ 27f.}$ 29^{5} $39^{2-5.\ 19f.}$, Lv 8^{7}) among the vestments peculiar to the High Priest. This more ornate 'ephod' was, in a word, an ornamental kind of *waistcoat*. It consisted of an oblong piece of richly variegated material (blue, purple, scarlet, and fine twined linen, interwoven with gold thread, the 'work of the designer'), bound round the body under the arms, and reaching down as far (apparently) as the waist. The ephod was supported by two 'shoulder-pieces,' *i.e.* two flaps or straps attached to it behind, and passing over the shoulders to the front, where they were again fastened to the ephod: on the top of each of these shoulder-pieces was an onyx-stone, engraven with the names of six of the tribes of Israel. Round the body, the ephod was further held in its place by a band (חֵשֶׁב הָאֵפֹד, *i.e.* prob. the 'ingenious work of the ephod'[*]), of the same material as the ephod, and woven in one piece with it, by which it was 'girt' (Lv 8^{7}) round the waist. The ephod was worn over a blue frock, woven entirely of blue, and put on by being drawn over the head, something in the manner of a cassock (but without arms), called the 'robe (מְעִיל) of the ephod.' The skirt of this robe was adorned with a border of pomegranates in colours, with golden bells between them, the sound of which was to be heard whenever the High Priest was ministering in the Holy Place (Ex 28^{31-35}). On the front of the ephod was fastened the jewelled BREAST-PLATE, containing the pocket or pouch in which were put the Urim and Thummim, or sacred lots (Ex $28^{16.\ 29f.}$, Lv 8^{8}).[†]

2. There is, however, a second group of passages in which 'ephod' has been supposed to denote, not a priestly garment, but some kind of idol or image. a. In Jg $8^{26f.}$ Gideon is said to have made an 'ephod' of the gold rings[‡] taken from the Ishmaelites and Midianites, which he 'set'—or 'stood' (וַיַּצֵּג, implying location somewhat more definitely than וַיָּשֶׂם; see Gn 30^{38} 43^{9}, and of the

---

[*] See illustrations collected *Expositor*, March 1892, p. 223; *St. Paul the Traveller*, p. 271.

[†] This Epistle was written from Ephesus.

[‡] The Council was held *in E.* (not outside the city) ἐν τῇ ἁγιωτάτῃ ἐκκλησίᾳ τῇ καλουμένῃ Μαρίᾳ, as is stated in the *Acta*.

[*] According to others, 'the *band* of the ephod,' חֵשֶׁב being supposed to be transposed from חֵבֶשׁ. The verb חָבַשׁ is, however (in connexion with dress), used only of binding on head-gear.

[†] It is possible that the ephod was of Egyptian origin. At least V. Ancessi (*Annales de philos. chrétienne*, 1872, pp. 45, 47) gives illustrations from Lepsius, *Denkmäler*, iii. plates 224*a*, *d*, 274*b* (cf. 222*h*), of divine and royal personages having similarly a richly decorated garment round the body, supported by two shoulder-straps, fastened at the top by a gem, and secured round the waist by a girdle.

[‡] 'It' in v. ^{27a} refers naturally only to the 'gold' of v. ^{26a}: the crescents, etc., of v. ^{26b} do not seem to be included.

ark, 1 S 5^2, 2 S 6^{17})—in Ophrah. That this was an object of idolatrous worship seems plain from the comment of the later historian (v.^{27}), who states that 'all Israel *went a whoring* after it,' and that 'it became a snare to Gideon and to his house.' The amount of gold spent upon this ephod (1700 shekels = about 75 lbs. troy, which would be worth now some £3600) points also to something more than an ornamental vestment for a priest: indeed the ephod appears to be the chief object in the sanctuary.* **b.** In other passages also the ephod figures as part of the regular equipment of a sanctuary. In Jg $17^{4f.}$ $18^{14.\,17.\,18.\,20}$, Micah provides for his private shrine in Ephraim a graven and molten image (*peṣel* and *maṣṣēkhāh*),† and an *ephod* and teraphim; and in Hos 3^4 the prophet speaks of a time when Israel should be left 'without king and prince, without sacrifice and pillar (*maẓẓēbāh*), and without *ephod* and teraphim.' The juxtaposition of ephod and teraphim in these passages is noticeable. The latter were idols (Gn 31^{19}, cf. v.^{30}), apparently of human form (1 S $19^{13\text{-}16}$), and were used in divination (Ezk $21^{21\,(26)}$, Zec 10^2; cf. Hab 2^{19}): hence it is reasonable to conclude that the ephod was in some way associated with the teraphim in divination. It does not, however, follow that it was any kind of image: rather, as the teraphim were idols, the ephod will have been something different. **c.** In 1 S 21^9 [Heb.^{10}] the sword of Goliath was preserved at Nob as a trophy, wrapped in a mantle 'behind the ephod,' which therefore would seem to have been something having a fixed place by the wall, but standing free from it. **d.** In the Books of Samuel, the ephod is several times mentioned as a means of ascertaining the will of J″; the verb used in connexion with it, when thus employed, is—not 'put on,' but—'bring near' (הַגִּישׁ 1 S 14^{18} LXX,‡ 23^9 $30^{7.\,7}$): the priest (whose privilege it is to possess it) is said to 'carry' or 'bear' it (נָשָׂא 1 S 2^{28} $14^{3.\,18}$ LXX,§—not 'wear'); and Abiathar brings it down with him 'in his hand' to David in Ḳe'ila (1 S 23^6). These passages seem to imply that the 'ephod' was something moved about or carried, rather than something worn as a garment. **e.** The derivative אֲפֻדָּה—the same word which is used in connexion with the high priest's ephod in the phrase (Ex 28^8 39^5) 'the band of its *attachment*'—is used actually of some part of the metal plating of an idol in Is 30^{22} 'the silver overlaying (צִפּוּי) of thy graven images, and the gold *attachment*, or *casing* (אֲפֻדָּה), of thy molten images.' On the strength of these passages, Wellhausen (*Hist.* 130 n.), summarizing the conclusions of Vatke (*Bibl. Theol.* 1835, pp. 267, 269), writes, 'Outside the Priestly Code, *ephod* is the image, *ephod bad* the priestly garment'—the term, when used in the latter sense, being thus distinguished by the addition of 'linen' (Stade, Kautzsch, Smend, Nowack, Benzinger).

The places in which *ephod bad* occurs are 1 S 2^{18} 22^{18}, 2 S 6^{14}; so that, taken strictly, the passages in which *ephod* denotes, upon this view, an image would be Jg 8. 17 f., 1 S 2^{28} 14^3 21^9 $23^{6.\,9}$ 30^7, Hos 3^4 (to which 1 S 14^{18} LXX must naturally be added); though Vatke excludes 1 S 14^3, and Smend, Kittel, and Budde ('perhaps') exclude 1 S 2^{28} ('to bear the ephod *before me*'). It may, however, be doubted whether, the connexion being so similar (esp. in the Sam. passages,—though 1 S 2^{28} is, no doubt, later than the rest), the term must not be understood throughout in the same sense.

The explanation of the passages quoted is possible, but not certain. (1) The difficulty that the same term should be used to denote both a priestly vestment and an image is not insuperable. The 'ephod' was essentially a *casing* round the body; and hence the same word might well have denoted the casing of precious metal, which (as was usual in ancient images) was spread over a wooden core (cf. Is 40^{19}); the derivative אֲפֻדָּה appears actually to be used in this sense in Is 30^{22} (quoted above): and a term denoting properly the decorated casing of an image, might easily have come gradually to be used for the entire figure. (2) It is true, נָשָׂא (to *carry* or *bear*) is not elsewhere used of garments, but only of shields, weapons, burdens, etc.: if, however, at the time to which Jg 17 f. and 1 S refer, the ephod worn by the principal priest at a sanctuary was in any sense a prototype of the later high priest's ephod, and had a pouch containing the sacred lots (cf. 1 S $14^{41f.}$, esp. v.^{41} LXX [Urim and Thummim],—provided, at least, as seems a natural inference from what is stated on other similar occasions, and from v.^{18} LXX$^{19.\,36f.}$, the ephod may be presumed to have been used in Saul's inquiry,—and 28^6), it might be fairly described as 'carried' or 'borne,' and mentioned (in Jg 17 f., Hos 3, for instance) as a prominent and essential part of the priest's dress, without which the oracle could not be consulted. It is, however, strange that the same term נָשָׂא should be used also of the *linen* ephods of the priests at Nob.* (3) In 1 S 21^9, as also in $14^{3.\,18}$ LXX, $23^{6.\,9}$ 30^7, the term does seem to denote something different from what it does in 22^{18}: in 21^9 the 'ephod' is spoken of in terms implying that there was but one at a sanctuary (here Nob);† and $14^{3.\,18}$ (LXX) mention one as being, apparently κατ' ἐξοχήν, in the possession of the principal priest in Israel; whereas 85 priests, belonging to the same sanctuary as the one named in 21^9, are said in 22^{18} to have borne linen ephods. The single ephod may, of course, have been the more elaborate ephod of the high priest (though this would hardly suit well in 21^9); but for those who doubt whether the high priest's dress had yet acquired the ornate character described in P, the way is open for the inference that it was an oracular image.

On the whole, we can hardly be said to possess the *data* for deciding this controverted question with confidence. There is, however, a decided probability that, at least in Jg 8^{27}, the term 'ephod' is used of the gold casing of an oracular image. And if it has this meaning (in addition to that of a priestly linen waistcoat) in one passage, the presumption against its having the same second meaning in other passages is lessened, though, naturally, it is not proved that it has it actually.

The opinion that אֵפוֹד denotes a plated image is adopted by Ges. (for Jg 8. 17 f., Hos 3); Studer, *Comm. on Jud.* (for Jg 8 only); Stade, *Gesch.* 466 (for Jg 8. 17, 1 S 21^9; with regard to the 'ephod' in which the sacred lots were kept, he merely says, p. 471 bottom, that it is disputed whether it was an image, or the priestly vestment); cf. (for Jg 8) Ewald, *Alt.*^{3} 298 n.: generally for these and the other passages named (sometimes with the exception of 1 S 2^{28}) by Vatke, *l.c.* (except 1 S 14^3), Wellh. *l.c.*; Reuss, *Gesch. d. Heil. Schr. AT.s*^{1}, §§ 102, 139;

---

* It is argued (*e.g.* by Berth. *ad loc.*) that the money may have been used for defraying the entire cost of establishing the sanctuary; but the expression is distinctly 'made into an ephod'; and *set* (or *stood*) is hardly applicable to a movable priestly garment.

† In reality, it may be, only a *peṣel*: see $18^{30.\,31}$, and cf. Moore, *Judges*, p. 375 f.

‡ 'Bring hither the ephod. For he bare the ephod at that time before Israel.'

§ Read also by Klost. in 1 K 2^{26} ('ephod' for ארון 'ark'). The same verb is used in 1 S 22^{18} of the 'linen' ephod.

* Smend, Nowack, and Benzinger explain the identity of name by the conjecture that originally the body of the image was dressed in an 'ephod' of linen, which was afterwards replaced by one of precious metal, while the ephod of linen became the priest's garment, and think consistently that '*bear* the linen ephod' in 1 S 22^{18} is a survival from the time in which the expression was applied, as they consider it still is in 1 S $14^{3.\,18}$ LXX, to carrying the oracular image. LXX omits 'linen' in 1 S 22^{18}; but this does not seem to be right: as said above (No 3), the ephod of 22^{18} appears (upon grounds independent of the word 'linen') to have denoted something different from the ephod of $14^{3.\,18}$ LXX, $23^{6.\,9}$ 30^7.

† Whether this was the same ephod as that which was brought afterwards from Nob by Abiathar to David ($23^{6.\,9}$ 30^7), is uncertain; for in 23^6 both MT and LXX have '*an* ephod' (not '*the* ephod').

Kuenen, *Hibb. Lect.* 82 ('probably'); Kautzsch in Herzog's *PRE*^{2}, xvi. (1885), 229; Budde, *Richt. u. Sam.* 115 f.; Kittel, *Gesch.* ii. 174 n.; Smend, *AT Rel.-Gesch.* 41; Nowack, *Arch.* ii. 21 f.; Benzinger, *Arch.* 382; cf. W. R. Smith, *OTJC*^{2}, 241; G. A. Smith, *The XII Proph.* 23, 38; Dillm. *AT Theol.* 136, 153. See further Moore, *Judges*, 232, 379, 381, who adopts the same view without hesitation for Jg 8, and seems to prefer it for some of the other passages, but allows that they do not 'imperatively' require it, and that 'all that can with certainty be gathered from them is that the ephod was a portable object which was employed or manipulated by the priest in consulting the oracle' (p. 379). It has been opposed by Thenius on 1 S 21^{10}; Bertheau, *Richter*^{2}, 164; Nowack on Hos 3^4 (in his *Comm.* of 1880); Riehm, *HWB, s.v.*; and especially by König, *Hauptprobleme*, 59-63 (who does not, however, appear to maintain more than that the view is not 'undoubtedly' correct).

The etymology of אֵפוֹד is too uncertain to throw light on the meaning of the word. The Heb. verb אפד (Ex 29^5, Lv 8^7) seems to be a denominative. Lagarde (*Bildung der Nom.* 178; *Mittheil.* iv. 17) derived אֵפוֹד from the root preserved in the Arab. *wafada, to come as an envoy* (to a ruler, etc.), supposing that *ephod*='approach' was abbreviated for '(garment of) approach (*sc.* to God),' and comparing Syr. *pedthā* (which would be another derivative of the same root), a long robe (oft. in Pesh. for אֵפוֹד). But this etymology, though ingenious, cannot claim to be more than a conjecture. In usage, the word was probably felt to denote something *closely surrounding* or *encasing*.

S. R. DRIVER.

EPHOD (אֵפֹד).—Father of Hanniel, Manasseh's representative for dividing the land (Nu 34^{23} P).

EPHPHATHA.—The word spoken by our Lord (acc. to St. Mark, 7^{34}) to a deaf and dumb man brought to Him on His return through Decapolis to the Sea of Galilee. It is the Ithpeel (or Ethpa'al) imperat. of an Aram. verb meaning 'to open'—the ת of the prefix being assimilated to the foll. consonant; but as respects philological details the specialists are not agreed (see Dalman, *Gram. des jüdisch-paläst. Aramäisch*, p. 222 n.). The evangelist interprets it in Greek by the 2 pers. sing. 1 aor. pass. impv. 'Be (thou) opened.' The word was used in the Western rites of baptism (cf. Ambr. *de Myst.* 3).

J. H. THAYER.

EPHRAIM (אֶפְרַיִם).—The name of a patriarch and tribe in Israel. E. was the second son of Joseph and Asenath, the daughter of Potiphera, priest of On, and was born in Egypt (Gn $41^{50ff.}$). He was adopted, along with his elder brother Manasseh, by Jacob, who thus gave his favourite son Joseph two tribes among his descendants. At the ceremony of adoption (Gn $48^{13ff.}$) Jacob, in spite of Joseph's resistance, reversed the order of birth, gave E. the precedence over Manasseh, and prophesied that the younger should be the greater. In Jacob's testament (Gn 49) E. and M. are included under the name of Joseph, their future fortunes being conjoined. The tribe of E. is said (Nu 1^{33}) to have, at the Exodus, contributed 40,500 men to the army of Israel, a number reduced, presumably by war and privations, to 32,500 at the close of the wanderings in the desert (Nu 26^{37}). The value of these figures may be estimated by the fact that during the same period the warriors of Manasseh increased from 32,200 to 52,700 (Nu 1^{35} 26^{34}).

Apart from this, however, there is sufficient evidence to show that, in the earliest period of Isr. history in Canaan, the tribe of Joseph, or of Rachel, was still undivided. It embraced not only E. and M., but Benjamin; and therefore we find Shimei the Benjamite regarding himself as a member of the house of Joseph (2 S 19^{20}). After Benjamin constituted a separate tribe, E. and M. still remained undistinguished for a considerable time; they formed together the house of Joseph in the more general sense; and this can alone explain their union for administrative purposes under Solomon (1 K 11^{28}). To what precise period we should assign the subdivision of Joseph it is impossible to discover. All we can say is that it would naturally result from the ever-increasing extent of territory occupied by the tribe, and the emergence of different and conflicting interests in the separate regions of it.

E., like the other tribes of Israel (see ALLIANCE), was far from owing its territory entirely to force of arms (see TRIBE). Can. elements are found in its midst at a comparatively late date (Jos 16^{10}), and Jg 5^{14}, though very corrupt, may imply that the population was composed to some extent of Amalekites. The earliest settlement was in Mt. Ephraim, which was densely wooded. Hence when a complaint was made to Joshua that the territory assigned was too small for the tribe, he advised them to make clearances, and thus make good the defect (Jos 17^{14-18}). From this point E. extended northwards over the wooded hill-country of Samaria to the borders of the plain of Jezreel. The boundary between E. and Manasseh is stated to have been the brook Kanah (Jos 16^8), but this line of demarcation was not strictly observed. The S. limit was fixed at the two fortresses of Upper and Nether Beth-horon, on the borders of Benjamin. To the W. of these lay the territory of the Can. town of Gezer, received by Solomon on his marriage with the daughter of Pharaoh (1 K 9^{15-17}).

The Ephraimites were the most powerful tribe in Israel, and their ambition and sense of superiority are continually in evidence in the history. Their later characteristics and conduct are foreshadowed in the Bk. of Jg. Here we find them attacking Gideon for going to war with the Midianites without summoning them to his aid; their resentment is allayed only with the greatest difficulty (Jg 8^{1-3}). In the same way they complain against Jephthah, and on this occasion they actually come to blows with their kinsmen, with the most disastrous consequences to themselves (Jg 12^{1-6}). But they not only aspire to leadership in war. Shiloh, the seat of the 'house of God' until the destruction of this sanctuary by the Philistines, is within their borders. Samuel still further adds to the prestige of the tribe from whose midst it was only natural that the kingmaker should arise, thus realizing the idea of monarchy in the land, if not among the people, of Jerubbaal and Abimelech. After Saul's death E. set up Ishbosheth, and instigated, or at least joined in, the opposition to David and the tribe of Judah (2 S 2^9); but after the assassination of their prince they yielded to the force of circumstances, and gave in their adherence to David. The traditional jealousy of Judah was not, however, allayed. It can hardly be doubted that this had much to do with the initial success of Absalom's revolt, and it found expression after the failure of the conspiracy in a formal complaint (2 S 19^{40-43}). The succession of Rehoboam to the throne furnished a favourable opportunity for a final attempt at obtaining independence. The first intimation of the meditated secession is stated to have come from Shiloh, the ancient headquarters of the priesthood and of the first kingmaker. The revolt was precipitated by the tyranny of Solomon and Rehoboam, and was consummated under the leadership of Jeroboam, who became the first ruler of the N. kingdom. From that date E. and Judah were irrevocably divided, and the history of the former tribe is merged in that of Israel. The capital, whether Shechem, Tirzah, or Samaria, was always situated in E., and the name of that tribe was constantly applied, especially by the prophets, to the whole kingdom. See ISRAEL.

Mount Ephraim occurs repeatedly in AV (Jos 17^{15} 19^{50} 20^7, Jg 2^9 3^{27} etc., 32 times in all) as tr. of הַר אֶפְרַיִם, which RV more correctly tr. 'the hill country of Ephraim.' It designates the mountainous ridge in Central Palestine, stretching N. to S. from the Great Plain to the neighbourhood of Jerusalem, occupied by West Manasseh, Ephraim, and Benjamin. It had fruitful land on both slopes, especially the western (see Moore on Jg 3^{27}, Dillm. on Jos 16^{1}, and G. A. Smith, *HGHL* 325, 338).

LITERATURE.—Moore, *Judges*, 152, 205, 314 ff.; Budde, *Richt. u. Sam.* (*passim*); Kittel, *Hist. of Heb.* (see Index).

J. MILLAR.

EPHRAIM (’Εφραίμ).—A town not mentioned in the Synoptic Gospels, nor in any other part of the NT except Jn 11^{54}. In that passage we are told that, in consequence of the plots formed by the rulers of the Jews after the raising of Lazarus, Jesus went from the neighbourhood of Jerus. and Bethany ‘into the country near to the wilderness, into a city called Ephraim, and there he tarried with his disciples.’ The ‘wilderness’ (ἡ ἔρημος) apparently means the grassy mountain lands near Jerus.; and Josephus (*Wars*, IV. ix. 9) mentions a small fort named Ephraim in the mountain district north of Judæa, which he couples with Bethel. In 2 Ch 13^{19} we have Ephrain (עפרין) instead of **Ephron** (עֶפְרוֹן) suggested in the *Ḳerê* and RVm as the correct name of one of the towns taken by Abijah; and in this verse we again find it coupled with Bethel, if the suggestion be adopted. Lightfoot remarks that, whether the *Ḳerê* be the right reading or not, it shows that such a place existed just in the region where from St. John's account we should expect it to be. Robinson suggests that it is the same as **Ophrah** mentioned in 1 S 13^{17}, and enumerated by Joshua among the cities of Benjamin (Jos 18^{23}). He identifies it with a village now called et-Ṭaiyibeh, situated on a conspicuous conical hill commanding a view over the valley of the Jordan and the Dead Sea (Robinson, i. 444). This site is a very probable one; it is 4 miles N.E. of Bethel, with which Ephraim is coupled both in 2 Ch and by Josephus; and it is about 14 miles from Jerusalem.

Ewald identifies it with the Ephraim in the neighbourhood of which Absalom's sheep farm was situated (2 S 13^{23}); but the Ephraim there referred to is differently spelled, beginning with א, whereas Ephraim of Benjamin begins with ע. If Ewald is right in accepting as genuine the words which the LXX puts in the watchman's mouth in 2 S 13^{34}, and in interpreting them as referring to Beth-horon, this would in reality put a further difficulty in the way of the identification which he proposes; for this would indicate a site N.W. of Jerus., whereas et-Ṭaiyibeh lies N.E. of the capital, and the neighbourhood of Bethel seems to show that Ephraim of Benjamin must have been in the same locality. Jerome describes it as being ‘In tribu Juda, villa prægrandis, Ephræa nomine, contra septentrionem in vicesimo ab Ælia milliario.’

LITERATURE.—Robinson, *BRP* i. 444–447; Guérin, *Judée*, iii. 45–51; Ewald, *HI*, Eng. tr. iii. 172; Schürer, *HJP* I. i. 246; *PEFSt*, 1886, p. 57; Andrews, *Life of Our Lord*, 409–411; Smith, *HGHL* 352; Driver, *Sam.* 233. J. H. KENNEDY.

EPHRAIM, FOREST OF (יַעַר אֶפְרַיִם).—The scene of the battle between the forces of David and the followers of Absalom (2 S 18^{6}). As ‘the city’ (18^{3}) out of which David was to succour Joab, if needed, was Mahanaim (17^{27}), the battle must have been fought on the other side of a plain from that city (18^{23}). Though the site of Mahanaim has not been certainly determined, it must have been in Gilead (see MAHANAIM). The most probable site is *Mukhnah* on the eastern side of the circular plain ‘El-Bukeia.’ Instead of ’Εφράιμ of LXX, Luc. has Μαάιναν = מַחֲנַיִם. This is accepted by Klosterm., and Budde (in Haupt's *OT*) remarks that Mahanaim ‘would be good, but is perhaps a guess.’ אֶפְרַיִם is ‘unquestionably wrong’ and could well be dispensed with, but can hardly have originated ‘out of nothing.’ It has been suggested that the ‘F. of E.’ got its name from the battle recorded Jg $12^{1ff.}$. It is more prob. that it was from a settlement of Ephraimites on the east of Jordan, an attempt to have a lot there as well as Manasseh, for the Ephraimites were from the first dissatisfied with their portion (Jos 17^{14-18}). To this the obscure words of Jg 12^{4} may refer. See Smith, *HGHL* p. 335 n.². A. HENDERSON.

EPHRAIM, GATE OF.—See JERUSALEM.

EPHRATHAH (אֶפְרָתָה, LXX ’Εφραθά, AV wrongly **Ephratah**) in Ps 132^{6} is prob. not an ancient name of Bethlehem, but means the territory bordering on Judah and Benjamin, in which lay Kiriath-jearim, where the ark rested for a time, and where it is represented as being ‘heard of,’ found ‘in the field of Jaar.’ So Ges., Del., and see RVm. **2.** A place near Bethel where Rachel died and was buried, Gn 35^{19} 48^{7} (in both of which passages ‘the same is Bethlehem’ is a gloss). **3.** A name of Bethlehem, Ru 4^{11}, Mic 5^{2}. **4.** The wife of Caleb (1 Ch 2^{50} 4^{4}, abbrev. in 1 Ch 2^{19} to **Ephrath**). See CALEB.

W. T. DAVISON.

EPHRATHITE (אֶפְרָתִי).—**1.** A native of Bethlehem (Ru 1^{2}). **2.** An Ephraimite (Jg 12^{4}, 1 S 1^{1} [cf. Driver, *ad loc.*, and see art. SAMUEL], 1 K 11^{26}).

EPHRON (עֶפְרוֹן).—The son of Zohar the Hittite, from whom Abraham purchased the field or plot of ground over-against Mamre, in which was the cave of Machpelah (Gn 23). The purchase is described with great particularity; and the transactions between Ephron and Abraham are conducted with an elaborate courtesy characteristic of Oriental proceedings. Ephron received 400 shekels' weight of silver (23^{15}): coined money apparently did not exist at that time. If we compare the sale of the site with other instances (Gn 33^{19}, 1 K 16^{24}), Ephron seems to have made a good bargain.

The presence of Hittites in Palestine in the days of Abraham is noticeable. It is possible that Ephron belonged to a different group of Hittites from those who dwelt in Asia Minor. ‘Indeed it seems probable that before either Canaanites or Aramæans appeared west of the Euphrates, the Hittites had settled throughout Syria, and the Amorites in Palestine . . . It is also not without a special allusion to the distant past that the learned Ezekiel ($16^{3.\,45}$) says of ancient Jerusalem, “the Amorite was thy father and thy mother a Hittite”’ (McCurdy, *History, Prophecy, and Monuments*, vol. i. p. 196). See further under HITTITES.

H. E. RYLE.

EPHRON (עֶפְרוֹן), Jos 15^{9}.—A mountain district, containing cities, on the border of Judah, between Nephtoah and Kiriath-jearim. The ridge W. of Bethlehem seems intended. **2.** (’Εφρών) 1 Mac 5^{46-52}, 2 Mac 12^{27}. A strong fortress in the W. part of Bashan between Ashteroth-karnaim and Beth-shean. The site is unknown. **3.** See EPHRAIM in preceding col. C. R. CONDER.

EPICUREANS (’Επικουρεῖοι).—We read in Ac 17^{18} that when St. Paul came to Athens ‘certain of the Epicurean and Stoic philosophers encountered him.’ Whether he discussed their tenets with them is not related, nor what they thought of his; for we need not refer to the two sects the unfavourable criticisms, that St. Paul was a babbler and a setter forth of strange gods.

Epicurus was born B.C. 342, and spent his early life in the Ionian Islands. In 307 he domiciled himself at Athens, and soon gathered round him a group of friends and pupils who never forsook him. Their meeting-place was a small garden and villa which he owned in the suburbs, and which he afterwards bequeathed to the sect or 'thiasus.' He died in B.C. 270 of stone, the pain of which he bore with philosophic calmness.

The moral or ethical theory of Epicurus was suggested by that of his predecessor Aristippus of Cyrene, who formulated the human good or end of life as consisting in the pleasure of each moment. E. adopted pleasure as the end; but insisted that it is the pleasure of an entire life at which we must aim, and taught that this can be secured, not by indulging whims and instincts as they momentarily arise in us and solicit us, but only by reconciling them into a systematic whole, in which each will receive the amount of satisfaction which belongs to each. Before indulging any instinct, bodily or mental, we are to consider, said Epicurus, what will be the consequences to ourselves and those whose happiness or pleasure is bound up with our own. Thus the general upshot of his teaching is not unlike that of Bishop Butler; and the charge made against him by the ancient Stoics, that he encouraged sloth and sensuality, was unjust. Conybeare and Howson are right when they speak (*Life and Letters of St. Paul*, ch. x.) 'of the quiet garden, where E. lived a life of philosophic contentment, and taught his disciples that the enjoyment of tranquil pleasure was the highest end of human existence.'

The Stoics also stigmatized E. as an atheist, because he held that the gods live a sublime life of divine calm, as far removed from the passions and hatreds which make men unhappy as from the turmoil of the elements. The contemporaries of E., like the Greek or Italian peasantry of to-day, believed that every clap of thunder, every flash of lightning, every earthquake, was a direct act of a god, who, except in abnormal paroxysms, never acted at all. If a man was blind from birth, the gods were angry with him or his forefathers. If there was a drought, the gods meant to signify their displeasure with someone or other. The gods were perpetually meddling with nature and man, and oftener in a malign than in a loving manner. An instinctive dislike for such peddling views of Providence inclined E. to the philosophy of secondary causes, which Anaxagoras and Democritus had already broached in an earlier generation; and he elaborated a philosophy of nature according to which all phenomena, especially the thunder and lightning, in which Zeus was popularly supposed to vent his ire, were referred to the play of atoms moving about in a void space. To this regular action and interaction of atoms were to be ascribed the stars and their movements. Here, again, Epicureanism struck at the widespread superstition of astrology, and rendered a great service to humanity. For if a man's whole life and destiny depended on the position of the stars at his birth, he was not free to mould his own character, but was the slave of alien forces. In opposition to such a degrading and paralyzing fatalism, E. taught that man has a free will, and can make the best of himself.

A modern writer (Mr. Pater, in his work *Marius the Epicurean*) has shown how naturally Epicureanism, the most humane of ancient creeds, could in the 2nd cent. pass into Christianity. And indeed the two had much in common. Both were opposed to the vulgar mythology of antiquity; both ascribed to the Deity a lofty immunity and repose from every lower passion and feeling; both taught the doctrine of free will in opposition to the astrologers; both inculcated kindness and gentleness to man and beast; both frugality and contentment with moderate circumstances. And as Epicureanism, being the offspring of an age when the intense but narrowing patriotism of the ancient city-state was gone by, was capable of being practised under any form of political institutions, so the moral system of Christianity was formed in detachment from any special set of institutions, and even in defiance of many which, both before and since, have been held essential.

LITERATURE.—The best short account of Epicureanism is Wallace's *Epicureanism* in 'Chief Ancient Philosophies' (S.P.C.K.). See also his article in *Encyc. Brit.*^{9}. For a fuller treatment of the subject, and for a knowledge of the Greek sources, consult Ritter and Preller's *Historia Philosophiæ Græcæ*, or Zeller's *Hist. of Gr. Philosophy*; also H. Usener's *Epicurea*. Among older works, Gassendi's *De Vita, Moribus et Doctrina Epicuri*; *The Life of E.*, by Diogenes Laertius; the poem of Lucretius in Latin, or as tr. by Munro. Late in the last cent. an entire library of Epicurean writings was found at Herculaneum. Many of these rolls have been deciphered and printed since 1793, when the task of unrolling them was first essayed. But many of them are too much charred by the hot lava which overwhelmed the city in A.D. 79 to be of much use. Still many writings of E. and of the leading members of his school, which would have been lost except for this famous cataclysm of nature, have been thus preserved to us.

F. C. CONYBEARE.

EPIPHANES.—See ANTIOCHUS IV.

EPIPHI (Ἐπιφί, 3 Mac 6^{38}).—See TIME.

EPISTLE.—1. IN OT.—The epistle is so spontaneous a form of literature that it may be regarded as one of the earlier applications of the art of writing (see WRITING). Letter-writing must, however, have been confined at first to the few; and official rather than private correspondence would be the prevailing type. In OT verbal messages alone appear prior to the Kingdom in Israel, the letter of David to Joab touching Uriah (2 S $11^{14.15}$) being the first recorded example. Here the message was one which could not have been sent verbally through Uriah; and a similar need for secrecy explains the use of sealed letters by Jezebel in the matter of Naboth (1 K $21^{8.9}$, cf. 2 K 10^{1-7}, Jehu and the sons of Ahab; also 2 Ch 21^{12}). The answer in each case was verbal; hence we infer that writing was still the rare exception even in high official matters. Other reasons for resorting to written messages were the desire to be emphatic or peremptory, as in the cases of Benhadad's letter sent with Naaman to Jehoram of Israel (2 K 5^{5-7}), and of Sennacherib's open letter to Hezekiah (2 K 19^{14}, Is 37^{14}, 2 Ch 32^{17}); or the wish to be specially courteous, as with the letters and present sent by Merodach-baladan on hearing of Hezekiah's recovery from sickness (2 K 20^{12} = Is 39^{1}). So far letters have been chiefly those of kings. Akin to these, in formal or authoritative character, is the letter sent by Jeremiah to the exiles in Babylon (Jer 29^{1}), which also alludes to similar letters sent by a certain Shemaiah, a false prophet, to Jerusalem in order to undermine Jeremiah's own position (vv$^{25.31}$). From this it would seem fair to infer that the conditions of the Captivity gave a marked stimulus to the use of letters by the Hebrews as a medium for important messages. Certain it is that hereafter we find not only more frequent reference to such correspondence, but also a new and more precise terminology used to express the notion 'epistle' as a specific form of writing. Hitherto the term employed, as in 2 S, K, (=Is), and even Jer, has been quite vague and general. A letter is simply 'a book' (סֵפֶר, βιβλίον, βίβλος), its precise nature being learnt only from the context. But henceforth there emerge, in Ch, Ezr, Neh, Est, certain specialized terms, the most distinctive coming from foreign tongues. Besides words for a 'writing' (כְּתָב, 2 Ch 2^{11} בִּכְתָב . . . וַיֹּאמֶר, Est $3^{13.14}$ $8^{10.13}$ with סְפָרִים hard by in either case; or מִכְתָּב, 2 Ch 21^{12} = γραφή, as in Dt 10^{4}), we find the strange אִגֶּרֶת of Assyr. (*êgirtu*, so Frd. Delitzsch) or at least Pers. origin (2 Ch $30^{1.6}$, Ezr $5^{6ff.}$, Neh 2^{7-9} $6^{5.17.19}$, Est $9^{26.29}$. Cf. ἀγγαρήϊον, Herod. viii. 98; Xen. *Cyrop.* viii. 6. 9), and נִשְׁתְּוָן, a Pers. form [Ezr $4^{7ff.}$, where כְּתָב הַנִּשְׁתְּוָן (v.^{7}) = אִגְּרָא (vv.$^{8.11}$) = נִשְׁתְּוָנָא (v.^{18});

while Artaxerxes' פִּתְגָּמָא (rescript, v.^{17}) also = נִשְׁתְּוָנָא (v.^{23})]. The two latter terms are regularly rendered by ἐπιστολή in the LXX. From all this it seems probable that familiarity with the royal posting system of the Persians (cf. ἀγγαρεύειν in Mt 5^{41}) helped to make the letter stand out more clearly to the Jewish mind as a distinct literary type. In the post-exilic historical books the exact epistolary form is often preserved, including a formal address in certain cases. This is a marked feature in the Bks. of Mac, belonging to the Greek period, where also a closing 'Farewell' occurs, sometimes with the addition of the exact date (*e.g.* 2 Mac $11^{27.33.38}$ χαίρειν . . . ἔρρωσθε or ὑγιαίνετε). As yet, however, we have no models of private correspondence among the Hebrews; so that here, as often, we are dependent upon the light shed backwards by NT.

2. IN NT.—In view of the numbers and influence of the Diaspora, the collateral evidence of non-Heb. analogies now becomes of moment. But the letters of literary men, like Cicero or Seneca, are hardly to our purpose. It is rather to the Egyp. papyri, and to the collections of epistles mostly fathered upon great Greek names during the Alexandrine age, that we must look for hints of real value.* The evidence has been well collected by G. A. Deissmann, who, in his *Bibelstudien* (pp. 189–252), reaches the following results. A broad line is to be drawn between the letter and the epistle. The one is essentially a spontaneous product, dominated throughout by the image of the reader, his sympathies and interests, instinct also with the writer's own soul: it is virtually one half of an imaginary dialogue, the suppressed responses of the other party shaping the course of what is actually written: it is confidential in the sense that it is meant for particular readers known to the writer. The other has a general aim, addressing all and sundry whom it may concern: it is like a public speech, and looks towards publication. But publication is the very note of literature proper. Hence the letter, as private, differs from the epistle in being a 'pre-literary' type of self-expression, akin to a diary. But, like a diary, if meant ultimately for the public eye a letter may, in spite of its original use, be in fact an epistle (*e.g.* certain letters of Cicero, Seneca, and Pliny). The literary epistle would arise from actual experience of the posthumous value placed on a great man's letters, and might take one of two forms: (1) those written to make or enhance one's own fame; (2) those forged under some great name, either for practice, after the fashion of the schools of rhetoric, or to give weight to propaganda of some sort. But in any case it will betray care, effort after finish—in a word, art; whereas the letter proper is unstudied, a thing of nature. This being so, letters require an exegesis all their own, one which sets their contents in vital relations with author and readers. Thus only can their proper sense be ascertained.

These principles have a real bearing on NT epp., and must rank among the tests of authenticity. But certain special features of primitive Christianity modify their application; and the universal nature of the interests involved makes the line between letter and epistle a fainter one, as we see by placing 1 Th alongside an epistle like Romans, or even the encyclical Ephesians. It was, no doubt, by writing letters that St. Paul came to feel an epistle a fit medium of exposition. And it seems that he, partly in virtue of his unique missionary labours, partly as a Jew of Gr.-Rom. culture, was the creator of the NT type of epistle, itself the most characteristic blossom of the New Life in the souls of men, the most notable differentia of NT among sacred books. It is even possible that all other NT epistles owe their birth to St. Paul as pioneer. Be this as it may, the relevant data can best be grouped as (*a*) pre-Pauline, (*b*) Pauline, (*c*) post-Pauline.

(*a*) PRE-PAULINE EPISTLES.—Letters of instruction to the synagogal authorities even outside Pal. were sent by the supreme court of the mother-city as occasion arose (Ac 9^{2} with 22^{5}, cf. 28^{21}). It was, perhaps, not without some vague sense of this analogy that the Jerus. community, acting through the apostles and the elder brethren (Ac $15^{22.23}$, cf. 2 Mac $1^{1.10}$), addressed their Gentile brethren of the province Syria-Cilicia touching terms of communion. Common use of 'letters of introduction' is implied in 2 Co 3^{1} (see Ac 18^{27}, and cf. Ro $16^{1.3}$ as a sample), and in a slightly different sense in 1 Co 16^{3}. No doubt, too, foreign synagogues were wont to refer doubtful points to Jerus. and thus elicit written responses. But we cannot view the letter of the Cor. Church to its spiritual father or apostle (1 Co 7^{1}, 4^{14-17} $9^{2.7.12}$) exactly in this light. Rather it seems a natural result of the unique relation which St. Paul's personality, at once strong and tender, caused to grow up between him and his 'children in the gospel.' This is the secret of the Pauline letters.

(*b*) PAULINE EPISTLES.—There was an imperative need for the single Apostle of the Gentiles to multiply his presence, as it were. This he did in part by trusted companions, but in part also by letters. Doubtless, their exact form would have been other than it is had the current models been other than they were.* But existing literary usages, whether Jewish or Gentile, gave to them no more than Rabbinism gave to his gospel—certain vehicles of thought that lay readiest to use. What his gospel adopted, it transfigured; and nowhere more strikingly than in the conventionalities of the epistolary form. Address, salutation, final benediction, all pulsate with life, and expand at his touch into clauses charged with emotion, every word of which reveals his estimate of some group of souls that were ever in his heart's prayers. One may well see in 2 Th 3^{17} (cf. 2^{2}) tokens that Thessalonica was not the first Church addressed by St. Paul. Yet it is equally certain that the true cause of his very first letter lay deep in the same spirit as breathes in 1 Th, the essentially 'pastoral' instinct. His letters were indeed the life-blood of a noble spirit, ever ready to be poured forth to nourish its spiritual offspring (1 Th $2^{7.8}$). Of a temper too ardent for the more studied forms of writing, St. Paul could yet by letter, and so on the spur of occasion, concentrate all his wealth of thought, feeling, and maturing experience upon some particular religious situation, and sweep away the difficulty or danger. Such 'waiting upon Providence' was the attitude of the apostolic age, which took no thought for a future the next event of which might be the return of Jesus Messiah in heavenly power. In this sense, likewise, the occasional epistle was the typical form of its literature.

The Pauline letters have a style all their own—though style was far from the writer's thoughts. It was indeed the man. Hence their enormous value: first, as the data for his *journal intime* and *Life* all in one; and next as the immovable critical basis of historical Christianity. Just as certain of these letters articulate a unique personality, manifold yet mastered by one absorbing passion, so surely must all theories reckon with what they imply as to the origins of Christianity. They reflect the mood of the time and given circle with perfect vividness of light and shade, ere it fades into the neutral tints of a set narrative. No criticism can ignore them. But neither can Christian theology. This means that they are to be read first of all as letters, and by the canons which govern such a reading. Until any reading can be put into relation to both writer and correspondents, so far as yet known, it cannot be held real and valid. We must reach the theology, if we reach it truly, through the missionary and man of God. So reached, it is full of qualification, of the flexibility that marks spirit off from letter. And, most valuable of all, a feeling for the practical reference of Christian truth—the ideal of 'being,' even more than 'knowing' or even 'doing'—can never be lacking when these writings are read as letters. To this end their very ordering contributes. For the body of the contents falls into two parts. The prophet—for herein lies their continuity with OT (cf. Jer 29)—carries the soul, on the wings of vision, to a level where the will finds its feet free to run in the ways of God, and life is seen *sub specie æternitatis*, in the light of God. But then the apostle never fails to depict what this means for daily life, ere he turns the eye once more to the founts of inspiration with a closing Doxology or Benediction. It is in such applications that the actual face-to-face nature of the Pauline letter allows certain self-revelations to be elicited by the virtual dialogue. Some of these are among our most precious hints towards a theory of biblical inspiration, which by its very recognition of human limitations stands out in contrast to the pagan notion of inspiration as uniform dictation through a passive organ; an idea which soon tainted the ecclesiastical theory from Justin onwards (see Sanday, *BL* 350 ff., cf. 31 ff., 391 ff.).

---

* A certain proportion of the Alexandrine pseudo-epistles, being Græco-Jewish in origin, have a special claim to attention.

* Renan, relying apparently on Talmudic and mediæval data, asserts that 'correspondence between synagogues already existed in Judaism; the envoy charged with such letters was even a dignitary drawn from the synagogues,' and he implies that doubtful points of doctrine or practice were thus discussed (*St. Paul*, 228, 229 and n^{2}). But he gives no references. Sanday speaks more guardedly, and indeed doubts if 'the writing of doctrinal epp. would come to the first generation of Christians as a matter of course' (*Bamp. Lect.* 335, 344).

Finally, it may be noted, even as regards the growth of thought marked by certain Pauline epistles, that of all literary forms the letter least professes to exhaust a writer's ideas—the limit being given rather by the reader's conditions—or commits the writer to his own past. It is, in fact, the ideal form of utterance for a spirit in which great germs are ever being quickened by the touch of practical problems.

(*c*) POST-PAULINE EPISTLES, in a broad sense at least, we may style the other NT epistles (for *James*, see Sanday, *BL* 344). Some of them largely partake of the 'epistle' in contrast to 'letter.' Deissmann, indeed, goes too far when he puts at least half of them into the former class in such a sense as to infer their pseudonymity (pp. 242 ff.). But we may group them as 'letters' and 'epistles' according as they were or were not meant originally for readers more or less known to the writer. Here *Hebrews* first claims notice; for, though not actually Pauline, it was most likely suggested by St. Paul's example, seeing that Timothy is known to its author (13^{23}). Its closing greetings mark it a true letter; yet its abrupt opening makes it, even more than some Pauline epistles, hover between a letter and a homily. Possibly, the writer does not feel his name weighty enough to prefix in formal fashion (cf. *Ep. Barn.* $1^{1.8}$). On the other hand, *James* has a formal address, but no final greetings; which marks it an epistle proper, meant for a class, not for given circles personally known to the writer. Otherwise is it with 1 *Peter* ($1^{1.2}$ $5^{12\text{-}14}$), which is quite on the lines of an epistle like Ro, and involves some familiarity with the readers' concrete relations. And this seems true even of 1 *Jn*, devoid as it is of the usual marks; for the tone of paternal affection (τεκνία) seems best to suit a Church or Churches that knew and revered the writer—probably those addressed out of full knowledge, though in a public or literary fashion, in the Bk. of Rev (2–4). 2 *Jn* is surely a real letter, in due form, to one such Church by the same apostle, whose cryptic use of ὁ πρεσβύτερος and ἐκλεκτῇ κυρία is due to fear of a hostile State (v.[12]). So is it with 3 *Jn* (v.[13]), a sequel (cf. [9]) sent to a private friend when access to this Church was cut off by an ambitious official. In all of the above one seems to feel personality going forth in subtle ways to reach its proper audience. This is hardly so with *Jude*, whose address is quite vague; still less with 2 *Peter*, which as it stands seems dependent on *Jude*. Nor need this surprise, when its author, in implying anxious study of certain Pauline epistles, can rank them as Scripture ($3^{15.16}$).

To sum up. While we gain new insight into differences of type among NT epistles by placing them in line with other ancient epistles, yet on reflexion we see afresh the strange distinctiveness of the former as a whole. It turns on the special nature both of the originating impulse and of the ties binding writer and readers in virtue of their common faith. Outside Judaism, religion meant neither passionate belief nor elevated conduct so much as correct ritual. From this could spring no literature of persuasion, least of all in epistolary form. But given the new motive for the religious letter, its native form could hardly stop short where it began, in the splendidly personal prophesyings and exhortations of St. Paul the inspired missionary. Even in him new and more settled conditions evoked a new manner; the sermon gets the upper hand, changing Christian letter into Christian epistle. Of the later, or strictly pastoral type, 1 Jn seems a true sample. Placed alongside 1 Th, it, or even 1 P, might appear marked off as Deissmann's 'artistic epistle' from his 'pre-literary letter.' But, with all intervening stages supplied in even acknowledged Pauline letters, these categories cannot apply with such rigour as to be synonymous with 'Catholic' and 'Pauline' epistles respectively. Various problems remain, *e.g.* as to the Pauline Pastoral Epp., whose integrity is open to doubt; but flexibility and nice discrimination must here be the order of the day. This is not the place to see how the NT epistles became, first literature, and then canonical literature. But it here falls to note that even the most personal Pauline letters thereby became for the Church pure epistles or theological pamphlets. They were, that is, read for the most part *in abstracto*, their writer and original readers—and therefore the original sense—alike becoming of little or no moment.

LITERATURE.—Farrar, *Messages of the Books* (1884), ch. vii.; Sanday, *BL* 334 ff., 344; and esp. *Proleg. zu den bibl. Briefen und Episteln*, in G. A. Deissmann's *Bibelstudien*, 1895.

J. V. BARTLET.

EQUAL.—1. As adj. in the sense of 'impartial,' 'fair' (=Lat. *æquus*), Ps 17^2 'Let thine eyes behold the things that are equal' (מֵישָׁרִים, either the obj. of the vb. hence AV, and RV 'Let thine eyes look upon equity'; or, more probably, an adv. [=בְּמֵישָׁרִים] as Del. and RVm 'Thine eyes behold with equity'). This meaning of 'equal' is elsewhere in OT found only in Ezk ($18^{25\,bis,\ 29\,bis}$ $33^{17\,bis.\ 20}$, Heb. יִתָּכֵן, lit. 'is proportioned' or 'adjusted') in ref. to God's dealings. In Apocr. it is found 2 Mac 13^{23} 'sware to all equal conditions' (τὰ δίκαια, RV 'to acknowledge all their rights'); and in NT, Col 4^1 'Masters, give unto your servants that which is just and equal' (τὴν ἰσότητα, RVm 'equality,' Lightft. 'equity,' 'fairness'). Tindale in Prol. to Genesis, says 'that Joseph brought the Egyptians into soch subjection wold seme unto some a very cruel deade, howbeit it was a very equal waye'; and in 'The Obedience of a Christian Man' (*Works*, i. 209) he says, 'it is impossible that a man should be a righteous, an egal, or an indifferent judge in his own cause—lusts and appetites so blind us.' Cf. Milton, *PL* x. 748—

> 'As my will
> Concurred not to my being, it were but right
> And equal to reduce me to my dust.'

2. As subst. in the sense of a contemporary, one of the same generation (=Lat. *æqualis*), Gal 1^{14} 'And profited in the Jews' religion above many my equals in mine own nation' (*συνηλικιώτης*, RV 'beyond many of mine own age'). In the argt. to *Samson Agonistes*, Samson is 'visited by certain friends and equals of his tribe.' In Ps 55^{13}, however, 'equal' is one of my own rank, as AVm Heb. אֱנוֹשׁ כְּעֶרְכִּי, a man after my valuation, *i.e.* esteemed as I am esteemed. So Elyot, ii. 417, 'to acquire by the executyng of iustice nat only an opinion of tyrannye amonge the people, and consequently haterede, but also malignitie amonge his equalles and superiours.'

3. As verb—(1) to 'come up to,' 'match,' Job $28^{17.\ 19}$ 'The gold and the crystal cannot equal it'; 'The topaz of Ethiopia shall not equal it' (עָרַךְ); and (2) to 'compare,' La 2^{13} 'What thing shall I liken to thee, O daughter of Jerusalem? what shall I equal to thee?' (מָה אַשְׁוֶה־לָּךְ).

J. Hastings.

ER (עֵר).—**1.** The eldest son of Judah by his Canaanitish wife, the daughter of Shua. He was married to Tamar, who was apparently also of Canaanite origin. For wickedness, the nature of which is not described, 'J" slew him' (Gn 38^{3-7}, Nu 26^{19}). **2.** A son of 'Shelah the son of Judah' (1 Ch 4^{21}). **3.** The name of 'Er the son of Jesus' appears in the genealogy of our Lord (Lk 3^{28}) in the 7th generation before Zerubbabel, and the 15th after David.

H. E. Ryle.

ERAN (עֵרָן 'watchful').—Grandson of Ephraim, Nu 26^{36} P. Patronymic, **Eranites**, *ib.*

ERASTUS (Ἔραστος) occurs three times as the name of a companion of St. Paul. **1.** From Ac 19^{22} we learn that during St. Paul's long stay at Ephesus he sent Timothy and E., two of those that ministered unto him (*δύο τῶν διακονούντων αὐτῷ*), into Macedonia. **2.** In Ro 16^{23} E. 'the treasurer (*οἰκονόμος*) of the city' is mentioned among those who send their salutations. His office implies that he was a man of some considerable importance. **3.** In 2 Ti 4^{20} E. is mentioned as having 'remained in Corinth.'

Whether these reff. apply to one, two, or three persons we have no means of conjecturing. It is, however, not probable that the 'treasurer of the city,' who held an office which implied residence in one locality, should have been, like the others, an itinerant companion of St. Paul.

A. C. Headlam.

ERECH (אֶרֶךְ) was called by the Babylonians and Assyrians Uruk (or Arku), whence Heb. Erech and Arab. Warka. A very ancient city, thought at first to be Edessa or Calirrhoë (Urfah) in the N.W. of Mesopotamia. It is the second in the list of the four towns of Gn 10^{10} (Babel, *Erech*, Accad, and Calneh), comprising Nimrod's kingdom in the land of Shinar (Babylonia). Erech (or Warka) lies halfway between Hillah and Korna, on the left bank of the Euphrates, and W. of the Nile Canal. It is supposed by Fried. Delitzsch that this river must have flowed nearer to the city at the time of Gilgameš, as the legend relates that Gilgameš and Ea-bânî washed their hands in the stream after having killed, in Erech, the divine bull sent out by the goddess Ishtar. Its orig. name was Unu, Unug, or Unuga, translated in the bilingual texts by *šubtu** 'seat' 'dwelling.' It was a very important city—the capital, in fact, of the mythical hero-king Gilgameš. The ruins found on its site show the remains of elegant buildings with fluted walls, sometimes decorated with patterns formed with the circular ends of various coloured cones imbedded in mortar, bricks bearing archaic Accad. and Bab. inscriptions, etc. Remains of canals traverse the mass of hillocks (which in some parts are nearly 90 feet high) and the country around the city, showing that it must have been well drained in ancient times. Those portions of the walls of the city which can be traced seem to have been in the form of an irregular circle about 40 feet high, and show that its average circumference was about six miles. The houses of the people are supposed to have extended beyond the walls.

The antiquity of the city is indicated by the non-Semitic (bilingual) version of the creation-story, in which its foundation is attributed to the god Merodach (*RP* 2nd ser. vi. 107–114). Another and important proof of its antiquity is given in the number of names it bears in the inscriptions. Besides its original appellation of Unug, it was called Illag (or Illab) (*WAI* v. pl. 41. 15), Namerim (ii. 50. 58; v. 41. 16), Tir-ana 'the heavenly grove' (v. 41. 16), Ara-imina 'the seven districts' (*ib.* 17), Gipar-imina* 'the seven enclosures' (*ib.* 18), Ki-na-ana 'the heavenly resting-place' (*ib.* 19)—poetical names implying that the city and its surroundings were regarded by the Babylonians as fertile and beautiful in the extreme, and very different, naturally, from the scene of desolation which now meets the traveller's eyes. The **Archevites** mentioned in the Bk. of Ezra, 4^9, were inhabitants of the Bab. Arku or Erech, which was the seat of a celebrated school of learned men. Strabo speaks of the Orcheni (Archevites) as a sect of Chaldæan astronomers dwelling near Babylon (xxi. p. 739); Ptolemy, as a people of Arabia near the Persian Gulf (v. 19, § 2); and Pliny, as an agricultural population, who banked up the waters of the Euphrates and compelled them to flow into the Tigris (vi. 27, s. 31).

Two deities who had temples in the city seem to have been worshipped in E., namely, Ishtar and Nanâ. The temple dedicated to Ishtar (Venus, as the evening star) was called Ê-ulmaš 'the house of the oracle'; the other, dedicated to Nanâ (the goddess whose image was carried off by the Elamite king, Kudur-nankhundi, B.C. 2280, and only restored to its place 1635 years later by Assur-bani-pal, king of Assyria), was called Ê-ana 'the house of heaven,' and is now represented by the Buwariyya mound.

Among the inscribed and stamped bricks found in Erech are many of the time of the historical kings —Dungi, Ur-Ban, Gudea, Sin-gašid, Merodach-baladan I., etc. Tablets of the reigns of Nabopolassar, Nebuchadrezzar, Nabonidus, Cyrus, Darius, and some of the Seleucidæ, have been excavated in the site. In the ruins of the town and the country around, a large number of glazed earthenware coffins and other receptacles, used no doubt for the burial of the dead, mostly of the Parthian period, has been found, showing that part of the town and its neighbourhood must have been used as a necropolis.

I. A. Pinches.

ERI (עֵרִי 'watcher').—Son of Gad, Gn 46^{16}, Nu 26^{16}, P. Patronymic, **Erites**, *ib.*

---

* The pronunciation of the word seems, from a Greek transcription, to have been *sobthu*.

* This apparently refers to the great tower there, in seven stages, similar to the tower of Babel. It was called E-gipar-îmina (*WAI* ii. 50. 20).

ESAIAS.—The familiar AV spelling of ISAIAH in Apocr. and NT is retained by RV only in 2 Es 2^{18}.

ESAR-HADDON (אֵסַר־חַדֹּן, Σαχερδονός, Ἀσορδάν).—Esar-haddon, in Assyr. Assur-akh-iddina, 'Assur has given a brother,' seems to have been the favourite son of Sennacherib, by whom his name was changed to Assur-etil-yukin-abla, 'Assur, the hero, has established the son.' Sennacherib bequeathed to him golden bracelets, necklaces, and other valuables, 1½ manehs, 2½ shekels in weight, which were stored up in the house of a certain Amuk, and probably intended him to be his successor. In B.C. 681 Esar-haddon was at the head of the Assyr. army fighting against Erimenas of Ararat (Van), when Sennacherib was murdered by his sons Adrammelech (or rather Arad-malik) and [Nergal-] sharezer (2 K 19^{37}, Is 37^{38}) on the 20th of Tebet (December). For forty-two days the conspirators held the capital, but on the 2nd of Adar (January) they were compelled to fly to the Armenian king. Esar-haddon met his brothers and the army of Ararat near Malatiyeh on the 12th of Iyyar (April); the veterans of Assyria won the battle, and at the end of it saluted Esar-haddon as king. Eusebius quotes from Abydenus that the battle-field was at 'the city of the Byzantines,' which von Gutschmidt corrects into Bizana on the Cappadocian frontier. After the victory Esar-haddon returned to Nineveh, and on the 8th of Sivan (May) was crowned king.

He was an able general, and by his conciliatory policy prevented such rebellions as had troubled his father's reign. His first care was to rebuild Babylon, which Sennacherib had destroyed (in B.C. 689), and to make it the second capital of his empire. Manasseh of Judah became his vassal, and was called upon, along with the other kings of the west, including those of Cyprus, to furnish timber and stone for the palace of their Assyrian lord. The statement in 2 Ch 33^{11}, that he was carried prisoner to Babylon after his revolt from Assyria, is explained by the fact that Babylon had become one of the residences of Esar-haddon.

The early part of Esar-haddon's reign was occupied in defending his kingdom against the hordes of Gimirrâ or Kimmerians, called Gomer in OT, and included by the Assyrians under the general title of Manda or 'Nomads,' who were now pouring into Western Asia. For a time the issue seemed doubtful, and a hundred days of humiliation and prayer to the gods were ordered that the empire might be protected against the Kimmerians and their allies, Kastarit of Karkassi, Mamiti-arsu the Mede, the Minni, and the people of Saparda (Sepharad) and Asguza (Ashkenaz). At last Teuspa the Kimmerian was overthrown in a decisive battle on the northern frontier of Assyria, and driven westward into Asia Minor. Then came a campaign against the Medes.

In B.C. 677 Sidon revolted, but was promptly captured and destroyed, and another city, called 'the city of Esar-haddon,' was built in place of it, and colonized with captives from Elam and Babylonia (see Ezr 4^{2}). The following year the king of Sidon and his ally, a Cilician prince, were beheaded, and their heads sent to Nineveh. In the autumn Esar-haddon marched into the heart of Arabia, through a waterless desert, a distance of more than 600 miles, and conquered the eight kings of Bazu and Khazu (the Buz and Hazo of Gn $22^{21.22}$). In B.C. 674 he invaded Egypt, and the invasion was repeated in the February of the following year. In 672 his wife died on the 5th of Adar, and in 670 came the final attack on Egypt. The Egyptian forces were driven before the Assyr. army (from the 3rd to the 18th of Tammuz or June) all the way from the frontier to Memphis, being thrice defeated with heavy loss; while Tirhakah, their king, was wounded. On the 22nd of Tammuz, Memphis surrendered, Tirhakah and his son fled to Ethiopia, and Egypt became an Assyr. province. In B.C. 668 it revolted, and while on the march to punish it Esar-haddon fell ill, and died on the 10th of Marcheshvan (October). His empire was divided between two of his sons, Samas-sum-ukin having Babylonia, while the rest of the empire passed to an older son, Assur-bani-pal, whose suzerainty Samas-sum-ukin was called upon to acknowledge. A third son, Assur-mukin-paliya, was raised to the priesthood, while a fourth became priest of the moon-god at Harran.

A. H. SAYCE.

ESAU.—1. (עֵשָׂו), elder of Isaac's twin sons. The name ('hairy') * is said to have been suggested by his appearance at birth (Gn 25^{25}, J). The surname Edom ('red'), applied chiefly to his posterity, commemorated, according to Gn 25^{30} (J), the incident there related, but referred also, possibly, to his red hair. Sayce [see EDOM, p. 644^{b}] derives the name from the red colour of the sandstone cliffs of Idumæa. The struggle between E. and Jacob, prior to birth,† foreshadowed subsequent relations between the brothers as well as their descendants (see EDOM), and was oracularly declared to signify that 'the elder shall serve the younger.' The premature tokens of manly strength were premonitory of E.'s future. When he grew up, he preferred the wilder life of the chase to the quieter routine of sheep-farming at Beersheba. He became a 'man of the field,' an expert hunter, and eventually chief of a tribe occupying the hilly land of Seir, whose Horite inhabitants were displaced or subdued by E., his followers, and their posterity (Gn 25^{27} $32^{3.6}$ 36, Dt 2^{12}).

The main incidents of E.'s life are (1) *Sale of birthright.*—Hungry, faint, and feeling as if about to die, he arrives one day,‡ after a (presumably) unsuccessful hunt, at the patriarchal camp, finds his brother cooking lentils, and cries, 'Let me devour some of that same red food.'§ Jacob, taking mean advantage of E.'s condition, and aware probably of the oracle in his own favour, demands, as price of the pottage,‖ a renunciation of the birthright. The latter included precedence, and authority after his father's death (Gn 27^{29}); perhaps, also, as in later times, a double portion of the patrimony (Dt 21^{17}), and the domestic priesthood (Nu $3^{12f.}$). Along therewith would naturally, in the case of the chosen family, be transmitted the covenant blessing, which secured for its possessor the divine special favour, with promise of Canaan for his posterity, and the honour of conveying a blessing, through future seed, to 'all the families of the earth' (Gn 12^{3} $22^{17f.}$). In E.'s eyes the temporal advantages of the birthright were distant and shadowy; to spiritual privilege he was apparently insensible. 'What profit shall the birthright do to me?' he cries, and barters it away with a levity which even the oath exacted by Jacob fails to turn into gravity. (2) *E.'s marriages.*—One who 'despised his birthright,' as heir of Abraham, was not likely to value highly connexion with Abraham's kindred. He associated freely with Canaanites, who were 'strangers from the covenants of promise,' and, at the age of 40, married two Hittite wives, Judith and Basemath, to the grief of his parents, who could not forget Abraham's anxiety to avoid such alliances. Afterwards, when Jacob had been directed by Isaac to seek a wife among their kinsfolk in Paddan, E., in hope of propitiating his parents, married, in the lifetime of his first two wives, his cousin Mahalath, daughter of Ishmael.[*] Of these wives five sons were born (Gn 36$^{4ff.}$). (3) *Loss of patriarchal blessing.*—When Isaac's death apparently approached, E. seems to have realized the temporal profit of the benediction. Not forgetting (Gn 27^{36}), but ignoring his bargain with Jacob, he enters readily into Isaac's plan for the bestowal of the blessing on his favourite first-born. When the blessing is lost through Jacob's repulsive artifice, and E. receives a lower benediction,[†] indicating that he would live by the spoils of war and chase (27^{40}), he resolves to slay his brother after Isaac's death, and thus regain all he has lost. (4) *Reconciliation with Jacob and final departure from Canaan.*—During Jacob's sojourn in Paddan, E., while retaining connexion with Canaan (Gn 36^{6}), seems to have become a 'duke' in Seir (Gn 32^{3}).[‡] When Jacob is on his way back to the S. of Pal., E. meets him with 400 men. It is not clear that his purpose was hostile, as Jacob supposed: the men may have been mustered for war against Horites. Twenty years had intervened since J.'s departure; time is a great healer; and E.'s wrath may have been mollified by success. Any remaining animosity was appeased by Jacob's abundant gifts (which had the aspect of tribute), and vanished at the sight of the prostrate brother. 'E. ran to meet him, and embraced him, and fell on his neck, and kissed him' (Gn 33^{4}). They met once more, in peace, at Isaac's funeral, after which E., partly 'because their substance was too great for them to dwell together,' severed his connexion with Canaan, and made Seir his permanent abode (36^{8}).

---

* Ges., Kalisch, etc. Acc. to Pseudo-Jon.'s Targ. 'ready made,' from עָשָׂה to make, or make ready, because E. 'was born with hair of head, beard, and teeth.'

† Cf. the story of the twins Acrisius and Proetus, related by Apollodorus, *De Deor. Orig.* ii. 2. 1.

‡ Ps.-Jon.'s Targ. records a tradition that it was the day of Abraham's death.

§ So Ges. (לָעַט). Lit. 'that red, red thing,' as if he could not wait to recall the proper word.

‖ Farinaceous food may have been a tempting luxury owing to 'famine in the land' (Gn 26^{1}, assigned to the same J document as $25^{27ff.}$).

The epithet βέβηλος 'profane' (He 12^{16}), [§] *i.e.* unconsecrated, secular (Lv 10^{10}, 1 S 21^{4}, Soph. *Œd. Col.* 10), rather than blasphemous, supplies a key to E.'s character and history. Frank and manly, affectionate and impulsively generous, irascible but not implacable, E. is naturally lovable, and exhibits materials out of which a fine character might have been developed. But he discloses no spiritual aspiration or God-ward bent; no sense of unworthiness or devout surrender to divine guidance, such as Jacob, amid grave faults, exemplifies. This lack of consecration leaves E. subject to animal appetite; leads him into secularizing, if not demoralizing, alliance with Canaanites; renders him careless of spiritual blessing and insensible to high ideals; causes his conduct to be dominated by impulse, not regulated by principle; and prevents that moral growth through which Jacob, originally far less amiable, is transformed from a tricky 'supplanter' into Israel, a prince of God. Even E.'s natural frankness and generosity fail him, when he tries, without Jacob's knowledge, to obtain the blessing virtually forfeited, and resolves to slay his brother, not in the first heat of resentment, but prudently, in cool blood, after Isaac's death has removed the peril of paternal curse. His later pacification—the outcome, directly, of affectionate impulse—was probably due also to the conviction that the head of a host of 400 had, after all, lost nothing through being supplanted by one whom the coveted blessing, after twenty years, had made only a successful cattle-breeder.

Some modern critics[*] regard the history of E. and Jacob as more or less mythical. Ewald supposes the details about E. were suggested by the rough nature of Idumæa (שֵׂעִיר Seir=rough), and by the later relations of Edom and Israel. Kuenen lays stress on the representation of E. and Jacob (with other personages in Gn) as 'progenitors of tribes'—a 'theory of the origin of nations' which 'the historical sense of the present day rejects.' Families, he declares, become nations, not so much by multiplying as by conquest of and combination with other populations. For discussion of the general question, see TRIBE. As regards Esau in particular, (1) the roughness of Edomite territory may be reasonably traced to the disposition of a progenitor whose rough strength prompted him to choose an abode suited to his habits. (2) Nothing in Gn precludes the supposition that the Edomites (as well as the Israelites) included within their communities the descendants of retainers and immigrants. (3) It is difficult to believe that legends containing so much that is derogatory to the venerated Jacob, and favourable (comparatively) to the ancestor of unfriendly Edomites, should grow up among the Jews. Of the stories and features of character which would naturally cluster round E.'s name in Heb. circles, we have specimens in Rabbinical writings which represent E. as thief, fornicator, blasphemer, etc., as committing five heinous sins in one day, as giving his father dog's flesh for venison, and biting Jacob after the latter's return.[†] The impartiality of Gn in revealing much that is attractive about E. and repulsive (even to an Eastern mind) about Jacob, suggests a substantially historical record which could hold its ground in spite of its (to the Jews) unpalatable character.

H. COWAN.

ESCHATOLOGY (*τὰ ἔσχατα, the last things*).—Eschatology gives an account of the final condition of man and the world as this is represented in scripture. The idea of a final condition of mankind and the world rests on the other idea that history is a moral process, with a goal towards which it is moving. In scripture this moral process is specifically a redemptive process, of which the author and the finisher is God, He Himself being the end towards which mankind is being drawn, for the perfection of man lies in full fellowship with God; and the perfection of man is reflected in, and subserved by, a new condition of the world, which is transfigured with his redemption. In this view the Messianic idea and hope becomes an important element in eschatology; but in OT, at least in its earlier portions, the Messianic is not yet so developed as to be a constant feature in the eschatological picture, much less that which gives its whole colour to the picture. The redeemer is God—'salvation belongeth unto the LORD' (Ps 3); and if the Messiah anywhere be redeemer or king of the redeemed people, he is so in virtue of the *divine* in him, as being in some way God in manifestation (Is 9^{2-7}). The nomenclature, therefore, of some writers, who employ eschatological and Messianic as synonymous terms, is somewhat confusing; for, though this terminology be more and more justified as revelation advances, there are many eschatological passages even in late writings in which there is not only no mention of the personal Messiah, but in which there is no reason to suppose that the idea of a personal Messiah lay as a presupposition in the background of the author's thought. The OT reveals its conceptions piecemeal. Its writers are like subordinate workmen, each absorbed in his own particular task, in polishing a corner or carving a chapiter or wreathing a pillar; it is only when the master-builder appears, with the full idea of the house in his mind, that each of the separate parts takes its place in the building. While, therefore, every Messianic passage is eschatological, there are many eschatological passages not Messianic.

---

[*] The differences in the names and parentage of E.'s wives, as given in Gn 26^{34} 28^{9} and 36^{2} are due, perhaps, not to divergent traditions (for these passages are all assigned to the same 'source,' P), but (1) to double names, (2) to errors in transcription by the editor of the documents.

[†] The words in Gn 27^{39} may mean either (partitively) that E.'s dwelling would be 'of the fatness' or (privatively) 'away from the fatness.' The latter suits better the character of Seir.

[‡] Gn 36 (P) suggests, when taken by itself, that E.'s departure to Seir took place only after Jacob's return to Canaan, not before it; as 32^{3} (J) intimates; but if we suppose that, so long as Isaac lived, E., while dwelling much in Seir, retained an abode in Can., the discrepancy disappears.

[§] If πόρνος 'fornicator' in this verse refer to E. (which is doubtful), the ref. is either to his marriages with idolatresses, or to Heb. traditions of his gross immorality.

Besides exhibiting the scripture views of the final condition of things, eschatology may take notice of the phenomena, the physical convulsions, or the national commotions amidst which the final condition is ushered in; or it may go a step farther back and refer to the moral forces bringing about these manifestations and revealed in them. In OT physical nature has no meaning of its own; it is a mere medium for the transmission and manifestation of moral impulses; and the same is true in a sense of human history, for, though men and nations act voluntarily, ultimately all their movements are inspired and led by God, the First and the Last (Is 41^4 48^{12}). The final condition of men and the world is therefore regarded in OT less as the perfect issue of a gradual ethical advancement in the mind of men and the nations than as the result of an interposition, or a chain of interpositions, on the part of God, though these interpositions, under whatever external forms they may be revealed, are of course all moral.

THE ESCHATOLOGY OF OT may be treated under two heads: The eschatology of the People, and the eschatology of the individual Person. As the People in their final condition have necessarily some relation to the nations, the eschatology of the People widens out in many passages to be an eschatology of mankind and the world; while, on the other hand, owing to the idea prevalent in OT, particularly in the prophets, that the religious subject in relation with God is the People, the eschatology of the individual Person in distinction from the People is little developed, and some of the passages that appear to relate to it are uncertain in meaning. In other words, the eschatology of the People is the doctrine of the perfection of the kingdom of God upon the earth, while the eschatology of the individual Person is the doctrine of Immortality.

I. ESCHATOLOGY OF THE PEOPLE.—Though formally the people came into existence only at the Exodus, yet ideally it already existed in the patriarchal family from Abraham downwards (Is 41^8), and some of the widest hopes and aspirations cherished by the people in later times in regard to their place in the religious history of mankind are already expressed in connexion with Abraham. But previous to the time when, by a process of divine selection, the religious destinies of mankind were entrusted to his family, some eschatological intimations were given. It is characteristic of all these early intimations that they are general both in meaning and in regard to time. The earliest of them, the promise that the seed of the woman would bruise the head of the serpent (Gn 3^{15}), bears upon the family of mankind universally. It may not be easy to say what sense our first parents or even Israelitish readers put into these words. The fulness of meaning which we are now able to express by them, and the individual application of 'the seed of the woman' which we can make, can hardly have been suggested to them. But they would be assured that the family of mankind would have the upper hand in the struggle against the author of their calamitous transgression; and as the meaning and consequences of what had befallen them became clearer, so would their conception of what was meant by bruising the serpent's head, and how alone that could be done. Equally universalistic, though more definite in regard to the means of its accomplishment, is the promise given to Abraham, 'In thee shall all the families of the earth be blessed' (Gn 12^3). Such a promise could not soon be fulfilled, and there might be room for conjecture even as to the manner of fulfilment; yet the patriarch, knowing wherein his own blessedness lay, in his knowledge of God and fellowship with Him, would surmise that through his seed this true knowledge of God would reach all peoples. The sense is little altered if for 'be blessed' we render 'bless themselves,' *i.e.* wish for themselves the same blessings as Abraham and his seed are seen to enjoy (cf. Nu 23^{10}). Some other passages, such as the Blessing of Noah (Gn $9^{25ff.}$), are international, religious prominence being given to the family of Shem; while others, such as the Blessing of Jacob and Moses (Gn 49, Dt 33), are more national, having respect to the place of the tribes in Canaan. The phrase 'the last days' (אַחֲרִית הַיָּמִים) describes the farthest future into which the eye of the seer reaches, and may have different senses. In Gn 49^1 it refers to the final disposition of the tribes in Canaan (though 49^{10} may have a wider outlook; see PROPHECY); while in Is 2^2 it refers to the final condition of the family of mankind, when all nations shall appeal to the God of Jacob as the righteous arbiter in all international causes. Dt 32 ends with the hope of the victory of Israel over all its enemies, and in his Last Words (2 S 23) David expresses the assurance that under his family a kingdom of Righteousness will arise.

The Day of the Lord.—In the 8th century B.C. the faith of Israel was virtually complete. Amos taught that God is Righteousness; Hosea, that He is Love; Isaiah, that He is the Lord the King, who has founded His kingdom in Zion, on the throne of which shall sit for ever one of the house of David, the Prince of Peace, filled with the fulness of the Spirit of God (Is 9. 11). But besides this Messianic eschatology belonging to the second period of Isaiah's career, there is another belonging to the earliest period (chs. 2. 3), which he calls 'the Day of the Lord.' The prophet does not expressly combine the two, though they are probably to be regarded the one as the dark side and the other as the light side of the same cloud of judgment. In the earlier chapters he moves more among principles, moral necessities; in the second period (ch. 7 ff.) the actors are already on the scene who shall carry out the programme which in his first days he perceived to be inevitable. The phrase 'the Day of the Lord' is first heard in the mouths of the people (Am $5^{18ff.}$). The term 'day' is much used in Arabic of a battle day, as the day of Badr, Ohod, and the like, and so in Heb. 'the day of

Midian' (Is 9^{4}), and this may be its primary meaning. The day of the Lord to the popular mind would be the day when J″ their God would interpose in their behalf to deliver them. The deliverance would be primarily from external hostile oppression, but internal social miseries might also be included. The idea and the phrase may thus be very ancient, though they appear first in Amos. All that the phrase connotes in the mouth of the people is the sense of misery and oppression, the belief that only their God can deliver them, faith in His power, and a hope or conviction of His approaching intervention, though on what this conviction was founded does not appear. But to the prophets of this age J″ is a purely ethical Being, the moral ruler of Israel and the nations, and the sin of Israel and the world demands His intervention. Hence the first aspect of the day of the Lord is always a day of judgment. But judgment is not an end in itself; it is only in order to redemption, and behind the storm of judgment there always rises clear the day of salvation. The conception of the sin of the world which compels the intervention of the Judge differs in different prophets. In Amos it is social and civil unrighteousness; in Hosea, religious unfaithfulness; in Isaiah, insensibility to the majesty of the great King, who must interpose to bring the sense of Himself home to men's minds.

'The day of the Lord' is an eschatological idea; the phrase cannot be rendered '*a* day of the Lord,' as if any great calamity or judgment felt to be impending might be so named; the 'day' is that of the final and universal judgment. But, of course, a prophet's presentiment of its nearness might not be realized; the crisis which he saw impending and deemed the great 'day' itself, or the beginning of it, might pass over and the 'day' be deferred. But this fact should not lead us to suppose that the prophets call any great visitation of God by the name of 'the day of the Lord.' Again, the term 'day,' if it originally meant battle day, suggests the presence of some foe whom God uses as His instrument of judgment. This feature, however, is not always present in descriptions of the day. Sometimes the terrors of the day of the Lord are represented as due to His manifestation of Himself and the convulsions of nature that accompany His appearing, 'when He arises to shake terribly the earth' (Is 2^{10-22}). But at other times, besides the supernatural gloom and terrors that surround Him when He appears, He is represented as using some fierce, distant nation as the instrument by which He executes His judgment (Is 13, Zeph). The judgment of the day of the Lord is a judgment on the known world, and the nation that executes the judgment is some wild people emerging from the dark places of the earth lying beyond the confines of the known world.* Once more, when the prophets speak of the day of the Lord they always regard it as near (Is 13^{6}, Jl 1^{15} 2^{1}). The coming of the 'day' itself was a settled belief, but of its time knew no man; the presentiment of its nearness was awakened in the mind of the prophet by what he saw of the moral condition of mankind or of the operations of God in the world. To one prophet the insensibility of men to the majesty of the Lord the King seems so frightful that He must interpose to cast down everything that is high, so that He alone shall be exalted in that day (Is 2. 3); to another He is so visibly operating in the convulsions of the nations that His full manifestation of Himself seems at hand (Is 13, Zeph); while to a third the severe natural calamities with which He is visiting His people seem the tokens and heralds of His final judgment (Jl 1. 2). The prophets' hearts were filled with great religious issues, with presentiments of the future of the world in God's hand. These presentiments were so vivid in their hearts that they were constantly looking for the fulfilment of them. And thus when the currents of providence, often too sluggish to their eager eyes, received a sudden quickening, when great events were moving and J″ visibly interposing in the affairs of the world, they felt that He was taking to Him His great power. It was but a step or two when the kingdom would be the Lord's.

(1) In the pre-exilic prophets the day of the Lord is a judgment primarily on Israel (Am 3^{2}), though it also embraces the nations. It is Israel's national dissolution, though the dissolution is only in order to a new reconstruction. The sinners of the people shall be destroyed, and a poor and humble people left behind (Zeph 3^{12}, Is 2. 3, Hos 4^{3} $2^{18\text{ff.}}$). (2) With the Exile the judgment on Israel seemed to have been fulfilled, and during the Exile and at the period of the Restoration the judgment of the day of the Lord is represented as falling on the heathen world, and its issue is Israel's redemption (Is 13, Hag, Zec 1–8). And this feeling is often expressed in passages where the day of the Lord is not formally mentioned (Is 40 ff., Ps 93–99). (3) But after the Restoration, when Israel was again a people, and the old internal antagonisms and wrongs once more manifested themselves, prophets have to threaten it anew with the refiner's fire of the Day of the Lord (Mal $3^{2\text{ff.}}$). Still, though in the post-exilic literature the judgment is also a sifting of Israel itself (*e.g.* Ps 50), it is mainly regarded as falling on the heathen world, and issues in Israel's deliverance and the restoration of the Diaspora (Dn $7^{21\text{ff.}}$). This idea largely pervades the later Psalms. Psalms differ from prophecy. Like the hymns of all peoples, they are not creative but representative. They give back, in thanksgiving, in praise, and often in prayer, the faiths and hopes already contained in the mind of the community and long cherished. And these hopes and faiths are in the main eschatological. When the Psalms speak of the judgment (1^{5} $7^{6\text{ff.}}$ 35^{23} etc.), and of the meek inheriting the earth (37^{11}), of the nearness of the day of the wicked (37^{13}), of seeing God's face in righteousness (17^{15}), of the upright having dominion speedily over the unrighteous (49^{14}), and much of the same kind, they are not uttering vague hopes never before expressed, but reflecting the certainties of a faith as old at least as the prophets of the 8th cent., the certainty of a judgment of God (Is $1^{24\text{ff.}}$ 2. 3), and of the rise behind it of a kingdom of righteousness (Is 1^{26} 9^{7} $11^{4\text{ff.}}$), and peace (Is 2^{4} 9^{7} 11^{9}), and everlasting joy (Is 9^{3}, Hos $2^{18\text{ff.}}$).

To follow the scripture statements regarding the Day of the Lord through the three periods just mentioned would lead to much repetition: it will be enough to state some general points connected with the Day. The Day of the Lord is His time for manifesting Himself, for displaying His character, for performing His work, His short and strange work upon the earth. 'The Lord of Hosts hath a day upon every one that is proud and lofty, and he shall be brought low . . . and the Lord alone shall be exalted in that day' (Is $2^{12.\,17}$).

1. As it was a day of the manifestation of J″, God of Israel, in His fulness and therefore in a way to realize His purposes, which with Israel and even with the world were those of grace, it is fundamentally a day of joy to Israel, and even to the world—'the Lord is king, let the earth rejoice, let the multitude of the Isles be glad thereof. Say among the nations, The Lord is King; let the heavens rejoice, and let the earth be glad' (Ps 96). That J″ should reign, and that He should come to the earth as king, must, in spite of all the terrors that might attend His coming, bring to the world

---

* Davidson, *Nah, Hab, and Zeph* in 'Cambridge Bible,' p. 118; Driver, *Joel and Amos* in same series, p. 185.

a pervading gladness. For the falsehood and injustice that had cursed the earth so long would disappear, and the longing of men, who were ever in words or sighs saying, Show us the Father, would be satisfied. But it would be a day of joy above all to Israel, His people, when He should plead her cause, for the day of vengeance was in His heart and the year of His redeemed was come. Naturally, an accompaniment of the manifestation of J″ was the disappearance of the idols—'On that day men shall cast their idols of silver and their idols of gold to the moles and to the bats' (Is 2^{20}). But in the view of the prophets those gigantic oppressions, the empires of Assyria and Babylon, were but projections of their idolatry, with its cruelties and licentiousness and pride. The later prophet Daniel expresses this idea in a graphic figure when he represents the heathen monarchies under the symbol of various savage beasts, while the kingdom of God is represented under the image of a man.

2. To those in Israel who looked for His coming, apart from the natural terrors of it, it was unmixed joy (Hab 3). And it would have been so to all Israel had fidelity to their God been universal. But this was far from being the condition of Israel. There were many who belonged to Israel only in race. They were filled from the East, and soothsayers like the Philistines. They imitated the idolatries and practised the sins of the nations. Hence the prophets warn the people against a superficial conception of the Day of the Lord, as if it would be a mere interference of J″ in behalf of His people as a nation, and not a revelation of His righteous judgment—'Woe unto you that desire the day of the Lord. Wherefore will ye have the day of the Lord? It is darkness and not light; as if a man did flee from a lion and a bear met him' (Am 5^{18}). Hence the Day is first of all judgment, and only through this salvation. Sometimes one side is made prominent and sometimes another, the side of judgment (as has been said) in the pre-exile prophets, and the other side in prophets later down (*e.g.* Ob ^{15}). It is around the Day as one of judgment that all the terrible pictures of gloom and the dissolution of nature are gathered (Is 2. 3. 13. 24, Hos 10^{8}, Am 5^{18}, Jl $2^{2.\,10}$ 3, Zeph 1). These convulsions in nature which accompany the Day of the Lord may not be all to be explained in the same way, but the general idea seems this: the universe is a human world; man is the head of creation, and creation is virtually the earth; the heavens are a mere appendage of the earth, subserving the moral life of mankind—being for signs and seasons, and days and years. Hence in man's judgment the world suffers dissolution, and in his redemption it is renewed and transfigured.

3. As has been said, the coming of the Day was an article of faith as much as our belief in the Last Day, but the presentiment of its nearness was awakened by what the prophet perceived around him: the moral condition of the world (Is 2. 3, Mic 3), God's operations among the nations of the earth (Is 13, Zeph 1), His judgments on His people (Jl 1. 2), or the beginnings of their redemption already experienced at the Restoration, which led to the hope of His full manifestation to dwell in His House when it should be prepared (Hag, Zec). Naturally, though the Day of the Lord was a crisis, and itself of brief duration, the phrase 'that day' is often used to cover the period ushered in by the day. This is the period of final perfection and blessedness. It is identical with what in other passages is the Messianic age, and with the ideal condition following the Restoration as conceived by such prophets as Deutero-Isaiah (Is 60). It is a period entirely homogeneous. There are no occurrences within it. It has characteristics, but no internal development. It is a period of light and peace and the knowledge of God, which covers the earth as the waters cover the sea. Subsequent revelation has broken up the coming of the Messiah into a coming and a coming again, and history has intercalated between the two an age full of developments and vast changes. But the prophets embrace all in one period over which there hangs a divine light. The characteristics they assign to the Messianic age or the period introduced by the Day of the Lord are in the main those characteristics which we assign to the age which the second coming shall introduce. These characteristics are the issue of the first coming, the natural expansion of its principles; and to the prophets the principles and their realization all seem condensed into one point.

4. The prophets are not interested in giving mere predictions of external events or conditions of the world, but in setting before the people the moral development and issues of the kingdom; and just as the Day of the Lord seems to them to issue out of the conditions of the world of their own day, so they sometimes bring down the moral issues of the kingdom upon an external condition of the world such as it was in their own time. There is perfect realizing of moral principles, but the condition of the world in its kingdoms and the like remains unchanged. But ordinarily this is not the case.

(*a*) A constant feature in the eschatological picture is Israel's restoration to its own land. The Lord will say to the North, Give up; and to the South, Keep not back: bring my sons from far, and my daughters from the ends of the earth; even every one that is called by my name (Is 43^{6}). And in this land all earthly blessings attend the people (Am 9^{11-15}); they attain joy and gladness, and sorrow and sighing shall flee away (Is 35^{10} 65^{19}). The people are also truly the people of God—'Thy people shall be all righteous'; 'In the Lord shall all the seed of Israel be justified, and shall glory' (Is 45^{25}). The people's restoration to everlasting felicity and their righteousness are but different sides of the same thing. Cast out because of their sins, they are restored because of their righteousness, although the righteousness be one bestowed on them by God (Is $43^{25\mathrm{ff.}}$); and their restoration is the outer side of their justification, the token to their own heart and to the eyes of the nations that they are in truth now the people of God (Is 61^{9} $65^{17\mathrm{ff.}}$). The question how in our day we are to interpret such prophecies is a double one. It is a question, first, of what the prophets meant. And to this question there can be but one answer—their meaning is the literal sense of their words. They spoke of the people Israel and of the land of Canaan, and predicted the restoration of the people to their land, and their everlasting abode there with their God in the midst of them. This was their view in their day of the final condition of the people. Of course, to the prophets the essential thing was the spiritual perfection and blessedness of the people given by the presence among them of their God in His fulness, but they were unable to conceive this except as reflected in an external condition of the people. The other question is how we may expect these OT prophecies to be fulfilled now that the NT dispensation is come. There is no question as to the meaning of the OT prophecies; the question is how far this meaning is now valid. The question is not one to be dogmatic on, but we should naturally say that it is to be decided by the principles of the NT dispensation. The only NT writer who seems formally to argue the question is St. Paul (Ro 9–11). Now, he argues only on the spiritual side of the Abrahamic covenant, or rather he regards the covenant as an exclusively spiritual or redemptive instrument (see art. COVENANT, last par.). Those, therefore, who, in advocating the idea of the Restoration of Israel to their own land, think themselves entitled to reason on the material side of the covenant (the promise of the land), cannot plead the apostle's authority nor his example. It may be made a question, indeed, whether his reasoning does not exclude theirs, for his view appears to be that the covenant from the moment it took effect was a purely spiritual and redemptive deed. To his mind the covenant guarantees the final salvation of Israel. The church of God is historical and continuous. It was planted in Abraham, and it is perennial. Israel was the church, and continues to be; and if the Gentiles be in it, they have been grafted in; and if some of the natural branches be meantime broken off, God is able to graft them in again; and this He will do, 'and so all Israel shall be saved.' This is St. Paul's manner of stating the idea of Deutero-Isaiah, that the true knowledge of the true God has been given once for all to Israel, and given to be the heritage of mankind. If the OT prophecies are to be brought into the argument, the order in which they place things must be observed. That order is, first, righteousness and faith, and then restoration to Canaan. A return of Jews to Canaan while still in unbelief, however interesting a thing in itself, does not come into contact with OT prophecy.

(*b*) Another feature in the eschatological picture is the relation of the nations to Israel and their God. In some prophecies, especially those that are apocalyptic in their character, there is the idea of a final attack on Israel by the nations, and a great conflict near Jerusalem or in Canaan, in which the nations are overthrown and destroyed (Ezk 38. 39, Jl 3, Zec 14, Ob v.^{18}, Dn). But usually the nations are represented as attaching themselves to Israel, drawn either by the righteousness and humanity of the Messianic King (Ps 72), or convinced that the God of Israel is God alone (Is 2)—a conviction which they receive in various ways, as through J″'s terrible revelation of Himself (Zeph $3^{8.9}$, Is $66^{18ff.}$), but chiefly through the teaching of Israel, the servant of the Lord, who becomes the light of the nations, and the peoples wait on His arm (Is 42^{6} 49^{6} $50^{5ff.}$ $51^{4ff.}$ 60). But while already in the OT the Gentiles are fellow-heirs of salvation with Israel, the racial distinction is not obliterated. Jews and Gentiles do not amalgamate into one people or church—Israel 'inherits the Gentiles' (Is 54^{3}), 'the kingdom is given to the people of the saints of the Most High' (Dn 7^{27}). The nations occupy a subordinate place. There may be different shades of view in different passages. Of course, when the prophets wrote, Israel alone possessed the knowledge of the true God, and its place was that of benefactor of the nations, while theirs was that of recipients of blessing from Israel. Therefore the nations do homage to Israel, but it is to Israel as having the only true God within it—'they shall make supplication unto thee, saying, Surely God is in thee; and there is none else, no God' (Is 45^{14} 49^{23}, cf. 14^{2} 60^{9} 61^{6}).

5. From what has been said, it can be seen what general conceptions the OT contributes to Christian Eschatology. They are such as these: (1) the manifestation or advent of God; (2) the universal judgment; (3) behind the judgment the coming of the perfect kingdom of the Lord, when all Israel shall be saved, and when the nations shall be partakers of their salvation; and (4) the finality and eternity of this condition, that which constitutes the blessedness of the saved people being the Presence of God in the midst of them—this last point corresponding to the Christian idea of heaven. All this is said of the people as a people. The people is immortal and its life eternal; and this life is conceived as lived in this world, though this world transfigured—a new heavens and a new earth (Is 65^{17}). But are the individuals of the people immortal, or is their life, however prolonged and blessed, yet finally closed by death? It is probable that in most passages the prophets have in view the destinies of the people as a unity, the ultimate fate of individuals not being present to their mind. In some passages, however, the destiny of the individual is referred to, and a progress of idea may be observed, though, owing to the uncertain authorship of the passages, it may be precarious to infer at once that the more advanced are the later. In Is $65^{20ff.}$ only a very prolonged life appears promised, 'the days of a tree,' he that dieth at a hundred years shall die a child (cf. Zec 8^{4}). But in the apocalyptic passage Is 24–27 death is represented as abolished, 'the Lord will swallow up death for ever' (25^{8}); and the promise extends to the nations as well as to Israel (ver.$^{6ff.}$). The conception of a resurrection first appears in the prophets, who speak of a resuscitation of the dead nation (Hos 6, Ezk 37). In Is 26^{19}, however, the literal resurrection of individuals is predicted. This is the complement of the Restoration of the living members of the people. And in Dn 12 a resurrection both of the just and unjust is prophesied, though it remains somewhat uncertain whether the resurrection be universal, or be only of those who, in the preceding troublous times, had been specially prominent, whether on the side of righteousness or of evil.

II. ESCHATOLOGY OF THE INDIVIDUAL PERSON.—One of the strangest things in OT is the little place which the individual feels he has, and his tendency to lose himself in larger wholes, such as the tribe or the nation. When in earlier times the individual approached death, he felt that he had received the blessing of life from God and had enjoyed it in His communion; his sojourn with God had come to an end, he was old and full of days, and he acquiesced in death, however strange his acquiescence may seem to us. He consoled himself with the thought that he did not all die—'The memory of the righteous is blessed' (cf. Is $56^{4.5}$). He lived, too, in his children and in his people. He saw the good of Israel; his spirit lived, and the work of his hands was established. The great subject was the people, the nation; J″ had established His covenant with the nation, and the individual was blessed in the blessing and fortune of the whole. And he was content to have poured his little stream of life and service into the tide of national life, and in some degree to have swelled it. This was particularly the case, so far as can be judged, in earlier times. But when the nation came to an end with the Captivity, when national life and religion no more existed, the individual rose to his own proper place and rights, and felt his own worth and responsibility. Though the nation had fallen the individuals remained, and J″ and religion remained, though religion remained only in the heart of the individual. The religious unit, formerly the people, now became more and more the single person, and the truths regarding duty and responsibility, and the hopes of the future, enunciated by the prophets in regard to the people, were appropriated by the individual to himself.

In regard to the Eschatology of the individual person there are two things which require to be carefully distinguished. There are, *first*, certain ideas regarding death and the state of the dead lying in the popular mind, though cherished by all classes, the righteous as well as others, alike. These ideas are common to Israel with some other Shemitic peoples. They have in themselves no moral significance. But some of them, such as the idea that the person, though he died, was not extinguished, but still subsisted as a person, however shadowy the state of subsistence was; and the other idea, that the dead person, though still subsisting, was in death cut off from all fellowship with the living, whether men or God,—these ideas formed points to which the aspirations of the pious might attach themselves, whether in the way of development, as of the first idea, or protest, as against the second idea. And, *secondly*, there are the aspirations, intuitions, or inferences of the pious mind itself. It is only these that can properly be called OT teaching. Such aspirations and intuitions may be either intellectual or emotional, that is, virtually, either ethical or religious, though the basis even of the religious is ethical. The fundamental idea is the moral one: God and man are moral beings, their relation is moral; the universe is a moral constitution, the stage where God displays His righteousness, and where man sees God's face in righteousness. Righteousness must win, and righteousness is eternal (Is 51^{6}). This is the idea that underlies the Book of Job and such Psalms as 37. 49. and 73. There are thus three things to look at: (1) Death and the state of the dead; (2) Life; and (3) the Reconciliation of Death and Life.

(1) By death OT means what we mean when we use the word. It is the phenomenon which we observe. Now, all parts of OT indicate the view that at death the person is not annihilated; he continues to subsist in Sheȯl, the place of the dead, though in a shadowy and feeble form occasioned by the withdrawal of the spirit of life. In this condition of subsistence, which is not life but death, in Sheȯl, the common abode of all dead persons, there is no distinction in destiny between the righteous and the ungodly. OT does not name those in Sheȯl either souls or spirits, they are persons. It is possible that they were conceived as retaining a shadowy flickering outline of their former personality, for in Is 14 they sit on thrones, from which they rise up and speak. Subsistence in Sheȯl is a feeble, nerveless reflection of life on earth. These conceptions, as has been said, are not properly scripture teaching, only the popular notions from which its teaching starts. Illustrations of them are such passages as these among others, Ps 6. 30, Is 14. 38, Job 3. 10. Thus, to start with, OT is not materialistic, death is not the extinction of the formerly living person. Neither is it philosophic, regarding the body as the prison-house of the soul, released from which it can spread its wings and soar unfettered into regions of pure and perfect life. Nor is it, to begin with at least, Christian in the sense that the spirit attains to perfection at death.

(2) As by death so by life OT means what we mean by it. It starts from the idea, not of the soul, but of the person. Life is what we so call when we see it, the subsistence of the complete personality in the unity of its parts, body and soul. An essential part of man's being is the body; and life is life in the body, such as it is before the analysis which we call death, and corresponds therefore to the Christian synthesis called the resurrection life. Hence Job, when the idea of a second life first dawns upon him, can conceive it only as a renewal of the natural life—'If a man die, shall he live again?' (ch. 14). But as life was due to the communication by God of the spirit of life, and death to the withdrawal of this spirit, these operations came under the moral idea, and 'life' meant moral life in the favour of God (Ezk 33)—'in the way of righteousness is life'; 'righteousness delivereth from death.' OT scriptures occupy themselves chiefly with the condition of man on this side of death, and they teach that whatever principles are involved in the relations of men to God they come always to light in this life; death does not change these relations; on the contrary, by its manner or circumstances it reveals them (Ps 37. 73).

(3) Now, this conception of life naturally came into collision with the fact of death. And OT doctrine of immortality, when *death* is had in view, consists of the efforts made by the faith of pious men to gain for the idea of life just referred to the victory over the fact of death. These efforts are of two kinds: one consists of an appeal against the fact of death, a demand for immortality or not dying, a protest against the fellowship of the living man here with God being interrupted, or a lofty assurance that it cannot be interrupted. It is quite possible that the examples of this may have to be referred to particular circumstances, when death might be actually threatening; but the language used, the demand made for the continuance of life, the lofty assurance of faith that the relation of the person to God cannot be interrupted, rise to the expression of principles, and are by no means merely the expression of an assurance that God would save from death on this particular occasion. This is the meaning of Ps 16, 'I have set the Lord always before me; because he is at my right hand, I shall not be moved. Thou wilt not leave my soul over to Sheȯl; thou wilt not let thine holy one see the pit.' What the speaker is assured of is deliverance from death. But his assurance has an absoluteness in it. It expresses principles. In his ecstasy of life in God he feels life to be eternal. The tie between him and J″ is indissoluble. With our more reflecting habits of thought this ecstasy of faith is hard to conceive. To us the fact of death is so inevitable that we cannot imagine any one resisting it. We accept the fact, and rest on what lies beyond. But the resistance of the pious Hebrew was due just to his not knowing what lay beyond, and was but a mode of making a demand for that which we now know to lie beyond.

The other line of thought was somewhat different; it was not so much a protest against dying, as a protest that dying was not death; it was a denial that death was to the saint of God that which the popular mind regarded it to be—a separation from God and descent into Sheȯl. The fellowship with God had in life, and which was life, would remain unbroken in death. This amounted to the faith that the godly soul would overleap Sheȯl and pass to God. This appears to be the faith expressed in Ps 49 and 73, and in a certain sense in Job 19.

Before these poetical passages, which are obscure, are briefly looked at, something must be said of Sheȯl and the state of the dead; though, as has been said, OT statements about Sheȯl chiefly reflect the popular sentiments, and have little positive value. It might be surmised from the strong expressions used many times of death in the OT that in death existence absolutely came to an end. Thus Ps 146^{4} 'his breath goeth forth, he returneth to his earth; in that very day his thoughts perish'; Ps 39^{13} 'O spare me, that I may recover strength, before I go hence, and be no more.' And perhaps most strongly of all Job $14^{7ff.}$ 'for a tree hath hope, if it be cut down, it will sprout again; but man lieth down, and riseth not; till the heavens be no more, they shall not awake, nor be raised out of their sleep' (cf. 7^{21}). But these are only the strong expressions of despondency and regret over a life mournfully soon ended, and that never returns to be lived on this earth again. The conception of

Sheòl is sufficient answer to the apparent doctrine which they teach. The word Sheòl (שְׁאוֹל, twice written defectively, and usually *fem.*, as nouns of place mostly are), is of uncertain derivation. Its root has been supposed to be a softened form of another root (שָׁעַל, represented by שֹׁעַל the hollow hand, Is 40^{12}) signifying perhaps 'to be hollow,' in which case it would have the same meaning as our word 'hell' (Germ. *Hölle*); and the name 'pit' with which it is interchanged in OT (*ἄβυσσος* in NT) might seem to favour this derivation. A corresponding Assyrian *Suâlu* (Fried. Del., Jeremias) is denied by Jensen. Sheòl is the opposite of the upper sphere of light and life; it is 'deep Sheòl' (Ps 86^{13} 63^{9}), the region of darkness, 'a land of darkness as darkness itself, without any order, and where the light is as darkness' (Job 10^{22}). There is no strict topography to be sought for Sheòl; it is in great measure the creation of the imagination, deep down under the earth or under the waters (Job 26^{5}). It is not to be identified with the grave, though the grave be often regarded as the mouth of it; and it is sometimes represented as a vast burying-place (Is 14^{11}, Ezk 32^{23}). Sheòl is the place of departed personalities; the generations of one's forefathers are there, and he who dies is gathered unto his fathers; the tribal divisions of one's race are there, and the dead is gathered unto his peoples, and if his descendants have died before him, they are there and he goes down to them, as Jacob to his son, and David to his child (Gn 37^{35} 42^{38}, 2 S 12^{23}).

(1) *The state of those in Sheòl.*—As death consists in the withdrawal by God of the spirit of life, the source of energy and vital power, the personalities in Sheòl are feeble and flaccid. They are shades (רְפָאִים Job 26^{5}, Is 14^{9}). Their abode is called 'silence' (Ps 94^{17}); it is 'the land of forgetfulness' (Ps 88^{12}); 'the living know that they must die, the dead know not anything' (Ec 9^{5}); 'his sons come to honour, and he knoweth it not; and they are brought low, and he perceiveth it not of them' (Job 14^{21}). But other passages represent the existence of the dead in Sheòl as a dreamy reflection of life on earth, in which self-consciousness and ability to recognize others still remain—'Art thou become weak as we; art thou become like unto us?' is the language addressed by the Shades to the prince of Babylon when he descends among them. (2) *There is no distinction of good and evil in Sheòl.*—All must go into Sheòl, and all alike are there (Job 3^{17}). Sheòl itself is no place of punishment nor of reward (Ec 9^{5}), neither is it divided into compartments having this meaning: 'To-morrow,' said Samuel to the king whom God had rejected, 'to-morrow shalt thou and thy sons be with me' (1 S 28^{19}). The idea of a deeper or darker Sheòl in any penal sense cannot be verified. 'The farthest recesses of the pit' into which the prince of Babylon is thrust in death forms a mere antithesis to the 'farthest recesses of the North,' the abode of the gods, where he aspired to seat himself when alive (Is 14^{15}). If the 'prison' referred to Is 24^{22} be Sheòl, incarceration in Sheòl, *i.e.* death, is regarded as the penal issue of the judgment. And the state of the dead being a reflection of life on earth, any dishonour done to one on earth, such as being deprived of sepulture, may still cleave to him when he descends into the Underworld (Is 14, Ezk 32). The language of Is 66^{24} 'their worm dieth not, and their fire is not quenched,' refers to the bodies of the ungodly, which are cast out upon earth, an abhorring to all flesh, and not to the ungodly themselves in Sheòl. (3) *All connexion with the world of the living is broken off.*—The dead can neither return to earth, nor does he know anything of the events passing there (Job 7^{9} 14^{12}, Ec 9^{5}). Yet with the strong belief in the existence of the persons in Sheòl, there was naturally a popular superstition that they could be reached. This belief gave rise to the necromancy practised among the Hebrews, as among most peoples, though it is proscribed in the law and ridiculed by the prophets (Is 8^{19}). The practice probably did not repose on any general idea that the dead must have a wider knowledge than the living, that 'there must be wisdom with great Death,' but on the idea that great personages continued still to be in death that which they had been in life. This appears to have been the idea of Saul in seeking unto Samuel. There is no record of any one answering from the dead except Samuel. The question whether any connexion was thought to exist between the person in Sheòl and his body can hardly be answered. No such connexion existed as to interfere with the passage of the person into Sheòl, whatever befell the body. The want of burial was in itself dishonouring, and the dishonour continued to cleave to the person among the dead, but it did not, as among some nations, prevent his descent to the world of the dead. There are some passages which seem to speak of a sympathetic *rapport* still existing between the body and the person in Sheòl, but probably they hardly go further than to suggest the idea that the body, though thrown off, was still part of the man, and not mere common unrelated dust. (4) The main point is that *the relation between the dead person and God is cut off.* This is what gave death its significance to the religious mind. Fellowship with God ceases—'In death there is no remembrance of thee; in Sheòl who shall give thee thanks?' 'For Sheòl cannot praise thee; they that go down to the pit cannot hope for thy truth' (Is 38^{18}).

The passages relating to the eschatology of the individual person are mostly poetical, and they are in some points obscure. They are such passages as Ps 16. 17. 22. 37. 49. 73, and many fragments of others, and Job. Now, with regard to these passages several things must be said: first, they are all late, later at all events than the prophetic faith of the 8th cent. This faith—belief in the coming manifestation of God, in the judgment, and in the eternal rest of the people in God's perfect kingdom—was the faith of the writers. Again, all the passages repose upon an acknowledged distinction among men, the distinction of the righteous and the ungodly. This distinction is visible, men are differently related to God. But the problem arose from the fact that men's destinies in the world were not seen to correspond to this distinction: in a moral world morality was not triumphant, in the government of the righteous God righteousness was not acknowledged. No doubt, the pious mind sometimes composed itself by a deeper analysis of that wherein true prosperity or felicity lay—the portion falling to it, even God Himself, was a profounder good than all earthly possessions (Ps 17. 73). Nevertheless, the problem remained and demanded solution. The solution was always an eschatological one, and was just the distinction between the righteous and the ungodly truly realizing itself. In other words, immortality or eternal life is the corollary of religion, as Christ, summing up the whole OT teaching, said, God is not the God of the dead, but of the living; it might even be said to be the corollary of morality—if the universe be a moral world there is everlasting life. The general position of OT saints, with their faith in the advent of God to judge, was very similar to that of the early Christians, who looked for the speedy coming of Christ. This coming would change the world and the Church, but the Church would pass living into perfect blessedness; and, of course, individuals would share the change—'We shall not all die, but we shall all be changed.' Now, this was very like the feeling of OT saints. The individual would share the transition of the community, the Day of the Lord would break, and the living would enter into fulness of life without tasting death. True individualism is little seen in OT. It is real to this extent: the individual realized keenly his own personal life, and longed earnestly to share for himself in the blessings upon which the community would enter when God appeared to abide for ever among them. He longed that he, the living man, should see with his people the glory of the Lord revealed, and enter with his people into life. It was, perhaps, only the prospect of death, or reflection on it, that rounded off individualism and revealed its energies. The life of the community was perennial, but with death before him the individual could not share this life, and he sought to forecast his own personal destiny.

Thus there may be two classes of passages: (1) passages which, though spoken perhaps by individuals, express the hope of the living people, and refer to that great change which the Day of the Lord shall introduce, and which the individual, as part of the people, shall experience without tasting death; and (2) passages where the individual contemplates death, but expresses the assurance that he will not, like the ungodly, fall into Sheŏl, but see life. Ps 37 belongs to the first class, and possibly Ps 73, though the phrase 'take me' might, as in Ps 49, refer to escaping Sheŏl at death. Ps 49 has two peculiarities: first, its opening verses imply that its teaching on immortality is no more an aspiration, but a firm conviction; and secondly, it seems to start from the assumption that death is universal. If this be the case, the words, 'God will redeem my soul from Sheŏl,' must refer to the Psalmist's hope in death. This interpretation may certainly be supported by reference to the parable of Lazarus in Abraham's bosom, which shows that the idea of a blessedness of the spirit at death had been reached before the time of our Lord. It is enough here to state some general principles and give a classification of passages; for details the commentaries must be consulted.* The prophets and saints of the OT were not speculative men. They did not reason that the soul was immortal from its nature,—this was not the kind of immortality in which they were interested,—though, for all that appears, the idea that any human person should become extinguished or be annihilated never occurred to them. They did not lay stress in a reflective way on man's instinctive hopes of immortality, though they may be observed giving these instinctive desires expression. So far as they reasoned, their assurance was based on the moral idea—Righteousness is eternal. So far as they experienced and felt, their assurance was immediate — religion is reciprocal, the consciousness of God is God's giving Himself in the consciousness.

It has always been felt strange that the Pentateuch, which gives the constitution of the people of God, should be silent on death and immortality, or only refer to the popular idea of Sheŏl. In explanation it may be said that the earliest part of the Pent. is anterior to the prophets of the 8th cent., while the later portions are the reflection of the prophetic teaching. Deut. reposes on Isaiah and the prophets of the Assyrian age, and the Priests' Code on Ezekiel. The constitution which they furnish for Israel is the embodiment of the prophetic conceptions. But the conceptions of the prophets are ideal, their pictures of the true Israel are pictures of Israel of the future, Israel of the perfect and final state; in other words, of Israel in what may be called its condition of immortality. The legislation seeks to impose this ideal on Israel of the present. Of necessity, when applied to the conditions of the actual Israel, the ideal was imperfectly realized, and was anew projected into the future.

LITERATURE.—Von Orelli, *Prophecies of the Consummation of the Kingdom*; Bertheau, 'Die Altt. Weissagung von Israel's Reichsherrlichkeit in seinem Lande,' *Jahrbb. für Deutsche Theol.* vols. iv. v. The older literature on Immortality is given in Boettcher, *De Inferis*, 1846, and particularly in W. R. Alger, *A Critical History of the Doctrine of a Future Life, with a Complete Bibliography by Ezra Abbot*, New York, 1871. Besides the relative sections in the *Bib. Theologies*, useful works are: Oehler, *Vet. Test. Sententia de rebus post mortem futuris*, 1846; Perowne (Bp.), *Immortality* (Hulsean Lecture), 1869; Schultz, *Voraussetzungen der Christ. Apocalypse of Baruch
Book of Baruch
4 Ezra
Ascension of Isaiah
} Composite works written partly before and partly after A.D. 70. Part of the Book of Baruch may belong to the 2nd cent. B.C.
Josephus.

The above authorities vary indefinitely in the degree of light they shed on the evolution of eschatological thought among the Jews. Thus very little help in this direction is to be derived from Sirach, the Book of Baruch, Judith, and 1 Maccabees. It is, in fact, to the pseudonymous apocalyptic writings that we are almost entirely beholden for the materials of which we are in quest. These not only supply the missing links which unite in orderly development the thought of OT to that of NT, but also in not a few cases are the only documentary authorities for views and doctrines which in later times established themselves securely in Christianity or Judaism.

II. SOME OF THE CONCEPTIONS WHICH GAVE BIRTH TO AND CONTROLLED THE EVOLUTION OF

---

* See particularly the *Anhang* to Studer's *Das Buch Hiob*, Bremen, 1881.

LATER JEWISH ESCHATOLOGY.—These conceptions were already at work in OT, but were applied only sporadically, and in a partially developed form. In the later period they gradually attain to their full rights.

1. *The enlarged conception of God as the Creator and Moral Governor of all the world, and its consequences.*—When once this idea is fully comprehended, the OT conception of Sheol can no longer *logically* exist. And yet these two conflicting conceptions did exist side by side for several centuries. So long as J″ was conceived simply as the tribal God of Israel, and as one among other gods, whose sole concern was the moral well-being and prosperity of His people on earth, then Sheol was naturally conceived as beyond the sphere of His dominion, and so preserved its ancient nonmoral character. It is not, indeed, till almost the Maccabæan period that the former conception has transformed the latter, and the abode of the shades has become a place of moral retribution.

Another consequence of this enlarged conception of God was an enlarged conception of judgment. Since God was the Creator and Ruler of all men, the idea of a final and world judgment, in which the destinies of all should be decided, naturally arose. It must be conceded, however, that in Judaism this idea was, so far as the Gentiles went, always of the most one-sided and inequitable character. In their case, judgment, as a rule, meant simply condemnation. At best they were spared only to become subject to Israel.

2. *The conception of the individual, and his growing claims.*—The doctrine of individual retribution was evolved in OT.[*] It is the direct antithesis of the earlier view of the solidarity of the family, tribe, or nation. The latter doctrine, which identified the responsibilities of the individual with his family or nation, naturally led to strange consequences. Ezekiel (esp. in ch. 18) was the first to attack this doctrine in its entirety, and to replace it by an equally exaggerated and false individualism. As the consequences of sin were still confined to this life, the difficulties of this conception soon came to light. According to it every misfortune is a divine punishment, and every piece of prosperity a special instance of God's favour. The antinomies arising from such a view are discussed in Job and Ecclesiastes, and its untenableness demonstrated no less certainly than that of the doctrine it was intended to supersede. As long as the consequences of man's action were regarded as limited to this life, these antinomies were incapable of solution, and God's dealings with His righteous servants incapable of justification. But notwithstanding the bankruptcy of both these theories, or rather in consequence of it, the faith and religious thought of Israel were set free to attempt a truer and profounder solution of the problem. On the one hand, the *faithful servant* of J″ in due time came to be assured that neither here nor hereafter could he be separated from the love and presence of God; and that for him the ancient Sheol would stretch out its arms in vain. On the other, the *religious thinker* of Israel was equally assured that since God's righteousness did not attain to its full consequences here, it must do so elsewhere; and thus the doctrine of retribution was carried into the after-life, and a personal blessed existence, whether of limited or endless duration, whether as a member of the Messianic kingdom or a direct participant in a blessed immortality, became a postulate of religious thought. In due course the moralization of the old conception of Sheol was effected, not indeed in OT times, but in the subsequent centuries, as we find in Apocalyptic literature.

3. *The growing transcendence of the Messianic expectations.*—In OT the hopes of Israel were in the main confined *to this world and to the well-being of the nation.* Thus they looked for the destruction of their national foes, for the purification of their people, and the establishment of an earthly kingdom of limited or endless duration. The scene of this kingdom was to be the earth purged from all violence and sin. But in the later period the gulf between the present and future begins to widen, and this process goes on till the last resemblances vanish, and the present appears a moral chaos under the rule of Satan and his angels, and the future is conceived as an unending kingdom of blessedness under the immediate sway of God or the Messiah.

III. THE HISTORICAL DEVELOPMENT OF JEWISH ESCHATOLOGY.—(*A*) 2nd cent. B.C.

Sirach.—The eschatology of this book belongs to the OT. Hades is the place of the shades and the region of death (9^{12} $14^{12.\ 16}$ 21^{10} 41^{4} 48^{5}). There is no delight there (14^{16}), no praise of God (17^{27-28}), man is plunged in an eternal sleep (46^{19} 22^{11} 30^{17} 38^{23}). Retribution does not follow a man into the after-life (41^{4}), but his sins are visited through the evil remembrance of his name, and in the misfortunes of his children after him (11^{28} 23^{24-26} 40^{15} 41^{5-8}). As regards the future of the nation, the writer looks forward to the Messianic kingdom of which Elijah is to be the forerunner (48^{10}), when Israel will be delivered from evil ($50^{23.\ 24}$), the scattered tribes restored (33^{13a}, AV 36^{11}), the heathen nations duly punished (32^{22-24}, AV $35^{18.\ 19}$). He expects also the eternal duration of Israel (37^{25}), and likewise of David's line (47^{11}).

Ethiopic Enoch[*] 1–36.—This fragmentary writing represents the earliest, and at all events the most primitive, view of the 'last things' in the literature of the 2nd cent. B.C. According to this writer, retribution inevitably dogs the heels of sin. Thus punishment has already befallen sinful angels and men ($10^{4-10.\ 12}$) in the first world-judgment (10^{1-3}). But the final judgment is yet to come. Meanwhile all who die enter one of the four divisions of Sheol, where they have a foretaste of their ultimate bliss or woe (22). In due course the final judgment comes, ushered in by the resurrection of the righteous and the wicked (with the exception of one class of the latter, $22^{12.\ 13}$). The resurrection seems to be limited to Israel and its progenitors. The fallen angels, demons, and men then receive their final award (10^{12} 16^{1} 1^{9}). The former are plunged into an abyss of fire (=Tartarus, $10^{13.\ 14}$), while the wicked amongst men are cast into Gehenna, and their punishment is a spectacle for the righteous ($27^{2.\ 3}$). Then the eternal Messianic kingdom is established, with Jerusalem and Palestine for its centre (25^{5}). God makes His abode with man (25^{3})—there is no Messiah. All the Gentiles become righteous and worship God (10^{21}). The righteous eat of the tree of life, and enjoy patriarchal lives (5^{9} 25^{6}) and every material blessing (5^{7} $10^{18.\ 19}$ 11^{2}), begetting each 1000 children (10^{17}). There is no hint as to what becomes of the righteous after the second death.

Observe that (1) justice is done to the claims of the righteous nation by the establishment of an eternal Messianic kingdom; (2) and likewise to those of the righteous individual by his resurrection to a long life in this kingdom; also (3) that Sheol has undergone transformation, and become *an intermediate place of moral retribution* for the righteous and the wicked for the first time in literature; (4) Gehenna appears as the final place of punishment for apostate Jews, and Tartarus for the fallen angels; and (5) that the final judgment precedes the Messianic kingdom, and is limited to Israel.

---

[*] Cf. Gn 18^{23-33}, Ex 32^{33}, Nu 16^{22}, Dt 7^{10} 24^{16} etc.

[*] For some treatment of the critical and exegetical questions of this work, the readers should consult the article on this book.

Daniel.—The eschatology of this book in some respects marks an advance on that of the writer just quoted. When the need of the 'saints of the Most High' is greatest ($7^{21.\,22}$ 12^{1}, in the persecution under Antiochus), the Ancient of Days will intervene, and His throne of judgment will be set up (7^{9}), and the kingdoms of the world will be overthrown ($7^{11.\,12}$), and supreme and everlasting dominion given to His saints ($7^{14.\,22.\,27}$); and these will 'break in pieces and consume' (2^{44}) all the kingdoms of the world, and all 'peoples, nations, and languages shall serve' them (7^{14}); their 'dominion is an everlasting dominion which shall not pass away' (7^{14}). And the righteous who 'sleep in a land of dust[*] shall awake,' to share in the eternal life and blessedness of this kingdom (12^{1-3}).

Observe that (1) the Messianic kingdom—there is no Messiah—is established not only through the personal intervention of God, but also through the active efforts of His saints. The latter feature reappears frequently in the later Apocalypses as the 'period of the sword.' (2) The resurrection is a resurrection of the body, and embraces all Israel. (3) The scene of the kingdom is the earth; for 'all peoples, nations, and languages' are its subjects (7^{14}). (4) The context does not decide whether the risen body will possess its natural appetites, as in Eth. En. 1–36, but seems to favour this idea. (5) 'Everlasting life' (12^{2}, or rather 'æonian life' חַיֵּי עוֹלָם) may mean nothing more than a very long life, as in Eth. En. 1–36. (6) Nothing is said as to the future abode of the Gentiles.

Ethiopic Enoch 83–90 (B.C. 166–161).—The writer of this book has advanced considerably beyond the naïve and sensuous views presented in Eth. En. 1–36. His views are more spiritual, and closely allied to the Daniel Apocalypse, which was written a few years earlier. His eschatology is developed at greater length than that of Daniel. Like Daniel, he regards every people under heaven as being under the control of a guardian angel. But this view is peculiarly applied in this author. The undue severities that have befallen Israel are not from God's hand, but are the doing of the 70 shepherds (*i.e.* angels) into whose care God had committed Israel (89^{59}). But these angels have not wronged Israel with impunity; for judgment is at hand. When their oppression is sorest, a righteous league will be formed (*i.e.* the Ḥasidim, 90^{6}), and in it there will be a family from which will come forth Judas the Maccabee (90^{9-16}), who will war victoriously against all the enemies of Israel. While the struggle is still raging, God will appear in person, and the earth will swallow the adversaries of the righteous (90^{18}). The wicked shepherds and the fallen watchers will then be cast into an abyss of fire (*i.e.* Tartarus, 90^{20-25}), and the apostates into Gehenna (90^{26}). Then God Himself will set up the New Jerusalem ($90^{28.\,29}$), and the surviving Gentiles will be converted and serve Israel (90^{30}), and the dispersion will be brought back, and the *righteous* Israelites will be raised to take part in the kingdom (90^{33}). When all is accomplished, the Messiah will appear (90^{37}), and all will be transformed into his likeness.

Observe (1) the growing consciousness of the evils and imperfections of the present world. Thus even Israel for a time is ruled by wicked angels. This dualism manifests itself also in the picture of the future kingdom. Then its centre is not the earthly Jerusalem, but the New Jerusalem, brought down from heaven obviously on the ground of the unfitness of the former. Yet the writers of Eth. En. 1–36 and Daniel were not conscious of this unfitness. (2) As against the two preceding books, Eth. En. 1–36 and Daniel, this book teaches the resurrection of the righteous only. (3) We have here the earliest reference to the Messiah in Apocalyptic literature. But he has no real part to play in the kingdom, and his introduction seems due merely to literary reminiscence.

Ethiopic Enoch 91–104 (B.C. 134–94).—As we pass from the eschatological views of the three preceding books to those of the present, we feel conscious we are entering into a world of new conceptions. In the former books the resurrection and the final judgment were the prelude to an everlasting Messianic kingdom, but in this these great events are relegated to its close. The author acknowledges that the wicked are seemingly sinning with impunity; but this is not so: their evil deeds are recorded every day (104^{7}), and for these they will suffer endless retribution in Sheol (99^{11}); and from this hell of darkness and of flame, into which their souls enter on death, they will never escape ($98^{3.\,10}$ $104^{7.\,8}$). In the eighth week, moreover, the Messianic kingdom will be set up, and the righteous will slay the wicked with the sword (91^{12} 95^{7} 96^{1} etc.). At the close of this kingdom in the tenth week the final judgment will be held, and the former heaven and earth will be destroyed, and a new heaven created (91^{14-16}). Then the righteous dead, who have hitherto been guarded by angels (100^{5}), will be raised (91^{10} 92^{3}), but not in the body, but as spirits only ($103^{3.\,4}$), and they shall joy as the angels (104^{4}), and become companions of the heavenly hosts (104^{6}), and shine as the stars for ever (104^{2}).

Observe that (1) the dualism we have noticed above has already led to its logical results. (2) Thus the Messianic kingdom is apparently for the first time in literature conceived of as temporary. (3) Sheol has for the first time become the equivalent of hell (yet see Eth. En. 22^{13}). (4) The resurrection is for the first time regarded as of the spirit only. (5) Even the heavens need to be created anew.

Tobit.—The eschatology of this book, like that of Sirach, belongs to the OT. The same view of the after-life prevails (4^{10}). It entertains, like the OT, high hopes for the nation. Thus Jerusalem and the temple will be rebuilt with gold and precious stones, the scattered tribes restored, and the heathen, forsaking their idols, will worship the God of Israel (13^{10-18} 14^{4-6}).

Sibylline Oracles, Prooemium and 3^{97-818}.—This book contains many details concerning the last times; but as it belongs to Hellenistic Judaism, it is only of secondary interest in this study of Jewish Palestinian eschatology. It contains, however, a vivid account of the Messianic kingdom. Very soon the people of the Mighty God will grow strong ($3^{194-195}$), and God will send the Messiah from the East, who will put an end to evil war, slaying some and fulfilling the promises in behalf of others, and he will be guided in all things by God. And the temple will be resplendent with glory, and the earth teem with fruitfulness ($3^{652-660}$). Then the nations will muster their forces and attack Palestine ($3^{660-668}$); but God will destroy them, and their judgment will be accompanied by fearful portents ($3^{667-697}$). But Israel will dwell safely under the divine protection ($3^{702-709}$); and the rest of the cities and the islands will be converted, and unite with Israel in praising God ($3^{710-731}$). The blessings of the Messianic age are recounted $3^{744-754}$; cf. also $3^{367-380.\,619-623}$. And the kings of the earth will be at peace with one another ($3^{755-759}$).

---

[*] This is the natural translation of אַדְמַת־עָפָר. For Sheol in this sense compare Job 17^{16}. Sheol here seems to preserve its OT sense as a place of semi-conscious existence where moral retribution is unknown. Only by waking from this condition can man enter on the retribution that is his due.

And God will establish a universal kingdom over all mankind, with Jerusalem as centre ($3^{767-771}$), and the prophets of God will lay down the sword and become judges and kings of the earth ($3^{781-782}$), and men will bring offerings to the temple from all parts of the earth ($3^{772-773}$).

Testaments of the XII Patriarchs. — Until a critical edition of this composite work is published, it is dangerous to quote it as an authority. While it contains many sections that appear to be as early as B.C. 140, the body of the work seems to have been written about the beginning of the Christian era. There are, moreover, numerous Christian interpolations. Till a critical edition of the text and contents is published, it is best not to cite it as evidence on the present subject. Its evidence, though valuable, is in no respect extraordinary, or unvouched for elsewhere.

Judith.—This book is singularly barren in eschatological thought. It speaks of the judgment of the heathen (16^{17}).

(*B*) 1st cent. B.C.

Ethiopic Enoch 37–70 (B.C. 94–64).—These chapters form the well-known 'Similitudes,' the most important element in the Book of Enoch. The writer's eschatological views are as follows:—In the latter days sin will flourish in the world; sinners will deny the name of the Lord of Spirits (38^2 41^2) and of His Anointed (48^{10}); and the kings and the mighty will oppress the elect of the children of God (62^{11}). But suddenly the Head of Days will appear, and with Him the Son of Man ($46^{2.3.4}$ 48^2), to execute universal judgment. And all Israel will be raised from the dead (51^1 61^5), and all judgment will be committed to the Son of Man (41^9 69^{27}), who will possess universal dominion (62^6) and sit on the throne of God (47^3 51^3). And he will judge all the angels, unfallen and fallen (61^8 55^4), and the righteous and the sinners amongst men ($62^{2.3}$), and the kings and the mighty (62^{3-11} $63^{1-4.11}$). And the fallen angels will be cast into a fiery furnace (54^6), and the kings and the mighty will be tortured in Gehenna by the angels of punishment (53^{3-5} $54^{1.2}$), and the remaining sinners and godless will be driven from off the face of the earth (38^3 41^2 45^6); the Son of Man will slay them by the word of his mouth (62^2). And heaven and earth will be transformed ($45^{4.5}$), and the righteous will have their mansions therein (39^6 41^2). And the Elect One will dwell amongst them (45^4). And they will be clad in garments of life ($62^{15.16}$), and become angels in heaven (51^4), and grow in knowledge and righteousness (58^5).

Observe that (1) the Messianic kingdom is here of everlasting duration, but its scene is no longer the present earth, as in the literature of the preceding century, but a transformed heaven and earth. Thus in the process of evolution Messianic thought has become more transcendent. (2) The Messiah for the first time in Jewish literature is represented as a supernatural being and as the Judge of men and angels. (3) The hopes of a Messiah, which in the 2nd cent. B.C. were practically dead, have, owing partly to the circumstances of the time, risen to a new and vigorous life. See the review of the Pss. of Solomon, below. (4) Several Messianic titles appear in this book for the first time in literature: 'Christ' (48^{10} 52^4), 'the Righteous One' (38^2 53^6), 'the Elect One' (40^5 $45^{3.4}$), 'the Son of Man' ($46^{2.3.4}$ 48^2 etc.). (5) All questions affecting the future destinies of the Gentiles are ignored, if we regard 50 as an interpolation; but if it belongs to the context, the writer teaches that when the kings and the mighty and the sinners are destroyed, the remaining Gentiles will be saved if they repent and forsake their idols. God will have mercy on them, but give them no honour or glory.

1 *Maccabees.*—This book is entirely wanting in eschatological teaching, if we except the writer's expectation of a prophet in 4^{46} 14^{41}.

Psalms of Solomon (B.C. 70–40).—Like the Similitudes, this book is of Pharisaic authorship. They proclaim in common a vigorous Messianic hope, but on very divergent lines. In the preceding century this hope was practically non-existent. So long as Judas and Simon were chiefs of the nation, the need of a Messiah was hardly felt. But in the first half of the next century it was very different. Subject to ruthless oppression, the righteous were in sore need of help. As their princes were the leaders in this oppression, they were forced to look for divine aid. Thus the bold and original thinker to whom we owe the Similitudes conceived the Messiah as the supernatural Son of Man, who should enjoy universal dominion and execute judgment on men and angels. But other religious thinkers, returning afresh to the study of OT, revived, as in the Psalms of Solomon, the expectation of the prophetic Messiah, sprung from the house and lineage of David (17^{23}). As the hopes of this Messiah are confined to Pss 17. 18, and in all the Pss that precede there is not even the remotest hint of such hopes, it is reasonable to infer a difference of authorship. There are other grounds for the same inference, but we cannot deal with them here. In recounting, therefore, the eschatology of Ps.-Sol, we shall first deal with Pss 17. 18.

Pss 17. 18. The Messiah—specifically so called in 17^{36} 18^6—is to spring from the lineage of David (17^{23}), to be a righteous king (17^{35}), pure from sin (17^{41}). He will gather the dispersed tribes together ($17^{28.50}$), and purify Israel ($17^{28.29}$), and will suffer no Gentile to sojourn amongst them (17^{31}), nor any iniquity to lodge in their midst, nor any that knoweth wickedness ($17^{29.36}$); and all the people will be holy (17^{36}), even sons of God (17^{30}). But as for the ungodly nations, he will destroy them with the word of his mouth (17^{27}, cf. 17^{39}), for his weapons will not be carnal; nor will he trust in horse or rider or bow, or in silver or gold (17^{37}), but he will overthrow sinners by the might of his word (17^{41}). And the remaining Gentiles will become subject to him ($17^{31.32}$); and he will have mercy on all the nations that come before him in fear (17^{38}), and they will come from the ends of the world to see his glory (17^{34}), and bring her sons as gifts to Zion (17^{34}). And the Messiah will not faint all his days (17^{42}).

Observe that (1) the Messiah is, however highly endowed, a man and nothing more. (2) It follows that his kingdom can only be of temporary duration. (3) It falls in with both these observations, that there is not a hint of the righteous rising from the dead to share in it. This conclusion is confirmed by the beatitude of 17^{50}, 'Blessed are they that shall be born in those days to behold the blessing of Israel which God shall bring to pass in the gathering together of the tribes.' Thus only the surviving righteous share in this temporary earthly kingdom. (4) The Gentiles are still mercifully dealt with. Such as have not been hostile to Israel are spared and become subject.

Pss 1–16. The bulk of these Pss are silent as to the future. They are all absolutely silent as to the Messiah. On the other hand, they paint in glowing colours the restoration of the tribes (8^{34} 11^{3-9}). A Messianic kingdom was therefore probably expected—at all events a period of prosperity, when God's help is promised (7^9). But beyond prophesying vengeance on the hostile nations and the sinners, the psalmists do not dwell on this period. The real recompense of the righteous is not, in their thoughts, bound up with this earthly kingdom. The righteous rise not to any kingdom of temporal prosperity, but to eternal life (3^{16} 13^9), they inherit life in gladness (14^7), and live in the righteousness of their God (15^{15}). There seems to be no resurrection of the body. As for the wicked, on the other hand, 'their inheritance is Hades (here=hell) and darkness and destruction' (14^{6}), destruction and darkness (15^{11}), and into their heritage in Hades they enter immediately on dying (16^{2}), and their iniquities pursue them thither (15^{11}). Thus the eschatology of Pss 1–16 agrees in nearly every point with that of Eth. En. 91–104, and so calls for no further comment here.

2 *Maccabees*.—There is no direct reference to a Messianic kingdom in this book, though it might be possible to reason back to it from the expectation of the restoration of the tribes (2^{18}). There is certainly no hint of a Messiah. On the other hand, however, the doctrine of retribution, present and future, plays a significant rôle. Present retribution follows sin alike in the case of Israel and of the Gentiles, but in the case of Israel its purpose is corrective, whereas in that of the Gentiles it is vindictive (6^{13-15}). Though God punish His people, He does not withdraw His mercy from them (6^{12-16} 14^{15}). In order to show the certainty of retribution in this life, the writer rewrites history, and makes individual sinners suffer the penalties which he thinks, in strict justice, they ought to have suffered: thus compare the final earthly destinies of the heathen oppressors, Epiphanes (7^{17} 9^{5-12}) and Nicanor (15^{32-35}); and of the Hellenizing Jews, Jason (5^{7-10}) and Menelaus (13^{8}). Even the martyrs confess their sufferings to be due to sin ($7^{18.32.38}$). Immediate retribution is a token of God's goodness (6^{13}). But our present concern is mainly with retribution beyond the grave. The righteous and the wicked of Israel enter after death the intermediate state (Hades), where they have a foretaste of their final doom (6^{26}), which takes effect after the resurrection. There is to be a resurrection of the righteous ($7^{9.11.14.23.29.36}$), possibly even of all Jews ($12^{43.44}$). The resurrection is to be clearly that of the body (7^{11}). Apparently, it is to accompany the final judgment. Of the heathen there will be no resurrection: when they die they enter at once on their eternal doom (7^{14}). There appears to be no blessed future for any of the Gentiles.

(*C*) 1st cent. A.D.

Book of Jubilees.—Like many of the books just reviewed, the Book of Jubilees makes no mention of a Messianic king. It sketches, however, in vigorous terms, the woes that are to be the prelude of the Messianic kingdom, the attacks of the heathen powers, and then the gradual introduction of the kingdom effected through devotion to and observance of the law. Thus the Messianic woes are described in $23^{13.19.22}$ 'Calamity follows on calamity, and wound on wound, and tribulation on tribulation, and evil tidings on evil tidings, and illness on illness, and all evil judgments such as these, one with another, illness and overthrow, and snow and frost and ice, and fever, and chills, and torpor, famine, and death, and sword, and captivity, and all kinds of calamities and pains. 19. And they will strive one with another, the young with the old, and the old with the young, the poor with the rich, and the lowly with the great, and the beggar with the prince, on account of the law and the covenant; for they have forgotten His commandment, and the covenant and the feasts, and the months, and the Sabbaths, and the jubilees, and all judgments. 22. And a great punishment will befall the deeds of this generation from the Lord; and he will give them over to the sword and to judgment and to captivity, and to be plundered and devoured.'

And thereupon will ensue the invasion of Palestine by the Gentiles ($23^{23.24}$). 'And he will wake up against them the sinners of the Gentiles, who will show them no mercy or grace, and who respect the person of none, neither old nor young, nor any one, for they are wicked and powerful, so that they are more wicked than all the children of men. And they will use violence against Israel and transgression against Jacob, and much blood will be shed upon the earth, and there will be none to gather it and none to bury. 24. In those days they will cry aloud, and call and pray that they may be saved from the hand of the sinful Gentiles; but none will be saved.'

Then Israel will repent (23^{26}). 'And in those days the children will begin to study the laws, and to seek the commandments, and to return to the paths of righteousness' ($23^{16.27-30}$). '16. And in that generation the sons will convict their fathers and their elders of sin and unrighteousness, and the words of their mouth and the great wickednesses which they perpetrate, and concerning their forsaking the covenant which the Lord made between them and Him, that they should observe and do all His commandments and His ordinances and all His laws, without departing either to the right hand or the left. 27. And the days of the children of men will begin to grow many, and increase from generation to generation and day to day, till their days draw near to one thousand years, and to a greater number of years than (before) were their days. 28. And there will be no old man nor one that is not satisfied with his days, for all will be (as) children and youths. 29. And all their days they will complete in peace and in joy, and they will live, and there will be no Satan nor any evil destroyer; for all their days will be days of blessing and healing. 30. And at that time the Lord will heal His servants, and they will rise up and see great peace and drive out His adversary, and the righteous will see and be thankful, and rejoice with joy for ever and ever, and will see all their judgments and all their curses on their enemies.' Finally, when the righteous die their spirits will enter into a blessed immortality (23^{31}). 'And their bones will rest in the earth and their spirits will have much joy, and they will know that it is the Lord who executes judgments, and shows mercy to hundreds and thousands of all that love Him.'

Observe that (1) apparently there is no resurrection of the dead, and that the soul enters at death on its final destiny. (2) Sheol has thus become hell (24^{31}). 'For though he ascend unto heaven, thence will he be brought down; and whithersoever he flee on earth, thence will he be dragged forth; and though he hide himself amongst the nations, even from thence will he be rooted out; and though he descend into Sheol, there also shall his condemnation be great, and there also he will have no peace.'

Assumption of Moses (A.D. 7–29).—This book is closely allied to that of Jubilees in many respects. Thus the preparation for the advent of the Theocratic or Messianic kingdom will be a period of repentance (1^{18}). 1750 years after the death of Moses, God will intervene on behalf of Israel (10^{12}), and the ten tribes will be brought back from the captivity.* During this kingdom Israel will destroy her natural enemies (10^{8}), and finally be exalted to heaven (10^{9}), whence she shall see her enemies in Gehenna (10^{10}).

Observe that (1) there is no Messiah. Indeed the author in 10 appears to be really inimical to this expectation: 'The eternal God alone . . . will punish the Gentiles.' (2) There appears to be no resurrection of the body, but of the spirit only after the final judgment, similarly as in Eth. En. 91–104, Pss of Solomon, and Jubilees. (3) Gehenna, which originally was the specific place of punishment for apostate Jews, has now become the final abode of the wicked generally.

---

* See Charles' *Assumption of Moses*, pp. 59, 60.

Philo (B.C. 25–A.D. 50).—We shall touch only on the main points of Philonic eschatology. Philo looked forward to the return of the tribes from captivity, to the establishment of a Messianic kingdom of temporal prosperity, and even to a Messiah. The *loci classici* on this subject are *De Execrat.* § 8–9, and *De Præm. et Pœn.* § 15–20. The inclusion of the Messiah and the Messianic kingdom in Philo's eschatology, though really foreign to his system, is strong evidence as to the prevalence of these expectations even in Hellenistic Judaism. Apparently, he did not look forward to a general and final judgment. All entered after death into their final abode. The punishment of the wicked was for everlasting (*De Cherub.* § 1); even wicked Jews were committed to Tartarus (*De Execrat.* § 6). As matter was incurably evil, there could of course be no resurrection of the body. Our present life in the body is death (*De Leg. Alleg.* § 1).

*Slavonic Enoch** (A.D. 1–50).—As the earth was created in six days, its history, according to this book, will be accomplished in 6000 years; and as the six days of creation were followed by one of rest, so the 6000 years of the world's history will be followed by a rest of 1000 years—the millennium or Messianic kingdom. Then time will pass into eternity (32^{2}–33^{2}). In this Messianic kingdom there is no Messiah. At the close of this kingdom the final judgment is held, variously called 'the day of judgment' (39^{1} 51^{3}), 'the great day of the Lord' (18^{6}), 'the great judgment' (52^{15} 58^{5} 65^{6} 66^{7}), 'the day of the great judgment' (50^{4}), 'the eternal judgment' (7^{1}), 'the great judgment for ever' (60^{4}), 'the terrible judgment' (48^{8}), 'the immeasurable judgment' (40^{12}). But prior to the final judgment the souls of the departed are in intermediate places. Thus the rebellious angels are confined to the second heaven, awaiting in torment the eternal judgment (7^{1-3}). The fallen lustful angels are kept in durance under the earth (18^{7}). Satan, being hurled down from heaven, has the air as his habitation ($29^{4.\,5}$). There is no definite account of the intermediate place for men's souls. The writer declares, however, that places have been prepared for every human soul (49^{2} 58^{5}). From the latter context these appear to constitute the intermediate place for human souls. In 32^{1} Adam is sent back to this receptacle of souls on his death, and is transferred from it to paradise in the third heaven after the great judgment (42^{5}). Even the souls of beasts are preserved till the final judgment, in order to testify against the ill-usage of man ($58^{5.\,6}$). On the conclusion of the final judgment the righteous enter paradise as their eternal inheritance and final abode (8. 9. $42^{3.\,5}$ 61^{3} 65^{10}). The wicked are cast into hell in the third heaven, where their torment will be for everlasting (10. 40^{12} 41^{2} 42^{1-2} 61^{3}). There is apparently no resurrection of the body—the righteous are clothed with the garments of God's glory (22^{8}, cf. Eth. En. 62^{16} 108^{12}). The seventh heaven is the final abode of Enoch (55^{2} 67^{2}), but this is an exceptional privilege.

Observe that (1) we have here the first mention of the millennium. (2) There is no resurrection of the body; but at the final judgment the souls of the righteous, which have in the interval been in the intermediate place, are now clothed with God's glory and admitted to paradise.

Book of Wisdom.—In this Alexandrian work there is no Messiah, but there is an expectation of the Messianic or Theocratic kingdom, where the righteous will judge the nations and have dominion ($3^{7.\,8}$). There will be no resurrection of the body; for the soul is the proper self: the body is a mere burden taken up by the pre-existent soul, but in due season laid down again. Accordingly, there is only an immortality of the soul. The immortality of the righteous soul and its future blessedness are set forth in terms remarkable at once for their beauty and vigour (3^{1-4} $4^{2.\,7.\,10}$ 15^{3}). As for the wicked, they will be punished with death ($1^{12.\,16.}$ 2^{24}); they will be bereft of hope ($3^{11.\,18.}$ 5^{14}): the time for repentance is past (5^{3}); they will be utterly destroyed (4^{19}), yet not annihilated; for they will be subject to pain (4^{19}); and be aware of the blessedness of the righteous ($5^{1.\,2}$).

Observe that the righteous in Israel are to judge the nations. This seems to be a later development of the judgment by the sword frequently mentioned in previous literature (cf. Dn 2^{44}; Eth. En. 91^{12} etc.). Thus the judgment of the saints has become a *forensic* one, as that of the Messiah (cf. 1 Co 6^{2}).

4 *Maccabees.* — This book is a philosophical treatise on the supremacy of the reason. The writer adopts, so far as possible, the tenets of Stoicism. He teaches the eternal existence of all souls, good and bad, but no resurrection of the body: the good will enjoy eternal blessedness in heaven (9^{2} 12^{12} 13^{17} 15^{3} 17^{5}); but the wicked will be tormented in fire for ever (9^{9} 10^{15}).

*Apocalypse of Baruch** (A.D. 50–80).—Of this composite work the six or more independent constituents may be ranged in three classes when treated from the standpoint of their eschatology. Thus the Messiah Apocalypses A^1 A^2 A^3, *i.e.* 27–30^{1} 36–40 53–74, form the first class. i. This differs from the remaining part of the book in being written prior to A.D. 70 and in teaching the doctrine of a personal Messiah. The rôle of the Messiah in A^1 is entirely a passive one, whereas in A^2 and A^3 he is a warrior who slays the enemies of Israel with his own hand. In all three Apocalypses the Messiah-Kingdom is of temporary duration. In A^2 'his principate will stand for ever until the world of corruption is at an end' (40^{3}); in A^3 his reign is described as 'the consummation of that which is corruptible, and the beginning of that which is incorruptible' (74^{2}). In A^2 and A^3 the kingdom is inaugurated with the judgment of the sword (39^{7}–40^{2} 72^{2-6}). The Gentiles that had ruled or oppressed Israel should be destroyed, but those that had not done so should be spared, in order to be subject to Israel (72^{3-6}). The final judgment and the resurrection follow on the close of these kingdoms. Of the two remaining classes, the second consists of B^1, and the third of B^2 and B^3, written after A.D. 70.

ii. In B^1, *i.e.* 1–9^{1} 43–44^{7} 45–46^{6} 77–82. 84. 86–87, the writer looks forward to the rebuilding of Jerusalem (6^{9}), the restoration of the exiles (77^{6} 78^{7}), the Messianic kingdom, but no Messiah (1^{5} 46^{6} 77^{12}). There is no consideration shown for the Gentiles (82^{2-7}).

iii. In B^2, *i.e.* 13–25. 30^{2}–35. 41–42. 44^{8-15} 47–52. 75–76. 83, the writer has relinquished all hope as to the present corruptible world, and fixes his regards wholly on the incorruptible world that is to be. The world will be renewed (32^{6}), and in this renewal, from being transitory and verging to its close (48^{50} 85^{10}), it will become undying (51^{3}) and everlasting (48^{50}); from being a world of corruption (40^{3} 74^{2} 21^{19} etc.), it will become incorruptible and invisible (74^{2} 51^{8}). The teaching as to the resurrection proceeds on parallel lines. Thus in answer to the question, 'Wilt thou perchance change these things (*i.e.* man's material body) which have been in the world, as also the world?' (49^{3}), it is shown in 50 that the dead will be raised with their bodies, exactly in the same form in which they had been committed to the earth, with a view to their recognition by those who knew them. When this recognition is completed, the bodies of the righteous will be transformed, with a view to a spiritual existence of unending duration and glory ($51^{1.\ 3.\ 7-9}$); and they will be made like unto the angels and equal to the stars, and changed from beauty into loveliness, and from light into the splendour of glory (51^{10}). They will surpass the angels in excellency (51^{12}). In B^3, *i.e.* 85, there is the same despair of a national restoration as in B^2, and only spiritual blessedness is looked for in the world of incorruption ($85^{4.\ 5}$).

---

* For further details see Morfill and Charles' *editio princeps* of this book; also the art. ENOCH (Bk. of Secrets of).

* For a fuller treatment of the questions touched upon here see Charles' *Apocalypse of Baruch.*

Observe that (1) in B^2 Sheol is the intermediate abode of the souls of the departed prior to the final judgment (23^5 48^{16} 52^2, cf. 56^6). This intermediate place is one involving certain degrees of happiness or torment. For the wicked it is an abode of pain (30^5 36^{11}), but not to be compared with their torments after the final judgment. As for the righteous, these are preserved in certain 'chambers' or 'treasuries' which are in Sheol (4 Ezr 4^{41}), where they enjoy rest and peace and are guarded by angels (Eth. En. 100^5, 4 Ezr 7^{95}). From these they issue forth at the final judgment, to receive their everlasting reward (30^2) (2) From the account of the resurrection in 49^3–51, it is clear that the Pauline teaching in 1 Co 15^{35-50} is in some respects a developed and more spiritual expression of ideas already current in Judaism.

Book of Baruch.—In this composite work there is little that demands our attention. 1–3^8 is undoubtedly derived from a Hebrew original, and possibly part of 3^9–5. It is composed of at least three independent writings. As to their dates, nothing satisfactory has been yet arrived at. It is noteworthy that in 2^{17} Hades still possesses its OT connotation. The restoration of Jerusalem is looked for (4^{19-35}) and the return of the exiles (4^{36}–5).

4 *Ezra.*—We shall adopt provisionally some of the critical results attained by Kabisch on this book. Of the five independent writings which he discovers in it, two were written prior to A.D. 70, and three subsequently. The two former he designates respectively as an Ezra Apocalypse and a Son-of-Man Vision. (*a*) The Ezra Apocalypse consists of chapters 4^{52}–5^{13a} $6^{13-25.\ 28}$ 7^{26-44} 8^{63}–9^{12}, and is largely eschatological. The signs of the last times are recounted at great length (5^{1-12} 6^{18} $9^{1-3.\ 6}$), the destruction of Rome (5^3), and the advent of the Messiah, the Son of God (5^6 7^{26}). Certain saints will accompany the Messiah (7^{28}), and all the faithful who have survived the troubles that preceded the kingdom will rejoice together with the Messiah for 400 years.* Then the Messiah and all men will die (7^{29}), and in the course of seven days the world will return into its primeval silence, even as in seven days it was created (7^{30}). Then the next world will awake and the corruptible will perish (7^{31}), and all mankind will be raised from the dead (7^{32}) and appear at the last judgment (7^{33}). Then Paradise (=final abode of the righteous) and Gehenna will be revealed. And the judgment will last seven years (7^{43}).

Observe that besides the general resurrection in $7^{31.\ 32}$ there seems to be a preliminary resurrection of some special saints to the Messianic kingdom in 7^{28}, but this is doubtful.

(*b*) A Son-of-Man Vision.—This writing consists of chapter 13, and was probably composed before A.D. 70. Many signs will precede the advent of the Messiah (13^{32}), who will appear in the clouds of heaven ($13^{3.\ 32}$); and the nations will assemble from the four winds of heaven to attack him ($13^{5.\ 34}$), but the Messiah will destroy them, not with spear or weapon of war ($13^{9.\ 28}$), but 'by the law, which is like fire' ($13^{38.\ 49}$). And he will restore the ten tribes ($13^{40.\ 47}$), and preserve the residue of God's people that are in Palestine (13^{48}).

We shall now set forth the eschatological expectations which appear in the remaining three constituents of this work, which were composed between A.D. 70 and 100. (*c*) The Eagle Vision, *i.e.* 10^{60}–12^{35}. Here the destruction of Rome is predicted, through the agency of the Messiah sprung from the house of David (12^{32}), who will judge its people and destroy them (12^{33}). He will save the residue of God's people in Palestine, and he will fill them with joy to the end, even the day of judgment (12^{34}). (*d*) An Ezra fragment, *i.e.* $14^{1-17a.\ 18-27.\ 36-47}$. Ezra is to be translated and live with the Messiah till the times are ended (14^9). These times are twelve. Of these, ten and a half have already elapsed (14^{11}). There seems to be no Messianic kingdom.

(*e*) The Apocalypse of Salathiel, *i.e.* 3^{1-31} 4^{1-51} 5^{13b}–6^{10} 6^{30}–7^{25} 7^{45}–8^{62} 9^{13}–10^{57} 12^{40-48} 14^{28-35}. The world is nearly at an end (4^{44-50}). As it was created, so it will be judged by God alone (5^{56} 6^6). Very few will be saved (7^{47-61} $8^{2.\ 3}$). Judgment and all things relating to it were prepared before the creation of the world and of man (7^{70}). The day of judgment will arrive when the number of the righteous is completed (4^{36}); for the sins of earth will not retard it (4^{39-42}). In the meantime retribution sets in immediately after death ($7^{69.\ 75.\ 80.\ 86.\ 95}$ 14^{35}). On dying, the souls of the righteous will be allowed seven days to see what will befall them ($7^{100.\ 101}$); they will be guarded by angels in the 'chambers' ($7^{75.\ 85.\ 95.\ 121}$). They will have the joy of rest in seven ways (7^{91-98}). These chambers form their intermediate abode: after the final judgment glory and transfiguration await them ($7^{95.\ 97}$). But the souls of the wicked will not enter into the 'chambers,' but roam to and fro in torment in seven ways ($7^{80-87.\ 93}$). After the final judgment they will be tormented more grievously still (7^{84}). Intercession, though permissible now ($7^{106-112}$), will not be allowed on the day of judgment ($7^{102-105}$). All things will then be finally determined ($7^{113-115}$). With the final judgment this world closes and the next begins (7^{113}): it will be a new creation (7^{75}). With its establishment the righteous enter on their final reward. They shall be bright as stars (7^{97}); and, beyond them (7^{125}), they shall shine as the sun and be immortal (7^{97}). Paradise will be their final abode (7^{123}).

Josephus (A.D. 37–101).—Josephus' interpretation of Messianic prophecy as pointing to Vespasian (*BJ* VI. v. 4) must be set down to the exigencies of his position with regard to the Romans. For it is clear from *Ant.* IV. vi. 5 that he looked forward to a Messianic era. As the troubles predicted by Daniel had befallen Israel, so likewise would the prosperity (*Ant.* X. xi. 7). Apparently, he believed in an intermediate state for the righteous. Thus in *Ant.* XVIII. i. 3 it is said that 'souls have an immortal vigour, and that under the earth (ὑπὸ χθονός, cf. *BJ* II. viii. 14 καθ' ᾅδου) there will be rewards and punishments, accordingly as they have lived virtuously or viciously in this life; and the latter are to be detained in an everlasting prison, but the former will have power to revive and live again.' Here the wicked enter at once into everlasting punishment. Sheol is here hell. But the righteous rise from the intermediate place of happiness and enter into other bodies, probably spiritual bodies (*BJ* II. viii. 14). Such was the Pharisaic doctrine according to Josephus. The Essenes believed that a blessed immortality awaited the souls of the righteous (*BJ* II. viii. 11), but that those of the wicked were destined to a dark, cold region, full of undying torment.

---

* This number has originated as follows. According to Gn 15^{13} Israel was to be oppressed 400 years in Egypt. Now in Ps 90 the writer prays: 'Make us glad according to the days wherein thou hast afflicted us, and the years wherein we have seen evil.' From the combination of these two passages it was inferred that the Messianic kingdom would last 400 years, as a set-off against the period of oppression in Egypt.

The above account of Pharisaic belief which we derive from Josephus may be regarded as fairly trustworthy; but that which he gives in *BJ* III. viii. 5 is misleading in a high degree. There he describes the soul as a 'particle of Divinity' (*θεοῦ μοῖρα*) which has taken up its abode in a mortal body. After death the souls of the righteous 'receive as their lot the most holy place in heaven, from whence, in the revolution of ages, they are again sent into pure bodies.' For the souls of suicides the darkest place in Hades is reserved.

IV. SYSTEMATIC EXPOSITION OF JEWISH ESCHATOLOGY (B.C. 200–A.D. 100).—In the preceding section we have given a survey of eschatological ideas in the order of their historical attestation, and consequently, in large measure, of their actual evolution. By presenting the eschatological scheme of each writer by itself in that section, we have made it possible for the reader to see the various conceptions, such as Sheol, Gehenna, Messiah, Resurrection, in their actual organic relations and historical environment. In this section, however, we shall isolate several of these conceptions, and deal briefly with the various forms they assumed from B.C. 200 to A.D. 100 in Jewish circles. These conceptions are: the Last Woes, the Messiah, the Messianic Kingdom, the Return of the Dispersion, the Resurrection, Judgment, Sheol or Hades, Gehenna, Paradise, Heaven.

The Last Woes.—It will be sufficient for our present purpose to mention the passages where these woes preluding the Messianic kingdom are recounted. These are: Dn 12^{1}, *Or. Sibyll.* 3$^{796-804}$, 2 Mac 5$^{2.\ 3}$, *Jubilees* 23$^{13.\ 19.\ 22}$, Apoc. Bar 27. 48$^{31-41}$ 70$^{2-8}$, 4 Ezr 5$^{1-13}$ 6$^{18-28}$ 9$^{1-12}$ 13$^{29-31}$. For further information the reader should consult Drummond, *The Jewish Messiah, in loc.*; Schürer, *HJP* II. ii. 154–156; Schoettgen, *Hor. Hebr.* ii. 509 sqq. 550 sqq.

The Messiah.—As this subject will be treated under the general art. MESSIAH, we shall sketch here only its leading phases.

i. The Messiah—conceived merely as a passive though supreme member of the Messianic kingdom. He is so represented in Eth. En. 83–90, where his appearance is largely otiose, and due probably to literary reminiscence. He rules over a transfigured Israel, with the Heavenly Jerusalem set up as the centre of his kingdom, and his reign is apparently for ever. In the 1st cent. of the Christian era this conception reappears twice in Apoc. Bar 27–30^{1} where his rule is of temporary duration, and in 4 Ezr 7^{28} (*i.e.* in the Ezra Apoc. See p. 747^{a}), where he dies after a reign of 400 years. In the second and third cases the Messiah appears after the Messianic woes and judgment; in the third, simultaneously with the first resurrection.

ii. The Messiah—conceived as an active warrior, who slays his enemies with his own hand. This conception is attested in the *Or. Sibyll.* 3$^{652-660}$, which belongs to the 2nd cent. B.C.; in the Pss. of Sol 17$^{23.\ 26}$, where the Messiah is to be of Davidic descent—but this book belongs properly to the next division; in Apoc. Bar 36–40; also in another independent writing in the same book, 53–74; 4 Ezr 10^{60}–12^{35}. In the last the Messiah is of Davidic origin. In all these books save the first (?) the Messianic kingdom is of temporary duration.

iii. The Messiah—conceived more loftily as one who slays his enemies by the word of his mouth, and rules by virtue of his justice, faith, and holiness (cf. Ps.-Sol 17$^{27.\ 31.\ 37.\ 39.\ 41}$). A similar conception is found in 4 Ezr 13. In both writings his reign is probably of temporary duration.

iv. The Messiah—conceived as supernatural, as eternal Ruler and Judge of mankind (Eth. En. 37–70). This conception of the Messiah is logically in some measure a development of that in the third division, and yet it is chronologically antecedent to it. It is the most sublime conception of the Messiah to be found in all Jewish literature outside the Canon. For further details see above, p. 744^{a}.

The Messianic Kingdom.—Three views in the main prevailed amongst the Jews as to this kingdom. i. It was to be of eternal duration. ii. It was to be of temporary duration. iii. There was to be no Messianic kingdom.

i. The Messianic kingdom was to be of eternal duration.

(*a*) On earth as it is (Eth. En. 1–36, Dn, *Or. Sibyll.* 3$^{766-783}$ (?)).

(*b*) On a transformed earth and in heaven (Eth. En. 37–70). As the Messianic kingdom is here eternal, it is preceded in Palestinian literature by the resurrection and the final judgment.

ii. The Messianic kingdom was to be of temporary duration on earth (Eth. En. 91–104, Ps.-Sol 17. 18, 2 Mac, Jubilees, Slav. En., Assumption of Moses, Book of Wisdom, Apoc. Bar—parts A^{1} A^{2} A^{3} B^{1},—4 Ezr—all parts but Salathiel Apoc.).

When the Messianic kingdom is of temporary duration, there appears to be no transformation of the earth. The resurrection and final judgment take place at its close. The resurrection is all but universally a resurrection of the righteous only. Hence in many of these books the wicked are held to enter at once into their final abode. Thus Hades in these cases becomes Hell.

iii. No Messianic kingdom expected [4 Mac (?), Apoc. Bar (B^{2}), 4 Ezr, Salathiel Apoc.].

In these books man does not enter till after the last judgment on his final award. After death he meets with a foretaste of his final lot in Hades or Sheol.

The Return from the Dispersion.—The promise that God would turn again the captivity of Israel is frequently made in the OT; also in Sir 33^{11} (AV 36^{11}), To 13^{13}, Eth. En. 57$^{1.\ 2}$ 90^{33}, *Or. Sibyll.* 2$^{170-173}$, Bar 2$^{27-35}$ 4$^{36.\ 37}$ 5$^{5-7}$, Ps.-Sol 11, 2 Mac 2^{18}, Apoc. Bar 77^{6} 78^{7} (cf. 84$^{2.\ 8.\ 10}$), 4 Ezr 13$^{12.\ 39-47}$, Targ. Jon. on Jer 33^{13}, and *Shemoneh Esreh*: 'Lift up a banner to gather our dispersed, and assemble us from the four ends of the earth.' Yet Rabbi Akiba (*Sanh.* 10^{3}), in the 2nd cent. A.D., denied this return.

The Resurrection.—The resurrection is very variously conceived. The earliest attested view in the 2nd cent. B.C. is that of (*a*) the resurrection of *all* Israel (Dn 12$^{1-3}$). About the same period the doctrine of (*b*) the resurrection of the righteous only is taught in Eth. En. 83–90. Towards the close of the same century another writer looks forward, not to a resurrection of the body, but to (*c*) a blessed immortality of the soul or spirit after the final judgment (Eth. En. 91–104). These views hold the field throughout the next century, and it is not till the 1st cent. of the Christian era that they are in some measure displaced by others. These latter, which are developments of the former, are: (*d*) a blessed immortality for the souls of the righteous after death. This is one side of the larger doctrine of an immediate and final retribution after death affecting only the soul or spirit; (*e*) a general resurrection of all mankind preceding the final judgment.

(*a*) The resurrection of all Israel [Eth. En. 1–36 (see 22), Dn 12$^{1-3}$, Eth. En. 37–70 (see 51, etc.), 2 Mac 7$^{7.\ 11.\ 14.}$ etc. 12$^{43.\ 44}$, Apoc. Bar (B^{2}) (see 24. 30$^{2-5}$ 50. 51)].

In 2 Mac 12$^{42-45}$ the possibility of a moral change taking place in Sheol seems to be implied.

(*b*) The resurrection of the righteous only [Eth. En. 83–90 (see 90^{33})].

In this book the righteous have no concern in the last judgment, and do not rise till it is over.

(*c*) A blessed immortality for the souls of the righteous after the final judgment [Eth. En. 91–104 (see $103^{3.\ 4}$ 91^{10} 92^{3} $104^{2.\ 4}$), Assumption of Moses (see 10^{9}), Slav. En. (?), Eth. En. 108 (?)].

(*d*) A blessed immortality for the souls of the righteous immediately after death [Jubilees (see 23), Philo, Book of Wisdom (see 3^{1-4} $4^{2.\ 7.\ 10}$ etc.), 4 Mac (see 5^{37} 9^{8} 13^{17} etc.)], Essene doctrine according to Josephus, *BJ* II. viii. 11.

Observe the expression in 4 Mac 13^{17} *θανόντας ἡμᾶς Ἀβραὰμ καὶ Ἰσαὰκ καὶ Ἰακὼβ ὑποδέξονται* (cf. Lk 16^{22}).

(*e*) Resurrection of all mankind [Apoc. Bar 30^{2-5} 50–51, 4 Ezr (Ezra Apoc. See $7^{32.\ 37}$), Test. XII. Patr., Benj. 10].

Judgment.—Judgment is variously conceived, either as retribution which takes effect from day to day, or at great crises in national history, or as retribution which is universal and final. The last may take place either at the beginning or the close of the Messianic kingdom. In Apocalyptic literature little attention is paid to the first division. A most emphatic presentation of the doctrine of retribution in this life pervades 2 Mac and Jubilees. We shall here, however, confine our attention to judgment as connected with the consummation of the world. Now, in the last times there were generally two stages in this judgment. The former was executed by human agents,—the saints of Israel or these led by the Messiah,—and may be designated as the judgment by the sword, or, better, the Messianic judgment; the latter was administered by God or, in one instance only, by the Messiah, and constitutes in reality the final judgment.

(*a*) *The Messianic Judgment.* — This judgment (i.) may be realistically conceived as involving the destruction of the wicked by the *personal prowess* of the Messiah or the saints; or (ii.) it may be *forensically* conceived: the word of the Messiah or of the saints judges or destroys the wicked. The latter form of judgment is obviously a development of the former, but the two are not always kept apart.

i. The Messianic judgment realistically conceived:

(*α*) Executed by the Messiah [Ps.-Sol 17. 18 (?), Apoc. Bar 39. 40. 72. 73, 4 Ezr 12^{32-34}].

(*β*) Executed by the saints (Dn 2^{44}, Eth. En. 90^{19} 91^{12} 96^{1} 98^{12}, Or. Sibyll. 3^{781}, Jubilees, Assumption of Moses 10^{9}).

ii. The Messianic judgment forensically conceived:

(*α*) Executed by the Messiah (Ps.-Sol 17. 18, 4 Ezr $13^{28.\ 32-50}$).

(*β*) Executed by the saints (Book of Wisdom 3^{8}, cf. 1 Co 6^{2}).

(*b*) *The Final Judgment.*—This judgment is always administered by God save in Eth. En. 37–70, where it is committed to the Messiah, the Son of Man. This judgment takes place either at the beginning of the Messianic kingdom or, where this kingdom is of temporary duration, at its close; or, where no such kingdom is expected, simply at the end of this world (see section above on *The Messianic Kingdom*, p. 748ᵇ).

As to Sheol, Gehenna, Paradise, Heaven, see the separate articles.

LITERATURE.—The Jewish eschatology of our period has been greatly neglected in the past. This has been due partly to the ignorance of Christian scholars, and partly to the deliberate ignoring by Jewish scholars of the chief sources of information on this subject, *i.e.* the Apocalyptic books. To Lücke, Hilgenfeld, and Drummond belongs, in large measure, the merit of emphasizing the importance of this literature. Drummond's work, *The Jewish Messiah*, is a splendid contribution to our knowledge of Jewish thought, though much of it is no longer abreast of our knowledge of this subject. Schwally's *Das Leben nach dem Tode* is very stimulating on this period, though frequently misleading. The reader may consult also Salmond's *Christian Doctrine of Immortality*, and Stanton's *The Jewish and the Christian Messiah*, where they deal with our subject.

Abundant information, and copious, though undiscriminating, references to authorities will be found in Schürer, *HJP* II. ii. 126–187. Marti also (*Geschichte der Israelitischen Religion*, pp. 270–310) is well worth consulting.

The present writer hopes to edit, towards the close of next year (1898), a critical work on Jewish Eschatology from the earliest OT times down to A.D. 100.

R. H. CHARLES.

ESCHATOLOGY OF THE NEW TESTAMENT.—The eschatology of the NT attaches itself in the first instance to that of the OT. The Heb. Scriptures do not contain anything like a definite or complete doctrine of the things of the end. They are the records, however, of an important contribution to the faith in a future life, and that contribution was an ever-enlarging one. It had its reason in the two fundamental articles of Israel's faith—the doctrine of one *God*: a living, personal, righteous, gracious God, who made Himself known to His people and entered into fellowship with them; and the doctrine of *Man* as a creature different in origin and in end from other creatures, the bearer of God's image, made for communion with God, and for life in that communion. These great truths, unfolding their meaning more and more, and acting on the popular conceptions of Death and the Hereafter which Israel had in common with the Babylonians and other nations, led by steps of gradual advance to a clearer, more determinate, and more moral conception of existence beyond the grave. The experiences and intuitions of saints, the visions and forecasts and inferences of faith, seen in the poetical books, combined with thoughts and words of sublime suggestion occasionally found in the historical books, and with the more definite teaching of the prophets, to further this enlargement of belief and the march towards a definite doctrine. So the popular ideas of a dark Sheol with a chill attenuated existence in its sunless deeps gave way to higher views; the thought of the lot of the individual disentangled itself from that of the destiny of the community; the belief in a moral order with judicial awards following men into the other world took shape and became increasingly distinct; and at last the faith and the teaching of the OT rose to the great hope of a resurrection to life. This eschatology of the OT, which grew from less to more in the course of Israel's history, remained nevertheless incomplete at its highest, and pointed to something beyond itself. The eschatology of the NT became its heir, passing beyond its limits and carrying its principles to their issues.

But the eschatology of the NT attaches itself also, though in another way, to the popular faith of the Jews of its time, and to certain developments of thought and belief which had taken place in the period following that which produced the last of the OT books. These developments were considerable. We gather what they were from the literature of Judaism which has descended to us, the Apocr. of the OT, to some extent the Rabbinical books, and most particularly the pseudepigraphic and apocalyptic writings. This literature furnishes the key to much in the NT doctrine of the Last Things. It shows in what way the OT faith was retained and enlarged in harmony with its essential principles; in what way also it was materialized and subjected to changes which were not consistent with its true spirit; in what directions belief became more positive; and in what respects it became fanciful, speculative, grotesque; how certain OT terms and ideas were modified in sense and application, and in what measure new terms and ideas were introduced. The eschatology of the NT bears the impress of these things. It cannot be understood apart from them. From much that emerged in this intervening period it stands aloof. Other things in this development, which were consistent with the principles of the OT revelation, are reflected in it, purified of the gross, exaggerated, and unspiritual elements which mixed themselves with them.

The eschatology of the NT is not given in systematic form, neither is it expressed in the precise and measured language of metaphysics or theology. It appears in the shape of a number of ideas which are common to the NT books, but which are presented in different aspects and connexions by the several writers. It is given in occasional form, in Christ's words, the discourses in the Bk. of Acts, the records of evangelists, the Epistles of apostles, on the promptings of circumstances which from time to time called forth declarations in speech or in writing on the matters of the end. It is not given in the terms of the schools nor with a view to speculative interests, but always for the purposes of life and practice, and in the language of the people. It makes free use of the figurative, parabolic, imaginative phraseology in which the Eastern mind naturally expresses itself. It never claims to give an exhaustive disclosure or a constructive account of the Last Things. The message of the NT also being distinctively a message of hope, the eschatology is occupied mainly with the issues of the kingdom of God and the destiny of the righteous. It says less of the graver issues of the future of the unrighteous.

The eschatology of the NT being conveyed in this occasional and discontinuous form, we may best understand it by following out the great ideas as they appear first in one and then in another of the main groups of writings. The fundamental question is that of Christ's own mind on the subject. It will be convenient, therefore, to deal with the eschatology *first* as it appears in Christ's own words reported in the Gospels, and *then* as it is found in the teaching of the several divisions of the NT writings. It will thus be seen whether or how far the NT has a consistent doctrine of the Last Things.

I. Christ's Eschatology.—There are questions of criticism to which regard must be had in studying the eschatology of the NT. In the case of our Lord's teaching there is the debated question of what is primitive and what is secondary in the records of His words, with the various tests proposed for distinguishing between the one and the other. It is impossible to enter at length into these things here. It is enough to say that the substance of Christ's teaching will be found to be the same whichever of the leading theories of the construction of the Gospels is followed. Its main points belong to the large stream of narrative and discourse which is common to the first three Gospels, and in which the most primitive tradition is probably preserved. There is also the question of the relation in which the report of Christ's words given in the Fourth Gospel stands to that contained in the Synoptists. Of this it must suffice to say that the difference in the form is a reason for taking the two accounts separately; from which, however, it does not follow that there is an essential difference between them.

In the Synoptic Gospels the eschatology centres in the great idea of the Kingdom of God (which see). Christ's whole disclosure of the Future has its point of issue in this doctrine of the Divine kingdom and its consummation. In this His teaching connects itself with the large ideas of the OT, carrying them further and fulfilling them. As the OT, too, in its conceptions of the future knew nothing of the philosophy of the subject and furnished no reasoned statement, but followed the logic of experience and the heart, giving no dogma of immortality, but the expression of a living fellowship with God which involved the continuance of life; so Christ's teaching lies apart from all theoretic questions, all speculative discussions, all that is of curious interest, and deals with practical relations and broad moral issues. It offers no proof of the reality of a future existence, but presupposes it, and speaks of life as man's destiny. It unfolds the course of the Divine kingdom which had been the object of OT faith and the centre of OT hope. It presents that kingdom as a thing of the actual present, brought to men in and by the Teacher Himself, but also as a thing of the future which looks through all historical fulfilments to a completer realization,—a thing, too, of gradual, unobtrusive growth, yet destined to be finally established by a great conclusive event. Christ's whole teaching on the subject of the Last Things, as regards the Church, the world, and the individual, is connected with this lofty OT idea of a new order in which God shall be confessed to be Sovereign, and has regard to it in its primary deliverances.

Among these deliverances a large place is given to the promise of His own *Return*. In the OT the consummation of the Divine kingdom was to be brought about by a descent of God to earth, and in certain prophecies it was further connected with the coming of an ideal King, the agent of J″ in the fulfilment of His purpose. So Christ connects the completion of the kingdom with a decisive occurrence, the great event of His own Parousia (Mt 24[3. 37. 39]). The time of this new interposition is not declared, it is not known even to the Son (Mt 24[36] RV, Mk 13[32] RV). But it is to come when the times are ripe for it, and there are prelusive tokens of it. This event of His coming is the burden of the great eschatological discourse in Mt 24. 25, in which there are problems both for criticism and for interpretation. In that discourse two distinct occurrences, the destruction of Jerusalem and the end of the world, seem to be spoken of as coincident and as near. This is in accordance with the nature of biblical prophecy as it is seen in the OT, which brings together in prophetic perspective or 'timeless sequence' events which were widely separated in actual occurrence (Is 8. 9, Zeph, Ob). It does not require for its explanation the affirmation of mistake on Christ's part (Strauss, Renan, Keim, Weizsäcker, S. Davidson, etc.), the supposition of misunderstanding or misreporting on the part of the evangelists (Baur, Colani, De Wette, Holtzmann, etc.), the limitation of the whole declaration to the single catastrophe of the fall of Jerusalem and the Jewish state (J. S. Russell, etc.), the theory of a double coming, or the hypothesis either of a Jewish (Weizsäcker) or of a Jewish-Christian (Colani, Keim, Pfleiderer, Wendt, Weiffenbach, Vischer, etc.) apocalypse in the discourse. Nor is this form of statement confined to this particular section of the Synoptic Gospels. Sayings of similar import are given elsewhere (Mk 13[30], Lk 21[32], Mt 10[23] 16[27. 28]; cf. also Mk 8[38] 9[1], Lk 9[26. 27]). In these Gospels, too, the Return appears to be an objective event, the expression given to it being such as goes beyond any figurative description simply of the final victory of principles or the supersession of old forms of religion. In the Fourth Gospel the case is somewhat different. It is the coming of the Spirit that chiefly appears there, and that in such measure as to suggest to many that only a dynamical coming is in view (Neander, Godet, etc.). Yet a distinction is observed between the coming of the Spirit and Christ's coming, and there are passages in which the idea seems to be the same as that of the Synoptic records (14^{3} 21^{22}, cf. 1 Jn 2^{28}). The first point, therefore, in Christ's teaching on the subject of the future is the announcement of the objective event of His own Return. But His declarations on this Parousia know nothing of the minute and fantastic inventions of Jewish theology, as seen in the Book of Enoch, the Assumption of Moses, the Sibylline Oracles, and similar products of Jewish thought, with their elaborate machinery of signs and portents and mystic numbers, their extravagant chronologies, their grotesque descriptions of the literal re-settlement of the Jews in their own land, their many eccentricities and ineptitudes. They know as little of those *Chiliastic* conceptions of the future, those curious calculations of the duration of Messiah's kingdom, those puerile ideas of the erection of a new Jerusalem on the ruins of the old, which took hold of the Jewish mind before Christian times, and, entering into Christian thought, gave shape to the doctrine of a millennial reign of Christ on earth which was to end in a great apostasy and to herald the consummation.

With this doctrine of the second advent is associated the doctrine of a *Final Judgment*. This judgment is presented as the object of the coming, and it occupies a place of like prominence in Christ's teaching. It is expressed in various of His sayings, but at greatest length in the eschatological discourse in the First Gospel. According to the consentient teaching of the Synoptic Gospels, it is a judgment at the end of the world, a judgment of individuals (Mt 22^{1-14} etc.), a judgment of universal scope (Mt $13^{36-42.\ 47-50}$ 16^{27} 25^{31} etc.), and a judgment in which Christ, the Son of Man, is Himself to be the Judge (Mt 25^{31} etc.). In the Fourth Gospel the judgment appears for the most part under another aspect. In that Gospel the emphasis is laid upon a judgment which is *present* and subjective, fulfilling itself in a probation of character and a self-verdict which proceed now ($3^{17.\ 18}$ $12^{47.\ 48}$). But this subjective judgment of the present in life and conscience is not inconsistent with an objective judgment of the future. And the latter is not strange to the Fourth Gospel. The Johannine phrase 'the last day' (12^{48}) points to it, and it is contained in such words as those in $5^{27.\ 28}$ (cf. 1 Jn 2^{28} 4^{17}, in which Johannine writing the judgment is connected, as in the Synoptists, with Christ's coming). The doctrine of a final judgment so declared by Christ stands in intimate relation to certain leading ideas of the OT, completing these and giving them certainty. The Heb. Scriptures, penetrated through and through by the idea of a Divine retribution, have a large doctrine of judgment, a judgment for Israel, more frequently a judgment for the nations or a world-judgment. But for the most part it is a world-judgment which has its scene in this world, a triumph of the kingdom of God in the form of an overthrow of its living adversaries on earth. And in this J″ Himself is the Judge. In certain prophecies (Is 9. 11, Mic 5, Jer 23. 33. 34. 36, Ezk 34. 37, Zec 9–11) the triumph of the kingdom of God is connected with the advent of a great Davidic King, and Messiah appears as the agent of J″. But in the OT the final arbitrament of men's lives is not committed to the Messiah or the ideal King, as in Christ's teaching it is given to the Son of Man. Further, while the foundations of the doctrine of a final universal and individual judgment are laid in the OT ideas of the righteousness of God, His covenant relations with Israel, and His sovereignty over the nations, the conception of a judgment after death does not take distinct and definite form till near the close of the OT. Even when the idea of an individual judgment at the end of things appears, the subjects of the judgment seem to be limited to those of Israel. Christ's doctrine has also its relations to the ideas of the non-canonical literature. In the representative books of Judaism the doctrine of a judgment bulks largely, and is taught with much novel and peculiar detail. It has also different forms. In certain books (*e.g.* the *Book of Enoch* $90^{18.\ 19}$, the *Assumption of Moses* 3. 4, etc.) the OT idea of a destruction of living enemies of J″'s kingdom here on earth survives. In many cases, though not in all, the Messiah is the agent of God in this judgment; and the judgment is placed usually at the beginning of His reign, but sometimes (where a limited duration is ascribed to that reign) at its close. In other books, however, and especially in the *Book of Enoch*, this passes over into the idea of a final judgment, in the forensic sense, occurring after death, extending to all men and to angels as well. In these books, too, God is the Judge and Messiah His instrument. Only in the later section of the *Book of Enoch* does the Messiah appear in any certain and definite form as the Judge at the last day. Christ's doctrine of a universal, individual judgment at the end of things, in which judgment He Himself is Arbiter of human destinies, carried the OT conception to its proper issue, while it gave a new certainty, consistency, and spirituality to the developed ideas which had arisen in Judaism in the period following the last of the Jewish prophets.

In conjunction with these doctrines of the Parousia and the Judgment, the doctrine of a *Resurrection* has an essential place in Christ's eschatological teaching. The doctrine of a resurrection from the dead is implied in the doctrine of a final universal judgment at the end of things. It lies also in the great principles of OT. The Psalmists and the Prophets have their visions of a limitation of the power of death, a destruction of death, a deliverance from Sheol, a life superior to death; and, in the progress of the prophetic teaching, the faith in a resurrection of the dead rises gradually into distinctness. It appears first as a belief in the re-animation of the dead nation, and at last in Isaiah (26^{19}) and Daniel as a belief in the return of deceased individuals to life. In the final utterance of OT on the subject (Dn $12^{2.\ 3}$) this enlargement of the idea appears to have its occasion in the question regarding the fate of departed members of Israel—whether there is reward for the faithful among these, whether there is penalty for the unfaithful. But OT does not seem to go beyond the case of Israel. It tarries with the announcement that Israel's dead, true and false, shall come forth from the dust of earth to receive the awards of their truth or falsehood. In the period between this and the Christian era the belief passed through various fortunes. It did not become the universal faith of the Jewish people. In some of the non-canonical books the old idea of Sheol continues (Sir $17^{27.\ 28}$ 41^{4}, Bar 2^{17}). In some the hope appears to be that of an incorporeal immortality (Wis 2^{23} 3^{1-4} $4^{13.\ 14}$ 15^{3}, 4 Mac 14^{3} 16^{12} 18^{23}). But in others the belief in a resurrection is seen in more or less definite form (Enoch 91^{10} 92^{3}, Ps.-Sol 3^{16} 13^{9} etc., most distinctly and most frequently in 2 Mac, *e.g.* $7^{9.\ 14.\ 23}$; cf. also Sibyll. Oracles 1^{440} $2^{274.\ 275}$ $4^{228.\ 229}$, Apoc. Bar 30^{1-5} 50^{1} 51^{6}, 2 Es 7^{32}). Rejected by the Sadducees, it became the belief of the Pharisees and the majority of the Jewish people. It had become, too, a belief in the resurrection of the unjust as well as the just, although in certain cases the limited belief in a rising only of the righteous seems to have persisted (Ps.-Sol 3^{16} 14^{2} etc.). Opinion varied to some extent as to the object of the resurrection, whether it was for judgment or for participation in the glories of Messiah's kingdom, and as to its time, whether it was to be immediately before Messiah's era or at its close (cf. on the one hand Enoch 51, on the other Apoc. Bar and 2 Es). The doctrine, then, which had its roots in the great principles of the OT touching *life*, the nature of man, and his relation to God; which in the OT had grown gradually in magnitude and in definiteness; which also in Judaism had undergone changes in part natural and consistent, in part forced and inharmonious, forms an integral part of Christ's eschatological teaching. It is given in discourses which belong to the triple tradition in the Synoptic records (Mt 22$^{23-33}$, Mk 12$^{18-27}$, Lk 20$^{27-40}$). It is implied in utterances reflecting current Jewish opinion (Mt 8^{11}, Lk 13$^{28.29}$). It is presupposed where it is not affirmed in terms (*e.g.* in Mt 24. 25). It is stated in its essential relations to the great principles of the OT, and is relieved of the extravagances, the crudities, and the literalities with which it had become associated in Jewish speculation and Jewish popular thought. It is the doctrine of a real bodily resurrection, far removed from Hellenic or Essene ideas of a bare immortality of soul, affirming in harmony with the OT view of man's relation to God (Mt 22$^{31.32}$, Mk 12$^{26.27}$, Lk 20$^{37.38}$) a continuance of life for man in his entire self. In this the Synoptic records and the Fourth Gospel agree. In the latter, it is true, the fact of the resurrection is presented mainly in its spiritual aspects and its immediate relations. Some of Christ's largest words on the subject go beyond the idea of the resurrection at the last day (11$^{21-26}$); and others, if they stood alone, might perhaps be taken as strong descriptions of a spiritual renovation only (5$^{25.26}$). But in the Johannine record there are also words too definite to admit of being limited to the expression of a purely spiritual resurrection (5$^{28.29}$). Christ's doctrine, further, is the doctrine of a *universal* resurrection. Certain passages in the Synoptic Gospels (Mt 22^{30}, Mk 13^{27}, Lk 20$^{36.37}$, Mt 24^{31}, Lk 14^{14}), indeed, have been supposed to imply that Christ taught only a resurrection of the righteous. But there are others with a different implication (Mt 5$^{29.30}$ 10^{28}). The 'resurrection of the just' (Lk 14^{14}) suggests its own antithesis. The Fourth Gospel, too, declares a 'resurrection unto condemnation' as well as a 'resurrection unto life,' and in speaking of the re-awakening of the dead uses terms too large for the limited view. This resurrection, which extends to just and unjust, is further referred to the last day. In Christ's own words there is no statement of a separation of the resurrection of the unrighteous from that of the righteous as if they were events belonging to different times.

In contrast with the fulness and explicitness of Christ's declarations on the Parousia, the Judgment, and the Resurrection, is the reserve of His teaching on the subject of the *Intermediate State*. This is the more remarkable in view of the position given to that topic in the theology and the popular thought of the Jews of the time. The OT idea of Sheol, originally that of an underworld forming the final abode of men, in course of time passed through changes which are indicated to some extent in the canonical books themselves, but which took larger effect at a later period, and are known to us from the non-canonical literature. These changes followed different directions, and various ideas of Sheol continued to prevail. In part the old conception survived, with some modification (*e.g.* Sir 17$^{28-30}$ 41$^{1-4}$, Bar 2^{17}, To 3$^{6.10}$ 13^{2}, 1 Mac 2^{69} 14^{30}); in part the term came to denote a place of relative retribution (Wis 3$^{1-10}$ 5$^{1-14}$ 6$^{18-20}$ 17^{14}, 2 Mac 7$^{9.11.14.29}$ 12$^{43-45}$ etc.). Most particularly in the Apocalyptic books it is found to have assumed the sense of an intermediate state with relative rewards and penalties (Enoch 10^{12} 22. 100^{5} 103^{7}; cf. Jubilees 5^{243} 7^{248} 22^{21} 24$^{27.36}$, 2 Es 7$^{75.80}$, Apoc. Bar 52$^{1-3}$). Jewish thought seems thus to have occupied itself largely with the idea of the period between death and judgment, and with the conditions and the possibilities of an intermediate state. Of all this there is little or no recognition in Christ's words. He uses, it is true, the word **Hades**, the Greek equivalent to the Heb. Sheol, thrice. But in two of these cases the application is obviously metaphorical (Mt 11^{23} 16^{18}); and in the third (Lk 16^{23}) the term forms part of the imagery of a parable intended to teach the broad moral lesson of the penalty of a selfish life, the retribution that pursues it and changes its conditions in the other world. In the same parable He uses the term **Abraham's bosom** (Lk 16^{22}), but in a connexion that does not suggest a definite doctrinal intention. He also uses the term **Paradise**, a term with which various and uncertain ideas had been associated in Jewish thought. But He uses it only once (Lk 23^{43}), and in a large and general sense, as a word of hope and comfort; in which sense also He uses the word *sleep*,—not to inculcate the doctrine of an intermediate state as a space of unconsciousness, or as a place for the detention, the recompense, or the purification of souls. Some of His words appear to point rather to the hope of an immediate entrance of the just dead into the Father's house and the Father's glory (Jn 14$^{2.3}$ 17^{24}). But in general His attitude to the question of the condition between death and judgment is one of reserve, and His words convey nothing approaching to a doctrine of the intermediate state.

It is otherwise with the question of what follows the resurrection and the judgment. The eschatology of NT as it is given by Christ Himself has a pronounced doctrine of the *Moral Issues* of life. It speaks largely and distinctly of final reward for the good, and final penalty for the evil. These are expressed by a great variety of suggestive terms. The recompense of the righteous is described as an inheritance, entrance into the kingdom, treasure in heaven, an existence like the angelic, a place prepared, the Father's house, the joy of the Lord, life, eternal life, and the like; and there is no intimation that the reward is capable of change, that the condition is a terminable one. The retribution of the wicked is described as death, outer darkness, weeping and wailing and gnashing of teeth, the undying worm, the quenchless fire, exclusion from the kingdom, eternal punishment, and the like. Different measures of reward and of penalty are intimated, according to different degrees of merit and demerit (Lk 12$^{47.48}$). In Christ's own words there is no certain declaration of the terminableness of the penalty of the finally impenitent, no indication either of an intermediate purgatorial process or of an ultimate universal restoration. In the Synoptic Gospels, and in the groundwork of their narrative, the term *Gehenna*, *Hell*, is applied to the future condition of the lost (Mt 5$^{22.29.30}$ 10^{28} 18^{9} 23$^{15.33}$, Mk 9$^{43.45.47}$, Lk 12^{5}). This term, though in the later Judaism it had at times the sense of an intermediate condition, whether as a temporary purgatory or as a place of punishment, appears to have been in the earlier Judaism and in our Lord's time a term for the retributive state after judgment (cf. *e.g.* Enoch 27$^{2.3}$ 90$^{24-26}$ etc., which are probably its first occurrences in this sense; cf. also 2 Es 6$^{1-4}$ 7^{36}). The question whether Christ teaches the *permanence* of the penal condition resulting from the judgment is variously answered. Certain of His sayings are taken to point to a terminable penalty. These, however, are few in number, and appear either to be irrelevant (*e.g.* Lk $12^{47.48}$, where the question is, not the *duration* of the judicial awards, but their adjustment to different degrees of wrong), or to suggest the opposite conclusion (*e.g.* Mt $5^{25.26}$, Lk $12^{58.59}$, where the idea seems to be that of a liability that cannot be discharged, and a justice that is inexorable; Mt $12^{31.32}$, Mk $3^{28.29}$, Lk 12^{10}, where the terms appear to be exclusive terms, expressing the irremediableness of the condition, the fact that there can be no forgiveness at any period for the sin in question). It is urged, too, but on grounds open to challenge, that the distinctive terms 'eternal' (*αἰώνιος*) and 'punishment' (*κόλασις*) may have in this connexion other than their usual and obvious applications. But, on the other hand, the finality of destiny appears to be expressed unmistakably and in many different forms—in the words with which at the close of the great eschatological discourse the moral issues of life are summed up (Mt 25^{46}), in such contrasts as that between the 'kingdom prepared from the foundation of the world' and 'the eternal fire which is prepared for the devil and his angels' (Mt 25^{41}); in the statements of the issues of God's kingdom and of man's life given in the parables (*e.g.* Mt $13^{24-30.37-43}$); in the figures of 'the unquenchable fire' (Mk 9^{43}), the 'worm' that 'dieth not' (Mk 9^{48}), the salting with fire (Mk 9^{49}), and the like; in the many other terms of solemn moment by which the final lot of the unworthy is described—banishment from Christ (Mt 7^{21-23}), rejection (Mt 10^{33}, Lk 9^{26}), the loss of the soul or the life (Mk 8^{36}), dying in one's sins (Jn $8^{21.24}$), perishing (Jn 3^{16}), being judged already (Jn 3^{18}), its being good never to have been born (Mt 26^{24}, Mk 14^{21}), etc. These sayings are to be understood in the light of the beliefs which prevailed among the Jews on the nature and the duration of the retribution of the wicked. These are by no means easy to determine, as they varied at different periods and in different schools. Yet the general condition of opinion in our Lord's time and in the immediately preceding period can be stated with approximate certainty. The Jewish books relevant to the question contain little to bear out any large belief in the final restoration of all. They often use terms—*death*, *perdition*, *destruction*, and the like, which might be taken to point to annihilation as the final lot of the wicked, if interpreted apart from the old popular ideas of Sheol (*e.g.* Ps.-Sol 3^{13} 9^{9} 12^{8} 13^{10} 15^{13}; cf. 2 Es 7^{30} 8^{52-62}, Apoc. Bar 30). But in many cases the language is definitely expressive of the finality of the retribution (*e.g.* Jth 16^{17}, 4 Mac $9^{8.9}$, Enoch $5^{5.6}$ 10^{11-14} 12^{3-6} 22^{4-11} $27^{2.3}$ etc.). The schools of Hillel and Shammai, too, seem both to have taught, though in different ways, the immediate sealing of certain classes of sinners to Gehenna, or their punishment there to 'ages of ages.' It would appear, therefore, that in Christ's time, with certain variations and exceptions, the belief was general in an enduring penalty in the other world for the absolutely evil—unrighteous Gentiles, guilty and apostate Jews. Christ's eschatology is one of grace. His doctrine is a revelation of life. But it throws into strong relief the responsibilities of the present existence, the certainty of the retribution of sin, the possibility of an eternal sin (Mk 3^{29}) with an eternal penalty.

II. THE APOSTOLIC ESCHATOLOGY.—Under this title we include the eschatological ideas and truths delivered in the various groups of NT writings outside the evangelical records of Christ's own words. Taking each writer separately, we have to ascertain what contribution he makes to the eschatological system, in what relation it stands to Christ's doctrine, in what sense it is in harmony with that, in what degree it is supplementary. There are questions of literary criticism connected with not a few of the writings, questions both of genuineness and of integrity. Into these it is not necessary to enter here. In increasing measure these writings are being lifted above the uncertainties of criticism. It is enough for our present purpose to take them as representatives of different types of NT doctrine, earlier and later. Their ideas exhibit certain characteristic differences in form in the different groups. They bear the impress of the beliefs, opinions, and ways of speech that were current among the Jews of the time. They have obvious points of affinity with the ideas of the OT. They stand in a special relation, of dependence and agreement, to Christ's doctrine.

The *Epistle of James*, a notable product of primitive Jewish Christianity, says comparatively little on the things of the end. It speaks most definitely of the *Parousia*, of that as an event nigh at hand, and as having judgment associated with it (5^{8}). It speaks also of a *Kingdom* that is promised (2^{5}); of a *Judge* who 'standeth at the door' (5^{9}); of a judgment that will be according to character and responsibility (2^{13} 3^{1}); of recompenses for the tried and proved (1^{12}), and retributions for the oppressive rich ($5^{1.4.7}$); of a penalty which appears to be eternal (5^{20}).

In the *Epistle of Jude* Christ's Return is the great event of the future (v.^{24}); the reward of the good is 'eternal life' (v.^{21}); the truth of the final judgment (vv.$^{7.14}$) is asserted; the doom of the evil is described as the 'blackness of darkness,' a doom 'reserved for ever' (v.^{13}). A peculiar feature (appearing also in 2 *Peter*), in the eschatology of this Epistle, is the place given to the judgment of fallen angels—a subject on which the Jewish imagination ran riot (see especially the Book of Enoch 6–10. 21; cf. also Jubilees 5, Apoc. Bar 56^{10-13}). Here their doom is described, free from the extravagances which meet us in the Apocalyptic books, as that of being 'kept in everlasting bonds under darkness unto the judgment of the great day' (RV v.^{6}).

The writings bearing Peter's name, together with the discourses ascribed to that apostle in the Bk. of Acts, represent a distinct type of eschatological teaching, as of doctrinal statement generally. The *Second Epistle*, the genuineness of which has been so largely questioned, exhibits an affinity in many things with the Epistle of Jude. It has the same conception of the coming of Christ as the conclusive event of the future (1^{16} 2^{4}). It speaks in much the same terms of the judgment, and of the doom of evil men ($2^{1.3.6.9.17}$). It designates the recompense of the good as an 'eternal kingdom' (1^{11}), as Jude designates it 'eternal life.' It has the same exceptional doctrine of the punishment of fallen angels, applying the unusual term *Tartarus* to the intermediate place of their detention, and describing them as committed to 'pits of darkness in reserve unto judgment' (2^{4}). But it also makes its own peculiar contribution to the eschatology of the canonical writings in a remarkable paragraph, the most detailed of its kind in NT, on the end of the world (3^{3-13}). It teaches that Christ's Parousia is to bring the whole present system of things to its conclusion, and the world itself to its consummation. With the great event of His coming the existing order shall be dissolved; the present heavens and earth are to give place to 'fresh heavens and a fresh earth'; and a reconstructed world is to come forth as the abode of righteousness and the scene of the perfected kingdom of God. In this 2 P attaches itself to OT conceptions of a world-conflagration (Ps 50^{3} 97^{3}, Is $66^{15.16.24}$, Dn $7^{9.10}$), and a dissolution of the present system, effected by fire, in connexion with J″'s judgment and the day of His recompense (Ps $102^{26.27}$, Job 14^{12}, Is 34^{4} 66^{22}).

First Peter, which is an epistle of hope, looks at all things in the light of the future. It has a large eschatology, the central point of which is Christ's 'Apocalypse,' His revelation or appearing (1^{7} 5^{4}). Its dominant notes are the 'last time,' the 'end of all things,' the judgment (1^{5} $4^{7.17}$). In the judgment God Himself is Judge (1^{17}); Christ also appears to be Judge (4^{5}). The judgment is universal, alike of quick and of dead (4^{5}). It begins with the house of God now, and it has its fate reserved for the 'ungodly and the sinner' ($4^{17.18}$). The judgment of the unrighteous is referred to only incidentally. The reward of the good is declared in various terms, as an 'inheritance,' 'honour,' 'life,' a 'crown of glory,' etc. ($1^{4.7}$ 5^{4}). The question of greatest interest in the eschatology of this Epistle, however, is its relation to the 'larger hope.' This turns upon the interpretation given to the two famous passages touching the preaching to 'the spirits in prison' (3^{18-22}), and the preaching of the gospel to 'the dead' (4^{6}). In connexion with these the application which Peter makes of Ps 16 in his Pentecostal discourse (Ac 2^{31}) is also brought into view. The terms in which Peter speaks here of Christ, 'neither was he left in Hades, nor did his flesh see corruption,' have been taken to point to a visit of Christ to the under-world, and a consequent activity of His grace there. It is with Christ's *resurrection*, however, that Peter is specially concerned in that discourse, and the words do not go beyond the broad statement that Christ at His death passed into the world of the departed like other men, but passed thither only to rise again. The two passages in the Epistle itself are of a different nature, and rank among the chief *cruces interpretum* in NT. The former passage has been expounded in the interest of many different theories—those of the liberation of saints of OT times; Christ's penal endurance of God's wrath; the purgatorial detention and purification of souls; Christ's descent to Hades for the purpose of a judicial manifestation of Himself, for a fresh proclamation of the gospel there, for the provision of a continuous ministry of grace there, for the prolongation of opportunities of repentance and offers of forgiveness to the departed, and the like. The latter passage has also been very differently interpreted. On the basis of both, the eschatology of this Epistle has been understood by many to favour the 'larger hope,' and to suggest that this life is not in every case the theatre of human fates, if not to teach the doctrine of the existence of a ministry of grace in the world of the departed with untold possibilities of after-death repentance and salvation. For the details of the interpretation and for its history the commentaries must be consulted. It must be enough here to say that, while the view in question has been largely adopted, it has not commended itself to all scholars of authority. The exegesis of these passages has still many uncertainties, and waits yet for its key; while the passages themselves stand entirely alone in NT. (See especially Güder, *Die Lehre von der Erscheinung Christi unter den Todten*; König, *Die Lehre von Christi Höllenfahrt*; Dietelmaier, *Historia dogmatis de Descensu Christi ad Inferos litteraria*; Hofmann, *Schriftbeweis*; Usteri, *Hinabgefahren zur Hölle*; Schweitzer, *Hinabgefahren zur Hölle*; Spitta, *Christi Predigt an die Geister*; Bruston, *La Descente du Christ aux Enfers.*) The further question has been raised whether Peter's eschatology does not contain the doctrine of a *Universal Restoration*. In his discourse to the people in Solomon's porch (Ac $3^{19.21}$) he is reported to have spoken of a *restoration* or *restitution of all things*. This has been sometimes supposed to intimate the final restoration of all men. But the words have their key in the passage of Malachi ($4^{5.6}$) to which they refer, and in Christ's application of that passage (Mt 17^{9-13}). So regarded, the *restoration* of which Peter speaks becomes either the moral renewal of Israel, as some explain it, or the renovation of the world, as others think. It is in any case a restoration, not of persons, but of *conditions*. Peter's eschatology, therefore, is in general concord with that which has so far been recognized in NT. The points in which it has been supposed to be different yet remain doubtful.

The writings associated with *John's* name have a distinct and peculiar character in their doctrine of the end as in all things else. There is a marked difference, too, between the Apocalypse and the Epistles. The former is an eschatological writing, following the order of the Jewish Apocalyptic. In the latter eschatological truths also appear, but in a subordinate place. The *Epistles of John*, with their ideal teaching, find the future in the present. As in the version of Christ's teaching which is given in the Fourth Gospel, their great conception is *life*, and that as opposed to *death* and *perdition*. As in the one, so, too, in the other, this *life* is in the first instance a present thing (1 Jn $5^{12.13}$). But it is also a thing of the future (1 Jn 2^{25}), and it is an *eternal* life, life after the divine order, life with the ethical quality of real, perfect life. But it is none the less a life that looks to a future—to a manifestation yet to be made of what the children of God *shall* be (1 Jn 3^{2}). In these Epistles the eschatological relations are not lost in the ideal. They speak of the 'last hour' (1 Jn 2^{18}); of an 'antichrist' that 'cometh' as well as of antichrists that already are (1 Jn $2^{18.19.22}$ 4^{3}, 2 Jn ^{7}); of a future 'full reward' (2 Jn ^{8}); of a vision of Christ and a conformity to Him which are not of the present (1 Jn $3^{2.3}$); of a manifestation of Christ yet to be made, of His expected *Parousia* (1 Jn 2^{28}). The use of the term *Parousia*, which elsewhere, and especially in the Pauline writings, has a very definite sense, indicates that, while to John Christ's Return was in one sense a spiritual advent, a present act of grace or judgment, it was in another sense an objective event of the future. While in John's writings, too, the *Resurrection* and the *Judgment* are for the most part spiritual processes and present conditions, they are also events of the future associated, as they are elsewhere, with the Parousia. That it is so with regard to the former is implied in what is said of the judgment and the manifestation of the children of God. That it is so with the judgment itself appears especially in 1 Jn 2^{18} 4^{17}.

In the *Apocalypse of St. John* we have a large and impressive eschatology, in which Christian truth appears in the garb of Jewish ideas and Jewish terms. This book is beyond all others the book of the future. That future is near, and it is filled with the figure of the returning Christ. Its whole doctrine of the end has its centre in the event of the Parousia, and that doctrine is conveyed in a form which bears the stamp both of the visions of OT prophets (especially Ezekiel, Zechariah, and Daniel) and the symbolism of the Jewish Apocalyptic books. The Parousia appears occasionally as a spiritual advent taking effect in history (2^{5} 3^{20}), but usually as the objective return which belongs to the end of things. It is regarded as near (2^{17} 3^{11} $22^{12.20}$); it is to be an event of *glory*, and to have *judgment* for its object (1^{7}). The Judge is God Himself (20^{12}); but Christ also appears as Judge (1^{18} $6^{16.17}$ 22^{12}). Like the non-canonical books of the same class, it speaks much of the signs of the end, and of the prelusive events, but avoids the trivialities and the gross imaginings, the fanciful and long-drawn-out calculations, which are characteristic of the ordinary Jewish Apocalyptic (*e.g.* Enoch 10^{12} 91^{12-17} 93, Assump. Moses 10^{29}, Sibyll.

Or. 4^{47}, 2 Es $14^{11.\,12}$ etc.). At times it seems to combine different ideas which prevailed in Judaism of the things of the end. In one paragraph (20^{1-10}), of difficult interpretation, it appears to follow a view of the final events which differs from the general doctrine of the NT, but is given in certain of the Jewish books—the idea of a millennial reign of Christ on earth, to be followed first by a final burst of Satanic power, and then by Christ's judicial advent. The paragraph, which will not fit a purely figurative interpretation, represents the Day of the Lord as consisting of two divisions, with a double resurrection and a double judgment—a first resurrection, which is only of the saints, and more particularly the martyred saints, and a second, which is for 'the rest of the dead'; a first judgment taking effect in the overthrow of Satan, and a second, which is in forensic form, and for all classes of the dead. The book is also understood to express two views of the lot of the righteous dead: one in which they are presented as having immediate entrance into heaven (13^{6}), another in which they are presented as in the underworld, in consciousness and rest, waiting for their complete reward (6^{9-11}). In the latter case, however, the martyrs alone are in view, and in both cases the language is that of the imagination. The Apocalypse, however, has a pronounced doctrine of the final awards. The reward of the righteous is conveyed in a varied imagery of the OT order—'hidden manna,' a 'new name,' the 'crown of life,' 'right to the tree of life,' the place of a 'pillar' in the temple, a reign with Christ, a position before the throne, entrance into the city, the vision of God's face, the heirship of all things ($2^{7.\,10.\,17}$ $3^{12.\,21}$ 7^{15} 21^{7} $22^{4.\,14}$). The penalty of the unrighteous is described as 'great tribulation,' being 'without,' killing with death, burning with fire ($2^{22.\,23}$ $18^{8.\,9}$ 22^{15}); but above all by two terms, 'the second death' (2^{11} $20^{6.\,14}$ 21^{8}) and 'the lake of fire' (19^{20} 20^{10} 21^{8}), which are peculiar to this book among the NT writings, but which occur in one form or other in the Rabbinical and Apocalyptic literature (*e.g.* Enoch 18^{11} 21^{7-10} 90^{42}). In this book they appear to denote a lasting retribution. Further, the Apoc. expresses the doctrine of a perfected world as well as that of a perfected society. It has the vision of a new heaven and a new earth (21^{1-6}) as well as that of a perfected city of God (21^{1}–22^{5}).

In the *Epistle to the Hebrews*, where we have a series of ideas and forms of expression in general affinity with the Pauline type of doctrine, and not less with the older apostolic type, eschatology is not the prominent subject. Even the 'rest' and 'the world to come' are not presented primarily as of the future. Yet the things of the end make a considerable element of the thought of the Epistle. The doctrines of 'resurrection of the dead' and 'eternal judgment' are dealt with as things that should be well understood ($6^{1\text{f.}}$). The day of Christ's coming is in the writer's eye; it is a day that draws nigh, and with it the judgment is connected (9^{28} $10^{24.\,25}$). In the judgment it is God Himself, not the Son, that is Judge, and He is 'Judge of all' (12^{23} $10^{30.\,31}$). The Epistle also has a definite doctrine of *final awards*. The recompense of the righteous is the 'heaven' into which the Forerunner and High Priest has passed, an 'eternal inheritance,' an 'enduring substance,' a 'better country,' a 'city prepared,' a 'kingdom which cannot be moved' (4^{4} $6^{19.\,20}$ 9^{15} $10^{34.\,36}$ 11^{16} 12^{28}). The retribution of the unrighteous is 'judgment,' 'fierceness of fire,' 'perdition' ($10^{27.\,39}$).

In the *Pauline Epistles*, together with the discourses attributed to St. Paul in the Book of Acts, we find a remarkable eschatology, larger, more developed, and in some points, especially in the doctrine of the resurrection, having more of the aspect of reasoned statement. Even this eschatology, however, is not given in anything like orderly or systematic form, but incidentally as occasion arose from time to time in the discharge of St. Paul's ministry. Nor is it the fundamental doctrine of the Pauline writings. The questions of its precise nature and measure, its consistency, and its relations to what is found elsewhere in Scripture, have been made dependent on questions regarding the authenticity and integrity of the Epistles and the growth of St. Paul's ideas. In its main elements, however, it is unaffected by these questions. Its essential points would remain the same had we only the four primary Epistles accepted by Baur. They appear in all the four distinct groups into which the Pauline writings fall. They do not appear in the same proportions and relations, or under precisely the same aspects, in the several groups. But the differences which have to be recognized do not amount to inconsistency. They do not imply any essential change of view, and do not appear to go beyond what finds its explanation in differences of circumstance, occasion, and circle of readers.

As in other sections of NT, the doctrine of the things of the end is closely related in the Pauline writings to that of the kingdom of God, an idea which recurs in all the four groups of Epistles. This 'kingdom,' though sometimes described as a *present* kingdom (Ro 14^{17}, cf. 1 Co 4^{20}, Col 1^{13}), is usually a kingdom of the future, and the idea of its consummation is the centre of the Pauline eschatology. A foremost place is given in this eschatology to the doctrine of Christ's *coming*, which event is described under a variety of terms—His 'day,' His 'revelation,' His 'Parousia,' etc. (1 Co $1^{7.\,8}$ 5^{5}, 1 Th 2^{19} 3^{13} 4^{15} $5^{2.\,23}$, 2 Th 1^{7} $2^{1.\,8.\,9}$, Ph 1^{10}, 1 Ti 6^{14}, 2 Ti 1^{12} $4^{1.\,8}$, Tit 2^{13} etc.). This Parousia is regarded as an objective event. The passages in which this 'coming' is declared are not confined to any one section of the writings; and when compared with each other they do not suggest a change in St. Paul's mind from a less spiritual idea in the earlier Epistles to a more spiritual in the later. The doctrines of the *Resurrection*, the *Judgment*, and the *Final Awards* also appear in essentially the same form in the Pauline writings, and in the several groups of these writings, as elsewhere in the NT. The *resurrection* finds its largest exposition in the primary Epistles, but it is given also in others, and it is a real *bodily* resurrection, a return of the complete man to life (Ro 4^{17}, 8^{11}, 1 Co 15, 2 Co 1^{10} 4^{14} 5^{1-5}, Ph $3^{11.\,21}$). The *judgment* is the judgment of *God* (Ro 2^{3} 14^{11}, cf. 3^{19}), of *Christ* (2 Co 5^{10}, 2 Ti 4^{1}), of *God through Christ* (Ro 2^{16}); a future, final judgment (Ro 2^{5}, 1 Co 3^{13}); a righteous judgment, discovering the secrets of all hearts, giving to every man according to his works (Ro 2^{5}, 2 Th 1^{5}, 2 Ti 4^{8}); a universal judgment, for both quick and dead (Ac 17^{31}, cf. Ro 14^{11}, 2 Ti 4^{1}). The issues of that judgment are declared with remarkable frequency and variety of statement; they are described as 'eternal' (αἰώνιος), which term in the Pauline Epistles is essentially, and in most applications, one of duration (cf. *e.g.* Ro 16^{26}, 2 Co 5^{1} etc.). The lot of the unrighteous has a subordinate place, but is expressed as 'wrath,' 'the wrath to come,' 'death,' 'punishment,' 'destruction,' 'eternal destruction from the face of the Lord' (Ro 2^{5}, 1 Th 1^{10}, Ro 2^{8} 6^{21}, 2 Th 1^{9}, Ph 3^{19}). The lot of the righteous is a salvation 'with eternal glory,' a 'prize,' a 'crown,' an 'inheritance,' a 'manifestation,' a 'reign,' a 'life' with Christ, 'eternal life,' 'the life which is life indeed' (Ro 2^{7} $5^{9.\,21}$ $6^{8.\,23}$, 1 Co 9^{25}, Gal 5^{5} 6^{8}, Ph 3^{14}, Col 1^{12} 3^{24}, 1 Ti 1^{16} $6^{12.\,16}$, 2 Ti $2^{1.\,10}$ 4^{8}, Tit 1^{2} etc.).

The Pauline eschatology has elements which are, in some sense, peculiar to itself. Among these are the doctrines of the Rapture of the Saints (1 Th 4^{17}) and the Man of Sin (2 Th 2$^{3-10}$). Of these the former has a certain affinity with one of the apocalyptic visions (Rev 11$^{11.12}$), as well as with Christ's word regarding the 'gathering of the elect' (Mt 24^{31}), and the narratives of the ascension, especially those by Luke (Mk 16^{19}, Lk 24^{51}, Ac 1$^{9.10}$). The latter takes its form from Daniel's predictions (9^{27} 11$^{36.37}$ 12^{11}), and is in affinity with Christ's eschatological discourse (Mt 24^{24}), and John's declaration on Antichrist (1 Jn 2^{18}).

There are also things in the Pauline eschatology on the interpretation and relations of which opinion has been divided. It is thought by some to depart from the general view of the NT, and to join the Apocalypse (20$^{1-10}$) in teaching the intervention of a *millennial* period between two distinct resurrections. But this idea, which is otherwise alien to St. Paul's writings, turns upon the particular interpretation of a single passage (1 Co 15$^{22-24}$), in which the immediate question is not one of *succession* or chronological order, and in which nothing is said of any other resurrection than that of those who are Christ's. The Pauline Epistles have also been supposed to contain a definite doctrine of the *intermediate state*, with activities of grace in it. The doctrine of a *purgatory*, or some provision for the purgation of souls in the other world, has been ascribed to the great paragraph in 1 Co 3$^{12-15}$, in which, however, the 'day' in question is that of the judgment, and the action referred to is that of *testing*, not purifying. The doctrine of a *middle state*, with a descent of Christ implying the extension of grace and opportunity, is supposed to be contained, in particular, in certain passages of the greater Epistles. One of these is the section in Romans (10$^{5-10}$) in which use is made of Dt 30$^{11-14}$. But the main idea there is the *accessibility* of the Divine commandment, the *nearness* and *attainability* of the righteousness of God, and the words say nothing of a Hades-ministry of Christ, nothing of the world of the dead, beyond the fact that Christ entered it and was raised from it. Another is the paragraph in Ephesians (4$^{7-10}$) in which the subject of *gifts* is dealt with, and the 68th Psalm is introduced in that connexion. It speaks of a *descent* of Christ, by which some understand the descent from heaven in the incarnation, and others the descent from earth to Hades. But even on the latter interpretation the paragraph says nothing of any work of Christ, or any possibilities for the dead in Hades. Of greater interest is the question whether the Pauline eschatology contains the doctrine of a *universal restoration*. The answer turns mainly on certain passages of large suggestion in the Epistles of the Captivity, together with one or two in the earlier Epistles. The comparison between *Adam* and *Christ* in 1 Co 15^{20} is cited in this interest. The universality expressed there, however, does not mean that all shall in the end be made certain of blessedness. The point is either, as some take it, that all who are Christ's shall be raised (the 'all' being limited by the nature of the case); or, as others think, that, as in Adam all are made subject to physical death, so in Christ all shall be raised out of it. The statement in the same chapter (1 Co 15$^{24-28}$) on the subduing of all things, and the consummation in which God shall be 'all in all,' is also supposed to imply Paul's hope of a final restoration of all. But the subjects to be subdued are not sinful men, but 'all rule and all authority and power'—all powers opposed to God; and the end expressed by the 'all in all' is a condition of things in which the world in all its parts will answer to God's will, or in which the will of God will be recognized as the sole authority. The declaration of the universal adoration that is to be paid to the exalted Christ (Ph 2$^{10.11}$) is also cited as a distinct witness to the same; in which, however, there is probably nothing beyond the broad statement of a homage wide as universal nature, or an acknowledgment of sovereignty made by three great classes of living beings. The passages which are most definite and most relevant are the one in Ephesians (1$^{9.10}$) which speaks of a 'summing up' of all things in Christ, and the one in Colossians (1^{20}) which speaks of a 'reconciliation' of all things. In these the terms are large enough to include all created things, and go beyond the case of universal man, or even the whole animate creation. They are passages which express the cosmic effects of Christ's work, and appear best interpreted as declarations of the Divine purpose to bring back all things to their pristine condition of harmony, through Christ as the centre of unity and bond of reconciliation.

The Pauline eschatology has its point of culmination in its doctrine of the *resurrection*. That doctrine is a consistent as well as a lofty one. It does not limit itself to a resurrection of the just, but has its place also for that of the unjust. Neither does it regard the resurrection of the just and that of the unjust as two successive acts, separated by a millennial period, the passage (1 Co 15$^{20-28}$) chiefly relied on for that being insufficient to sustain it. Nor does it seem to predicate the provision of an *interim* body, as some have argued on the basis of a single paragraph (2 Co 5$^{1-8}$), for the existence between death and the resurrection. Nor, again, does it entangle itself with curious questions regarding the *how* of the resurrection, the nature of the risen body, or the conditions of the future life, but contents itself with the simplest analogies drawn from nature and from Christ's own case. It consistently affirms for man a real and complete continuance of being, not an incorporeal immortality like that to which Greek thought looked, but a bodily immortality, a permanence of life in the integrity of man's entire nature. It connects its doctrine of the resurrection with other cardinal Pauline doctrines—the indwelling of the Spirit, the inward presence of Christ, the mystical union. It links it further with the doctrine of a renovated earth and a ransomed creation (Ro 8$^{19-23}$).

The eschatology of the NT, therefore, is in its broad outlines a consistent though not a systematized doctrine. In the different sections of NT, and with all differences in detail, the eschatology turns on the great truths of the Parousia, the bodily resurrection, the universal, righteous judgment, the final awards of recompense and penalty. It is in essential harmony with the faith and teaching of the OT, and requires for its explanation no theories of derivation from ethnic thought. The distinctive points in the Pauline eschatology are in affinity with Hebrew faith, not, as some argue (Pfleiderer, etc.), with Greek thought. The same is even more obviously the case with the eschatology of the NT writings outside the Pauline circle. Essene or Alexandrian (Philonic) ideas are not in place as sources of Christ's teaching on the things of the end. Even the doctrine of the *resurrection* as it is given in the NT cannot be said to be dependent, in the sense affirmed by some (L. H. Mills, etc.), on the Zoroastrian theology. It is possible that in some of its affirmations the NT eschatology has been influenced to a certain extent in its form by external modes of thought. In all that is of its substance it is in relation to Hebrew faith, and has its point of issue in the principles and ideas of the Old Testament.

ESCHEW.—In the older versions 'eschew' is common, and is used in two senses.—1. To 'escape,' as Pr 11^{15} Wyc. 'He that escheweth snaris, schal be sikur'; cf. Knox, *Hist.* p. 70, 'If they will not convert themselves from their wicked errour, there shall hastily come upon them the wrath of God, which they shall not eschew.' Of this meaning AV has retained no example.

2. To 'turn away from,' as Pr 17^{16} Wyc. 'He that eschewith to lerne, schal falle in to yuels.' Of this AV preserves three examples in OT, Job $1^{1.8}$ 2^{3}, all in the phrase 'to fear God and e. evil' (Heb. סוּר); and one in NT, 1 P 3^{11} 'Let him eschew evil, and do good' (Gr. ἐκκλίνω). Cf. Is 7^{16} Cov. 'But or euer that childe come to knowledge, to eschue the euel and chose the good.' RV prefers 'turn away from' in 1 P, Amer. RV in Job also. Eschew came into the Eng. lang. from the Old High Ger. *sciuhen* (through the Fr. *eschever*), whence came also 'shy,' adj. and verb.

ESDRAELON.—This is the Gr. way of writing the Heb. name Jezreel—יִזְרְעֶאל 'God soweth'—the royal city of Ahab and Jezebel, which, standing on the E. edge, gave its name to 'the great plain' of central Palestine. It is variously given, *e.g.* Jth 3^{9} $\aleph^{ca}$ A Ἐσδρηλών (B Ἐσδραηλών); 7^{3} A Ἐσδρηλώμ (B ℵ Ἐσδρηλών); 4^{6} B Ἐσρηλών, A Ἐσερηχών. The name by which it is now known among the natives is *Merj Ibn-'Âmr* 'Meadow of the son of 'Amr.'

At one time the mountain range must have stretched unbroken from the uplands of Samaria, behind *Jenîn*, to those of Galilee, which run N. into the Lebanons. Now it is as if a gigantic mass had been torn from the bosom of the range, leaving the rough protuberances of Gilboa, Little Hermon, and Tabor, along the edge of the Jordan Valley, and thrust violently towards the sea, in a N.W. direction. This mass forms the wooded bulk of Carmel, which, rising to a height of over 1800 feet, terminates in a bold promontory, guarding the S. end of the Bay of Acre. The undulating floor of this great gap among the hills forms the 'valley' or plain of Esdraelon. The name by which it is mentioned 2 Ch 35^{22}, Zec 12^{11}, בִּקְעָה 'an opening,' from בָּקַע 'to split' or 'cleave asunder,' as distinguished from עֵמֶק 'a depression' or 'deepening,' applied to its offshoot, the vale of Jezreel, suits the conditions admirably. The word still persists in *El-Bekâ'*, the great hollow between the Lebanons; and in its dim. form, *El-Bakei'a*, a village with a tract of fertile land around it, enclosed by ridges, high in the mountains of Naphtali. So the plain of E. is shut in by hills on every side. It may be described generally as triangular in form. It is bounded by irregular lines, drawn from the foot of Carmel, along the N. edge of the low hills which join Carmel to the Samaritan mountains, to *Jenîn*; from Jenîn to the base of Mt. Tabor; and thence under the Nazareth hills, back again to Carmel. The S. boundary is the longest, extending some 20 miles; the other two are nearly equal, being each about 15 miles in length. From *Jenîn* a little bay runs east into the bosom of Gilboa, but finds no outlet. Between Gilboa and Little Hermon a broad and easy descent passes down as far as *Beisân*, and then, with a sudden leap, plunges to the level of the Jordan Valley. This is properly the vale of Jezreel. Between Little Hermon and Tabor another offshoot of the plain makes its way down to the *Ghôr*, throwing off a spur to the N.E. of Tabor. Westward the plain narrows to a gorge between the lower hills of Galilee and Carmel, through which the Kishon forces a passage to the plain of Acre, and thence to the sea. We have practically one continuous plain from the sea-shore to the lip of the Jordan Valley. There is the plain of Acre, running up to the gorge at the E. end of Carmel; the great central plain spreading N. and S., and rolling E. to the base of Gilboa and Little Hermon, the general elevation of which is about 200 ft. above sea-level; then the vale of Jezreel, which, in the 12 miles from *Zer'în* to *Beisân*, sinks about 600 ft., before falling steeply into the Jordan Valley.

For the most part, the plain consists of deep, rich, loamy soil. After the removal of the crops, where it is cultivated, the autumnal suns burn the surface almost to brick; and when the rains come, it sucks them in like a huge sponge. In winter it becomes a nearly unbroken sheet of mud, extremely dangerous to cross; disaster not seldom befalling those who travel even by the most frequented and thoroughly beaten tracks. Its fertility has always been remarkable, ever generously rewarding the toils of the husbandmen. In season you may pass over many acres where the man on horseback can just see over the tall stalks of grain. Where left to itself, the rank luxuriance it produces is proof enough of what it might do in skilful hands. Of trees, in the plain there are few, but on its borders, esp. at *Jenîn*, there are clumps of olives and other fruit trees, the stately palm waving high over all. The low hills that run down towards Carmel from the N. are thickly covered by oak trees, and are known among the natives as 'the forest.'

The only stream of importance in the plain is the Kishon, visible, for the most part, only from its own steep banks. Rising at *Jenîn*, it pursues its crooked course, justifying its name 'the tortuous,' along a deep muddy bed, gathering contributions from other parts of the plain, and carrying all, through the gorge at Carmel, to the sea. The chief fountains are at *Jenîn*, where, creating the gardens, they gave rise to the ancient name *En-Gannîm*; at Jezreel, where, in close proximity, are three springs, the principal being *'Ain Jalûd*, just under the northern cliff of Gilboa, identified with the well of Harod. The stream which these three supply flows eastward to Jordan. At *Lejjûn*, the ancient Megiddo, there are also copious springs, sufficient to form considerable marshes to the N., besides turning several mills, and serving largely for irrigation.

The plain owed its importance chiefly to its central position, and to the great highways that lay athwart it. The main gateways of entrance were five in number. (1) That coming down from the N. between Tabor and the Nazareth hills, guarded by the fortress on the mountain. (2) That from the E. up the vale of Jezreel, commanded by this city. (3) The approach from the S. by *Jenîn*. (4) That up *Wady 'Arah* into the plain by the old stronghold of Megiddo, now *Lejjûn*. (5) That through the pass under Carmel, from the plain of Acre, dominated by Harosheth—*Harithîyeh*—on the N., and by Jokneam of Carmel on the edge of the plain. By one or other of these portals the merchant caravans and the armies of contending powers had to enter, and find exit, on their passage N., S., E., or W. These strongholds, together with Bethshean—*Beisân*, Shunem—*Sôlam*, Nain, on the N.W. shoulder of Little Hermon, Daberath—*Debûriyeh*, on the W. slope of Tabor, and Chesulloth—*Iksâl*, under the Nazareth hills, were the chief cities around the plain. At no time have towns of any importance been built on the plain itself.

E. formed the main part of the 'lot' of Issachar (Jos 19$^{17-22}$). This tribe seems to have reverted at once to the old nomadic life, 'dwelling in tents' (Dt 33^{18}), and the fatness of the land becoming a snare to them, they were ignobly content to secure its enjoyment by stooping as servants 'under task-work' (Gn 49^{15}). The 'men who had understanding of the times,' of the children of Issachar, who came to David at Hebron (1 Ch 12^{32}), were probably astrologers, and skilled in the arts of divination, so popular from of old among the children of the wilds. This goes to show how closely the inhabitants of the plain were identified with their *Bedawi* neighbours. In the same chapter, v.^{40}, we have an indication of the character of its ancient produce. The men of Issachar, Zebulun, and Naphtali 'brought bread on asses, and on camels, and on mules, and on oxen, victual of meal, cakes of figs, and clusters of raisins, and wine, and oil, and oxen, and sheep in abundance.'

Four battles, famous in Israel's history, were fought in this plain. On the banks of Kishon Sisera was overthrown, 'the stars in their courses' contributing to his defeat (Jg 5^{20}). In the hollow between Gilboa and Little Hermon, the swarms of 'the children of the East' perished in the midnight alarm, before Gideon and his brave 300 (Jg 7). Saul and Jonathan, driven back by the victorious Philistines, retired to the heights, and were slain on the 'high places' of Gilboa (1 S 31). Josiah's disastrous mistake, in attempting to arrest the progress of Pharaoh-necoh in the valley of Megiddo, was paid for with his life. Wounded in the battle, he was carried to Jerus. dead (2 K 23^{30}) or dying (2 Ch 35$^{20-27}$). Imperishable memories of Elijah's encounter with the prophets of Baal cling to its western border. Up from the way of the Jordan came Jehu, driving furiously, to the slaughter of Ahab's house, and across the plain fled Ahaziah, to perish by Megiddo. The army of Holofernes spread out from the hills above *Jenîn* to Cyamon—*Tell Kaimûn* (Jth 7^{3}). During the long period of the Jewish wars, the plain often resounded with the tramp of armies and the noise of battle. In the vision of the Jewish-Christian seer (Rev 16$^{14.16}$), the most fitting place whither 'the kings of the whole world shall be gathered together unto the war of the great day of God, the Almighty,' is the level reaches, so often drenched in blood, which take their name from 'the place which is called in the Heb. tongue Har-Magedon.'

Open of old to the eastern tribesmen, who kept the peasants in constant fear, the Romans inaugurated a period of security, and the people made progress in the arts of civilization. But with the fall of the eastern empire, the Arab hordes rushed back, and restored the ancient conditions. In recent years the Turks have established more effectual control over the nomads; and the peasants, delivered from the rapacity of the Arabs, have been handed over to the tender mercies of certain Greek capitalists in Beirût. We may doubt if their burdens have thus been lightened.

W. EWING.

ESDRAS, FIRST BOOK OF.—TITLE.—The titles of the books that deal with the history of Ezra are confusing. In the Sept. this book is entitled Esdras A, Esdras B embracing the canonical books of Ezra and Nehemiah. In the Vulg., however, Jerome had used the words Esdras I. and II. for the canonical books; Esdras A therefore became Esdras III., Esdras IV. being the designation of the other and later apocryphal book. In the sixth article of the Book of Common Prayer, and in all the early Eng. Bibles, the four books are numbered as in the Vulgate. The Geneva Bible (1560) was the first to adopt our present classification, which keeps the Heb. names Ezra and Nehemiah for the canonical, and gives the Latin names Esdras I. and Esdras II. to the apocryphal books.

Another title, ὁ ἱερεύς, appears as the heading of Esdras A in Cod. A of the LXX, which also has ἱερεύς at the head of Esdras B; the subscriptions in both books give the ordinary names.

Yet another name for our book appears in the subscription to the Old Latin, 'Explicit Esdrae liber primus *de templi restitutione*,' which aptly describes the contents of the book. To avoid confusion, 'The Greek Esdras' has been suggested as a suitable title.

CONTENTS.—Except for one original section (3^{1}–5^{6}), the book is made up wholly from materials that exist in canonical books. It is a repetition of the history of the rebuilding of the temple. The first chapter corresponds to the last two of 2 Ch, the last to a portion of Neh 8; the intervening portion runs parallel to Ezra, and contains the whole of that book, with one transposition and one interpolation.

The following scheme gives the canonical parallels, and shows the chronological confusion of the book. (The verses are those of the Camb. LXX.)

Es 1=2 Ch 35. 36. Great passover of Josiah; his defeat at Megiddo, and death; the succeeding Jewish reigns and the Captivity briefly sketched.

Es 2$^{1-14}$=Ezr 1. *Cyrus'* proclamation. Delivery of the sacred vessels to Sanabassar, and his return to Jerusalem.

Es 2$^{15-25}$=Ezr 4$^{6-24}$. Opposition to the rebuilding of the temple. Letter of Persian officials resident in Samaria to *Artaxerxes*. The work abandoned *till the reign of Darius*.

Es 3^{1}–5^{6}. Original. Story of the three pages at the court of *Darius*, who each maintain a thesis before the king. The third, Zerubbabel, as a reward for his wisdom, is granted leave to lead a body of Jews to Jerusalem. Departure of the caravan under *Joachim, son of Zerubbabel*, and others.

Es 5$^{7-45}$=Ezr 2. Lists of those returning with Zerubbabel.

Es 5$^{46-70}$=Ezr 3–4^{5}. Altar of burnt-offering set up; Feast of Tabernacles celebrated; foundation of temple laid; offer of 'the enemies' to co-operate rejected. The work hindered through their opposition *till the reign of Darius*.

Es 6. 7=Ezr 5. 6. Work resumed in second year of Darius. Letter of the Persian governors to Darius, and his favourable rescript. Completion of the temple.

Es 8–9^{36}=Ezr 7–10. Return under Ezra in reign of *Artaxerxes*. The abuse of mixed marriages redressed. Names of the transgressors.

Es 9$^{37-55}$=Neh 7^{73}–8^{13}. Reading of the law by Ezra.

The history goes directly backwards: first Artaxerxes (2$^{15-25}$), then Darius (3–5^{6}), lastly Cyrus (5$^{7-70}$), instead of Cyrus, Darius, Artaxerxes. After expressly stating that it was Darius who gave permission to Zerubbabel to return, the writer in 5$^{68-70}$ calmly refers this return to the time of Cyrus.

The book is incomplete. It breaks off in the middle of a sentence, καὶ ἐπισυνήχθησαν (cf. Neh 8^{13}). It probably continued the history to the Feast of Tabernacles described in Neh 8, but no further; this is suggested by Jos. *Ant.* XI. v. 5, who describes that feast, using an Esdras word ἐπανόρθωσις, and at this point, having hitherto followed Es as his authority, passes on to the Book of Neh. The Latin versions add a clause completing the broken sentence of the Greek. There is no indication that the book ever began at an earlier point in the history than it does now.

RECEPTION AND USE OF THE BOOK.—The first witness to the existence of Es A is Josephus, who uses it in place of the canonical book not only in his description of the Return (*Ant.* XI. i.–v.), but also in his account of Josiah (*Ant.* X. iv. 5 ff.). He agrees with Es in shifting the first opposition to the work, and the letter to the Persian king, from its place in the canonical Ezr, altering Artaxerxes to Cambyses to correct the chronological error; he introduces the story of the three pages; with Es he passes directly from the end of Ezr to Neh 8; and he borrows a good deal of the language of our book. His preference for it was probably due to its more elegant Gr. style, and a desire not to omit the additional matter contained in it. He occasionally supplements his authority by information derived apparently from the Heb. Ezr; the indications of his knowledge of the Gr. Es B are too slight to warrant the supposition that he made any use of that book (but see XI. i. 3, § 15, *ψυκτῆρες*; XI. v. 2, § 136). His narrative is worthless as history, since in trying to remove the inaccuracies of his original he has only introduced greater confusion himself.

Our book is quoted fairly often by the early Christian Fathers, both Gr. and Latin. Among Gr. Fathers, Clem. Alex. *Strom.* i. 392, Potter (ἐνταῦθα Ζοροβαβὲλ σοφίᾳ νικήσας τοὺς ἀνταγωνιστάς, κ.τ.λ.); Origen, *Hom. ix. in Josuam*, § 10, *Comm. in Johann.* vi. 1; Eusebius, *Comm.* in Ps. 76, § 19; Athanasius, *Orat. cont. Arianos*, ii. 20. Tertullian, *De Cor. Milit.* 9, perhaps refers to 1 Es 5^2; Cyprian, Ep. 74, 9, quotes the passage, 'Veritas manet et invalescit in æternum, et vivit et obtinet in sæcula sæculorum' (iv. 38); and Augustine, *de Civ. Dei*, xviii. 36, refers to the same passage, suggesting that it may be prophetical of Christ, who is the Truth. No passage has perhaps been more freq. quoted, or misquoted, than iv. 41, Magna est veritas et prævalet 'Great is truth, and strong above all things' (ὑπερισχύει). (The patristic references are collected in the *Tübingen Theol. Quartalschrift*, 1859, p. 263 sq.) The first writer to throw discredit on the book was Jerome. He refused to translate the 'dreams' of 3 and 4 Esdras. His words are (*Præf. in Ezram*), 'Tertius annus est quod semper scribitis atque rescribitis, ut Esdræ librum et Esther vobis de Hebræo transferam. . . . Nec quenquam moveat quod unus a nobis liber editus est: *nec apocryphorum tertii et quarti somniis delectetur*; quia et apud Hebræos Ezræ Nehemiæque sermones in unum volumen coarctantur; et quæ non habentur apud illos, nec de viginti quatuor senibus sunt, procul abjicienda.' Consequently, the Old Latin was left untouched by him, and the book is absent from the older MSS of the Vulg. (*e.g.* Cod. Amiatinus).

It was probably owing to the influence of this estimate of Jerome, that the Tridentine Fathers in 1546 excluded 1 Es from the Canon. 1 and 2 Es, with the Prayer of Manasses, are the only books admitted as apocryphal into the Romish Bibles, the rest of our Apocr. being declared canonical by the Council of Trent. In modern editions of the Vulg. they form an Appendix, being placed after the NT, with a prefatory note stating that they are placed 'hoc in loco extra scilicet seriem canonicorum librorum . . . ne prorsus interirent, quippe qui a nonnullis sanctis Patribus citantur, et in aliquibus Bibliis tam manuscriptis quam impressis reperiuntur.' In the Eng. Bible our book stands first in the Apocrypha.

RELATION TO THE CANONICAL EZRA.—On this question, the most interesting which arises in connexion with the book, the most opposite opinions have been held. The various theories resolve themselves into three.

1. It is regarded as a mere compilation from the Gr. of the LXX (2 Ch and Es B). Those books, according to this theory, have been worked over and modified for the sake of Greek readers, to whom the Hebraic style of the LXX version rendered it unintelligible. Such is the view of Keil, Schürer (in Herzog, *Encycl.* i. 496, 'nach der Septuaginta übersetzung bearbeitet,' and *HJP* II. iii. 177 ff. Eng. tr.), and Bissell (in Lange's *OT Comm.*). In favour of this view it is urged (i.) that our book often agrees literally with the LXX in the Gr. used, even in rare and unfamiliar words; (ii.) that the LXX is often followed in its *deviations* from the Heb. text; and (iii.) that in the case of deviations from both Heb. and LXX, the readings of Es A are more easily referred to the latter than to the former. The best instances of (i.) are Es A 8^{83} *ὁ κουφίσας τὰς ἁμαρτίας ἡμῶν* = Es B 9^{13} *ἐκούφισας ἡμῶν τὰς ἀνομίας*, RV 'punished us less than our iniquities deserve'; Es A 9^{51} = Es B 18^{10} *φάγετε λιπάσματα*. For (ii.) may be quoted Es A 1^{10} *καὶ οὕτω τὸ πρωινόν* = 2 Ch 35^{12} *καὶ οὕτως εἰς τὸ πρωί*, against Heb. 'and so they did with the oxen.' The two Heb. words בָּקָר ('oxen') and בֹּקֶר ('morning') are indistinguishable without the vowel points; the agreement need not prove the use of one version by the other. More striking is Es A 1^{11} *μετ' εὐωδίας καὶ ἀπήνεγκαν*, compared with 2 Ch 35^{13} *καὶ εὐωδώθη καὶ ἔδραμον*. This looks like a confusion of *εὐωδέω* and *εὐοδόω*; the Heb. equivalent is 'and in pans.' But here Es renders the Hiphil וַיָּרִיצוּ correctly by *ἀπήνεγκαν*, which *ἔδραμον* fails to do, thus showing independent knowledge of the Hebrew. Compare also Es A 1^{26} *πολεμεῖν αὐτὸν ἐπεχείρει*, and 2 Ch 35^{22} *ἀλλ' ἢ πολεμεῖν αὐτὸν ἐκραταιώθη*, with the Heb. '*disguised himself* that he might fight with him.'

A comparison of the two books, however, renders it impossible to maintain the view any longer, that Es A is compiled *solely* from the Gr. of the other books. There are numerous passages where Es preserves the Heb. more closely than the LXX, or points to a different word in the Heb. original. An examination of all the passages given by Bissell (p. 69) in support of the opposite opinion will show that there is not one where Es does not preserve some touch in the Heb. which is missed in the LXX Ezr, which cannot therefore have been the only authority possessed by our author in those parts which agree with the canonical book. It still remains possible that Es A is a mere recension of the canonical books *by the help of the Heb.*; but the Gr. of the two books is of such a different character as to make it improbable that this is the true view of the relation between them.

2. It is regarded as a working over of an earlier Gr. translation of Ch, Ezr, and Neh, but a translation quite distinct from the LXX. This view is held by Ewald (*Hist. of Isr.* v. 126-128, Eng. tr.). He first gives the alternative that the writer 'was either a translator of the books of Ch, or else found them already translated, and worked up the tr.,' and then decides for the latter view (p. 128 n.). 'He found the work of the chronicler tolerably freely translated from the original. This tr. was different from that of the LXX, and no doubt much older.'

This theory admits an independent tr. of the Heb. as the basis of the book, but denies that the compiler was himself the translator; it presupposes a lost Gr. version of Ch, Ezr, Neh. It gives a satisfactory explanation of the coincidences in tr. and deviation from the Heb. in Es A and Es B, if we suppose that both are to some extent dependent on a lost Gr. original. We should then have in the two books a parallel case to the two Gr. versions of Dn, the LXX very paraphrastic, Theod. fairly literal, both being dependent on an earlier version (Smith, *Dict. Christ. Biog.* art. 'Theodotion').

3. It is held to be a direct and independent tr. from the Heb., and from a text in some instances superior to the Massoretic; Es B was entirely unknown to the writer. This view is held by Michaelis, Trendelenburg (in Eichhorn's *Allgemeine Bibliothek der bibl. litt.* 1787), Pohlmann (in *Tübingen Quartalschrift*, 1859, p. 257), Herzfeld, Fritzsche, and others. It is simpler than the last, but fails to account for the coincidences in the two books. The question whether (2) or (3) is the true view depends also on the date which, on linguistic and other grounds, we are led to assign to the work. It cannot be said to have been yet decided which is right, but (2) appears to satisfy all the requirements of the problem, while (3) does not.

The two translations are of an essentially different character. While the writer of Es B shows a slavish adherence to the Hebrew, often transliterating his original, and making no pretensions to style, Es A is marked by a free style of translation, an elegant and idiomatic Gr., a happy rendering of Hebraisms, and an omission of difficulties, which make it a far more readable book than the other. It was clearly intended for Gr. readers unacquainted with Hebrew. The writer was a litterateur in possession of a wide Gr. vocabulary.

A few instances of his manner may be given. He consistently translates the phrase 'beyond the river' (the Persian name for Palestine, Es B *πέραν τοῦ ποταμοῦ*) by Κοιλὴ Συρία καὶ Φοινίκη (7 times in Es A; only 3 times elsewhere, viz. in the Books of Mac). He writes *ἄγειν τὸ πάσχα* for Ch *ποιεῖν τὸ φάσεχ*. A good instance of idiomatic Gr. style is $5^{69.70}$ (contrast Es B $4^{4.5}$). A list of some words peculiar to Es A in the Gr. OT may not be superfluous. *ἀκολούθως* c. dat. for *κατά* (5 times), *ἀναγνώστης* (of Ezra, *ὁ ἱερεὺς καὶ ἀναγνώστης τοῦ νόμου*=Es B *ὁ ἱερεὺς καὶ ὁ γραμματεύς*, 6 times), *ἀναμφισβητήτως*, *ἀρχιερεύς* (of Ezra), *βιβλιοφυλακίον*, *δημαγωγία*, *ἐγχάσκειν*, *ἐκπαίζειν*, *ἐμφυσιοῦν*, *ἐπακουστός*, *ἐπιδόξως*, *ἱερόδουλος* (6 times=Es B Ναθινείμ), *ἱεροστάτης*, *ἱεροψάλτης* (6 times, Es B *ᾄδοντες*), *κάρρον* 'a car,' *μεριδαρχία* (4 times), *μεταγενέστερος*, *ὀνοματογραφία*, *πραγματικός* (subst.), *συμβραβεύειν*, *συνεξορμᾶσθαι*, *σύννους*, *διὰ ταλάντων λαλεῖν*, *χαμαιπετής*, *χρηματιστήριον*. Other words rarely found elsewhere than in this book (which may for the most part be paralleled from Est, Dn, and Mac) are—*ἀνιεροῦν* 'confiscate,' *ἀξίωμα*, *ἀτενίζειν*, *δογματίζειν*, *εἴργειν*, *ἐνακούειν*, *ἐπανόρθωσις*, *ἐπικωμᾶσθαι* 'attack,' *ἐπισύστασις* (al. *σύστασις*), *εὐίλατος*, *εὐοδία*, *εὐφυής* (Es B *ταχύς*), *θυρωρός* (Es B *πυλωρός*), *καταλοχισμός*, *κωθωνίζεσθαι*, *μανιάκης*, *μεταλλάσσειν τὸν βίον*, *οἰκονόμος*, *ὁλοσχερῶς*, *παστοφόριον*.

The passages which point to a more accurate rendering of the Heb., or a different Heb. original from that trd. by the LXX, are collected by Trendelenburg (see also Bissell, 65–69). The foll. instances, partly unnoticed before, may be given :—

In the account of the death of Josiah, Es A $1^{25\text{-}27}$=2 Ch $35^{21\text{-}23}$. Es 1^{25} *ἐπὶ γὰρ τοῦ Εὐφράτου ὁ πόλεμός μού ἐστιν*; Ch LXX omit; Heb. 'but against the house of my war' (אֶל בֵּית מִלְחַמְתִּי). Es apparently read פְּרָת (Euphrates) for בֵּית. The Heb. as it stands is harsh for 'the house with which I have war'; and Es is a decided improvement.

Es 1^{26} *οὐ προσέχων ῥήμασιν* Ἰερεμίου *προφήτου*; Ch LXX *οὐκ ἤκουσε τῶν λόγων* Νεχαώ=Heb. Es perhaps read נָבִיא for נְכוֹ. Ἰερεμίου is a later insertion; the Vulg. has 'non attendens verbum prophetæ.'

Es 1^{27} *καὶ κατέβησαν οἱ ἄρχοντες πρὸς βασιλέα*; Ch LXX *καὶ ἐτόξευσαν οἱ τοξόται ἐπὶ βασ.*=Heb. Es read וַיֵּרְדוּ 'and they came down') for וַיֹּרוּ 'and they shot').

In Es A 8^{30} *καὶ μετ' αὐτοῦ ἀπὸ γραφῆς ἄνδρες ἑκατὸν πεντήκοντα*, the Heb. is more closely rendered ('and with him were reckoned *by genealogy of the males*') than in LXX (Es B 8^3) *καὶ μετ' αὐτοῦ τὸ σύστρεμμα ἑ. κ. πεντ.*

In 8^{66} *ὁ* Μοσερεί of LXX is rightly given as *Αἰγύπτιοι*. A writer working on the LXX without the Heb. could hardly infer that Μοσερεί stood for הַמִּצְרִי ('the people of Mizraim').

In 8^{68} *ἔρρηξα τὰ ἱμάτια καὶ τὴν ἱερὰν ἐσθῆτα*, the last words of the Heb. וּמְעִילִי ('and my mantle are rightly given; the LXX twice misconstrues them ($9^{3.5}$), *διέρρηξα τὰ ἱμάτιά μου καὶ ἐπαλλόμην*.

In 8^{75} *καὶ νῦν κατὰ πόσον τι ἡμῖν ἐγενήθη ἔλεος παρὰ τοῦ κυρίου*, the Heb. phrase כִּמְעַט־רֶגַע ('for a little moment') is rendered, and the passive construction kept. Es B 9^8 *καὶ νῦν ἐπιεικεύσατο ἡμῖν ὁ θεός*, omits the phrase and changes the construction.

8^{84} *ἀνεκάμψαμεν παραβῆναι*, and Es B 9^{14} *ἐπεστρέψαμεν διασκεδάσαι*, are independent versions of הֲנָשׁוּב לְהָפֵר ('shall we again break?').

8^{90} *ὡς ἐκρίθη σοι καὶ ὅσοι πειθαρχήσουσιν τοῦ νόμου τοῦ κυρίου*, renders the Heb. ('according to the council of my Lord and of those that tremble at the command of our God') where the LXX (Es B 10^3) departs from it, *ὡς ἂν βούλῃ ἀνάστηθι καὶ φοβέρισον αὐτοὺς ἐν ἐντολαῖς θεοῦ ἡμῶν*.

In 9^2 Es A points to a neat and certain correction of the Hebrew. The LXX (10^6) runs, *καὶ ἐπορεύθη εἰς γαζοφυλάκιον* Ἰωανὰν . . . *καὶ ἐπορεύθη ἐκεῖ*, where the second *ἐπορεύθη* is tautological. Es A has *ἐπορεύθη εἰς τὸ παστοφόριον* Ἰωνᾶ . . . *καὶ αὐλισθεὶς ἐκεῖ*. The compiler clearly read וַיָּלֶן שָׁם ('and he passed the night there') for וַיֵּלֶךְ שָׁם ('and he went there'). The letters ן and ך are very liable to confusion; and *αὐλίζεσθαι* is the constant rendering of the verb לוּן ('to dwell') in the LXX.

9^{10} *εἶπον μεγάλῃ τῇ φωνῇ* Οὕτως *ὡς εἴρηκας ποιήσομεν* is a literal rendering of the Heb. (וַיֹּאמְרוּ קוֹל גָּדוֹל 'and they said with a loud voice'); LXX (10^{12}) is again wrong with *καὶ εἶπον* Μέγα *τοῦτο τὸ ῥῆμα σου ἐφ' ἡμᾶς ποιῆσαι*.

These few instances out of many show beyond a doubt that the compiler, or the author of the version he is using, had a knowledge of the Heb. as against the other Gr. version, and that Es A is an important authority for a critical emendation of the Heb. text.

The most recent supporter of the third view, and of the claims of this book to attention, is Sir H. H. Howorth, in a series of six articles in the *Academy* for 1893 on 'The real character and the importance of the first book of Esdras.' His attempt to establish the historical credibility of the book and its chronological accuracy, as against the canonical Ezra, is beset by numerous difficulties, and cannot be maintained. Thus he regards the Darius who despatched Zerubbabel as Darius II. Nothus (424), who was a century later than Darius Hystaspes (522), and is forced to date the return under Ezra, and that under Nehemiah, more than half a century later than the dates ordinarily assigned to those events; he regards Sanabassar or Sheshbazzar as a distinct person from Zerubbabel; he says that the misplaced section Es A $2^{15\text{-}25}$ preserves the original order of the Aramaic chronicle from which it is derived; and he regards the story of the three pages as 'equally valuable and worthy of credit with the rest of the book.' It is lost labour to attempt to reconcile this book with history; the compiler has put together his materials regardless of the inconsequences involved. But Sir H. Howorth's views on the relations between the two Gr. books are far more deserving of notice; he has here been partly anticipated by Pohlmann (*op. cit.* 273–275). He argues that 'Es A represents the true LXX text; Es B represents another tr., which in all probability was that of Theodotion'; and he quotes the parallel of the two versions of Daniel. The existing evidence makes it probable that this view is so far correct, that Es A represents the first attempt to present the story of the Return in a Gr. dress, the story of the three pages being perhaps added by a later compiler. Subsequently a complete and a more accurate rendering of the Heb. was required, and this was supplied by what is now called the LXX version of Ch, Ezr, Neh. Whether this took place so late as the time of Theodotion may be questioned.

In favour of the priority of Es A, these points may be noted :—

1. *The Position of the Book and its earliest Title in the MSS* ("Εσδρας α').—The explanation usually given is that the events described in it precede in part the events in the LXX Ezr. It is equally probable that it was assigned the prior position because it was the earlier of the two Gr. versions.

2. *The Contents.*—These point to a time when Ch, Ezr, and Neh formed one continuous work, and the division into sections had not yet been made. Es A passes without a break from one book to another, and does not contain the reduplication whereby the last two verses of Ch are repeated as the first two of Ezra.

3. *The Use of Es A by Josephus.*—There is no certain evidence of his acquaintance with the other Gr. book, or of its existence before his time. This looks as if he were using the only Gr. materials available to him; that is, that in the LXX as known to him this part of the Bible was represented by Es A.

4. During the first five centuries the Christian Fathers quote the book with respect as canonical. It was included in Origen's Hexapla.

5. As shown above, it has in many places preserved a better Heb. text than the LXX Ezra.

THE ORIGINAL SECTION (3^1–5^6).—The source of the story of the three pages at the court of Darius is unknown. In what language it was originally written is also doubtful; but Ewald is prob. right in holding that while the main body of the book is a tr. from Heb., 'on the other hand the work from which he took the story about Zerubbabel was originally composed in Gr.' At any rate there are no clear traces of Hebraisms (Fritzsche adduces 4^{39} *τὰ δίκαια ποιεῖ ἀπὸ πάντων τῶν ἀδίκων*=עָשָׂה מִשְׁפָּט מִן), and the paronomasia *ἄνεσιν καὶ ἄφεσιν* in 4^{62} points to a Gr. original. The compiler seems to have been acquainted with traditions of Persian history. The account of Darius and Apame the daughter of Bartacus (4^{29}, Jos. gives his name as Ῥαβεζάκης, so the Latin versions Bezaces) is perhaps derived from some book of Persian court stories.* The presence of Zerubbabel at the court of *Darius* is, of course, an anachronism: it was Cyrus who despatched him to Jerusalem. It is noticeable that in 5^5, acc. to the most natural construction, it is Joachim the son of Zerubbabel who spake wise words before Darius. In 4^{58} the speaker is merely called *ὁ νεανίσκος* (a name hardly suitable to Z.), and at his first introduction in 4^{13} the third speaker is identified in a parenthesis only *ὁ τρίτος . . . οὗτός ἐστιν Ζοροβαβέλ*, which is certainly a later addition. This has led to the conjecture that Joachim was the hero of the story, and that there were two expeditions—one in the time of Cyrus led by Zerubbabel, one under Darius led by Joachim (Fritzsche and Reuss). But no Joachim is mentioned among the sons of Z. in 1 Ch 3^{19}. These inconsistencies certainly show the composite nature of the book. It would appear that an earlier Pers. story was adopted by the Jews of Alexandria and became attached to Zerubbabel; the speakers in the original story were Persian courtiers (3^4 *οἱ σωματοφύλακες*). The second of the theses maintained by the third speaker—the superiority of the truth—may also be a Jewish addition to the original, though the eulogy of truth would not be out of place in a Persian story, since the Persians were taught from boyhood 'to ride, to use the bow, and to speak the truth' (Hdt. i. 136).

The story is told in what perhaps was thought a more plausible way in Josephus (*Ant.* XI. iii. 2). There Darius, unable to sleep, proposes a reward to that one of his three pages who shall best prove his thesis: to the first he gives the thesis, that 'wine is the strongest'; to the second, 'the king is the strongest'; to the third, 'whether women are the strongest or truth is stronger than they'? The speeches are held on the following day. In Es the king makes no promise of rewards: the three pages suggest the idea to each other, and while he sleeps they each write the subject which he means to maintain, and put it under the king's pillow for him to find in the morning. The speeches before the Pers. monarch are not unlike the answers of the 72 translators at the court of Ptolemy Philadelphus, as described in the letter of Aristeas. The applause which greets the third speech (4^{41}), and the feasting for seven days 'with music and gladness' (4^{63}), may be illustrated from that work. But there is hardly sufficient ground for saying, with Ewald, that 'the book of Aristeas must have been already known to the author.' The story in Es is a composition of the same class, and probably of the same time as the Aristeas letter.

It should be noted that in the third speech there is an allusion to Gn 2^{24} (Es 4^{20} *ἄνθρωπος τὸν ἑαυτοῦ πατέρα ἐνκαταλείπει . . . καὶ πρὸς τὴν ἰδίαν γυναῖκα κολλᾶται*).

OBJECT OF THE BOOK.—The body of the book appears, as has been shown, to be the earliest version of the work of the Chronicler. It was written to render Gr.-speaking Jews acquainted with the favour which through the Divine Providence was once shown to their nation by foreign monarchs. The original section (3–4) is perhaps the nucleus of the whole, round which the rest is grouped. One object of the compiler was to give currency to this story, from whatever source, Persian or Jewish, he had derived it. He may also have had an ulterior object in view. The exaggerated accounts of the munificence of Cyrus and Darius lead us to suppose that he aimed at securing to the Jews 'the favour of a Ptolemaic or other heathen power' (Ewald).

TIME AND PLACE OF COMPOSITION.—The extreme limits between which the book must be placed are given on the one hand by the date of the composition of the Heb. books of Ezr and Neh, which is fixed as late as B.C. 300 (Ryle, *Cam. Bible*, Introd. xxvi), on the other by the date of Josephus, A.D. 100. Within these rather wide limits it is difficult to define the time more accurately with any certainty. As Fritzsche remarks, the writer has kept his own personality in the background and nowhere left any traces of his own time (*Einleitung*, p. 9). Still there remain a few indications to be mentioned. The similarity to Aristeas, as we have seen, shows nothing more than that the Zerubbabel story is of the same character and probably the same time as that book (*circa* B.C. 150).

1. But Ewald notes further (*Abhand. über d. Sibyll. Büch.* p. 36) that this story was known and referred to by the writer of the oldest of the Sibylline books. Now, this book (iii. of the Sibylline Oracles) is definitely fixed to the reign of Ptolemy Philometor (B.C. 181–146). In it is an allusion to Persian kings helping forward the rebuilding of the temple in consequence of a dream: iii. 293–4, *Αὐτὸς γὰρ δώσει Θεὸς ἔννυχον ἅγνον ὄνειρον, καὶ τότε δὴ ναὸς πάλιν ἔσσεται, ὡς πάρος ἦν περ.* This, in Ewald's opinion, is suggested by Es 3–4. But in Es $4^{43.45}$ there is no mention of a dream, but only a vow, which influenced Darius. Still, as the dream is not alluded to elsewhere, it is not improbable that the Sibyllist had some older form of this story before him, from which our Esdras also borrowed.

2. The book has, further, some parallels with the LXX version of Dn and Est. The opening of Es 3 seems to be imitated from the opening of Est 1^{1-3}: the phrases *ἐποίησεν δοχήν, ἀπὸ τῆς Ἰνδικῆς μέχρι Αἰθιοπίας*, and 'the hundred and seventy satrapies,' are common to both. Cf. also Es 3^9 *οἱ τρεῖς μεγιστᾶνες τῆς Περσίδος* with Est 1^{14} LXX, Dn 6^2. (The Heb. of Est as also Ezr 7^4 name seven Persian councillors.)

The agreements between Es and Dn LXX are remarkable. Of these the most striking is a clause which they have in common in the account of the treasures which Nebuchadnezzar recovered from Jerus. (Es 2^9=Dn 1^2 LXX, *καὶ ἀπηρείσατο αὐτὰ ἐν τῷ εἰδωλίῳ αὐτοῦ*). In this place, since *ἀπερείδεσθαι* is an Esdras word, occurring three times in this connexion in Es and nowhere else in Dn, and since *εἰδώλιον* renders the Heb. of Ezr (בֵּית אֱלָהֵיו) but not of Dn (בֵּית אוֹצַר אֱלָהָיו, Theod. *εἰς τὸν οἶκον θησαυροῦ θεοῦ αὐτοῦ*), it would seem that the obligation is on the side of the Dn translator.

But, in view of the other parallels between the books, another explanation is more probable, that *the translations are the work of one and the same hand.* In one place the same Aramaic phrase, 'And his house shall be made a dunghill,' is mistranslated or paraphrased in the same way (Es 6^{31} *καὶ τὰ ὑπάρχοντα αὐτοῦ εἶναι βασιλικά*, Dn 2^5 *καὶ ἀναληφθήσεται ὑμῶν τὰ ὑπάρχοντα εἰς τὸ βασιλικόν*). It may be noted that both books are written in an idiomatic Gr. style foreign to most books of the LXX; both are very free translations; both have interpolations of a similar character (the three pages in Es, the three children in Dn); the original Heb. of both books has Aramaic sections interspersed in it. If this theory be true, the parallel between the two Gr. books of Es and the two versions of Dn is very close.*

---

* The name Apame is Oriental, though not found till the Macedonian period. No such person occurs among the wives of Darius I. The first of the name was the wife of Seleucus Nikator, Alexander's general, and daughter of Artabazus (Strabo). Does this last name give the explanation of the name Bartacus or Ῥαβεζάκης?

* The theory has already been suggested by Dr. Gwynn (*Dict. Christ. Biog.*, *s.v.* Theodotion, p. 977); cf. Dn 2^{11} *ἐπίδοξος* (Es 9^{45} *ἐπιδόξως*); *δογματίζειν* (Dn 2^{13}, Es 3^9); Dn 3^1, Es 3^2 *οἱ προσγεγραμμένοι* (Dn 3^3, Es 6^{31} [A] only); use of *ἅμα* c. inf. *ἅμα τῷ*

3. Graetz (*Gesch. der Juden*, 1863, p. 445) points to the use of ὕπατοι in 3^{14}, and says that the Roman consulate is known to the writer. This would indicate a time later than the first interference of the Romans in the East, *i.e.* later than B.C. 200.

4. On the other hand, the term Κοιλὴ Συρία which so frequently occurs is used in the sense which it bore during the Gr. period, meaning all S. Syria except Phœnicia. Before the coming of the Romans to Palestine (*c.* B.C. 63, the date of Pompey's taking of Jerus.) this name had acquired a new significance, being restricted to the country E. of the Jordan (G. A. Smith, *Hist. Geog.* p. 538). The way in which this phrase is used appears, therefore, to afford certain proof that the book is at least as old as the first half of the last century before the Christian era.

Whether it goes back to the 2nd cent. B.C. is more uncertain.

5. That such is the case is the opinion of Herzfeld (*Ges. d. Volk. Isr.* 1863, vol. ii. p. 73), who dates it before the Maccabæan wars, on the ground that after that date, when the books of Ezr and Neh had become canonical (Ryle, *Cam. Bible, Ezr. and Neh.* lxv), a translator would not have been bold enough to excerpt and rearrange materials from those books.

6. This view is also supported by Lupton, who has an ingenious theory as to the occasion when the book was written. He regards it as edited at the time (B.C. 170) when Onias, having fled from the persecution in Pal. under Antiochus Epiphanes, petitioned for leave from Ptolemy Philometor to build a temple for the Alexandrian Jews at Heliopolis on the site of a ruined Egyp. temple of Bubastis. At that time 'a work which described the rebuilding of the temple, and the beneficence of foreign kings to the work, and which also introduced the story of Josiah, slain in an invasion of Syria by the Egyptians, would have a special interest.' The account of the building of the Egyp. temple (ὅμοιον τῷ ἐν Ἱεροσολύμοις, μικρότερον δὲ καὶ πενιχρότερον) is given in Jos. *Ant.* XIII. iii. 1; the reader is referred to the interesting remarks of Lupton (*Speaker's Comm.*, Apoc. vol. i. 11–14). This is, of course, no more than conjectural, and it is unsafe to base any argument upon it; if the theory about the relation to the LXX Dn be correct, the date given is rather too early. The limits within which the book may be placed may be taken to be B.C. 170–100. Most editors, however, assign it to the 1st cent. B.C. (De Wette, Ewald, Fritzsche).

As to the *place* where the compiler lived, the character of the translation seems to show that it was written for Alexandrian Jews rather than for natives of Palestine, for whom the original Hebrew of the Chronicler would suffice. One slight allusion in 4^{23} to 'sailing upon the sea and upon the rivers' for the purpose of 'robbing and stealing' is thought to point to Egypt. Certain small peculiarities of the language also indicate Alexandria as the place of writing: οἱ φίλοι τοῦ βασιλέως (8^{26}) takes the place of Es B οἱ σύμβουλοι (οἱ πρῶτοι φίλοι were the third in the scale of courtiers at the Alexandrian court): in 2^{18} ἂν φαίνηταί σοι is inserted. The phrase ἐὰν φαίνηται ('if it seem good') occurs in Aristeas (in Merx' *Archiv*, i. 1870, p. 19), and repeatedly in Egyptian papyri.

Fritzsche, on the other hand, concludes that the writer was a Palestinian from his knowledge of sites in Jerusalem, referring to 5^{46} εἰς τὸ εὐρύχωρον τοῦ πρώτου πυλῶνος τοῦ πρὸς τῇ ἀνατολῇ (=Es B εἰς Ἱερουσαλήμ). Cf. also 9^{38} ἐπὶ τὸ εὐρύχωρον τοῦ πρὸς ἀνατολὰς ἱεροῦ πυλῶνος (=Neh 8^1 εἰς τὸ πλάτος τὸ ἔμπροσθεν πύλης τοῦ ὕδατος).

MSS AND TEXT.—Es A exists in two out of the three oldest MSS of the LXX, viz. Cod. Vaticanus (B) and Cod. Alexandrinus (A). It is not found in either of the portions of the Sinaitic MS (א) discovered by Tischendorf (Cod. Friderico-Augustanus and Cod. Sinaiticus Petropolitanus); but this is perhaps due only to the fact that that MS is incomplete, and, except for some few fragments of the Pent. and a portion of 1 Ch, contains in its present form no part of the OT earlier than Es B 9, after which it is fairly complete. There has been a curious error in connexion with the Esdras books; 13 chapters of 1 Ch having been apparently inserted in the middle of Es B. Cod. Sin.-Pet. contains one leaf with 1 Ch 9^{27}–11^{22}; Cod. F.-A. has four more leaves headed Es B, but in reality containing 1 Ch 11^{22}–19^{17}; but in the fourth column of the verso of the fourth leaf we suddenly pass in the middle of a line with no break from Ch (καὶ ἐπολέμησεν αὐτόν) to Es B 9^9 (κ̅ς̅ ὁ θ̅ς̅ ἡμῶν καὶ ἔκλινεν ἐφ' ἡμᾶς ἔλεος). A note at the bottom of that leaf in a later hand calls attention to the *seven* superfluous leaves that are 'not of Esdras' (τὸ τέλος τῶν ἑπτὰ φύλλων τῶ περισσῶν ϗ μὴ ὄντων τοῦ ἔσδρα). Of these seven leaves we now possess five; and reckoning back we find that the divergence must have begun about 1 Ch 6^{50} (list of the sons of Aaron). This error, whereby fragments of 1 Ch have been interpolated into the middle of Es B, is probably due to 'a mistake in binding in the copy from which the MS was transcribed' (Westcott, *Bible in the Church*, p. 307, Append. B); a less probable explanation is given by Lupton (Introd. p. 1). The presence of the title Es B is not sufficient by itself to prove, as Lupton supposes, that Es A ever stood in Cod. א; since the same MS contains only the first and fourth books of Maccabees with the headings μακκ. α', μακκ. δ', and the two intervening books certainly never found a place in the MS.

An interesting problem is presented by the relation of the texts of Codd. A and B in this book. The text of A is always the smoother and more readable; and wherever the reading of B suggests a suspicion of corruption, A almost invariably gives the requisite correction. Several of these corrections may be attributed to an 'Alexandrian' revision of the text, removing grammatical solecisms and harsh phrases; such are 1^{30} ἐθρήνουν (B ἐθρηνοῦσαν), 1^{33} ἀπεκατέστησεν αὐτὸν . . . τοῦ μὴ βασιλεύειν (B om. τοῦ μὴ), 1^{51} τὰ σκεύη κιβωτοῦ (B τὰς κιβωτούς), 3^9 ὃν κρίνῃ . . . ὅτι ὁ λόγος αὐτοῦ σοφώτερος (B ὃν ἂν κρίνῃ . . . ὅτι οὗ ὁ λ. αὐτοῦ σοφ.), 3^{33} ἔβλεπον ἕτερος πρὸς τὸν ἕτερον (B εἰς τὸν ἕτερον), 8^{12} ἀκολούθως ὡς ἔχει ἐν τῷ νόμῳ (B ἀκολ. ᾧ ἔχει νόμῳ). But in other places it is hard to suppose that A does not preserve the original text. Thus 1^{22} (24) καὶ ἐλύπησαν αὐτὸν ἐν αἰσθήσει ('they grieved him to the heart,' a phrase illustrated by Jth 16^{17}; B καὶ ἃ ἐλύπησαν αὐτὸν ἔστιν), 1^{41} Joachim at his accession ἦν ἐτῶν δέκα ὀκτώ (cf. 2 Ch 36^9, B ἦν ἐτῶν ὀκτώ), 4^{45} τὸν ναὸν ὃν ἐνεπύρισαν οἱ Ἰδουμαῖοι (B Ἰουδαῖοι), 5^{53} κατὰ τὸ πρόσταγμα (B καὶ τὸ πρόστ.), 8^{41} ἐπὶ τὸν λεγόμενον Θερὰν ποταμόν (B om. Θερὰν), 8^{68} καὶ κατέτιλα τοῦ τριχώματος (B κατέτεινον τοῦ τριχ.). Fritzsche (*Einleitung*, 1851, § 8) remarks that B is on the whole a very pure and A an emended text; but it is noticeable that in his subsequent critical edition (*Libri Apocryphi Vet. Test.* 1871) in the passages given above and in numerous others he adopts the reading of A and abandons 'the pure text of B.' Still more noticeable is it that the earliest author to quote Es A supports the A text against the B. It is not always possible to reconstruct the text which Josephus used owing to his habit of paraphrasing the authority which lay before him; but out of 13 passages in this book where a comparison is possible, in 10 he agrees with A against B, while in three only does he side with B against A. Jos. *Ant.* XI. iii. 8 προσετάξε τοὺς Ἰδουμαίους . . . ἀφεῖναι τὰς κώμας (Es 4^{50} καὶ ἵνα οἱ Ἰδουμαῖοι ἀφίωσιν τὰς κώμας, B οἱ Χαλδαῖοι), XI. iv. 1 τοῦ ἑβδόμου μηνός (Es 5^{52} ἑβδόμου, B πρώτου), XI. iv. 6 καὶ εὑρέθη ἐν Ἐκβατάνοις τῇ βάρει τῇ ἐν Μηδίᾳ βιβλίον, ἐν ᾧ κ.τ.λ. (Es 6^{22} κ. εὑρ. ἐν Ἐκβ. τῇ βάρει τῇ ἐν Μηδείᾳ χώρᾳ τόμος εἷς ἐν ᾧ . . . B τόπος ἐν ᾧ. A preserves the indefinite article; cf. Es B 6^2 κεφαλὶς μία; B is a corruption of the Greek of A); XI. v. 1 ἀνενέγκωσι δῶρα τῷ Ἰσραηλιτῶν θεῷ (Es 8^{13} ἀπενεγκεῖν δῶρα τῷ κυρίῳ τοῦ ι̅σ̅λ̅, B τῷ κυρίῳ); *id.* κολασθήσονται δ' ἤτοι θανάτῳ ἢ ζημίᾳ χρηματικῇ (Es 8^{24} κολασθήσονται ἐάν τε καὶ θανάτῳ ἐάν τε καὶ τιμωρίᾳ, ἢ ἀργυρικῇ ζημίᾳ ἢ ἀπαγωγῇ; B μὴ ἀργυρίῳ ζημίᾳ. A is undoubtedly best); XI. v. 2 συναγαγὼν εἰς τὸ πέραν τοῦ Εὐφράτου (did Jos. read ἐπὶ τὸ λεγόμενον πέραν ποταμοῦ in Es 8^{41}? A Θέραν ποταμόν, B ποταμόν); *id.* ταύρους δώδεκα ὑπὲρ κοινῆς τοῦ λαοῦ

ἀκοῦσαι (Dn 3^{15}, Es 8^{68}); καρπόω='to burn' (Dn 3^{38}, Es 4^{52}); ἀχρειοῦν (Dn 4^{11} 6^{20}, Es 1^{53}); μανιάκης (Dn 5^7, Es 3^6 only); Dn 6^1, Es 3^1; use of ὑποτίπτειν (Sus 51^a, Es 8^{17}). The parallels are chiefly in the first six chapters of Dn.

σωτηρίας, κρίους ἐνενήκοντα, κ.τ.λ. with A in Es 8^{63} (B omits a line through confusion, perhaps, of ΚΥΡΙΩ and ΚΡΙΟΥΣ); XI. v. 3 *διέρρηξε τὴν ἐσθῆτα* (Es 8^{68} *διέρρηξα*, B *ἔρρηξα*); XI. v. 4 *Ἰωάννου τοῦ Ἐλιασίβου* (Es 9^{1} *Ἰωανὰν τοῦ Ἐλιασίβου*, B *Ἰωνᾶ τοῦ Νασείβου*).

These instances form a strong argument for the early existence if not the originality of the A text. The chief passage where Jos. appears to favour B is Es 5^{53} (B *καὶ χάρα τοῖς Σειδωνίοις καὶ Τυρίοις εἰς τὸ παράγειν*; A *κάρρα*=' cars'; Jos. XI. iv. 1 *τοῖς τε Σιδωνίοις ἡδὺ καὶ κοῦφον ἦν . . . κατάγουσιν*).

On the MSS generally see Fritzsche, *Einleitung*, § 8.

Of VSS, Sabatier prints two Lat. versions, one of which he calls the Vulg., and a 'versio altera' ('ex MS Colbertino annorum circiter 800'). In reality they appear to be two distinct VSS of the O.L. Jerome left the O.L. untouched, and the Lat. now given in the Appendix to the Vulg. is not his work. A third Lat. version of Es A 3-4 (abbreviated) and of a few verses elsewhere in the book is given in Lagarde (*Septuaginta Studien*, ii. 1892) from a MS in the cathedral of Lucca written about 570. The book did not exist in the Peshiṭta Syriac, but is found in the Syro-Hexaplar of Paul of Tella (A.D. 616); the Syriac is given in Walton's Polyglot, 1657. There is a free rendering of the book in the Armenian version.

LITERATURE.—Fritzsche, *Exeget. Handb. z. d. Apokr.* i. (Leipzig, 1851), Introd. and Comm.; Fritzsche, *Libri Apocr. Vet. Test. græce* (Leipzig, 1871), a crit. ed. of the text; Zöckler, *Die Apokryphen*, 155-161 (in Strack und Zöckler's *Kgf. Komm.* 1889); Schürer, *HJP*, Eng. tr. II. iii. 177-181; Ewald, *Hist. of Isr.*, Eng. tr. v. 126-128. Special treatises on the relation between Es A and Es B; Trendelenburg (in Eichhorn's *Allgemeine Bibliothek der Bibl. Litt.* i. 178-232, Leipzig, 1787); Pohlmann, 'Ueber das Ansehen des apokr. dritten Buchs Esras, in *Tübingen Theol. Quartalschrift*, 1859, 257-275). In English the best edd. are Bissell (in Lange's *Comm. on OT*, 1880) and Lupton in *The Speaker's Comm.*, Apocrypha, vol. i. 1888. A series of papers on 'The Character and Importance of 1 Esdras,' by Sir H. H. Howorth in the *Academy*, 1893, vol. 43 (pp. 13, 60, 106, 174, 326, 524). Jos. *Ant.* xi. 1-5 (Niese). For further references see Schürer. H. ST. J. THACKERAY.

ESDRAS, SECOND BOOK OF.—TITLE.—The title which this book bears in the English Apocrypha is derived from the opening words of ch. i., 'the second book of the prophet Esdras'; but it is more commonly known by the name which is given it in most Latin MSS, 'The *fourth* book of Esdras.' The variation in the titles of the books of Esdras is due to two causes—(1) The adoption of the Latin name Esdras in the Vulg. for the canonical Ezr and Neh; (2) the composite nature of this book, the first two and the last two chapters being later additions to the orig. work, and reckoned by the MSS as separate books. The most frequent arrangement in the MSS is 1 Es=Ezr-Neh; 2 Es= 2 Es 1. 2; 3 Es=1 Es; 4 Es=2 Es 3-14; 5 Es=2 Es 15. 16. The central portion of the book bears every number from one to four. The original Greek had probably no number attached to it. Two suggestions have been made for the original title—(1) *Ἔζρας ὁ προφήτης*, adopted by Hilgenfeld in his restoration of the Greek, and based on a quotation of Clem. Alex. from *Ἔσδρας ὁ προφήτης*, and of Ambrose from 'propheta Ezra' (*Mess. Jud.* 18). The title would then be parallel to *ὁ ἱερεύς* attached to 1 Es in Cod. A. (2) *Ἀποκάλυψις Ἔσδρα*, suggested by Dr. Westcott, and found in a catalogue of the 60 books, canonical and apocryphal, made in Asia (Westcott, *Canon*^{6}, 559). The title is far the most suitable to the contents of the book, but has already become appropriated to a later and inferior Greek Apocalypse published by Tischendorf (*Apocal. Apocryphæ*, 1866).

ORIGINAL LANGUAGE AND VERSIONS.—The original language of 2 Es was undoubtedly Greek; two quotations from the Greek exist, Clem. Alex. *Strom.* iii. 16. 100 (= 2 Es 5^{35}), and *Apost. Constitut.* viii. 7 (=2 Es 8^{23}). Otherwise we possess the book only in versions. The Latin version abounds in Grecisms, such as the use of the comparative with the genit. ('horum maiora,' 'omnium maior,' etc.), the genit. abs. (10^{9}), the prepositions *ad* and *pro* with the inf. (7^{135} 13^{23}), *de* and *ex* followed by the genit., the double negative ('nihil nemini,' 'nunquam nemo'), redundant prepositions after verbs ('timere a,' 15^{3}; 'multiplicare super,' 9^{16}). The theory of a Heb. original, of which the Greek was a tr^{n}, has now been given up; one Hebraism, which, however, had become naturalized in Greek, is of constant occurrence, namely, the use of the participle with a finite tense of the same verb (*e.g.* excedens excessit, 4^{2}; proficiscens profectus sum, 4^{13}).

The popularity which this book has enjoyed is shown by the number of versions that have been made of it. For many years the text of *the Latin* depended on a few MSS, Codex Sangermanensis (S, A.D. 822), Cod. Turicensis (T, 13th cent.), Cod. Dresdensis (D, 15th cent.), which presented a text from which it was clear that a considerable section was missing between vv. 35 and 36 of the 7th chapter. The other versions contained 70 additional verses in this place. In 1865 Prof. Gildemeister discovered that this 'missing fragment' had once been contained in Cod. S, from which a leaf had been purposely cut out in early times; and drew the certain and important conclusion that all MSS of 4 Es which do not contain the passages were ultimately derived from Cod. S. The discovery of this missing fragment was made by R. L. Bensly, who in 1874 found a MS of the 9th cent. in the *Bibliothèque Communale* of Amiens containing the entire Latin text; he thus had the unique distinction of adding a chapter to the Apocrypha, for hitherto the verses in the Oriental VSS had not been universally considered genuine. An account of the MS and its discovery, with a full commentary on the new passage, was published by him in the following year (*The Missing Fragment of the Fourth Book of Ezra*, Camb. 1875). It subsequently appeared that he had been anticipated in the discovery, for a transcript of the lost passage, made in 1826 from a Spanish MS, was found among the papers of Prof. Palmer: this was not published till 1877 (*Journ. of Philology*, vol. vii. 264). The excision of 736-105 was probably made for dogmatic reasons. The verses contain a description of the intermediate state of souls, and an emphatic denial of the efficacy of intercessions for the dead (v.^{105}), a passage which called forth a severe reproof from Jerome ('Tu . . . proponis mihi librum apocryphum, qui sub nomine Esdræ a te et similibus tuis legitur: ubi scriptum est, quod post mortem nullus pro aliis audeat deprecari: quem ego librum nunquam legi,' *Cont. Vigilant.* c. 7), and this estimate not improbably accounts for the disappearance of the section from Cod. S. The number of known MSS which give a complete text of 2 Es has now been increased, through the discoveries of M. Berger, to five. A complete text of the book, based on four of these MSS and Cod. S, has at length been edited from Bensly's papers, with an introd. by Dr. James (*Texts and Studies*, iii. 2, Camb. 1895); while the missing fragment has been restored to its place in the English Bible in the Revision of the Apocrypha. The Latin MSS fall into two groups: (1) those which preserve a French text. S (Sangermanensis) once in the Abbey of S. Germain des Prés, now in the Bibl. Nat. Paris, 11504-5, Fonds Latin, dated A.D. 822, the oldest extant MS, and the parent of numerous later MSS, and A (Ambianensis), Amiens, *Bibl. Comm.* 10, cent. ix., containing a text very similar to but independent of S, and agreeing with the quotations of Gildas the Briton in his Epistle (6th cent.); (2) a Spanish text, perhaps traceable to Priscillian (*Texts and Studies*, xxxvi.), represented by three MSS. C (Complutensis), now at Madrid, cent. ix., from which Prof. Palmer copied the missing fragment in 1826. M (Mazarinæus), Paris, *Bibl. Mazarine*, 3, 4, cent. ix.–x., discovered by M. Berger. V (Abulensis), Madrid, *Bibl. Nac. E. R.* 8, cent. xiii., a copy of C, discovered by M. Berger, and a fourth, not yet fully collated, but probably belonging to this group. L (Legionensis), at Leon, of the year 1162. For one section of the book, the Confessio Esdræ (8^{20-36}), which was often copied in collections of Cantica, an additional group of MSS exists. The two groups differ most widely from each other in the interpolated chapters (1. 2, 15. 16). An examination of their relative values in these chs. has been made by Dr. James (*T. and S.* xliv.–lxxviii.), from which he concludes that in 1. 2. the Spanish form of text is more accurate than the French, which has corrected the text to agree with the canonical Scriptures, whereas in 15. 16 the Spanish is on the whole an emended text, and in 15^{59}–16^{32} A, which has the support of Gildas, is to be preferred to S C M.

The *other versions* agree in omitting the interpolated chapters at the beg. and end (1. 2. 15. 16). Of these the best is the *Syriac*, which exists only in a celebrated MS of the Peshiṭta in the Ambrosian Library, Milan, B. 21 Inf. The Syriac was edited by Ceriani in *Monumenta Sacra et Profana*, vol. v. fasc. 1 (1868), and tr^{d} into Latin in vol. i. fasc. 2 of the same work (1866). There are two independent *Arabic* versions: Ar.^{1} in an Oxford MS (Bodl. 251, A.D. 1354), of which an English tr^{n} was made by W. Whiston for his *Primitive Christianity Reviv'd*, 1711, and the Arabic text was edited by Ewald in 1863 (*Abhandl. der Königl. Gesellsch. d. Wissensch. zu Göttingen*); and Ar.^{2} preserved *in toto* in a Vatican MS Arab. 462, and in part in Bodl. 260.

The *Ethiopic* version was first published in 1820 by Dr. Richard Laurence from a Bodleian MS (Æth. 7). Dillmann collected readings from other MSS, which are given at the end of Ewald's ed. of the Arabic. The Syr. Ar. Eth. versions were probably all made directly from the Greek; the *Armenian*, however, given in Zohrab's ed. of the Armenian Bible (1805, Venice) was perhaps from the Syriac. A reconstruction of the Greek has been made by Hilgenfeld in his *Messias Judæorum*.

CONTENTS. — The original Apocalypse (3–14) consists of a series of revelations or visions given to Ezra by an angel.

1st Vision, 3^{1}–5^{20}. Ezra, in captivity at Babylon in the thirtieth year after the destruction of Jerus. [the date is nearly a century too early], recounts God's favours to Isr. in their earlier history, and while admitting their 'evil heart,' yet complains of their subjection to Babylon, which is more wicked than they (ch. 3). The angel Uriel replies that E. should not enquire into things beyond his understanding. E. pleads with the angel as Abraham did at Mamre ('If I have found favour in thy sight,' 4^{44}; cf. Gn 18^{1}), and asks, further, whether the time that is past exceeds the time to come; and is told that it is so. The signs of the end are given, 5^{1-13}; and he is ordered to fast for seven days.

2nd Vision, 5^{21}–6^{34}. E. renews his complaints, and is told why God 'doeth not all at once' so as to hasten the judgment; and of the degeneracy of the world, which cannot produce such children as of old ($5^{42\text{ff.}}$). The next world is to follow this as closely as Jacob followed Esau from the womb (6^{10}). More signs of the end follow, and E. is again bidden to fast for seven days.

3rd Vision, 6^{35}–9^{25}. E. recounts the works of creation, including the creatures Behemoth and Leviathan, who were reserved to be meat for the saints (6^{49-52}) [this idea is met with also in Enoch 60^{7}, Apoc. Bar 29^{4}]; and asks, why, if the world was made for us, we do not possess our inheritance. He is told that the narrow way must be traversed before the large room of the next age be attained (7^{1-16}). Then follows a picture of the Messianic age, the appearance of 'My Son' [or 'My Son Jesus': the name is omitted in the Oriental versions] with His attendants, their reign of 400 years, succeeded by the death of 'My Son Christ' and all living, and the return of the world for seven days into 'the old silence,' and then the resurrection (7^{26-35}). The 'missing fragment' describes the pit of torment and the paradise of delight over-against it: ineffectual intercession of E. for the wicked, leading him to exclaim that the beasts are more fortunate than man: the seven ways of punishment for the wicked, and the 'seven orders' of blessings for the righteous: the seven days' respite after death, before the souls are gathered to their habitations: and the severe declaration of the inefficacy of intercession for the departed (7^{36-105}). E. says it were better if Adam had never been born ('O tu quid fecisti Adam,' cf. Apoc. Bar 48), but acknowledges God's mercy. Ch. 8 contains the same theme, 'Many are created, but few shall be saved,' and fresh intercession in the Confessio Esdræ. In answer to the question, When shall the end be? fresh signs are given.

4th Vision, 9^{26}–10^{60}. E. eats of the herbs in the field of Ardat,* and sees a vision of a woman mourning for her son, who died on his marriage day. The woman, he is told, is Sion lamenting the fall of her city, and her thirty years' sterility represents the 3000 years before Solomon built the city. The city in building, which appears after the woman vanishes, is the heavenly Jerusalem which is to replace the earthly.

5th Vision, 11^{1}–12^{39}. Of the Eagle (Rome) with 12 wings and 8 little wings (*contrariæ pennæ*) and 3 heads, which bear rule in turn, until sentence is pronounced on the eagle by a lion (the Messiah), and it is burnt up. A partial interpretation is given of the vision.

6th Vision, 13^{1-58}. A man (the Messiah) arises from the sea, and graves for himself a mountain (Sion): his enemies collect to fight against him, and are burnt up: and he gathers to him 'a peaceable multitude,' *i.e.* the ten lost tribes, who are to return from Arzareth (*i.e.* 'another land' אֶרֶץ אַחֶרֶת, cf. Dt 29^{28}).

7th Vision, 14^{1-47}. E. is told he is to be taken from men; and to console the people for his departure, he in forty days writes ninety-four books (the twenty-four canonical books of the OT that were lost, and seventy books of mysteries for the wise among the people).

The interpolation at the beginning (1. 2), written in an anti-Jewish spirit, contains a reproof of the Isr. for their desertion of God, and threatens the transference of God's favours from them to the Gentiles. The concluding chs. (15. 16) are not of an apocalyptic character, but a denunciation of woe on the nations of the world (Egypt, Asia, Babylon) in the style of the OT prophets. Both sections have numerous reminiscences of the NT (*e.g.* $1^{30.\,33}$ = Mt $23^{37.\,38}$, 1^{32} = Lk $11^{49.\,50}$, 2^{11} 'tabernacula æterna' = Lk 16^{9}, 2^{13} = Mt 7^{7} and 25^{34}, $2^{38.\,42}$ = Rev $7^{4.\,9}$, $16^{42\text{ff.}}$ = 1 Co $7^{29\text{ff.}}$).

CHARACTER AND DATE. — The book is written in a tone of deep despondency, and offers a marked contrast in this respect to the Book of Enoch. The prospect of ultimate triumph and blessedness is almost lost in dismal forebodings about the immediate future and the destiny of the world. The time and place in which the scene is laid demanded that this should be so; but the meaning of this despairing tone is greatly enhanced if we suppose that recent events are referred to, that Jerusalem was in ruins at the time when it was written, and that the whole work portrays the hopeless outlook of the Jew after the terrible events of the year A.D. 70. Hence the gloomy picture of the few that shall be saved (8^{3}), the dying of the Messiah and all that draw breath (7^{29}), the discussion of the problem of the origin of evil ('quare cor malignum,' 4^{4}), the oft-repeated cry that it were better not to be born, or to be without consciousness of our doom like the beasts (7^{62-64} 4^{12} 5^{35} 6^{59}), the consolation to be found in the permanence of the law (9^{37}) though the city is gone.

The date of the book has been the subject of much controversy. It is obviously not a genuine work of the time of Ezra, as is shown, *e.g.*, by the error in Ezra's date (3^{1}) and the allusion to the Book of Daniel ($12^{11.\,12}$). An ultimate limit is given by the quotation of Clem. Alex. from it referred to above (A.D. 200). Internal notices must fix it more nearly. Hilgenfeld adduces for the earlier date (B.C. 30) 6^{9} 'Finis huius sæculi Esau,' which he thinks proves the time of writing to be the reign of the Idumæan Herod. But Edom is found in Rabbinical literature equally as a designation of Rome; and the Herodian dynasty, if that is referred to, lasted on through the first century of our era. He also draws an argument from the description of the twelve ages of the world, of which ten and a half are past (14^{11}), taken in connexion with 10^{46} (Solomon built the temple in the year of the world 3000), from which he calculates about B.C. 30 as the date (*Mess. Jud.* 104); but the description of the world-ages is too uncertain (the Syr. omits the verses) to base any inference upon it. Another argument for the early date is that a Jew, writing after the death of Christ, would not have introduced a prophecy of the death of the Messiah (7^{25}) which would have been employed against him by Christians. No inference can be drawn from the signs of the end ($5^{1ff.}$ $6^{18ff.}$ 9^{1}) as applicable rather to the portents that preceded the battle of Actium than to those in the time of Vespasian. On the other hand, the allusion to the pulling down of the walls of Jerus. (11^{42} 'humiliasti muros eorum qui te non nocuerunt') was true of Titus, but not of the capture of the city by Pompey in B.C. 63.

---

* This name (in the Arm. Ardab) is explained by Rendel Harris as a corruption of (Kiriath) Arba, the old name of Hebron, which is the scene of the visions of Baruch in the sister Apocalypse (Rest of the Words of Baruch, 35). The oak (14^{1}) is the terebinth of Mamre. Hilg. takes it to mean Arpad (Ἀρφάτ, 2 K 18^{34}).

But the question of the date really depends upon the interpretation given to the Eagle Vision. The details given about the reign of the several wings show that historic facts are here alluded to; the interpretation which follows the vision is perhaps purposely obscure, and does not help much as to the solution of it. The vision describes the reign of 12 'feathered wings,' 8 subordinate wings, and 3 heads—in all, of 23 kings; the attempt to take the wings in pairs, each pair representing a single king, their number being so reduced to 10 (Volkmar), is opposed to the interpretation given to Esdras (12^{14} 'regnabunt xii reges, unus post unum,' 12^{20} 'exsurgent octo reges'). The following points are to be borne in mind in the interpretation (Schürer, *HJP* III. ii. 100). (1) The author writes during the reign of the third head, in which the Messiah is to appear; the subsequent reign of the two last subordinate wings is not history, but prophecy. (2) The second wing reigns more than twice as long as any of the rest (11^{17}). (3) Several wings do not get so far as to reign, and represent pretenders only. (4) The wings and heads all belong to one and the same kingdom. (5) The first head dies a natural death (12^{26}); the second is murdered by the third, who also is to die by the sword (11^{35} 12^{28}). Three main explanations are proposed—(i.) The wings represent Rome under the kings and the republic, and the 3 heads are Sulla, Pompey, and Cæsar; the date of the work is shortly after Cæsar's death (Laurence, Van der Vlis, Lücke). This view has no probability. Early Roman history would have no interest to a Jew, and there is great difficulty in adapting the 8 minor wings to the period before Sulla. (ii.) Hilgenfeld's view, that the wings represent the *Greek* empire reckoned from Alexander, either, as he first held, the line of the Ptolemies (*Jüd. Apokalyptik,* 217 ff.), or, according to his later theory, that of the Seleucidæ (*Mess. Jud.* liv ff.): in either case the three heads are Cæsar, Antony, and Octavian, and the book was written directly after Antony's death in B.C. 30, thirty years after the capture of Jerus. by Pompey (cf. 2 Es 3^{1} 'in the thirtieth year'). It is true that in 2 Es 11^{39} the eagle is compared to the fourth beast of Daniel (7^{7}=the Greek empire); but the fourth kingdom was often referred to the Romans. The chief objections to this view are—(1) The heads and the wings must all refer to a single kingdom, not to a combination of Roman and Greek rulers; (2) the rule of the second in the dynasty, whether Ptolemy I. Lagi or Seleucus I. Nikator, was not more than twice the length of any succeeding reign; (3) Cæsar was assassinated, and did not die in his bed, as the first head is said to have done.

(iii.) It is now the generally accredited view, and it has most arguments in its favour, that the book should be dated in the reign of Domitian (A.D. 81–96). So Gfrörer, Dillmann, Volkmar, Ewald, Schürer, and others. The eagle represents Imperial Rome, the line of the emperors beginning with J. Cæsar. The second wing is certainly to be identified with Augustus, who, reckoning from his first consulate, held rule for 56 years (B.C. 43–A.D. 14), *i.e.* more than twice the time of any of his successors. The three heads with equal probability are referred to the Flavian emperors: Vespasian died on his bed in torment (Suet. *Vesp.* 24; 2 Es 12^{26}); Titus was commonly believed to have been murdered by Domitian. The difficulty lies in supplying the twenty rulers to precede Vespasian. The following proposals are made—(1) Gfrörer takes the twelve greater wings to be the first nine emperors, Cæsar to Vitellius, with three usurpers, Vindex, Nymphidius, and Piso Licinianus: the eight lesser wings are petty kings and leaders in Pal. (Herod the Great, Agrippa I., Eleazar, John of Gischala, Simon Bar Giora, John the Idumæan, Agrippa II., and Berenice: the last two attached themselves to Rome in the war). (2) Schürer agrees as to the twelve, but regards six of the lesser wings (the last two being matter of prophecy) as Roman generals who laid claim to the empire in the years of disorder, A.D. 68–70. (3) Wieseler takes the eight subordinate wings to mean the Herodian dynasty, vassals of Rome (Antipater, Herod I. and his three sons, Archelaus, Antipas, Philip, Agrippa I. and II., and Berenice). (4) Ewald, who is followed by Drummond (*Jewish Messiah,* 107), takes the twelve wings to be the twelve emperors up to Domitian: the eight little wings are the eight emperors among these who reigned less than ten years (Domitian included, for whom a short reign was anticipated), and the three heads are the Flavian princes, reckoned a third time under a different aspect. The double and triple repetition of the same names is unsatisfactory; Schürer's view (2) appears on the whole the most free from objection.

The simpler theory, on the other hand, of Gutschmid and Le Hir (*Études Bibliques*, i. 184 ff.), that twenty-three actual emperors are intended, the three heads being Sept. Severus, Caracalla, and Geta, is shown to be wrong by the fact that the book was quoted by Clem. Alex. at an earlier date than these emperors, and can be maintained only by supposing an interpolation, of which there is no sign in the Eagle Vision.

In considering the date, reference should be made to a companion volume to 2 Esdras, which curiously reproduces the language and visions of that book, namely, the Apocalypse of Baruch, first pub. in 1866 by Ceriani from a Syr. MS at Milan (*Mon. sacra et prof.*, tom. i. fasc. ii., and tom. v. fasc. ii.; also in Fritzsche, *Libri Apocr. V.T.* 654). It also is a product of the Jewish literature called forth by the events of A.D. 70, but written before the final destruction of Jerus. in 133, which is not foreseen (Apoc. Bar 32; Jerus. is to be rebuilt, and then again destroyed [A.D. 70] for a time, and then rebuilt for ever). The similarities in tone and language with 2 Es are so striking that Ewald ascribed it to the same author. The general belief now held is that Baruch is the later, and has used Es, because, *e.g.*, Bar corrects the crude notions of Es about original sin (cf. Es 7^{118} 'O tu quid fecisti Adam? si enim tu peccasti non est factum solius tuus casus sed et nostrum,' with Bar 54, 'Non est ergo Adam causa nisi animæ suæ tantum; nos vero unusquisque fuit animæ suæ Adam'): and whereas Ezra complains that Jerus. should at least have been punished by the hands of God (5^{30}), Bar accordingly represents it as destroyed by four angels before the entry of the Chaldæan army (6–8). Some of the parallels are the division of each book into seven scenes, separated in most cases by intervals of seven days of fasting: the division of time into twelve parts (Bar 27 = Es 14^{11}): the legend of Behemoth and Leviathan (Bar 29 = Es 6^{49}): the prayer of Baruch (48, cf. the Confessio Esdræ 8^{20}): the importance of Adam's transgression, prefaced in each by 'O quid fecisti Adam?' (Bar 48 = Es 7^{118}): the vision of a cloud ascending from the sea (Bar 53, cf. Es 13): the permanence of the law though the teachers depart (Bar 77, cf. Es 9^{37}): the interest in the lost tribes, to whom Baruch sends a letter of consolation (78–86, cf. Es 13^{40}), besides frequent minute resemblances of language.

The writing is a characteristically Jewish work in its apocalyptic form, its knowledge of Jewish traditions (Behemoth, etc.), its interest in the ten tribes, and its deep concern in the fate of Jerusalem. There is no ground for supposing that the author was a Jewish Christian: there is a marked contrast between the Christian interpolations (1–2, 15–16, and the insertion of the name Jesus in 7^{28}) and the remainder of the book. The place of writing is given as Rome (Ewald) or Alexandria (Hilgenfeld, lxii, and most edd.), from which the added chapters certainly emanate; this would account for the earliest quotation being found in Clem. Alex. On the other hand, the fall of Jerus. would be more impressive to a Palestinian Jew than to an Alexandrian; and the geography (if Ardat is rightly explained by Rendel Harris) points the same way.

The date of the concluding chs. (15. 16) is placed about A.D. 268 by most critics. 15^{10-12} refers to the troubles of Alexandria under Gallienus (260–268), when two-thirds of the population were destroyed by a plague following upon a famine (Eus. *HE* vii. 21. 22). 15^{28-33} refers to the conquests of the Sassanidæ ('Carmonii insanientes'), esp. Sapor I. (240–273), who overran Syria but was repulsed by Odenathus and Zenobia ('dracones Arabum'), the founders of Palmyra; they, in turn, were defeated by Aurelian. 33 describes the murder of Odenathus at Emesa (266) by his cousin Mæonius. 34 ff. are referred to the invasion of Asia Minor by Goths and Scythians from the N. of the Euxine: Gallienus marched against them, but was recalled by the revolt of Aureolus (38 'portio alia ab occidente'). 46 'Asia consors in specie Babylonis' alludes to the association of Odenathus in the empire, A.D. 264 (Hilgenfeld, *Mess. Jud.* 208).

The chapters were written apparently as an appendix to 3–14, and were never current in a separate form.

Chs. 1. 2 are not fixed so definitely, but are probably earlier than the close. They are a compilation from various sources, and perhaps a fragment of a larger work: they show some relation to an Apocalypse of Zephaniah (*T. and S.* lxxix).

RECEPTION. — The early quotations from the book are collected by Dr. James (*T. and S.* xxvii–xliii). The Ep. of Barnabas 12^{1} (*ὅταν ξύλον κλιθῇ καὶ ἀναστῇ καὶ ὅταν ἐκ ξύλου αἷμα στάξῃ*) is thought to refer to 2 Es 5^{5}, and the Rest of the Words of Baruch (A.D. 136), ch. 9, has similar words; the last scene of that book, where a stone takes the form of Jeremiah and speaks to the people, may be an amplification of 'lapis dabit vocem suam' of 2 Es. But the first express quotation is Clem. Alex. *Strom.* iii. 16. 100, who regards it as the work of 'the prophet' Ezra. It is made use of in an Hippolytæan fragment *περὶ τοῦ παντός*, and quoted in the Greek in the *Apost. Constit.* viii. 7. The supposed references in Tert. (*de præscr. hæret.* 3), Cyprian, and Commodian (3rd cent., *Carm. Apol.* 943, on the lost tribes) are doubtful. But it is quoted very frequently by Ambrose (*de bono Mortis*, 10–12, and elsewhere), who regards it as prophetical: in his time chs. 15. 16 were already current in the Latin version, and probably attached to 3–14. In Spain it was known to Priscillian and Vigilantius; and in Britain to Gildas, who quotes 15. 16 (Bensly, 36–40). The legend of the restoration of the books of Scripture (2 Es 14) is widespread, and may be derived from tradition apart from 2 Es (Iren. iii. 21. 2; Tert. *de cult. fem.* i. 3; Clem. Alex. *Strom.* i. 22. 149). Jerome is alone unfavourable to it (*adv. Vigilantium*, 6, *Præf. in vers. libr. Ezræ*, quoted in last art.). It was perhaps owing to his estimate that the book was excluded from the Canon by the Council of Trent: it now with 1 Es forms an appendix to the Vulg. after the NT. The liturgical use of the book shows its popularity: the words of $2^{34.35}$ are employed in the 'Missa pro defunctis' of the Breviary ad Usum Sarum, and the word Requiem is derived from this passage; and $2^{36.37}$ were formerly used by the Eng. Church as an Introit for Whit Tuesday. Otherwise no use is made of it in the services of the Church.

LITERATURE.—A full list of the wide lit. on the subject is given in Schürer, *HJP* II. iii. 93–114. The best critical edd. of the Lat. text are in the Camb. *Texts and Studies*, vol. iii. 2, ed. Bensly and James, 1895; and Bensly, *The Missing Fragment of the Fourth Book of Ezra*, 1875. The versions are collected in Hilgenfeld's *Messias Judæorum* (Lips. 1869). Eng. commentaries and introductions are Lupton in the *Speaker's Comm. on the Apoc.*; Bissell (in Lange's *OT Comm.*); Churton's *Uncan. and Apocr. Scriptures*; and Drummond's *Jewish Messiah*, 1877. H. ST. J. THACKERAY.

ESDRIS (Ἔσδρις).—Mentioned only 2 Mac 12^{36}. The text is probably corrupt. AV has *Gorgias*, and this is likely enough to be correct.

ESEK (עֵשֶׂק), 'contention,' Gn 26^{20}.—A well dug by Isaac, in the region near Rehoboth and Gerar. The site is unknown.

ESEREBIAS (Ἐσερεβίας, AV **Esebrias**), 1 Es 8^{54}. See SHEREBIAH.

ESHAN (אֶשְׁעָן), Jos 15^{52}.—A town of Judah in the Hebron mountains, noticed with Arab and Dumah. The site is doubtful.

ESHBAAL.—See ISHBOSHETH.

ESHBAN (אֶשְׁבָּן).—An Edomite chief (Gn 36^{26}, 1 Ch 1^{41}). See GENEALOGY.

ESHCOL (אֶשְׁכֹּל). — The brother of Mamre and Aner, the Amorite confederates of Abraham, who assisted the patriarch in his pursuit and defeat of Chedorlaomer's forces (Gn $14^{13.24}$). He lived in the neighbourhood of Hebron (Gn 13^{18}); and possibly gave his name to the valley of Eshcol, that lay a little to the N. of Hebron (Nu 13^{23}).

It is noteworthy that Josephus, in recording the event described in Gn 14^{13-24}, mentions Eshcol first. 'The first of them was called Eshcol, the second Enner, and the third Mambres' (*Ant.* I. x. 2). In the Heb. of Gn 14^{24} they are mentioned in the order Aner, Eshcol, and Mamre. But in the LXX the order is Ἐσχώλ, Αὐνάν, Μαμβρή; and this order is found also in Philo (*De Migrat. Abrah.* § 30, i. 461). H. E. RYLE.

ESHCOL (אֶשְׁכּוֹל), Nu $13^{23.24}$ 32^{9}, Dt 1^{24}.—A wady, with vineyards and pomegranates, apparently near Hebron. E. is usually rendered 'bunch of grapes.' The name has not been recovered, since the *'Ain*

Keshkaleh at Hebron has no connexion with the Hebrew.

LITERATURE.—Robinson, *BRP* i. 114; Tristram, *Land of Israel*, 388, 393; Conder, *Tent-Work*, 237; *Bible Places*, 89; Besant, *Thirty Years' Work in the Holy Land*, 70, 84.

C. R. CONDER.

ESHEK (עֵשֶׁק).—A descendant of Saul (1 Ch 8^{39}). See GENEALOGY.

ESHTAOL (אֶשְׁתָּאוֹל Jos 15^{33} 19^{41}, Jg 13^{25} 16^{31} $18^{2.8.11}$).—A town in the Shephelah, first assigned to Judah, afterwards to Dan, always named with Zorah, now *Sura'a*, which is beside 'Ain Shems, where the Wady es-Surar is joined by valleys from the N. and S. and a great basin formed, fertile and well-watered, just beneath the hill country of Judæa. *Eshua'*, close to Sura'a, represents Eshtaol. Guérin says he heard in the neighbourhood that it formerly was called Eshu'al or Eshthu'al, which, if confirmed, might be held decisive; but the degeneration of Eshtaol into Eshua is not impossible. Between Zorah and E. was the 'camp of Dan'; and there (Jg 13^{25}) Samson's achievements began, and there he was buried (16^{31}). (See Smith's *Hist. Geog.* p. 218.) **The Eshtaolites** (*lit.* 'Eshtaolite') were, according to 1 Ch 2^{53}, descended from the families of Kiriath-jearim, etc., who are there described as Calebites. The narratives of Jos 15^{33} and 19^{41} suggest how mingling of the tribes of Judah and of Dan might arise, perhaps leading to the Danite migration from Zorah and Eshtaol.

LITERATURE.—*PEFSt*, 1874, 17; Conder, *Palestine*, 49; Smith, *HGHL*, 218; Guérin, *Judée*, ii. 12 ff.; *SWP Memoirs*, iii. 25.

A. HENDERSON.

ESHTEMOA (אֶשְׁתְּמוֹעַ), named in Jos 15^{50} (where it is called Eshtemoh, אֶשְׁתְּמֹה) among towns of Judah. It was made afterwards a Levitical city (21^{14}, 1 Ch 6^{57}). During David's wanderings in S. Judah its inhabitants were on his side (1 S 30^{28}). It is said in 1 Ch 4^{17} to have been inhabited by the descendants of Ishbah; and Eshtemoa, its founder, is called (4^{19}) a Maacathite, which would naturally suggest that he came from the small kingdom of Maacah (wh. see). It may have been here 'the Maacathite' among his heroes joined David (2 S 23^{34}). The site was recovered by Robinson some 8 miles S. of Hebron. It is now *Es-Semû'a*, a considerable village (*BR* ii. p. 204), and full of ancient remains (*PEF Memoirs*, iii. 403, 412).

A. HENDERSON.

ESHTEMOH.—See ESHTEMOA.

ESHTON (אֶשְׁתּוֹן, perhaps 'uxorious').—A Judahite (1 Ch $4^{11.12}$). See GENEALOGY.

ESLI ('Εσλεί, perhaps = אֲצַלְיָהוּ 'J" hath reserved').—An ancestor of Jesus (Lk 3^{25}). See GENEALOGY.

ESPOUSAL, ESPOUSE.—To espouse (fr. Lat. *sponsus*, ptcp. of *spondēre*, to betroth, through Old Fr. *espouser*) meant either to betroth or to marry. Thus Camden, *Rem.* (1637) 414, 'Two Lovers who being espoused, dyed both before they were married'; but Shaks. *Rich. III.* IV. v. 8—

> 'Withal, say, that the Queene hath heartily consented,
> He should espouse Elizabeth her daughter.'

So also 'espousal' is used in both senses, and Murray (*Oxf. Eng. Dict. s.v.*) thinks marriage is the primary sense. In AV 'espouse' occurs 2 S 3^{14} 'Deliver me my wife Michal, which I espoused to me' (RV, 'whom I betrothed to me,' Heb. אֵרַשְׂתִּי לִי, which always means 'betroth'); Mt 1^{18}, Lk 1^{27} 2^{5}, all of the Virgin Mary (RV 'betrothed'; Gr. μνηστεύω, always 'to ask or engage in marriage'); 2 Co 11^{2} 'I have espoused you to one husband' (ἡρμοσάμην, lit. 'joined you unto,' and here the ref. seems to be to marriage, not betrothal, 'I have given you in marriage,' though the betrothal, which was also carried out by the bridegroom's friend may be meant). Espousal is found Ca 3^{11} 'in the day of his espousals' (בְּיוֹם חֲתֻנָּתוֹ, 'on the day of his marriage,' undoubtedly); and Jer 2^{2} 'the love of thine espousals' (אַהֲבַת כְּלוּלֹתָיִךְ, as Cheyne, 'thy bridal state'). Thus it is probable that AV (following older VSS.*) used these words indiscriminately, or at least with a less clear distinction than now obtains between betrothal and marriage. For the solemnity of betrothal in Italy (= England) in Shakespeare's day, see *Twelfth Night*, IV. iii. 26: it enables Olivia to speak of Sebastian as 'husband' (v. 146). It was not less solemn and binding in Israel. See MARRIAGE.

J. HASTINGS.

ESPY.—The verb to 'espy' occurs only six times in AV, Gn 42^{27}, Jos 14^{7}, Jer 48^{19}, Ezk 20^{6}, To 11^{6}, 1 Mac 5^{38}, while the mod. form to 'spy' is found eighteen times, and RV turns 'espy' of Jos 14^{7} into 'spy.' The word is apparently of Teutonic origin (Old High Ger. *spehon*), though it is connected with Lat. *specere*, to look, Gr. σκέπτομαι, and entered Eng. through the Old Fr. *espier*.

1. The most common and the oldest meaning is to *inspect* (secretly) a place, as Nu 21^{32} 'Moses sent to spy out Jaazer,' when the Heb. is רִגֵּל, except Nu $13^{16.17}$ (תּוּר), and the Eng. is always 'spy (Jos 14^{7} AV 'espy') *out*,' except Jos 2^{1} 'to spy secretly' (מְרַגְּלִים חֶרֶשׁ, RV 'as spies secretly'), and Ezk 20^{6} 'a land that I had espied for them' (אֲשֶׁר־תַּרְתִּי לָהֶם). Once the ref. is not to land but to liberty, Gal 2^{4} 'false brethren . . . who came in privily to spy out our liberty' (Tindale's trn.; Wyc. 'to aspie oure fredom,' Gr. κατασκοπῆσαι). **2.** But we also find the sense of *keep watch*, as Jer 48^{19} 'O, inhabitant of Aroer, stand by the way, and espy' (וְצַפִּי). **3.** More freq. is the idea of *suddenly perceiving* anything, as Gn 42^{27} 'And as one of them opened his sack to give his ass provender in the inn, he espied his money'; so Ex 2^{11}, 2 K 9^{17} 13^{21} 23^{16} (all רָאָה 'see'). **4.** Finally, simply to discover or *perceive*, as 2 K 23^{24} 'All the abominations that were spied in the land of Judah . . . did Josiah put away' (רָאָה). Cf. Barlowe, *Dialoge* (Lunn's ed. p. 73), 'Woulde God they were as prest to remoue ye balk out of their owne eyes, as they be prompte to aspye a lytle mote in other mens.'

The subst. is always plu. 'spies,' except Sir 11^{30} 'spy.' The Heb. is generally מְרַגְּלִים (Gn $42^{9.11.14.16.30.31.34}$, Jos 6^{23}, 1 S 26^{4}, 2 S 15^{10}); also שֹׁמְרִים (Jg 1^{24}, RV 'watchers'), אֲתָרִים (Nu 21^{1}, RV 'Atharim' as place-name, wh. see). The Gr. words are κατάσκοπος (Sir 11^{30}, 1 Mac 12^{26}, He 11^{31}), the usual LXX tr. of *mĕraggĕlîm*; and ἐγκάθετος (Lk 20^{20}, lit. 'sent down into,' and so, as Plummer, 'suborned to lie in wait.' The word is not found elsewhere in NT).

J. HASTINGS.

ESSENES.—In regard to the origin and nature of this sect very various views have been held. It is therefore best to confine oneself to stating succinctly what is known about them from ancient authors.

Our earliest witness is Philo of Alexandria, who, having visited Jerusalem in his youth, may have come into personal contact with them. In his treatise *Quod Omnis Probus Liber*, which is one of his earlier works, written probably before A.D. 20, he describes them as follows :—

---

* Tindale, in his tr. published in 1525–26, rendered the Gr. μνηστευθείσης (Mt 1^{18}) by 'maried,' and in this he is followed by Coverdale. In the ed. of 1534, however, he altered it to 'betrouthed.' In 2 S 3^{14} Cov. has 'maried,' and so have the Geneva and Bishops' Bibles. In the NT our translators were probably influenced by the Rhemish Version, which in Mt 1^{18} has 'spoused,' or by Udall's tr. of Erasmus' Paraphrase (1548) which has 'espouse.'

> They were a sect of Jews, and lived in Syria Palestine, over 4000 in number, and called Essæi, because of their saintliness; for *hosios*=saintly, is the same word as Essæus. Worshippers of God, they yet did not sacrifice animals, regarding a reverent mind as the only true sacrifice. At first they lived in villages and avoided cities, in order to escape the contagion of evils rife therein. They pursued agriculture and other peaceful arts; but accumulated not gold or silver, nor owned mines. No maker of warlike weapons, no huckster or trader by land or sea, was to be found among them. Least of all were any slaves found among them; for they saw in slavery a violation of the law of nature, which made all men free brethren, one of the other.
>
> Abstract philosophy and logic they eschewed, except so far as it could subserve ethical truth and practice. Natural philosophy they only studied so far as it teaches that there is a God who made and watches over all things. Moral philosophy or ethic was their chief preoccupation, and their conduct was regulated by their national (Jewish) laws. These laws they esp. studied on the seventh day, which they held holy, leaving off all work upon it and meeting in their synagogues, as these places of resort were called. In them they sat down in ranks, the older ones above the younger. Then one took and read the Bible, while the rest listened attentively; and another, who was very learned in the Bible, would expound whatever was obscure in the lesson read, explaining most things in their time-honoured fashion by means of symbols. They were taught piety, holiness, justice, the art of regulating home and city, knowledge of what is really good and bad and of what is indifferent, what ends to avoid, what to pursue,—in short, love of God, of virtue, and of man.
>
> And such teaching bore fruit. Their life-long purity, their avoiding of oaths or falsehood, their recognition of a good providence alone, showed their love of God. Their love of virtue revealed itself in their indifference to money, worldly position, and pleasure. Their love of man in their kindliness, their equality, their fellowship passing all words. For no one had his private house, but shared his dwelling with all; and, living as they did in colonies (θιάσους), they threw open their doors to any of their sect who came their way. They had a storehouse, common expenditure, common raiments, common food eaten in Syssitia or common meals. This was made possible by their practice of putting whatever they each earned day by day into a common fund, out of which also the sick were supported when they could not work. The aged among them were objects of reverence and honour, and treated by the rest as parents by real children.

The most cruel and deceitful tyrants, says Philo, that had been the scourge of their country, had yet been moved to admiration of their quiet but invincible freedom, of their common meals, of their consummate fellowship.

Perhaps in these last words Philo refers to Herod the Great, whose subsequent rise to greatness was foretold to him as a child by an E. named Manæmus (Menahem), and who in consequence befriended and honoured the sect (Josephus, *Ant.* xv. x. 5).

Eusebius in his *Præparatio Evangelica* has preserved a fragment of Philo's 'Apology for the Jews,' which repeats much of the information given by Philo, but also supplements it.

> Our lawgiver, he says, trains into fellowship and communion thousands of his disciples, who for their saintliness (ὁσιότητα) are called Essenes. They inhabit many cities of Judæa, as well as many villages and populous tracts. Their tenets are espoused by them of free choice, and not as a matter of race.
>
> There are no children or youths among them, but only full-grown men, or men already in the decline of life. They have no private property, but put all they have into a common fund, and live as members of a thiasus or philosophic colony, having common meals. They are very industrious, and work hard from early sunrise to sunset, as tillers of the soil, or herdsmen, or bee-farmers, or as craftsmen. Whatever they so earn they hand over to the elected steward (ταμίᾳ χειροτονηθέντι), who at once buys victuals for the common repast.
>
> No Essene, adds Philo in this account, marries, but all practise continence. For women are selfish and jealous, and apt to pervert men's characters by ceaseless chicanery and wiles. While, if they have children, they are puffed up and bold in speech; driving their husbands to actions which are a bar to any real fellowship with other men.

The next writer who describes the Essenes is Pliny the elder († A.D. 79), in his *Natural History*, bk. v. ch. 17. 'The Hessenes,' he says, 'live on the W. side away from the shores (of the Dead Sea), out of reach of their baneful influences. A solitary race, and strange above all others in the entire world. They live without women, renouncing all sexual love. They eschew money, and live among the palm-trees. Yet the number of their fellows (convenarum) is kept up and day by day renewed; for there flock to them from afar many who, wearied of battling with the rough sea of life, drift into their system' (*ad mores*). 'Thus for thousands of ages (strange to tell) the race is perpetuated, and yet no one is born in it. So does the contrition felt by others for their past life enrich this set of men. Below them lay Engadi, a town once second only to Jerus. in its fertility and groves of palms. Now 'tis but one more tomb. Next comes Masada, a fort on a rock, and, like the former, not far from the Dead Sea. And here ends our account of Judæa.'

There are two passages in Josephus in which the E. are described at length, and many minor references. The following is an epitome of his information :—

> Josephus calls them Esseni in *BJ* ii. viii. 2, *Ant.* xiii. v. 9, x. 6, etc., and with Philo, Essæi in *Ant.* xv. x. 4. They arose along with the sects of Pharisees (*Ant.* xiii. v. 9) and Sadducees, about B.C. 144, and formed from the first an αἵρεσις or sect.
>
> About B.C. 107 (*Ant.* xiii. xi. 2) a certain Essene, named Judas, had a school, it would seem, in the temple, in which he taught his companions and pupils the art of predicting events. Again, about B.C. 21 we read (*Ant.* xv. x. 4) that Herod excused them along with the Pharisees from taking the oath of fidelity to himself. In the Jewish war (*BJ* ii. xx. 4) we hear of one John the Essene leading the Jewish rebels in Thamna. And at that time (*c.* A.D. 70) there was a gate at the S.E. corner of the city of David called the Gate of the E. (*BJ* v. iv. 2), which is proof that they were then a numerous sect.
>
> The E. were so called because of their holiness (σεμνότητα) (*BJ* ii. viii. 5; *Ant.* xviii. i. 5). They believed that God controls all things, and committed all things to Him. Sometimes, however, Josephus says that they regarded Fate (εἱμαρμένη) as the supreme determinant of all human affairs (so a Mussulman believes in Allah and Kismet both at once) (*Ant.* xviii. i. 3).
>
> There was no single city of the E., but they were sojourners (μετοικοῦσιν) in many, being in number over 4000 (*Ant.* xviii. i. 5). They eschewed marriage, and, adopting others' children as their own, imbued them with their own tenets (*BJ* ii. viii. 2; *Ant.* xviii. i. 5).
>
> There was, however, another sect (τάγμα) of E., who made trial of women for three years and then married them if they were fruitful (*BJ* ii. viii. 13). They owned no slaves (*Ant.* xvii. i. 5), and were wholly devoted to agricultural pursuits. They despised wealth and shared their possessions, so that a rich man among them had no more enjoyment of his own property than had a member who owned nothing (*BJ* ii. viii. 3 and *Ant.* xviii. i. 5). For in entering their sect (αἵρεσις) a man made over his property to the institution (τῷ τάγματι) (*BJ* ii. viii. 3). There was no buying and selling between members; but the elected stewards administered the common fund,* impartially satisfying the needs of all alike (*BJ* ii. viii. 3). In every city a special relieving officer (κηδεμών) was appointed to take care of the garments and supplies of the sect and entertain its travelling members.
>
> But though so knit together among themselves the Essenes succoured the deserving, and pitied all men and fed the needy (*BJ* ii. viii. 6). This was a primary duty to be fulfilled by each on his own responsibility, and without waiting for a hint from the overseer (ἐπιμελητής or ἐπίτροπος); without whose authority, however, they might do nothing else, nor even give to their own kinsmen.
>
> Their general mode of life (δίαιτα) Jos. in one place declares to be the same as that which Pythagoras instituted among the Greeks; in another place he compares them to Dacians, presumably because of their simple and communal mode of living (*Ant.* xv. x. 4, xviii. i. 5). He thus describes a day of an Essene's life inside his brotherhood :—
>
> As for their piety towards God, it is very extraordinary. For before the sun rises they speak not a word about profane matters, but address to the sun certain prayers, which they have received from their forefathers, as if they supplicated it to rise (*BJ* ii. viii. 5). After this every one of them is sent away by their curators to exercise those arts wherein they are skilled, in which they labour with great diligence till the fifth hour (11 A.M.). After this they assemble together into one place, and when they have clothed themselves in white veils, they bathe their bodies in cold water. And after this purification is over, they meet together in an apartment of their own, into which it is not permitted to any one of another persuasion to enter; and they themselves being pure enter the dining-room as if it were some holy temple, and quietly sit down. Upon which the baker lays them loaves in order, and the cook also brings a single plate of one sort of food and sets it before every one of them. But the priest says grace before meat, and it is unlawful for any one to taste of the food before prayer is offered. And when they have made their breakfast, he again prays over them. And when they begin and when they end, they praise God as

---

* χειροτονητοὶ οἱ τῶν κοινῶν ἐπιμεληταί.

Him that bestoweth life. After which they lay aside their white garments as holy, and betake themselves to their labours again till the evening. Then they return home to supper after the same manner; and if there be any strangers there, they sit down with them. Nor is there ever any clamour or disturbance to pollute their house; but they give every one leave to speak in their turn. Which silence thus kept in their house appears to outsiders like some tremendous mystery; and the same is due to their unswerving sobriety, and to this, that their food and drink is measured out to satisfy them and no more.

Like Philo, Josephus is full of praise for their moral qualities, and lauds their self-restraint in anger, their faithfulness, their peace-making, their truthfulness, which made all oaths to them a mere superfluity.

The mode of joining the sect was this. The intending member remained outside the order one year, following, however, the same discipline, and invested with its symbols, namely a spud wherewith to hide his excrement out of sight of God, the girdle and white raiment. After the lapse of a year, if he had given good proof of his continence, he was allowed to join more closely in their way of life and partake of a *purer* quality of the waters of purification, though not yet to live entirely with them. Two years of moral probation must yet be passed before he was chosen a member of their band (ὅμιλος). And then before he touched the common food he took tremendous oaths to them: first to reverence the Deity, next to observe justice towards men, to hate the wicked and assist the just. To be loyal ever to all men, but in especial to those in authority, because none hath authority except by God's help. He swore also, if he should ever be in authority, not to abuse the same, nor outshine those subject to him in his garments or in any other finery; to love truth and repel falsehood; to keep his hands clean from theft and his soul from unholy gain; to conceal nothing from members of the sect, nor reveal aught to others, even at peril of his life. Moreover, he swore to communicate to none the dogmas of the sect, otherwise than as he received them himself, to abstain from brigandage, and to preserve with like care the books of their sect and the names of the angels.

Jos. gives many indications that the E. were very strict Jews (*BJ* II. viii. 9). They revered the name of the lawgiver next after God, and punished with death one that blasphemed against Moses. Above all other Jews they observed the Sabbath, not only not cooking on that day, and avoiding the lighting of a fire, but forbearing also to move a vessel, or even evacuate. In the Jewish war many died under torture at the hands of the Romans rather than blaspheme the lawgiver or eat unclean food. Many details supplied by Josephus prove how much importance they attached to ceremonial purity. We have seen how they bathed before each meal, and wore linen garments; linen, of course, being prescribed because it was a vegetable substance, and not made of dead animal refuse, as would be a leathern or woollen tunic. That the waters of purification in their purer quality were denied to novices, proves that the water of the bath was ceremonially cleansed, and probably exorcised. By immersion in it they were themselves rendered καθαροί or pure before they sat down to meat, by contrast with the ἑτερόδοξοι, or persons of any other persuasion (*BJ* II. viii. 10). They were distinguished acc. to their purity and seniority into four grades; and a senior member was polluted by the very touch of a junior member, and had to wash after being so touched, as if he had been jostled by Gentiles. So an Indian Brahman is polluted by the touch and even sight of a low-caste native. They did not anoint themselves with oil, regarding it as a defilement; prob. because they could not easily get oil prepared by members of their own caste. Josephus elsewhere assures us that no Jew would anoint himself except with Jewish oil.

The same pursuit of ceremonial purity is to be noticed in regard to their meals. Their food and viands were specially prepared by their priests (*Ant.* XVIII. i. 5); just as in a Hindoo prison the cook must be a Brahman, because any lower-caste man may eat what a higher-caste man has cooked, but not *vice versâ*. In each city a special officer (κηδεμών) was appointed to supply travelling E. with their ceremonially pure garments and food. Lastly, an E. expelled for his sins by a court of 100 members from the brotherhood was still so held by its oaths and customs that he could not eat of food provided by others, and in consequence starved to death. To the same concern for ceremonial purity must prob. be ascribed their attitude of reserve towards the temple sacrifices. 'They send offerings (ἀναθήματα) to the temple and perform sacrifices with superiority of purificatory rites,* which they claim to practise (*Ant.* XVIII. i. 5). And being for this reason excluded from the common court of the temple, they perform their sacrifices by themselves.' † These words are obscure, and barely reconcilable with Philo's statement that the E. did not sacrifice animals (Philo, ii. 457 = *Quod om. prob. lib.* § 12). The offerings sent, according to Jos., need not of course have been blood-offerings; and as to the nature of the sacrifices (θυσίας) which they performed by themselves, *i.e.* without the help of the temple priests, Jos. tells us nothing; but we should certainly connect it with a practice, which he elsewhere attests, viz. that they *elected* their own priests for the making of their own food and eatables. This much is clear, that the ordinary lustrations of the temple were not good enough for an E., and were incompatible with his notions of ceremonial purity. Presumably, they were excluded from the temple court for thus flouting the usual lustrations. Unable to enter it, they sent offerings, but did not go themselves. At the same time 'they performed their sacrifices by themselves.' There seems to be some connexion between this statement and Philo's that they offered up the sacrifice of a devout and reverent mind. They could not possibly have offered up animal sacrifices save in the temple and in the ordinary way; and Josephus' own statement elsewhere, that their mode of life was Pythagorean, is in favour of Philo's declaration that they did not sacrifice animals. It is natural to suppose that they regarded their common meals as of the nature of a sacrifice, just as Christians regard the eucharistic elements. Only thus can we explain the fact that they *elected priests* to prepare those meals; for a priest implies a sacrifice to be offered.

Their abstention from marriage must also be set down to their desire for a levitical purity. For acc. to the Mosaic law sexual relations involved a defilement of the person, and the uncleanness lasted until the even (Lv 15[18]).

Notwithstanding their attachment to the Mosaic law and striving after levitical purity, there were certainly many non-Jewish elements in their religious practices and beliefs. Thus they adored the sun, and prayed to him to rise. In Appian and other writers we find the phrase, 'the *god* rose,' or 'the *god* set,' used instead of 'the *sun* rose,' or 'the *sun* set'; and Philo regarded the sun and stars as holy and divine natures.

The Essene beliefs about the soul and a future life were also non-Jewish. They believed that they received their souls back after death (*BJ* II. viii. 11), and so very cheerfully died for the faith. 'The body is corruptible, they taught; and the matter of which it is composed is not lasting. But souls are immortal, and last for ever, and, proceeding out of the most subtle ether, are entangled in bodies as in prison-cells, being drawn down by some natural yearning. But when they are set free from the bonds of the flesh, as being now released from a long bondage, they rejoice and mount upwards. And in agreement with the opinions of the Greeks they declare that there lies away across the ocean a habitation for the good souls, in a region that is oppressed neither with storms of rain or snow, nor with intense heat; a region ever refreshed by the gentle breathing of a breeze blowing from the ocean. But they allot to bad souls a dark and tempestuous den full of never-ceasing punishments.'

---

* τὰς θυσίας ἐπιτελοῦσιν διαφορότητι ἁγνειῶν, ἃς νομίζοιεν.

† ἐφ' αὑτῶν.

The Essenes had hereditary prayers to the sun, as well as the usual Jewish sacred books; they had purificatory rites of different sorts or degrees, and utterances of the prophets. By diligent study of these, some of them learned and professed to read the future. And their predictions, says Jos., were rarely belied; indeed he gives several instances up and down his history of the fulfilment of their prophecies (*BJ* II. viii. 12). They also had compositions of the ancients from which they chose out whatever benefited soul and body; and they inquired after such roots and peculiar stones as would ward off their distempers. The regular books and dogmas of the sect, as we have seen, they took oath to carefully keep, as also the names of the angels. These names, of course, were powerful weapons against evil demons, with a belief in which they must, like other Jews of the age, have been imbued. The stones and roots were the ordinary magic remedies against diseases.

This is the sum of what Jos. has to say about the Essenes. Hippolytus in the 9th Book of his *Refutation of Heresies*, § 18–28, substantially copies out Josephus' account in the *BJ* ii. ch. 8, here and there adding Christian touches in a way which proves that he was not loth to assimilate them to Christians. Yet some of the information which he adds is not of this sort, but serves to intensify their Jewish complexion. Such are the statements that on the Sabbath some Essenes would not so much as leave their beds (§ 25); that some were so scrupulous that they would not carry a coin, declaring it wrong to carry or look at or make an image (§ 26, cf. Mt 22^{20}); that no one of them would enter a city over the gate of which stood a statue (§ 26); that others of them, if they heard any one talking about God and His law, would waylay him when alone, and threaten to slay him unless he were circumcised, and slay him actually if he did not submit; for which reason, says Hippolytus, they got the name of Zealots and Sicarii; that others would call no one Lord (Κύριον) but only God, submitting to torment and death rather than do so. It is difficult to believe that Hippolytus had no authority for these statements; which indeed might seem to be taken from Jos., since they are embedded in his long citation of that author. If so, they have been removed from all the MSS of Josephus. The same account of Jos. was excerpted by Porphyry in the 3rd cent. in his book on Abstinence from Meats, and later by Eusebius in his *De Præp. Evang.* The account given by Epiphanius of the E. is late, confused, and of little value. It is clear that, even if the majority of the E. were cultivators and voluntarily poor, that did not prevent some of their number from occupying important posts in the court and camp; for we hear of one Simon[*] the interpreter of Archelaus' dream (*Ant.* XVII. xiii. 3), and of John the strategus, and of Menahem the friend of Herod. Nor did their gospel of peace and their prejudice against arms, as reported by Philo, prevent them from taking part in the final struggle against the Romans. Jos., moreover, implies that they were constantly moving about from city to city; and we can only suppose that the object of this travelling was to preach their tenets and secure recruits. We should like to know if the sect was not mainly recruited from Greek-speaking Jews, but on this point Jos. tells us nothing. In his autobiog. (*Vita*, 10) he implies that as a youth he had tried the discipline of this sect, as also of the Pharisees and Sadducees, and this inner acquaintance with them entitles his account to our entire credit; but just because he and his countrymen knew the sect so well, he omits to inform us about so essential a point as in what language their books were written, and what tongue, whether Greek or Aramaic, they usually spoke among themselves.

Some writers, impressed with the fact that Jesus constantly inveighed against the Pharisees and Sadducees, but never against the members of the third of the three great Jewish sects, who yet must have everywhere confronted Him, have inferred that He and John the Baptist, His precursor, were Essenes. The silence of the Gospels about the E. is certainly remarkable; and there are many striking traits in common between the E. and the earliest Christians. These are the following:—

1. The community of goods and voluntary poverty. **2.** The art of prophecy. In the earliest Church, as we know from Acts and from the *Didaché*, there was a regular order of prophets. **3.** The teaching about the future life, and about a hell. These tenets, however, were equally found among the Pharisees; nor does Jos. support Hippolytus in the latter's statement that the Essenes believed in the resurrection of the flesh, though the picture of the Islands of the Blest implies as much, and answers well enough to the Refrigerium of later Christian belief. As to the teaching of future punishment, we also find it in Philo. **4.** Abstention from marriage. This was equally a counsel of perfection in the early Church, but was there held to be right in view of the impending second advent and end of the world (1 Co 7$^{25ff.}$). **5.** Obedience to established authorities. **6.** Internal government. The officers of the E. community were variously termed ἀποδέκται τῶν προσόδων 'receivers of the revenue,' ἐπιμεληταί 'curators,' κηδεμόνες 'relieving officers,' ταμίαι 'stewards' (in Philo). These officers were, like the bishops of the early Church, elected by show of hands (χειροτονηθέντες), acc. to the testimony of both Philo and Josephus. It is significant that Hippolytus calls them outright προεστῶτες or presidents (lib. ix. § 25), the regular 2nd cent. equivalent of 'bishop.' **7.** The common meals, with which we may compare the picture of the early Church of Jerusalem given in the Acts. But whereas the Essenes dined together because of their anxiety to eat no food but what was ceremonially pure, the Christians were chiefly actuated, it would seem, by charitable and communistic reasons. Their love-feast, however, also had from an early date, if not from the very first, a sacramental character and conclusion, and required, like the Essene common meal, the presence of a priest both to prepare it and to give thanks before and after it to God 'the Giver of Life.' **8.** The Essene priests (ἱερεῖς) were *elected* to preside at the common meal, and *make* the food eaten thereat. Since the Essene common repasts had plainly a sacramental character, the function of their priests, as of Christian ones, was simply to prepare and preside over a sacramental meal, to which none were admitted save those rendered pure by previous baptism. **9.** General organization. (α) Obedience to the Essene officers. The brethren in their deportment and bodily habit were like children under the eye of a schoolmaster whom they feared (*BJ* II. viii. 9). (β) They were all brethren, but the elder members were revered by the juniors as if they were their parents. (γ) The entire body or class of Essenes (γένος as Jos. calls it) is a θίασος, an αἵρεσις, an ὅμιλος, a τάγμα. The two former were generic names for any body of co-religionists, and Christian congregations among the Gentiles were so described. (δ) The travelling precepts of the E. resembled those enjoined by Jesus on the Seventy. They were to take nothing at all with them, but only to go armed for fear of robbers.[*] (ε) They were to wear their cloaks and shoes right out, never changing them till they were quite worn out. Hippolytus paraphrases this by saying that no E. owned two cloaks or two pairs of shoes (Hipp. *l.c.* § 20). (ζ) The four grades of E. resembled the steps of the catechumenate. Such a distinction, however, of grades of initiation was common to most ancient mysteries, and was not special to Christianity. The *disciplina arcani* of the E. was also reproduced in the Christian Church, but equally in the pagan mysteries. **10.** Like the Christians, the Essenes were not content with the ordinary lustrations (ἁγνεῖαι) of Judaism, but had superior ones of their own. Whereas, however, the Christian baptism was conferred once and for all, the Essene baptism was daily. The Essene affectation of a purity of food superior even to the ordinary purity of the Jews, also recalls the eucharistic meal of the Christians. From it the novice was excluded, just as was the catechumen from the Eucharist. And just as the priest among the E. was *elected* to *make* the food eaten in their syssitia, so the priest in the Gr. Church, even to this day, himself prepares and bakes the eucharistic loaves. Jos. expressly says that the Essenes *elected* priests. They were therefore not content with the hereditary Levites of Judaism.

More analogies between the Essenes and the earliest Christians could no doubt be discerned. But it is a fatal objection to any real identification, that the Essenes were ultra-Jewish in the observance of the Sabbath, and, if we may credit Hippolytus, in their insistence on the circumcision of converts. The most we can say is that the

[*] Σιμων ἀνὴρ γενος Ἐσσαῖος.

[*] οὐδὲν μὲν ὅλως ἐπικομιζόμενοι, διὰ δὲ τοὺς λῃστὰς ἔνοπλοι.

Christians copied many features of their organization and propagandist activity from the Essenes.

The relation of the different sources on which our knowledge of the E. depends requires further sifting than it has generally received. Of course there have been attempts to prove the Philonean sources to be not authentic, but they are based on mere ignorance. There are occasional verbal resemblances * between the accounts of Philo and Jos. which indicate that Jos., besides his own personal experience of the sect, used either Philo or else a document previously used by Philo. The accounts of the two writers, however, do not always agree. Thus Philo says that all the E. were full-grown men, or verging on old age; but Jos. avers that they recruited their sect by adopting other people's children while they were still supple and plastic to receive their teachings (*BJ* II. viii. 2). Yet in the same context Jos. speaks of those who *desired* to become members of the sect,† and also of *their* period of probation, in words suitable only to the view that these recruits were adult men. We may perhaps infer that the sect was recruited in both ways. Pliny's statement that the men from all quarters joined it when they repented of their lives, and left the world, agrees well enough with Philo's statement; and, if we translate *pœnitentia* as 'repentance' rather than mere *ennui*, offers a striking parallel to John the Baptist's preaching: Repent of your sins and be baptized, because the kingdom of God is at hand. There is reason to suspect some close affinity between John, who came fasting, and the E.; the more so as John's sphere of activity in the valley of Jordan lay close to the Essene settlement on the shores of the Dead Sea.

The recluse Bannus, with whom Jos. as a young man spent three years as a disciple, resembled the Essenes. For he lived in the desert, wore garments made of the bark of trees, and lived on anything he found growing about, washing himself often day and night with cold water by way of purification. However, Josephus' context rather implies that he was not one. An almost certain reference to the E. is contained in an eloquent passage of Philo's, from the same treatise in which his longer description of the sect is preserved.

> Even in our own day, he writes, there are still men whose only guide is God; men who live by the true reason of nature, not only themselves free, but filling their neighbours with a spirit of freedom. They are not very numerous indeed. But that is not strange. For the highest nobility is ever rare; and then these men have turned aside from the vulgar herd to devote themselves to a contemplation of nature's verities. They pray, if it were possible, that they may reform our fallen lives; but, if they cannot, owing to the tide of evils and wrongs which surges up in cities, they flee away, lest they too be swept off their feet by the force of its current. And we, he continues, if we had a true zeal for self-improvement, would have to track them to their places of retreat, and, halting as suppliants before them, would beseech them to come to us and tame our life, grown too fierce and wild; preaching, instead of war and slavery and untold ills, their gospel of peace and freedom, and all the fulness of other blessings.

The Therapeutæ of Alexandria, of whom Philo has left so striking a description in his tract *De Vita Contemplativa*, in many ways resembled the Pal. Essenes; but were, as was natural in an Egyp. sect, more addicted to contemplation. Here is not the place for a detailed comparison between them and the E.; nor is it possible to review the numerous theories which have been framed with regard to the origin of the E. It, however, deserves to be remarked that acc. to the evidence of Jos. they arose just at the time when the friendship between Lacedæmon and Jerus. was at its highest. Areus the king of Sparta had written as early as B.C. 309–300 to Onias the high priest in these terms: 'It is found in writing that the Spartans and the Jews are brethren, and that they are of the stock of Abraham' (1 Mac 12^{21}). And in B.C. 144 Jonathan the high priest, in renewing the relations of his country with Lacedæmon, reminded the Spartans of this long-standing friendship based on ancient kinship. Is it possible that the E. sect was partly an outcome of this contact with the Peloponnese—an attempt to imitate on Jewish soil, and in a religious and moral sense only, the Syssitia and organization of the Lycurgean polity? That most of the Jews mentioned in Jos. as belonging to the Maccabæan period have Greek second names is good evidence of the wide diffusion in Pal. at that time of the Gr. language. And the very information proffered by Jos., that the E. were Jews by race, almost implies in its context that in language they were something else. So Philo assures us that the holy places in which the E. met on the Sabbath were called *συναγωγαί*, *synagogues*. Unless they spoke Greek, why should this term rather than the usual one *σαββατεῖον* * have been employed? Friedländer (*Zur Entstehungsgeschichte des Christenthums*, Wien, 1894) has remarked that the very circumstance of Jos. having used, if not Philo's account, at least a Gr. description of the sect already used by Philo, is some indication that they were a Gr. sect of Jews. Their Pythagorean régime, their belief in the preexistence of the soul, their view of its nature and incarnation, all point the same way. The statement also of Philo, not repeated by Jos., that they philosophized most things in the Bible allegorically or in a symbolic way with old-fashioned zeal,† is an almost certain proof of their Hellenism. And Philo's own allegorization of the passage Dt 23 ff. is, as Friedländer has seen (p. 118), an allusion to the Essene probation and discipline (Philo, *Legis Alleg.* i. 117).

Again, Philo, when he states that the E. were taught the art of regulating home and state, and a knowledge of what things are really good and bad and indifferent, how to choose what is right and avoid the opposite courses, seems to imply a familiarity on their part with Greek, especially with Stoic, moral philosophy, inconceivable among Jews who spoke Aramaic only. But here we must be cautious, for Philo would naturally describe any sect in terms of his own Gr. culture. That he twice over described this Pal. sect, yet apparently left unnoticed the purely Jewish schools of Pal., is in any case significant, and suggests that they had a Gr. culture which interested him, and led him to couple them, as he does, with the Alexandrine Therapeutæ.

Jos. equally implies that they were more or less Hellenized. Would he have conspired with Philo to misrepresent them? Nothing is more improbable.

The conclusion, then, is probable that they owed their origin to the introduction and diffusion of Greek culture in the early part of the 2nd cent. B.C. They were in some respects very strict Jews, and even fanatical observers of the Mosaic Law; but in others, notably in their election of their own priests,‡ and in the thereby implied supersession of the Levite hereditary priesthood, and in their repudiation of animal sacrifices, they were a new departure in Judaism, and very closely akin to Jesus and His disciples.

---

* *E.g. Ant.* XVIII. i. 5: *τάδε πράσσουσιν ἄνδρες ὑπὲρ τετρακισχίλιοι τὸν ἀριθμὸν ὄντες.* Cf. Philo, ii. 457: *πλῆθος ὑπὲρ τετρακισχίλιοι.* It is not likely that their numbers were the same at the very beg. of our era as in A.D. 70. Again Jos. writes (*BJ* II. viii. 4): *τοῖς ἑτέρωθεν ἥκουσιν αἱρετισταῖς ταυτ' ἀναπέπταται τα παρ' αὐτοῖς.* Cf. Philo (ii. 458): *ἀναπέπταται καὶ τοῖς ἑτέρωθεν ἀφικνουμένοις τῶν ὁμοζήλων.*

† *τοῖς δὲ ζηλοῦσιν τὴν αἵρεσιν.*

* Jos. uses *σαββατεῖον* (*Ant.* XVI. vi. 2). It is found in a very early Græco-Jewish papyrus, edited by Mr. B. P. Grenfell, of Oxford.

† *τὰ γὰρ πλεῖστα διὰ συμβόλων ἀρχαιοτρόπῳ ζηλώσει παρ' αὐτοῖς φιλοσοφεῖται.*

‡ *Ant.* XVIII. i. 5: *ἀποδέκτας τῶν προσόδων χειροτονοῦντες . . . ἱερεῖς δὲ ἐπὶ ποιήσει σίτου τε καὶ βρωμάτων.* If the Essenes discarded sacrifices, they had no need for priests of the old kind.

The literature relating to the Essenes is so vast as to defy detailed reference. The student may be advised to study for himself the very limited documentary sources relating to them, and then to draw his own conclusions.* F. C. CONYBEARE.

ESTATE.—In AV (1611 and mod. edd.) 'estate' occurs 19 times, 'state' 14 times, without difference of meaning; thus Col 4^{7} 'All my state (*τὰ κατ' ἐμὲ πάντα*) shall Tychicus declare unto you,' but v.^{8} 'that he might know your estate' (TR *τὰ περὶ ὑμῶν*); and again, Ph 2$^{19. 20}$ 'your state' (*τὰ περὶ ὑμῶν*). Cf. Melvill, *Diary*, 289, 'We fand him in a miserable esteat'; Calderwood, *History*, 144, 'I, Mr. Andrew Melville . . . most earnestly hath prayed at all times, and specially in the foresaid Sermon, for the preservation and prosperous estate of his Majestie.' The meaning is either 'condition' as in those examples, or 'position' as Ps 136^{23} 'Who remembered us in our low estate' (בְּשִׁפְלֵנוּ), Ec 1^{16} 'I am come to great estate' (הִגְדַּלְתִּי). Cf. T. Elyot, *The Governour* (Croft's ed. i. 26), 'a man of the base estate of the communaltie'; Calderwood, *History*, 149, 'They declare how some of low estate, borne to no heritage . . . have creeped in favour with the King.' But in Dn 11$^{7. 20. 21. 38}$ the meaning seems to be 'high rank,' 'dignity,' as 11^{7} 'Out of a branch of her roots shall one stand up in his estate.' The Heb. is כֵּן *kên*, which means 'place' (as RV here) or 'office' (as RVm), and the favourite translation before AV was 'in his stead' (Cov. Gen. Bish.); once, however, the word is translated 'state' (Pr 28^{2}, AV and RV). Akin to this meaning is Mk 6^{21} 'Herod on his birthday made a supper to his lords, high captains, and chief estates of Galilee' (*τοῖς πρώτοις*, RV 'the chief men'), where, however, the word is used of the men to whom the dignity belongs. Cf. Fuller, *Ch. Hist.* v. iii. 28, 'Item, that God never gave grace or knowledge of Holy Scripture to any great estate or rich man.' See also Ac 22^{5} 'The high priest doth bear me witness, and all the estate of the elders,' Gr. *πᾶν τὸ πρεσβυτέριον*, lit. 'all the presbytery,' *i.e.* the Sanhedrin (which see). Compare Communion Office in Pr. Bk. 1549, 'the whole estate of Christ's Church militant here in earth,' changed in 1552 into 'state.' In Ezk 36^{11} 'I will settle you after your old estates,' the plu. is used simply because the ref. is to more than one person; so Pref. to AV 1611, 'support fit for their estates.' J. HASTINGS.

ESTEEM, ESTIMATION.—'Esteem' and 'estimate' both come from Lat. *æstimare*, the latter directly, the former through Old Fr. *estimer*. The meaning of *æstimare* is to assign a value, appraise, rate; and that is the meaning of 'estimate' (Heb. הֶעֱרִיךְ) in Lv 27$^{14\ bis}$, its only occurrences in EV. 'Estimation' occurs 20 times in the same chapter; elsewhere Lv 5$^{15. 18}$ 6^{6}, Nu 18^{16}, and always in the same sense as 'estimate,' that is, valuation, price (Heb. עֶרְכְּךָ). Only once is 'estimation' found in the mod. sense of 'high value,' 'repute,' Wis 8^{10} 'For her sake I shall have estimation among the multitude, and honour with the elders, though I be young' (*δόξα*, RV 'glory').

Cranmer (*Works*, i. 14) says, 'But to mine estimation, as much as I could view the ground, there was not slain upon both parties two thousand men.' This meaning of 'estimation' is not found in AV, but it is the almost invariable sense in which 'esteem' is used, that is, to esteem is to have an opinion (good or bad), reckon, as in He 10^{29} Rhem. 'estemed the bloud of the testament polluted,' where AV and most VSS have 'counted'; and as Knox, *Hist.* 312, 'he shall be esteemed and holden a seditious person.' Thus Ro 14^{5} 'One man esteemeth one day above another: another esteemeth every day alike' (both *κρίνει*). Then the kind of judgment is expressed by an adverb, 'highly,' 'lightly,' or the like.

Sometimes 'esteem' might appear to be used, like 'estimation,' in the mod. sense of 'think highly of.' But this impression is probably due to the context or the presence of some adverb. Thus Wis 12^{7} 'that land which thou esteemest above all other' (*ἡ . . . τιμιωτάτη γῆ*, RV 'is most precious'); Sir 40^{25} 'Gold and silver make the foot stand sure; but counsel is esteemed above them both' (*εὐδοκιμεῖται*); Job 23^{12} 'I have esteemed the words of his mouth more than my necessary food' (צָפַנְתִּי, RV 'I have treasured up'), 36^{19} 'Will he esteem thy riches?' (הֲיַעֲרֹךְ). And in particular, Is 53^{3} 'He was despised, and we esteemed him not,' is generally taken in the sense of 'highly value'; but the Heb. verb (חָשַׁב) is very rare in that sense, and is used in the next verse in its familiar sense of 'reckon'—'we did esteem him stricken.' Cf. Ridley, *A Brefe Declaration*, 1535 (Moule's ed. p. 101), 'eateth and drynketh his owne damnacion, bycause he estemeth not the Lordes body; that is, he reuerenceth not the Lordes bodi with the honour that is due unto him,' where the paraphrase contains more than the translation.

J. HASTINGS.

ESTHER (אֶסְתֵּר, *'Εσθήρ*, Pers. *stâra*, 'star'), originally named Hadassah (הֲדַסָּה 'myrtle').—A Jewess who has given her name to a book of the OT, in which she holds a prominent place. Sprung from a family of the tribe of Benjamin, she spent her life in the Captivity in Persia, where she was brought up in humble circumstances as the orphan ward of her cousin Mordecai (Est 2$^{5ff.}$). On the deposition of the Pers. queen Vashti for refusing to come at the command of her husband Ahasuerus (*Xerxes*, B.C. 485–465), 'to show the peoples and the princes her beauty,' on an occasion of high festivity at the court of Susa (1$^{10ff.}$), E. was selected to fill the vacant place of honour, as the fairest of many beautiful maidens brought before the king (2$^{8ff.}$). Shortly after her elevation a great disaster threatened her countrymen. The grand vizier, 'Haman the Agagite,' enraged at the refusal of Mordecai to do obeisance to him, accused the whole nation of the Jews to the king as a disloyal and unprofitable people, and undertook to pay 10,000 talents of silver into the treasury as the proceeds of pillaging them. An edict was thereupon issued for the extermination of all Jewish families throughout the empire, and for the confiscation of their property, on a certain day, which Haman had previously determined by lot (ch. 3). In this crisis, moved by the tears of her fellow-countrymen, and incited by Mordecai, who urged her to rise to the great opportunity set before her for the deliverance of her nation, E. (after a fast of three days on the part of the whole Jewish community) resolved to venture uninvited, at the risk of her life, into the presence of Ahasuerus, in order to intercede with him for her people (ch. 4). A gracious reception was accorded to her by the king, who held out the golden sceptre, and agreed to dine with her in her apartments on two consecutive days (ch. 5). On the night preceding the second banquet (at which E. intended to make known her request) it happened by a singular coincidence that there was read to the king, to while away some sleepless hours, a portion of the national archives, which recorded a valuable service rendered by Mordecai in the detection of a plot against the king's life on the part of two of his chamberlains. For this service Mordecai had never been rewarded; and when Haman, elated with the high honour shown him by the queen (who had invited him to the banquet provided for the king), appeared at the palace next morning in order to ask permission to put Mordecai at once to an ignominious death, he was met with the question from the royal lips, 'What shall be done unto the man whom the king delighteth to honour?' Imagining, in his overweening pride, that it must be himself that was meant, he suggested a triumphal procession, in which one of the chief nobles should act the part of attendant. To his surprise and mortification he found himself called upon to serve in a menial capacity in the triumph of his Jewish adversary (ch. 6). This, as his wife divined, was only the prelude to his downfall, which came to pass next day at the second banquet, when the king, learning for the first time the nationality of the queen, and the distressing position in which the edict had placed her, ordered that Haman should be seized, and hanged forthwith on a lofty gallows which (as the king was at that moment informed by one of his courtiers) had been erected by Haman for the execution of Mordecai (ch. 7). The latter was at the same time raised to the vacant post of honour, and through his influence, and that of E., a second edict was issued and circulated, granting to the Jews the same powers, in the way of self-defence, as had been conferred in the previous edict on their enemies for the purpose of attack,—a direct revocation of the former edict being impossible according to the laws of the Medes and Persians. In consequence of these proceedings a dread of the Jews fell upon all peoples, many proselytes being gained—convinced, apparently, by the logic of events (ch. 8); and when the fatal day arrived, the conflict issued in a great slaughter of their enemies and a decisive victory for the Jews, who, however, waived their right of plunder. To commemorate their great deliverance, the joyful Feast of Purim (which see) was instituted by E. and Mordecai as an annual observance for the whole nation.

---

* Schürer (*HJP* II. ii. 188 ff.) has a full record of the literature. The important names are Frankel, 'Die Essäer,' in *Zeitschr. für die religiösen Interessen des Judenthums*, 1846, 441–461; and 'Die Essäer nach thalmud. Quellen,' in *Monatschr. für Gesch. u. Wissensch. des Judenth.* 1853, 30–40, 61–73; Jost, *Gesch. des Judenthums u. seiner Secten*, 1857, i. 207–214; Herzfeld, *Gesch. des Volkes Isr.* (2nd ed. 1863), ii. 368 ff., 388 ff., 509 ff.; Lightfoot in *Colossians and Philemon*, 82–98, 349–419; same in *Dissertations*, 323–407; Lucius, *Der Essenismus*, 1881; Hilgenfeld, *Ketzergesch. des Urchristenthums*, 1884, 87–149. Schürer may be supplemented by adding: Ginsburg in Smith and Wace, *Dict. Chr. Biog.* 1880; Ohle, 'Die Essener,' in *JPTh* (1888) xiv; also 'Die Pseudophilonischen Essäer und die Therapeuten,' in *Beiträge zur Kirchengesch.* 1888; Thomson, *Books which influenced our Lord*, 1889, 75–122; Morrison, *Jews under Roman Rule*, 1890, 323–347; Cheyne, *Origin of the Psalter*, 1891, 418–421, 446–449; Cohn in *JQR*, 1892, 38–42; Friedländer, *Zur Entstehungsgesch. des Christenthums*, 1894, 98–142; Conybeare, *Philo about the Contemplative Life*, 1895, 278 ff.—EDITOR.

How far E. is to be regarded as a historical personage, depends on the historicity of the Book of Est (see below), her name not being mentioned in any other book of the OT, nor anywhere else in pre-Alex. literature. The only queen of Xerxes mentioned by Herodotus (vii. 61, 82, 114; ix. 108–112; cf. Ctesias, 20) is Amestris, a cruel and superstitious woman, whom some (Scaliger, Pfeiffer, Eichhorn, Bertholdt, Bunsen, Shickard, etc.) would identify with Esther. But Amestris was a daughter of a Pers. general connected with the royal family, and the chronology and circumstances of her reign cannot be reconciled with the biblical account either of E. or of Vashti. Xerxes (like his predecessors) may have had more wives than one, but, according to Pers. custom, they must have been taken from some of the great families connected with the throne, or from some other royal house; and the most tenable hypothesis seems to be that E. (as well as Vashti) was merely the chief favourite of the seraglio, gaining a remarkable influence over the foolish and capricious monarch, and using that influence at a critical moment for the benefit of her Jewish compatriots. While there are some things recorded of E. that offend our Christian feeling,—in particular her vindictive treatment of the bodies of Haman's sons (9^7), and her request for an extension of time to the Jews at Susa for the slaughter of their enemies (9^{13}),—regard must be had to the spirit of the age in which she lived, and to the passions that had been excited by Haman's inhuman malignity. On the other hand, her devotion to the cause of her oppressed nationality ('I will go in unto the king; and if I perish, I perish'), and her dutiful bearing towards her foster-father, notwithstanding the sudden rise in her fortunes, explain the honour in which her memory has been held by her countrymen.

J. A. M'CLYMONT.

ESTHER, BOOK OF.—I. CANONICITY.—Est is one of the latest of the *Hagiographa* or *Kethubim*, the third and latest accretion of the OT Canon. It may have been among 'the other books of the Fathers' which the Gr. translator of Sir (B.C. 132) mentions (in his Prologue) along with the 'Law and the Prophets' as well known to his grandfather, the author of that book (*c.* B.C. 180); but this seems unlikely, in view of the fact that neither Esther nor Mordecai is mentioned in the *πατέρων ὕμνος* towards the close of the book. The earliest undoubted reference to E. is in Jos. (*c. Ap.* i. 8), who includes it among the 22 books long held sacred (*δικαίως θεῖα πεπιστευμένα*), as is evident from the *terminus ad quem* which he assigns to the history (*μεχρὶ τῆς Ἀρταξέρξου Περσῶν βασιλέως ἀρχῆς*), Artaxerxes being, in Josephus as in the Sept., erroneously identified with Ahasuerus. The secular and foreign character of the book * gave rise among the Jews of the 1st and 2nd cent. of the Christian era to questionings as to its right to a place in the Canon. In the Jerus. Talm. (*Meg.* 70. 4) there is a statement that 85 elders, including more than 30 prophets, had scruples about the recognition of the Feast of Purim (at which the Book of Est was publicly read) because there was no sanction for it in the law of Moses; and elsewhere (*Bab. Meg.* 7*a*) we find traces of various difficulties felt by Rabbis as to the full inspiration of the book. It appears certain, however, that it formed an integral part of the Jewish Canon when the latter was virtually, if not formally, closed at the Councils of Jerus. and Jamnia in the 1st cent. A.D., as the same books that are in our OT are implied (numerically) in ch. 14 of 2 Es, which was written in end of 1st cent., and are embodied in the Mishna, committed to writing by R. Judah I. about A.D. 200. Breathing a spirit of intense patriotism, the book soon became popular with the Jews, and its annual reading in the synagogue was accompanied with lively tokens of sympathy on the part of the congregation, while the reader pronounced the names of Haman's 10 sons in one breath to indicate that they all expired at the same moment, the names being written by the scribes in large letters in 3 perpendicular lines of 3, 3, 4 to signify that the 10 men were hung on 3 parallel cords. Although the last of the 5 *Megilloth* or *Rolls* which were read at 5 different feasts,† it came to be known as *the* Roll (*Megillah*) *par excellence*, and we may judge of the honour in which it was held from a saying of Maimonides (Carpzov, *Intr.* xx. § 6), that in the days of the Messiah the only Scriptures left would be the Law and the Roll. The excessive love which the Jews have ever shown for this book (of which Ewald has said that in passing to it from the other books of the OT 'we fall, as it were, from heaven to earth') illustrates their complete surrender to the spirit of the age in which it was produced. It was an age that had fallen out of sympathy with the teaching of the prophets, and was unprepared for the spiritual conception of the gospel,—when national pride and a certain faith in their own fortunes as a people, with a disposition to make the most of their heathen masters by the use of such worldly wisdom as they possessed, seem to have formed the chief characteristics of those who still claimed to be God's people.

---

* The name of God is never mentioned in it, but the king of Persia 187 times, and his kingdom 26 times; while the nearest approach to any recognition of religion is to be found in the fasting of 4^{16}, and possibly also in the confidence expressed in 4^{14}.

† The order is different in the Eng. Bible, as also in the Sept and Vulg., where Est closes the historical books.

In the Christian Church the book has naturally been less esteemed. It is one of the few books of the OT that are not quoted in the NT (nor in Philo). It has no place in the Canon of Melito of Sardis, who had made careful inquiry among the Jews of Syria regarding the books of the OT; of Theodore of Mopsuestia (followed by the Nestorians); of Athanasius, who put it in the second rank among the ἀναγινωσκόμενα; of Amphilochius, who mentions that 'some add the Book of Esther'; of Gregory of Naz., and others. Junilius in the 6th cent. mentions that there were grave doubts on the subject in his day; while Luther, after referring to 2 Mac, says (*Tischreden*), 'I have so little favour for this book and the Book of Est that I wish they did not exist; they are too Judaizing, and contain many heathenish improprieties.' In some of these cases, however, it may have been the corrupt Sept. transl. that caused suspicion, while in others it is possible that Est may be included under the name of Ezra or some other book. Est is recognized as canonical by Origen, Cyril of Jerus., Jerome (who puts it last in the list), Augustine, and others. We may also reckon it an indirect testimony to the authority of the book in the beginning of the Christian era, that, according to 2 Mac (15^{36}), 'Mordecai's day' (ἡμέρα Μαρδοχαϊκή), doubtless the Feast of Purim, was observed in the writer's lifetime. The fact that it has a place (in an enlarged form) in the Sept., with an epilogue stating that the tr. was brought (to Alexandria) by one Dositheus in the 4th year of Ptolemy and Cleopatra, is regarded by some as a proof that the book existed in its Gr. form as early as B.C. 178, in the reign of Ptolemy VI. (Philometor), who was friendly to the Jews. But there were two later kings of that name, and one earlier (B.C. 204–81), whose wives were called Cleopatra; and the inference is doubtful, even admitting the authenticity of the statement in question (Riehm, *HWB*; Fritzsche, *Handb. z. d. Apocr.* i.). While the Heb. text is good, there are large interpolations in the Sept., of which there are two different texts, A and B, the latter, according to Lagarde, Field, etc., being an improved recension of the 3rd cent. These interpolations contradict the Heb. in several particulars,* and betray their later Gr. origin by representing Haman as a Macedonian who sought to transfer the sovereignty from the Persians to the Macedonians (16^{10-15}), and by other inconsistencies and anachronisms,† and were, no doubt, the work of successive Hellenistic writers desirous to give a religious character to the book,‡ and to supplement other apparent defects.§ In the Vulg. these additions are all put by Jerome at the end of the book, beginning with a portion that takes up the narrative where the Heb. ends—with notes to show where the other additions occur in the Sept. In the RV Eng. Apocr. (where they are similarly combined under the name of 'The Rest of the Chapters of the Bk. of Esther') these explanations are given in the margin.

Owing to the influence of the Sept. and Vulg. (in the Syr. they have no place) the additions were often read in church, and even regarded as canonical (in common with other Apocr. books of OT), receiving the sanction of several Ch. Councils, from that of Carthage in 397 to the Council of Trent in 1546. They are composed of the following passages—the twofold references showing where they stand in the Sept. and the Rest of Est respectively:—(1) Mordecai's pedigree, dream, and detection of conspiracy, with his immediate reward, exciting Haman's wrath (Intr.; 12^{2}–12^{6}). (2). Terms of the king's writ, authorizing the destruction of the Jews (after 3^{13} 13^{1-7}). (3) Prayers of Mordecai and Est (after 4; 13^{8}–14^{19}). (4) Fuller account of Est's first intercession with the king (in place of $5^{1.2}$ 15). (5) Terms of the king's writ, authorizing the Jews to defend themselves (after 8^{13} 16). (6) Mordecai's devout interpretation of his dream in the light of events, and his permanent institution of the Feast of Purim, followed by epilogue regarding the Gr. tr. (End; 10^{4-13} 11^{1}). In Josephus we can trace other additions to the story not found in the Sept., which shows the popularity of the subject, and the tendency to embroider the Heb. narrative with Alex. inventions. Similar embellishments are to be found in the 'first' and 'second' Chaldæan Targums or commentaries, independent of the Gr. additions, which only found their way into the Midrashim at a much later time through the medium of the writings ascribed to Josipon ben-Gorion (Zunz, *Gottesdienstliche Vorträge*; Fritzsche, *as above*).

II. HISTORICITY.—On this subject the most diverse opinions have been held. Many old and a few modern writers* maintain the narrative to be thoroughly historical. But an increasing number† hold it to be more or less a work of imagination; while some‡ regard it as a poetical invention, having no appreciable basis of fact to rest on.

The following are the principal arguments for the historical character of the book.—(1) The narrative claims to be historical, referring more than once to 'the chronicles' of Persia as containing a record of the events in question (10^{2} 2^{23} 6^{1}); and its admission to the Pal. Canon, notwithstanding the absence of any allusion to the Holy Land or to Jewish ordinances, is so far a confirmation of its claim. (2) The Feast of Purim, with which it was so closely connected as to be known among Alex. writers as 'the Epistle of Purim,' and which, in the time of Jos. (*Ant.* XI. vi. 13) was observed by Jews in all parts of the world, is a standing memorial of the remarkable episode in Jewish history which the book records. (3) Its lifelike representation of Pers. manners and customs, especially in connexion with the palace at Susa ($1^{5.10.14}$ $2^{9.21.23}$ $3^{7.12.13}$ $4^{6.11}$ 5^{4} 8^{8}), is borne out by the results of modern travel and research (Rawlinson's *Anc. Monarchies*, iv. pp. 269–287; Morier, Fergusson, Loftus, Dieulafoy), and finds support in Herodotus and other ancient writers. (4) The conduct of Ahasuerus is in harmony with the vain, capricious, passionate character of Xerxes (the identification of the two names was the first result obtained from the deciphering of the cuneiform inscriptions by Grotefend in 1802), as depicted by heathen writers (Herod. vii. ix.; Æsch. *Pers.* 467 ff.; Juv. x. 174–187); and this may account for some things in the narrative that would otherwise seem almost incredible. (5) It appears from
